#### MAACAH

#### MAACAH

MAACAH, and MAACHAH (מַעְכָּה; *Maachá*; in 2 Sam. x. 6 the Vat. Cod. reads *Ἀμαλήκ*, but the Alex. *Maachá*; *Maacha*). 1. A small but very ancient kingdom of Canaan (Deut. iii. 14; 1 Chron. xix. 7). The Gentile noun is *Maachathi*, or *Maachathite* (מַעְכָּתִי; *Maachati*, *Maachati*). The exact position of Maachah is not defined in Scripture, but there are numerous incidental notices which indicate with sufficient exactness the locality. In Deut. iii. 14 it is said, 'Jair took all the country of Argob unto the coasts of the Geshuri and Maachathi.' Argob is unquestionably identical with the modern province of Lejah [ARGOB], and consequently Maachah must have been situated on the borders of that province. From Josh. xii. 5, it appears that the Maachathites lived, not in Bashan, but just adjoining it; and in ch. xiii. 11 they are mentioned in close connection with Hermon:—'And Gilead, and the border of the Geshurites and Maachathites, and all Mount Hermon, and all Bashan unto Salcah.' The Israelites were not able to expel the Maachathites; and Joshua states that 'they dwell among the Israelites unto this day' (xiii. 13). From this it seems highly probable that their territory was one of great natural strength—rocky or mountainous. The Maachathites were, at a later period, closely allied with Damascus; and the principality was then called *Aram-Maachah* (אַרָם-מַעְכָּה; *Syria Maacha*); and from this it may be inferred that it bordered on Aram, and was reckoned a part of it; and thus it must have been on the north of the Trans-Jordanic territories (1 Chron. xix. 6, 7). Again, in 2 Sam. xx. 14, 15, a district called Beth-Maachah is mentioned as within or on the border of Palestine, and Abel, one of its towns, was besieged; and it appears from 2 Kings xv. 29, that this Abel of Beth-Maachah lay between Ijon and Kedes, near Dan (cf. 2 Chron. xvi. 4), and consequently at the western base of Hermon [ABEL-BETH-MAACHAH]. All these incidental notices point to one district, and one alone, as the ancient Maachah. It lay on the northern border of Palestine, and extended from the fountains of the Jordan north-east to the plain of Damascus, and east to the defiles of Argob, or Trachonitis, where the Geshurites appear to have had their home [GESHURITES]. The little kingdom embraced the southern and eastern declivities of Hermon, and a portion of the rocky plateau of

Iturea (Porter's *Damascus*, i. 319; cf. *Journal of Sac. Lit.* for July 1854, p. 310). Bochart makes Maachah a town, and identifies it with the *Epicaros* of Ptolemy, situated near the Dead Sea (*Opera*, i. 79). Reland proves that this view is untenable (*Pal.*, p. 112), and he points out the real position of the province (p. 519). Some recent writers would locate Maachah in the stony desert of *el-Kra* (properly *el-Harra*) away to the east of Bashan (Smith's *Dict. of the Bible*, s. v.); but this seems clearly at variance with the above notices, and there is no other evidence in its favour.\*

The Maachathites, like their neighbours the Geshurites, were a warlike people. They successfully resisted all attempts of the Israelites to expel them (Josh. xiii. 11-13); and they joined the Ammonites in an attempt to resist the growing power of King David (2 Sam. x. 6; 1 Chron. xix. 7). Notwithstanding this, the Israelites appear to have had some friendly intercourse with the tribe, for Eliphelet, one of David's mighty men, was a Maachathite (2 Sam. xxiii. 34); and 'Jaazaniah, the son of a Maachathite,' was a captain in the army of Israel at the time of the captivity (2 Kings xxv. 23). After this the name appears no more in history.

2. The name of several individuals mentioned in Bible history. *Maachah* (מַעְכָּה), a son of Nahor, Abraham's brother (Gen. xxii. 24). May not this man have been the founder of the kingdom, and the progenitor of the Maachathites?

*Maacah* (מַעְכָּה; Alex. *Maachá*), Absalom's mother, and the daughter of Talmi, king of Geshur (2 Sam. iii. 3; 1 Chron. iii. 2). Probably this name may indicate that the Geshurites and Maachathites were of the same stock.

*Maachah* (מַעְכָּה), the mother of Abijam, said in 1 Kings xv. 2 to be the daughter of Abishalom (or Absalom; cf. 2 Chron. xi. 21); but in 2 Chron. xiii. 2, the mother of Abijam is called 'Michaiah' (מִיכָיָה; *Maachá*; *Michaia*), the daughter of Uriel of Gibeah. The solution of the difficulty probably is, that the woman had two names, and that Absalom was her grandfather. The Tar-

\* It is expressly said, in Josh. xiii. 13, that 'the Maachathites dwell among the Israelites until this day,' which would not be true had they inhabited the Harra, but which is true with regard to the region at Hermon.

gumists give a different but much less probable solution.

*Maachah* (Μωχαδ; Alex. Μωχαδ), the wife of Machir the Manassite (1 Chron. vii. 15). Others of this name are mentioned in 1 Kings ii. 39; 1 Chron. ii. 48; viii. 29; xxvii. 16.—J. L. P.

MAALEH AKRABBIM. [AKRABBIM.]

MAARATH (מערת), perhaps = מער, 'a bare place'; Μαγαρώς; Alex. Μαρώς; *Mareth*, a town in the mountains of Judah, included in a group of six, situated north of Hebron (Josh. xv. 59). It is not mentioned after the time of Joshua, and its site has not been discovered.—J. L. P.

MAASEIAH. Twenty-one persons of this name are mentioned in Scripture, but none of them of any note. The Hebrew original appears in three forms—1. מַעֲשִׂיָה, Ezra. x. 18; (Sept. *Maasia*; Alex. *Maasia*); x. 21 (Μασηλ; Alex. *Maaselas*); x. 22; x. 30 (Alex. *Maasia*); Neh. iii. 23 (*Maasias*); viii. 4 (*Maasia*); viii. 7 (omitted in Sept.); x. 25 (*Maasia*; Alex. *Maasias*); xi. 5 (*Maasia*; Alex. *Maasia*); in 1 Chron. xi. 5 he is called Asaiah); xi. 7 (*Maasias*); xii. 41, 42 (Vat. MS. om., Alex. *Maasias*); Jer. xxix. 21; xxix. 25 (*Maasias*).

2. מַעֲשִׂיָהוּ, 1 Chron. xv. 18, 20 (*Maasia*; Alex. *Maasia*); 2 Chron. xxiii. 1 (Alex. *Maasia*); xxvi. 11 (*Maasias*; Alex. *Maasias*); 2 Chron. xxviii. 7 (*Maasias*; Alex. *Maasia*; he is called the 'king's son,' which simply indicates that he was of the blood-royal, or perhaps describes him as occupying the place of viceroy or prime minister; he was certainly not a son of the reigning king Ahaz); 2 Chron. xxxiv. 8 (*Maasid*); Jer. xxxv. 4 (*Maasias*; Alex. *Maasias*).

3. מַאֲסִיָּה, Jer. li. 59 (*Maasias*; Alex. *Maasias*).—W. L. A.

MACCABEES, THE (οἱ Μακκαβαῖοι). The illustrious and heroic family who bore this appellation were descended, according to Josephus (*Antiq.* xii. 6. 1), from one Asamonæus, a citizen of Jerusalem, and a priest of the order of Joarib or Jehoiarib, as the name appears at 1 Chron. xxiv. 7, where it stands first in the twenty-four orders of priests. From this man they were also known by the name of Asmonæans, which is hardly less common than that of Maccabees. The origin of either designation, however, is a matter of extreme uncertainty. The name of Maccabee, according to some, was derived from the banner of the tribe of Dan, which contained the three last letters of the names of Abraham, Isaac, and Jacob. Others imagine that it was made up of the first letters of some words in the 11th ver. of the 15th ch. of Exodus, 'Who is like unto thee, O Lord, among the gods; \* words, therefore, which were conspicuous in the first triumphant war-song of the youthful nation, when they celebrated their deliverance under Moses from the hosts of Pharaoh. Others suppose it to have been a personal appellation of Judas, from the word †

\* מִי־כִמְכָה בְּאֵלֶם יְהוָה. In this case the Greek would shew χ and not κ, as we see in Micah, Malachi, etc. The Peshito supports the κ.

† The words occurring in the Bible are מַקְבֵּית and מַקְבֵּת. There is no מַקְבֵּה as given by Gesenius.

Makkab, meaning a *hammer*, and given to him as a corresponding designation was bestowed on Charles Martel, the hero of the Franks. If Judas, however, was not the first of his family who bore this name, as has been said, this derivation of it would seem to be questionable. With regard to the other name of Asmonæan, it is not more certain what was its original form or meaning. The Hellenistic orthography is ἀσμοναῖος. In Ps. lxxviii. 32 we meet with a word חֲשִׁמֹנִים, to the supposed singular of which, חֲשִׁמֹן, the name in question is commonly referred. In this case it might have been given to the priest of the course of Joarib to signify that he was a wealthy or a powerful person. In Josh. xv. 27 we find a town in the tribe of Judah called חֲשִׁמֹן, from

which this name might equally be derived. Herzfeld's proposed derivation from חֲסֵם, 'to temper steel,' is fanciful and groundless. The word in the first instance appears more like a family than a personal name. The later Hebrew form is חֲשִׁמֹנָאִי.

The first of this family who attained distinction was the aged priest Mattathias, who dwelt at Modin, a city west of Jerusalem and near the sea, but of which the site has not yet been identified by modern ingenuity and research. He was the son of John, the son of Simon, the son of Asamonæus, as Josephus tells us, and was himself the father of five sons—John, otherwise called Caddis; Simon, called Thassi; Judas, called Maccabæus; Eleazar, called Avaran; and Jonathan, surnamed Apphus. Ewald remarks that Simon and John were favourite names in this family. After the expulsion of Antiochus Epiphanes from Egypt by the Romans, that monarch proceeded to vent his rage and indignation on the Jews, B. C. 168. He massacred vast numbers of them in Jerusalem on the Sabbath, took the women captives, and built a fortress on Mount Zion, which he used as a central position for harassing the people around. He ordered one Athenæus to instruct the inhabitants of Judæa and Samaria in the rites of the Grecian religion, with a view to abolishing all vestiges of the Jewish worship. Having succeeded in bringing the Samaritans to renounce their religion, he further went to Jerusalem, where he prohibited the observance of all Jewish ceremonies, obliged the people to eat swine's flesh and profane the Sabbath, and forbade circumcision. The Temple was dedicated to Olympian Jove, and his altar erected upon the altar of burnt-offering, which the first book of Maccabees, apparently quoting Daniel, calls the setting up of the abomination of desolation. When, therefore, Apelles, the king's officer, came to Modin to put in force the royal edict against the national religion, he made splendid offers to Mattathias if he would comply. The old man, however, not only refused, but publicly declared his determination to live and die in the religion of his fathers; and when a certain Jew came forward openly to sacrifice in obedience to the edict, he slew him upon the altar. He slew, moreover, the king's commissioner, and destroyed the altar. Then offering himself as a rallying point for all who were zealous for the law, he fled to the mountains. Many others, with their wives and children, followed his example and fled. They were pursued, however, by the officers of Antiochus, and, refusing

even to defend themselves on the Sabbath day, were slain to the number of 1000. On this occasion the greatness of Mattathias displayed itself in the wise counsel he gave his companions and countrymen, which passed subsequently into the ordinary custom, that they should not forbear to fight upon the Sabbath day when it was in order to defend themselves. While in this position, he was joined by the more austere of the two parties which had sprung up among the Jews after the return from the captivity—viz., the Assideans, *i.e.*, the Hhasidim, or pious [CHASIDIM]; the Puritans, who subsequently became the Pharisees. They not only observed the written law, but superadded the constitutions and traditions of the elders, and other rigorous observances. The other party were called the Tsaddikim, or righteous, who contented themselves with that only which was written in the Mosaic law. Thus strengthened, Mattathias and his comrades carried on a sort of guerilla warfare, and exerted themselves as far as possible to maintain and enforce the observance of the national religion. Feeling, however, that his advancing age rendered him unfit for a life so arduous, while it warned him of his approaching end, he gathered his sons together like the patriarchs of old, exhorted them to valour in a speech of great piety and faithfulness, and having recommended Simon to the office of counsellor or father, and Judas to that of captain and leader, died in the year 166, and was buried in the sepulchre of his fathers at Modin. The allusion that is made in this speech to the history of Daniel, leads Ewald to remark that Mattathias died when the book of Daniel could scarcely have been long written or spread abroad—an assertion, as it seems to us, entirely without foundation, and one that the context appears not to warrant, but rather to refute.

After training and disciplining his troops by many trials and adventures, Judas was bold enough to meet the king's general, Apollonius, who had gathered a large army at Samaria, of which place he was governor, in the open field. He totally defeated his army and slew him. He then divided the spoils, and took the sword of Apollonius for a trophy, which he used all his life afterwards in battle. Exasperated at the defeat of Apollonius, Seron, who was general of the army of Coele-Syria, got together a force, partly composed of Jews, and came against Judas as far as Bethhoron, where he pitched his camp. This place, which had been rendered memorable many centuries before as the site of Joshua's great victory over the allied forces of the Canaanites, was destined now to witness a victory scarcely less glorious, wrought by a small band of Jews, spent and hungry, against the disciplined troops of Syria. Seron was completely overthrown, and his army scattered. Antiochus, though greatly enraged at this dishonour to his arms, was nevertheless compelled, by the condition of his treasury, to undertake an expedition to Armenia and Persia, with a view to recruiting his exhausted finances. He therefore left Lysias, one of his highest lieutenants, to take charge of his kingdom, from the river Euphrates to the confines of Egypt; and having entrusted his son, Antiochus, to his care, and enjoined Lysias to conquer Judæa and destroy the nation of the Jews, he went into Persia. The success of Judas called for immediate attention. The governor of Jerusalem was urgent in his entreaties for assistance. Lysias, therefore,

sent an army of 20,000 men, under the command of Nicanor and Gorgias, into Judæa. It was followed by another of the same number, with an addition of 7000 horse, under Ptolemy Macron, the son of Dorymenes, as commander-in-chief. The united forces encamped in the plains of Emmaus. To oppose this formidable host, Judas could only muster 6000 men at Mizpeh. Here, as Samuel had done a thousand years before at a like period of national calamity, he fasted and prayed, and in compliance with the Mosaic injunction, advised those who were newly married, or had built houses, and the like, to return to their homes. This reduced his number to one-half. The heroic spirit of Judas, however, rose against every difficulty, and he marched towards Emmaus. Having heard that Gorgias had been despatched with a force of 6000 men to surprise him in the passes by night, he instantly resolved to attack the enemies' camp. He rushed upon them unexpectedly, and completely routed them; so that when Gorgias returned baffled and weary, he was dismayed at finding his camp in flames. In the brief struggle which ensued, the Jews were victorious, and took much spoil. The year following, Lysias gathered together an army of 60,000 chosen men, with 5000 horse, went up in person to the hill country of Judæa, and pitched his camp at a place called Bethsura, the Bethzur of the O. T. Here Judas met him with 10,000 men, attacked his vanguard, and slew 5000 of them, whereupon Lysias retreated with the remainder of his army to Antioch. After this series of triumphs Judas proceeded to Jerusalem. There he found the sanctuary desolate, shrubs growing in the courts of it, and the chambers of the priests thrown down; so he set to work at once to purify the holy places, and restore the worship of God. In commemoration of this cleansing of the Temple, the Jews afterwards kept for eight days annually a festival which was called Lights, and was known as the Feast of Dedication (John x. 22\*). Judas, having strongly fortified the citadel of Mount Zion, and placed a garrison at Bethsura, made an expedition into Idumea. The Syrians meanwhile, frustrated in their efforts against Judæa, turned their attention to Galilee and the provinces beyond Jordan. A large army from Tyre and Ptolemais attacked the north, and Timotheus laid waste Gilead, whereupon Judas determined to divide his army into three. He himself, with Jonathan, led 8000 men across the Jordan into Gilead; his brother, Simon, he sent with 3000 into Galilee; and the rest he left behind, under the command of Joseph, the son of Zacharias, and Azarias, for the protection of Judæa, with strict injunctions to act only on the defensive. These orders, however, they imprudently violated by an attack upon the seaport Jamnia, where they met with a signal repulse. But the Maccabees in Gilead and Galilee were triumphant as usual, and added to their renown.

Antiochus Epiphanes meanwhile had died in his Persian expedition, B.C. 164, and Lysias immediately proclaimed his son Antiochus Eupator king; the true heir, Demetrius,† the son of Seleucus, being a hostage at Rome. One of the first acts of Lysias

\* This festival began on the 25th of the month Cisleu (Dec.-Jan.), and fell in the middle of 'winter.'—*Prideaux*, ii. 213. [FESTIVALS.]

† He was the son of the deceased king's elder brother.

was directed against the Jews. He assembled an enormous army of 100,000 men and 32 elephants, and proceeded to invest Bethsura. The city defended itself gallantly. Judas marched from Jerusalem to relieve it, and slew about 5000 of the Syrians. It was upon this occasion that his brother Eleazar sacrificed himself by rushing under an elephant which he supposed carried the young king, and stabbing it in the belly, so that it fell upon him. The Jews, however, were compelled to retreat to Jerusalem, whereupon Bethsura surrendered, and the royal army advanced to besiege the capital. Here the siege was resisted with vigour, but the defenders of the city suffered from straitness of provisions, because of its being the Sabbatical year. They would therefore have had to surrender, but Lysias was recalled to Antioch by reports of an insurrection under Philip, who at the death of Antiochus had been appointed guardian of the young king. He was consequently glad to make proposals of peace, which were as readily accepted by the Jews. He had no sooner, however, effected an entrance into the city, than he violated his engagements by destroying the fortifications, and immediately set out with all haste for the north. There Demetrius Soter, the lawful heir to the Syrian throne, encountered him, and after a struggle Antiochus and Lysias were slain, leaving Demetrius in undisputed possession of the kingdom.

Menelaus, the high-priest at this time, had purchased his elevation to that rank by selling the sacred vessels of the temple. Hoping to serve his own ends, he joined himself to the army of Lysias, but was slain by command of Antiochus. Onias, the son of the high-priest whom Menelaus had supplanted, fled into Egypt, and Alcimus or Jacimus, not of the high-priestly family, was raised to the dignity of high-priest. By taking this man under his protection, Demetrius hoped to weaken the power of the Jews. He despatched Bacchides with Alcimus to Jerusalem, with orders to slay the Maccabees and their followers. Jerusalem yielded to one who came with the authority of the high-priest, but Alcimus murdered sixty of the elders as soon as he got them into his power. Bacchides also committed sundry atrocities in other parts. No sooner, however, had he left Judæa than Maccabæus again rose against Alcimus, and drove him to Antioch, where he endeavoured as far as possible to injure Judas with the king. Upon this Demetrius sent Nicanor with a large army to reinstate Alcimus, and when he came to Jerusalem, which was still held by the Syrians, he endeavoured to get Judas into his power by stratagem, but the plot being discovered, he was compelled to meet him in the field. They joined battle at Capharsalama, and Nicanor lost about 5000 men; the rest fled to the stronghold of Zion. Here he revenged himself with great cruelty, and threatened yet further barbarities unless Judas was delivered up. As the people refused to betray their champion, Nicanor was again compelled to fight. He pitched his camp ominously enough in Beththoron; his troops were completely routed, and he himself slain. The next act of Judas was to make an alliance with the Romans, who entered into it eagerly; but no sooner was it contracted than the king made one more determined effort for the subjugation of Palestine, sending Alcimus and Bacchides, with all the flower of his army, to a place called Berea or Bethzetho, apparently near Jerusalem. The terror excited

by this host was such, that Judas found himself deserted by all but 800 followers, who would fain have dissuaded him from encountering the enemy. His reply was worthy of him, 'If our time be come, let us die manfully for our brethren, and let us not stain our honour.' He fought with such valour that the right wing, commanded by Bacchides, was repulsed and driven to a hill called Azotus or Aza, but the left wing doubled upon the pursuers from behind, so that they were shut in as it were between two armies. The battle lasted from morning till night. Judas was killed, and his followers, overborne by numbers, were dispersed. His brothers Jonathan and Simon received his body by a treaty from the enemy, and buried it in the sepulchre of his fathers at Modin, B.C. 161. Thus fell the greatest of the Maccabees, a hero worthy of being ranked with the noblest of his country, and conspicuous among all, in any age or clime, who have drawn the sword of liberty in defence of their dearest and most sacred rights.

The friends of Judas, after his death, chose Jonathan for their leader. He was glad to seek safety from Bacchides among the pools and marshes of the Jordan, whither he was pursued by him. At the same time, also, his brother John was killed by a neighbouring Arab tribe. Jonathan took occasion to revenge his brother's death upon a marriage-party, for which he lay in wait, and then repulsed an attack of Bacchides and slew a thousand of his men. At this point Alcimus died, and Bacchides, after fortifying the strong towns of Judæa, returned to Antioch; but upon Jonathan again emerging from his hiding-place, Bacchides came back with a formidable army, and was for some time exposed to the desultory attacks of Jonathan, till weary of this mode of fighting, or for other reasons, he thought fit to conclude a peace with him, and returned to his master. The Maccabee was thus left in possession of Judæa, and had not long afterwards an opportunity offered him of consolidating his position; for there sprung up one Alexander Balas, who was believed to be a son of Antiochus Epiphanes, and laid claim to the throne of Syria. Demetrius and Alexander mutually competed for the alliance of Jonathan, but Alexander was successful, having offered him the high-priesthood, and sent him a purple robe and a golden crown—the insignia of royalty—and promised him exemption from tribute as well as other advantages. Jonathan thereupon assumed the high-priesthood, and became the friend of Alexander, who forthwith met Demetrius in the field, slew him, usurped his crown, and allied himself (B.C. 150) in marriage with Cleopatra, the daughter of Ptolemy Philometor, king of Egypt. Jonathan was invited to the wedding, and was made much of at court. In return, he attacked and defeated Apollonius, the general of Demetrius Nicator, who aspired to his father's throne, besieged Joppa, captured Azotus, and destroyed the temple of Dagon. The prosperity, however, of Alexander was of short duration, for Ptolemy, being jealous of his power, marched with a large army against him, and after putting him to flight, seized his crown, and gave his wife to Demetrius. On the other hand, the overthrow of Alexander was speedily followed by the death of Ptolemy, and Demetrius was left in possession of the throne of Syria. Jonathan, meanwhile, besieged Jerusalem, and leaving it invested repaired to Antioch. Demetrius not only

welcomed but entered into a treaty with him, upon terms that greatly augmented the power of the Maccabee. After this Demetrius disbanded the greater part of his army and lessened their pay, which being a course contrary to that pursued by former kings of Syria, who kept up large standing armies in time of peace, created great dissatisfaction, so that upon the occasion of Jonathan writing to him to withdraw his soldiers from the strongholds of Judæa, he not only complied but was glad to ask for the assistance of 3000 men, who were forthwith sent to Antioch. Here they rendered him signal service in rescuing him from an insurrection of his own citizens that his behaviour to them had aroused. His friendship for Jonathan, however, was soon at an end, and, contrary to his promises, he threatened to make war upon him unless he paid the tribute which previous kings had exacted. This menace might have been carried out had not a formidable antagonist at home arisen in the person of Trypho, who had formerly been an officer of Alexander Balas, and had espoused the cause of his young son Antiochus Theos. This man attacked Demetrius, defeated him in battle, captured his city, drove him into exile, and placed his crown on the head of Antiochus, B.C. 144. One of the first acts of the new king was to ingratiate himself with Jonathan; he therefore confirmed him in the high-priesthood, and appointed him governor over Judæa and its provinces, besides showing him other marks of favour. His brother Simon he appointed to be general over the king's forces from what was called the Ladder of Tyre—viz., a mountain lying on the sea-coast between Tyre and Ptolemais, even to the borders of Egypt. Jonathan in return rendered good service to Antiochus, and twice defeated the armies of Demetrius. He then proceeded to establish his own power by renewing the treaty with Rome, entering into one also with Lacedæmon, and strengthening the fortifications in Judæa. He was destined, however, to fall by treachery, for Trypho, having persuaded him to dismiss a large army he had assembled to support Antiochus, decoyed him into the city of Ptolemais, and then took him prisoner. The Jews immediately raised Simon to the command, and paid a large sum to ransom Jonathan. Trypho, however, took the money, but instead of releasing Jonathan put him to death, and then, thinking that the main hindrance to his own ambitious designs was removed, caused Antiochus to be treated in the same manner. Thus fell the third of the illustrious Maccabæan race, who distinguished himself nobly in the defence of his country, B.C. 143.

When Simon heard of his brother's death he fetched his bones from Bascama, where he had been buried, and had them interred at Modin. Here he erected to his memory a famous monument of a great height, built of white marble, elaborately wrought, near which he placed seven pyramids, for his father and mother and their five sons, the whole being surrounded with a stately portico. For many years afterwards this monument served the purpose of a beacon for sailors, and it was standing in the time of Eusebius. The policy of Simon led him to espouse the cause of Demetrius against Trypho. He was consequently confirmed in his position of sovereign high-priest. He then turned his attention to establishing the internal peace and security of his kingdom. He fortified Bethsura, Jamnia, Joppa, and Gaza, and

garrisoned them with Jewish soldiers. The Lacedæmonians sent him a flattering embassy, desiring to renew their treaty; to Rome also he sent a shield of gold of immense value, and ratified his league with that nation. He moreover took the citadel of Jerusalem by siege, and besides pulling it down, even levelled the hill on which it was built, with immense labour, that so the temple might not be exposed to attacks from it. Under the wise government of this member of the Asmonæan family Judæa seems to have attained the greatest height of prosperity and freedom she had known for centuries, or even knew afterwards. The writer of the first book of the Maccabees evidently rejoices to remember and record it. 'The ancient men,' he says, 'sat all in the streets communing together of good things, and the young men put on glorious and warlike apparel. He made peace in the land, and Israel rejoiced with great joy. For every man sat under his vine and his fig-tree, and there was none to fray them' (xiv. 9, 11, 12). This time of quiet repose Simon employed in administering justice and restoring the operation of the law. He also beautified the sanctuary, and refurnished it with sacred vessels. In the meantime Demetrius had been taken prisoner in an expedition against the Parthians, whereupon his brother Antiochus Sidetes\* immediately endeavoured to overthrow the usurper Trypho. Availing himself of a defection in his troops, he besieged him in Dora, a town upon the sea-coast a little south of Mount Carmel. Simon sent him 2000 chosen men, with arms and money, but Antiochus was not satisfied with this assistance while he remembered the independence of Palestine. He therefore refused to receive them, and moreover despatched Athenobius to demand the restoration of Joppa, Gaza, and the fortress of Jerusalem, or else the payment of a thousand talents of silver; but when the legate saw the magnificence of the high-priest's palace at Jerusalem he was astonished, and as Simon deliberately refused to comply with the terms of the king's message, and offered by way of compensation only a hundred talents for the places in dispute, Athenobius was obliged to return disappointed and enraged. Trypho meanwhile escaped from Dora by ship to Orthosia, a maritime town in Phœnicia, and Antiochus, having deputed Cendebæus to invade Judæa, pursued him in person. The king's armies proceeded to Jamnia, and having seized Cedron and fortified it, Cendebæus made use of that place as a centre from which to annoy the surrounding country. Simon at this time was too old to engage actively in the defence of his native land, and therefore appointed his two eldest sons, Judas and John Hyrcanus, to succeed him in the command of the forces. They forthwith set themselves at the head of 20,000 men, and marched from Modin to meet the king's general: they utterly discomfited and scattered his host, drove him to Cedron, and thence to Azotus, which they set on fire, and afterwards returned in triumph to Jerusalem. But destruction threatened their house from nearer home; for Ptolemy, the son of Abubus, who had married a daughter of Simon, and was governor in the district of Jericho, with plenty of money at his command, aspired to reduce the country under his dominion, and took occasion, upon a visit that

\* *i.e.*, the hunter; a Greek appellation formed on a Semitic root.

Simon paid to that neighbourhood, to invite him and two of his sons with their followers to a banquet, and then slew them. John alone, whose forces were at Gaza, now survived to carry on the line of the Maccabees, and sustain their glory, B.C. 135. He likewise had been included in the treacherous designs of Ptolemy, but found means to elude them. With the death of Simon the narrative of the first book of the Maccabees concludes.

We trace now the fortunes of the next member of the family, John Hyrcanus. Having been unanimously proclaimed high-priest and ruler at Jerusalem, his first step was to march against Jericho, and avenge the death of his father and brothers. Ptolemy held there in his power the mother of Hyrcanus and her surviving sons, and shutting himself up in a fortress near to Jericho—which Josephus calls Dagon, and Ewald, Dök—he exposed them upon the wall, scourged and tormented them, and threatened to throw them down headlong, unless Hyrcanus would desist from the siege. This had the effect of paralyzing the efforts of Hyrcanus, and in spite of his heroic mother's entreaties to prosecute it with vigour, and disregard her sufferings, caused him to protract it till the approach of the Sabbatical year obliged him to raise the siege. Ptolemy, after killing the mother and brethren of Hyrcanus, fled to Philadelphia,\* which is the last we hear of him. It is not easy to see why Milman calls this reason of the Sabbatical year, which is the one assigned by Josephus, 'improbable.' Ewald assigns the approach of that year as a reason for the flight of Ptolemy to Zeno, the tyrant of Philadelphia, because it had already raised the price of provisions, so that it became impossible for him to remain. Antiochus meanwhile, alarmed at the energy displayed by John, invaded Judæa, burning up and desolating the country on his march, and at last besieging him in Jerusalem. He compassed the city with seven encampments and a double ditch, and Hyrcanus was reduced to the last extremities. On the recurrence, however, of the Feast of Tabernacles, Antiochus granted a truce for a week, and supplied the besieged with sacrifices for the occasion, and ended with conceding a peace, on condition that the Jews surrendered their arms, paid tribute for Joppa and other towns, and gave him 500 talents of silver and hostages. On this occasion Josephus says that Hyrcanus opened the sepulchre of David, and took out of it 3000 talents, which he used for his present needs and the payment of foreign mercenaries. This story is utterly discredited by Prideaux, passed over in silence by Milman, but apparently believed by Ewald. Some time afterwards, having made a league with Antiochus, he marched with him on an expedition to Parthia, to deliver Demetrius Nicator, the king's captive brother. This expedition proved fatal to Antiochus, who was killed in battle. Demetrius, however, made his escape, and succeeded him on the throne of Syria, whereupon Hyrcanus availed himself of the opportunity to shake off the Syrian yoke, and establish the independence of Judæa, which was maintained till the time of the subjugation by the Romans. He took two towns beyond the Jordan, Samega and Medaba, as well as the city of Sichem, and destroyed the hated Samaritan temple on Mount Gerizim, which for 200 years had been an object of abhorrence to the Jews. He

then turned his arms towards Idumea, where he captured the towns of Dora (Ewald spells it Adora) and Marissa, and forced the rite of circumcision on the Idumeans, who ever afterwards retained it. He proceeded further to strengthen himself by renewing a treaty, offensive and defensive, with the Romans. Demetrius, meanwhile, had little enjoyment of his kingdom. He was unacceptable to the army, who besought Ptolemy Physcon to send them a sovereign of the family of Seleucus, and he accordingly chose for them Alexander Zebina, a pretended son of Alexander Balas. Demetrius was beaten in the fight which ensued between them, and subsequently slain; whereupon Alexander took the kingdom and made a league with Hyrcanus. He found a rival, however, in the person of Antiochus Grypus, the son of Demetrius, who defeated and slew him. The struggle which now took place between the brothers Grypus and Cyzicenus, rivals for the throne, only tended to consolidate the power of Hyrcanus, who quietly enjoyed his independence and amassed great wealth. He likewise made an expedition to Samaria, and reduced the place to great distress by siege. His sons, Antigonus and Aristobulus, were appointed to conduct it, and when Antiochus Cyzicenus came to the relief of the Samaritans, he was defeated and put to flight by Aristobulus. Cyzicenus, however, returned with a reinforcement of 6000 Egyptians, and ravaged the country, thinking to compel Hyrcanus to raise the siege. The attempt was unsuccessful, and he retired, leaving the prosecution of the Jewish war to two of his officers. They likewise failed, and, after a year, Samaria fell into the hands of Hyrcanus, who entirely demolished it, and having dug trenches on the site, flooded it with water. After this Hyrcanus, who himself belonged to the sect of the Pharisees, was exposed to some indignity from one of their party during a banquet, which exasperated him so far that he openly renounced them, and joined himself to the opposite faction of the Sadducees. This occurrence, however, does not seem to have prevented him from passing the remainder of his days happily. He built the palace or castle of Baris on a rock within the fortifications of the temple. Here the princes of his line held their court. It was identical with what Herod afterwards called Antonia. There is some confusion as to the length of his reign. It probably lasted about thirty years. He left five sons. With him terminates the upper house of the Asmonæans or Maccabees, B. C. 107.

Aristobulus succeeded his father as high-priest and supreme governor. He was the first also, after the Captivity, who openly assumed the title of king. He threw his mother, who claimed the throne, into prison, and starved her to death. Three of his brothers, also, he held in bonds. Antigonus, the other one, by whose help he subdued Iturea or Auranitis, a district at the foot of the Anti-libanus, was killed by treachery; and, after a year of misery and crime, Aristobulus died. His wife, Salome or Alexandra, immediately released his brethren, and Alexander Jannæus was made king. One of his brothers, who showed signs of ambition, he slew, the other one he left alone. His first military act was the siege of Ptolemais, which was in the hands of the Syrians. The inhabitants sought help from Ptolemy Lathyrus, who governed Cyprus, but fearing the army of 30,000 men he brought with him, declined to open

\* Formerly 'Rabbath of the children of Ammon.'

their gates to him, whereupon he attacked Gaza and Dora. Alexander pretended to treat with him for the surrender of these places, and at the same time sent to Cleopatra, the widow of Physcon, for a large army to drive him from Palestine. He detected the duplicity of this conduct, and took ample vengeance on Alexander by ravaging the country. He also defeated him with the loss of 30,000 men. Judæa was saved by a large army from Cleopatra, commanded by Chelcias and Ananias, two Jews of Alexandria. They pursued Ptolemy into Cœle-Syria, and besieged Ptolemais, which was reduced. Alexander next invaded the country beyond Jordan. Here also he was defeated, but not thereby discouraged from attacking Gaza, which, after some fruitless attempts, he captured and totally destroyed. His worst enemies, however, were the Pharisees, who had great influence with the people, and a sedition arose during the Feast of Tabernacles, in which the troops slew 6000 of the mob. He again invaded the Trans-Jordanic country, and was again defeated. The Jews rose in rebellion, and for some years the land suffered the horrors of civil war. The rebels applied for aid to Demetrius Eucærus, brother of Ptolemy Lathyrus, and king of Damascus, who completely routed Alexander. A sudden change of fortune, however, put him at the head of 60,000 men, and he marched in triumph to Jerusalem, where he took signal vengeance on his subjects. The rest of his life was peaceful. After a reign of twenty-seven years he died, B. C. 79, solemnly charging his wife, Alexandra, to espouse the Pharisaic party, if she wished to retain her kingdom. His eldest son, Hyrcanus II., became high-priest. Aristobulus, the younger son, espoused the opposite party to his mother. In order to employ his active mind, the queen sent him northwards to check the operations of Ptolemy, king of Chalcis. He got possession of Damascus, and won the affections of the army. After a reign of nine years his mother died, B. C. 70, and Aristobulus forthwith marched towards Jerusalem. Hyrcanus and the Pharisees seized his wife and children as hostages, and met his army at Jericho, but were discomfited, and Aristobulus entered Jerusalem and besieged his brother in the tower of Baris. At length they agreed that Hyrcanus should retire to a private station, and that Aristobulus should be king. This was a fatal blow to the Pharisees. But there was a worse enemy waiting for the conqueror. This was none other than Antipater the Idumean, who had been made general of all Idumea by Alexander Jannæus. He was wealthy, active, and seditious, and possessed, moreover, of great influence with the deposed Hyrcanus. Suspicious of the power, successes, and designs of Aristobulus, he persuaded his brother Hyrcanus to fly to Petra, to Aretas king of Arabia, and with his help an army of 50,000 men was marched against Aristobulus. The Jews were defeated, and the usurper fled to Jerusalem, where he was closely besieged by Aretas, Antipater, and Hyrcanus. Here, however, deliverance was at length brought by Scaurus, the general of Pompey, who, having come to Damascus, and finding that the city had been taken by Metellus and Lollius, himself proceeded hastily into Judæa. His assistance was eagerly sought by both parties. Aristobulus offered him 400 talents, and Hyrcanus the same; but as the former was in possession of the treasure, Scaurus thought that his

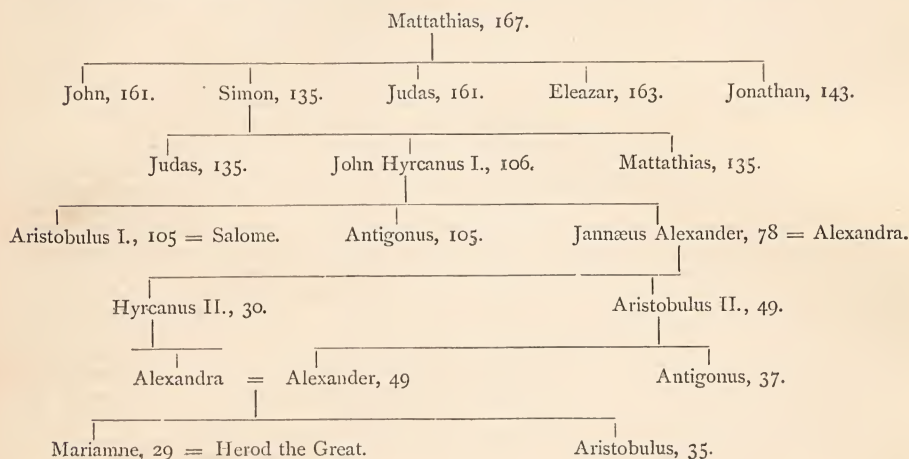

promises were the most likely to be fulfilled, and consequently made an agreement with Aristobulus, raised the siege, and ordered Aretas to depart. He then returned to Damascus; whereupon Aristobulus gathered an army, defeated Aretas and Hyrcanus, and slew 6000 of the enemy, together with Phalion, the brother of Antipater. Shortly after Pompey himself came to Damascus, when both the brothers eagerly solicited his protection. Antipater represented the cause of Hyrcanus. Pompey, however, who was intent on the subjugation of Petra, dismissed the messengers of both, and on his return from Arabia marched directly into Judæa. Aristobulus fled to Jerusalem, but finding the city too distracted to make good its defence, offered to surrender. Gabinus was sent forward to take possession; meanwhile the soldiery had resolved to resist, and when he came he was surprised to find that the gates were shut, and the walls manned. Pompey, enraged at this apparent treachery, threw Aristobulus into chains, and advanced to Jerusalem. The fortress of the Temple was impregnable except on the north, and notwithstanding his engines, Pompey was unable to reduce it for three months, neither could he have done so then, had it not been for the Jewish scruples about observing the Sabbath. The Romans soon found that they could prosecute their operations on that day without disturbance; and after a time the battering-rams knocked down one of the towers, and the soldiers effected an entrance (Midsummer B. C. 63), on the anniversary of the capture of the city by Nebuchadnezzar. Great was the astonishment of Pompey at finding the Holy of Holies empty, without an image or a statue. The wealth he found in the building he magnanimously left untouched; Hyrcanus he reinstated in the high-priesthood; the country he laid under tribute; the walls he demolished; Aristobulus and his family he carried captives to Rome. Alexander, the son of Aristobulus, on the journey made his escape, and, raising a considerable force, garrisoned Machærus, Hyrcania, and the stronghold of Alexandrion. Gabinus, however, subdued him, but had no sooner done so than Aristobulus likewise escaped from Rome, and entrenched himself in Alexandrion. He was taken prisoner, and sent in chains to Rome. At the entreaty of his wife, who had always espoused the Roman cause, Antigonus his son was released, but he remained a prisoner. Alexander, with 80,000 men, once more tried his strength with the Romans on the field of battle, but was put to flight. He was subsequently executed by Metellus Scipio at Antioch, B. C. 49. Thus Hyrcanus retained the sovereignty, but Antipater enjoyed the real power; he contrived to ingratiate himself with Cæsar, who made him a Roman citizen and procurator of all Judæa. He began to rebuild the walls of Jerusalem, and made his eldest son, Phasael, governor of that city; and his younger son, Herod, governor of Galilee. The latter soon began to distinguish himself against the banditti that infested the hills. He carefully contrived also to make friends with the Roman governor of Syria, as a step to his own aggrandisement. His riches enabled him to do this by means of enormous bribes. He found, however, a troublesome enemy in Antigonus, the son of Aristobulus, who allied himself with the Parthians, and for a time held Jerusalem and kept Herod in check.

At Masada, also, a city on the west coast of the Dead Sea, Antigonus was nearly successful, until Herod at last compelled him to raise the siege. He afterwards suffered a defeat by Herod, and was finally vanquished by the Roman general Sosius, who in derision called him by the female name Antigona, and sent him in chains to Antony, by whom, at the request of Herod, he was put to death, B.C. 37. Thus fell the last of the Maccabees, who seemed to inherit something of their ancient spirit. Hyrcanus, who before this had been incapacitated for the priesthood by having his ears cut off, was subsequently, B.B. 30, in his

eightieth year, put to death by Herod. The latter, meanwhile, by Augustus and Antony, was made king of Judæa, and consolidated his throne by his marriage with Mariamne, a woman of incomparable beauty, the daughter of Alexander, son of Aristobulus, by Alexandra, the daughter of Hyrcanus II., and therefore grand-daughter to both brothers. In her the race of the Asmonæans came to an end, and by her marriage passed into the Idumæan line of the Herodians.

The following scheme will best illustrate the Maccabæan history. The dates given are those of the death in each case in years B.C.

For a table of contemporary Syrian kings, see vol. i. 162; and for further information, see *The books of the Maccabees*; Joseph. *Antiq.*, from book xii. 6. to book xiv.; Milman, *Hist. of Jews*, vol. ii.; Prideaux, *Connection*, vol. ii., Oxford 1838; Ewald, *Geschichte des V. Israel*, vol. iii. pt. 2; and Herzfeld, *Geschichte d. Volk. Isr.*—S. L.

MACCABEES, THE FIRST BOOK OF, one of the five apocryphal productions which have come down to us under this common title.

1. *Title and position of the Book.*—In the editions of the Sept. which we follow, this book is called *the first of Maccabees* (Μακκαβαίων α'), because in the MSS. it is placed at the head of those apocryphal books which record the exploits and merits of the Maccabæan family in their struggles for the restoration of their ancestral religion and the liberation of their Jewish compatriots from the Seleucidian tyranny. According to Origen, however (comp. Euseb., *Hist. Ecclesiast.*, vi. 25), the original Hebrew title of this book was Σαββηθ Σαββαὲ ἐλ. Great difficulty has been experienced in the endeavour to obtain the exact Hebrew equivalent to these words. They have been resolved—1. Into

בני אל (or שרי), *שרבת שרי בני אל*, *History of the princes of the sons of God*, i. e., of Israel (Michaelis, *Orient. Biblioth.*, xii. 115, and most modern commentators).

2. Into שרביט שר בני אל, *the sceptre of the prince of the sons of God*, i. e., of Simon, who is called prince in 1 Maccab. xiii. 41; xiv. 47 (Bochart, Buddens, and Ewald, *Geschichte d. V. Israel*, iv. 528). But this makes chapters xiii.-xvi. the prin-

cipal part of the book, and the rest a mere introduction. 3. Into שר בית שר בני אל *Princeps templi* (i. e., pontifex maximus), *Princeps filiorum Dei* (i. e., dux populi Judaici), based upon the words Σίμωνος ἀρχιερέως μεγάλου καὶ στρατηγικοῦ καὶ ἡγουμένου Ἰουδαίων, 1 Maccab. xiii. 42; and ἐπὶ Σίμωνος ἀρχιερέως ἐν Σαμαρέλ, *ibid.* xiv. 27 (Wernsdorf, *Commentat. de fide libb. Maccab.*, p. 173);

and 4. Into שרביט סרביני אל, *sceptrum rebellium Dei*, i. e., of the Syrian kings, who were regarded as rebelling against God because they persecuted the Jews (Junius, Huetius, etc.), or as Herzfeld, who espouses this solution of the words, explains it, *the chastising rod of the apostates*, which he submits is an appropriate appellation of the Maccabæans (*Geschichte d. V. Israel*, i. p. 265). We incline to the first explanation, because it escapes the censure which the second incurs, and is less artificial than the third and fourth. It must, however, be remarked, that this title does not occur in the Hebrew literature, and that both the ancient and modern Jews call the book ספר החשמונאים, *the book of the Hashmoneans*; ראשון לחשמונאים, *I. Hashmoneans*; כונולת בית חשמונאי, *the scroll of the family of the Hashmoneans*, or simply חשמונאי, *the scroll of the Hashmoneans*, after the title *Hashmoneans*, or *Ashmoneans*, by which the Maccabæan family are denominated [MACCABEES, THE]. Though the book occupies the first position, it ought, according to the historic order, to be the fourth of Maccabees, inasmuch as its narrative commences at a later period than the other three books. Tradition, however,

in determining the priority of position, was evidently guided by the age and the intrinsic value of these books, since 1 Maccab. is obviously the oldest, and surpasses the other three books in importance. Cotton, in his translation of the Maccabees, has departed from this traditional and commonly accepted arrangement, and placed the *first* book as second in order.

2. *Contents and Division of the Book.*—This book contains a lucid and chronological history of the tyrannical proceedings of Antiochus Epiphanes, commencing with the year 175 B.C., and of the series of patriotic struggles against this tyranny, first organised by Mattathias, 168 B.C., down to settled sovereignty and death of Simon, 135 B.C., thus embracing a period of forty years. The whole is divisible into *four parts*, according to the four periods during which the four successive high-priests and princes, Mattathias, Judas Maccabeus, Jonathan, and Simon, ruled over the people and led their armies against the heathen oppressors.

i. The *first part*, of which Mattathias is the hero, comprises chap. i.-ii. 70, and embraces a period from the commencement of Antiochus Epiphanes's reign to the death of Mattathias, 175-167 B.C.

ii. The *second part*, of which Judas Maccabeus is the hero, comprises chap. iii. 1-ix. 22; and describes the exploits and fame of this defender of the faith, 167-160 B.C.

iii. The *third part*, of which Jonathan the high-priest, surnamed Apphus (Ἀπφούς=אֶפְסוּס, *the simulator, the sly one*), is the hero, comprises ch. ix. 23-xii. 53, and records the events which transpired during the period of his government, 160-143 B.C.

iv. The *fourth part*, of which Simon surnamed Thassi (Θασσί=תָּרְסִי, *the flourishing*) is the hero, comprises ch. xiii. 1-xvi. 24, and records the events which occurred during his period of government, 143-135 B.C.

3. *Historical and Religious Character of the Book.*

—There is no book among all the Apocrypha which is distinguished by greater marks of trustworthiness than 1 Maccab. Simplicity, credibility, and candour, alike characterise its description of friends and foes, victories and defeats, hopes and fears. When the theme so animates the writer that he gives expression to his feelings in lyric effusions (*e.g.*, i. 25-28; 37-40; ii. 7-13; 49-68; iii. 3-9; 18-22; iv. 8-11; 30-33, 38; vi. 10-13; vii. 37, 38, 41, 42), no poetic exaggerations and hyperboles deprive the description of its substantially historic character. When recording the victories of his heroes, struggling for their liberties and their religion, he wrests no laws of nature from their regular course to aid the handful of Jewish champions against the fearful odds of their heathen oppressors; and, when speaking of the arch-enemy, Antiochus Epiphanes (i. 10, etc.), he indulges in no unjust and passionate vituperations against him. Even the few historical and geographical inaccuracies in the description of foreign nations and countries, such as the foundation of the Greek empire in the East (1 Maccab. i. 5-9), the power and constitution of Rome (viii. 1-16), 'the great city Elymais in the country of Persia' (vi. 1), etc., so far from impairing the general truthfulness of the narrative when it confines itself to home and the immediate past, only show how faithfully the writer has depicted the general notions of the time, and for this reason are of intrinsic value and instructive. That the writer used written sources,

and important official documents, in his history, is evident from viii. 2, etc.; x. 18, etc.; 25-45; xi. 30-37; xii. 5-23; xiii. 36-40; xiv. 25, etc.; xv. 2-9; xvi. 23, 24; some of these passages being expressly described as *copies* (ἀντίγραφα).

Though its strictly historical character precludes any description of the religious and the theological notions of the day, so that no mention is made in it of a coming Messiah, or a future state, even in the dying speech of Mattathias, wherein he exhorts his sons to sacrifice their lives for the law of God and the covenant of their fathers, and recounts the faith and rewards of Abraham, Joseph, Phinehas, Joshua, Caleb, David, Elijah, Hananiah, Azariah, Mishael, and Daniel (ii. 49-60);\* yet the whole book is permeated with the true spirit of religion and piety. God is throughout acknowledged as overruling all the machinations of the enemy, and prayer is offered up to him for success after all the preparations are made for battle, and before the faithful host encounter their deadly enemies (iii. 18, 19, 44, 48, 53, 60; iv. 10, etc., 24, 25, 30, etc.; v. 34, 54; vii. 36-38, 41, 42; ix. 45, *al.*); and even the tyrant Antiochus Epiphanes is made to acknowledge in his dying hour that he is punished for profaning the Temple and destroying the inhabitants of Judea (vi. 8-13).

4. *Author, Date, and Original Language of the Book.*—All that can be said with certainty about the author of this book is that he was a Palestinian Jew. This is indicated by the whole spirit which pervades the book, by the lively sympathies which the writer manifests for the heroes whom he describes, and by his intimate acquaintance with the localities of Palestine. Not so certain, however, is its date. Prideaux, Michaelis, Hengstenberg, Bertheau, Welte, Scholtz, Keil, and others, though discarding the notion of Lapide, Huet, etc., that John Hyrcanus was the author, are yet of opinion that the concluding words, τὰ λοιπὰ τῶν λόγων Ἰωάννου καὶ τῶν πόλεμων αὐτοῦ . . . ἰδοὺ ταῦτα γέγραπται ἐπὶ βιβλίῳ ἡμερῶν ἀρχιερωσύνης αὐτοῦ, ἀφ' οὗ ἐγενήθη ἀρχιερεὺς μετὰ τὸν πατέρα αὐτοῦ (xvi. 24), plainly show that the book was written during the government of this high-priest, perhaps about 120-106 B.C.; inasmuch as this passage only gives the *terminus a quo* of the high-priesthood of John, without the *terminus ad quem*, thus indicating that John was still living and that his pontificate was not as yet terminated. After the close of the priesthood, or after the death of John, this remark would be superfluous; because no reader could take the words, 'diary of his priesthood,' in any other sense than that they denote a chronicle of the whole duration of it from beginning to the end. Nor can the words εἰς τῆς ἡμέρας ταύτης, in xiii. 30, be adduced as implying a later date; for it was something remarkable that, in those days of war and devastation, the sepulchre which Simon made for his family in Modin remained between twenty and thirty years unhurt. Eichhorn, Bertholdt, De Wette, Ewald, Grimm, and others, however, maintain that the book was written after the death of

\* This absence of even the remotest allusion to a future state in the hour of death, or to a resurrection of the dead, it must be confessed, rather favours the conclusion of the ingenious, but daring critic, Dr. Geiger, rabbi at Breslau, that the author of this book was a Sadducee (comp. *Urschrift und Uebersetzung der Bibel*, p. 216, ff.)

John Hyrcanus, oscillating between 105 and 64 B.C. That this book was originally written in Hebrew is not only attested by Origen, who gives the Hebrew title of it (*vide supra*, sec. 1), and by St. Jerome, who saw it (*Maccabæorum primum librum Hebraicum reperi*—*Prol. Gal. ad Libr. Reg.*), but is evident from the many Hebraisms which are literal translations of the Hebrew (comp. καὶ ἡτοιμάσθη ἡ βασιλεῖα=ותכן מלכות, i. 16, with Sept. 1 Sam.

xx. 31; 1 Kings ii. 12: εἰς διάβολον πονηρόν=לשטן רע, i. 36; ἐν τῷ ἐλέω αὐτοῦ=בחסדו, ii. 57, with Jer. ii. 2; ἀπολλυμένοις=אבדים, iii. 9; ἀπὸ γένους τῆς βασιλείας=מזע הכלוכה, iii. 32, with Jer. xli. 1), as well as from the difficulties in the Greek text, which disappear on the supposition of mistakes made by the translator (comp. καὶ ἐσεΐσθη

ἡ γῆ ἐπὶ τοὺς κατοικοῦντας αὐτήν=ותרעש הארץ על יושביה, i. 28; ἐγένετο δὲ ναὺς αὐτῆς ὡς ἀνήρ ἄδοξος=ביתה כבית איש נבוה, i. e., ביתה כאיש נבוה, ii. 8; see also ii. 34; iii. 3; iv. 19, 24, etc.) The Hebrew of this book, however, like that of the later canonical writings of the O. T., had a considerable admixture of Aramaic expressions (comp. i. 5; iv. 19; viii. 5; xi. 28; and Grimm's *Comment.* on these passages).

As to the Hebrew *Megillath Antiochus* (מגלת אנטיוכוס) still existing, which was first published in the editions of the Pentateuch of 1491 and 1505 along with the other *Megilloth*; is given in the Spanish and Italian Ritual for the Festivals (מזוורים) of 1555-56, etc.; is inserted, with a Latin translation, in Bartolucci's *Bibliotheca Magna Rabbinica*, vol. i. p. 383; is printed separately, without the translation, Berlin 1766; and which has recently been republished by Jellinek in his *Beth Ha-Midrash*, i. 142-146—this simply gives a few of the incidents of the Maccabean wars, and makes John the high-priest, who it says slew Nicanor in the Temple, play the most conspicuous part. It tells us that Antiochus began persecuting the Jews in the 23d year of his reign and 213th after the building of the second Temple; and that the descendants of the Maccabees, who crushed the armies of this tyrant, ruled over Israel 206 years, thus following the chronology of the Talmud (comp. *Avoda Zara* 9, a; *Seder Olam Sutta*; De Rossi, *Meor Enajim*, c. xxvi; Zunz, *Gottesdienst. Vorträge*, p. 134). That the Aramaic (Chaldee), which was for the first time published by Filipowski, together with the Hebrew and an English version (London 1851), is the original, and that the Hebrew is a translation, may be seen from a most cursory comparison of the two texts. The Hebrew version slavishly imitates the phrases of the Aramaic original instead of giving the Hebrew idioms. Thus, for instance, the Chaldee בעת שעתה שעה is rendered in the Hebrew version by באותה שעה, instead of בעת ההיא; איש אל אחיו אלה, instead of אלה לאלה, אלן לאלן

איש אל רעהו, etc. It is perfectly astonishing that this document—which was evidently got up about the 7th century of the Christian era, to be recited on the Feast of Dedication in commemoration of the Maccabean victories over the enemies of Israel—should be regarded by Hengstenberg (*Genuineness of Daniel*, Eng. transl., p. 237) as the identical 'Chaldee copy of the first book of Maccabees to which Origen and Jerome refer.' Hengstenberg, moreover, most blunderingly calls

the Hebrew version published by Bartolucci the Chaldee.

5. *Canonicity and Importance of the Book.*—This book never formed a part of the Jewish canon, and is excluded from the canon of sacred books in the catalogues of Melito, Origen, the Council of Laodicea, St. Cyril, St. Hilary, St. Athanasius, St. Jerome, etc. In the Chronicle of Eusebius it is put into the same category as the writings of Josephus and Africanus, so as to distinguish it from the inspired writings, with the remark, 'What we have hitherto related concerning the annals of the Hebrews, is taken out of the Holy Scriptures; what follows is taken out of the books of the Maccabees, Josephus, and Africanus.' Still the book is cited with high respect, and as conducive to the edification of the church at a very early period (August., *De Civit. Dei*, lib. xviii., c. 36). The councils at Hippo and Carthage (A. D. 393 and 397) first formally received it into the canon, and in modern times the Council of Trent has settled for the Catholic Church all disputes about its canonical authority, by putting it into the catalogue of inspired Scripture.

But though the Protestant Church rejects the decisions of these councils, and abides by the ancient Jewish Canon, yet both the leaders of the Reformation and modern expositors rightly attach great importance to this book. The great value of it will be duly appreciated when it is remembered that it is one of the very few surviving records of the most important, but very obscure, period of the Jewish history, between the close of the O. T. and the beginning of the N. T. It is, therefore, not to be wondered at that the far-seeing Luther remarks, in his introduction to the translation of this book—'This is another of those books not included in the Hebrew Scriptures, although in its discourses and description it almost equals the other sacred books of Scripture, and would not have been unworthy to be reckoned among them, because it is a very necessary and useful book for the understanding of the prophet Daniel in the eleventh chapter' (*Vorrede auf das erste Buch Maccabæorum*, German Bible, ed. 1536). It is rather surprising that the Anglican Church has not prescribed any lessons to be read from this book. A reference to 1 Maccab. iv. 59, however, is to be found in the margin of the A. V., John x. 22.

6. *Versions and Literature.*—The Greek version given in the editions of the Sept., which must have been made very shortly after the publication of the original Hebrew, since Josephus had already used it (comp. *Antiq.* xii., xiii.), is easy, simple, and unaffected in style, and there can be little doubt that the translator was conversant with the Sept., and frequently used its phraseology and renderings (comp. i. 54; ii. 63; vii. 9, 23; xiv. 9, etc.) From it was made the old Latin version current before Jerome, which is now incorporated in the Romish Vulgate, and an earlier text of which, following more literally the Greek, and comprising ch. i.-xiv. 1, was published by Sabatier from a very ancient MS. in the Library of St. Germain at Paris (*St. Germain MS.* 15). Angelo Mai has also published a fragment of another Latin translation, comprising ch. ii. 49-64, which differs very materially from both texts (*Specilegium Romanorum*, vol. ix. p. 60, *seq.*) The old Syriac version given in the Paris and London Polyglotts, and by De Lagarde, *Libri Veteris Testamenti Apocryphi*

*Syriace*, London 1861, is, like the Latin, made literally from the Greek. Of commentaries and exegetical helps, are to be mentioned the works of Drusus and Grotius, reprinted in the *Critici Sacri*; Calmet, *Commentaire Literal*, etc., vol. viii., Paris 1724; Michaelis, *Deutsche Uebersetzung des 1 Maccab. B.'s mit Amerkk.*, Göttingen und Leipzig 1778; Eichhorn, *Einleitung in die apokryphischen Schriften d. A. T.*, Leipzig 1795, pp. 218-248; Hengstenberg, *Genuineness of Daniel*, Eng. transl., Edinburgh 1847, pp. 235-239, 267-270; Cotton, *The Five Books of Maccabees*, Oxford 1832; Ewald, *Geschichte des Volkes Israel*, vol. iv., p. 526, ff.; the masterly work of Grimm, *Kurzgefasstes exegetisches Handbuch zu den Apokryphen*, Leipzig 1853; Geiger, *Urschrift und Uebersetzung der Bibel*, Breslau 1857, pp. 206-219.—C. D. G.

MACCABEES, THE SECOND BOOK OF, according to the order of the Sept., which is followed both by the ancient versions and modern expositors of the Apocrypha.

1. *Position of the Book.*—This book ought, according to the historic order, to be the first of the Maccabees, because its narrative begins with an event which occurred in the reign of Seleucus Philopator, about 180 B.C., *i. e.*, four years earlier than the preceding book. Its being placed second in order is evidently owing to the fact that it is both of a later date and of less intrinsic worth than the one nominated the first of the Maccabees. Cotton, in his translation of the Maccabees, has put this book as third of Maccabees.

2. *Design, Contents, and Division of the Book.*—The design of this book is to admonish and encourage the Jews to keep the religion of their fathers, and especially to inculcate into the minds of the Israelites resident in Egypt a reverence for the Temple in Jerusalem, urging them to take part in the celebration of the festivals instituted to commemorate the dedication of the Temple as the sacred and legitimate place for divine worship (x. 6), and the defeat of Nicanor (xv. 36). To effect this design the writer gives a condensed history of the Maccabean struggles for their religion and sanctuary, beginning with the attempts of Heliodorus to plunder the Temple, *circa* 180 B.C., and terminating with the victory of Judas Maccabæus over Nicanor, B.C. 161. The whole narrative, therefore, which is partly (iii. 1-iv. 6) anterior to 1 Maccab., partly (iv. 7-vii. 42) supplementary to the brief summary in 1 Maccab. i. 10-64, and partly (vii. 1-xv.) parallel with 1 Maccab. iii. 1-vii. 48, embraces a period of about nineteen years, and is divided into three sections, each of which is made to terminate with the great event commemorated by the festival which the writer is so anxious that his Egyptian brethren should celebrate.

i. The first section (i. 1-ii. 32) comprises two epistles addressed by the Jews in Palestine to their brethren in Egypt, inviting them to take part in the celebration of the Feast of Dedication (i. 1-ii. 18), and an account given by the writer of this book of the sources from which he derived his information, and of the trouble he had in compiling it (ii. 19-32).

ii. The second section (iii. 1-x. 9) gives important information about the origin of the persecutions (iii. 1-vii. 42), which is simply hinted at in 1 Maccab., and then describes and supplements (in viii. 1-ix. 29) the events recorded in 1 Maccab.,

concluding with the dedication of the Temple (x. 1-9), which is the great object of the book, *circa* 180-165 B.C.

iii. The third section (x. 10-xv. 37) records the various victories of the Jews, terminating in the crowning success of Judas Maccabæus and the death of Nicanor, which led to the institution of the feast commemorating the victory over him, 164-161 B.C.

This is followed by an epilogue (xv. 38-40) which is wanting in Coverdale's Bible, in Matthew's, 1537; in Cranmer's, 1539; and in the various reprints of these editions; and which the Geneva Bible, 1560, followed by the Bishops', 1568, was the first to insert. This omission on the part of Coverdale greatly perplexed Dr. Cotton. Now, on referring to the Zurich Bible, which Coverdale translated, it will be seen that this epilogue is not to be found in it, and hence the omission of it by Coverdale. We have thus another proof of the slavish dependence of Coverdale on the Zurich version [COVERDALE].

3. *Author, Date, and Original Language of this Book.*—The compiler of this book distinctly declares that the original author of it, or of the 'five books' from which he condensed the narrative before us, was 'Jason of Cyrene' (ii. 23). Herzfeld thinks that this Jason is the same as Jason the son of Eleazar, whom Judas Maccabæus sent with Eupolemus as envoy to Rome after the defeat of Nicanor to conclude a treaty with the Romans (1 Maccab. viii. 17; Joseph. *Antiq.* xii. 10. 6); because it is only a Hellenistic Jew who, being master of the Greek language, would be qualified for such a mission to a foreign court. This hypothesis, moreover, explains the otherwise anomalous circumstance that this book, which records the Maccabæan struggles, goes no further in its history than the victory over Nicanor, inasmuch as up to this point Jason was an eye-witness to the exploits of Judas, and was sent to Rome after this most important event; and is confirmed by the accurate knowledge which the writer displays of the events (iv. 21, ff.; viii. 1, ff.; ix. 29, ff.; x. 12, 13; xiv. 1; Herzfeld, *Geschichte d. Volkes Israel*, i. 445, ff.) Accordingly, the original work must have been written about 160 B.C., immediately after the victory over Nicanor, and prior to the defeat and death of Judas (1 Maccab. ix. 16-18), which brought new calamities upon the holy city, and again transferred the power to the heathenish-inclined Jews under the pontificate of Alcimus (1 Maccab. ix. 23-29). The errors in the order of the events and of history must be ascribed to the epitomator, whose great object was not to narrate history faithfully, but to make the facts harmonise with his design. As a Cyrene Jew, Jason most naturally composed his work in Greek; and Jerome's testimony, '*Secundus [Machabæorum liber] græcus est, quod ex ipsa quoque phrasi probari potest*' (Prol. Gal.), is fully borne out by the style of the epitome. The author of it not only uses idiomatic Greek phrases, as *σωφροσύνη* καὶ *εὐταξία*, iv. 37; *κατάρχεσθαι* χειρῶν ἀδίκων, iv. 40; *ἐντυγχάνειν* τῇ βίβλῳ, vi. 12; xv. 39; *καλὸν* καὶ *ἀγαθόν*, xv. 12, etc.; but unusual and unique expressions, as *τὰ πρωτοκλίσια*, iv. 21; *δυσπέτῃμα*, v. 20; *προσαναλέγεσθαι*, viii. 19; *ὀπλολογεῖν* τινά, viii. 27, 31; *πολεμοτροφεῖν*, x. 14, xiv. 6; *διδασταλῆς*, xiii. 25; *προσπυροῦν*, xiv. 11; etc. The epitomator or compiler of the present book was a Hellenistic Jew,

residing in Palestine, and must have lived a considerable period after the events transpired. The date of the compilation is put within the limits 124-50 B.C. The two epistles with which the book begins do not proceed from Jason, and are of a much later date, though the first purports to have been written 124 B.C., or 188 of the Seleucidæ; and the second, by mentioning a recent deliverance from great perils, evidently implies that it was written after the news of the death of Antiochus Epiphanes, *i.e.*, 148 of the Seleucidæ. The original language of these letters seems to be Hebrew. Indeed, Geiger shows that the difficult passage, ἀφ' οὗ ἀπέστη Ἰάσων καὶ οἱ μετ' αὐτοῦ ἀπὸ τῆς ἁγίας γῆς καὶ τῆς βασιλείας (i. 7), which is ambiguous, and, as commonly understood, represents Jason and his companions as apostatising from the land and the kingdom, is, when retranslated into Hebrew, מעת כר יאסון ואשר אתו מאדמת הקדש

והמלוכה, shown to mean, *from the time that Jason and those who sided with him from the*

*holy land and the kingdom, apostatised*; המלוכה

either stands for הורע המלוכה, *royal descent* (comp. 2 Kings xxv. 25; Jer. xli. 1; Ezek. xvii. 13; Dan. i. 3), or refers back to אדמת in the sense

of עיר המלוכה (2 Sam. xii. 26), *i.e.*, those who call themselves after the sacred ground of the royal residence. The same is the case with i. 9, 18, where the *Feast of Dedication* is most extraordinarily called the *Feast of Tabernacles*, which can only be explained when the passages are retranslated into Hebrew. Now, the Hebrew for ἵνα ἄγῃτε τὰς ἡμέρας τῆς σκηνοπηγίας τοῦ Χασελεύ

μηνός (i. 9) is לָמַעַן תַּחֲנוּ יָמֵי חַג חֹדֶשׁ כְּסֻלִּי; and for ἵνα καὶ αὐτοὶ ἄγῃτε τῆς σκηνοπηγίας (καὶ) τοῦ

πυρός (i. 18), is לָמַעַן תַּחֲנוּ נֶגַם אֲתָם אֶת חַג הָאֵשׁ. When it is borne in mind that the expression חַג, which is the general term for *feast* in earlier Hebrew (Exod. x. 9; xii. 14; Lev. xxiii. 39), was afterwards used for the Feast of Tabernacles (1 Kings viii. 2; 2 Chron. v. 3; Joseph. *Antiq.* viii. 4. 1), it will at once be seen that the translator of these epistles, instead of rendering the word in question simply by *feast*, attached to it the later sense of the specific festival, which he was evidently led to do by the fact that both these festivals are of eight days' duration, and that the Feast of Tabernacles is mentioned in x. 6. So also διαβολῆαι τὴν καρδίαν ὑμῶν ἐν τῷ νόμῳ αὐτοῦ (i. 4) is a translation of יַתַּח לִבְכֶּם בַּתּוֹרָה.

4. *Historical and Religious Character of the Book.*—As the avowed design of the book is religio-didactic and parenetic, the aim of the writer was not to recount a series of dry facts in chronological order, but rather to select such events from the period on which he treats, and arrange, embellish, and comment upon them in such a manner as shall most strikingly set forth to his Egyptian brethren the marvellous interposition of God to preserve the only legitimate and theocratic sanctuary in Jerusalem. Hence the desire to point out the signal punishment of the wicked according to the principle *in eo genere quisque punitur, in quo peccavit* (v. 9, 10; ix. 5, 6; xiii. 8; xv. 32, 33); the moral reflections (v. 17-20; vi. 12-16; ix. 8-10; xii. 43-45); the coloured descriptions (iii. 14-23; v. 11-20); the exaggerated account of the martyrdom of the

seven brothers and their mother, which king Antiochus, for the sake of effect, is made to witness in Jerusalem (vi. 18-vii. 42); the enormous numbers of the enemy slain by a handful of Jews (viii. 24, 30; x. 23, 31; xi. 11; xii. 16, 19, 23, 26, 28; xv. 27); the numerous and strange miracles (iii. 25-27; v. 2, 3; x. 29-31; xi. 8-10; xv. 12; etc.); the historical and chronological inaccuracies, *e.g.*, making Antiochus witness the death of the Jewish martyrs (vii. 3); the death of Antiochus (ix.); representing the sacrifices to have been renewed after *two* years' interruption (2 Maccab. x. 3 with 1 Maccab. iv. 52, 54; i. 54, 59); the description of the different battles which the Jews fought between the purification of the Temple and the death of Antiochus (2 Maccab. viii. 30; x. 15-38; xii. 2-43, with 1 Maccab. v.); the campaign of Lysias (2 Maccab. xi. 1-12 with 1 Maccab. iv. 26-32); etc. etc. But apart from these embellishments, traditional stories, inversions of events, etc., which, in accordance with ancient usage, the author adopted in order to carry out his design, and in spite of the fact that the two letters with which the book begins are now generally given up as spurious, the best critics accept the groundwork of the facts as true. Grimm, whose elaborate, thorough, and impartial comment on this book is unparalleled, has shown that there is no ground to question the historical import of the most important section (iv.-vi. 10), which is not only most consistent in itself, but fits most appropriately the space of 1 Maccab. i. 10-64; or the truthfulness of chap. iii., when stripped of the miraculous. He says that its truthfulness, within the specified limits, is supported by the fact that—1. Notwithstanding the many differences, it agrees in not a few portions with 1 Maccab., though both these books are perfectly independent of each other; and 2. In four events which it records anterior to 1 Maccab., it agrees with Josephus, who is entirely independent of it—viz., the account of the Temple at Gerizim (vi. 2 with Joseph. *Antiq.* xii. 5. 5); the execution of Menelaus at Béræa (xiii. 3-8 with Joseph. *Antiq.* xii. 9. 7); the landing of Demetrius at Tripolis (xiv. 1); and of the priestly intrigues (iv.) which were the cause of the protracted series of struggles between the Jews and the Syrian monarchs.

The religious character of the book is one of its most important and interesting features. God is throughout recognised as ordaining even the most minute affairs of his people; the calamities which befel them are looked upon by the Jews as a temporary visitation for their sins (iv. 16, 17; v. 17-20; vi. 12-17; vii. 32, 33; xii. 40); and the sufferings which come upon the righteous in this common visitation are regarded as atoning for the sins of the rest of the people, and staying the anger of God (vii. 38). The book, moreover, shows that the interposition of angels for the salvation of the people (x. 29, etc.; xii. 2, etc.), and supernatural manifestations (iii. 25; v. 2, etc.; xiii. 2, etc.), which play a very important part in the N. T., were of no common occurrence. What is, however, most striking, is, that not only did the Jews then believe in the surviving of the soul after the death of the body, in the resurrection of the dead, and in their reunion with those near and dear to them (vii. 6, 9, 11, 14, 23, 29, 36), but that God does not irrevocably seal the eternal doom of man immediately after his departure, and that the decision of our Heavenly Father may be influenced by

the prayers and sacrifices of the surviving friends of the departed (xii. 43-45). This passage also shows that the offering of sacrifices for the dead must have been common in those days, inasmuch as it is spoken of in very commendable terms. The striking distinction between the religious sentiments of this book and those of the former, goes far to justify Geiger's conclusion, that 'the two books of Maccabees are party productions; the author of the first was a Sadducee, and a friend of the Maccabean dynasty, whilst the author or epitomator of the second was a Pharisee, who looked upon the Maccabees with suspicion' (*Urschrift*, p. 206). Still, the second book, like the first, contains no hopes about the coming of a Messiah.

5. *Canonicity of the Book.*—Though portions of this book are incorporated in the Jewish writings, and form a part of the Ritual, viz., the martyrdom of the seven brothers and their mother (ch. vi. 1-42), which is not only mentioned in the Talmud (*Gittin*, 57, b), the Midrash of the ten commandments (ed. Jellinek, *Beth Ha-Midrash*, i. p. 70, etc.); Midrash Jalkut (*On Deut.*, section תנ"ך, 301, b), etc.; but is interwoven in the service for the Feast of Dedication (comp. *The Fazer*, חנוכה, אורח חיים); the martyrdom of Eleazar (ch. vi. 18-31) also embodied in the same service, and described by Josippon, who also speaks of the wonderful appearance of the horsemen, and other circumstances narrated in 2 Maccab. (comp. *Josippon*, lib. ii. c. ii-iv., ed. Breithaupt, p. 172, ff.)—yet the book was never part of the Jewish canon. Hence, even if it could be shown more unquestionably that the apparent parallels between 2 Maccab. and diverse passages in the N. T. (comp. 2 Maccab. i. 4 with Acts xvi. 14; 2 Maccab. v. 19 with Mark ii. 27; 2 Maccab. vi. 19, vii. 2, etc., with Heb. xi. 35; 2 Maccab. vii. 14 with John v. 29; 2 Maccab. vii. 22, etc., xiv. 46, with Acts xvii. 24-26; 2 Maccab. vii. 36 with Rev. vi. 9; 2 Maccab. viii. 2 with Luke xxi. 24, Rev. xi. 2; 2 Maccab. x. 7 with Rev. vii. 9; 2 Maccab. xv. 3-5 with Ephes. vi. 9) are actual quotations, it would only prove that the apostles, like the rest of their Jewish brethren, alluded to the incidents recorded in this book without regarding the book itself as canonical. The only references, however, to be found in the A. V. are from Heb. xi. 35, 36, to 2 Maccab. vi. 18, 19; vii. 7, etc.; and vii. 1-7; but even these are disputed, and it is much more likely that the author of the Epistle to the Hebrews refers to the sufferings of the Essenes (comp. Ginsburg, *The Essenes*, etc., Longman 1864, p. 36). In harmony with the decisions of the Jewish church, this book is excluded from the canon of sacred books in the catalogues of Melito, Origen, the Council of Laodicea, St. Cyril, St. Hilary, etc. (comp. Du Pin, *History of the Canon*, London 1699, vol. i. p. 12). Jerome emphatically declares:—'*Maccabæorum libros legit quidem ecclesia, sed eos inter canonicas scripturas non recipit*' (*Pref. in Prov.*); and Augustine, though stating that this book, like 1 Maccab., was regarded by the Christians as not useless, yet expressly states that the Jews did not receive it into the canon (*Contra ep. Gaudent.* i. 31), and draws a distinction between it and the canonical Scriptures (*De Civ. Dei*, xviii. 36). The Council of Trent, however, has settled (April 8, 1546) the canonicity of it for the Roman Church. The Protestant Church generally agrees with Luther, who remarks, 'We tolerate it because of the beautiful

history of the Maccabean seven martyrs and their mother, and other pieces. It is evident, however, that the writer was no great master, but produced a patchwork of various books; he has likewise a perplexing knot in ch. xiv. in Razis, who committed suicide, which was also troublesome to Augustine and other Fathers. For such example is of no use, and is not to be commended, though it may be tolerated and charitably explained. It also describes the death of Antiochus in ch. i. differently from 1 Maccab. To sum it all up: Just as 1 Maccab. deserves to be adopted in the number of sacred Scriptures, so 2 Maccab. deserves to be thrown out, though there is something good in it' (*Vorrede auf das Zweite Buch Maccabæorum*, German Bible, ed. 1536).

6. *Versions and Literature.*—There are two ancient versions of this book, a Latin and a Syriac. The Latin, which was current before Jerome, and does not always follow closely the Greek, is now incorporated in the Romish Vulgate, whilst the Syriac, which is still less literal, is given both in vol. iv. of the London Polyglott and by De Lagarde, *Libri Veteris Testamenti Apocryphi Syriaci*, London 1861. Of commentaries and exegetical helps, are to be mentioned—Whitaker, *A Disputation on Holy Scripture*, Parker Society, Cambridge 1849, p. 93-102; Whiston, *A Collection of Authentic Records*, London 1727, vol. i. p. 200-232; Hasse, *Das ant. Buch d. Makk. neu über. m. Anmerk.*, Jena 1786; Eichhorn, *Einleitung in die apok. Schriften d. Alten Test.*, Leipzig 1795, p. 249-278; Bertheau, *De Secundo Maccabæor. libro*, Göttingen 1829; Cotton, *The Five Books of Maccabees*, Oxford 1832, p. 148-217; Ewald, *Geschichte des Volkes Israel*, vol. iv. p. 530, ff.; Schlünkes, *Epistolæ que Secundo Maccab. libro*, cap. i.-ii. 9, *legitur explicatio, commentat. crit.*, Colon. 1854; Herzfeld, *Geschichte des Volkes Israel*, Nordhausen 1854, vol. i. p. 443-456; Patritius, *De Consensu utriusque libri Maccab.*, Rom. 1856; Geiger, *Urschrift und Uebersetzungen der Bibel*, Breslau 1857, p. 219-230; and above all, the valuable work of Grimm, *Kurzgefasstes exegetisches Handbuch zu d. Apokryphen d. Alten Testaments*, part iv., Leipzig 1857.—C. D. G.

MACCABEES, THE THIRD BOOK OF, not given in the Romish Vulgate, the Apocrypha of the A. V., nor in Protestant versions generally, but still read in the Greek Church.

1. *Title and Position of the Book.*—This book is improperly called the third of Maccabees, since it does not at all record the exploits of the Maccabean heroes, but narrates events of an earlier date. It, however, derives its name from the fact that this appellation, which originally belonged to Judas, was afterwards used in the sense of *martyrs*, and was extended to the Alexandrian Jews who suffered for their faith's sake either immediately before or after the Maccabean period. In the *Synopsis of the Pseudo-Athanasius*, it is apparently also called *Ptolemaïca*, from the name of the royal hero (comp. Μακκαβαϊκά βιβλία δ' Πτολεμαϊκά, p. 432, ed. Migne, for which Credner, Grimm, etc., suggest that the true reading is, Μακκαβαϊκά καὶ Πτολεμαϊκά, and that this book is to be understood by Πτολεμ.—Grimm, *Comment.*, p. 220). Properly speaking, this book ought to precede the former two productions, and occupy the *first* position, since it is prior in time to both the first

and second Maccabees. But tradition has assigned to it a third position, because it came into circulation later than the others, and was regarded as being of third-rate importance. Cotton, in his edition of the *Five Books of Maccabees*, has placed it as 1 Maccab.

2. *Design and Contents of the Book.*—The design of this book is to comfort the Alexandrian Jews in their sufferings for their faith in the God of Abraham, and to encourage them to steadfastness and perseverance by recounting to them the experience of the past, which most unquestionably shows that the theocracy cannot perish; that though tyrants might vent their rage on the chosen people, the Lord will not suffer the enemy to triumph over them, but will appear for their deliverance, avenge himself on their persecutors, as well as put to confusion those of the Israelites who have apostatised from their ancestral religion. To illustrate this, the writer narrates the following incident from the dealings of Providence with his covenant people:—Ptolemy IV. Philopator, on returning from his victory over Antiochus the Great (217 B.C.), was waited upon by envoys from Jerusalem to congratulate him on his success, which made him visit the holy city and offer sacrifices in the Temple, when he was seized with a desire to penetrate into the Holy of Holies (i. 1-11), and as the entreaties of the people failed to make the king relinquish his outrageous desire, the high-priest Simon prayed to the King of kings, who immediately chastised this insolent heathen, by throwing him down paralysed on the ground (ii. 1-23). Enraged at this, he wreaked his vengeance, on his arrival in Egypt, on the Alexandrian Jews, ordering that they should be deprived of their citizenship and be branded with an ivy leaf, unless they agreed to be initiated into the orgies of Bacchus (24-30). A few complied, but the bulk of the chosen people refused to apostatise from their ancestral religion (31, 32). These were ordered to be chained, with their wives and children, sent from all parts of the country to Alexandria, and confined in the Hippodrome outside the city (iii. iv. 20), to be trampled to death by 500 drunken elephants (v. 1-5). Thus devoted to destruction for their faith, the Jews prayed for help to the God of their fathers, who visited the king with deep forgetfulness, and thereby momentarily averted the impending calamity, which, however, was only postponed to the following daybreak (6-50). Then Eleazar, an aged priest, earnestly prayed for his people (vi. 1-15); and just as he finished praying, the royal train and the elephants arrived at the Hippodrome, when suddenly two angels appeared in terrible form, visible to all but the Jews, making the affrighted elephants go backwards and crush the soldiers (16-21). This changed the king's anger into pity, and with tears in his eyes he at once 'set free the sons of the Almighty, heavenly, living God,' and made a great feast for them (22-30). To commemorate this marvellous interposition of their heavenly Father, the Jews instituted an annual festival, to be celebrated 'through all the dwellings of their pilgrimage for after generations' (31-41). The faithful Jews had not only their mourning turned into joy, and the royal protection for the future, but were permitted by the king to inflict condign punishment on those of their brethren who had forsaken the religion of their fathers in order to escape the temporary sufferings;

'thus the most high God worked wonders throughout for their deliverance' (vii. 1-23).

3. *Historical Character of the Book.*—Though the parenthetic design of the book made the writer so modify and embellish the facts which he records as to render them most subservient to his object, yet the assertion of Dr. Davidson, that 'the narrative appears to be nothing but an absurd Jewish fable' (*Introduction to the O. T.*, iii. p. 454), is far too sweeping. That the ground-work of it is true, as Prideaux rightly remarks (*The O. and N. T. connected*, part ii. book ii., anno 216), is attested by collateral history. 1. The account it gives of Ptolemy's expedition to Coele-Syria, and his victory over Antiochus at Raphia (i. 1-7) is corroborated both by Polybius (v. 40; 58-71; 79-87) and Justin (xxx. 1). 2. The character which it ascribes to Ptolemy—that he was cruel, vicious, and given to the orgies and mysteries of Bacchus—is literally confirmed both by Plutarch, who in his essay *How to distinguish Flatterers from Friends*, says, 'such praise was the ruin of Egypt, because it called the effeminacy of Ptolemy, his wild extravagances, loud prayers, his marking with an ivy leaf (*εἰς τὸν ἰσχυρὸν*), and his drums, piety' (cap. xii., comp. also *In Cleomene*, cap. xxxiii. and xxxvi.), and by the author of the Greek *Etymologicon*, who tells us that Philopator was called *Gallus*, because he was marked with the leaf of an ivy, like the priests called Galli; for in all the Bacchanalian solemnities they were crowned with ivy (Γάλλος ὁ φιλοπάτωρ Πτολεμαῖος διὰ τὸ φύλλα κισσοῦ καταστῆσαι ὡς οἱ Γάλλοι, etc.) 3. Josephus's deviating account (*Cont. Ap. Suppl.*, ii. 5) of the events here recorded, which shows that he has derived his information from an independent source, proves that something of the sort did actually take place. 4. The statement in vi. 36, that they instituted an annual festival to commemorate the day of their deliverance, to be celebrated in all future time, the fact that this festival was actually kept in the days of Josephus (comp. *ibid.* ii. 5), and the consecration of a pillar and synagogue at Ptolemais (vii. 20), are utterly unaccountable on the supposition that this deliverance was never wrought. The doubts which De Wette (*Einleitung*, sec. 305), Ewald (*Geschichte d. V. L.*, iv. 535, ff.), Grimm (*Comment.* p. 217), and Davidson (*Introd.*, iii. 455), raise against the historic ground-work of this narrative, are chiefly based upon the fact that Dan. xi. 11, etc., does not allude to it. Those critics therefore submit that the book typically portrays Caligula, who commanded that his own statue should be placed in the temple, in a current tradition respecting the murderous commands of Ptolemy VII. Physcon against the Jews, which it transferred by mistake to Ptolemy Philopator.

4. *Author, Original Language, Integrity, and Date of the Book.*—It is generally admitted that the author of this book was an Alexandrian Jew, and that he wrote in Greek. This, indeed, is evident from its ornate, pompous, and fluent style, as well as from the copious command of expression which the writer possessed. Though this book resembles 2 Maccab. in the use of certain expressions (e.g., ἀγέρωχος, 3 Maccab. i. 25; ii. 3, with 2 Maccab. ix. 7) in the employment of purely Greek proper names to impart a Greek garb to Jewish things and ideas (3 Maccab. v. 20, 42; vii. 5, with 2 Maccab. iv. 47), etc., yet is the style of the two books so different, that it is impossible to claim for them the same author. The author of this book sur-

passes 2 Maccab. in offensively seeking after artificial, and hence very frequently obscure, phrases (e.g., i. 9, 14, 17, 19; ii. 31; iii. 2; iv. 5, 11; v. 17; vii. 5), in poetic expression and ornamental turns (i. 8; ii. 19, 31; iii. 15; iv. 8; v. 26, 31, 47; vi. 4, 8, 20), in bombastic sentences to designate very simple ideas (e.g., ὁρόμουν συνίστασθαι = τρέχειν, i. 19; ἐν πρεσβείῳ τὴν ἡλικίαν λελογχώς, vi. 1), in using rare words or such as occur nowhere else (e.g., i. 20; ii. 29; iv. 20; v. 25; vi. 4, 20), or using ordinary words in strange senses (e.g., i. 3, 5; iii. 14; iv. 5; vii. 8; comp. Grimm, *Comment.*, p. 214). There is also an abruptness about the book (e.g., its beginning with ὁ δὲ Φιλόπατορ, it refers, in τῶν προσαποδεχμένων, ii. 25, to some passage not contained in the present narrative), which has led to the supposition that it is either a mere fragment of a larger work (Ewald, Davidson, etc.), or that the beginning only has been lost (Grimm, Keil, etc.). Against this, however, Graetz rightly urges, that it most thoroughly and in a most complete manner carries through its design. All the attempts to determine the age of the book are based upon pure conjecture, and entirely depend upon the view entertained about its contents, as may be seen from the two extremes between which its date has been placed. Thus Allin (*Judgment of the Jewish Church*, p. 67) will have it that 'it was written by a Jew of Egypt, under Ptolemy Philopator, i.e., about 200 B. C. ;' while Grimm places it about 39 or 40 A. D.

5. *Canonicity of the Book.*—Like the other Apocrypha, this book was never part of the Jewish canon. In the Apostolic canons, however, which are assigned to the 3d century, it is considered as *sacred writing* (*Can.* 85); Theodoret, too (died circa A.D. 457), quotes it as such (*in Dan.* xi. 7). Still it was never accepted in the Western Churches, formed no part of the Roman Vulgate, and was therefore not received into the canon of the Catholic Church, nor inserted as a rubric in the Apocrypha contained in the translations of the Bible made by the Reformers.

6. *Versions and Literature.*—The Greek is contained in the Alexandrian and Vatican MSS., and is given in Valpy's ed. of the Sept. The oldest version of it is the Syriac, which is very free, and full of mistakes; it is given in the London Polyglott, and has lately been published by De Lagarde, *Libri Veteris Testamenti Apocryphi*, London 1861. The first Latin version of it is given in the *Complutensian Polyglott*; another Latin version, by F. Nobilius, is given in the *London Polyglott*; the first German translation, as far as we can trace it, is given in the *Zurich Bible printed by Froschover*, 1531; another, by Joach. Ciremberger, appeared in *Wittenberg* 1554; De Wette in the first edition of his translation of the Bible, made conjointly with Augusti (1809-14), also gave a version of this book, which is now excluded from his Bible; and another German version is given in Gutmann's translation of the Apocrypha, Altona 1841. The first English version was put forth by Walter Lynne in 1550, which was appended, with some few alterations, to the Bible printed by John Daye, 1551; and reprinted separately in 1563; a new and better version, with some notes, was published by Whiston, *Authentic Records*, London 1727, vol. i., p. 162-208; a third version, made by Crutwell, is the *Bible with Bp. Wilson's notes*, Bath 1785; and a fourth version, with brief but useful notes, was

made by Cotton, *The Five Books of Maccabees*, Oxford 1832. Of exegetical helps are to be mentioned, Eichhorn, *Einleitung in d. apokr. Schriften d. A. T.*, Leipzig 1795, p. 278-289; Ewald, *Geschichte des Volkes Israel*, vol. iv., p. 535, ff.; Herzfeld, *Geschichte d. Volkes Israel*, vol. i., p. 457, etc.; Graetz, *Geschichte der Juden*, vol. iii., 2d ed., Leipzig 1863, p. 444, etc.; Gaab, *Handbuch zum philologischen Verstehen der apokryphischen Schriften d. A. T.*, vol. ii., Tübingen 1818, p. 614, ff.; and especially Grimm, *Kurzfassstes exegetisches Handbuch zu den Apokryphen d. A. T.*, Leipzig 1857, p. 213, ff.—C. D. G.

MACCABEES, THE FOURTH BOOK OF, though not given in the Roman Vulgate, and therefore not inserted in the Apocrypha contained in the Bibles translated by the Reformers, yet exists in Greek in two leading texts. One, which, on account of its more extensive circulation, may be called the *received* or *common* text, is contained in the early edition of the Sept. printed at Strasburg 1526, Basel 1545 and 1550, Frankfurt 1597, Basel 1582, and in the editions of Josephus's work, and is given in its purest form in Bekker's edition of Josephus, six volumes, Leipzig 1855-56. The other is the Alexandrian or that of the Codex Alexandrinus, and is the more ancient and preferable one; it is contained in the editions of the Sept. by Grabe and Bretinger, and is adopted with some few alterations after the common text in Apel's edition of the Apocrypha, Leipzig 1837.

1. *Title of the Book.*—This book is called 4 *Maccab.* (Μακκαβαίων δ' ἡ τετάρτη τῶν Μακκαβαϊκῶν βιβλος) in the various MSS. in the Codex Alexandrinus, by Philostorgius and Syncellus (p. 529, 4, and 530, 17, ed. Dind.); in Cod. Paris. A, it is denominated 4 *Maccab.*, a *Treatise on Reason* (Μακκαβαίων τέταρτος περὶ σώφρονος λογισμοῦ), by Eusebius (*Hist. Ecclesiast.*, iii. 10, b) and Jerome (*Catal. Script. Ecclesiast.*) it is called, *On the Supremacy of Reason* (περὶ αὐτοκράτορος λογισμοῦ), and in the editions of Josephus's works, *Josephus's Treatise on the Maccabees* (Φλαβ. Ἰωσήφου εἰς Μακκαβαίους λόγος).

2. *Design, Division, and Contents of the Book.*—The design of this book is to encourage the Jews, who—being surrounded by a philosophical heathenism, and taunted by its moral and devout followers with the trivial nature and apparent absurdity of some of the Mosaic precepts—were in danger of being led astray from their faith, to abide faithfully by the Mosaic law, and to stimulate them to observe in every way their ancestral religion, by convincing them of the reasonableness of their divine law, and its unparalleled power to control the human passions (comp. xviii. 1, 2). To carry out this design the book is divided into *two parts*, opening with an introduction, as follows—

*The introduction*, comprising ch. i. 1-12, contains the resumé of the whole book, and the grand problem for discussion—viz., whether the rational will, permeated and regulated by true piety, has perfect mastery over the passions (ὅτι αὐτοδέσποτος [αὐτοκράτωρ] ἐστὶ τῶν παθῶν εὐσεβὴς λογισμός).

i. *The first part*, comprising ch. i. 13-iii. 19, contains a *philosophical* disquisition on this problem, giving a definition of reason, or the rational will, and of the wisdom which is to be gained by studying the Mosaic law, and which shows itself in the four cardinal virtues—discernment, justice, pru-

dence, and fortitude; describes the different passions, and shows that reason, pervaded by piety, has the mastery over them all, except forgetfulness and ignorance.

ii. The *second part*, comprising ch. iii. 20-xviii. 20, demonstrates the proposition, that sanctified reason has the mastery over the passions, by giving a summary of the Maccabean martyrdoms (iii. 20-iv. 26) narrated in 2 Maccab. iii., iv. 7-17, v. 1-vi. 11; describes the martyrdom of Eleazar (v. 1-vii. 19) and the seven brothers (viii. 1-xii. 16), with moral reflections on it (xiii. 1-xiv. 10), as well as the noble conduct and death of their mother (xiv. 11-xvii. 6), and then deduces the lessons to be learned from the character and conduct of these martyrs (xvii. 7-xviii. 2), showing that the Israelites alone are invincible in their struggles for virtue (*οἱ μόνοι παῖδες Ἐβραίων ὑπὲρ ἀρετῆς εἰσιν ἀνίκητοι*). Ch. xviii. 21-23 is evidently a later addition.

3. *Author, Date, and Original Language of the Book.*—In harmony with the general tradition, Eusebius (*H. E.*, iii. 10), Jerome (*Catal. Script. Eccles.*, s. v. Josephus, ad *Pal.* ii.), Photius (ap. Philostorg., *H. E.*, i.), Suidas (s. v. Ἰώσηπος), many MSS., and the early editions of the Septuagint (Strasburg 1526; Basel 1545; Frankfurt 1595), as well as the editions of Josephus' works, ascribe the authorship of this book to the celebrated Jewish historian *Flavius Josephus*. But this is utterly at variance with the style and structure of the book itself, and has most probably arisen from a confusion of names, as the work may have been written by some one of the name of Josephus, or from the fact that it was regarded as supplementing this historian, and hence was appended to them. Not only is the language quite different from that of Josephus's writings; but—1. In 4 Maccab. all the proper names in the Bible, except Ἰεροσόλυμα and Ἐλεάζαρος, are retained in their Hebrew form, and treated as indeclinable (e. g., Ἀβραάμ, Ἰσαάκ, Νῶε), whereas Josephus gives them a Greek termination.

2. Fourth of Maccab. derives its historical matter from 2 Maccab., as we have seen in the preceding section, or perhaps from the original work of Jason, whilst Josephus manifests utter ignorance about the existence of this work. 3. The historical blunders contained in this book (iv. 15, 26; v. 1; xvii. 22, 23, etc.) are such as Josephus would never have committed: and, 4. The form and tone of the book unquestionably show that the writer was an Alexandrian Jew, who resided in Egypt or somewhere far away from the Holy Land—comp. iv. 5, 20, etc., where the writer speaks of 'our fatherland,' i. e., the Holy Land far away. From this and other passages in which the Temple is spoken of as still existing, and from the fact that xiv. 9 speaks of the Egyptian Jews as having enjoyed external peace and security at the time when this book was written, Grimm dates it before the fall of Jerusalem and the persecutions of the Egyptian Jews by Caligula, i. e., 39 or 40 B. C. That the Greek is the original language of the book requires no proof. The style is very pompous, flowing, vigorous, and truly Greek. The author's eloquence, however, is not the spontaneous outburst of a heart inspired by the grandeur of the divine theme (*εὐσέβεια*) upon which he discourses, but is produced artificially by resorting to exclamations and apostrophes (v. 33, etc.; vii. 6, 9, 10, 15; viii. 15, 16; xi. 14, etc.), dialogues and monologues (viii. 16-19; xvi. 5-10), far-fetched figures and comparisons (vii. 1, etc.;

xiii. 6; xvii. 3, 5, 7), and he abounds in ἀπαξ λεγόμενα (i. 27, 29; ii. 9; iv. 18; vi. 6, 17; vii. 11; viii. 15; xi. 4; xiii. 24; xiv. 15, 18; xv. 26; xvi. 5).

4. *Canonicity and Importance of the Book.*—Among the Jews this book is hardly known, and though some of the Fathers were acquainted with it, and Gregory of Nazianzum, Augustine, Jerome, etc., quoted with respect its description of the Maccabean martyrs, yet it was never regarded as canonical or sacred. Still the book is of great importance, inasmuch as it illustrates the history, doctrines, and moral philosophy of the Jewish people prior to the advent of Christ. It shows that the Jews believed that human reason, in its natural state, has no power to subdue the passions of the heart, and that it is only able to do it when sanctified by the religion of the Bible (v. 21, 23; vi. 17; x. 18); that the souls of all men continue to live after the death of the body; that all will rise, both righteous and wicked, to receive their judgment for the deeds done in the body (v. 35; ix. 8; xii. 13, 14; xvi. 22; xvii. 17, 18); that this is taught in the Pentateuch (xvii. 18 with Deut. xxxiii. 3); and that the death of the righteous is a vicarious atonement (vi. 29). Allusion seems also to be made in the N. T. to some passages of this book: comp. vii. 18 with Luke xx. 37; Matt. xxii. 32; Mark xii. 26; Rom. vi. 10; xiv. 8; Gal. xi. 19; 4 Maccab. xii. 11 with Acts xvii. 26; 4 Maccab. xiii. 14 with Luke xvi. 22, 23; 4 Maccab. xvi. 22 with Luke xx. 37.

5. *Versions and Exegetical Helps.*—The book was translated into Syriac, the MS. of which is in the Ambrosian Library of Milan; into Latin, but loosely, by Erasmus; and again, greatly improved, by Combefis, *Bibliotheca Græcorum patrum auctorium novissimum*, Pars i., Paris 1672. This version is in the edition of Josephus by Havercamp, Oberthür, and Dindorf. Both a Latin and French version are given by Calmet, *Commentaire literal in Scripturam V. et N. T.*, iii. p. 702, ff.; a very loose English version was first published by L'Estrange in his *Translation of Josephus*, London 1702; and an improved translation is given by Cotton, *The Five Books of Maccabees*, Oxford 1832. Of exegetical helps are to be mentioned—Reutlinger, *Thèse d'exégèse sur le iv. livre des Maccabées*, Strasburg 1826; Gfrörer, *Philo u. d. Alex.-Theosophie*, ii. 175, ff.; Dähne, *Jud.-Alex. Relig.-Philos.*, ii. 190, ff.; Ewald, *Geschichte des Volkes Israel*, iv. 554, ff.; the very elaborate and masterly commentary of Grimm, *Kurzgefasstes exegetisches Handb. z. d. Apok. d. A. T.*, part iv., Leipzig 1857, p. 285, ff.; Keil, *Einleitung in d. A. T.*, 1859, p. 69 b, ff.—C. D. G.

MACCABEES, THE FIFTH BOOK OF, an important chronicle of Jewish affairs, which was for the first time printed in Arabic in the Paris Polyglott (1645), and was thence copied into the London Polyglott (1657).

1. *Title of the Book.*—The name, the *fifth* book of Maccabees, has been given to this production by Cotton, who placed it as *fifth* in his order of the books of Maccabees. According to the remark at the end of ch. xvi., the first part of this book, i. e., ch. i. 1-xvi. 26, is entitled, *The second book of Maccabees according to the translation of the Hebrews*, whilst the second part, i. e., ch. xvii. 1-lx. 96, is simply called *The second book of Maccabees*. The fact that this second part gives the his-

tory of John Hyrcanus (xx.) has led Calmet (*Dictionary of the Bible*, s. v. Maccabees) and others to suppose that it is the same as the so-called *fourth book of Maccabees*, a unique MS. of which, written in Greek, Sixtus Senensis saw in MS. in the Library of Sanctes Pagninus, at Lyons, and which was afterwards destroyed by fire, so that the fifth of Maccabees is sometimes also called the *fourth*.\*

2. *Contents of the Book*.—This book contains the history of the Jews from Heliodorus's attempt to plunder the treasury at Jerusalem till the time when Herod revelled in the noblest blood of the Jews, and completed the tragedy of the Maccabean princes, by slaughtering his own wife Mariamne, her mother Alexandra, and his own two sons Alexander and Aristobulus, *i. e.*, 184-86 B.C., thus embracing a period of 178 years. The following is the parallelism between the narrative recorded in this book, and the accounts contained in 1 and 2 of Maccab. and the works of Josephus:—

- 5 Maccab., ch. i.—2 Maccab. iii.  
 „ ii.—Joseph. *Antiq.* xii. 2.  
 „ iii.—1 Maccab. i.; 2 Maccab. v.; Joseph. *Antiq.* xii. 6, 7.

### 3. *Historical and Religious Character of the Book.*

—It will be seen from the preceding analysis, that the first part of this production (i.-xix.), which embraces the Maccabean period, is to a great extent parallel with 1 and 2 Maccab., whilst the second part, which records the post-Maccabean history down to the birth of Christ (xx.-lix.), is parallel with Josephus, *Antiq.* xiii. 15-xvi. 17; *Jewish Wars*, i. 3-17. The historical worth of 5 Maccab. is therefore easily ascertained by com-

\* The description of the MS. given by Sixtus Senensis (*Biblia Sancta*, lib. i. sec. 3) has been printed in English by Whiston (*Authentic Records*, i. 206, etc.), and Cotton, *The Five Books of Maccabees*, Introd., p. xxxviii., etc.

paring its narrative with that of 1 and 2 Maccab., and with the corresponding portions of Josephus. Now, by a careful comparison of 5 Maccab. with these documents, it will be seen that, notwithstanding its several historical and chronological blunders (comp. 5 Maccab. x. 16, 17, with 2 Maccab. x. 29; 5 Maccab. ix. with 1 Maccab. vii. 7; 5 Maccab. viii. 1-8, with 1 Maccab. ix. 73, xii. 48; Joseph. *Antiq.* xiii. 11; 5 Maccab. xx. 17, with Joseph. *Antiq.* xiii. 15; 5 Maccab. xxi. 17, with Joseph. *Antiq.* vii. 12), especially when recording foreign history (comp. 5 Maccab. xii.), it is a trustworthy and valuable narrative. There can be no question that some of its blunders are owing to mistakes committed by transcribers (*e.g.*, the name *Felix*, which stands five times for three different persons, 5 Maccab. iii. 14, vii. 8, 34, with 1 Maccab. iii. 10; 2 Maccab. v. 22; viii. 33; the name *Gorgias*, 5 Maccab. x., is a mistake for *Timotheus*, as is evident from 2 Maccab. x.; Joseph. *Antiq.* xii. 11; so also *two* for *nine*, 5 Maccab. xix. 8), and that, as a whole, it is far more simple and natural, and far less blundering and miraculous, and therefore more credible than 2 Maccab. As to its religious character, the book shows most distinctly that the Jews of those days firmly believed in the survival of the soul after the death of the body, in a general resurrection of the dead, and in a future judgment (v. 12, 13, 17, 22, 43, 48-51; lix. 14, etc.)

4. *Author, Date, and Original Language of the Book.*—This book is a compilation, made in Hebrew, by a Jew who lived after the destruction of Jerusalem, from ancient Hebrew memoirs or chronicles, which were written shortly after the events transpired. This is evident from the whole complexion of the document, even in the translation—for the original has not as yet come to light—as may be seen from the few features here offered for consideration:—1. When speaking of the dead (xv. 11, 15; xii. 1; xxi. 17) the compiler uses the well-known euphemisms, *God be merciful to him* = *עָלוּ יְרֵחַם אֱלֹהִים*; *to whom be peace* =

*עָלוּ יְהוֹשֻׁעַ*, which came into vogue among the Jews in the Talmudic period (comp. *Tosifia Chulin* 100, a; Zunz, *Zur Geschichte*, p. 338), and are used among the Jews to the present day—thus showing that the compiler was a Jew, and lived after the destruction of the Temple. 2. He calls the Hebrew Scriptures (iii. 3, 9) *the twenty-four books* = *עֶשְׂרִים וָאַרְבָּע*, a name which is thoroughly Jewish, and came into use long after the close of the Hebrew canon; leaves *Tora* (תּוֹרָה), the Hebrew name for the Pentateuch, untranslated (xxi. 9), in accordance with the Jewish custom; speaks of the deity as *the great and good God* = *אֱלֹהֵי הַטוֹב וְהַגָּדוֹל* (i. 8, 13, 15; v. 27; vii. 21, 22; viii. 5, 11; ix. 4; x. 15; xi. 8; xii. 1; xv. 4; xvi. 24; xxviii. 4; xxxv. 9; xlviii. 14; lvii. 35; lix. 58); names Jerusalem *the city of the holy house* (xx. 17; xxi. 1; xxiii. 5; xxviii. 23, 34, 37; xxx. 8; xxxv. 4, 33; xxxvi. 6, 38, 39; xxxvii. 3, 5; xxxviii. 5; lii. 7, 24; lix. 68); *city of the holy house of God* (xxxix. 10); or simply *holy city* (xvi. 11, 17; xx. 18; xxi. 26; xxxiv. 7; xxxv. 32; xxxvi. 9, 19, 25; xxxviii. 3; xli. 15; xliii. 12; xlix. 5; l. 16; liv. 13, 26; lv. 27; lvii. 22; lix. 2); *holy house* (xx. 7, 17; xxiii. 3; xxxvi. 35; l. 8; lii. 19; liii. 6; lvi. 17, 44; lix. 35, 68); *house of God* (vii. 21; ix. 7; xi.

7; xv. 14; xvi. 16, 17; xxi. 11; xxvii. 4; xxxiv. 10; li. 5; lii. 31; liv. 13; lv. 20); the Temple he calls *the house of the sanctuary* = *בֵּית הַמִּקְדָּשׁ* (viii. 11), in accordance with the later Hebrew idiom. 3. This later date of the compilation of the book is corroborated by the fact that the compiler refers to the destruction of Jerusalem (xxi. 30), and to the period of the second Temple, as something past (xxii. 9). 4. He speaks of the original author of the book as a distinct person (xxv. 5; lv. 25), and explains the original writer's allusions (lvi. 45). 5. The original writer of the work must have lived before the destruction of Jerusalem, for he terminates his narrative six years before this catastrophe, and does not know of any of the calamities which befel his brethren after the conquest of Palestine by Titus. He must therefore have written about five years before the Christian era. His name is unknown; all that we can gather from this book is, that he is also the author of other historical works which are now lost, as he himself refers to them (lix. 96), and, judging from his terse and experienced style, it is not at all improbable that he was the public chronicler. The book is entirely devoid of the *Magadic* legends which form a very striking characteristic of the Jewish productions of a later age. Dr. Graetz (*Geschichte der Juden*, v. 281) identifies it with an Arabic chronicle written about A.D. 900, entitled TORICH AL MAKKABAIN, JUS-SUFF IBN G'ORG'ON, *History of the Maccabees*, or *Joseph b. Gorion*, a part of which he says is printed in the London Polyglott under the title of *Arabic Book of Maccabees*, and the whole of which, extending to the time of Titus, is in two Bodleian MSS. (Uri, Nos. 782, 829). He moreover tells us, that it is this work which the well-known Hebrew chronicler called *Josippon* [JOSIPPON B. GORION] translated into Hebrew, and supplemented, and this he has promised to prove at some future time. We must confess, that after a careful comparison of 5 Maccabees with the Hebrew Josippon, we are unable to trace the identity, and we are all the more astonished at Dr. Davidson's confident assertion, that 'it is another form or recension of our book [*i.e.*, 5 Maccab.] which exists in the work of Joseph ben Gorion or Josippon, a legendary Jewish history' (*Introduction to the O. T.*, iii. p. 466). However, we must wait for the promised treatise upon this subject from Dr. Graetz.

5. *Versions and Literature.*—Though this book is in our estimation as important as 2 Maccab., yet there has hardly anything been done to elucidate its narrative. In the absence of the original Hebrew, the Arabic versions of it, printed in the Paris and London Polyglotts, is the text upon which we must rely. The editors of this version have not even given any account of the MS. from which it has been taken. A Latin translation of it by Gabriel Sionita is given in both Polyglotts; a French translation is given in the appendix to De Sacy's Bible; another French translation, by M. Baubrun, is given in vol. iii. of Le Maitre's Bible; and Calmet translated chapters xx.-xxvi., containing the history of John Hyrcanus, which he thought Sixtus Senensis had taken for the legitimate 4 Maccab. The only English version of it, as far as we know, is that by Cotton, *The Five Books of Maccabees*, Oxford 1832.—C. D. G.

MACEDONIA (Μακεδονία), a name originally confined to the country lying northward of Thes-

saly, eastward of the Cardavian mountains (a prolongation of Mount Pindus), and westward of the river Axios; but afterwards extended over the whole country lying to the north of Greece Proper, and stretching from the Ægean Sea to the Adriatic. When conquered by the Romans (B.C. 168) it was at first divided into four districts (Liv. xlv. 29), of two, if not three of which, coins are still extant

344.

(Akerman, *Numismatic Illust. of the N. T.*, p. 43); but at a later period the whole of Macedonia, with Thessaly, was formed into one province under a proprætor, with the title of proconsul (Smith, *Dict. of Gr. and Rom. Geography*). It thus divided, with Illyricum and Achaia, the entire country between Tænarus (Cape Matapan) on the south, and the valley of the Danube on the north. This is the Macedonia of the N. T.

Macedonia became familiarly known in the East through the conquests of Alexander. The rapid progress of his victories, and the formation of the Macedonian empire in the East on the ruins of the Medo-Persian monarchy, are prophetically set forth by Daniel under the symbol of a four-headed and four-winged leopard or panther (vii. 6); under the symbol of a he-goat that 'came from the west on the face of the whole earth, and touched not the ground' (viii. 5, 21); and the strength of the empire is symbolised by the 'thighs of brass' in the image which was seen by Nebuchadnezzar (ii. 32, 39; comp. Hävernicks, *in locc.*) It has been thought by some that the representation in viii. 5 receives confirmation from the existence of Macedonian coins, on which that country is represented by a he-goat; but it is not certain that such is the fact, and if it were, it would add nothing to the appropriateness of the prophet's symbol.

In the Apocryphal books there are frequent allusions to Macedonia. In the Apocr. Esther (vi. 10-14), Haman, who is described as not of Persian blood, is made a Macedonian, and is represented as plotting to transfer the kingdom from Ahasuerus (Xerxes) to the Macedonians; a representation which is evidently due to the traditional hatred of the Jews to Haman, and belongs to a later age than that of Esther. The first book of Maccabees opens with a reference to 'Alexander

the son of Philip the Macedonian, who came out of the land of the Chetitim' (i. 1), which, though properly the designation of the island of Cyprus, seems to have been used vaguely by the Hebrews for the whole eastern coast of Europe, just as the Turks call all to the west of them Franks [CHITTIM]. Of Alexander it is said there, that 'he reigned the first over Greece' (comp. vi. 2); a statement which is not strictly correct, for in the only sense in which he could be said to reign over Greece, viz., as the generalissimo of her armies against the Persians, and by his superior might, he only succeeded to what his father Philip had possessed; but as the father was, especially in the East, completely overshadowed by the son, this error is easily accounted for. So also we find Daniel describing Alexander as 'king of Javan' (viii. 21), and his kingdom as that of Javan (xi. 2). In 1 Maccab. viii. 5 Perseus is described as 'king of the Citims,' in a reference to his defeat by the Romans; and the term 'Macedonian' is used subsequently to designate the soldiers of the Seleucid princes (2 Maccab. viii. 20). In the Arabic summary of Jewish history at this period inserted in the 4th vol. of the London Polyglott, and sometimes called the 5th book of Maccabees, the term Macedonians (المقدونيّين) is applied to the Egyptian as well as the Syrian successors of Alexander, and even their country is called Macedonia (see chaps. i. ii. iii. etc.)

St. Paul, whilst at Troas, was summoned to preach the gospel in Macedonia by a vision, in which a man of Macedonia appeared to him, and said, 'Come over and help us.' Immediately obeying what he recognised as a divine call, the apostle crossed over by Samothrace to Neapolis; thence he proceeded to Philippi, where he founded a church; and from that city he advanced by way of Amphipolis and Apollonia to Thessalonica, the capital of the province, where also he founded a church. Driven thence by the fury of the Jews, he went to Berea, where he found his countrymen of a better spirit, and more disposed candidly to examine his doctrine (Acts xvi. 9-xvii. 12). St. Paul visited Macedonia a second time in his hasty passage from Ephesus to Troas (Acts xx. 1), and again on his return to Asia (ver. 6); but of these visits no details are given by the historian. Whether he visited it a fourth time, as he desired to do (Phil. ii. 24), is matter of uncertainty [TIMOTHY, EPISTLES TO]. Repeated allusions to Macedonia, or its inhabitants, occur in his writings (Rom. xv. 26; 2 Cor. i. 16; ix. 2; Phil. iv. 15; 1 Thess. i. 7, 8; 1 Tim. i. 3). The excellent Roman roads by which this part of Europe was intersected in the days of the apostles greatly facilitated the operations of those who sought to diffuse Christian truth among the people (comp. Acts xix. 21; 1 Thes. i. 8; 2 Cor. i. 16; Rom. xv. 19).—W. L. A.

MACHIR (מכיר, *sold*; LXX., Μαχίρ), the eldest and apparently the only son of Manasseh by an Aramitish or Syrian concubine. His wife was Maacah, of the family of Benjamin, 'the sister of Huppim and Shuppim,' and it is specially recorded that his children were 'brought up' (the Targum says 'circumcised') in the house of their aged great-grandfather, Joseph (Gen. l. 23; 1 Chron. vii. 14, 15). It may be remarked in passing, that in the Pesch. Syr. Maacah is named as

the mother of Machir. The only son of Machir whose name is recorded is Gilead (Num. xxvi. 29; Josh. xvii. 1; 1 Chron. ii. 21, 23; vii. 14). But when we remember the early date at which the district bore this name (Gen. xxxi. 21, 23; Deut. iii. 12-16), and the loose manner in which we find the word 'father' used in the O. T. (cf. 1 Chron. ii. 51; iv. 14; ix. 35), we can hardly venture to interpret the name Gilead of a person, or deduce more from it than that the mountain-range known under this designation was occupied by Machir's descendants. From 1 Chron. ii. 21 we learn that Hezron, a chief of Judah, the natural or adoptive ancestor of Caleb, took as the wife of his old age, 'when he was threescore years old,' a daughter of Machir, who appears from the LXX. reading of ver. 24 (though the whole genealogy is sadly dislocated) to have been named Abiah. Zelophehad, whose death without male offspring led to the promulgation of the law of succession of heiresses, was one of Machir's descendants (Num. xxvii. 1; Josh. xvii. 3).

The family of Machir come forward prominently in the history of the conquest of the Trans-Jordanic portion of the Promised Land. In the joint expedition of Israel and Ammon, their warlike prowess expelled the Amorite inhabitants from the rugged and difficult range of Gilead, and their bravery was rewarded by Moses by the assignment to them of a large portion of the district, 'half Gilead' (Josh. xiii. 31), with its rich mountain-pastures, and the towns of Ashtaroth and Edrei, the capitals of Og's kingdom (Num. xxxii. 39, 40; Deut. iii. 15; Josh. xiii. 31; xvii. 1). The warlike renown of the family of Machir is given as the reason for this grant (Josh. xvii. 1), and we can see the sound policy of assigning a frontier land of so much importance to the safety of the whole country, exposed at the same time to the first brunt of the Syrian and Assyrian invasions, and to the never-ceasing predatory inroads of the wild desert tribes, to a clan whose prowess and skill in battle had been fully proved in the subjugation of so difficult a tract (Stanley, *S. and P.*, p. 327).

Machir being the eldest, and probably the only son of Manassah, his name appears to stand for that of the whole tribe in Josh. xiii. 31, cf. 29 and xvii. 1. This is perhaps the case in Judg. v. 14, where the name of Machir appears among other western tribes as having sent 'representatives bearing some high title (A. V. 'governors'), which distinguished them from the surrounding chiefs' (Stanley, *Jewish Church*, p. 319), to the aid of Barak.

2. A wealthy Trans-Jordanic sheikh, the son of Ammiel (called by Josephus, vii. 9. 8, 'the chief of the land of Gilead'), residing at Lo Debar, among the mountains of Gilead, not far from Mahanaim. The district in which he lived was 'emphatically the refuge of exiles' (Gen. xxxii. 2-10; 2 Sam. ii. 8; Stanley, *S. and P.*, p. 328), and Machir's connection with the O. T. history is as affording shelter and hospitality to royal fugitives—first to Saul's grandson Mephibosheth, and then to David himself during Absalom's rebellion. The house of Machir is where we first hear of the unhappy Mephibosheth after the hasty flight which followed on the fatal rout of Gilboa, and it was from this safe and happy refuge, in which he probably expected to end his days in the midst of the family which he was beginning to form (2 Sam. ix. 12), that David summoned him to share his fortunes at

Jerusalem (2 Sam. iv. 4; ix. 1-13). Twenty years later his royal patron is himself a fugitive, and we again hear of Machir uniting with the neighbouring sheikhs, Shobi and Barzillai, in welcoming their dethroned monarch, and lavishing on him and his weary and famished soldiers the abundant produce of their rich lands and pastures, and providing them with the furniture necessary for their hasty encampment (2 Sam. xvii. 27).—E. V.

MACHPELAH (מַכְפֶּלֶה; τὸ διπλοῦν; *duplex*), the celebrated burial-place of the patriarchs at Hebron. It is interesting to note the several ways in which the word Machpelah is used in Genesis—the only book of Scripture in which it occurs. In two passages (Gen. xxiii. 9; xxv. 9), the historian mentions 'the cave of the Machpelah' (מְעֵרָה הַמַּכְפֶּלֶה; τὸ σπήλαιον τὸ διπλοῦν), which the Septuagint and Vulgate translate 'the double cave.' In another passage (xxiii. 17) he describes the 'field of Ephron' as 'in Machpelah,' from which it seems that Machpelah was the name of a district. In another (ver. 19), he says Abraham buried Sarah 'in the cave of the field of the Machpelah' (cf. l. 13); and in another (xlix. 30), he states that Jacob when dying charged his sons: 'Bury me with my fathers in the cave that is in the field of Ephron the Hittite; in the cave that is in the field of the Machpelah.' It would seem that, originally, Machpelah was the name of the 'cave,' which was probably so called from being 'double'

(from כפל, 'to double'; but Gesenius renders it 'portio, pars,' in which sense the name would apply more properly to the district—*Thesaurus*, p. 704); and gradually the name was extended to the 'field' (שדה, 'cultivated field') around the cave, and then to the district.\* Abraham bought 'the field, and the cave which was therein, and all the trees that were in the field, that were in all the borders round about,' being unwilling to bury his dead in the tomb of heathen strangers; and being anxious to secure, not only the tomb itself, but the land round it, as his own property, in order to prevent dispute afterwards, and to preserve his family sepulchre free from all pollution or intrusion. In a mountainous country like Palestine, the caves which abound in the limestone strata form the most natural and secure places of sepulture. Mamre was one of Abraham's favourite camping-grounds. This particular cave had doubtless often attracted his attention. The situation of the field is described as 'before Mamre' (לפני מִמְרָה, πρόσωπον Μαμβρη; *respiens* Mamre); that is, 'in the face of Mamre'—in front of the town, and visible from it.

It is a remarkable fact, that none of the sacred writers refer to this celebrated tomb after the burial of Jacob, though it was unquestionably held

\* Kalisch, however, says—'It is generally acknowledged that the translations 'double cave,' as most of the ancient versions and commentators render, are erroneous. The grammatical construction of the words shows that Machpelah is a proper noun, and that this is the locality in which the cave was situated. This is confirmed by all subsequent passages, especially by ver. 19' (Gen. xxiii. 7-9). Neither the grammar nor the passages referred to settle the question.

in reverence by the Jews in all ages. Josephus, in his short notice of the burial of Sarah, says that 'both Abraham and his descendants built themselves sepulchres at' Hebron (*Antiq.*, i. 14); and in another passage he states that the monuments of the patriarchs 'are to this very time shown in Hebron, the structure of which is of beautiful marble, wrought after the most elegant manner' (*Bell. Jud.*, iv. 9. 7). Jerome mentions the *mausoleum* of Abraham at Hebron as standing in his day (*Onomast.*, s. v. *Arboch*); and in the *Jerusalem Itinerary*, a work of the 4th century, it is described as a quadrangular structure built of stones of wonderful beauty (*Itin. Hieros.*, ed. Wessel. p. 599). It is also mentioned by Antoninus Martyr, in the beginning of the 7th century (*Itin.*, 30); by Arculf towards its close (*Early Travels in Pal.*, Bohm, p. 7); by Willibald in the 8th (*Id.*, p. 20); by Saewulf in the 12th (*Id.*, p. 45); and by numerous others (see Ritter, *Pal. und Syr.*, iii. 237, *seq.*) From these notices, it appears to be certain that the venerable building which still stands is the same which Josephus describes.

Hebron lies in a narrow valley which runs from north to south between low ridges of rocky hills. The modern town is built partly in the bottom of the vale and partly along the lower slope of the eastern ridge. On the hill-side, above the latter section of the town, rise the massive walls of the Haram, forming the one distinguishing feature of Hebron, conspicuous from all points. The building is rectangular, about 200 feet long by 115 wide, and 50 high. The walls are constructed of massive stones varying from 12 to 20 feet in length, and from 4 to 5 in depth. Dr. Wilson mentions one stone 38 feet long and 3 feet 4 inches in depth; but the writer did not see it (*Lands of the Bible*, i. 366). The edges of the stones are grooved to the depth of about two inches, so that the whole wall has the appearance of being formed of raised panels, like the temple-wall at Jerusalem. The exterior is further ornamented with pilasters, supporting without capitals a plain moulded cornice. The building is thus unique; there is nothing like it in Syria. The style of its architecture, independent even of the historical notices above given, proves it to be of Jewish origin; and it cannot be much, if at all, later than the days of Solomon. The interior of this massive and most interesting building was described about fifty years ago by a Spaniard, who conformed to Islamism and assumed the name of Ali Bey (*Travels*, i. 232). A new interest has been attached to the place by the visit of the Prince of Wales in 1862, who appears to have been the first Christian, since the time of the Crusades, permitted openly to enter its sacred precincts. An account of the visit, and a description of the interior, has been written by the graphic pen of Dean Stanley, who accompanied His Royal Highness (*Sermons in the East*, pp. 141, *seq.*; cf. *Lectures on the Jewish Church*, 484). The entrance is gained by a long flight of steps outside the wall. Within is an elevated platform, partly artificial and partly composed of a crown of natural rock. At the south end is a mosque, originally a Byzantine church, having in front a double portico supported on square pillars. 'I now proceed to describe the Tombs of the Patriarchs, premising always that these tombs . . . do not profess to be the actual places of sepulture, but are merely monu-

ments or cenotaphs in honour of the dead who lie beneath. Each is enclosed within a separate chapel or shrine, closed with gates or railings similar to those which surround or enclose the private chapels or royal tombs in Westminster Abbey. The two first of these shrines are contained in the inner portico. In the recess on the right is the shrine of Abraham, in the recess on the left that of Sarah, each guarded by silver gates. The chamber (of Abraham) is cased in marble. The so-called tomb consists of a coffin-like structure about six feet high, built up of plastered stone or marble, and hung with three carpets, green embroidered with gold. Within the area of the mosque were shown the tombs of Isaac and Rebekah. They are placed under separate chapels. . . . The shrines of Jacob and Leah were shown in recesses corresponding to those of Abraham and Sarah, but in a separate cloister, opposite the entrance of the mosque' (*Sermons in the East*, 154-55).

This is all that is now visible within the walls of the Haram—all, at least, to which access has as yet been obtained. These shrines and cenotaphs and mosques are comparatively uninteresting; it is the cave below which forms the real object of attraction. Dean Stanley states that 'one indication alone of the cavern beneath was visible. In the interior of the mosque, at the corner of the shrine of Abraham, was a small circular hole, about eight inches across, of which one foot above the pavement was built of strong masonry, but of which the lower part, as far as we could see and feel, was of the living rock. This cavity appeared to open into a dark space beneath, and that space (which the guardians of the mosque believe to extend under the whole platform) can hardly be anything else than the ancient cavern of Machpelah' (*Id.*, p. 159). The guardians of the mosque affirmed most positively to the Prince of Wales and his suite that this was the only opening into the sacred cave. It is well known, however, to all who are acquainted with the character of Mohammedan santons, that when they have a purpose to serve they will not hesitate to tell any number of falsehoods. The writer of this article was assured when at Hebron, and subsequently by a Mollah of rank who had visited the tombs of the patriarchs, that there is an entrance to the cave, which consists of two compartments, and that the guardian can on special occasions enter the outer one. With this agree the statements of M. Pierotti (Stanley, *Id.*, p. 162); of Benjamin of Tudela, who gives a description of the caves (*Itin.*, by Asher, p. 76, *seq.*; *Handbook for S. and P.*, p. 69); and of others (Wilson, *Lands of the Bible*, i. 364, *seq.*) We cannot doubt but that the cave of Machpelah, in which the patriarchs were buried, is beneath this venerable building, and that it has been guarded with religious jealousy from the earliest ages. Consequently, it is quite possible that some remains of the patriarchs may still lie there. Jacob was embalmed in Egypt, and his body deposited in this place. It may still be there perfect as an Egyptian mummy (Gen. i. 2-13). The Moslem traditions and the cenotaphs within the Haram agree exactly with the Biblical narrative, and form an interesting commentary on Jacob's dying command—'And he charged them . . . bury me with my fathers . . . in the cave which is in the field of Machpelah, which is before Mamre. . . . There they buried Abraham and Sarah his

wife; there they buried Isaac and Rebekah his wife; and there I buried Leah' (Gen. xlix. 29-31). There also they buried Jacob. And now, within the enclosure are the six cenotaphs only; while the belief is universal among the Mohammedans that the real tombs are in the cave below. Projecting from the west side of the Haram is a little building containing the tomb of Joseph—a Moslem tradition states that his body was first buried at Shechem, but was subsequently transferred to this place (Stanley, *Jewish Church*, 498). The Jews cling around this building still, as they do around the ruins of their ancient temple—taking pleasure in its stones, and loving its very dust. Beside the principal entrance is a little hole in the wall, at which they are permitted at certain times to pray.

The fullest historical notices of Machpelah will be found in Ritter, *Pal. und Syr.*, iii., and Robinson, *B. R.*, ii. The best description of the interior is that of Stanley, *Jewish Church* and *Sermons in the East* (the two are identical), in which he gives the singular narrative of Rabbi Benjamin, and a letter of M. Pierotti, which appeared in the *Times* immediately after the Prince of Wales' visit. A plan of the mosque is attached to Stanley's narrative. The description given by Ali Bey is substantially the same as that of Dean Stanley. See *Travels*, vol. ii.—J. L. P.

MACKNIGHT, JAMES, D.D., was born 17th Sept. 1721, at Irvine, in Ayrshire, where his father was parish minister. At the age of 14 he entered the University of Glasgow, and, having completed the usual course of study there, he went to Leyden, for the purpose of extending his theological acquirements. On his return to Scotland he was licensed to preach, and, after filling some subordinate offices, he became minister of the parish of Maybole in 1753. In 1769 he was translated to that of Jedburgh; and in 1772 he became one of the ministers of Edinburgh. He died 13th Jan. 1800. Whilst at Maybole he published his *Harmony of the Four Gospels, with a Paraphrase and Notes*, 2 vols. 4to, Lond. 1756, of which a second edition appeared in 1763, and many have since followed. In 1763 appeared also his work on *The Truth of the Gospel History*, 4to, Lond.—a work in which he seeks, by various lines of argument, to vindicate the claims of the gospel narrative. These works were well received, and brought the author the distinction of the honorary degree of D.D. from the University of Edinburgh. But his principal work is his *New Literal Translation from the Original Greek of all the Apostolical Epistles, with a Commentary and Notes*, etc., 4 vols. 4to, Lond. 1795; 6 vols. 8vo, 1806. This, which was the result of thirty years' labour, soon obtained and long kept a high reputation. Of late years it has perhaps sunk into unmerited neglect; for there is much in it well deserving the attention of the Biblical student. Its greatest defects are traceable to two causes—the author's imperfect knowledge of the original languages of the Bible, and his want of fixed hermeneutical principles. In tracing out, however, the connection of a passage, especially of an argumentative kind, he often shows great ability.—W. L. A.

MACLEAN, ARCHIBALD, was born 1st May 1733, O. S., at East Kilbride, in Lanarkshire, and died 12th December 1812, at Edinburgh, where he had long been the respected pastor of a Baptist church. His writings are chiefly practical and

controversial; but he is entitled to mention here on account of his *Paraphrase and Commentary on the Epistle to the Hebrews*, Edin., 2 vols. 12mo, 1811-1817; Lond. 2 vols. 8vo, 1819; Aberdeen, 2 vols. 12mo, 1847. This work is highly praised by Orme in his *Bibliotheca Biblica*, and with justice. As a careful, judicious, and luminous exposition, it has few superiors in the class to which it belongs.—W. L. A.

MADAI (מַדַּי; *Madol*; *Madai*), the third son of Japhet (Gen. x. 2). There cannot be a doubt that the names recorded in the tenth chapter of Genesis are not merely names of persons, but also heads of tribes and nations. The chapter was intended to show how the world was peopled by the family of Noah, and whence the various nations which are afterwards mentioned in sacred history originated. Madai bequeathed his name to one of the greatest nations of antiquity—the MEDES, as well as to the kingdom which his descendants established—MEDIA. It would have tended greatly to simplify our Biblical geography if the translators of our A. V. had followed a uniform rule in the rendering of proper names. The very same Hebrew word מַדַּי is represented by no less than four different words in the English Bible: *Madai*, which is the proper rendering (Gen. x. 2; 1 Chron. i. 5, only); *Medes* (2 Kings xvii. 6); *Mede* (Dan. xi. 1); *Media* (Esther i. 3). We have no reason to conclude that, because the mind of the historian was directed to nations rather than to individuals in this chapter, *Madai* is not, therefore, to be regarded as a person. Madai was the name both of the son of Japhet, and of the nation that sprung from him. See article MEDIA.—J. L. P.

MADIAN (מִדְיָן; *Madian*), properly *Madian*, the name given by the martyr Stephen to the country to which Moses fled from Egypt (Acts vii. 29), and which is called in the O. T. MIDIAN.—J. L. P.

MADMAN, MADNESS. Two Hebrew words are rendered by 'madness' in the A. V., viz.—מְדַמָּן, and מְדַמָּן. The words rendered 'mad,' or 'madman,' are מְדַמָּן, and מְדַמָּן. A brief examination of these words will show us the Jewish conception of the nature of madness.

1. מְדַמָּן (LXX. παραπληξία, Deut. xxviii. 28; παραφρηνήσις, Zech. xii. 4) is from an Arabic root, meaning 'to be strong,' or 'bold,' and is probably in some way connected with מְדַמָּן, 'to wander,' or 'stumble.' This word, and the participle מְדַמָּן, 'mad,' are always used of madness connected with intellectual confusion and excitement (*Wahnsinn*), and manifested by wild and rapid actions. In 2 Kings ix. 20 it is applied to the 'furious' driving of Jehu—'he driveth in madness' (*marg.* A. V.) It is from a curious and interesting trace of the Dervish-like separation, unusual dress, and intense utterance of the ancient Hebrew prophets, that we find this word applied to them, not without a shade of contempt, by the false prophets or men of the world by whom they were surrounded. Thus, in 2 Kings ix. 11, the captains say of the young prophet missioned by Elisha to anoint Jehu, 'Wherefore came this mad fellow' (LXX. ἐπιδληπ-

ros) to thee?' and still more instructively in Jer. xlix. 26, we find the words מְשֻׁנֵּן וּמְתַנְּבֵן, 'every man that is mad and maketh himself a prophet' (cf. Hos. ix. 7), just as we find 'Vaticinari et insanire' united in Cicero (*Pro Sexto*. 10). That the prophets generally assumed the unkempt aspect and rough garment, which made them, from Elijah to St. John the Baptist, a living testimony against luxury and worldliness, seems probable from Is. xx. 2, Zech. xiii. 4; and that, in addition to this, there was a certain fury and passion in their looks and gestures during the rapture of prophetic delivery, is clear from the fact that מְתַנְּבֵן is used alike of divine inspiration (1 Sam. x. 6, 10, 13), of the raving of impostors (1 Kings xviii. 29), and of the frantic outburst of a maniac (1 Sam. xviii. 10). To the ancients generally, 'madness' appeared as the direct result of some external spiritual influence, and this was more especially the case with the Jews, who had no conception corresponding to the word 'Law,' as used in science, but attributed every result to the immediate intervention of God. A poet has profoundly said that

'Great wit to madness nearly is allied,  
And thin partitions do their bounds divide;'

and the intense realisation of spiritual truths, or the unutterable fullness of noble emotions, may not unfrequently produce effects which, to the idle and sin-degraded observer, appear no better than the vagaries of insanity (Acts xxvi. 24; John x. 20; 2 Cor. ii. 14; iv. 10). In the East, too, where men abandoned themselves with more uncontrolled freedom to inward impulse and outward influences, the manner of a prophet—the nakedness, the dishevelled hair and foaming lip, and the agitation which often required music for its tranquilization (1 Sam. xix. 24; 2 Kings iii. 15; cf. *Æn.* vi. 45; Luc. *Phars.* v. 161)—recalled in some measure the actions of a maniac. It is, however, a fact of deep significance, and one which well illustrates that 'divine instinct' which guided the disciples (*ἰδιῶται καὶ ἀγράμματοι*, though they were, Acts iv. 13) in the use of words, that we find in the N. T. no sanction of this confusion of thought which resulted among the ancient Hebrews from confusion of language, and among the ancient Greeks from limitation of knowledge. The apostles do not adopt the word *μαντεύσθαι* (derived from *μαννῶμαι*, Plat. *Phædr.*, p. 244), because it sanctioned the erroneous conception which even Cicero pointed out only to condemn (*Ut alia nos melius quam Græci, sic huic præstantissimæ rei nomen nostri a divis; Græci, ut Plato interpretatur, a furore duxerunt—De Div.* i. 1). Knowing and teaching that 'the spirits of the prophets are subject to the prophets' (1 Cor. xiv. 32), they reject *μάντις* altogether for *προφήτης*, and only use *μαντεύσθαι* once (Acts xvi. 16) of the girl who imagined herself to be possessed by the spirit of Python (Trench, *Synonyms of the N. T.*, i. 6).

2. The word הִלָּל (LXX. *παράφορα, περιφέρεια*) occurs only in the book of Ecclesiastes, where it is found seven times (Eccl. i. 17; ii. 12; vii. 25, etc.), and once in the plural (x. 13). It is probably derived from הָלַל, 'to shine,' which by the common analogy of the senses becomes 'to sound' (Germ. Hallen), and so passes through

various stages of metaphor ('glory,' 'boastfulness,' etc.) into the sense of 'being mad' or 'foolish.' The verb is used in this meaning in 1 Sam. xxi. 14; Jer. xxv. 16; 1. 38; li. 7; and it seems from these passages to involve the notion of 'folly' and 'stupid excess' (*Narrheit*), not unaccompanied with meaningless sounds and actions (cf. Nahum ii. 5; Ps. cii. 9; 1 Sam. xxi. 13).

3. These are the only words used for 'madness,' but we also find מְתַלְתֵּל in Prov. xxvi. 18 (LXX.

*ῥώμενοι* Ald. *πειρώμενοι*) for a raving maniac, 'who casteth firebrands, arrows, and death' (*Töbsucht*). This passage, together with the derivation of the word from a most expressive onomatopœia for the pantings of a rabid dog (לָהָה, *siti rabiosus est*), will sufficiently illustrate the character of this frenzy (Greek *λύσσα*), which seems to have been the one which afflicted the envy-maddened heart of king Saul.

4. Idiocy is nowhere mentioned in the Bible; but we find the words סְכֵלֹת, 'folly' (Ecc. *passim*); תַּמְהוֹן, 'amazement' (LXX. *ἐκστασις*, Zech. xii. 4; נְבִלָה, 'wicked foolishness,' 1 Sam. xxv. 25; and other terms which call for no remark.

The only three instances of madness in the O. T. are those of Saul, Nebuchadnezzar, and perhaps David. The fury of the first was caused by 'an evil spirit from the Lord,' apparently the demoniacal prominence of a despairing jealousy in his mind. For the hypochondriacal illusion of Nebuchadnezzar no precise term is used, nor do the Jews seem to have been familiar with that form of madness\* known as Zoothropia, which appears both in ancient and modern times most frequently to have taken the form of Lycanthropy. His bestial degradation was a fit punishment for his suprahuman arrogance. These two varieties of madness resulted, then, as madness so often does, from forms of sin. David's madness, on the other hand, if real (which the Hebrew may perhaps† admit, 1 Sam. xxi. 13; cf. Jer. xxv. 16, etc.), was the cause of too long and violent a strain on his powers of bodily and mental endurance (Zeller, *Bibl. Realwörterb.*, ii. 96).

In the N. T. we find the words *ἀνοια* (amentia), a deprivation of reason, often caused by passion (Luke vi. 11; Acts v. 17; xiii. 45); *μανία* (furor) (Acts xxvi. 24; 1 Cor. xiv. 23, etc.); *παράφροσύνη* (*vesania, perversion of reason*), 2 Pet. ii. 16. For *δαίμονιζόμενοι* and *σεληνιαζόμενοι*, see DEMONIACS, LUNATICS. We are not here called upon to enter into the discussion of demoniacal possession, but a comparison of all the passages will show that, at any rate, the line of demarcation drawn between madness and possession was very faint, and that the brute strength, violence, avoidance of mankind,

\* The special form of this illusion was (as in the case of the daughter of Prætus) Boanthropia, Dan. iv.

† I pass over as of no authority the superscription of Ps. xxiv. The LXX. seem to have taken David's disease for epilepsy. The Rabbinical word for epilepsy is נִפְּל, or נִכְפָּה; and for madness שִׁשְׁיָה. See the Rabbinical quotations in Winer, *Bibl. Realw.*, s. v. *Besessene*.

howling, terror, and self-inflicted injuries of the *δαμονιζόμενοι*, are with us regarded as the signs of epilepsy and natural madness.—F. W. F.

MADMANNAH (מַדְמָנָה; 'a dunghill,' from

דָּמָן = Arab. دمن; Μαχαριμ; Alex. Βεδεβηνά;

but in Chron. Μαδμηνά; *Medemena*; *Madmena*), one of a group of cities described as belonging to Judah, and lying 'toward the coast of Edom southwards' (Josh. xv. 21, 31). The group has twenty-nine cities altogether, and among them are Kedesh and Beer-sheba, so that they probably extended along the whole southern border of the tribe. It would appear from 1 Chron. ii. 49, that the city of Madmannah was captured and occupied by the descendants of Shaaph, a son of Caleb. The name is not again mentioned in Scripture, and it must not be confounded with the Madmenah of Is. x. 31.

From the arrangement of the names in Joshua it appears that Madmannah lay to the west of Beer-sheba. Eusebius and Jerome identify it with a little town near Gaza called *Menois* (*Onomast.*, s. v. *Mademana*). On the direct route from Gaza to Sinai a place called *Minyāy* is mentioned, a few miles south of Gaza; this is probably the site of the *Menois* of Eusebius and the Madmannah of the Bible (Robinson, *B. R.*, i. 602). On comparing the list of cities allotted to Simeon out of the tribe of Judah, given in Josh. xix. 2-7, with the list of cities in Judah (xv. 28-32), it would seem that Madmannah and Beth-Markaboth were identical, as is suggested by Keil (on Josh. xix. 5, and xv. 31), the latter name being an appellative arising from its being used as a 'station for chariots' [see BETH-MARKABOTH]. Van de Velde has attempted to identify a ruin called el-Mirkib (about ten miles from the south-west corner of the Dead Sea towards Beer-sheba), with Beth-Markaboth; but the position does not agree with the indications of Scripture (see, however, Van de Velde, *Travels*, ii. 130, and Map).—J. L. P.

MADMEN (מַדְמֵן. In the LXX. the words מַדְמֵן תַּרְמֵי are rendered παῖσιν παύσεται, as if from the same root, דָּמָן; this is an error which the Vulgate follows, *silens contiesces*), a town of Moab involved in the curse with Heshbon and Horonaim (Jer. xlviii. 2). Its site is unknown.—J. L. P.

MADMENAH (מַדְמְנָה; same root as preceding; Μαδβηνά; *Medemena*), a place mentioned only in Is. x. 31, where the prophet is describing the approach of an Assyrian army to Jerusalem. It was probably a small village, and appears to have been situated in Benjamin, between Anathoth and Nob. The writer has repeatedly examined that region; but though he succeeded in identifying the site of Nob, he could see no ruins, and hear of no name that would suggest identity with Madmenah. Eusebius and Jerome confound it with Madmannah in the south of Judah (*Onomast.*, s. v. *Medemana*).—J. L. P.

MADON (מָדוֹן; Μαδών; Alex. Μαδών; *Madon*), one of the ancient royal cities of Canaan which joined the league of Jabin, king of Hazor, to oppose the Israelites under Joshua (Josh. xi. 1). The army was routed at the Waters of Merom, and subsequently destroyed amid the mountain

defiles. Madon is also included in the list of cities captured by Joshua (xii. 19). We have no notice of it afterwards; and we have no indication of its situation, except that the way in which it is mentioned in both passages might suggest that it was near Hazor. Schwartz (p. 90) believes it to be identical with Kefr *Menda*, a large village with ancient ruins in the plain of Battauf, about seven miles north of Nazareth (Robinson, *B. R.*, iii. 109, 111). For this there is no evidence except some little similarity in the names. Robinson's suggestion that Kefr Menda represents the *Asochis* of Josephus appears more probable (Joseph. *Vita*, 45, 68; see also Van de Velde, *Memoir*, 332). Eusebius and Jerome knew nothing of Madon (*Onomast.*, s. v.), nor has the learning of Reland been able to throw light upon it (*Pal.*, p. 1068).—J. L. P.

MAGBISH (מַגְבִּישׁ; 'assembling'; Μαγεβίς; *Megbis*). In giving the numbers of those who returned to Palestine from the captivity, Ezra arranges them (apparently) under their native towns, and among them we find recorded, 'The children of Magbish, an hundred fifty and six' (ii. 30). It has been questioned whether the name is that of a man or a place. The latter seems most probable, since, in the preceding verses, the names are unquestionably those of towns—Bethel, Ai, Nebo, etc. Magbish appears to have been in Benjamin, and apparently somewhere along the western brow of the mountain. The name does not elsewhere occur in history.—J. L. P.

MAGDALA (Μαγδαλά=Heb. מְגַלָּה, 'a tower,' *Magda*). This word occurs in only one place in the Gospels, Matt. xv. 39, and though the *T. R.* has it in that passage, yet the best MSS. (Sin., Vat., D.) read *Magadan* (Μαγαδάν), which, Alford observes, 'appears to have been the original reading, but the better known name Magdala was substituted for it.' It is not unusual, however, for Syrian villages to have two names, and for the same name to have different forms. The parallel passage in Mark viii. 10, has *Dalmanutha* (Δαλμανούθα); though here also some MSS. read *Magdala*, and some *Magada* (Alford, *ad loc.*)

A close examination of the gospel narrative, and a comparison of the parallel passages in Matthew and Mark (Matt. xv. 39; xvi. 1-13, with Mark viii. 10-27), prove that Magdala or Magadan must have been situated on the western shore of the sea of Galilee, and Dalmanutha was probably a village near it; for the whole shores of the lake were then lined with towns and villages. Eusebius and Jerome locate this place, which they call *Magadan*, on the east of the sea of Galilee, and they say there was in their day a district of *Magadena* around Gerasa (καὶ ἔστι νῦν ἡ Μαγαδιανὴ περὶ τὴν Γερσάν; *Onomast.*, s. v. *Magadan*). They also state that Mark (viii. 10) reads Μαγαδάν, though Jerome's version has *Dalmanutha*. The old Latin version has *Magada*. In some editions of Josephus a *Magdala* is mentioned on the east side of the lake (*Vita*, 24), but the best MSS. read *Gamala* (Robinson, *B. R.*, ii. 397; *Joseph.* by Hudson, *ad loc.*). Lightfoot places Magdala beyond Jordan, but his reasons are not satisfactory (*Opera*, ii. 413). The Rabbins, in the Jerusalem Talmud, mention Magdala, and represent it as near Tiberias and Ham-math; and consequently, according to their view,

it must have stood on the west side of the lake, as indicated by the evangelists (*Id.*, p. 226).

There can scarcely be a doubt that the small village of *Mejdel* (מגדל, and Greek Μαγδαλά), which stands on the shore three miles north of Tiberias, is the Magdala of the N. T. It now contains about twenty miserable huts, standing amid low shapeless mounds, which apparently cover the remains of the ancient houses. But the situation is beautiful:—On the south a hill rises abruptly in dark frowning cliffs; on the east the lake extends away to the rugged sides of Bashan's great plateau. On the north is the rich plain of Gennesaret—the garden of Palestine. It is probable that the place where our Lord landed was at the foot of the cliffs, a short distance south of Magdala, between it and Dalmanutha, which lay a mile distant towards Tiberias [DALMANUTHA]. Robinson supposes Magdala to be the Migdal-el of Naphtali (Josh. xix. 38; Robinson, ii. 397). The identification, however, seems doubtful.

It is generally supposed that Magdala was the native town of one of the most devoted followers of our Lord, who was hence called Mary *Magdalene*—Mary of Magdala. If this be so, and the fact can scarcely be doubted, then the name of this little village has been incorporated into all the languages of Christendom (Stanley, *S. and P.* 375).—J. L. P.

MAGHREBI, AARON B. JOSEPH, called *the elder* (הרשון), *the saint of God* (קדוש), and *the teacher* (הורב), and generally quoted by the name אהרן הראשון, *Aaron Ha-Rishon*, a distinguished Karait grammarian and commentator who flourished 1270-1300. He was born in the Crimea, became a famous traveller, studied medicine for a maintenance, and ultimately settled down in Constantinople. He wrote—(1.) A Hebrew grammar,

called *The Perfection of Beauty* (כלי יופי), which, though very concise, treats in a masterly manner on the peculiarities of the grammatical forms, and especially on the syntax, and was published at Constantinople 1581. (2.) A commentary on the Pentateuch, entitled *Selection, and the Best of the Selection* (מבחר וטוב מבחר), or *the Book of Selection* (ספר המבחר), or *the Selection of the Upright* (מבחר ישרים), which is highly valued by the Karaites. Excerpts of it were published by J. L. Frey, entitled *Excerpta ex libro* המבחר, *cum versione Latina et c. notis*, Basel 1705; and the whole work, with the super-commentary called *Silver Turret* (טירת כסף), by Joseph Salomon Jerushalmi, rabbi of the Karaites in the Crimea, appeared in Eupatoria 1835. (3.) A commentary on the Early Prophets (פירוש על נביאים ראשונים), i. e., Joshua, Judges, Samuel, and Kings. Excerpts of this work, extending over Joshua and Judges, have been published by Wolf, *Bibliotheca Hebraea*, iv. 1096-1113. He also wrote—(4.) A commentary on Job; (5.) A commentary on the Psalms; and (6.) A commentary on Isaiah, which have not as yet come to light. Mordecai b. Nissan, the celebrated Karaite writer, describes Maghrebi's expositions as 'concise in style, but rich in matter, abounding in excellent explanations, replete with natural science and recondite lore, and full of traditional wisdom. Comp. *Notitia Karaeorum*, ed. Wolf, p. 141; Fürst, *Bibliotheca Judaica*, ii. 24;

Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 721; Graetz, *Geschichte der Juden*, vol. vii., Leipzig 1863, p. 323.—C. D. G.

MAGI. This name has come to us through the Greeks as the proper designation of the priestly class among the Persians (Herod., i. 132, 140; Xenoph., *Cyrop.* viii. 1. 23; Plato, *Alcib.* i. p. 122; Diog. Laert., *Proem.* 1, 2; Cicero, *De Divin.* i. 41; Apul., *Apol.* p. 32, ed. Casaubon, p. 290, ed. Elmenhorst; Porphyr., *De Abst.* i. iv.; Hesych. in verb. *Μάγος*). It does not appear, however, that Magism was originally a Persian institution; and it may be doubted if in its original form it ever existed among the Persians at all.

The earliest mention extant of the Magi is in the prophecies of Jeremiah (xxxix. 3, 13), where mention is made of Rāb-mag, a term which, though regarded in the A. V. as a proper name, is a compound of רב and כנז, and signifies *chief Magus*, after the analogy of such terms as רב־ספרים (*chief scribe*), רב־שקה (*chief butler*), etc. The Rab-mag of Jeremiah is the same as the *Rab-Sigrin-al-col-Chakimin* (רב סגנין על כל חקמין) of Daniel (ii. 48); the τῶν ἱερέων ἐπισμύδατος οὓς βαβυλωνιοὶ καλοῦσι Χαλδαίους of Diodorus Sic. (ii. 24); and the ἀρχιμάγος of the later Greek writers (Sozomen, *Hist. Eccles.* i. 13). This indicates the existence among the Chaldeans of the Magian institute in a regular form, and as a recognised element in the state, at a period not later than 600 years B.C. In Jer. i. 35, it is evidently the same class that is referred to under the designation of the 'wise men of Babylon.' In the time of Daniel we find the institute in full force in Babylon (Dan. ii. 2, 12, 18, 24; iv. 3, 15; v. 7, 8). From him we learn that it comprised five classes—the *Chartummim*, expounders of sacred writings, and interpreters of signs (i. 20; ii. 2; v. 4); the *Ashaphim*, conjurors (ii. 10; v. 7, 11; comp. xlvii. 9, 12); the *Meashphim*, exorcists, soothsayers, magicians, diviners (ii. 2; comp. Is. xlvii. 9, 13; Jer. xxvii. 9); the *Gozrim*, casters of nativities, astrologists (ii. 27; v. 7, 11); and the *Chasdim*, Chaldeans in the narrower sense (ii. 5, 10; iv. 4; v. 7, etc.; comp. Hengstenberg, *Beiträge*, i. p. 343, ff.; Hävernicks, *Comment. üb. Daniel*, p. 52; Gesen., *Thes.*, in vocc.) So much was Magism a Chaldaean institution, that the term *Chaldaean* came to be applied as a synonym for the class (Diod. Sic. ii. 29, ff.; Strabo, xvi. p. 762; Diog. Laert., *Proem.* 1; Cic. *de Divinat.* i. 1; Curtius, *Hist.* iii. 3. 6; Joseph. *De Bell. Jud.*, ii. 7. 3; Aul. Gell., xv. 20. 2; Apul., *Asin.*, ii. p. 228, etc.)

Whether Magism was indigenous in Chaldaea, and was thence carried to the adjacent countries, or was derived by the Chaldeans from Assyria, it is impossible now to determine with any certainty. In favour of its Assyrian origin it has been urged that the word מן is found as the name of the Assyrian Fire-priest (Movers, i. 64, 240), and that the priests of the Assyrian Artemis at Ephesus were called Meg-Abyzi (Strabo, xiv. p. 641). But on this nothing can be built, as we find the syllable Meg or Mag occurring in names and titles belonging to other peoples, as *Mag-Elser* (fire-priest), the father of Artemis among the Phœnicians; *Teker-Mag*, Teker the Magus (on a Cilician coin), etc. When it is considered that the Chaldaean was the older nation, and that the Assyrians derived many

of their religious beliefs and institutions from the Chaldeans (Rawlinson, *Five Great Monarchies*, i. p. 308; ii. 228), the probability is that they derived the institution of the Magi also. That the institution was originally Shemitic, is further confirmed by the Phœnician tradition preserved by Sanchuniathon (ap. Euseb., *Præp. Evang.*, i. 10), that Magos was a descendant of the Titans, and, with his brother Amyos, made men acquainted with villages and flocks. It must be confessed, however, that the word **𐎠𐎵** has more obvious affinities in the Indo-Germanic than in the Shemitic tongues (comp. Sansc. *mah*, Zend *magh*, Pehl. *mog*, Pers. *mugh*, Gr. *μέγας*, etc.); but this can hardly be allowed to weigh much against the historical evidence of the existence of the Magi in Shemitic nations anterior to their existence among those of the Aryan stock.

That Magism was not, as commonly stated, a Persian institution, is shown from several considerations—1. The word does not appear to have existed in the Zend language; at any rate, it does not occur in the Zend Avesta; 2. The religious system of the ancient Persians was a system of Dualism, as the most ancient documents concur with the monumental evidence to prove (see Rawlinson's *Herodotus*, i. p. 426), but with this Magism had no affinity; 3. In the Zend Avesta, the *Yātus*, the practiser of magical arts, is vehemently denounced, and men are enjoined to pray and present offerings against his arts, as an invention of the Dews; 4. Xenophon informs us (*Cyrop.*, viii. 1. 23) that the Magi were first established in Persia by Cyrus (comp. also Ammian. Marc. xxiii. 6; Porphyry, *de abst.*, iv. 16, etc.); a statement which can be understood only, as Heeren suggests (*I.* i. p. 451, ff.), as intimating that the Magian institute, which existed long before this among the Medes, was introduced by Cyrus among the Persians also; 5. Herodotus (i. 101) states that the Magi formed one of the tribes of the Medes; and he also attributes the placing of the pseudo-Smerdis on the Persian throne to the Magi, who were moved thereto by a desire to substitute the Median for the Persian rule (iii. 61, ff.; comp. Ctesias, *Persica*, c. 10-15; Justin, *Hist.*, i. 9; and the Behistun inscription as translated by Sir H. Rawlinson; see Rawlinson's *Herodotus*, i. p. 427); 6. Herodotus mentions that, after this attempt of the Magi had been frustrated, it became a usage among the Persians to observe a festival in celebration of the overthrow of the Magi, to which they gave the name of Magophonia (*μαγοφονία*), and during which it was not safe for any Magus to leave the house (iii. 79; Agathias, ii. 25), a usage which could have had its origin only at a time when Magism was foreign to Persian beliefs and institutions; and 7. We find no allusion to the Magi in connection with any of the Medo-Persian kings mentioned in Scripture, a circumstance which, though not of itself of much importance, falls in with the supposition that Magism was not at that time a predominant Persian institution. The probability is, that this system had its source in Chaldaea, was from that propagated to Assyria, Media, and the adjoining countries, and was brought from Media into Persia, where it came at first into collision both with the national prejudices and with the ancient religious faith of the people. With this accord the traditions which impute to Zoroaster, after he came to be regarded

as the apostle of Magism, sometimes a Parthian and sometimes a Bactrian origin.

Zoroaster, as the Greeks named the famous teacher and lawgiver, whom the Persians called Zerdusht, flourished in the reign of a king Gushasp, who has, on apparently sufficient grounds, been identified with the Darius Hystaspes of the classical writers (Malcolm, *Hist. of Persia*, i. p. 234).\* Zoroaster is commonly spoken of as the great reformer of the Magian system after it had suffered corruption; but it would be more correct to say, that on the primitive Dualistic worship of the Persians he superinduced some notions borrowed from the element-worship, with which Magism at a later period coalesced. His doctrines, as far as they can be gathered from the extant fragments of the Zend Avesta, especially the Vendidad Sâdê, and from the Ulemai Islam (a treatise on the Parsee doctrine by an Arabic writer, supposed to belong to the 6th or 7th century of our era), relate principally to theology and ethics, with occasional references to questions of a cosmological and physiological character. His theology is fundamentally Dualistic. The problem of the world in relation to God he answers by reference to the antithesis of light and darkness, good and evil; all things according to him consist in the mingling of antitheses. His primary principle is the *Zerwâne Akerene*, the Endless Time (with which may be compared the *τὸ ἀπειρον* of Anaximander; see Arist. *Physic.* i. 4, 5; iii. 4-7). Everything save time has been made. Time is the Creator—itsself infinite, absolute, eternal. From the mingling of fire and water sprang Ormuzd, the luminous, the pure, the fragrant, devoted to good and capable of all good. Gazing into the abyss, he beheld afar off Ahriman, black, unclean, unsavoury, the evil-doer. He was startled at the sight, and thought within himself, I must put this enemy out of the way; and set himself to use the fit means for this end. All that Ormuzd accomplished was by the help of Time; the Eternal Time produced the god Ormuzd; and after the lapse of 1200 years the heavens and paradise were made, and the twelve signs which mark the heavens were fixed there. Each sign was formed in 1000 years. After the first three were formed, Ahriman arose to make war on Ormuzd, but failing of success he returned to his gloomy abode, and remained there for other 3000 years, during which the work of creation advanced, and three other signs were made. During this period the earth and the sea were also formed, man was created, and plants and animals produced. Again Ahriman assailed heaven with all his might, but failing in this, he attacked the world. He afflicted Kajumert, the first man, with a thousand plagues till he was destroyed; but was himself taken and driven into hell through the same open-

\* The Pers. *Gushtasp* (گشتاسب) is compounded of two words, of which the former, *gusht*, is the part. pass. of a verb, which signifies to *utter a cry*, and the latter, *asp*, means *horse*; so that *Gushtasp* means a horse that has neighed, or one whose horse has neighed. In this meaning of the word we have probably the source of the story related by Herodotus, as to the circumstances connected with the elevation of Darius Hystaspes to the throne (*Hist.* iii. 84, 87).

ing by which he had come into the world. In man there is much of Ormuzd and much of Ahriman; in his body are fire, water, earth, and air; he has also soul, understanding, judgment, a *ferver* ('principe des sensations,' Anquetil), and five senses. By the soul are moved all the members we possess, and without the soul we are nothing. All these he has from Ormuzd. From Ahriman he has desire, need, envy, hatred, impurity, falsehood, and wrath. When a man dies, the four elements of which his body is composed mingle with the four primitive elements; his soul, understanding, and judgment, unite with the *ferver*, and all become one. In this state man goes to judgment, and according as his good works or his bad works have preponderated during life, he is rewarded with immortality in paradise, or punished by being cast into hell. During life he is in constant conflict with the Dews or Diws, a class of beings possessing a body formed of the four elements—beings essentially evil, and who tempt men to sin; but at the resurrection they shall be annihilated, and all men at last shall be received into paradise. Even Ahriman himself shall be accepted and blessed; for the Dews are gradually abstracting from him the evil and darkness that are in him, so that at last he shall be left pure and bright (see Hyde, *Hist. Rel. Vet. Pers.*, Oxon. 1700; Anquetil du Perron, *Sent Avesta*, 3 vols. 4to, Par. 1771; Vullers, *Fragmente üb. die Rel. des Zoroaster*, Bonn 1831).

Falling originally into violent conflict with the doctrine of Zoroaster, the Magian system came gradually to be incorporated with these doctrines, and Zoroaster himself came to be revered as, if not the author, the great reformer of the Magian order. From the first Magism seems to have had two sides, one scientific and one popular—the former directed to the pursuit of natural inquiry and moral speculation, the latter to the practice of the arts of the soothsayer and thaumaturgist (comp. Herod. i. 103, 120; vii. 19). It had thus a side on which it could find affinity with the theosophy and ethics of Zoroaster; and to this it owed its chief strength and fame. The Magi became erelong a powerful body in Persia. Zoroaster had claimed for the teachers of theology a place in the first rank along with kings and judges; and when the Magi became identified with the teachers of theology, they assumed the place which had been allowed to them. They were divided into three classes—*Herbeds* or learners, *Mobeds* or teachers, and *Destur-Mobeds* or perfect teachers, a division which is referred to Zoroaster.\* They were the councillors of the sovereign, the administrators of justice, the viceroys of the king in his absence on any expedition, and to them was entrusted the education of the heir-apparent to the throne. It was, indeed, incompetent for any one to occupy the throne who had not been trained in the discipline and science

of the Magi (Cicero, *De Divin.*, i. 41; Plato, *Alcib. I.*, p. 122; Philo Jud., *De spec. legibus*, p. 792, ed. Hoeschel; Dio Chrysostomus in *Berysten*; Agathias, *Hist.* ii., sub init.)

But whilst Magism presented a side which linked it to speculative thought, its other side tended ever to degrade it to the level of vulgar superstition and interested trickery. Philo, who in one of his writings (*Quod omnis probus liber*, p. 876) speaks of the Magi as investigating the works of nature from a desire of knowing truth, and as devoting leisure to the study of the divine perfections, and to the initiating of others therein, in another place (*De special. legg.*, p. 792), after exalting them as the companions and councillors of kings, goes on to say, that from the corruption of their art proceeds that *κακοτεχνη* which begging priests and conjurors practise to the delusion and injury of the more susceptible and ignorant portion of society. It was under this more debased form that Magism chiefly presented itself to the Jews and to the Greeks and Romans. Hence, in the Rabbinical writers, the Magus appears almost invariably as a person whose arts are to be denounced and avoided, and whom to follow is to incur the most serious risk (Otho, *Lex. Rabbin. Philol.*, p. 402); whilst, by the classical writers, with the exception of those who could appreciate the speculative side of their pursuits, the Magi are invariably spoken of as deceivers, mischievous and abominable (Sophoc. *Oed. Tyr.*, 387; Hesych. *sub voce*; Tacit. *Ann.*, ii. 27; xii. 22; 59; Plin., *Hist. Nat.*, xxv. 9; xxvi. 4; xxx. 1, 2, etc.)

These considerations will prepare us to find the term Magus used, sometimes with an honourable and at other times with a discreditable reference. In the LXX. we find it used for the Heb. אִשְׁתָּה, *conjuror, magician*, and also for הַרְטָם, *an interpreter of sacred things*. In the N. T. we have it also in both references; in the latter in the case of Barjesus and Elymas (Acts xiii. 6, 8), to whom may be added Simon, who is described as 'using sorcery (μαγεύων), and as putting the people beside themselves by his magical arts (ταῖς μαγείαις ἐγεστανέναι αὐτοῦς, Acts viii. 9, 11) [See under these names]; in the former in the case of 'the wise men' from the east, who came guided by a celestial luminary [STAR IN THE EAST], to pay their homage to the infant Saviour (Matt. ii. 1, ff.). That these Magi were men occupied in the observation of the heavenly bodies may be inferred from their being attracted and guided by the star; that they came from a considerable distance is probable from the length of time they appear to have spent on their journey (comp. ver. 16); and that they were sincere searchers after truth, and men on whose minds divine revelation had, through some channel, shed some of its rays, seems clear from the fact of their having engaged in such a journey at all. Beyond this, however, little can be said with any certainty regarding them. Whence they came, what was their precise object in coming, and at what time their visit was made, are questions which have been variously answered. From the usage of the term ἀνατολή or ἀνατολά, as a local term, nothing can be concluded, for we find it, both in the LXX. and the N. T., used not only with reference to different countries (comp. Num. xxiii. 7; Gen. x. 30; Job i. 3); but, in the most general way, for the portion of the world lying to the east of Judaea (Matt. viii. 11; xxiv. 27). The fact that

\* In the contents of the 21 Nosh or parts of the Zend Avesta, given by Vullers from the Revajet of Kame Behre, and that of Neriman Hushenk, the three orders are given as *Hirbeds*, *Reds*, and *Desturs*; and of these the Hirbed is said to have had care of the sacred fire; the Red to have been the head of the *Chakim* or Wisemen, a magnate of the priesthood; and the Destur the president of the teachers of religion in each province (*Fragmente üb. die Rel. des Zoroaster*, p. 25).

the terms Magi and Chaldæi are sometimes used as synonymous has led some to fix on Babylonia as the country whence these Gentile worshippers came; others, observing that the gifts they presented consisted of Arabian products, have concluded that they came from Arabia; others suppose them to have been Persians; others Bactrians; and there have even been found some to contend for their having been Brahmins from India, a supposition in favour of which some very plausible arguments may be adduced. As nothing certain, however, can be advanced, the subject is best left in that indefiniteness in which the evangelist has stated it. As to the *object* which induced these Magi to undertake this journey, some have supposed that they were Jews living in the east, who were waiting for the hope of Israel, and came to Jerusalem to offer their homage to Jesus as the Messiah; but this view has not found many followers. From their inquiring for the newly-born king of the Jews, and from the whole tenor of the narrative, as well as from the fitness of the case, most interpreters regard them as Gentiles, who appeared on this occasion as representatives of the Gentile world, to hail with fitting worship the advent of Him in whom all nations of the earth are to be blessed. The expectation of the Jews, that from their nation should go forth a world-king, was sufficiently known throughout the East to account for searchers after truth like these Magi setting out on such a quest as that which brought them to Jerusalem [JESUS CHRIST]. With respect to the *time* when their visit was paid, we must place it either immediately after the birth of Jesus, or on the occasion of one of the annual visits which Joseph and Mary were wont to make to Jerusalem after their return to Nazareth (Luke ii. 41). The narrative of Matthew, taken by itself, leads to the former conclusion; but when we compare it with that of Luke, a difficulty arises, from his statement that after the presentation in the temple, Mary and Joseph returned to Galilee, to their own city Nazareth (ii. 39). As the presentation took place when Jesus was but a few days old, and as immediately after the visit of the Magi his mother and her husband fled with Him into Egypt, it is certain that either the visit of the Magi could not have been paid at this time, or Joseph and Mary could not have returned immediately after this to Nazareth, as Luke says they did. The only satisfactory outlet from this entanglement is to suppose that the visit of the Magi was paid on the occasion of the first or second visit of Mary and Joseph to Jerusalem after their return to Nazareth. This falls in also with the statement that Herod caused all the children of two years old and under to be destroyed, which would have been a piece of needless cruelty if his object had been to secure the death of an infant only a few days old.

In the legends of the church these Magi are represented as kings, and as three in number; the former representation being founded on an arbitrary application of Ps. lxxii. 10 and Is. xlix. 7, the latter on the number of the gifts they presented. Other equally unauthorised and vain additions grew up around the narrative of Matthew during the middle ages, of which the reader will find an account in Smith's *Dict. of the Bible*, s. v. (Stanley, *Hist. of Philosophy*; Creuzer, *Symbolik u. Mythologie der Alten Völker*; Müller in Herzog's *Encyc.*, viii. 675, ff.)—W. L. A.

MAGIC. [DIVINATION; TERAPHIM.]

MAGICIAN. This word appears in the A. V. as the representative of the Hebrew word מַכְשִׁיף (Dan. ii. 10), used generally in the pl. מַכְשִׁיפִים (Gen. xli. 8, 24; Sept. ἐξήγηται; Exod. vii. 11; Sept. σοφισται; viii. 3, 14, 15 [A. V. 7, 18, 19]; Sept. ἐπαιδοι; Dan. i. 20; ii. 2, 27 [Ch. מַכְשִׁיפִין]; iv. 4 [A. V. 7; Ch. def. מַכְשִׁיפִי]; v. 11; Sept. ἐπαιδοι.

As observed in the article CHARTUMMIN, it is unfortunate that our translators adopted this rendering for it. The term *magician* corresponds rather to the *Ashaph* or the *Mecashaph* of the O. T., or the μάγος of the LXX. and the N. T., in some of its references [MAGI].—W. L. A.

MAGOG (מָגוֹג; Sept. Μαγώγ), the second son of Japheth (Gen. x. 2; 1 Chron. i. 5), from whom the name was extended to the people descended from him. In the list Magog stands between Gomer and Madai, the Cimmerians or Cimbri [GOMER], and the Medes [MADAI]; and we are thereby directed to look for the people thus designated towards the quarter in which these peoples had their sites. Now, to the north of them were the nations bearing the general name of Scythians, and with them Magog has been from an early period identified (comp. Joseph. *Antiq.* i. 6. 1; Hieron. in Ezek. xxxviii. 2; Assemani, *Biblioth. Orient.* iii. 2, pp. 16, 17, 20). Jewish tradition, as preserved by Josephus and Jerome, extended the name to all the nomad tribes beyond the Caucasus and the Palus Mæotis, and from the Caspian Sea to India, thus including the Tartar and Mongolian tribes, as well as those more properly belonging to the Scythians. In the same general and vague way the name is used by the Syrian and Arabic geographers, as cited by Assemani (*l. c.*); D'Herbelot (*Bibl. Orient.*, s. v. *Jagiouge*); Hasse (*Entdeckungen im feld der ältest. Erd. und Menschengesch.*, pt. i. p. 18; Rosenmüller, *Bibl. Geogr.*, i. 123). Michaelis (*Suppl. ad Lexx. Hebr.*, 1471); Rosenmüller (*Scholia, in Gen.* x. 2); and Gesenius (*Thes.*, s. v.), adopt the view that the Scythians generally are intended. Bochart (*Phaleg*, iii. 19) suggests that the name *Gog* appears in Γωγαρνή, the name of a district near to that through which the Araxes flows (Strabo, p. 528); and this falls in with the supposition that the Magogites were Scythians, for the traditions of the latter represent their nation as coming originally from the vicinity of the Araxes (Diod. Sic., ii. 43). Since Bochart's time the general consent of scholars has been in favour of regarding the eastern Scythians as the Magog of Genesis; but Kiepert 'associates the name with *Macija*, or *Maka*, and applies it to Scythian nomad tribes which forced themselves in between the Arian or Arianized Medes, Kurds, and Armenians' (Keil and Delitzsch, *Bibl. Comment. on the O. T.* [Clark], i. p. 163); while Bunsen places Magog in Armenia; though in the map accompanying his *Bibelwerk* it is placed to the north of the Euxine. Knobel also places Magog here, and connects the Scythian tribes thus named with those which spread into Europe, and were allied to the Sarmatians, who gave their name ultimately to the whole north-east of Europe, and are the ancestors of the Slavic nations now existing. He also finds in the word מָגוֹג, which he translates

great mountain, an allusion to the Caucasus; but this translation rests on a very dubious etymology. Later Jewish tradition also identifies Magog with the Sarmatian tribes (Fürst, *Heb.-Chald. W.B.*, s.v.)

The name Magog does not again occur in Scripture till it appears in Ezek. xxxviii. 2, ff., where the prophet is commanded to 'set his face against Gog of the land of Magog [or against Gog, the land of Magog], prince of Rosh [or chief prince of] Meshech and Tubal.' Scholars are divided as to whether רוש, *rosh*, in this passage, is to be taken as a common noun in the sense of *head* or *chief*, or as the proper name of a people. The Targ., Aq., Syr., and Vulg., adopt the former, and are followed by Ewald (*in loc.*) and Hengstenberg (on Rev. xx. 8); the LXX., Sym., Theodot., take the latter, followed by the majority of modern scholars. As concerns our present purpose, it is of little moment which of these be preferred; but the latter seems on the whole to have most in its favour. There is also a difference of opinion as to whether Gog is to be viewed as the name of the king of the land of Magog, or as a name bestowed by the prophet on the land of the Magogites; the construction favours the latter view (see Hävernick, *in loc.*), but as it is hardly possible on this view to discover to what משיח refers, the former is generally adopted. On

either supposition, Gog is to be regarded as a word formed by the prophet from Magog, possibly, as Ewald suggests (*In Apocal.*, p. 304), because the later Hebrews took the מ as מנוח as the *mem locale*, and, understanding by the word the *place of Gog*, thought of Gog as the chief or ruler of the place. The specification of the sub-tribes Rosh, Meshech, and Tubal, is in harmony with the opinion that Magog is the Caucasian and European Scythians; for, as is generally conceded, Rosh is the branch of the Scythians known to the Arabs under the name روس, *Rûs* (Fraehn, *Ibn Fozzlan's Bericht über die Russen d. älterer zeit*, p. 28, ff.),

and to the Greeks as οἱ Ῥῶς, and described by Tzetzes as ῥῆως Σκυθικόν who were also called Ταῦροι, from whom the modern Russ have taken their name (Von Hammer, *Origines Russes*; Gesen., *Thes.*, s. v.); and Meshech and Tubal are the Moschi and Tibereni who occupied territories near the Caucasus in the neighbourhood of the Araxes. That the description by Ezekiel is to be taken symbolically and not literally, has been clearly shown by Hävernick (*Comment.*, p. 596, ff.) and Fairbairn (*Exposition*, p. 375, ff.); but the descriptions and allusions of the prophet all go to identify the nations included under the command of Gog with the Scythians.

As in Ezekiel Gog and Magog are represented as prince and people, and in their combination the symbol of the heathen nations as opposed to Israel, so in the Apocalypse (xx. 8) we find the two names appearing as the designations of separate peoples, the combination of which represents the entire anti-Christian force of the world. This is in accordance with later Jewish notions, and with an apparently widespread tradition which represented Gog and Magog as synonymous with the aggregate powers of evil as opposed to the kingdom of God. We find traces of this in the Targums (see that of Jerusalem on Num. xi. 27, and that of Pseudo-Jonathan on Lev. xxvi. 44, and Num. xi. 27), and in the Talmud (*Sanhed.* xciv. 1; *Edaioth.* ii. 10; *Avoda Zarah.*

1; Wetstein, *in loc.*) We find it also in the traditions of the Syrians (Knös, *Chrestomath. Syr.*, p. 66, ff.) and of the Arabians (*Kuran*, xviii. 93-97; D'Herbelot, *Biblioth. Orient.*, s. v. *Jagiouge*). The idea arose probably from the phrase being in the first instance vaguely used of the barbarous, little known, and much feared tribes which hung around the outskirts of Semitic civilization in the ancient world. Similarly the Arabs used چین, *Chin wa Machin*, to designate the vast distant and little known empire of China.

As to the derivation of the word *Magog*, nothing can be said with certainty. Knobel connects *Gog* with the Pers. *Koh*, *mountain*, and regards the *Ma* as the Sansc. *Maha*, *great*, thus making *Magog* = *the great mountain*, and supposing an allusion to the Caucasus. Fürst agrees in connecting *Gog* with *Koh*, but he thinks the *Ma* is the Copt. *ma*, *place* (comp. Sansc. *mahi*, *earth*). Others compare *Gog* with خاقان *Chakan*, a name given by the northern Asiatics to the sovereign, and still retained by the Turks as one of the titles of the Sultan. What throws doubt on all these etymologies is, that they proceed on the assumption that *Gog* is the original word from which *Magog* is formed, whereas the reverse is obviously the fact; for *Magog*, the name of the son of Japheth, the Jews taking the *Mem* as the *Mem loci* derived *Gog*. Bochart suggests a derivation from מוג, the Hithpael of which is used in the sense of *melling* or *wasting*; but he does this merely to get an argument in support of his notion that *Magog* is the Greek Prometheus, of whom the tradition was, that, chained to a rock on Caucasus, his liver was consumed by an eagle; a notion which, though embraced by Stillingfleet (*Origines Sacr.*, bk. iii. c. 5), and by Gale (*Court of the Gentiles*, pt. I. bk. ii. c. 6), must be regarded as a mere learned fancy. There is more probability in the suggestion that *Magog* stands related etymologically to *Agag*, *Ogyges*, etc., and that we have in it the syllable *ag* or *ak*, which plays so important a part in the languages of the Japhetic peoples, and which conveys the general concept of *activity*, *energy*, *greatness*, or *majesty*; comp. ἄγας, ἄγαμαι, ἄγη, ἄγω, ἄγνός, μακρός, *macer*; Sansc. *moh*, *to grow*, μέγας, *magnus*, *macht*, mögen, μογέω, μόγυς; Sansc. *magh*, *to move productively*, *machen*, μηχανάω, μοχθέω; Sansc. *ag*, *to move*, Lat. *aqua*, etc.—W. L. A.

MAGOR-MISSABIB (מגור מפּיב), *terror on every side*, the name given to Pashhur, the son of Immer, at whose command Jeremiah was put in the stocks (Jer. xx. 1-3). As פּשְׁחור signifies *freedom* or *prosperity*, it is probable that the prophet intended an allusion to this by the contrasted meaning of the name he applied to him, as predictive of that calamity which was to befall him, and was to make him a terror to himself and all about him. The LXX. omit מסיב, and render מגור by μέτροικος, tracing it apparently to γούρ, *perigrinari*. The phrase is a favourite one with Jeremiah, who uses it besides in vi. 25; xx. 10; xli. 5; xlix. 29; Lam. ii. 22. Elsewhere it is found only in Ps. xxxi. 14.—W. L. A.

MAHALALEEL (מַחֲלֵאֵל), *Praise of God*; Sept. Μαλεαίηλ). 1. Son of Cainan, fourth in descent

from Adam through Seth (Gen. v. 12, etc.) Those who adopt the notion that the list in ch. iv. of the Cainites is only a different form of the same traditional genealogy given of the Sethites in ch. v. regard Mahalaleel in the latter as corresponding to Mahajael in the former. But these two names have different meanings; nor is there a single name in the Hebrew which is the same in both lists, except Enoch and Lamech. The notion itself of an identity in the lists is utterly gratuitous, for even if several of the names in both lists were the same, this would no more prove the two lists to be variations of the same, than the recurrence of the same Christian names in the genealogical roll of two allied families would prove the two rolls to be only different records of one line of descent. Equally gratuitous is the hypothesis of those who take these names as designating epochs, as well as that of Ewald and Fürst, that these are names of deities of the primitive mythology. It is easy to frame hypotheses, but where such rest on *nothing*, it is idle to spend time in refuting them. The Hebrew text, the Samaritan, and the LXX. agree in representing Mahalaleel as reaching the age of 895 years. 2. One of the descendants of Judah through Pharez, and ancestor of Athaiah (Neh. xi. 4).—W. L. A.

#### MAHALATH (מַחֲלַתִּי). 1. (Μαχλῆθ; *Maheleth*),

one of the wives of Esau, the daughter of Ishmael, and the sister of Nebaioth (Gen. xxviii. 9). As is the case also with the other wives of Esau, her name is differently given both in the Edomite genealogy (Gen. xxxvi. 3, 4, 13), and in Josephus (*Antiq.* i. 18. 8; ii. 1. 2). In these passages she is called Bashemath, a name also given (Gen. xxvi. 34) to one of Esau's Canaanite wives. Hengstenberg (*Gemin. of Pent.*, ii. 226) supposes that all the wives of Esau took new names on their marriage, and that Bashemath was the name thus assumed by the daughter of Ishmael, but the fact just mentioned greatly lessens the probability of this explanation. The Samaritan Pentateuch preserves the name Mahalath in all the passages referred to.

2. (Μοῦλᾱθ; Alex. Μολᾱθ; *Mahalath*). The daughter (according to the Keri) of Jerimoth, the son of David, and one of the eighteen wives of Rehoboam (2 Chron. xi. 18). According to the A. V., another wife of Rehoboam is mentioned in the latter part of the verse. It is, however, not certain that this is the meaning of the text, and the context (especially vers. 19, 20; comp. Joseph. *Antiq.* viii. 10. 1) strongly favours the opinion that one wife only is spoken of in ver. 18, and that Abihail is the name of the mother of Mahalath, and not of a second wife of Rehoboam. This is supported by the reading of the MS. 176 (Kennicott) בַּת אֲבִיהַי, and by what appears to have been the text used by the LXX. (Bertheau, *Comm. on Chron.*, l. c.)—S. N.

MAHALATH. The title of Psalms liii. and lxxxviii. [PSALMS.]

MAHANAIM (מַחֲנֵי־דָן; according to Gesenius pl. מַחֲנֵי, 'camp'; but more probably dual, 'double camp,' Παρεμβολαι; in Josh. xiii. 26, 30, Μαδν; and xxi. 38, Καπλν; Alex. Μαβαῖν, etc.; *Mahanaim, id est Castra*; and *Manaim*), a town east of the Jordan and on the north bank of the Jabboc. The origin of the name is given in Gen.

xxxii. 2; after the interview between Laban and Jacob at Galeed, 'Jacob went on his way, and the angels of God met him. And when he saw them, he said, This is God's host (מַחֲנֵה, *Mahaneh*), and he called the name of that place *Mahanaim*'—perhaps because of the double camp or host—that of the angels and his own. It does not appear that there was any town on the spot at that period, though doubtless the heavenly vision would thenceforth render the place holy, and cause men to settle around it. On the approach of the Israelites to Palestine, Mahanaim is again mentioned in the description of the territory of Gad (Josh. xiii. 26); it stood on the border between that tribe and Manasseh (cf. ver. 30), but was allotted to the Levites out of Gad (xxi. 38). It seems to have become one of the most important cities east of the Jordan, for when the power of Saul's house was destroyed in western Palestine, Abner took Ishbosheth to Mahanaim, and made him king over Gilead, etc. (2 Sam. ii. 8). It is a singular fact that it was to this very place David fled on the rebellion of Absalom (2 Sam. xvii. 24, 27); and he was received with a hospitality which has always characterised nomad and semi-nomad tribes in the East (xix. 32). In Mahanaim David remained during the battle, which resulted in the overthrow and death of Absalom; and there he heard the tidings which affected so deeply his paternal heart. This city subsequently became one of the stations of Solomon's twelve purveyors (1 Kings iv. 14). The name does not again appear in sacred history.

Josephus states that Mahanaim was a strong and beautiful city (*Antiq.* vii. 9. 8). It was apparently unknown to Eusebius and Jerome (*Onomast.*, s. v. *Manaim*). Its exact position is nowhere described. It lay between Galeed and the river Jabboc, and apparently not far distant from the latter (Gen. xxxii. 2, 9, 22). The country between it and the Jordan was called Bithron (2 Sam. ii. 29); but we can form no correct idea from Scripture how far the city was from the Jordan. The site of Mahanaim has not yet been identified. There is a small village called *Mahneh*, whose name suggests identity, but it is more than twenty miles north of the Jabboc, and this distance would scarcely seem to accord with the indications given in Genesis of Jacob's journey from Galeed to the Jabboc. The topographical notices, however, are here obscure, and no positive argument either for or against can be based upon them. It would seem strange that a holy place, and a strongly fortified city, such as Mahanaim, should have abruptly disappeared from history, and have left no trace behind except a poor village. May it not be, therefore, that the ruins of *Gerasa* occupy the site of Mahanaim? The situation would suit the Scripture narrative. The ancient history of *Gerasa* is unknown. It is first mentioned by Josephus, but at that time and afterwards it was the capital of *Peræa*—thus occupying the place previously held by Mahanaim (see, however, Raumer, *Pal.* 244; Ritter, *Pal. und Syr.*, ii. 1039-40). The ruins of *Gerasa* are the most extensive and splendid east of the Jordan (*GERASA; Handbook for S. and P.*, ii. 311, seq.)—J. L. P.

MAHANEH-DAN (מַחֲנֵה־דָן, 'camp of Dan,' Παρεμβολὴ Δάν; *Castra Dan*), the name given to the place where the Danites assembled and en-

camped before setting out on their expedition against Laish. It is described as *in*, that is, within the territory of Kirjath-jearim, and situated 'behind' (אַחֲרָיָהּ) the town. Now Kirjath-jearim stands on the north-eastern slope of a hill, and probably the situation of the camp was above the city on the top of the hill (Judg. xviii. 12). The position is a most commanding one; and being a short march from the principal cities of the Danites, on the line of route which they were to take, it formed an excellent gathering-place. It was apparently on this same hill that the house of Abinadab stood, to which the ark was brought from Bethshemesh—'And the men of Kirjath-jearim came, and fetched up the ark, and brought it into the house of Abinadab, *in the hill*' (or 'in Gibeah,' בִּנְבִיעָה; 1 Sam. vii. 1; cf. 2 Sam. vi. 2, 3). There may have been some ancient sanctuary there, to which even the Israelites attached a certain amount of sacredness.

In Judg. xiii. 25 we read of a 'camp of Dan,' or *Mahanch-Dan* (the Hebrew being the same as in xviii. 12, as are also the LXX. and the Vulgate), where the Spirit of the Lord began at first to move Samson. This can scarcely be the same, however, as the Mahanch of Kirjath-jearim, because the former was situated between Zorah and Eshtaol. Zorah is about eight miles south-west of Kirjath-jearim; and Eshtaol, which is probably identical with Yeshua [ESHTAOL], lay only two miles from Zorah, towards Kirjath-jearim. But whether Eshtaol be identical with Yeshua or not, we cannot suppose it to have been situated north-east of Kirjath-jearim, and thus far within the proper territory of Judah; and, consequently, the 'Camp of Dan,' which lay between Zorah and Eshtaol, could not have been identical with the Mahaneh-Dan situated at Kirjath-jearim. The former appears to have been the stated and permanent 'gathering-place' of the tribe in their wars with the Philistines, while the latter was chosen as the point of departure for the great northern expedition. Besides, we can scarcely suppose that the burial-place of Manoa, which was evidently at the 'Camp of Dan, between Zorah and Eshtaol,' could have been beside Kirjath-jearim (Judg. xvi. 31; see *Handbook*, i. 282; Robinson, *B. R.*, ii. 12; iii. 153).—J. L. P.

MAHER-SHALAL-HASH-BAZ (מָהֵר שָׁלַל חָשׁ בָּז; Sept. Τοῦ ὀξέως προνομήν ποιῆσαι σκῶ-λων), words prognostic of the sudden attack of the Assyrian army ('he hasteth to the spoil'), which the prophet Isaiah was first commanded to write in large characters upon a tablet, and afterwards to give as a symbolical name to a son that was to be born to him (Is. viii. 1, 3). It is, as Dr. Henderson remarks, the longest of any of the Scripture names, but has its parallels in this respect in other languages, especially in our own during the time of the Commonwealth.—J. K.

MAHILON (מַחִילֹן; Μααλών; *Mahalon*) is mentioned in Ruth iv. 10 as the husband of Ruth. His name occurs in three other places, with that of his brother Chilion (Ruth i. 2, 5, and iv. 9). From the first of these passages, which formally treats of his family, it would seem that he was the *elder* son of Elimelech and Naomi. These parents were persons of wealth and distinction (Targ.

Jon. on Ruth calls the father מָהֵר רַבָּא, *vir magnus*, and his sons, רַבִּינִין, *magnates*), as would appear from their close relation to Boaz, the head of the tribe of Judah (comp. Ruth ii. 1). Driven by famine from Bethlehem, their home, the family migrated to the neighbouring country of Moab; here the two sons married native wives. The Targum and some of the Rabbinical writers mention this as a sin, as if contrary to Deut. xxiii. 3. This law however, according to the Talmud, applies to the *males* only of the prohibited nations; and accordingly other writers, such as Aben Ezra, suppose that the two daughters of Moab became proselytes, and so saved their husbands from a violation of the law (Cahen, *in loc.*) Rashi, not content with supposing Mahlon and Chilion to have been men of rank and influence (proof of which he finds in their designation, 'Ephrathites,'\* Ruth i. 2), makes their wives to have been princesses. Mahlon is supposed to have received Ruth from the hands of no less a person than Eglon, king of Moab, her father. This rests on no historical foundation, but is rather against the general view which we derive from the book of Ruth. According to this view Mahlon and his brother, after ten years of wedded life in Moab, died childless, his father having died apparently soon after his removal to Moab; and the family thus bereft of its male members seems to have been greatly reduced (see i. 21). By the subsequent marriage of the virtuous Ruth with the wealthy Boaz, the fortunes of Mahlon's family were abundantly retrieved. Boaz, on taking the young widow to be his wife, avowed it as one of his objects 'to raise up the name of the dead [Mahlon] upon his inheritance, that the name of the dead be not cut off from among his brethren, and from the gate of his place' (Ruth iv. 10). [KINSMAN.]—P. H.

MAHOL (מָחֹל; Sept. Μάλ; Alex. Μαούλ), the father of Heman, Chalcol, and Darda, famous for their wisdom, in which only Solomon excelled them (1 Kings v. 11 [iv. 31 A. V.]). In 1 Chron. ii. 6, persons of the same name are called the sons of Zerah; but there seems some confusion here, arising probably from the epithet הַמֵּאֲרִי attached to Ethan, in 1 Kings v. 11, being confounded with מָחֹל, the son of Judah. It is probable that the persons with whom Solomon is compared by the historian lived near his own time. It has been conjectured that for הַמֵּאֲרִי should be read הַמֵּאֲרִי, *the native*, and that the epithet is applied to Ethan to distinguish him from the sons of the stranger Mahol (Thenius, *in loc.*)—W. L. A.

MAI, ANGELO, Cardinal, and one of the most famous scholars of the Romish Church in the present age, was born at Shilpario, in the province of Bergamo, 7th March 1782. He entered the order of Jesuits in 1799; and in 1804 he became classi-

\* That is, as he renders the word, 'noble' (εὐγενής). The word, which seems to refer to the ancient name of Bethlehem, may convey the honourable idea of an indigenous origin and high family descent. Aben Ezra connects this name of Bethlehem with Caleb's wife Ephrata. In like manner, and perhaps for a like reason, Jesse of Bethlehem is called 'the Ephrathite' in 1 Sam. xvii. 12 (comp. the Ἐφεραΐται τὸ παλαιὸν Ὀλβιοί, said of the Athenians of noble birth, in Euripides, *Medea*, 824).

cal teacher in the Jesuit College at Naples. Sharing in the expulsion of the Jesuits from Naples by Joseph Bonaparte, he found refuge in the Collegium Romanum at Rome; and having received priests' orders, he turned his attention to palaeographic studies, and especially to the deciphering of palimpsests. In 1813 he became custos of the Ambrosian library at Milan; and from this time began to issue those publications which have made his name famous. These consist of editions of ancient MSS. discovered and deciphered by him, and which form invaluable additions to the stores of ancient literature previously possessed by scholars. To his perseverance and skill the learned world is indebted for the treatise of Cicero *De Republica* (with lacunæ), an oration of Isocrates, some writings of Philo Judæus, some fragments of the Gothic version of Paul's Epistles, also of the Roman Antiquities of Dionysius of Halicarnassus, and many other remains of antiquity. The greater part of his discoveries have been published in a collected form in the following works:—*Scriptorum Vett. Nova Collectio*, 10 vols., Rom. 1825-38; *Classici auctores a Vaticanis Codd. ed.*, 10 vols., Rom. 1828-38; *Spicilegium Roman.*, 8 vols., Rom. 1839-41; *Nova Patrum Biblioth.*, 7 vols., Rom. 1844-54. In recognition of his valuable labours, Mai was made librarian of the Vatican in 1819; and after obtaining several ecclesiastical dignities, he was, in 1838, made Cardinal by Pope Gregory XVI. He continued his learned labours to the last, and in the midst of them was carried off by an inflammatory attack, 9th Feb. 1854. Some of his latest labours were spent on the preparation for the press of the famous Codex Vaticanus of the O. and N. T.—W. L. A.

MAIMONIDES, MOSES, also called by the Jews *Rambam*, from the initial letters רמב"ם = *R. Moses b. Maimun*, and by the Arabians *Abu Amram Musa b. Maimun Obeid Allah*, was born at Cordova, March 30th, 1135. This great luminary, the Glory of Israel, the second Moses, the Reformer of Judaism, as he is called, was first initiated, when a youth, in the Hebrew Scriptures, the Talmud, Jewish literature, mathematics, and astronomy, by his father who was a thorough scholar. He had scarcely passed his thirteenth year when his native place, Cordova, was taken by the Almohades (May or June 1148), and the fanatic caliph issued a decree that, on pain of exile, the Jews and the Christians must alike embrace Islamism, which compelled his parents to emigrate with the greater part of the Jewish community, and travel about, as he himself tells us, 'by land and by sea,' without finding a resting-place for the sole of his foot. At the age of twenty-three (1158), he showed his extraordinary powers of comprehension and elucidation in a treatise on the Jewish calendar, based on astronomical principles (*חשבון העבור*), which he composed for a friend; and in the same year, whilst wandering about from place to place, he also began his stupendous *Commentary on the Mishna*. So great was then already his knowledge of the Talmud, that he could dispense with books when engaged on this gigantic work. Twelve months after (1159-60), he went with his parents to Fez, where they were compelled, at the peril of their lives, outwardly to embrace Islamism. For this he was attacked by a co-religionist, and replied to it in a treatise entitled *A Letter on Religious Perse-*

*cution* (אגרת השמר), or, *A treatise on Glorifying God* (מאמר קידוש השם)—i.e., by suffering martyrdom—which is a most ingenious plea for those who have not the courage to submit to death for their religion, and who, having outwardly renounced their faith, continue secretly to practice their religion. This maiden production of Maimonides, which he composed about 1160-64, and in which he propounds his idea of Judaism, was published by Geiger, *Moses ben Maimon*, part i., Breslau 1850.

Maimonides was now secretly engaged in encouraging and preserving those of his brethren in Judaism who, like himself, had outwardly professed Mohammedanism. But this endangered his life, and he was compelled to flee from Fez (April 18, 1165). He took refuge on board a vessel, which, after a most dangerous voyage, reached St. Jean d'Acre, May 16, 1165. From thence he made a pilgrimage to the Holy Land, and then to Egypt, where he lost his father (1166), and finally settled at Fostat, the port of Cairo, delivering lectures on philosophy. In all his wanderings, however, he devoted every spare moment to the *Commentary on the Mishna*, which he began at twenty-three, and which he now finished (1168), after ten years' labour. This remarkable work, which was written in Arabic, and entitled *The Book of Light* (Arab.

כתבא אלסרא, Heb. ספר המאור), is designed to simplify the study of the exposition of the Law or Pentateuch, handed down by tradition, which was rendered exceedingly difficult by the super-commentaries and discussions which had accumulated thereon since the close of the Mishna to the days of Maimonides. It is preceded by a general elaborate introduction, in which he discourses on the true nature of prophecy, shows its relationship to the law given on Sinai, treats on the figurative language occurring in the Pentateuch and the Prophets, etc., etc. In the special introduction to the *Tract Sanhedrin* he, for the first time, defined and formally laid down the Jewish creed, which consists of the following thirteen articles:—1. There is one God, who is a perfect being, the Creator and preserver of all things; 2. He is an indivisible unity; 3. He is incorporeal and immutable; 4. He is eternal, and no being existed before Him; 5. He alone is to be worshipped; 6. He endowed chosen men with the gift of prophecy; 7. Moses was incomparably the greatest of all prophets; 8. The whole Law—i.e., the Pentateuch—was given by God to Moses; 9. This law is complete and unalterable; 10. God is omniscient, and takes cognizance of all the thoughts and deeds of man; 11. He will judge both the righteous and the wicked; 12. Messiah is to come, and he may appear any day; and, 13. There is to be a general resurrection of the dead. This introduction of a definite creed may be considered as one of the most important events in the Jewish history since the destruction of Jerusalem.

This creed (שלוש עשרה עקרין) forms to the present day a part of the Synagogue Ritual, and is rehearsed daily by every Jew. If any Israelite disbelieves one of these articles, he is regarded as a heretic (*אפיקורס*), does not belong any more to the Jewish community, and has no portion in

the world to come (חלק לעולם הבא). Comp. Maimonides, *Introduction to sect. x., Tract Sanhedrin*, or to *Perek Chalek*.

In consequence of this work, Maimonides gradually became the great oracle in all matters of religion; he was appealed to (in 1175) by the Jews from different parts of the world for his opinion on difficulties connected with the law, and was nominated Rabbi of Raheia in 1177. Though constantly beset by crowds who came to consult him on all questions, philosophical, medical, and religious, yet, by intruding on the night for his profounder studies, he was able, after ten years' labour (1170-80) to complete his second stupendous work (Nov. 7, 1180), called *Deuteronomy, Second Law* (משנה תורה), or *Jad Hachezaka* = *The Mighty Hand* (יד החזקה), in allusion to Deut. xxxiv. 12, and because the work consists of fourteen books (י"ד=14), which created a new epoch in Judaism. The fourteen books, subdivided into eighty-two

Tractates (הלכות), of which the work consists form a cyclopaedia comprising every department of Biblical and Judaistic literature. When it is added, that Maimonides has given in every article a lucid abstract of the ancient traditional expositions of those who were regarded as the oracles in their respective departments, the immense importance of this remarkable production to the Biblical student can hardly be overrated. It is written in very clear and easy Hebrew, as Maimonides was anxious that it should be intelligible to all readers. Within a few years of its appearance the work was copied and circulated most extensively in Arabia, Palestine, Africa, Southern France, and Italy, and through the world wherever Jews resided. It soon became the text-book of the Jewish religion, and was regarded as a new Bible or Talmud. So great and world-wide was his fame, not only as the reformer of Judaism, but as a physician, that Richard Cœur de Lion invited him to become court physician in England, which he declined, and the Vizier Alfadhel appointed him chief (*Reis*, נגיד) of all the congregations in Egypt (circa 1187). His numerous and onerous duties, as the spiritual head of Judaism, and the constant demand for his great medical skill, were, however, alike unable to overcome the powers of his intellect, which he had consecrated to the elucidation of the Bible and the traditional law, and to the harmonizing of revelation with philosophy. Thus, in the midst of all his engagements, Maimonides determined to reclaim his disciple Ibn Akinin [IBN AKNIN] from the prevailing scepticism about a future world, the destiny of man, sin, retribution, revelation, etc. etc.; and, desirous to counteract this baneful infidelity, completed, about 1190, his third great work. This religio-philosophical work, consisting of three parts in 204 sections, which he wrote

in Arabic, entitled *אלהאירין*, in Hebrew *דלאלה אלהאירין*, *More Nebuchim* = *the Guide of the Perplexed*, in allusion to Exod. xiv. 3, created a new epoch in the philosophy of the middle ages. Not only did Mohammedans write commentaries upon it, but the Christian schoolmen learned from it how to harmonize the conflicts between religion and philosophy. The great aim of Maimonides—to harmonize in his writings the written with oral law—obliged him to reject many things in the rabbinic writings which many of his Talmudic brethren held inviolably sacred. This involved him in extensive and painful controversies during the rest of his life, and he had the mortification of seeing the Jewish nation, whom he laboured so hard to

unite by the creed he, for the first time, introduced into the synagogue, divided into two parties; the one fighting with anathemas against him, regarding him as a heretic, and consigning his works to the flames, and the other defending him as the angel, the messenger of a new covenant. In the midst of the conflict 'the Great Luminary' of the Jewish nation was extinguished, Dec. 13, 1204. The Jews and the Mohammedans of Fostat had public mourning for three days, the Jews of Jerusalem proclaimed a day of extraordinary humiliation, reading publicly the threatenings of the law (Deut. xxviii.) and the history of the capture of the ark by the Philistines (1 Sam. iv. etc.); for they regarded Maimonides as the ark containing the law. His remains were conveyed to Tiberias; and the reverence which the Jewish nation still cherish for his memory is expressed by the well-known saying,

כמושה ועד משה לא קם כמותה, 'From Moses, the lawgiver, to Moses (Maimonides), no one hath arisen like Moses,' in allusion to Deut. xxxiv. 10.

*Editions and Translations of his Works.*—Of those great works which bear on Biblical litera-

ture, the first, *i.e.*, כתאב אלסראן, was translated into Hebrew from the original Arabic by a number of contemporary literati, and is now printed with the text of the Mishna (ed. Naples 1492, Venice 1546, Sabionetta 1559, Mantua 1561-62, etc.), and the Talmud (ed. Soncino 1484, Vienna 1520-30, 1540-50, Basel 1578-80, Cracow 1603-1606, Lublin 1617-28, Amsterdam 1644-47, etc.) Dean Milman is mistaken in saying that this 'great work on the Mishna, the Porta Moses, was translated by Pococke' (*History of the Jews*, 3d ed., London 1863, vol. iii. p. 150), as this celebrated Orientalist only translated portions of it, chiefly consisting of the introductions to the different Tractates (*Theological Works*, vol. i., ed. Twells, London 1740). The Arabic original of these portions is given for the first time with this translation. Surenhusius has given an abridged version of the whole commentary in his edition of the Mishna, Amsterdam 1678. There are also extant Spanish versions of the whole, and German translations of various parts of this work.

2. *The Mishna Torah* or *Jad Hachezaka*.—The first edition of the text appeared in Italy, in the printing-office of Solomon b. Jehuda and Obadja b. Moses, about 1480, two vols. fol.; then in Soncino 1490; the text, with different commentaries, Constantinople 1509; Venice 1524, 1550-51, 1574-75; with an alphabetical index and many plates, 4 vols. folio, Amsterdam 1702. It is to this edition that the references in this CYCLOPÆDIA are made. Translations of portions of this work in Latin have been published, and also one or two in English.

3. *The More Nebuchim*, or *The Guide of the Perplexed*, was, till lately, read in the Hebrew translation of Ibn Tibbon, first published about 1480; then in Venice 1551; Sabionetta 1553; Berlin 1791-96; Sulzbach 1828, etc. It was translated into Latin by Justinian, bishop of Nebio, *R. Mossei Aegyptii Dux sive Director dubitantium*, Paris 1520; then again by Buxtorf jun., *Doctor Perplexorum*, Basel 1629. The first part was translated into German by Fürstenthal, Krotoschin 1839; the second by M. E. Stein, Vienna 1864; and the third by Scheyer, Frankfort-on-the-Maine 1838. Part iii. 26-49 has been translated into English by Dr. Townley, *The Reasons of the Law of Moses*,

London 1827. The original Arabic of the first and second parts has for the first time been published, with a French translation and elaborate notes, by Munk, Paris 1856-61. We trust that this celebrated and industrious Orientalist will soon publish the third and last part. Comp. Geiger, *Moses ben Maimon*, Breslau 1850; Fürst, *Bibliotheca Judaica*, ii. 290-316; Steinschneider, *Catalogus Lib. Heb. in Bibliotheca Bodleiana*, col. 1861-1942; Jost, *Geschichte des Judenthums*, Leipzig 1858, vol. ii. p. 428, ff.; Frankel, *Hodegetica in Mischnam*, Leipzig 1859, p. 320, ff.; Joel, *Die Religions-philosophie des Moses ben Maimon*, in *Jahresbericht der jüdisch-theologischen Seminars*, Breslau 1859; Graetz, *Geschichte der Juden*, vol. iii., Leipzig 1861, p. 310, ff.—C. D. G.

MAISTRE DE SACY. [Sacy.]

MAKAZ (מָקַז, 'end'; Makés; Alex. Μαχμας; *Maces*), a place mentioned only in 1 Kings iv. 9, in describing the district allotted to the second of Solomon's purveyors. It is joined with Shaalbim and Bethshemesh, and was thus probably situated in the territory of Dan, on the western slopes of the mountains of Judah. It appears to have been unknown to Eusebius and Jerome (*Onomast.*, s. v. *Maces*), and its site has not been identified.—J. L. P.

MAKHELOTH (מִקְהֵלוֹת, 'assemblies,' as in Ps. lxxviii. 27; Μακηλόθ; *Maceloth*), one of the stations of the Israelites in the wilderness, mentioned only in the summary of their journeyings given in Num. xxxiii. (25, 26). The site is unknown.—J. L. P.

MAKKEDAH (מִקְדָּה; perhaps 'place of shepherds,' from root נָקַד; Gesen., *Thesaurus*, s. v.; Μακηδά, but in Josh. xv. 41 Μακηδάν; Alex. Μακηδᾶ; *Macada*), an ancient royal city of Canaan (Josh. xii. 16), captured by Joshua immediately after the defeat of the allied kings at Gibeon (x. 28). It obtains its only celebrity from its connection with that great battle. We read that the defeated Canaanites fled down the Pass of Bethhoron, and were hotly pursued by the Israelites 'to Azekah and Makkedah' (x. 10). At the latter town was a cave in which the fugitive monarchs hid themselves (16, 17). Stones were rolled on the mouth of the cave, and the pursuit followed up until they that remained 'entered into fenced cities' (20). Then Joshua returned to Makkedah, opened the cave, slew the kings, 'and hanged them on five trees' (26).

The situation of Makkedah is not precisely described in the Bible, yet we have some indication of the region in which it stood. After the slaughter of the kings at Makkedah, Joshua marched on Libnah, and then on Lachish (x. 29). The site of the latter is known. It is on the southern border of the plain of Philistia [LACHISH]; and Libnah appears to have been situated a short distance north of it [LIBNAH]. Joshua's line of march was south or south-west; and, therefore, we may infer that Makkedah lay north, or north-east, of Libnah. With this agrees the order of the towns in Josh. xii. 15, 16—Libnah, Adullam, Makkedah; and in ch. xv. Makkedah is enumerated among the towns allotted to Judah in the *Shephelah* (33, 41); that is, the plain of Philistia lying near the western base of the hills. All the kings who joined the

king of Jerusalem against Gibeon were from the south—Hebron, Jarmuth, Lachish, and Eglon. When their armies were driven down the Pass of Bethhoron, they would naturally endeavour to escape to their own cities (x. 19) along the base of the mountains, where their flight would be unimpeded. All these indications point to one locality; and with them partly agrees the statement of Eusebius and Jerome, who place Makkedah eight miles from Eleutheropolis towards the east (πρὸς ἀνατολὰς; *Onomast.*, s. v. *Maceda*). When the writer explored the Shephelah in the spring of 1857, he found at the foot of the mountains, about eight miles north-east of Eleutheropolis, a small village called *el-Klediah*, not far from Jarmuth, one of the confederate cities; in the hill-side near it are numerous large caves. This may probably mark the site, as it bears some resemblance to the name of Makkedah (*Handbk.* 251). Van de Velde would locate it at *Sumeil*, two and a half hours north-west of Eleutheropolis (*Memoir*, 332). The only objection against *el-Klediah* is its distance from Bethhoron—about twenty miles. The kings were captured and killed on the evening of the day of battle; Makkedah also was taken that same day (ver. 28). All this, however, is possible, unless we deny the miracle, for 'the sun stood still in the midst of heaven, and hasted not to go down about a whole day' (ver. 13).—J. L. P.

MAKTESH (מִכְתֵּשׁ, 'a mortar'; κατακεκομμένη; *Pila*; Vet. Lat. *Concissa*), a quarter or suburb of Jerusalem, specially denounced by Zephaniah (i. 11). It would seem from the use of the article (הַמִּכְתֵּשׁ), and from the fact that, as a name, the word is nowhere else found, that *Maktesh* is an appellative rather than a proper name, intended to describe one of the deep valleys of Jerusalem, which in shape resembled a 'mortar.' The ancient versions so regard it (Aq., εἰς τὸν ὄλμον; Theod., ἐν τῷ βάθει). The Targum supposes reference to be made to the valley of Kidron. Others think it means the Tyropæon, a deep valley in the centre of the city, where the shops and principal places of business were situated (Henderson, *ad loc.*; Joseph. *Bell. Jud.* v. 4. 2). The context would seem to favour the idea that some place of merchandise was specially referred to:—'Howl, ye inhabitants of Maktesh, for all the merchant people are cut down; all they that bear silver are cut off.'—J. L. P.

MALACHI (מַלְאכִי abbr. from מַלְאכִי, messenger of God; cf. אורי, from אורייח; אבי, from אביריח, etc.; LXX., Μαλαχίας in the heading; but in i. 1 מַלְאכִי, ἄγγελος αὐτοῦ, scil. Κυρίου; where cod. Barber. Aquila, Symmachus, Theodotion, and Γρ have Μαλαχίου (= מַלְאכִי); Vulg. *Malachias*; Targum. מַלְאכִי דִּיתְקַרִי שְׁמִי, Malachi who is called Ezra the Scribe; ספרא עזרא ספרא, Syr. مَلَاكِي; Arab. مَلَاكِيَا), the author of

the last of the canonical books of the O. T. (in the Hebrew canon as the last of the *תרי עשר*, placed before Psalms), who is therefore also denominated by Jewish authorities סוף הנביאים, 'end of the prophets'; חותם הנביאים, 'seal of the prophets'; אחרון שבהם, 'the last among them,' and the like. Absolutely nothing is known about this pro-

phet's personal history. Neither his birthplace nor his kindred, neither the time of his life nor that of his death, are to be found in any authentic record. Speculation and legend have therefore early been busy in supplying these desiderata. Malachi is thus, according to Rab (*Meg.* 15, a), Mordecai himself, and the former name has been bestowed upon him on account of his being second to the king (מלך), as stated in Esther x. 3; which

etymological suggestion is contradicted (*ib.*) by a tradition recorded in a Boraitha, where, in an enumeration of the seven prophets who prophesied in the second year of Darius, Mordecai and Malachi are counted separately. Another opinion brought forward in the same place by Jehoshuah b. Korchah, viz., that Malachi was none else but Ezra—an opinion supported by R. Nachman b. Jizchak on account of both Malachi and Ezra inveighing against the practice of marrying heathen women—is equally rejected by the majority of the Talmudical

authorities who hold (*ib.*), 'מלאכי שטן':—whoever this prophet was, he was not identical with anybody else of a different name, but he was an individuality of his own, and his name is Malachi. The presumed identity with Ezra is further contradicted by a dictum in *Sabb.* (62, a), which makes Malachi return at once with Zerubbabel. Of the manifold strange theories subsequently started on the basis of the prophet's name, which was construed, in the absence of any other information, into an appellative: we may mention that of Origen, who holds

an angel (מלאך) to be the real author of the book; that recorded in Pseudepiphanius, that the name ('Μαλαχία') was bestowed upon Malachi because of his excessive angelic beauty and goodness—a notion also found in the Scholiast on Ephræm Syrus's *Commentary to Malachi*; further, that he received this epithet on account of his angelic power of delivery (Isidore of Seville); or because he communicated Revelations (Theodoret); or because an angel came down and explained his discourses to the people, etc. etc. All these explanations deserve no more serious attention than the apocryphal statements of the *Chronicon Alexandrinum*, of Pseudepiphanius, and other legendary records, of his being born in Zopha or Sopha, in Zebulun; or (according to Theodoret), in Sophæra in the tribe of Levi, and that he died there at an early age; or that he was identical with Joshua ben Josedeck, as Clement of Alexandria holds. The notion, however, that Malachi was only a kind of pseudonym, standing in reality for Ezra, or somebody else, has, although disposed of already by the Talmud, and by the subsequent Jewish authorities (see Aben Ezra, *Comment. on Mal.* i. 1; Kimchi, *ad loc.*, Abrahavanel, *Introd. to Mal.*), has yet found its supporters from Jerome to Hengstenberg. Their reasons for this assumption are chiefly these:—Nothing is said in Malachi about himself, nor does any other ancient source contain aught about him; which, considering his being the latest prophet, is very strange. Further, they say, his name is significative of his mission. Ezra, moreover, might have been designated a prophet, although we never find this name applied to him. Again, no mention of Malachi is ever made in Ezra; and Sirach, in naming the twelve prophets (c. 49), does not mention Ezra, while Josephus names Ezra, but not Malachi; and finally, they hold, the circumstances

recorded in Malachi strangely tally with those of Ezra's times. The answers to most of these arguments are obvious, and have been repeatedly given; others are somewhat more difficult to refute; but none is so strong as to really cast any serious doubt upon Malachi's existence as an individuality of his own.\* And this is indeed held to be an undeniable historical fact, by the vast majority of investigators.

The question of Malachi's exact date is indeed one more difficult to answer, and one about which anything but unanimity may be said to prevail. That he lived after Haggai and Zechariah is clear from the Temple being rebuilt in his time, the temple-service restored, and the very remembrance of the exile having well-nigh faded away. That, again, he is a contemporary of Nehemiah, a mere glance at Neh. xiii. is sufficient to convince us, where, quite apart from the similarity of the contents with Malachi (the neglect of the sacrifices, the profanation of the Sabbath, the corruption of the priests, the intermarriage with heathen women, etc.), the passages agree often almost to the letter. The real question at issue is, whether Malachi prophesied during Nehemiah's first or second administration, or shortly before or afterwards, or even during the interval between the two administrations only. Our space does not allow us to enter into the special arguments brought forward by the different investigators in support of their respective views. Suffice it to record, that the majority of Biblical critics (Jahn, Rosenmüller, Keil, Hengstenberg, Bertholdt) agree with Vitringa's opinion, that Malachi delivered his discourses shortly before or immediately after Nehemiah's second return to Jerusalem, that is, after the thirty-second year of Artaxerxes Longimanus (420 B.C.) Others, however, conclude, from the somewhat altered circumstances of the commonwealth, as they appear in both writers (*f. i.*, that in Nehemiah's time Jerusalem was but half rebuilt; that Malachi complains only of a great drought; that in Nehemiah's time the exile must have been in vivid recollection; that mention is made of a פתור—who, however, need by no means have been a Jewish governor, as is commonly supposed), that Malachi lived subsequently to Nehemiah (Ewald, Herbert, etc.) Herzfeld, Davidson, and a few others, place him before Nehemiah (460-450 B.C.), to whom, by tradition (cf. Maccab. ii. 13), is assigned the collection of all the prophetic books, and consequently also that of Malachi; and who, if they had been contemporaries, could not have failed to come in contact with him, and to mention him, at least, among the many names in Neh. viii. 4-7; ix. 4, 5. It is difficult to decide between these opinions, which, on the whole, differ but in a comparatively small number of years. The Talmudical tradition quoted above (*Meg.* 15, a), viz., that he prophesied in the second year of Darius Hystaspes (repeated by late chronological handbooks, such as *Seder Olam Rabba*, etc.), has as little historical foundation as Scaliger's, Capellus's, and others' surmise,

\* A comparison of style and diction in Ezra and Malachi should, we think, prove sufficient to convince any scholar that they are written by very different hands, quite apart from such very striking peculiarities as their respective use of אלהים (cf. *Reinke*, p. 49, *seqq.*)

that he lived as late as the time of Alexander; and deserves no refutation.

The book itself has been variously divided into three, five, six, eight, or more sections. In the Hebrew canon we find three chapters, the third including also the fourth of the LXX., Vulg., Peshito, Arab., and the A. V. Following Ewald and Hävernicks in assuming three chief divisions only, we find how in the first (i. 2-ii. 9), the prophet calls to the people's mind the kindness the Lord has shown towards Jacob while he hated Esau, and yet those to whom he has been a father have not been as children to him, and—worst of all—they whom he appointed as their special guardians and teachers, the priests, have been foremost in offending him by polluting his altar and vilely exchanging the very sacrifices offered. They, the chosen tribe of Levi, with whom was the Lord's covenant of life and peace, whose lips should keep knowledge, who, in fact, are 'the messengers of the Lord of Hosts,' have departed out of the way, and have caused the many to stumble: therefore also they have become contemptible and base before all the people. In the second message (ii. 10-16) he inveighs against the evil of 'profaning the covenant' by the marriages between the people and 'the daughters of a strange god,' coupled with a hypocritical repentance and the treachery against the legal spouses of their youth. But if hitherto Jehovah has been spoken of as the God and Father of his people, he is in the concluding prophecy (ii. 17-iv. 6) introduced as the God of judgment, who, wearied by the iniquities committed before his sight, the atrocities and the false swearings, and the oppression of the widow and the fatherless and the stranger, the robberies of tithes and offerings, the unbelief in his words, will send his messenger ('מלאכי') right speedily, who shall refine, and purify, and purge, and the righteous shall be separated from the wicked, and while to the former shall rise the sun of righteousness, the latter shall be trodden under foot as dust. And with the final admonition—the prophetic seal upon the Mosaic covenant:—'Remember ye the law of Moses my servant;' and the promise to send 'Elijah the prophet before the coming of the great and dreadful day of the Lord, who shall turn the heart of the fathers to the children, and the heart of the children to their fathers,' the book concludes.

We cannot agree with those critics who consider Malachi's style and diction 'pedantic, scholastic, forced, barren,' and the like. It certainly lacks the grandeur and power of the best prophets, but is nevertheless of a very high order; in one or two places even rising to the very highest level of prophetic inspiration and form of expression. In general the language is concise, clear, and polished, and the manner of introducing a new line of argument or a new range of thought is most striking. And here the peculiarity is to be noticed, that there is no longer the ancient dramatic manner displayed, but a kind of dialogue has taken its place, which is carried on between God and the people or the priests, whose half-mocking questions are enlarged upon and finally answered with scorn by the mouth of the messenger. He seems fully aware of being the last of the sacred bards (iii. 1 and 22), and the epoch of transition from the glowing energetic fullness of the inspired seer, who speaks to the people as the highest power suddenly and irresistibly moves him, to the carefully studied

and methodically constructed written discourse, becomes strangely apparent in him. We find both the ancient prophetic improvised original exhortation, with its repetitions and apparent incongruities, and the artificially composed address, with its borrowed ideas well arranged and its euphonious words well selected. This circumstance has probably also given rise to the notion that we have only in his book a summary of his orations; a work containing, as it were, the substance only of his addresses; written out by himself from his recollections—an opinion which we do not share. Of peculiarities of phraseology we may notice the occurrence of passages like *ונשא אתכם אלוי* (ii. 3), *כסת חמום* (ii. 16), etc.

The authenticity and integrity of the book, as we now possess it, have never been called in question. The N. T., Philo, Josephus, Melito, Jerome, and other ancient authorities, mention it, and quote from it as in accordance with our present copies. Nor is there anything either in its language or the circumstances of its time, the manners and customs touched upon, or its topographical and geographical allusions, that could give rise to the slightest critical suspicion. Its text is one of the purest and best preserved, and no glosses to it are to be found in the Codd., such as had to be added to correct the corruptions of other books. The differences in the various Ancient Versions arise only from differences of individual interpretation, and from the differences of the vowels assumed or found by the translators in their copies. The few Variants which occur in the different texts are so unimportant that they do not call for any special remark. The literature on this book is unusually extensive. We shall confine ourselves to mentioning the writings of Chytræus, Bohlius, Vitringa, Stock, Scclater, Ursinus, Grynæus, Salomon v. Tyl, Wessel, Hebenstreit, Venema, Bahrdt, Faber, Fischer, Ewald, Hitzig, Henderson, etc. The most complete and exhaustive modern work is L. Reinke's *Der Prophet Malachi, Einleitung, Grundtext und Uebersetzung, nebst philol.-krit. und hist. Commentar*, Giessen 1856, 8vo.—E. D.

**MALCHAM (מלכאם).** 1. A name of the Ammonite idol, commonly called Molech. The name Molech, מלך, is from the same root as מלך, 'king,' and evidently of the same signification, having in all occurrences but one (1 Kings xi. 1) the article, 'ham-molech,' המלך. Its pronunciation being sufficiently supported by the ancient versions, it is probably a dialectic variation. Malcham and Milcom, מלכאם, are two varieties, if we may depend upon the points, of a derivative with 'ם formative' used as a proper name. According to the present punctuation, Malcham is identical with 'their king,' מלכאם, with the suffixed pronoun of the third person plural masculine; hence a difficulty when the context is not positive.

The passages in which Malcham seems to be a proper name are the following: Jer. xlix. 1, 3; Amos v. 26; Zeph. i. 5; 2 Sam. xii. 30. In Is. viii. 21, the meaning is doubtful. It is difficult to conjecture the reason for the use of more forms than one of the name of Molech. Perhaps one is

the Israelite, and another the Ammonite form. Some escape this difficulty by considering Malcham to be an appellative with the sense 'their king,' but this does not explain the variety Milcom.

2. A Benjamite, apparently of the descendants of Ehud, and son of Shaharaim, probably born in the land of Moab, but the passage is difficult, though a connection with Moab is clear. Among his brethren, Jobab has a name also given to an Edomite, as well as to a Canaanite king; and, still more remarkably, Mesha has a name also that of a Moabite king. The occurrence together of Malcham and Mesha in connection with Moab is confirmatory of the correctness of the former name, at least as far as its consonants are concerned, as applied to the Ammonite idol, for in such a passage it would not have been changed by intention, or by a mistake of the transcriber.—R. S. P.

MALCHIAH, or MALCHIJAH (מַלְכִּיָּהוּ), in one instance מַלְכִּיָּהוּ; Sept. *Μελχία*, *Μελχίας*; Alex. *Μελχίας*), a name of frequent occurrence in the O. T., not fewer than thirteen persons of this name being mentioned. The only one who furnishes occasion for any remark is the one mentioned Jer. xxxviii. 6, into whose dungeon Jeremiah was cast. He is described as 'the son of Hammelech,' that is, as it is elsewhere rendered, 'the king's son' (1 Kings xxii. 26; 2 Chron. xxviii. 7). This title occurs besides Jer. xxxvi. 26. It probably indicated that the party of whom it is used was of royal descent. Whether it implied any official position at court is doubtful, though all the parties to whom it is applied seem to have held some such position.—W. L. A.

MALCHISHUAH (מַלְכִּישׁוּאָה), LXX. *Μελχισουά*, Jos. *Μελχισός*), a son of Saul. In the A. V. he is called Malchishuah in 1 Sam. xiv. 49, xxxi. 2; but Malchishuah in 1 Chron. viii. 33, ix. 39, x. 2; although the Hebrew word is the same in both books, with the exception of its being written as two words in the latter passages. The only fact mentioned about Malchishuah is that he was slain by the Philistines, with his father and his brothers, in the disastrous defeat of Mount Gilboa. It is impossible to determine whether he was Saul's second or third son, since in 1 Sam. xiv. 49, xxxi. 2, he is mentioned *after* Jonathan and Abinadab; but in 1 Chron. he is always mentioned *second*, except in x. 2. In the fact that the name of Saul's eldest son was Jehoviah in form (*Jehovah hath given*), whereas no such peculiarity is found in the names of the other sons, some writers (e.g., Mr. F. Newman) have seen a trace of Saul's gradual apostasy. Josephus only mentions Malchishuah once, *after* his brothers (Jos. *Antiq.* vi. 14. 7).—F. W. F.

MALCHUS (Μαλχος), the servant of the high-priest whose ear Peter cut off at the arrest of our Lord. All the Evangelists record the act (Matt. xxvi., Mark xvi., Luke xxii., John xviii.), but only St. John gives the names Peter and Malchus. Some think Peter's name was omitted by the synoptists lest the publication of it in his lifetime should expose him to the revenge of the unbelieving Jews; but as the gospels were not *published*, this seems improbable. St. John was an acquaintance of the high-priest's, and probably a frequenter of his house; hence he knew the name of his servant. Doubtless Peter, when he began to smite with the sword,

aimed a more deadly blow, which Malchus sought to avoid by moving his head aside, and thus escaped with the loss of his right ear. It has been questioned whether the use by the four Evangelists of a diminutive (ὠτίον by Matt. and Luke, ὠτρίον by Mark and John), instead of οὖς—which Luke alone has, and but once—does not imply that only part of the ear—the lappet—was cut off; but it is a sufficient answer that late Greek was partial to diminutives, and often employed them in the sense of their primitive. It is probable that the ear was not *completely* severed from its place, for our Lord is not said to have picked it up and replaced it, but simply to have touched it (*ἀψάμενος τοῦ ὠτρίου*). St. Luke alone records the healing. Jesus, who as we find from St. Matthew had been already laid hands on, first rebuking Peter, and forbidding further smiting, then turned to his captors and asked them to release his arm, *Ἐὰν ἐως τούτου*. This done, he touched the ear of Malchus and healed him. How wonderful is the sight of captive and restrained omnipotence! How strange is the sound of a petition to be let loose from him whose arm is strength, whom legions of angels were ready to deliver! What importance is given to the outward sign and form of spiritual help and blessing, by the fact that Jesus, even in such a case, asked permission to go through the form, as though the healing waited for it, and somehow were dependent on it! —J. G. C.

MALDONATUS, JOANNES, was born at Casas de la Reina, in Estremadura, in 1534, studied at Salamanca, and was distinguished in his youth for his knowledge of Greek and philosophy. He took the vows and habit of the Society of Jesus at Rome in 1562. He was sent by the Jesuit authorities to Paris as a teacher of Catholic theology during the excitement of the French Reformation and Catholic reaction, between 1562 and 1572. His exegetical lectures were attended by Protestants in Paris and elsewhere, and the renown of his teaching reminds the reader of the history of Abelard. His brilliant course was chequered by malicious charges of heresy on the doctrine of the Immaculate Conception, and also of 'deathbed robbery' in favour of the Society of Jesus. He retired after this to the solitude of the Convent of Bourges, and prepared the various exegetical and other works by which he is known to posterity. None of his works were published during his life, and some still remain in the Ambrosian Library of Milan. The most valuable productions of Maldonatus are —I. *Commentarii in Quatuor Evangelistas*. Though condemned by some, and procuring for its author the title of 'virulentissimus et maledicentissimus,' this work has received from Catholic and Protestant writers a just meed of praise (see Bayle, Richard Simon, Schlichtingius, M. Poole, and Jackson). In this work, Maldonatus collates the opinions of the Fathers with great ability, and does not hesitate to differ even from Augustine when sound exegesis demands it. He shows acquaintance with the Vatican MS. of the N. T., and with the LXX. version of the O. T., and with the original Hebrew. The best edition was published 1595. II. *Commentarii in precipuos Sacre Scripture libros V. T.*, including Jeremiah, Baruch, Ezekiel, and Daniel, and an exposition of Psalm cix. III. A folio volume, containing *Scholia* on the Psalms, Proverbs, Canticles, and Ecclesiastes,

and various theological treatises. IV. *Liber de demonibus, Disputationes de fide*, a translation of this was also published in French in 1617. V. *Summula casuum conscientie*, a work of doubtful value, morality, and authenticity. VI. A commentary on the Epistle to the Romans, and other works, are preserved in MSS. in Milan.

While engaged in preparing these works, Maldonatus was summoned to Rome by Pope Gregory XIII. to assist in the publication of an edition of the LXX. He died shortly afterwards, in 1583, in the fiftieth year of his age. He was one of the greatest ornaments of the Society of Jesus, and a learned man in the age of great scholars and reviving thought (see R. Simon, *Hist. Crit. des Principaux Commentateurs du Nouveau Test.*, 1693, pp. 618-33; Bayle, Zeller, Hoffman, and Morery; Aubertus Miræus, *Scriptores Sacculi*, xvi. in Fabricius, *Bibliotheca Ecclesiastica*).

There was another writer of the same name, a Spanish Jesuit, who, according to Aubertus Miræus, was a priest of Burgos, and is stated by Zeller to have ordered the lessons of the Roman Breviary. In 1549 he published a treatise *De senectute Christiana*, and an elegant abridgment of the lives of the saints.—II. R. R.

MALLOS, a city of Cilicia, the inhabitants of which (Μαλλωται) revolted from Antiochus Epiphanes because he had given them to his concubine Antiochis (2 Maccab. iv. 30). Mallos lay at the mouth of the Pyramus, about twenty miles from Tarsus.—†

#### MALLOWS. [MALLUACH.]

MALLUACH (מַלּוּאָךְ) occurs only once in Scripture, namely, in the passage where Job complains that he is subjected to the contumely of the meanest people, those 'who cut up mallows (malluach) by the bushes—for their meat' (Job xxx. 4). The proper meaning of the word *malluach* has been a subject of considerable discussion among authors, in consequence, apparently, of its resemblance to the Greek μαλάχη (*malakhē*), signifying 'mallow,' and also to *maluch*, which is said to be the Syriac name of a species of *Orache*, or *Atriplex*. It is difficult, if not impossible, to say which is the more correct interpretation, as both appear to have some foundation in truth, and seem equally adapted to the sense of the above-quoted passage. The *malakhē* of the Greeks is distinguished by Dioscorides into two kinds; of which he states that the cultivated is more fit for food than the wild kind. Arab authors apply the description of Dioscorides to *khoob-bazei*, a name which in India we found applied both to species of *Melva rotundifolia* and of *M. sylvestris*, which extend from Europe to the north of India, and which are still used as food in the latter country, as they formerly were in Europe, and probably in Syria. Dr. Shaw, in his *Travels*, on the contrary, observes that '*Mellou-keah*, or

*mulookiah*, מלוחיה, as in the Arabic, is the same with the *melochia* or *corchorus*, being a podded species of mallows, whose pods are rough, of a glutinous substance, and used in most of their dishes. *Mellou-keah* appears to be little different in name from מלוח (Job xxx. 4), which we render 'mallows;' though some other plant, of a more saltish taste, and less nourishing quality, may be

rather intended.' The plant alluded to is *Corchorus olitorius*, which has been adopted and figured in her *Scripture Herbal* by Lady Calcott, who observes that this plant, called Jews' Mallow, appears to be certainly that mentioned by the patriarch. Avicenna calls it *olus Judaicum*; and Rauwolf saw the Jews about Aleppo use the leaves as potherbs; 'and this same mallow continues to be eaten in Egypt and Arabia, as well as Palestine.' But there are so many plants of a mild mucilaginous nature which are used as articles of diet in the East, that it is hardly possible to select one in preference to another, unless we find a similarity in the name. Thus species of *Amaranthus*, of *Chenopodium*, of *Portulacca*, as well as the above *Corchorus*, and the mallow, are all used as food, and might be adduced as suitable to the above passage, since most of them are found growing wild in many parts of the countries of the East.

Bochart, however, contends (*Hieroz.*, part i., t. iii., c. 16) that the word *malluach* denotes a saltish plant called ἄλμος by the Greeks, and which with good reason is supposed to be the *Atriplex Halimus* of botanists, or tall shrubby *Orache*. The Septuagint, indeed, first gave ἄλμα as the interpretation of *malluach*. Celsius adopts it, and many others consider it as the most correct. By Ibn Buetar, *malookh* is given as the synonym of *al kutuf al buhur*, i. e., the sea-side *Kutuf* or *Orache*, which is usually considered to be the *Atriplex maritima*, now *A. Halimus*. Bochart quotes Galen as describing the tops of this as being used for food when young. Dioscorides also says that its leaves are employed for the same purpose. What the Arab writers state as to the tops of the plants being eaten, corresponds to the description of Job, who states that those to whom he refers *cropped upon the shrub*—which by some is supposed to indicate that the *malluach* grew near hedges. These, however do not exist in the desert. There is no doubt that species of *Orache* were used as articles of diet in ancient times, and probably still are so in the countries where they are indigenous; but there are many other plants, similar in nature, that is, soft and succulent, and usually very saline, such as the *Salsolas*, *Salicornias*, etc., which, like the species of *Atriplex*, belong to the same natural family of *Chenopodeæ*, and which from their saline nature have received their respective names. Many of these are well known for yielding soda by incineration. In conformity with this, Mr. Good thinks that 'the real plant is a species of *Salsola*, or 'salt-wort,' and that the term ἄλμα, employed in the Greek versions, gives additional countenance to this conjecture.' Some of these are shrubby, but most of them are herbaceous, and extremely common in all the dry, desert, and saline soils which extend from the south of Europe to the north of India. Most of them are saline and bitter, but some are milder in taste and mucilaginous, and are therefore employed as articles of diet, as spinach is in Europe. *Salsola indica*, for instance, which is common on the coasts of the peninsula of India, Dr. Roxburgh states, saved the lives of many thousands of the poor natives of India during the famine of 1791-93; for while the plant lasted, most of the poorer classes who lived near the sea had little else to eat; and indeed its green leaves ordinarily form an essential article of the food of those natives who inhabit the maritime districts.—J. F. R.

MAMMON (Μαμωνάς, a Chaldee word מַמּוֹנָא) [from מַמְנוֹן = *that in which men trust*, Syr. مَمْنُون, *momunū*] signifying 'wealth' or 'riches,' and bearing that sense in Luke xvi. 9, 11; but also used by our Saviour (Matt. vi. 24; Luke xvi. 13) as a personification of the god of riches: 'Ye cannot serve God and mammon.' There is no reason for believing that this was the name of a Syrian deity as Schleusner asserts.

MAMRE (מַמְרֵי, perhaps 'fruitfulness;' from מַרְרָה = Arab. ممره; Μαμβρη; *Mambre*). This name, which only occurs in Genesis, is first applied to a place,—And Abram . . . came and dwelt in the oak-grove (בְּאֵלֶּיךָ); παρὰ τὴν ὄρυν; but in the Vulgate *juxta convallē*; and, A. V., 'in the plain;' Gen. xiii. 18) of Mamre, which is at Hebron.' Henceforth Mamre became one of Abraham's favourite places of residence (xiv. 13). The grove was his sanctuary, for there he built an altar; and it subsequently became his *Bethel*—his 'house of God;' for it was there he entertained God in his tent (xviii. 1, *seq.*), and there he received from him the first distinct promise of a son. Mamre is stated to have been at Hebron; for we read that 'Jacob came unto Isaac his father, to *Mamre*, to *Kiriath-Arbah*, which is *Hebron*, where Abraham and Isaac sojourned' (xxxv. 27). The relative positions of Machpelah and Mamre are also described with great exactness. Five times Moses states that Machpelah lay 'before Mamre' (עַל-פְּנֵי; ἀπέναντι; *quæ respiciēbat*); which may mean either that it was to the east of Mamre, or that it lay facing it. The latter seems to be the true meaning. Machpelah is situated on the shelving bank of a little valley; and probably the oak-grove of Mamre stood on the other side of the valley, facing the cave; while the town of Hebron lay a little farther up to the north-west (cf. xxiii. 17, 19; xxv. 9; xlix. 30; i. 13). The identity of Machpelah with the *Haram* being established [MACHELAH], there can be little difficulty in fixing the position of Mamre; it must have been within sight of, or 'facing,' Machpelah; and so near the town of Hebron that it could be described as *at it*.

Mamre is also mentioned twice as the name of a man. In Gen. xiv. 13 we read that Abraham dwelt 'in the oak-grove of Mamre the Amorite;' and in ver. 24 we find that Aner, Eshcol, and *Mamre*, were among those who joined Abraham in the pursuit of the Eastern kings. Perhaps Mamre may have been the name of a powerful house or family of Amorites, who inherited the oak-grove; or perhaps this friend of Abraham gave the place his own name. But however this may be, the name appears to have been originally that of a man, and was afterwards applied as a proper name to his possessions.

A very early tradition locates the oak-grove of Mamre, where Abraham encamped, at some distance from Hebron and Machpelah. Josephus says that the tree of Abraham was pointed out in his day at the distance of six stadia from the city (*Bell. Jud.* iv. 9. 7). Eusebius and Jerome mention the oak as still existing, and state that it was regarded with veneration by Christians and heathen. Jerome says a church was built on the spot (*Onomast.*, s. v.

*Arboch, Drys*); but he does not describe its position relative to the city. The *Jerusalem Itinerary* places it *two miles* from Hebron (p. 599); and Sozomen (*H. E.*, ii. 4) says it lay on the north towards Jerusalem. Subsequently the place and the tradition are frequently referred to (see Robinson, *B. R.*, i. 216; ii. 89; Reland, *Pal.*, 711, *seq.*) It is evident that all these notices refer to the very remarkable ruin two miles north of Hebron, now called *Ramet el-Khulil*, where there are the foundations of a very large and massive structure and of an ancient village. The Jews of Hebron call it 'the house of Abraham,' and regard it as the site of Mamre (*Handbook*, i. p. 72; Stanley, *S. and P.*, 141). The position, however, does not accord with the notices in Genesis, and cannot therefore be the true site of Mamre. The sacred grove and the place of the patriarch's tent were doubtless on the face of the hill facing the great Haram, which covers the cave of Machpelah (HEBRON; Stanley, *Sermons in the East*, 166, *seq.*; Ritter, *Pal. and Syr.*, iii. 222, *seq.*) The tradition which identified Mamre with Ramet el-Khulil may have originated in the existence of a grove of venerable oaks on that spot; just as now the great oak a mile or more west of the town is called 'Abraham's Oak' (*Handbk.*, i. 70).—J. L. P.

MAN. Four Hebrew words are thus translated in the English Version (אָדָם, אִישׁ, אִנּוּשׁ, אִנּוּר). They are used with as much precision as the terms of like import in Greek and Roman writers. Nor is the subject merely critical; it will be found connected with accurate interpretation.

אָדָם is 1. the proper name of the first man, though Gesenius thinks that when so applied it has the force rather of an appellative, and that, accordingly, in a translation, it would be better to render it *the man*. It seems, however, to be used by St. Luke as a proper name in the genealogy (iii. 38); by St. Paul (Rom. v. 14; 1 Tim. ii. 13, 14); and by Jude (14). St. Paul's use of it in 1 Cor. xv. 45 is remarkably clear: ὁ πρῶτος ἀνθρώπος Ἀδάμ, 'the first man, Adam.' It is so employed throughout the Apocrypha, without exception (2 Esdras iii. 5, 10, 21, 26; iv. 30; vi. 54; vii. 11, 46, 48; Tobit viii. 6; Ecclus. xxxiii. 10; xl. 1; xlix. 16); and by Josephus (*ut infra*). Gesenius argues that, as applied to the first man, it has the article almost without exception. It is doubtless often thus used as an appellative, but the exceptions are decisive: Gen.

iii. 17, אָדָם, 'to Adam he said,' and see Sept., Deut. xxxii. 8, בְּנֵי אָדָם, 'the descendants of Adam;' 'if I covered my transgressions as Adam' (Job xxxi. 33); 'and unto Adam he said,' etc. (Job xxviii. 28), which, when examined by the context, seems to refer to a primeval revelation not recorded in Genesis (see also Hos. vi. 7, Heb. or margin). Gesenius further argues that the woman, אִשָּׁה, has an appropriate name, חַוָּה, but that the man has none. But the name Eve was given to her by Adam, and, as it would seem, under a change of circumstances; and though the *divine* origin of the word Adam, as a proper name of the first man, is not recorded in the history of the creation, as is that of the day, night, heaven, earth, seas, etc. (Gen. i. 5, 8, 10), yet its *divine* origin as an appellative is recorded (comp. Heb., Gen. i. 26; v. 1); from which state it soon became a proper name. 2. It is the generic name of the

human race as originally created, and afterwards, like the English word man, person, whether man or woman, equivalent to the Latin *homo*, and Gr. *ἄνθρωπος* (Gen. i. 26, 27; v. 2; viii. 21; Deut. viii. 3; Matt. v. 13, 16; 1 Cor. vii. 26), and even without regard to age (John xvi. 21). It is applied to women only, וְנַפְשׁ אִשָּׁה מִן הַנָּשִׁים, 'the human persons of women' (Num. xxxi. 25), Sept. *ψυχὰς ἀνθρώπων ἀπὸ τῶν γυναικῶν*. Thus *ἡ ἀνθρωπος* means a woman (Herod. i. 60), and especially among the orators (comp. 1 Maccab. ii. 38). 3. It denotes man in opposition to woman (Gen. iii. 12; Matt. xix. 10), though more properly, the husband in opposition to the wife (comp. 1 Cor. vii. 1). 4. It is used, though very rarely, for those who maintain the dignity of human nature, a *man*, as we say, meaning one that deserves the name, like the Latin *vir*, and Greek *ἀνὴρ*: 'One man in a thousand have I found, but a woman,' etc. (Eccles. vii. 28). Perhaps the word here glances at the original uprightness of man. 5. It is frequently used to denote the more degenerate and wicked portion of mankind: an instance of which occurs very early (Gen. vi. 2; Ps. xi. 4; xii. 1, 2, 8; xiv. 2, etc.), and observe the use of the word 'man' in Luke v. 20; Matt. x. 17. It is applied to the Gentiles (Matt. xvii. 22; comp. Mark x. 33, and Mark ix. 31; Luke xviii. 32; see Mounteney, *ad Demosth. Phil.* i. 221). 6. The word is used to denote other men, in opposition to those already named, as 'both upon Israel and other men' (Jer. xxxii. 20), *i.e.*, the Egyptians. 'Like other men' (Ps. lxxiii. 5), *i.e.*, common men, in opposition to better men (Ps. lxxxii. 7); men of inferior rank, as opposed to אֲנָשִׁים, men of higher rank (see Heb., Is. ii. 9; v. 15; Ps. xlix. 3; lxii. 10; Prov. viii. 4). The phrase 'son of man,' in the O. T., denotes man as frail and unworthy (Num. xxiii. 19; Job xxv. 6; Ezek. ii. 1, 3); as applied to the prophet, so often, it has the force of 'O mortal!'

אֲנָשִׁים is a man in the distinguished sense, like the Latin *vir* and Greek *ἀνὴρ*. It is used in all the several senses of the Latin *vir*, and denotes a man as distinguished from a woman (1 Sam. xvii. 33; Matt. xiv. 21); as a husband (Gen. iii. 16; Hos. ii. 16); and in reference to excellent mental qualities. A beautiful instance of the latter class occurs in Jer. v. 1: 'Run ye to and fro through the streets of Jerusalem, and see now, and know, and seek in the broad places thereof, if ye can find a man (אֲנָשִׁים), if there be any that executeth judgment, that seeketh the truth; and I will pardon it.' This reminds the reader of the philosopher who went through the streets of Athens with a lighted lamp in his hand, and being asked what he sought, said, 'I am seeking to find a man' (see Herodot. ii. 120; Hom. *Il.*, v. 529). It is also used to designate the superior classes (Prov. viii. 4; Ps. cxli. 4, etc.), a courtier (Jer. xxxviii. 9), the male of animals (Gen. vii. 2). Sometimes it means men in general (Exod. xvi. 29; Mark vi. 44).

אָנוּשִׁים, mortals, *βροτὰ*, as transient, perishable, liable to sickness, etc.: 'Let no man [margin, 'mortal man'] prevail against thee' (2 Chron. xiv. 11). 'Write with the pen of the common man' בְּחֶרֶט אָנוּשִׁים (Is. viii. 1), *i.e.*, in a common, legible character (Job xv. 14; Ps. viii. 4; ix. 19, 20; Is. li. 7; Ps. ciii. 15). It is applied to women (Josh. viii. 25).

גִּבּוֹר, *vir*, man, in regard to strength, etc. All etymologists concur in deriving the English word

'man' from the superior powers and faculties with which man is endowed above all earthly creatures; so the Latin *vir*, from *vis*, *vires*; and such is the idea conveyed by the present Hebrew word. It is applied to man as distinguished from woman: 'A man shall not put on a woman's garment' (Deut. xxii. 5), like *ἄνθρωπος* in Matt. viii. 9; John i. 6; to men as distinguished from children (Exod. xii. 37); to a male child, in opposition to a female (Job iii. 3; Sept. *ἀρσεν*). It is much used in poetry: 'Happy is the man' (Ps. xxxiv. 8; xl. 4; lii. 9; xciv. 12). Sometimes it denotes the species at large (Job iv. 17; xiv. 10, 14). For a complete exemplification of these words, see the lexicons of Gesenius and Schleusner, etc.

[To these may be added מְתוּשָׁלַם, the pl. of a word not in use מֶלֶךְ. This, however, is used only in the sense of *people, persons, a number of men* (Job xi. 3, 11; Is. iii. 25; Gen. xxxiv. 30; Ps. xxvi. 4, etc.), and is never employed as a designation of man as man. The singular survives in such proper names as *Methusael*, man of God, etc.]

Some peculiar uses of the word in the N. T. remain to be noticed. 'The Son of Man,' applied to our Lord only by himself and St. Stephen (Acts vii. 56), is the Messiah in human form. Schleusner thinks that the word in this expression always means woman, and denotes that he was the promised Messiah, born of a virgin, who had taken upon him our nature to fulfil the great decree of God, that mankind should be saved by one in their own form. 'Ο παλαιός, 'the old man,' and ο καινός, 'the new man'—the former denoting unsanctified disposition of heart, the latter the new disposition created and cherished by the gospel; δ ἔσω ἄνθρωπος, 'the inner man'; δ κρυπτός τῆς καρδίας ἄνθρωπος, 'the hidden man of the heart,' as opposed to the ὁ ἔξω ἄνθρωπος, 'the external visible man.' 'A man of God,' first applied to Moses (Deut. xxxiii. 1), and always afterwards to a person acting under a divine commission (1 Kings xiii. 1; 1 Tim. vi. 11; *et alibi*). ὁ ἄνθρωπος τῆς ἀμαρτίας, that impious man, the ὁ ἄνομος, 'the lawless one' (2 Thes. ii. 3), Sept. for אָנוּשִׁים (Is. lv. 7); angels are styled men (Acts i. 10).—J. F. D.

MAN, or MANNA (מָן; Sept. *μαννά*). The name given to the miraculous food upon which the Israelites were fed for forty years, during their wanderings in the desert. This is first mentioned in Exod. xvi. It is there described as being first produced after the eighth encampment in the desert of Sin, as white like hoar-frost (or of the colour of *bellium*, Num. xi. 7), round, and of the bigness of coriander seed (*gad*). It fell with the dew every morning, and when the dew was exhaled by the heat of the sun, the manna appeared alone, lying upon the ground or the rocks round the encampment of the Israelites. 'When the children of Israel saw it, they said one to another, *What is it?* for they knew not what it was' (Exod. xvi. 15). In the Authorised, and some other versions, this passage is inaccurately translated—which indeed is apparent from the two parts of the sentence contradicting each other. In the Septuagint the substance is almost always called *manna* instead of *man*. Josephus (*Antiq.* iii. 1. 6), as quoted by Dr. Harris, says: 'The Hebrews call this food *manna*, for the particle *man* in our language is the asking of a question, *What is this?* (*man-hu*). Moses answered this question by telling them,

'This is the bread which the Lord hath given you to eat.' We are further informed that the manna fell every day, except on the Sabbath. Every sixth day, that is on Friday, there fell a double quantity of it. Every man was directed to gather an omer (about three English quarts) for each member of his family; and the whole seems afterwards to have been measured out at the rate of an omer to each person: 'He who gathered much had nothing over, and he who gathered little had no lack.' That which remained ungathered dissolved in the heat of the sun, and was lost. The quantity collected was intended for the food of the current day only; for if any were kept till next morning, it corrupted and bred worms. Yet it was directed that a double quantity should be gathered on the sixth day for consumption on the Sabbath. And it was found that the manna kept for the Sabbath remained sweet and wholesome, notwithstanding that it corrupted at other times, if kept for more than one day. In the same manner as they would have treated grain, they reduced it to meal, kneaded it into dough, and baked it into cakes, and the taste of it was like that of wafers made with honey, or of fresh oil. In Exod. xvi. 32, where the description of the manna is repeated, an omer of it is directed to be preserved as a memorial to future generations, 'that they may see the bread wherewith I have fed you in the wilderness;' and in Josh. v. 12 we learn that after the Israelites had encamped at Gilgal, and 'did eat of the old corn of the land, the manna ceased on the morrow after, neither had the children of Israel manna any more.'

345. [1. *Tamarix gallica*. 2. *Alhagi maurorum*.]

This miracle is referred to in Deut. viii. 3; Neh. ix. 20; Ps. lxxviii. 24; John vi. 31, 49, 58; Heb. ix. 4. Though the manna of Scripture was so evidently miraculous, both in the mode and in the quantities in which it was produced, and though its properties were so different from anything with which we are acquainted, yet, because its taste is in Exodus said to be like that of wafers made with honey, many writers have thought that they recognised the manna of Scripture in a sweetish exudation which is found on several plants in Arabia and Persia. The name *man*, or *manna*, is applied to this substance by the Arab writers, and was probably so applied even before their time. Of this

one kind is known to the Arabs by the name of *guzunjbéen*, being the produce of a plant called *guz*, and which is ascertained to be a species of tamarisk. The same species seems also to be called *toorfa*, and is common along different parts of the coast of Arabia. It is also found in the neighbourhood of Mount Sinai. Burckhardt, while in the valley Wady el-Sheik, to the north of Mount Serbal, says: 'In many parts it was thickly overgrown with the tamarisk or *toorfa*. . . . It is from the *tarfa* that the manna is obtained. . . . In the month of June it drops from the thorns of the tamarisk upon the fallen twigs, leaves, and thorns, which always cover the ground beneath the tree in the natural state. The Arabs use it as they do honey, to pour over their unleavened bread, or to dip their bread into; its taste is agreeable, somewhat aromatic, and as sweet as honey. If eaten in any quantity it is said to be highly purgative.' He further adds, 'that the tamarisk is one of the most common trees in Nubia and throughout the whole of Arabia; on the Euphrates, on the Astaboras, in all the valleys of the Hedjaz and Bedja it grows in great quantities, yet nowhere but in the region of Mount Sinai did he hear of its producing manna. Ehrenberg has examined and described this species of tamarisk, which he calls *T. mannifera*, but which is considered to be only a variety of *T. gallica*. The manna he considers to be produced by the puncture of an insect which he calls *Coccus manniparus*. Others have been of the same opinion (comp. Wellsted, *Travels in Arabia*, vol. ii. p. 51).

Another kind of manna, which has been supposed to be that of Scripture, is yielded by a thorny plant very common from the north of India to Syria, and which by the Arabs is called Al-haj; whence botanists have constructed the name Alhagi. The two species have been called *Alhagi maurorum* and *A. desertorum*. Both species are also by the Arabs called *ooshter-khar*, or 'camel's-thorn;' and in Mesopotamia *agool*, according to some authorities, while by others this is thought to be the name of another plant. The *Alhagi maurorum* is remarkable for the exudation of a sweetish juice, which concretes into small granular masses, and which is usually distinguished by the name of Persian manna. The late Professor Don was so confident that this was the same substance as the manna of Scripture, that he proposed calling the plant itself *Manna hebraica*. Besides these, there are several other kinds of manna. Burckhardt, during his journey through el-Ghor, in the valley of the Jordan, heard of the Beiruk honey. This is described as a substance obtained from the leaves and branches of a tree called *Gharb* or *Garrah*, of the size of an olive-tree, and with leaves like those of the poplar. When fresh this greyish-coloured exudation is sweet in taste, but in a few days it becomes sour. The Arabs eat it like honey. One kind, called *Sheer-khisht*, is said to be produced in the country of the Uzbees. A Caubul merchant informed the author of this article that it was produced by a tree called *Gundeleh*, which grows in Candahar, and is about twelve feet high, with jointed stems. A fifth kind is produced on *Calotropis procera*, or the plant called *Ashur*. The sweet exudation is by Arab authors ranked with sugars, and called *Shukur-al-ashur*. It is described under this name by Avicenna, and in the Latin translation it is called *Zuccarum-al-husar*. A sixth

kind, called *Bed-khisht*, is described in Persian works on *Materia Medica* as being produced on a species of willow in Persian Khorassan. Another kind would appear to be produced on a species of oak, for Niebuhr says, 'At Merdin, in Mesopotamia, it appears like a kind of pollen, on the leaves of the tree called *Ballot* and *Afs* (or, according to the Aleppo pronunciation, *As*), which I take to be of the oak family. All are agreed, that between Merdin and Diarbekir manna is obtained, and principally from those trees which yield gall-nuts.' Besides these, there is a sweetish exudation found on the larch, which is called *Manna brigantia*, as there is also one kind found on the cedar of Lebanon. Indeed, a sweetish secretion is found on the leaves of many other plants, produced sometimes by the plant itself, at others by the punctures of insects. It has been supposed, also, that these sweetish exudations being evaporated during the heat of the day in still weather, may afterwards become deposited, with the dew, on the ground and on the leaves of plants; and thus explain some of the phenomena which have been observed by travellers and others. But none of these mannas explain, nor can it be expected that they should explain, the miracle of Scripture, by which abundance is stated to have been produced for millions, where hundreds cannot now be subsisted.—J. F. R.

#### MAN OF SIN. [ANTICHRIST.]

MANAEN (*Μαναήν*, the same as *Menahem*, מְנַחֵם (comforter), the name borne by one of the kings of Israel (2 Kings xv. 14); Vulg. *Manahan*;

Pes. Syr. מְנַחֵם, *Manael*—*quid est deus?*) one of the five prophets and teachers who were in the Church of Antioch when the Holy Spirit enjoined the separation of Paul and Barnabas to their special work (Acts xiii. 1, 2). The name was a common one among the Jews, but occurs nowhere else in the N. T. Manaen is distinguished by being designated σύντροφος,\* of 'Herod the tetrarch.' This word may mean either nursed along with; Vulg., *Collocatus*; Alford, 'foster-brother,' or companion; in the latter case Manaen might have been chosen by Herod the Great, *more Romano*, as a clever boy, to be the associate of his son Antipas, who afterwards became tetrarch of Galilee; and in harmony with this the Pes. Syr. renders the word *filius educatorum*; or as the Latin vers. in Schaaf has it, *educatus cum Herode*. It is not unlikely that both meanings of the word are to be united, and that Manaen was both suckled at the same breast as Herod, and also the companion of his early boyhood.

Special mention is made by ancient writers of a person bearing the name of Manaen, with whom our Manaen is supposed to have been connected. Thus Lightfoot says: '*Fuchasin*, fol. 19, mentioneth one Menahem who was once vice-president of the Sanhedrim under Hillel, but departed to the service of Herod the Great, with fourscore other eminent men with him. It may be that this [in Acts xiii.] was his son, and was called Manaen or Menahem after

the father; and as the father was a great favourite of Herod the Great, the father, so this was brought up at court with Herod the tetrarch, the son.'—(*Harm. of N. T.*, Acts xiii.)

Josephus also speaks of a Menahem, an Essene, who had intimate relations with Herod the Great. This man, sustaining a high reputation among his sect, once saw Herod when he was a boy going to school, and saluted him as King of the Jews. But Herod, thinking that he was under some mistake, reminded him that he was speaking to a private person, when Manaen laughed, and, clapping him on the back, said that, notwithstanding, he would be king, and would reign happily. Although Herod paid no attention to this prediction at the time, yet when he was raised to the dignity of the kingly office, he sent for Manaen, and asked him how long he would reign? Ten years? Yes, twenty, nay thirty, Manaen replied, without exactly fixing the length. Herod, satisfied with these replies, gave Manaen his hand and dismissed him, and from that time continued to honour all the Essenes (*Antiq.* xv. 10. 5). 'Nothing is more likely than that this Manaen was the father of the companion of Herod's children,' says Howson; and we know that the young princes, Antipas and Archelaus, sons of Malthace, were brought up with 'a private person' at Rome (*Antiq.* xvii. 1. 3). There is, of course, no evidence that our Manaen was a son or relation of the above, yet it is *probable* enough, that the 'private person' just mentioned was the Manaen of Josephus, and that the Manaen of the Acts was his son.

Lightfoot is not fairly represented by a writer in Smith's *Dictionary of the Bible*, when it is said that he 'surmises that the Manaen of Josephus may be the one mentioned in the Acts.' Lightfoot says, 'I do not think that this Manaen was the same person, nor do I say that he was his son,' but he suspects that 'there was something of kindred betwixt them.' Then, having quoted a passage from the Talmud respecting Manaen's having deserted the Sanhedrim, and entered the service of Herod, with 'fourscore pair of disciples, all clad in silk,' he adds, 'I dare not say that this Menahem was the same with our Menahem, unless he were an hundred years of age, or thereabout; and yet when I observe the familiarity that was between that Menahem and Herod the father, and how ours was brought up with Herod the son, it cannot but give me some apprehension that either he might be the person himself, or rather his son (if at least the Essenes had children), or, in a word, *some very near relation*.' Lightfoot then subjoins: 'Be it one or other, it is worth inquiry whether this our Manaen might not lay the foundation of his evangelical religion in the court of Herod the tetrarch, when John the Baptist preached there.'

The writer more than suspects that Manaen the Essene was a different person from Manaen the vice-president of the Sanhedrim, although, in deference to high authority, he has spoken of them as one and the same.—I. J.

MANAHATH (מְנַחֵת; Μαχαθῆ; Alex. Μαχαθῆ; *Manahath*). In giving the genealogy of the tribe of Benjamin, the author of 1 Chron. (viii. 6) says:—'These are the sons of Ehud; these are the chiefs (רָאשֵׁי אֲבוֹת) ἀρχοντες πατριῶν) of the inhabitants of Geba; and they removed them to *Manahath*.' The sense seems to

\* *Nourished*, or *nursed together*, Xen. *Mem.* 2, 3, 4; N. T., *one brought up*, or *educated with another*, a *comrade*, Acts xiii. 1. So 2 Maccab. ix. 29.—(*Robinson*.)

be, that the persons named were for some reason transferred from the town of Geba to Manahath; but where Manahath was situated we have no knowledge. The probability is, that it was near Geba [GEB], for it was not usual for the Jews to migrate far from their ancestral property; and the passing of a family from one tribe, and its settlement within the bounds of another, was of very rare occurrence—at least in the early ages of Jewish history. We are thus prevented from identifying Manahath in any way with the MANAHETHITES of Judah (1 Chron. ii. 54); or, as the Targum would seem to do, with the region colonised by Manahath, a descendant of Seir the Horite (Gen. xxxvi. 23).

2. מַנַּחֶתַי; *Manahath* a grandson of Seir the Horite who occupied the mountains of Edom before the time of Esau (Gen. xxxvi. 23; 1 Chron. i. 40).—J. L. P.

MANAHETHITES, הַמְּנַחֲתִי, הַמְּנַחֲתִי; Ἀμμανίθ, and Μαλαθί; Alex. in the latter, *Manath*). The Manahethites are mentioned in the A. V. in two obscure passages (1 Chron. ii. 52, 54), when giving the descendants of Caleb of the tribe of Judah. The historian mentions the names of the chief men, and the cities they occupied; and he says (ver. 52), 'Shobal, the father (or coloniser) of Kirjath-jearim, had two sons; *Ilareth, half of the Menuhoth*' (הַרְאֵה הַצִּי הַמְּנַחֲתִי), which the LXX. renders, 'Araa, and Aisi, and Ammanith;' and the Vulgate '*qui videbat dimidium requietionum*.' The Targum thus interprets the verse—'And Shobel had sons, disciples and priests, to whom belonged the half of the oblations.' Various other interpretations are given (*Crit. Sac.*, ad loc.) The 54th verse is equally obscure—'The sons of Salma; Bethlehem . . . and half of the Manahethites' (הַמְּנַחֲתִי), different in form and in pointing from the former); rendered by the LXX. ἡμισυ τῆς Μαλαθί, 'half of the Malathi;' and by the Vulgate, '*dimidium requietionis*.' The Targum explains it, that the sons of Salma 'divided the remainder of the sacrifices with the sons of the prophets who were in Zorah.' It appears, however, that Manahath was a place, as half of it is mentioned in one passage, and half in the other, in connection with other places; but its site is unknown, and its name does not occur again.—J. L. P.

MANASSEH, TRIBE AND POSSESSIONS OF מְנַשֶּׁה, 'one who forgets;' *Manasses*), the first-born son of Joseph (Gen. xli. 51). When Joseph was appointed viceroy of Egypt, Pharaoh 'gave him to wife Asenath, the daughter of Potipherah, priest of On' (ver. 45). She bare him two children before the years of famine, and the first he named '*Manasseh*;' for God hath *made me forget* (נָשִׁיתִי) all my toil.' Jacob, on his deathbed, adopted both; but gave the first place and the birthright blessing to Ephraim (xlvi. 1, 5, 13, 14, 19); guided by the inspiring Spirit of God, who foresaw and fore-ordained the great eminence to which the tribe of Ephraim should rise. We read that the grandchildren of Manasseh were brought up by Joseph (l. 23). Nothing is known of his personal history; and we cannot tell whether his character and habits initiated those warlike ten-

dencies for which the tribe was afterwards distinguished; or whether, as seems more probable, his son MACHIR trained the tribe in the art of war (Josh. xvii. 1). The passage in 1 Chron. vii. 14, *seq.*, in which the genealogy of the tribe is given, is very obscure. His wife's name is not mentioned, nor is it certain that he had one. Machir, the son of an Aramite concubine, was probably his only son, and sole founder of his house. Ashriel and Zelophehad appear to have been grandchildren of Machir (cf. Num. xxvi. 29-33), princes in the tribe, and therefore brought forward prominently in Chronicles.

On leaving Egypt the tribe of Manasseh was the smallest of the twelve, numbering only 32,200 adult males (Num. i. 35), being 8300 less than Ephraim (ver. 33). But it increased amazingly during the wilderness journey, not only far exceeding Ephraim, but attaining the sixth place among the tribes in point of numbers. When the census was taken on the east bank of the Jordan, before Moses' death, the tribe was found to contain 52,700 adult males (Num. xxvi. 34). Perhaps this great increase may in some measure be accounted for by the fact that the Manassites were hardy shepherds, inured in Egypt to a wandering life, and therefore at home in the desert, suffering little from fatigue or privation; while Ephraim, accustomed to the settled life of Egypt's great cities, or to the quiet pursuits of husbandry, suffered severely in the desert, but rapidly increased in numbers and power again when established in Palestine.

The division of the tribe of Manasseh is one of the most singular facts connected with the history of the Israelites. It seems to be entirely at variance with their national feelings and laws. It probably sprung from a difference in habit and occupation. One section was devoted to the pursuits of husbandry; they sought a quiet, peaceful region, with rich soil and genial clime; and they found these in the fertile vales and plains of central Palestine. Another, and apparently much larger section of the tribe, was pastoral in its tendencies. Like the children of Reuben and Gad it had a very great multitude of cattle, and seeing the rich pastures of the country east of the Jordan, the Manassites desired with those tribes to have their allotted inheritance there (cf. Num. xxxii. 1-5, 33). This section of the Manassites was also warlike—trained to arms and inured to fatigue. Northern Gilead and Bashan were then ruled by the giant Og, the last of the Rephaim (Deut. iii. 11) who led the hosts of the Amorites (Num. xxxii. 39), and whose cities were numerous, and 'fenced with high walls, gates, and bars' (Deut. iii. 4, 5). The descendants of Machir, son of Manasseh, saw the verdant hills of Gilead, and the noble plateau of Bashan, and they resolved they should be theirs. Confident in their strength and skill, and in the favour and blessing of God, they invaded the country, drove out the Amorites, captured the strongholds of Argob, and occupied the whole kingdom of Og (Num. xxxii. 39-42; Deut. iii. 13-15). These historic details illustrate the statement of Joshua (xvii. 1)—'There was also a lot for the tribe of Manasseh . . . for Machir, the first-born of Manasseh, the father of Gilead, *because he was a man of war, therefore he had Gilead and Bashan*.'

The territory of Manasseh east of the Jordan is described with considerable minuteness. At the time of the Exodus, the whole country east of the

Jordan was ruled by two monarchs—Sihon king of Heshbon, and Og king of Bashan (Num. xxxii. 21-35; Deut. ii. 30-37; iii.). The kingdom of Og embraced all Bashan, and that part of Gilead that lay north of the river Jabbok, with the exception of a small tract along the east bank of the Jordan, including the plain up to the sea of Chinneroth, which was held by Sihon. Og's kingdom was given to Manasseh, while Sihon's was divided between Reuben and Gad (cf. Josh. xii. 2-5; xiii. 27; Deut. iii. 12-17). The southern border of Manasseh is thus determined:—It ran along the Jabbok from east to west till it reached the base of the mountains, where it turned northward, leaving 'Jordan and his border, even unto the edge of the Sea of Chinneroth,' to Gad. This southern section of Manasseh's territory, lying between the rivers Hieromax and Jabbok, is called in Scripture '*half Gilead*' (Josh. xiii. 31; cf. Deut. iii. 12, 13; Josh. xii. 5); and it included a number of small towns which were captured by Jair, a Manassite, and called by him HAVOTH-JAIR (Num. xxxii. 40, 41; cf. Judg. x. 4; 1 Kings iv. 13).

In addition to 'half Gilead,' the whole of the ancient kingdom of Bashan fell to the lot of Manasseh. It had the Sea of Galilee and the upper Jordan for its western border; Hermon and Iturea, or the country of the Jeturites, for its northern (as is evident from 1 Chron. v. 18-25, and Josh. xii. 4, 5); while on the east its border was the desert of Arabia (see this subject fully discussed in *Journal of Sacred Literature* for July 1854; also Porter's *Damascus*, vol. ii.) In Bashan was the rocky territory of ARGOB, containing 'threescore great cities,' which were also captured by Jair, and named *Bashan-havoth-jair* (Deut. iii. 14; Josh. xiii. 30). The conquest of these cities was the greatest feat of arms performed by the Israelites, and it proves conclusively that Jair and Machir were 'men of war.' The cities still exist, and the remains of their colossal ramparts and massive gates of stone are visible. Independent of their fortifications, one would suppose their situation would render them impregnable in a rude age. They are all built in a region of wild rocks, which to this day is called 'the retreat' (*el-Lejah*), and from which all the skill and implements of modern war have been unable to drive a few determined men. The 'threescore great cities' which Jair took were situated in the rocky plain of Argob. On the south-west lay the mountain-range of Bashan, steep and rugged, intersected by deep ravines, and covered with noble oak forests. Here also, on mountain side and summit, and away in the recesses of the glens, were many strong cities. The warriors of Manasseh did not fear to attack even these. Nobah, one of Manasseh's mighty men, went and took *Kenath*, the capital of the mountains, with the towns subject to it, and called it Nobah after his own name (Num. xxxii. 42). The conquests of the Manassites were pressed on with great vigour. The warlike tribes of the Geshurites and Maachathites were driven back from the rich plateaus to the heights of Hermon, and the recesses of Argob, where they were permitted to remain (Josh. xiii. 13). The Hagarites were also driven back, notwithstanding their numbers and their skill with the sword and bow; and immense booty in camels, sheep, cattle, and slaves was taken from them (1 Chron. v. 18-23). The Ma-

nassites were for a long period the guardians of the eastern frontier of Israel, keeping in check the border tribes; and when, in consequence of national sin, the whole land groaned under the iron yoke of the Midianites and the Amorites, two warriors of Manasseh—Gideon and Jephthah—drove back with terrible slaughter the cruel tyrants, and freed Israel (Judg. vi. and xi.) Located on the north-eastern border, the Manassites suffered severely from the growing power and ambition of the monarchs of Damascus; and they were among the first who were subdued and led captive by the Assyrians. With the Reubenites and Gadites they were taken away to Hala, Habor, and the river Gozan (1 Chron. v. 26).

The country occupied by the Manassites east of the Jordan was the richest in all Palestine. It is to this day the granary of a great part of Syria. It is chiefly table-land, averaging 2500 feet in elevation; on the west descending in steep, rugged declivities to the banks of the Jordan and shores of the Sea of Galilee, and having on the east the isolated mountain-chain of Bashan, which separates it from the plains of Arabia. Its whole surface is dotted with ruined or deserted towns and villages, among which are Bozrah, Salcah, Kenath, Edrei, Gerasa, and Gadara (for the physical and historical geography of this region see articles GILEAD, BASHAN, GOLAN, HAURAN, TRACHONITIS; also Porter's *Damascus*, vol. ii.; Burckhardt's *Travels in Syria*; Ritter's *Pal. und Syr.*)

The territory of Manasseh west of the Jordan was small, and is not very accurately defined in the Bible. It lay on the north side of Ephraim, and included the northern section of the hills of Samaria. The border between Ephraim and Manasseh could not have been far to the north of the city of Samaria, as Michmethah, one of its landmarks, is said to lie before Shechem (Josh. xvii. 7). Farther west, the tribes were separated by the river KANAH (ver. 9). Manasseh's lot extended across the whole country, from the Mediterranean to the Jordan, as is stated by Josephus (*Antiq.* v. i. 22), and as may be inferred from Josh. xvii. 9, 11. It thus included portions of the fertile plain of Sharon, of the region of Dor at the southern base of Carmel, and of the Valley of Jezreel. Manasseh and Ephraim appear to have been almost joined together as one tribe; and they complained to Joshua that though they were 'a great people' only 'one portion' had been allotted to them (xvii. 14). It was true that the great cities of Beth-shean, Taanach, Megiddo, and Dor, with their rich environs, had been assigned to them out of Issachar, yet they pleaded that these cities were strong, their inhabitants warlike, and that they had chariots of iron; but Joshua tells them that it was for this very reason the cities were assigned to them, and that the extension of their territory depended on their own valour:—'Joshua spake unto the house of Joseph, to Ephraim and to Manasseh, saying, Thou art a great people, and hast great power; thou shalt not have one lot only; but the mountain shall be thine . . . and the outgoings of it shall be thine: for thou shalt drive out the Canaanites' (ver. 17, 18). When the Israelites were fully established in Palestine, these towns were made tributary, and the land attached to them was probably taken possession of, though the old inhabitants were never completely expelled (Judg. i. 27). Dor became

one of the cities of Phœnicia [DOR], and Bethshean was an independent fortress in the time of David (1 Sam. xxxi. 10). The home of the western Manassites was in the rich valleys of Mount Ephraim, and along the wooded heights of Carmel (Josh. xvii. 15).

This section of the tribe of Manasseh almost disappears from history immediately after its settlement. Subsequent notices of it are brief and unimportant (1 Chron. xxvii. 20, 21; 2 Chron. xv. 9; xxx. 11). This may be accounted for by its close connection with Ephraim, which soon became the dominant tribe in the northern division of Palestine. Ephraim and Manasseh are usually grouped together (2 Chron. xxxi. 1; xxxiv. 6, 9); and seem to have been regarded in later times as forming one people (Reland, *Pal.*, p. 156, 200 seq.; Bochart, *Opp.*, ii. 306, 531).—J. L. P.

MANASSEH (מַנַּשֶּׁה; Sept. *Μανασση*), fourteenth king of Judah, son and successor of Hezekiah, who began to reign in B.C. 699, at the early age of twelve years, and reigned fifty-five years. It appears that the secret enemies of the vigorous reforms of Hezekiah re-appeared, and managed to gain much influence at court during the youth of Manasseh; and he was prevailed upon to re-establish all the idolatries and abominations which it had taken his excellent father so much pains to subvert. This bent having been unhappily given to the mind of one old enough to listen to evil counsels, but too young to see their danger, the king followed it with all the reckless ardour of youth, and without any of the prudent reservations which older sovereigns, more discreet in evincing the same inclinations, had maintained. Idolatry in its worst forms, and all the abominations connected with its observances, were practised without stint and without shame, not only in the face of the temple, but in its very courts, where altars to the heavenly bodies were set up, and rites of idolatrous worship performed. Under this altered state of things, the Judahites, with the sanction of the king's example, rushed into all the more odious observances of Syrian idolatry with all the ardour which usually attends the outbreak of a restrained propensity, till they became far 'worse than the heathen, whom the Lord destroyed before the children of Israel.' In vain did the prophets raise their voice against these iniquities, and threaten Manasseh and his kingdom with awful tokens of Divine indignation. Instead of profiting by these warnings, the king vented his rage against those by whom they were uttered, and in this and other ways filled Jerusalem with innocent blood beyond any king who reigned before him (2 Kings xxi. 1-16; 2 Chron. xxxiii. 1-10).

At length the wrath of God burst over the guilty king and nation. At this time there was constant war between Assyria and Egypt, and it would seem that Manasseh adhered to the policy of his father in making common cause with the latter power. This, or some other cause not stated by the sacred historian, brought into Judæa an Assyrian army, under the generals of Esar-haddon, which carried all before it. The miserable king attempted flight, but was discovered in a thorn-brake in which he had hidden himself, was laden with chains, and sent away as a captive to Babylon, which was then subject to the Assyrians, where he was cast into prison (B. C. 677). Here, at last,

Manasseh had ample opportunity and leisure for cool reflection; and the hard lessons of adversity were not lost upon him. He saw and deplored the evils of his reign, he became as a new man, he humbly besought pardon from God, and implored that he might be enabled to evince the sincerity of his contrition by being restored to a position for undoing all that it had been the business of his life to effect. His prayer was heard. His captivity is supposed to have lasted a year, and he was then restored to his kingdom under certain obligations of tribute and allegiance to the king of Assyria, which, although not expressed in the account of this transaction, are alluded to in the history of his successors (2 Chron. xxxiii. 11-13).

On his return to Jerusalem, Manasseh exerted himself to the utmost in correcting the errors of his early reign, and in establishing the worship of Jehovah in its former purity and splendour. The good conduct of his latter reign was rewarded with such prosperity as enabled him to do much for the improvement and strengthening of his capital and kingdom. He thoroughly repaired the old walls of Jerusalem, and added a new wall on the side towards Gihon; he surrounded and fortified by a separate wall the hill or ridge, on the east of Zion,

which bore the name of (עֶפְלָי) Ophel; and he strengthened, garrisoned, and provisioned 'the fenced cities of Judah' (2 Chron. xxxiii. 13-17). He died in peace (B. C. 664), at the age of sixty-eight, after having reigned longer than any other king of Judah, and was buried in a sepulchre which he had prepared for himself in his own garden (xxxiii. 20).—J. K.

[Three other persons of this name are mentioned in the O. T., Judg. xviii. 30 [GERSHOM]; Ezra x. 30; 33].

MANASSEH BEN ISRAEL, as he is commonly called, but more properly MANASSE BEN JOSEPH BEN ISRAEL, for Israel was his grandfather and Joseph his father. This remarkable linguist, who successively published his voluminous works in Hebrew, Latin, Portuguese, English, etc., was born in Lisbon 1604. Deprived of their health and wealth by the tortures and machinations of the Inquisition under Philip III. of Spain, his parents fled, with their youthful son Manasse and many of their suffering coreligionists, to hospitable Holland, which was then the asylum for the persecuted of all countries. Manasse was at once sent as pupil to the celebrated Talmudist, mathematician, physician, and Hebrew poet, Isaac Uzziel, the rabbi of Amsterdam, where he made such extraordinary progress that, after the death of his teacher (1620), he succeeded to the rabbinate before he was eighteen years of age (1622). To supplement his official stipend, which was insufficient for the support of his family, he established, when twenty-two years old (1626), the celebrated Amsterdam Hebrew printing-office, and two years after (1628) printed his own maiden production. When scarcely twenty-eight he published, in Spanish, the first volume of his celebrated *Conciliator*, or *Harmony of the Pentateuch* (1632), in which he quotes upwards of 210 Hebrew works, and 54 Greek, Latin, Spanish, and Portuguese authors, both sacred and profane, and which was the basis of his great fame. Henceforth he was not only the oracle of the Jewish community, but Christian scholars wrote to him from far

and wide, requesting explanations of difficulties which they encountered in the Hebrew Scriptures and Jewish history. The celebrated Vossius, Dionysius, Hugo Grotius, Huet, Episcopus, Sobierie, Frankenberg, Thomas Fuller, Nathaniel Homesius, etc., were among his correspondents. He solicited their influence in behalf of his suffering brethren, and was thereby enabled to petition the Long Parliament (1650) to readmit the Jews into England, whence they had been expelled ever since 1290. Shortly after he dedicated *The Hope of Israel* to the English Parliament, which was gratefully acknowledged in a letter written by Lord Middlesex, addressed *To my dear brother M. B. I., the Hebrew philosopher*. Encouraged thereby, Manasse came over to England in 1655, presented 'A Humble Address' in behalf of his coreligionists to Cromwell; published in London, 1656, his *Vindication of Jews*, in answer to those Christians who opposed the readmission of the Jews into this island; and though the desire of his heart was not accomplished, inasmuch as Cromwell, with all his power, could not carry through the cause of God's ancient people, yet some good was done, as some few Jews were allowed to settle in England, for shortly after (1657) a piece of land was obtained in Stepney for a Jewish burying-place. Cromwell, moreover, granted 'to Manasse ben Israel a pension of £100 per annum, payable quarterly, and commencing 20th February 1656' (comp. Carlyle, ii. 163). Manasse, however, did not enjoy long this generous gift, for he died in Middleburg in 1657, on his way back to Amsterdam. The following are his works bearing on Biblical literature: (1.) *פני רבה*, in Hebrew, being an index to all the passages of the Hebrew Scriptures in the *Midrash Rabbah* on the Pentateuch and the Five Megilloth, Amsterdam 1628. (2.) *Conciliator, Sive De convenientia locorum S. Scripturae, quae pugnare inter se videntur*, etc., in Spanish, four volumes, Amsterdam 1632-1651. The first volume was translated into Latin by Vossius, Amst. 1633, and the whole has been translated in English by Lindo, London 1842. (3.) *De Creatione Problemata*, in Spanish, Amst. 1635. (4.) *De Resurrectione Mortuorum, Libri tres*, Amst. 1636, in Spanish. (5.) *צִוּר הַחַיִּים, De Terminis Vitae*, in Latin, Amst. 1639, translated into English by Thomas Pococke, London 1699. (6.) *נִשְׁמוֹת חַיִּים*, four books on the immortality of the soul, written in Hebrew, Amst. 1651, new ed., Leipzig 1862. These are valuable contributions to Biblical literature, inasmuch as Manasse gives in them all the passages from the Hebrew Scriptures, which, according to the explanations of the ancient rabbins, teach the immortality of the soul and the resurrection. (7.) *אֵבֶן יִקְרָה, Piedra Gloriosa o de la Estatua de Nebuchadnesar*, Amst. 1655, an exposition of Daniel's dream, written in Spanish, which the immortal Rembrandt did not think it below his dignity to adorn with four engravings. He also carried through his own press several beautiful and correctly printed editions of the Hebrew Scriptures, and wrote a Hebrew Grammar, entitled *שֵׁפַת בְּרוּרָה, Grammatica Hebraea, dividida en quatuor libros*, which has not as yet been published. Comp. Fürst, *Bibliotheca Judaica*, ii. 354-358; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodliciana*, col. 1645-1652; and especially the valuable biography by Kayserling, *Jahrbuch für die Geschichte der Juden*, vol. ii., Leipzig 1861, p. 85, ff.—C. D. G.

MANASSES, THE PRAYER OF, though wanting in the early printed editions of the Sept., must have been included in the ancient Codd. of the Sept., as is evident from the fact that there exists an Ante-Hieronymian Latin version of it. It is found in the Codex Alexandrinus, and the Greek text was first published in Robert Stephen's edition of the *Biblia Latina*, Paris 1540, and in the edition of the same printed in 1546. It was also printed in the *Apostolical Constitutions* in 1563; it was then published by Dauderstadt in 1628; inserted in the fourth volume of the London Polyglott, with the various readings of the Codex Alexandrinus; in the *Apostolical Fathers* of Cotelerius in 1672; in the *Libri apocr. V. T.*, Francof. ad M. 1694. Halle 1749; in the editions of the Apocrypha by Reineccius, 1730, Michaelis 1741; and after the text of the Cod. Alexandrinus in the editions of the Sept. by Grabe and Breitinger.

1. *Title and Position*.—This apocryphal production is called the *prayer of Manasses* (*προσευχὴ Μανασσῆ*), or *hymn of prayer* (*προσευχὴ τῆς ψυχῆς*), because it purports to be the supplications which this monarch offered to God when captive in Babylon, mentioned in 2 Chron. xxxiii. 12, 13. Its position varies in the MSS., printed editions of the text, and in the versions. It is more generally appended to the Psalter with the collection of hymns and prayers, as in the Codex Alexandrinus, the Zurich MS. of the Psalms mentioned by Fritzsche, and in the Ethiopic Psalter, published by Ludolf (Frankfort-on-the-Maine 1701); in the three Latin MS. used by Sabatier it is placed at the end of 2 Chron. (Sabat. *Bibl. Lat.*, iii. 1038); in the editions of the Vulgate formed after the Trident. Canon of the Bible it is usually put at the end of the N. T., succeeded by the third and fourth books of Esdras. Luther placed it as the last of the Apocrypha at the end of the O. T., whilst Matthew's Bible, which first inserted it among the Apocrypha, and which is followed by the Bishop's Bible and the A. V., puts it before the Maccabees.

2. *Contents, Author, Date, Original Language, etc.*—It opens with an appeal to the God of the faithful patriarchs and their righteous seed, describes his greatness as Creator of all things, before whose power every one trembles, and whose wrath no sinner can endure, and speaks of his proffered pardon to the penitent (1-8). Whereupon the repentant king confesses his sins, humbles himself on account of them, prays for pardon, and promises to lead a life of gratitude and praise (9-15). There is nothing in this prayer to militate against its being the penitential dirge of the penitent Manasseh; on the contrary, the simplicity and appropriateness of its style, the earnest and touching manner in which it is expressed, go far to show that if it is not literally 'his prayer unto his God' rendered into Greek, it forms the basis of the Greek. This is, moreover, corroborated by the fact that the prayer was still extant when the Chronicles were compiled, that the chronicler saw it 'in the book of the Kings of Israel' (2 Chron. xxxiii. 18), and that later writers, as well as tradition, constantly refer to it (comp. *Sanhedrin*, 101, b; 103, a; *Jerusalem Sanhedrin* xvii.; *Midrash Rabbah* on Lev., Parsha xxx., p. 150; on Deut., Parsha ii., or ch. iv. 25, p. 216, ed. Sulzbach; *Chaldee Paraphrase* of 2 Chron. xxxiii. 11, etc.; *Cont. Apost.* ii. 22). When the present Greek

form of it, or rather *excerpt* from it, first came into vogue, it is impossible to say. All that we know is, that it existed before Jerome revised the old Latin version, that reference is made to it in a fragment of Julius Africanus (circa 221 A.D.), that it is given at length in the *Apostolical Constitutions* (ii. 22), a work attributed to Clemens Romanus, but generally believed to be of the 3d or 4th century, and that the whole complexion of it shows it to be an ante-Christian production compiled most probably in the 1st century B.C.

3. *Canonicity*.—This prayer was considered by the ancients as genuine, and used as such for ecclesiastical purposes. It is quoted as such by the author of the *Sermons on the Pharisee and Publican*; in the sixth volume of Chrysostom's works; by Anthony the monk (ii. 94); Theodore Studita (*Serm. Cataphet.* 93); Theophanes Caramæus (*Homil.* ii. and lvi.); by Freulfus, George Syncellus, and George the sinner, in their *Chronicles*; Suidas (*Lex.*, s. v. *Μανασσης*); and by Anastasius Sinaita (*in Psalm vi.*); and is still placed by the modern Greeks in their Psalter along with the other hymns (Leo Allatius, *De lib. Ecclesiast. Græcorum*, p. 62). It was, however, never recognised in the Roman Church as canonical, and has, therefore, been omitted in the ancient editions of the Sept. For this reason it is also omitted from the Zurich Version, and Coverdale's Bible, which follows it, as well as from the Geneva Version; but is retained among the Apocrypha in Luther's translation, Matthew's Bible, and in the Bishop's Bible, and thence passed over into the A.V.

4. *Versions and Exegetical Helps*.—Greek and Latin metrical versions of this prayer have been reprinted by Fabricius in his edition of the *books of Sirach, Wisdom, Judith, and Tobit*, Leipzig 1691. A Hebrew version of it is mentioned by Wolf, *Bibliotheca Hebræa*, i. 778; a very beautiful Hebrew version with valuable notes is printed in the *Hebrew Annual*, entitled *Bikure Ha-Itim*, vol. v., p. 12, ff., Vienna 1824; important literary notices are given by Fabricius, *Codex Pseudepigraphus V. T.*, vol. i., p. 1100, ff.; *Bibliotheca Græca*, vol. iii., ed. Harles, p. 732, ff.; Müller, *Erklärung des Gebet Manasse*, Salzweil 1733; and especially Fritzsche, *Kurzgefasstes exegetisches Handbuch z. d. Apocryphen d. A. T.*, vol. i., p. 157, ff., Leipzig 1851.—C. D. G.

MANDRAKE. [DUDAIM.]

MANEH. [WEIGHTS AND MEASURES.]

MANETHO, of Sebennytus, was distinguished for priestly learning at the court of the first Ptolemy; so Plutarch relates (*de Is. et Os.*, c. 28), who cites a religious work of his in Greek, which is quoted also under various names by Ælian, Diogenes Lærtius, Porphyry, and other late writers (Fruin, *Manethonis Sebennytæ Reliquia*, p. 133, ff.; Parthey, *Plutarch über Isis u. Osiris*, p. 180, ff.) Josephus (*c. Apion.* i. 14-16, 26, 27) gives two long extracts, with a list of seventeen reigns, from the *Ἀγνῶτιστα*, 'a work composed in Greek by Manetho the Sebennyte from materials which he professes to have rendered from the sacred records;' of which history all else that is extant is a catalogue of Egyptian dynasties, preserved in two widely different recensions by Georgius Syncellus, 800 A.D.; the one from the lost *Chronographia* of Julius Africanus, 220 A.D.; the other from the *Chronicon* of Eusebius, 325

A.D. (of which we have now the Armenian version); both texts are given by Fruin, and by Bunsen in the appendix to *Egypt's Place*, vol. i. The statement that 'Manetho the Sebennyte of Heliopolis, high-priest and scribe of the sacred adyta, composed this work from the sacred records by command of Ptolemy Philadelphus,' rests only on the dedication (ap. Syncell.) prefixed to the *Solhis*, an undoubted forgery of Christian times. All that can be inferred from it, is, that the forger had grounds, good or bad, for placing Manetho in the time of the second Ptolemy. In fact, the incident with which Plutarch, *u. s.*, connects his name (the bringing in of Serapis), is related by other writers (*without mention of Manetho*), and is assigned by Tacitus also (*Hist.*, iv. 183, ff.) to the time of the first Ptolemy; but by Clem. Alex. (*Protrept.*, iv. 48), and Cyrill. Al. (*c. Julian.*, p. 13), to Ptolemy Philadelphus, with the date Ol. 124 = 284-1 B.C. If he did live, and was a man of note, under the early Ptolemies, certain it is that this 'most distinguished writer, the sage and scholar of Egypt' (as Bunsen calls him, *Æg. St.*, i. 88), was speedily and long forgotten; for more than three centuries after the time at which he is said to have flourished not a trace of him or his writings is anywhere discoverable. Nothing of the kind occurs in the remains of the Alexandrine scholars, the early Greek Jews, the Polyhistor's collections, the chronological writings of Castor.\* Diodorus Sic. and Strabo visited and wrote about Egypt, yet neither of them names or alludes to Manetho; and the former gives (i. 44, ff., from the priests, he says) an account of the kingly succession altogether different from his. If, as Fruin suggests (p. lxiii.), it was through measures taken by Domitian to repair the losses sustained by the public libraries (Sueton., *Dom.* 20), that Manetho's works were brought to Rome from the Alexandrine library, where they had long slumbered unregarded, still it is strange that the *Ægyptiaca* should have caught the attention of Josephus alone (among extant writers), and that neither those who, as Plutarch, do mention the other work, nor others who have occasion to speak of the ancient times of Egypt, as Tacitus and the elder Pliny (esp. *H. N.*, xxxvi. 8-13), ever name this history, or show any acquaintance with its list of kings. Lepsius (*Chron. der Äg.*, i. 583, ff.) better meets the difficulty by supposing that the original work, never widely known, was so early lost that even in the 1st century all that survived of it was a bare abstract of its names and numbers, and (distinct from this) the two passages relating to the 'Hyksos' and the 'lepers,' with the accompanying list of seventeen reigns, which some Jewish reader had extracted on account of their Biblical interest, and beyond which Josephus knew nothing of Manetho. Whatever be the explanation, the fact is, that it is

\* That the *Catalogue of Thirty-eight Theban Kings* (ap. Syncell.) is the work of *Eratosthenes* there is nothing to show; at any rate, it contains no reference to Manetho. If it was from Manetho that *Dicaarchus*, cir. 290 A.D. (ap. Schol. in *Apollon. Rhod.*), got his two Egyptian names and dates, it was in quite another form of the work; to the Scholiast, Manetho is an unknown name. The Egyptian list in the *Excerpta latino-barbara* of Scaliger, bearing the name of *Castor*, is a mere abstract from Africanus.

only through Jewish and Christian writers that we ever hear of Manetho as an historian. Of these, Theophilus Ant. (*ad Autolyc.*, iii. 20, *cir.* 181 A.D.) does but copy Josephus. Clemens Alex. nowhere names Manetho. A history of 'the Acts of the Kings of Egypt, in three books'—not, however, by Manetho, but by 'Ptolemy the Mendesian'—is, indeed, quoted by him (*Strom.* i. 26, 101), but at second-hand from Tatian; who again (*ad Gentes*, p. 129), as perhaps Justin Martyr before him (*ad Gr.*, 8), quotes Ptolemy, not directly, but from Apion. In short, it is plain, on comparing these passages and Euseb. (*Pr. Ev.*, x. 11, 12), that Apion is the sole source of all that is known of this Ptolemy of Mendes; and Apion, as far as we know, makes no mention of Manetho. In what relation the work of Ptolemy may have stood to Manetho's, as there is no evidence to show, it is idle to speculate; and, indeed, the question with which we are concerned would remain very much where it is, even were it proved that 'Manetho' is a borrowed name, and the *Aegyptiaca* a product of Roman times. For the important point is, not who wrote the book, and when? but what is its value? It may not be genuine, nor so old as it pretends to be, and yet may contain good materials, honestly rendered from earlier writings or original records, probably as available in the time of Domitian as they were under the Ptolemies; and, in fact, existing monuments do furnish so considerable a number of names unquestionably identical with names in the list, that to reject this altogether, and deny it all historical value, would betoken either egregious ignorance, or a reckless scepticism that can shut its eyes to manifest facts.

But the attestation which the list obtains from contemporary monuments cannot be held to warrant the assumption that it is to be depended upon where these fail. For the monuments which attest, also correct its statements. Monuments prove some reigns, and even dynasties, contemporaneous, which in the list are successive; but we have no means of ascertaining what was truly consecutive and what parallel, where monuments are wanting. Their dates are always in years of the current reign, not of an era. From Cambyes upward to Psammetichus and his immediate predecessor Taracus = Tirhaka, the chronology is now settled [CHRONOLOGY, Sec. 14]. Thence up to Petubastes (dyn. xxiii.) the materials are too scanty to yield any determination. For dyn. xxii., headed by Sesonchis = Shishak, the records are copious: dates on apis-stelæ, of which Mariette reports seven in this dynasty, prove that it lasted much more than the 120 years of Africanus. But even these reigns cannot be formed into a canon, and the epoch of Sesonchis can only be approximately given from the Biblical synchronism, 'In 5 Rehoboam Shishak invaded Judæa'—in what year of his reign\* the

monument which records the conquest does not say; besides, the epoch of Rehoboam is no longer a fixed point, or nearly so, for all chronologists.\* In dyns. xx., xxi., is another gap, at present not to be bridged over. The seven named Tanites of xxi. (Afr. 130, Eus. 121 years) seem to have been military priest-kings; and that they were partly contemporaneous with xx. and xxii. may appear from the absence of apis-stelæ, of which xx. has nine, xxii. seven. Dyn. xx., for which the list gives no names, consisted of some ten or more kings, all bearing the name Rameses, beginning with R. III., and five of them his sons, probably joint-kings. The apis-inscriptions furnish no connected dates, nor can any inference be drawn from their number, since Mariette reports no less than five in the first reign. For dyn. xix. (Sethos), xviii. (Amosis), the materials, written and monumental, are most copious; yet even here the means of an exact determination are wanting: indeed, if further proof were needed that the Manethonic Lists are not to be implicitly trusted, it is furnished by the monumental evidence here of contemporary reigns which in the lists are successive. It is certain, and will at last be owned by all competent inquirers, that in the part of the succession for which the evidence is clearest and most ample, it is impossible to assign the year at which any king, from Amosis to Tirhaka, began to reign. No ingenuity of calculation and conjecture can make amends for the capital defects—the want of an era, the inadequacy of the materials. The brilliant light shed on this point or that, does but make the surrounding darkness more palpable. Analysis of the lists may enable the inquirer, at most, to divine the intentions of their authors; which is but a small step gained towards the truth of facts.

But it has been supposed that certain fixed points may be got by means of astronomical conjunctures assigned to certain dates of the vague year on the monuments:—(i.) Thus, A fragmentary inscription of Takelut II., 6th king of dyn. xxii., purports that 'on the 25th Mesori of the 15th year of his father' (Sesonk II. according to Lepsius, *Age of XXII. Dyn.*, but Osorkon II. according to Brugsch, Dr. Hincks, and v. Gumpach), 'the heavens were invisible, the moon struggling . . .'. Hence Mr. Cooper (*Athenæum*, 11 May '61) gathers, that on the day named, in the given year of Sesonk II., there was a lunar eclipse, which he considers must be that of 16th March 851 B.C. Dr. Hincks, who at first also made the eclipse lunar, and its date 4th April 945 B.C., now contends that it was solar, and the only possible date 1st April 927 B.C. (*Journal of*

labour of his tribesmen; if he presently conceived the purpose of insurrection, encouraged by Ahijah; if his purpose became known to Solomon almost as soon as formed; if, in short, his flight into Egypt was not later than 26 Solomon; lastly, if Shishak became king in that year; then 5 Rehoboam (=45 Solomon) will be 20 Shishak. This is a specimen of much that passes for 'Chronology'—where the Bible is concerned.

\* Some light is thrown on the dynastic connection of dyn. xxii. and xxiii. by a stele recently discovered by Mariette in Ethiopia, which proves the fact of numerous contemporary reigns throughout Egypt at that time: Brugsch's *Zeitschrift*, July '63; De Rougé, *Inscr. du roi Pianchi Meri Amun*, '64. But it helps the chronology little or nothing.

\* The inscription is dated 21 Shishak, but does not indicate the order or time of the several conquests recorded. The attempt has been made to prove from Biblical data that the invasion was in the 20th year. Thus: It was while Solomon was building Millo (2 Kings xi. 27), that Jeroboam fled to 'Shishak, king of Egypt' (*ib.* 40). This work began not earlier than 24 Solomon (vi. 37-vii. 1). If it began in that or the next year; if Jeroboam was immediately appointed overseer of the forced

*Sacred Lit.*, Jan. '63, p. 333-376; comp. *Id.*, Jan. '64, p. 459, ff.) In making it solar, he follows M. v. Gumpach (*Hist. Antiq. of the People of Egypt*, '63, p. 29), who finds its date 11th March 841 B.C. Unfortunately the 25th Mesori of that year was 10th March. This is the only monumental notice supposed to refer to an eclipse: it not worth much at the best; the record, even if its meaning were certain, is not contemporary.

(ii.) In several inscriptions certain dates are given to the 'manifestation of Sothis,' assumed to mean the heliacal rising of Sirius, which, for 2000 years before our era, for the latitude of Heliopolis, fell on 20th July. (Biot, indeed, *Recherches de quelques dates absolues*, etc., 1853, contends that the calculation must be made for the place at which the inscription is dated—each day of difference, of course, making a difference of four years in the date B.C.) The dates of these 'manifestations' are—(1) '1 Tybi of 11 Takelut II.' (Brugsch): the quaternion of years in which 1 Tybi would coincide with 20th July is 845-42 B.C. (2) '15 Thoth in a year, not named, of Rameses VI., at Thebes' (Biot, *u.s.*; De Rougé, *Mémoire sur quelques phénomènes célestes*, etc., in *Revue Archéol.* ix. 686). The date implied is 20th July 1265-62 (Biot, 14th July 1241-38). (3) '1 Thoth in some year of Rameses III. at Thebes' (Biot and De Rougé, *u.s.*, from a festival-calendar). The date implied is of course 1325-22 (Biot, 14th July 1301-1298). (4) '28 Epiphi in some year of Thothmes III.' (Biot, etc., from a festival-calendar at Elephantine).<sup>\*</sup> This implies 1477-74 B.C. (Biot, 12 July 1445-42 B.C.) (5) '12 Mesori in 33 Thothmes III.' (Mr. S. Poole in *Trans. R. S. Lit.*, v. 340). This implies 1421-18 B.C. These dates would make the interval from Rameses III. to Takelut II. 480 years, greatly in excess even of Manetho's numbers, and more so of Lepsius's arrangement, in which, from the 1st of Rameses III. to the 11th of Takelut II. are little more than 400 years. Again, the interval of only 152 years, implied in (3) and (4), is unquestionably too little: from the last year of Thothmes III. to the first of Rameses III., Lepsius reckons 296, Bunsen 225 years. Lastly, in (4) (5) the dates imply an interval of 56 years, which is plainly absurd. The fact must be, that these inscriptions are not rightly understood. We need to be informed what the Egyptians meant by the 'manifestation of Sothis'; what method they followed in assigning it to a particular day; especially when, as in Biot's three instances, the date occurs in a calendar, and is marked as a 'festival,' we ask, were these calendars calculated only for four years? when a new one was set up, were the astronomical notices duly corrected, or were they merely copied from the preceding calendar?

(iii.) 'At Semneh in 2 Thothmes III., one of the 3 feasts of the Commencement of the Seasons is noted on 21 Pharmuthi.' Biot, *u.s.*, supposes

the vernal equinox to be meant, and assigns this to 6th April in the quaternion 1445-42 (as above), in which 6th April was 21 Pharmuthi. But the vernal equinox is *not* the commencement of one of the three seasons of the Egyptian year; these start either from the rising of Sirius, 20th July, or, more probably, from the summer solstice: as this, in the 14th century, usually fell on 6th July, the two other tetramenies or seasons would commence *cir.* 5th Nov. and 6th March. Now, 6th March did coincide with 21 Pharmuthi in 1321-18 B.C., at which time it also occupied precisely the place which Mr. Stuart Poole assigns to 'the Great Rukh' (Leps., 'the greater Heat'), just one zodiacal month before the little Rukh or vernal equinox (*Iloka Egypt.*, p. 15, ff.)

(iv.) 'On 1 Athyr of 11 Amenophis III., the king ordered an immense basin to be dug, and on the 16th s. m., celebrated a great panegyry of the waters.' (Dr. Hincks, *On the Age of Dyn. XVIII.*, *Trans. R. Irish Acad.*, vol. xxi. pt. 1; comp. Mr. S. Poole, *Trans. R. S. Lit.*, v. 340.) If the waters were let in when the Nile had reached its highest point—which, as it is from 90 to 100 days after the summer solstice, in the 14th century would be at 4-14 Oct.—the month-date indicates one of the years from 1369-1326 B.C. But if (which is certainly more likely) the time chosen was some weeks earlier, the year indicated would be after 1300 B.C. So this and the preceding indication may agree, and so far there is some evidence for the supposition that the sothiac epochal year 1322 B.C. lies in the reign of Thothmes III. (See Dr. Hincks, *u.s.*, and in *Dublin Univ. Magazine*, 1846, p. 187.)

(v.) An astronomical representation on the ceiling of the Rameseum (the work of Rameses II.) has been supposed to yield the year 1322 as its date (Bishop Tomlinson, *Trans. R. S. Lit.*, 1839; Sir G. Wilkinson, *Manners and Customs*, etc., 2 ser., p. 377); while Mr. Cullimore, from the same, gets 1138 B.C. The truth is, these astronomical configurations, in the present state of our knowledge, are an unsolved riddle. Lepsius's inferences (*Chron. der Aeg.*) from the same representations in the reigns of Rameses IV. and VI. are little more than guesses, too vague and precarious to satisfy any man who knows what evidence means.

It appears, then, that the supposed astronomical notes of time hitherto discovered lend but little aid, and bring nothing like certainty into the inquiry. We cannot accept the lists as they stand. How are they to be rectified? Until we have the means of rectifying them, every attempt to put forth a definite scheme of Egyptian chronology is simply futile. The appeal to authority avails nothing here. Lepsius, Bunsen, Brugsch, and many more, all claim to have settled the matter. Their very discrepancies—on the scale of which half a century is a mere trifle—sufficiently prove that to them, as to us, the evidence is defective. The profoundest scholarship, the keenest insight, cannot get more out of it than is in it: 'that which is crooked cannot be made straight, and that which is wanting cannot be numbered.' Yet, from the easy confidence with which people assign dates—their own, or taken on trust—to the Pharos after Amosis, and even of much earlier times, it might be thought that from Manetho and the monuments together a connected chronology has been elicited as certain as that of

<sup>\*</sup> The antiquity of this calendar is called in question by De Rougé, *Athén. Français*, '55, and by Dr. Brugsch, who says the style indicates the 19th dyn. Mariette assigns it to Thothmes III., *Journal Asiatique*, tom. xii., Aug., Sept. '58. Lepsius, who in '54 doubted (*Monatsbericht* of Berlin R. Acad.), now contends for its antiquity (*Königsbuch der Aeg.*, p. 164), having contrived to make it fit his chronology by assuming an error in the numeral of the month.

the Roman emperors. In particular, there appears to be a growing belief—even finding its way into popular Bible histories and commentaries—that *the Pharaoh of the Exodus* can be identified in Manetho, and so the time of that event determined.

Early Christian writers usually assumed, with Josephus, that the *Hyksos* or 'shepherd-kings' whose story he gives from Manetho (*c. Apion*, i. 14-16), were the Israelites, and their expulsion by Amosis or Tethmosis—one or both, for the accounts are confused\*—the Egyptian version of the story of the Exode. This view, once favoured by the present writer, by him long since abandoned, has still its advocates (quite recently Mr. Nash, *The Pharaoh of the Exodus*, '63), but not among those who have been long conversant with the subject. Indeed, there is a monument of Thothmes III., which, if it has been truly interpreted, is conclusive for a much earlier date of the Exode than this reign, or perhaps any of the dynasty. A long inscription of his 23d year gives a list of the confederates defeated by him at Megiddo, in which De Rougé reads the names *Jacob* and *Joseph*, and Mr. Stuart Poole thinks he finds names of some of the tribes, *Reuben*, *Simeon*, *Issachar*, *Gad* (Report of R. S. Lit., in *Athenaeum*, Mar. 21, '63).

But the story of the Jews put forth by 'Manetho' himself (Joseph. *c. Apion*, i. 26, 27), with the confession, however, that he obtained it not from ancient records, but from popular tradition (*ἀπὸ τῶν μυθολογούμενων*), represents them as a race of lepers, who, oppressed by the reigning king, called to their aid the Hyksos from Palestine (where these, on their expulsion some centuries earlier by Tethmosis, had settled and built Jerusalem), and with these allies overran all Egypt for thirteen years, at the end of which Amenophis, who had taken refuge in Ethiopia, returning thence with his son Sethos, drove out the invaders. These, headed by Osarsiph (= Moses), a priest of Heliopolis, retired into Palestine, and there became the nation of the Jews. Josephus protests against this story as a mere figment, prompted by Egyptian malignity,† and labours to prove it inconsistent with Manetho's own list: unsuccessfully enough, for in fact Amenophis (Ammenephtes, Afr.) does appear there just where the story places him, *i.e.*, next to Sethos and Rameses II., with a reign of nineteen years and six months. The monuments give the name Menephtha, and his son and successor Seti = Sethos II., just as in the story. The names are not fictitious,‡

whatever may be the value of the story as regards the Israelites. This Menephtha, then, son and successor of Rameses the Great, is the Pharaoh of the Exode, according to Lepsius and Bunsen, and of late accepted as such by many writers, learned and unlearned. Those to whom the name of Manetho is not voucher enough, will demand independent evidence. And in fact it is alleged that the monuments of the time of Menephtha attest a period of depression: no great works of that king are known to exist; of his reign of twenty years the highest date hitherto found is the fourth; and two rival kings, Amen-messu (the Ammenemeses of the lists) and Si-phtha, are reigning at the same time with him, *i.e.*, holding precarious sovereignty in Thebes during the time of alien occupation and the flight of Menephtha (Bunsen, *Aeg. Stelle*, iv. 208, ff.)—That these two kings reigned in the time of Menephtha, and not with or after Sethos II., is assumed without proof; that the reign of Rameses II. was followed by a period of decadence proves nothing as to its cause; and the entire silence of the monuments as to an event so memorable as the final expulsion of the hated 'Shepherds' (*Shas-u*), who so often figure in the monumental recitals of earlier kings (*e.g.*, of Sethos I., who calls them *shas-u p'kanana-kar*, 'shepherds of the land of Canaan'), tells as strongly against the story as any merely negative evidence can do for it.—More important is the argument derived from the mention (Exod. i. 11) of the 'treasure-cities Pithom and Raameses,' built for the persecuting Pharaoh by the forced labour of the Hebrews; the Pharaoh (says Rosellini, *Mon. Storici*, i. 294, ff.) was Rameses [II., son of Sethos I], who gave one of the cities his own name. (Comp. Ewald, *Gesch.* ii. 66, note.) Lepsius, *Art. Aegypten*, in Herzog's *Encyclop.*, calls this 'the weightiest confirmation,' and in *Chronol. der Aeg.*, i. 337-357, enlarges upon this argument. Raameses, he says, was at the eastern, as Pithom (*Πάρουμος*) was certainly at the western end of the great canal known to be the work of Rameses II., and the site of the city bearing his name is further identified with him by the granite group disinterred at Abu Keisheib, in which the deified king sits enthroned between the gods Ra and Tum.\*—Certainly a king Rameses

of the 18th dynasty, father of Rameses the Great. When, with his son Rameses, he had conquered the *Shasu*, he took the name Sethos, from the god *Set*, *Soutech*, specially worshipped by them. So begins a new era; but the lepers were not driven out till later.—Ewald, *Gesch.* ii. 66, who holds the story to be a genuine tradition of the Hebrew Exode, also makes its Amenophis the last king of dyn. xviii. Knobel, *kgf. exeg. Hdb.* Exod. p. 116, refers the tradition not to the Hebrews but to the Philistines.

\* Sir Gardiner Wilkinson, in Rawlinson's *Herodot.*, ii. p. 312, finds a connection of Rameses II. with Pithom, which he derives from *Thmei*, 'truth,' in the fact that the goddess forms part of the prenomens of him and his father. Sir G. W., *ibid.*, p. 288, is inclined to place the Exode after Rameses II. rather than in the time of Thothmes III. as formerly. The discussion of Lepsius's determination of the site of Raameses does not belong to this place, but to that Article. It may, however, be noted here, that if Raameses be the Abaris, Auaris of the Shepherd-story, the question is settled

\* Usually reconciled by saying that Amosis was the first who made war against the Hyksos, and drove them into Auaris, whence Thothmes III. finally expelled them. Lepsius assigns Amosis and his successors to the 17th dynasty, 93 years, down to 12 Thothmes III., and begins the 18th at the thirteenth year of this king = first of his sole reign (*Königsbuch der Aeg.*) But De Rougé has shown that the expulsion of the Hyksos must have been completed by Amosis, by the taking of Tanis = Auaris, in his sixth year—*Journal Asiatique*, August '58, p. 267.

† Böckh, *Manetho*, p. 686, thinks it was not even inserted by Manetho himself, but by a later hand, in spite to the Jews.

‡ Scheuchzer, *über die Zeit des zweiten Einfalls der Hyksos in Aegypten*, in *Zeitschr. der d. Morgenl. Gesellsch.*, xiv. 640, contends that the Amenophis who retreated before the Hyksos was the last king

appears first in the 19th dynasty, but the place may have taken its name, if from a man at all, from some earlier person.\*

That the Exode cannot be placed *before* the 19th dynasty, Bunsen (*u. s.*, p. 234) holds to be conclusively shown by the fact that on the monuments which record the conquests of Rameses the Great in Palestine, no mention occurs of the Israelites among the *Kheti* (Hittites) and other conquered nations; while, on the other hand, there is no hint in the book of Judges of an Egyptian invasion and servitude. On similar negative grounds he urges that the settlement in Palestine must have been subsequent to the conquests made in that country by Rameses III., first king of the 20th dynasty. To which it may be replied—(1.) that we have no clear information as to the route of the invaders; if it was either along the coast or to the east of Jordan, the tribes, perhaps, were not directly affected by it. (2.) The expeditions so pompously described on the monuments (as in the Statistical Table of Karnak, Thothmes III., and similar recitals of the conquests of Rameses II. and III.; see Mr. Birch in *Trans. of R. S. Lit.*, ii. 317, ff.; and vii. 50, ff.) certainly did not result in the permanent subjugation of the countries invaded. This is sufficiently shown by the fact that the conquests repeat themselves under different kings, and even in the same reign. Year by year the king with his army sets out on a gigantic *razzia*, to return with spoil of cattle, slaves, and produce of the countries overrun. (3.) If the lands of the tribes were thus overrun, it may have been during one of the periods of servitude, in which case they suffered only as the vassals of their Canaanite, Moabite, or other oppressors. That this may possibly have been the case is sufficient to deprive of all its force the argument fetched from the silence of the monuments, and of the book of Judges.

There remains to be noticed one piece of documentary evidence which has quite recently been brought to light. Dr. Brugsch, *Zeitschrift*, Sept. '63, reports that 'one set of the Leyden hieratic papyri, now publishing by Dr. Leemans, consists of letters and official reports. In several of these, examined by M. Chabas, repeated mention is made of certain foreigners, called *Apuriju*, i. e., Hebrews, compelled by Ramses II. to drag stones for the building of the city Ramses.' In his *Mélanges Egyptol.*, '62, 4th dissertation, M. Chabas calls them *Aperiu*. It is certainly striking, as Mr. Birch remarks (in *Revue Archéol.*, April '62, p. 291), that 'in the three documents which speak of these foreigners, they appear engaged on works of the same kind as those to which the Hebrews were subjected by the Egyptians: it is also important that the papyri were found at Memphis. But the more inviting the proposed identification, the more cautious one needs to be.' As the sounds R

and L are not discriminated in Egyptian writing, it may be that the name is *Apeliu*; and as B P have distinct characters, one does not see why the b of עֲפֵרִים should be rendered by p. (The case of *Epep* = עֲפֵרִים is different; see below.) It seems

also that the same name occurs as late as the time of Rameses IV., where it can hardly mean the Hebrews. Besides, the monument of Thothmes III. above mentioned leads to quite a different conclusion. Where the evidence is so conflicting, the inquirer who seeks only truth, not the confirmation of a foregone conclusion, has no choice but to reserve his judgment.

The time of this Menephtha, so unhesitatingly proclaimed to be the Pharaoh of the Exode, is placed beyond all controversy—so Bunsen and Lepsius maintain—by an invaluable piece of evidence furnished by Theon, the Alexandrine mathematician of the 4th century. In a passage of his unpublished commentary on the *Almagest*, first given to the world by Larcher (*Herodot.*, ii. 553), and since by Biot (*Sur la période Sothiaque*, p. 18, 129, ff.), it is stated that the Sothiac Cycle of Astronomy which, as it ended in A. D. 139, commenced in 1322 B. C. (20th July), was known in his time as 'the era of Menophres,' ἐτὴ ἀπὸ Μενόφρων. There is no king of this name: read *Μενόφθρων*—so we have Menephtha of the 19th dynasty, the king of the leper-story, the Exodus Pharaoh. Lepsius, making the reign begin in 1328 B. C., places the Exode at 1314 B. C. = 15 Menephtha, in accordance with the alleged thirteen years' retirement into Ethiopia and the return in the fourteenth or fifteenth year.—Certainly the precise name *Menophres* does not appear in the lists; but in later times that name may have been used for the purpose of distinguishing some particular king from others of the same name; and there is reason to think this was actually the case. (1.) The king Tethmosis or Thothmes III. repeatedly appears on monuments with the addition to his royal legend, *Mai-Ré*, 'Beloved of Ré,' with the article *Mai-ph-Ré*, and with the preposition *Mai-n'-ph-Ré*, which last is precisely Theon's *Μενόφρων*. (2.) The acknowledged confusion of names in that part of the 18th dynasty, where this king occurs—*Misaphris*, *Misphres*, *Memphres* (Armen.), then *Misphragmuthosis* (the ΑΔΙΣΦΡ. of Josephus is evidently an error of copying for ΜΙΣΦΡ. : in the list *ibid.*, the 5th and 6th names are *Μήφρων*, *Μεφραμούθωσις*)—is perhaps best explained by supposing that the king was entered in the lists by his distinctive as well as his family name. (3.) In Pliny's notice of the obelisks (*H. N.*, xxxvi. 64), that known to be of Thothmes III. is said to belong to *Mesphres*, which, says Bunsen (iv. 130), 'would be the popular distinctive name given to this Thothmes.' Just so! And in the statement of Theon, the king is presented by 'his popular distinctive name,' *Menophres*. (4.) 'There was (says Dr. Hincks, *Trans. R. Irish Acad.*, vol. xxi., pt. 1) a tradition, if it do not deserve another name, current among the Egyptians in the time of Antoninus, to the effect that the Sothiac Cycle, then ending (139 A. D.), commenced in the reign of Thothmes III. The existence of such a tradition is evidenced by a number of scarabæi, evidently of Roman workmanship, referring to the Sothiac Cycle, and in which the royal legend of this monarch appears.' These are sufficient grounds

by Mariette's recent discoveries, by which Auaris is clearly identified with *Tanis*, the Zoan of Scripture—*Revue Archéol.*, February and March '61.

\* Names of kings beginning with the elements *Ra-hem-s* are frequent in the Turin Royal Canon. The name *Ra-hem-s-men-teti* stands in the first row of the Karnak Series. 'A son of Amosis bore the name Rameses, which name, from its meaning (son of Ré, the god of Heliopolis), would almost necessarily be not an uncommon one.'—Mr. S. Poole in Smith's *Dict. of Bible*, i. p. 328.

for believing that the Menophres of Theon is no other than Thothmes III., and that his reign was supposed (rightly or wrongly) to include the year 1322 B. C. It may be also that when Herodotus was told that *Moeris* lived about 900 years before the time of his visit to Egypt—a date not very wide of 1322 B. C.—Thothmes was named to him by his popular distinctive appellation, *Mai-Ré*, only confused with *Mares*=Amenemha III., the Pharaoh of the Labyrinth and its Lake. (Other explanations of the name Menophres may be seen in Böckh, *Manetho*, p. 691, ff.; Biot, *Récherches*, interprets it as the name of Memphis, *Men-nofru*, importing that the normal date, 20th July, for the heliacal rising of Sirius and epoch of the cycle, is true only for the latitude of Memphis.) What has been said is sufficient to show that there is no necessity for altering a letter of the name; consequently that the time of Menephtha is not defined by the authority of Theon.\*

In support of his date, 1314 B. C., for the Exode, Lepsius (*Chronol.* 359, ff.) has an argument fetched from the modern Jewish chronology (Hillel's *Mundane Era*), in which, he says, that is the precise year assigned to that event. Hillel, he is confident, was led to it by Manetho's Egyptian tradition, which gave him the name of the Pharaoh, which being obtained would easily give him the time. Bunsen, though finally settling on the year 1320 B. C., had previously declared with Lepsius for 1314 B. C., 'decided by the circumstance that a tradition not compatible with the usual chronological systems of the Jews, but which cannot be accidental, places the Exode at that year. This fact seems, from Lepsius's account of the *Seder Olam Rabba*, to admit of no doubt' (iv. 336). It admits of more than doubt—of absolute refutation. Hillel's whole procedure, from first to last, was simply Biblical. Daniel's prophecy of the 70 weeks gave him B. C. 422 for 11 Zedekiah [*CHRONOLOGY*, sec. 17]; thence up to 6 Hezekiah, he found the sum=133 years; for the kings of Israel the actual numbers were 243, of which he made 240 years; then 37 years of Solomon, 480 years of 1 Kings vi. 1, added to these, made the total 890 years, whence the date for the Exode was B. C. 422 plus 890=1312; for that this, not 1314, was Hillel's year of the Exode is demonstrable (Review of *Lepsius on Bible Chronology* by the present writer, in *Arnold's Theolog. Critic*, vol. i., p. 52-59, 1851).†

It is alleged that an indication confirmatory of the low date assigned by these writers is furnished by the month-date of the Exodus passover, 14 Abib, a name which occurs only in connection with that history, Exod. xii. 2; xiii. 4; xxiii. 15; xxxiv. 18; Deut. xvi. 1. For there is no reason to doubt that this is the hebraized form of the Egyptian

*Epep*, Coptic *Epiphi*, of which the Arabic rendering is also *Abib*.\* 'At the time assigned, the vague month Epep would pretty nearly coincide with the Hebrew Abib'—Lepsius, *Chron.*, p. 141. Hardly so: for in the year named, 1 Epiphi would fall on 14th May; and it is scarcely conceivable that the passover month (whose full moon is that next to the vernal equinox, which in that century fell *cir.* 5th April) should begin so late as the middle of May. Not till a hundred years later would the vague month Epiphi and the Hebrew passover month coincide. The argument proves too much, unless we are prepared to lower the Exode to *cir.* 1200 B. C. (To some it may imply that the narrative of the Exode was written about that time—Mr. Sharpe, *History of Egypt*, i. 63—but one can hardly suppose the Hebrews to have retained the vague Egyptian months as well as their names so long after their settlement in Palestine.) If in any year from 1300 B. C. upwards, the full moon next the vernal equinox fell in the month Epiphi, it would follow that the Coptic month-names (which, it is well understood, never occur on the monuments) belonged then to a different form of the year. The present writer surmises that such was the state of the case; but the question is not for this place.

For the first seventeen dynasties, numbering in Afr. more than 4000 years, a bare statement of their contents and of the monumental evidence would greatly exceed the limits of this article. Perhaps the time is not far distant when the attempt to educe a connected chronology from Manetho (whether for or against the Mosaic numbers) will be abandoned by all sensible men. Full and unprejudiced inquiry can have but one result: *for times anterior to 700 B. C. Egypt has no fixed chronology.* De Rougé has in two words set the whole matter in its true light: *les textes de Manéthon sont profondément altérés, et la série des dates monumentales est très incomplète.* The incompleteness of the record is palpable: the alteration of the texts is the result of their having passed through numerous hands, and been re-fashioned according to various intentions, by which the whole inquiry has been complicated to a degree which baffles all attempts to determine what was their original form. These intentions were mainly *cyclical*. A very brief statement of facts, not resting on critical conjecture and questionable combinations, as in the elaborate treatise of Böckh, but lying on the surface, will place the character and relations of the several texts in a clear light. Menes stands—1. In Africanus (according to Syncellus's running summation of the numbers in Bk. 1) just *three complete sothic cycles*, 3 × 1460 Julian years, before 1322 B. C.; 2. In Eusebius, according to the epigraphal sum of Book 1, *three cycles* before the epoch of Sethosis, dyn. xix.; 3. In Eusebius, according to the actual sum of Book 1, *three cycles* before the year 978-77 B. C., meant as the goal of the Diospolitan monarchy or epoch of Shishak; 4. In Syncellus's period of 3555 years (accepted by

\* De Rougé emphatically rejects Lepsius's notion of Menophres (*Revue Archéol.*, ix. 664; *Journal Asiatique*, Aug. 1858, p. 268). He thinks the year 1322 lies in the reign of Rameses III.

† Yet, though the process by which Hillel got his date is so transparent, it is spoken of as 'an important tradition' by those who take ready-made conclusions at second-hand, without inquiry into their grounds. So Duncker, *Gesch. des Alterthums*, i. p. 196, note; Dr. Williams in *Essays and Reviews*, p. 58.

\* The Egyptian month takes its name from the goddess *Apap*: the change of p to b is intended to make the word pure Hebrew, denoting the time of year, הָאֵבִיב הַלֵּשׁ = the month when the barley is in the ear (*abib*), Exod. ix. 31.

Lepsius and Bunsen as the true Manethoric measure from Menes to Neetanebus), *two cycles* before the same goal; 5. In the Old Chronicle, according to its *sothiac* form, *one cycle* before the same goal; 6. In the Sothis, *one cycle* before 1322 B. C.; but here it is contrived that *Osiropis*, or the commencement of Diospolitan monarchy, stands *one cycle* before *Susakeim* = Shishak. The inquirer may easily verify these facts for himself. In the series of papers, 'Cycles of Egyptian Chronology,' published in Arnold's *Theol. Critic*, 1851-52, he will find them fully stated with many other like facts, which prove that these chronographies, one and all, are intensely cyclical. But if Manetho, as we have him, is cyclical, then, Lepsius himself confesses (*K. B.*, p. 6, 7), 'the historical character of his work falls to the ground; for the very fact of Menes heading a sothiac cycle could only be the result of after-contrivance;' and Bunsen (*Aeg. St.*, iv. 13) sees that in place of 'the genuine historical work of Manetho, the venerable priest and conscientious inquirer,' we get 'a made-up thing, systematically carved to shape, and therefore really fabulous.' Whether or not the original 'Manetho,' whatever its authorship and date, was contrived upon a cyclical plan, we have but the lists as they come to us finally from the hands of Annianus and Panodorus through Syncellus. Only, it may be observed, that the cardinal dates given by *Dicaarchus*, which we have from an independent source, imply that the cyclical treatment of Egyptian chronology is at least as old as the alleged time of Manetho (*Cycles*, etc., *u. s.*, sec. 4, 16, 34, 36).—H. B.

**MANGER** (φάτνη; *phatne*). The word *phatne* occurs four times in the N. T., and only in St. Luke's Gospel. In the account of the nativity, where it is repeated thrice, it is in the A. V. translated 'manger,' but in the fourth passage it is translated 'stall.'

The question to be discussed is, what is St. Luke's meaning in employing the word as he does. In order to ascertain this, it will be best to read his narrative, having first dismissed any previous impressions, and inquiring only what meaning the word commonly carried at the time when he wrote. The derivation of *phatne* is by no means certain. It is however said to come from φάγω, or else from πατέσθαι (πάσασθαι), words meaning 'to eat,' though we consider πατέω (πατητόν), signifying to trample, etymologically just as likely. In classical Greek it means certainly 'a manger,' as in Herodotus, ix. 70, and possibly 'a stall,' as in Pindar, *Ol.* xiii. 131. We cannot go so far as Dr. Wordsworth, who says on St. Luke ii. 7, that by the LXX. *phatne* is not used for 'manger' but for 'stall' only, because in such passages as Job xxxix. 9, and Hab. iii. 17, and Is. i. 3, there is nothing to decide the point; but Prov. xiv. 4 seems decisive that *phatne* does mean a stall or stalled place. The A. V. indeed there translates, 'where no oxen are the (phatnæ) crib is clean,' but it must be evident that the manger is not likely to be less clean through the presence of oxen: that which is defiled is the stall. Thus ἐκφαρνίσματα means dung removed from the stall. It may perhaps be doubted whether the word crib, which appears here in the earlier versions as well as in the A. V., did not itself mean a stall or 'fold for cattle'—a meaning assigned to it by Halliwell. Moreover, the Hebrew

word for φάτναι here means, according to Gesenius, 'stable.' On the whole, we take up St. Luke with the notion that *phatne* has the meaning both of a manger and a stalled-place where cattle stand and eat, and that it is an open question whether the one meaning or the other was most present to the mind of the evangelist. Now, we find him saying (ii. 7), that Mary 'swathed the child, and laid him in the phatne, because there was not room for them in the inn.' (Not the received, but the more probable reading here is ἐν φάτνῃ, omitting the article, which is so far important, inasmuch as any phatne, and not necessarily that belonging to the inn, may then be designated.) Again, as a direction to the shepherds (ii. 12), 'Ye shall find a babe swathed lying in a phatne.' Again (ii. 16), 'They found Mary and Joseph, and the babe lying in the phatne.' The reader will bear in mind that in this account, if *phatne* mean manger, there has been no direct mention of any *stable* at all, and we are then told that the mother placed her babe in the manger (or a manger) because there was no room for them in the inn. But, as Wordsworth says, 'It was not necessary that he should be laid in the manger, because there was no room in the inn: the word manger and the word inn are not in any way contrasts. We could well understand, on the other hand, how a stall, or stalled place for cattle, should be resorted to, the inn being full. We think, however, that if the inn was full, the stable of the inn would be full also, and that both criticism and common sense lead to the conclusion that the *phatne* was not attached to the inn.'

Again, the direction to the shepherds seems rather to refer to a stall-place than to a manger; and where are we to suppose the parturition itself to have taken place? As, in the following passage from Bishop Andrewes, we constantly find the mention of the stable assumed: 'When ye come to Bethlehem, never search in any house or chamber, in a stable there shall you find a 'babe swaddled and laid in a manger.'

In the fourth passage of St. Luke (xiii. 15), where the meaning might be considered more doubtful, this word is in the A. V. translated stall.

Having considered St. Luke's account of the nativity, we conclude from itself, that he speaks nothing of a manger, but only of a stalled-place for cattle. This view is not contradicted by the earlier Christian notices of the scene of this great event. Thus, Justin Martyr says that Joseph, 'not finding in that village a place to rest at, rested in a certain cave near it, and there Mary brought forth the Christ, and laid him in a phatne,' *i. e.*, as we conceive, in one of the stalls with which the cave was furnished, it being well known that such excavations are commonly used for housing cattle in the East. The testimony of Justin belongs to the middle of the 2d century, and the date of the Protevangel of James is probably not much later. Now, in this apocryphal gospel, the parturition is described as taking place a little before the arrival at Bethlehem, in a cave, without any mention of a *phatne*, in which, however, Mary hides the babe afterwards, at the time of the slaughter of the Innocents. In what Tischendorf calls the *Pseudo-Matthæi Evangelium*, there is the same distinction between the cave and the *phatne* observed. But Origen says distinctly, that 'the cave is shown, and in it the *phatne* in which he was

swathed.' Now, in a manger, this operation of swathing could not have been performed at all. But how then are we to account for the diffusion through Christendom of the belief that 'the heaven-born child,' as Milton has it, 'in the rude manger lay?' No doubt, it is a very easy step from a stall to a manger, if indeed in the East there was any distinction betwixt the two, and probably the fitness of a manger, such as was in ordinary use in the West, suggested to western Christians that the word *præsepe*, which in Latin amply represents the ambiguity of the Greek *phatne*, must stand for manger. Thus, in our own tongue, the words 'crib' and 'cratch' are as much equivalents for a child's sleeping-place as is the word 'cradle.'

We come now to the fact of the visit of Helena, A.D. 325, and the building by her, over a grotto at Bethlehem, of the Basilica or Church of the Nativity, the nave of which, according to Stanley, yet remains. In the year 642 the wooden cradle or manger, referred to below, was deposited at Rome. Bishop Arculf, whose visit is assigned, doubtfully, to the beginning of the 8th century, appears to have been shown 'a sort of natural half cave, the outer part of which is said to have been the place of our Lord's birth; the inside is called our Lord's manger.' And, in the 9th century, Bernard the Wise speaks of the manger of our Lord on the west side of the crypt. Then, in the 12th, Sæwulf sees, near the place of the nativity, 'the manger where the ox and ass stood, when the child was placed before them in it.' In the 14th century Maundeville saw the place where our Lord was born, 'which is full well made of marble, and full richly painted with gold, silver, azure, and other colours. And three paces from it is the crib of the ox and the ass. And beside that is the place where the star fell.' Hasselquist, in the year 1751, 'descended some steps under ground to come into the *cave* where these two places are shown, viz., on the left hand the place where the infant was born, and on the right where he was laid in the manger.' The American, Stephens, describes this manger: 'On the right, descending two steps, is a chamber paved and lined with marble, having at one end a block polished and hollowed out; and this is the manger in which our Saviour was laid.' If, however, Stephens supposed that no other claims could be set up, he was mistaken, as will be seen in the following extract from Dr. Stanley. From the nave of the church 'we descend to that subterranean vault over which and for which the whole structure was erected. There, at the entrance of a long winding passage, excavated out of the limestone rock, of which the hill of Bethlehem is composed, the pilgrim finds himself in an irregular chapel, dimly lighted with silver lamps, and containing two small recesses nearly opposite each other. In the northernmost of these is a marble slab, which marks the supposed spot of the nativity. . . . In the southern recess, three steps deeper in the chapel, is the alleged stall in which, according to the Latin tradition, was discovered the wooden manger or 'præsepe' now deposited in the magnificent Basilica of S. Maria Maggiore at Rome, and there displayed, under the auspices of the pope, every Christmas-day.' Dr. Stanley's own opinion, as to this grotto being the true scene of the Nativity, appears to have been pretty evenly balanced; the natural features he thought unfavourable to the

identity, but the early reverence of the spot favourable to it. [CARAVANSERAI; BETHLEHEM.]

W. L. M.

MANLIUS, T., the name of one of the ambassadors who is said to have written a letter to the Jews, confirming whatever concession Lysias had granted them. Four letters were written to the Jews, of which the last is from 'Quintus Memmius and Titus Manlius (LXX., Κόιντος Μέμμιος, Τίτος Μάνλιος; Alex. Μάνιος; Vulg. *Quintus Memmius et Titus Manilius*), ambassadors (πρεσβύτεροι) of the Romans' (2 Maccab. xi. 34). There is not much doubt that the letter is a fabrication, as history is entirely ignorant of these names. Polybius (*Reliq.* xxxi. 9. 6), indeed, mentions C. Sulpitius and *Manius* Sergius, who were sent to Antiochus IV. Epiphanes about B.C. 163, and also (*Reliq.* xxxi. 12. 9) Cn. Octavius, Spurius Lucretius, and L. Aurelius, who were sent into Syria in B.C. 162 in consequence of the contention for the guardianship of the young king Antiochus V. Eupator, but entirely ignores Q. Memmius or T. Manlius. We may therefore conclude that legates of these names were never in Syria. The true name of T. Manlius may be *T. Manius*, and as there is not sufficient time for an embassy to have been sent to Syria between the two recorded by Polybius, the writer may have been thinking of the former.

The letter is dated in the 148th year of the Seleucidan era (= B.C. 165), and in this year there was a consul of the name of *T. Manlius* Torquatus, who appears to have been sent on an embassy to Egypt about B.C. 164, to mediate between the two Ptolemies, Philometor and Euergetes (Livy, xliii. 11; Polyb. *Reliq.* xxxii. 1, 2).

The employment of this Seleucidan era as a date, the absence of the name of the city, and especially the fact that the first intercourse of the Jews and Romans did not take place till two years later, when Judas heard of the fame of the Romans (1 Maccab. viii. 1, seq.), all prove that the document is far from authentic.

The three other letters do not merit serious attention (2 Maccab. xi. 16-33; cf. Wernsdorff, *De fid. Libr. Maccab.* sec. lxi.; Grimm, *Exeg. Handbuch*, ad loc.)—F. W. M.

MANNA. [MAN.]

MANOAH, father of Samson. [SAMSON.]

MANSLAYER. [KINSMAN.]

MANTLE. This, in the A. V., is the term used to render *four* Hebrew words, viz.—

1. מַנְתֵּי, a feminine noun, from מָנִית, 'ample,' and therefore probably meaning a large over-garment like the Roman *pallium*. The LXX. render it by *μηλωτή* (a sheep's skin), 1 Kings xix. 13, etc.; *δερβίς*, Zech. xiii. 4; and *δωρά*, Gen. xxv. 25. From the passages in which it is mentioned we can conjecture its nature. It is used most frequently (1 Kings xix.; 2 Kings ii. 8, 13, etc.) of Elijah's 'mantle,' which was in all probability a mere sheepskin, such as is frequently worn by dervishes and poor people in the East, and which seems, after Elijah's time, to have been in vogue among the prophets (Zech. xiii. 4). St. John's dress was of a similar rough description, and we see from Heb. xi. 37 (*ἐν μηλωταῖς, ἐν αἰγίοις δέρμασιν*) that such garments were regarded as a mark of poverty

and persecution. The word *addereth* twice occurs with the epithet עֵצֶר, or 'hairy,' Gen. xxv. 25; Zech. xiii. 4. On the other hand, it is sometimes undoubtedly applied to royal and splendid robes, and is even used to mean 'magnificence' in Ezek. xvii. 8 ('vine of magnificence') and Zech. xi. 3. It is the expression for the 'goodly Babylonish garment' stolen by Achan, and the 'robe' worn by the king of Nineveh (Josh. vii. 21; Jonah iii. 6). The connection between two meanings apparently so opposite is doubtless to be found in the etymology of the word (from אָמַץ, 'ample'), or in the notion of a dress richly lined or trimmed with costly furs.

2. כִּמְצִיָּה, which in the A. V. is variously rendered, 'mantle,' 'robe,' 'cloak,' and in the LXX., ἐπεσώτης, διπλοῖς, ὑποδότης, ποδῆρης, χιτῶν. Josephus calls it μεσῆρ. It is a general term derived from כָּעַל, 'to cover,' and is most frequently applied to 'the robe of the ephod' (Exod. xxviii. 4, and *passim*; Lev. viii. 7), which is described as a splendid under-tunic of blue, wrought on the hem with pomegranates of blue, purple, and scarlet, with golden bells between them. It came below the knees, being longer than the ephod, and shorter than the *citoneth*. It was a garment of unseamed cotton, open at the top so as to be drawn over the head, and having holes for the insertion of the arms (Joseph. *Antiq.* iii. 7. 4; Jahn, *Arch. Bibl.*, sec. 122, E. T.; Brautius, *de Vest. Sac.*, p. 436; Schröder, *de Vest. Mul.*, p. 237, etc.). It was worn, however, not only by priests, like Samuel (1 Sam. ii. 19; xv. 27; xxviii. 14), but by kings and princes (*Saul*, 1 Sam. xxiv. 4; *David*, 1 Chron. xv. 27), and rich men (*Ezra*, ix. 3-5; *Job* and his friends, i. 20; ii. 12), and even by king's daughters (2 Sam. xiii. 18), although in the latter case it seems to have had sleeves (see Gesen., *Thes.*, p. 811). Properly speaking, the *meil* was worn under the *simlah*, or outer garment, but that it was often itself used as an outer garment seems probable from some of the passages above quoted.

The two other words rendered 'mantle' in the A. V. are both of them ἀπᾶς λεγόμενα, viz.—

3. שִׁמְרִיָּה (Judg. iv. 14), the garment (*marg.* 'rug,' or 'blanket') used by Jael to fling over the weary Sisera as a coverlid (LXX. ἐπιβάλαιον, but δερβίς appears to have been the reading of Origen and Augustine). The word is derived from שָׁמַר, *imponere*, and is evidently a general term. Hesychius defines ἐπιβάλαιον by πῶμα ἢ ῥάκος, and Suidas by τὸ τῷ προτέρῳ ἐπιβαλλόμενον. The word used in the Targum is שִׁמְרִיָּה, which is only the Greek καυνάκη, and the Latin *gaunacum*; and this word is explained by Varro to be 'majus sagum et amphimallon' (*De Ling. Lat.*, iv. 35), i.e., a larger cloak woolly on both sides. Hesychius differs from Varro in this, for he says καυνάκη στρώματα ἢ ἐπιβάλαια ἑτερομαλλῆ, i.e., woolly on one side; the Scholiast on Aristophanes, adds that it was a Persian, and Pollux that it was a Babylonian robe (Rosenmüller, *Schol.*, ad loc.). There is therefore no reason to understand it of a curtain of the tent, as Faber does. Since the Orientals constantly used upper garments for bedding, the rendering 'mantle,' though inaccurate, is not misleading (cf. Ruth iii. 9; Ezek. xvi. 8, etc.).

4. מַעֲטָפֹת. This word only occurs in Is. iii.

22. It was some article of female dress, and is derived from עָטַף, 'text.' Schröder, the chief authority on this subject, says it means a large exterior tunic with sleeves, worn next to the pallium (*De Vest. Mul.*, xv. 247-277). In this same verse, and in Ruth iii. 15, occurs the word מַעֲטָפֹת, A. V. 'wimples,' which appears to have been a sort of square covering like a plaid (Michaelis, *Supplem.*, 1021; Rosenmüller, *Schol.*; Is. iii. 22). We cannot find the shadow of an authority for Jahn's very explicit statement, that both these words mean the same article, מַעֲטָפֹת being the fashion for the winter, and מַעֲטָפֹת for the summer; though his assertion that 'it covered the whole body from head to foot' may be very true (Jahn, *Arch. Bibl.*, sec. 127, E. T.).

For other terms, such as שִׁמְלָה (Gen. ix. 23, etc.), χλαμύς (Matt. xxvii. 28), στολή (Mark xii. 38), etc., see DRESS. The φελόνης (A. V., cloke) to which St. Paul makes such an interesting allusion in 2 Tim. iv. 13 seems to have been the Latin

*panula* (cf. פִּלִּינ), a sort of travelling-cloak for wet weather. A great deal has been written about it, and at least one monograph, Stosch, *Dissert. de Pallio Pauli*, Lugd. 1709. Even in Chrysostom's time some took it to be τὸ γλωσσοκομον ἔνθα τὰ βιβλία ἔκειτο (a sort of travelling-bag), and Jerome, Theophylact, Grotius, etc., shared in this opinion (Schleusner, *Lex. N. T.*, s. v. φαλόνης).—F. W. F.

MANTON, THOMAS, D.D., an eminent puritan divine, born A.D. 1620, at Lawrence-Lydiard, in Somersetshire. He was entered at Wadham College, Oxford, at the early age of fifteen, and before the completion of his twentieth year was ordained by Joseph Hall, then Bishop of Exeter. After labouring a short time at Colyton, in Devonshire, he removed to London, and in 1643 was presented to the living of Stoke-Newington. In 1650 he was presented to the rectory of St. Paul's, Covent Garden, by the Earl (afterwards Duke) of Bedford, and here he remained until ejected by the Act of Uniformity. He was created B.D. at Oxford 20th April 1654, and D.D. 19th November 1660 (Wood, *Athen. Oxon.*, f. 107, 137). As a preacher he was most highly esteemed by his contemporaries, and as a practical expositor of Scripture was probably surpassed by none. He took a leading part in the religious movements of his times, and was distinguished for his moderation and soundness of judgment. Like Baxter, he clung to the last to the hope that a scheme of comprehension might be carried; and he yielded so far as to receive Episcopal institution from Sheldon. The passing of the Act of Uniformity forced him into the ranks of the Nonconformists, and with many others he suffered imprisonment for conscience' sake. He died 18th October 1677, and was buried in the chancel of the church at Stoke-Newington. His Scriptural expositions, which all partake more or less of the character of expository discourses, are the following:—

1. *A Practical Commentary, or an Exposition, with Notes, on the Epistle of James*, Lond. 1651, 4to. 2. *A Practical Commentary on Jude*, Lond. 1652, 4to. 3. *A Practical Exposition of the 119th Psalm*, Lond. 1681, fol. 4. *A Practical Expositi-*

*tion of the Lord's Prayer*, Lond. 1684, 8vo. 5. *A Practical Exposition of the 53d chapter of Isaiah*, Lond. 1703.—S. N.

MANUSCRIPTS, BIBLICAL. These are either Hebrew or Greek; we shall treat of them separately. 1. Jewish MSS. are divided into (a.) *Synagogue rolls or sacred copies*; and (b.) *Private or common copies*.

(a.) The synagogue rolls contain the Pentateuch, the appointed sections of the prophets, or the book of Esther, which last is used only at the Feast of Purim. The three are never put together, but are written on separate rolls. They are in the Chaldee or square Hebrew character, without vowels and accents, accompanied with the *puncta extraordinaria*, and having the unusual forms of certain consonants. The parchment is prepared in a particular manner by the hands of Jews only; and made from the hides of *clean* animals, which, when duly wrought, are joined together by thongs made out of the same material. They are then divided into columns, the breadth of which must not exceed half their length. These columns, whose number is prescribed, must be of equal length and breadth among themselves, and contain a certain number of lines, each line having no more than three words. The Talmud contains strict rules concerning the material, the colour, the ink, letters, divisions, writing-instrument, etc., which are closely followed, especially in the Pentateuch. These rules are extracted from the Talmud, and translated in Adler's *Judeorum Codices Sacri rite scribendi leges ad recte astimandos Codices Manuscriptos antiquos perveteres. Ex libello Talmudico in Latinum conversas et adnotationibus necessariis explicatas, eruditius examinandas tradit*, etc., Hamburg 1779, 8vo. The minuteness of such regulations renders it a most irksome task for the *sopher* or scribe to write out a synagogue roll. The revision of the *Torah*, as the synagogue roll is often called, must be undertaken within thirty days after its transcription, else it is unfit for use. Three mistakes on one side or skin are allowable; but should there be *four*, or should there happen to be an error in the *open* and *close* sections of the law; in the position of the songs in Exod. v. and Deut. xxxii., which are the only portions of the Pentateuch written in poetical lines, then the whole copy is worthless. The great beauty of penmanship exhibited in these synagogue copies has been always admired. They are taken from authentic exemplars, without the slightest deviation or correction. Seldom do they fall into the hands of Christians; since, as soon as they cease to be employed in the synagogue, they are either buried or carefully laid aside, lest they should be profaned by coming into the possession of Gentiles.

(b.) Private MSS. are written partly in the square or Chaldee character, partly in the Rabbinical. They are held in far less esteem than the synagogue rolls, and are wont to be denominated *profane* (*pesulim*). Their form is entirely arbitrary. They are in folio, quarto, octavo, and duodecimo. Of those written in the square character, the greater number are on parchment, some on paper. The ink of the letters is always black, but the vowel points are usually written with ink of a different colour from that of the consonants. Initial words and letters are frequently decorated with gold and silver colours. The prose parts are arranged in

columns; the poetic in parallel members. Some copies are without columns. The columns are not always occupied with the Hebrew text alone; for a version is frequently added, which is either written in the text after the manner of verses, or in a column by itself, or in the margin in a smaller character. The number of lines is not prescribed by the Talmud. The upper and lower margin are filled with the Great Masora, and sometimes with a Rabbinical commentary; as also with prayers, psalms, and the like. The external margin is for corrections, scholia, variations, notices of the *haphtharoth* (sections from the prophets), *parshioth* (sections from the law), the commentaries of the Rabbins, etc. etc. The inner margin, or that between the columns, is occupied with the little Masora. The single books of the O. T. are separated from one another by spaces, except the books of Samuel, Kings, Chronicles, Ezra, and Nehemiah, which are written continuously. The sections of the law and prophets are generally marked. In the MSS. of different countries the books are differently arranged. These copies generally pass through various hands before they are finished. The consonants proceed from the *sopher* or scribe. When the same person writes both consonants and vowels, as is frequently the case—he never makes them at the same time—the former are finished before he begins to append the latter. The *K'ris* in the margin uniformly proceed from the vowel-writer. It is probable that these copies were in no instance made by Christians.

Although the square character be employed in all the MSS. of which we have spoken, yet it has varieties. The Jews themselves distinguish in the synagogue rolls—1. the *Tam* letter, with sharp corners and perpendicular coronulæ, used among the German and Polish Jews; 2. the *Vilshé* letter, more modern than the *Tam*, and rounder, with coronulæ, particularly found in the sacred copies of the Spanish and Oriental Jews.

The age of Hebrew MSS. is not easily determined. It is true that they often contain subscriptions giving an account of the time when they were written, and the name of the scribe, or also of the possessor. But these accounts are often ambiguous, occasionally incorrect. Where they are altogether wanting, it is still more difficult to discover the age. In the latter case, the character of the writing, the colour of the ink, the quality and complexion of the parchment, the absence of the Masora, of the vowel-points, of the unusual letters, etc., have been chiefly rested upon. Still, however, such particulars are uncertain marks of age.

The oldest Hebrew MS. known to Kennicott or De Rossi was 634 of De Rossi, a mere fragment containing small portions of Leviticus and Numbers. According to its former possessor, it belongs to the 8th century. So much uncertainty attaches to the internal marks adopted by these two Hebraists, that the ages to which they assign several Hebrew MSS. are gratuitous. Since Pinner examined a number of MSS. belonging to the Bible Society of Odessa, older ones are now known. The most ancient is that which he marks No. 1, a Pentateuch roll on leather. The subscription states that the MS. was corrected in the year 580; and therefore it must have been written earlier. Hence the roll must be above 1280 years. Pinner expresses no doubt of the correctness of the subscription, which, if genuine, proves it to be the oldest known MS.

It was brought from Derbend in Daghestan, and is now at St. Petersburg. Nos. 5 and 11 of Pinner are assigned to the 9th century; No. 13 seems as old; and No. 3 belongs to the 10th century. We suspect, however, the accuracy of some of the dates.

In the Imperial public library at St. Petersburg, there is a collection of Hebrew MSS. made by Mr. Firkowicz, containing several very ancient ones. The oldest date is in a roll found in a Karaite synagogue in the Crimea, viz., A.D. 489. But that date is very suspicious. Several fragments of rolls give, as the dates of purchase or dedication, A.D. 639, 764, 781, 789, 798, 805, 815, 843, 848. Are these dates genuine? We shall know more of the MSS., and their age, when Neubauer shall have finished his collation.

A few of the oldest Hebrew MSS. may be briefly described here.

No. 1, Pinner. This is a Pentateuch roll on leather, containing the five Mosaic books complete. It has no vowels, accents, or Masorah. The roll consists of forty-five pieces. As to the form of the letters, it differs considerably from the present one. This is particularly observable in the case of **במלוגא**. The variations in the text from the Masoretic recension are few and inconsiderable. The MS., according to the subscription, was corrected in the year 580, consequently the roll must have been written upwards of 1280 years. If the subscription be genuine, it is the oldest MS. known, except that one in the Firkowicz collection, dated 489.

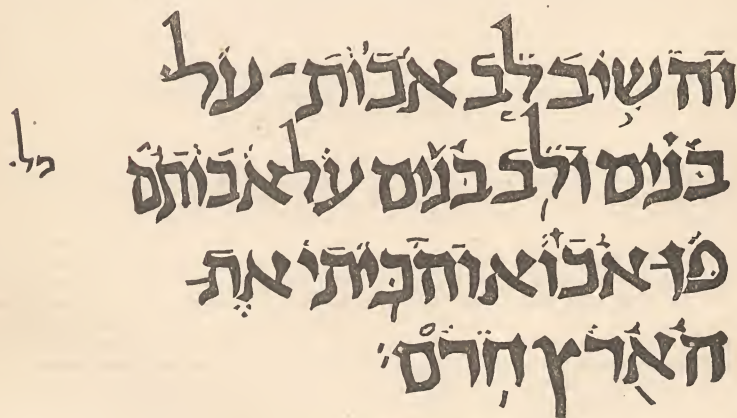

No. 634, De Rossi, quarto. This is but the

fragment of a MS., containing Lev. xxi. 19–Num. i. 50. It is on parchment, without the vowel-points, Masorah, or K'ris. It has also no interval between the parshioth or sections. But there are sometimes points between the words. It belongs, in De Rossi's opinion, to the 8th century, and is corroded by age. The character of the letters is intermediate, approaching the German. Now at Parma.

No. 5, Pinner. This is a roll of the Pentateuch, but incomplete. The writing begins with Num. xiii. 19. The form of the letters is very different from the present one. It is carelessly written; words and letters being frequently omitted. The subscription states that it was written A.D. 843.

No. 11, Pinner. This is a fragment of a synagogue roll beginning with Deut. xxxi. 1. The date is 881.

No. 503, De Rossi, in quarto. This is a MS. of the Pentateuch, made up of different pieces. It begins with Gen. xlii. 15, and ends with Deut. xv. 12. There is a chasm in it from Lev. xxi. 19 to Num. i. 50, because De Rossi separated this portion, thinking it to be older than the rest, and characterised it as an independent fragment by the No. 634. The vowel-points are attached, but not throughout, evidently by the same hand as that which wrote the consonants. There are no traces of the Masorah or K'ris. Sometimes its readings have a remarkable agreement with those of the Samaritan text and ancient versions. De Rossi places the various pieces of which it is made up, in the 9th and 10th centuries.

346. Odessa MS. (Mal. iv. 6).

No. 3, Pinner, small folio. This MS. contains the greater and lesser prophets, on 225 leaves. Every page is written in two columns, between which, as well as below, and in the outer margin, stands the Masorah. Every column contains twenty-one lines. After each verse are two points, to which, without any interval, a new verse succeeds. The vowels and accents, as well as the greater and lesser Masorah, are wholly different from the Masoretic. The former are placed above the consonants. The first page has a twofold pointing, viz., above and below, but this does not occur again except occasionally in verses or words. From Zech. xiv. 6 to Mal. i. 13 there is no punctuation, and the first three verses of Malachi alone have been pointed

much later in the manner now usual. The whole codex is very correctly written. The form of the consonants differs considerably from the present text. The various readings of this MS., according to Pinner's collation, are numerous and important. The date is 916. Two others in the same collection, Nos. 15 and 16, have the same vowel and accent system, i.e., the Babylonian or Eastern, which originated in the 6th century, and from which in the 7th that of the Westerns, or the school of Tiberias, was developed. Pinsker has written ably on the subject (*Einführung in das Babylonisch-Hebräische Punktationssystem*, u. s. w., Wien 1863), reviewed by Fürst in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, 18 Band, p. 314, c<sup>t</sup> seq.

No. 13, Pinner, in folio. This is an incomplete MS., consisting of 115 leaves, on good parchment, containing 2 Samuel from vi. 10 to the end, and the books of Kings. Each page has three columns, between which, as also at the sides of the text, stands the Masorah. The vowels and accents are different from those now in use. The text has many and important readings; and the Masorah deserves to be examined. Two points stand after each verse; and 2d succeeds 1st Kings without a vacant space between. An inscription states that the MS. was purchased 938. It is obviously an important codex.

Codex 590, Kennicott, fol. This MS. contains the Prophets and Hagiographa on parchment. The text has the vowel-points, but apparently from a later hand. The margin does not exhibit the Masorah, but variations are noted here and there. Some books have the final Masorah. The separate books have no titles, and they are arranged in the oldest order, Jeremiah and Ezekiel coming before Isaiah, and Ruth before the Psalms. According to the subscription it was written A.D. 1019, or 1018 by another reckoning. The MS. is in the Imperial library of Vienna.

— Pinner, small folio. A MS. containing the Pentateuch, Prophets, and Hagiographa, on good parchment. Every page has three columns, except in Psalms, Job, and Proverbs, where there are but two. The text is furnished with vowels and accents, two points standing after each verse. The letters and accents are like those in No. 3 of Pinner. The great and little Masorah are in the margins. Being a Karaite MS. it has not been written with great accuracy. Words and verses are sometimes repeated. It is highly ornamented with gold and silver colours. The codex states that it was written in Egypt in the year 1010.

The most important and oldest Hebrew MSS. collated by Kennicott, Bruns, De Rossi, Pinner, and others, are described in Davidson's *Biblical Criticism*, vol. i. p. 346, *et seq.*; and his *Text of the Old Testament considered*, etc. etc., p. 98 *et seq.* See also the *third* section of Tychsen's *Tentamen de variis Codicum Hebraicorum Vet. Test. MSS. generibus*, etc., Rostock 1772, 8vo, in which the learned writer examines the marks of antiquity assumed by Simon, Jablonski, Wolf, Houbigant, Kennicott, and Lillienthal, and shows that the *Masorah alone* is a certain index for determining the age and goodness of Hebrew MSS.; the same writer's *Bewrtheilung der Jahrzahlen in den Hebräisch-Biblischen Handschriften*, Rostock 1786, 8vo, in which the mode of determining the age of MSS. adopted by Kennicott, Bruns, and De Rossi, is rejected; and Schnurrer's *Dissertatio Inauguralis de Codicum Hebraicorum Vet. Test. aetate difficulter determinanda*, Tübingen 1772, 4to, reprinted in his *Dissertationes Philologico-Criticae*, Gotha and Amsterdam 1790, 8vo.

Private MSS. written in the *Rabbinical character* are much more recent than the preceding; none of them being older than 500 years. They are on cotton or linen paper, in a *cursive* character, without vowel-points or the Masorah, and with many abbreviations.

The MSS. found among the Chinese Jews are partly synagogue rolls, partly private copies, whose text does not differ from the Masoretic. The Pentateuch of the Malabar Jews brought from India to England by the late Dr. Buchanan, and described

by Mr. Yeates, resembles on the whole the usual synagogue rolls of the Jews, except that it is written on red skins. Its text is the Masoretic, with a few unimportant deviations.

Eight exemplars are celebrated among the Jews for their correctness and value. They are now lost, but extracts from them are still preserved. From Jewish writings, and from the margin of some MSS., where a reference is made to them, we learn that they were highly prized for their singular accuracy. They formed the basis of subsequent copies. They are—1. The codex of Hillel; 2. The Babylonian codex; 3. The codex of Israel; 4. An Egyptian codex; 5. Codex Sinai; 6. The Pentateuch of Jericho; 7. Codex Sanbuki; 8. The book Taggin. For a more copious account of Hebrew MSS. we refer to Eichhorn's *Einleitung* (Introduction), vol. ii.; Kennicott's *Dissertatio generalis*; Walton's *Prolegomena to the Polyglott*, separately edited by Dathe and Wrangham; Tychsen's *Tentamen*; De Rossi's *Varia Lectiones Vet. Test.*, etc.; and his *Scholia critica in V. T. libros*, etc.; De Wette, *Lehrbuch der Historisch-Kritischen Einleitung*; Davidson's *Treatise on Biblical Criticism*; and his *Introduction to the Old Testament*, in Horne.

II. We have now to refer to the MSS. of the Greek Testament. Those that have descended to our time are either on vellum or paper. The oldest material was the Egyptian papyrus; but even so early as the 4th century, the N. T. was written on the skins of animals. This writing material continued in use till the 11th century, when paper began to be employed. Till the 10th century, MSS. were usually written in *capital* or *uncial* letters; then the cursive character came into use. The most ancient copies have no divisions of words, being written in a continued series of lines. Accents, spirits, and iota postscripted or subscribed, are also wanting.

The whole of the N. T. is contained in very few MSS. Transcribers generally divided it into three parts; the first, containing the four Gospels; the second, the Acts of the Apostles and the Epistles; the third, the Apocalypse of St. John. The greatest number of MSS. are those which have the four Gospels, because they were most frequently read in the churches. Those containing the Acts and Epistles are also numerous. Such as have the book of Revelation alone are extremely few, because it was seldom read in public.

Greek codices are not often complete in all their parts. They have many chasms. Again, some contain merely detached portions of the N. T., or sections appointed to be read on certain days in the churches. Such codices are called *ἀναγνώσεις* or *ἀναγνώσματα* in Greek; in Latin *lectionaria*. Those containing lessons from the Gospels are called *evangelistaria*; such as were taken from the *Acts* *πραξιαποστολοι*; those from the epistles, *epistolaria* or *ἀποστολοι*.

Several MSS. are accompanied with a Latin translation *interlined*, or in a *parallel column*. Such have been called *bilingues*, or *Græco-Latini*.

We shall now advert to the uncial MS. of the Greek Testament, and to those usually quoted in the examination of the controverted passage 1 John v. 7. The former are marked with the letters of alphabet A, B, C, etc.

A. *Codex Alexandrinus*, presented by Cyril Lucar, patriarch of Alexandria, and afterwards of

Constantinople, to Charles I., now in the British Museum. It is on thin vellum, and contains the whole Bible; the Septuagint version of the O. T., bound in three folios; and the N. T. in one. It has various chasms. A fac-simile of the N. T. portion was published by Dr. Woide, in a folio volume, London 1786. Mr. Baber of the British

Museum executed the O. T. in the same manner, in four folio volumes, London 1816-28; the fourth volume containing the *prolegomena and notes*. The N. T. portion was reprinted in 1860 under the editorship of Mr. Cowper. This MS. was written at Alexandria, and belongs to the 5th century.

347. Cod. Alexand. (Ps. iii. 2, 3; 1 John v. 7).

B. *Codex Vaticanus*, 1209, in the Vatican, containing the O. and N. T. It is defective in several places: in the greater part of Genesis and part of the Psalms; in Heb. ix. 14 to the end; the Apocalypse; and pastoral Epistles. Some of these chasms have been supplied by a more recent hand. The text was at first without breathings or accents, which were subsequently added. Each page has three columns, except in some places of the O. T. It belongs to the middle of the 4th century, having neither the Ammonian sections, the Eusebian

papers in the library of Trinity College, Cambridge, by Tischendorf, accompanied with a partial collation of the MS. made by Thomas Bentley. In 1857 Angelo Mai's Greek Bible was published from the MS., 5 vols. 4to. Reprints of the N. T. were edited by Vercellone (1859), Kuenen and Cobet (1859), and at London (1859), of which the first is the best. The editions of the Greek Testament, by Ed. von Muralt (1846 and 1848), Philipp Buttmann (1860 and 1862), are founded wholly or chiefly on the text of the same MS. But we have not yet a perfectly accurate transcript of all its readings. Tischendorf's *Novum Testamentum ex cod. Sinaitico notata lectione Vaticana itemque Elzevir.*, gives the best collation of the readings of the Vatican which we yet possess.

B. *Codex Vaticanus*, 2066, *olim Basilianus* 105, in the Vatican Library, a MS. of the Apocalypse which it contains entire. It belongs to the 8th century. From Tischendorf's readings, published in his *Monumenta Sacra inedita*, p. 407, etc., and Mai's text in his edition of the Greek Bible, an accurate knowledge of its contents may be obtained (see Tischendorf's *prolegomena* to the 7th edition, pp. xcii., xciii.)

N. *Codex Sinaiticus*, a MS. of the O. and N. T. brought from the convent of St. Catherine on Mount Sinai by Tischendorf. It consists of 345 leaves and a half, 199 in the O. T. and 147 in the N. T. Besides the N. T., it has Barnabas and Hermas at the end. The O. T. part has considerable chasms, but the N. T. is complete. There are four columns in each page. The character of the letters, the inscriptions and subscriptions to different books, the absence of the Ammonian sections and Eusebian canons, the nature of the readings, and other peculiarities, agree in a remarkable manner with B, or the Vatican. Tischendorf supposes that it is somewhat older than B, belonging

348. Cod. Vatican. (Rom. iv. 4; 2 Cor. iii. 15, 16).

canons, nor the Euthalian sections. Three collations of the N. T. part have been made: one by Bartolucci; another for Bentley, by an Italian called Mico; and a third by Birch. As the collation of Mico did not give the readings, which were a *prima manu* in corrected passages, but merely the later corrections, Bentley got the Abbé Rulotta to re-examine the MS. in these places. The notes of this re-examination were discovered among Bentley's

to the 4th century. Probably it is of the 6th century, though made from a text older than that of B. The copyist, writing perhaps from dictation, has made many blunders. The value of this acquisition to the critical apparatus of the Bible can hardly be over-estimated. In Tischendorf's *Notitia editionis codicis Biblicorum Sinaitici*, etc., 1860, small folio, the indefatigable critic has given nine pages entire from the N. T., eight from the O. T., and one from the epistle of Barnabas and the Shepherd of Hermas (p. 22, *et seqq.*) He has also furnished upwards of six hundred readings from all the books of the N. T. (p. 14, *et seqq.*) A fac-simile is appended. Tischendorf has likewise printed a brief *Notitia codicis* to accompany the seventh edition of his Greek Testament, of the same size. It may be remarked, that the *Codex Sinaiticus* agrees with B in omitting the last twelve verses of Mark's Gospel; that it has *ὡς ἐφανερώθη*, not *θεός*; that it omits the passage respecting the woman taken in adultery (John vii. 53-viii. 11); agrees with B in omitting *ἐν ἐφῄσω* in Eph. i. 1 (*a primâ manu*); wants the doxology in Matt. vi. 13, as do B D Z; agrees with B in reading *τὴν ἐκκλησίαν τοῦ Θεοῦ* (Acts xx. 28); with B C D\*\* in having *οὐδενος λογοῦ ποιῶμαι τὴν ψυχὴν τιμᾶν ἑμαυτῶ* (Acts xx. 24), and has *μονογενὴς Θεός* with B C L in John i. 18—a reading undoubtedly wrong. The MS. has been published at St. Petersburg in fac-simile (4 vols. fol.) In 1863 the N. T. part was published at Leipzig, 4to, with columns the same as the original. Scrivener has also printed its readings in a small vol. (1863), and Hansell has added them to his edition of the N. T. (1864).

349. Cod. Sinait. (1 Tim. iii. 16).

C. *Codex Regius*, or *Ephraemi rescriptus*, now in the Imperial Library at Paris, where it is numbered 9. This MS. was probably written in Egypt in the 5th century. It was subsequently corrected about a century after. It was revised a second time about the 9th century, at Constantinople. In the 12th century the old writing was erased with a sponge, to make room for various treatises in Greek of Ephrem the Syrian. It now contains fragments of the O. and N. T., which were published entire

for the first time by Tischendorf, 1843, 1845 (2 vols. 4to). This scholar was permitted to apply the Giobertine tincture for the purpose of bringing out the original characters (see Tischendorf's prolegomena to vol. i.) In the N. T. it has portions of the Gospels, Acts, Catholic and Pauline Epistles.

D. *Codex Cantabrigiensis*, or *Bezae*.—This MS. was presented, in 1581, to the University of Cambridge, by Theodore Beza. It is a Greek-Latin MS. of the four Gospels, and the Acts of the Apostles, with a single fragment of the Catholic Epistles. Its age is probably the *sixth* century. Kipling, Hug, and Schulz think that it was written in Egypt; but Scholz has given some reasons for assigning it to the south of France, which are not without weight. Credner assents to the latter opinion, as far as the MS. is concerned; while he thinks that the text is of Jewish-Christian origin, and attributes it to Palestine. The text is written stichometrically, without separation of words and accents, with many corrections and supplements by different hands. Great diversity of opinion has prevailed respecting the quality of its readings. Bishop Middleton, at the end of his work on the Greek article, depreciated it. Matthæi had done so before. Both unduly lessened its value. Whiston, Harwood, and Bornemann magnified it too highly. The original text, without correction and revision, is ancient and valuable, agreeing substantially with B. Dr. Kipling published a fac-simile of it at Cambridge, 1793, 2 vols. folio. This is so inaccurate that Scrivener has collated and published the readings anew.

D. *Claromontanus*, or *Regius*, in the Imperial Library at Paris, No. 107, marked by the same letter of the alphabet as the preceding, but containing a different part of the N. T., viz., all Paul's Epistles with the exception of a few verses. It is a Greek-Latin MS., written stichometrically, with accents and breathings, but without division into words. According to Montfaucon, it belongs to the 7th century; but Tischendorf assigns it to the 6th. The text was edited by the latter scholar in 1852, and is very valuable. Various correctors may be traced, but it is not easy always to distinguish them. The first readings are of course the principal ones (see the prolegomena to Tischendorf's edition.)

E. *Codex Basilensis*, K. iv. 35 in the public library at Basel. It contains the Gospels, with a very few chasms in Luke's. In some parts smaller writing has taken the place of the older. It belongs to the middle of the 8th century, and was collated by Tischendorf in 1843. See his description in the *Studien und Kritiken* for 1844.

E. *Codex Laudianus*, a Greek-Latin MS. in the Bodleian Library at Oxford. The text is written stichometrically. It contains the Acts, and has a hiatus from xxvi. 29 to xxviii. 26. Its age is the end of the 6th century, as Tischendorf supposes; or the 7th, as Wetstein prefers. The readings are very valuable. Hearne published an edition at Oxford 1715, 8vo; and Tischendorf proposes to publish it more correctly in a future volume of his *Monumenta Sacra*. But Scrivener has already undertaken a new edition.

E. *Sangermanensis*, in the Imperial Library of St. Petersburg; a very incorrect transcript of the *Codex Claromontanus*, and therefore possessing no authority or importance. It appears to belong to the 10th century.

F. *Codex Boreali*, now in the Library of Utrecht, containing the Gospels, but with many chasms. It was collated and described by Heringa, whose work was published by Vinke, 1843. The MS. belongs to the end of the 9th century.

F<sup>a</sup>. *Codex Coislinianus*, containing a few fragments of the Gospels, Acts, and Epistles, found among the scholia of Cod. Coislin. i, which has the Octateuch, with the book of Kings. They were edited by Tischendorf in his *Monumenta Sacra inedita*, 1846, p. 400, *et seq.* The fragments belong to the 7th century.

F<sup>b</sup> in the British Museum, 17,136, a *rescript* fragment from the Nitrian desert, containing a few places of St. John's Gospel, which were deciphered and published by Tischendorf in his *Monumenta inedita*, vol. ii. The text agrees with the most ancient and best authorities. Tischendorf assigns the fragment to the 4th century. It rather belongs to the 5th.

F. *Codex Augiensis*, a Greek-Latin MS. of St. Paul's Epistles, in the Library of Trinity College, Cambridge. It wants the Epistle to the Hebrews in Greek, and Romans i. 1-iii. 18. Dots are inserted between many of the Greek and Latin words. The text is ancient and valuable. It belongs to the 9th century. In 1842 and 1849 it was collated by Tischendorf; and edited by Scrivener (1859).

G. *Harleianus*, 5684 in the British Museum, a MS. of the four gospels, but imperfect in many places. It belongs to the 9th or 10th century, and was collated by Tischendorf.

G. *Boernerianus*, a Greek-Latin MS. of Paul's Epistles, now in the Royal Library of Dresden. It has the same chasms as F. *Augiensis*, with which it agrees remarkably; so that both texts seem to have proceeded from the same copy. They belong to one country and age: probably to Switzerland and the 9th century. Matthæi published it in 1791, 8vo.

H. *Codex Seidelii II.*, a MS. of the four gospels, in the public library of Hamburg. It is imperfect in many places, belongs to the 9th century, and was collated by Tregelles in 1850.

H. *Codex Mutinensis*, 196 in the Ducal Library of Modena, a MS. of the Acts with considerable gaps. Its age is the 9th century. From Acts xxvii. 4 till the end was supplied in uncial letters in the 11th century. The Pauline and Catholic epistles were added in cursive letters in the 15th or 16th century. Tischendorf collated it in 1843.

H. *Codex Coislinianus*, No. 102 in the Imperial Library at Paris. This MS. contains fragments of Paul's Epistles. It consists only of twelve leaves, two which it formerly had being now at Petersburg. Another leaf was recently brought by Tischendorf from Mount Athos, containing Col. iii. 4-11. The fifteen leaves should be put together. It has been collated by Tischendorf, who intends to publish it all, and belongs to the 6th century.

I. A MS. in the Library of Petersburg, found by Tischendorf on his travels in the East. It is a *rescript*, containing the remains of seven very ancient MSS. exhibiting parts of the Gospels, Acts, and two Pauline Epistles. Tischendorf thinks that the first, second, and third belong to the 5th century. All are edited by him in the first volume of *Monumenta Sacra*, p. 1, etc.

K. *Codex Regius* or *Cyprinus*, now 63 in the Imperial Library of Paris. It contains the four

gospels complete, belongs to the middle of the 9th century, and was accurately collated by Tischendorf in 1842.

K. *Codex Mosquensis*, xcvi. in the Library of the Holy Synod at Moscow, containing the Catholic and Pauline Epistles. It belongs to the 9th century, and was collated by Matthæi.

L. *Codex Regius*, 62 in the Imperial Library at Paris, containing the gospels entire with the exception of five places. The text of this codex contains very old and good readings. It belongs to the 8th century, and was published by Tischendorf in his *Monumenta Sacra*, p. 57.

L. *Codex Bibliothecæ Angelicæ*, A 2. 15 in the Library of the Augustine Monks at Rome, a MS. containing the Acts, Catholic Epistles, and those of St. Paul. It begins with Acts viii. 10, and ends with Hebrews xiii. 10. Its age is the 9th century. It was first collated with care by Fleck; afterwards by Tischendorf and Tregelles.

M. *Codex Regius*, 48 in the Imperial Library of Paris, containing the gospels entire. This MS. has been transcribed by Tischendorf, but is not yet published. He assigns it to the latter part of the 9th century.

M. Two fragments; one at Hamburg, the other at London. The former contains some parts of the Epistle to the Hebrews; the latter, portions of the Epistle to the Corinthians. Both were published by Tischendorf in his *Anecdota Sacra*, p. 174, *et seq.* The text is both ancient and valuable.

N. *Codex purpureus*. The fragment of a MS., of which four leaves are in the British Museum, six in the Vatican, and two at Vienna. Tischendorf has recently found 33 leaves more, containing about a third of the entire Gospel of Mark, between vi. 53 and xv. 3. The letters were silver on purple vellum. They are larger and rounder than in A B C. The text is in two columns. The Ammonian sections and Eusebian canons are placed in the margin. All contain portions of the gospels. The contents of the twelve leaves were published by Tischendorf in his *Monumenta inedita*, who assigns the fragment to the end of the 6th century.

N. A fragment consisting of two leaves, with Gal. v. and vi. and Heb. v. and vi. Assigned by Tischendorf to the 9th century.

N<sup>c</sup>. A few fragments, now at Moscow, of the Epistle to the Hebrews. Tischendorf thinks they may be of the 6th century; but Matthæi did not state enough to determine their age.

O. A small fragment, consisting of two leaves, containing 2 Cor. i. 20-ii. 12, belonging to the 9th century.

O<sup>i</sup>. *Codex Mosquensis*, No. cxx., at Moscow; a fragment containing eight leaves, containing a few parts of John's Gospel, probably of the 9th century. Matthæi published the text.

O<sup>a</sup>. The two hymns, Luke i. 46-55, and i. 68-79, in a Latin MS. containing the grammar of Pompeius. They are written in uncial Greek letters, and belong to the 9th century. Tischendorf published them in his *Anecdota sacra et profana*, p. 206, *et seq.*

O<sup>b</sup>. The same two hymns, together with a third, Luke ii. 29-32, in a psalter in the Bodleian Library, No. 120, belonging to the 9th century. See Tischendorf, *Anecdota*, p. 206.

O<sup>c</sup>. The hymn of Mary, Luke i. 46-55, contained in the Verona psalter, and belonging to the

6th century. The Greek is in Latin letters. It was published by Blanchini in the *Psalterium duplex* appended to his *Vindicie canoniarum Scripturnarum*, Rome 1740. O<sup>d</sup>. The three hymns of Luke i. and ii., as contained in the *Psalter* of Turin, written in gold and silver letters, belonging to the 7th century. Tischendorf is about to publish the entire *Psalter*. O<sup>e</sup>. The same three hymns in a St. Gall Codex, which he has published in his *Monumenta Sacra inedita* (1860).

350. Cod. Guelph. A (Luke i. 6, 7).

P. A MS. of the Acts, Catholic and Pauline Epistles, and Apocalypse. This is a valuable palimpsest, consisting of upwards of 300 leaves. Though belonging to the 9th century, the text, except in i Peter and Acts, agrees with that of the oldest codices.  
Q. *Codex Guelpherbyanus* B, another palimpsest, containing fragments of Luke and John's Gospels, discovered by Knittel, and published with the last fragments. Tischendorf is about to re-ed it in a more complete and accurate state. According to him, P belongs to the 6th, and Q to the 5th century. Q. This is a papyrus fragment, containing parts of i Cor. i. vi. vii., belonging to the 5th or 6th century.  
R. A rescript MS. belonging to the British Museum, brought from the Nitrian desert, with many other codices, chiefly Syriac ones. The Syriac text of Severus of Antioch was written over it. The forty-eight leaves contain parts of Luke's Gospel. The writing is in two columns; and the Ammonian sections have not the canons of Eusebius. Tischendorf published *almost* the whole text (for some of it is illegible) in his *Monumenta Sacra inedita*, vol. ii. Dr. Wright found three leaves overlooked by Tischendorf, of which he gave an account in the *Journal of Sacred Literature* for January 1864. It is assigned to the 6th century, but may belong to the 7th.  
S. *Vaticanus*, 354. This MS. contains the four gospels entire. It is in the Vatican Library, where Birch carefully collated it twice for his Greek Testament. A subscription to it states that it was written A. D. 949. See Tischendorf in the *Annals of Lindisfarne*, 1847, where a fac-simile better than those of Blanchini and Birch is given.  
T. *Codex Borgianus*, No. 1 in the Library of the Propaganda at Rome, a MS. of thirteen leaves, containing fragments of John's Gospel. The Greek text has a *Theban translation* by its side. Giorgi published the text in 1789 at Rome. Tischendorf, who inspected the MS. and made a fac-simile of it, assigns it to the 5th century.  
T<sup>a</sup>. Six leaves, containing John i. iii. iv., belonging to the 6th century.  
T<sup>b</sup>. Two leaves, containing Matt. xiv. xv., belonging to the 6th century. The writing and text resemble those of the Borgian fragments.  
T<sup>c</sup>. *Fragmentum Wolderum*, a few leaves, Greek and Sahidic, whose text was edited by Woide (contained in the Appendix to the *Codex Alexandrinus*, 1799). The one contains Luke xii. 15-xiii. 32, the other John viii. 33-42. Tischendorf has discovered that these fragments are parts of T, published by Giorgi. Hence they belong to the same time.  
U. *Codex Vetus Marianus*, formerly *Manianus*, in St. Mark's Library at Venice; a MS. of the gospels complete, with a text elegantly written. It was first collated accurately by Tischendorf in 1843, and again by Tregelles in 1846. According to Tischendorf it belongs to the end of the 9th or 10th century.  
V. *Codex Mosquensis*, in the Library of the Holy Synod at Moscow, a MS. of the four gospels, with several chasms. From John vii. 39 has been supplied by a more recent hand of the 13th century, in cursive letters. It belongs to the 9th century, and was twice collated by Matthaei. W<sup>a</sup>. Two leaves at the end of *Cod. Reg.*, now in the Imperial Library of Paris. They contain Luke ix. 34-47, x. 12-22, and are the fragment

of a continuous MS. of the gospels belonging to the 8th century. Tischendorf has edited the whole in his *Monumenta Sacra inedita*.

W<sup>b</sup>. *Codex Neapolitanus rescriptus*, consisting of fourteen leaves which contain fragments of the first three gospels as old as the 8th century. Tischendorf edited some verses of it in the *Annales Vindobonenses*, 1847; and it is described by Scotti. Tischendorf supposes that the leaves belong to the same MS. as W<sup>a</sup>.

W<sup>c</sup>. Three leaves at *St. Gall*, containing fragments of Mark and Luke. They are a sort of palimpsest, the writing having been effaced, though nothing new was written over. Tischendorf, who copied, and intends to edit these fragments, assigns them to the 9th century.

W<sup>d</sup>. Fragments of Mark's Gospel, vii. viii. ix., found in Trinity College, Cambridge, belonging to the 9th century.

X. *Codex Monacensis*, in the Library of the University of Munich, containing fragments of the four gospels. Commentaries of several fathers,

especially Chrysostom, accompany the text, except Mark's. It belongs to the 10th century. Between John ii. 22 and vii. 1, is supplied by a later hand of the 12th century. The MS. was collated by Tischendorf and Tregelles.

Y. *Codex Barberinus*, No. 225, six leaves containing fragments of John's Gospel, belonging to the 8th century, copied by Tischendorf in 1843, and published in his *Monumenta Sacra inedita*, 1846. Belonging to the Barberinian Library at Rome.

Z. *Codex Dublinensis*, in the Library of Trinity College, Dublin, a palimpsest, containing fragments of Matthew's Gospel, and belonging to the 6th century. The text of this MS. presents ancient and valuable readings. It was published in fac-simile by Barrett, 1801, 4to. Barrett's collation, however, is not so complete or accurate as it might have been made; and therefore Dr. Todd intends to edit a better edition of the text, in which more readings have been deciphered by the application of a chemical tincture.

ΘΩΔΑΥΝΑΤΑΤΑΝΤΑ

351. Cod. Dublin. (Matt. xix. 26).

Π. A MS., now in the Bodleian Library, consisting of 157 leaves large 4to. It contains Luke's Gospel entire, and parts of the other three. The form of the letters resembles the *Codex Cypricus* or K. Tischendorf, who got it in the East, assigns it to the 9th century. He collated and described it in *Anecdota sacra et profana*.

The second half of this MS. has been recently found, containing the greatest part of Matt. and John. The date is 844.

Δ. *Codex Sangallensis*, a Greek-Latin MS. in the Library of St. Gall, containing the four gospels entire, with the exception of John xix. 17-35. It is very similar in character to G (*Cod. Boernerianus*), both belonging to the same age and country, i. e., they were written in the monastery of St. Gall in Switzerland, in the 9th century. Rettig published it at Zürich, in fac-simile, in 1836. This MS., with the codices Augiensis and Boernerianus, are portions of one and the same document.

Θ. *Codex Tischendorffianus I.*, in the Library of Leipzig University, consisting of four leaves, of which the third is almost decayed, containing a few fragments of Matthew's Gospel. Tischendorf assigns them to the end of the 7th century. He published the contents in his *Monumenta Sacra inedita*, p. 1, etc.

Θ<sup>b</sup>. A fragment, containing six leaves, with Matt. xxii. and xxiii. and Mark iv., belonging to the 7th century.

Θ<sup>c</sup>. Two leaves, containing Matt. xxi. 19-24, and John xviii. 29-35, belonging to the 6th century.

Θ<sup>d</sup>. A small fragment of the 8th century, containing Luke xi.

Θ<sup>e</sup>. A fragment of Matt. xxvi., of the 6th century.

Θ<sup>f</sup>. Four leaves, containing Matt. xxvi. xxvii., Mark i. and ii. Of the 6th century.

Θ<sup>g</sup>. A fragment of John vi. belonging to the 6th century.

Θ<sup>h</sup>. A Greek-Arabic MS., containing three leaves, with Matt. xiv. and xxv., belonging to the 9th century.

Α. A MS. in the Bodleian Library, containing the Gospels of Luke and John entire. It consists of 157 leaves, and belongs to the 8th century. Tischendorf collated it.

II. A valuable MS. of the gospels, almost complete, brought by Tischendorf from Smyrna to St. Petersburg. It belongs to the 9th century. (See Tischendorf's *Notitia editionis codicis Bibliorum Sinaitici*, etc., p. 51).

Ξ. *Codex Zacynthius*, a palimpsest containing fragments of Luke's Gospel, belonging to the committee of the British and Foreign Bible Society. It is of the 8th century, and is accompanied by a *catena* of the 13th. Tregelles transcribed and published the fragments (1861).

Such are the *uncial* MSS. hitherto collated. Their number is not great, but every year is adding to it; upwards of a hundred uncials, including evangelistaria and apostoli. Those written in the *cursive* character are described in the large critical editions of Wetstein, Griesbach, Scholz, and Tischendorf; and in the *Introduction* of Michaelis, up to the period when it was published. Later Introductions contain descriptions of several, but not all the MSS. Space will not allow of a description of the chief *cursive* MSS., of which the

number is considerable. The existence of about 1500 is known; but comparatively few have been well collated. Mr Scrivener's collation of fifty, contained in his edition of the *Codex Augiensis*, is excellent.

Three cursive MSS. deserve mention, from their connection with the much-disputed passage, 1 John v. 7, which they are usually quoted as containing. Being written in *cursive* letters, they are not older than the 10th century.

1. *The Codex Montfortianus* or *Dublinensis*, belonging to the Library of Trinity College, Dublin. It was quoted by Erasmus, under the title of *Codex Britannicus*, numbered 34 in the Acts and Catholic Epistles. It is on paper of 12mo size, and was evidently written by different hands. The gospels are the most ancient part. The Apocalypse was transcribed from the Cod. Leicestrensis, which is now defective there. The Acts and Epistles belong to the beginning of the 16th century; the Apocalypse is later. An imperfect collation of the MS., nearly to the end of Acts, is printed in the sixth volume of Walton's *Polyglott*. Barrett collated the remainder, which he published at the end of his edition of Z. More recently, Dr. Dobbin collated the part not re-collated by Barrett. The resemblance of the readings in the Acts and Epistles to a MS. in the Library of Lincoln College, Oxford, would lead to the inference that the one was used in part as the archetype of the other; and there is little doubt that the Montfortianus was made from the Lincoln one, plus 1 John v. 7 (see *The Codex Montfortianus*: a collation of the celebrated MS. in the Library of Trinity College, Dublin, throughout the Gospels and Acts. By O. T. Dobbin, LL.D., etc., 1854, small 4to).

2. *The Codex Ravianus*, or *Berolinensis*.—This MS. is generally supposed to be a forgery, copied in the greater part of it from the Greek of the *Complutensian Polyglott*, and the third edition of Stephens, text and margin. It has even their *typographical* errors. It was written in the 16th century, and has no critical value (see Pappelbaum's *Untersuchung der Ravischen Griechischen Handschrift des Neuen Testaments*, Berlin 1785, 8vo; and his subsequent treatise, entitled, *Codicis Manuscripti N. T. Græci Raviani in Biblioth. Reg. Berol. publica asservati examen, quo ostenditur, alteram ejus partem majorem ex editione Complutensi, alteram minorem ex editione Rob. Stephani tertia esse descriptam*, Berlin 1796, 8vo).

3. *Codex Ollobonianus* (298), preserved in the Vatican. This MS. contains the Acts and Epistles, with a Latin version. Scholz ascribes it to the 15th century. It has no critical value, because it has been altered in many cases to correspond with the *Vulgate*. In it the disputed text is found in a different form from the common reading. Instead of *in heaven*, it has *from heaven*; and instead of *on earth*, it has *from the earth*.

*Codex Neapolitanus Regius*, No. 173, has the text merely in the margin, and in a recent character. Hence it is no proper witness for the existence of the passage.

MSS. are sometimes divided by the critics of Germany into—1. Such as were written before the practice of *stichometry*, a mode of dividing the text which will be explained hereafter. 2. The *stichometrical*. 3. Those written after *stichometry* had ceased. 3. Hug and De Wette in their Introductions to the N. T. According to this classification

A, B, and C belong to the first class; D, D, etc., to the second; and by far the greatest number to the third. We have alluded to them under the two great heads of *uncial* and *cursive*.

In examining MSS. and comparing their characteristic readings, it is not easy in every instance to arrive at the true original form of a passage. Many circumstances are to be taken into account, and many cautions to be observed. They are more useful in detecting interpolated passages than in restoring the correct reading.

The reading of an older MS. is preferable *ceteris paribus*.

In determining the age of a MS. internal marks are chiefly followed, such as the form of the letters, the divisions, abbreviations, the nature of the lines, the presence or absence of the accents, etc. These particulars, however, are not safe criteria.

Age alone is not sufficient to ensure the value of the text of a MS. The copyist may have been guilty of negligence or inattention. In proportion to his accuracy or carelessness the authority of the codex will be greater or less.

Again, a document certainly copied from one which is very ancient will have greater authority than an earlier taken from another of no great antiquity. Thus a MS. of the *eight*th century may have been directly copied from one of the *fifth*th; and consequently the former will be entitled to greater estimation than one belonging to the 7th century transcribed from one of the 6th.

In determining the value of a codex, it is usual to refer to the country where it was written. Griesbach and others prefer the *African*; Scholz, the *Constantinopolitan*. Those written in Egypt are the best. With respect to Hebrew MSS., it is admitted by all that the Spanish are the best. The Italian, again, are superior to the German.

The reading contained in the greater number of MSS. is preferable to that of a less number. *Mere majority*, however, is not a safe criterion. A majority arising from *independent sources*, or, in other words, of those belonging to *different recensions*, can alone be relied on as decisive. But here critics are not agreed as to the number of *recensions* belonging to Greek MSS. Some have proposed four, some three, others two. Besides, the same MS. may belong to a different recension in different parts of itself. In others, the characteristic readings of two or three recensions are mingled together, rendering it difficult to determine which recension or family preponderates. Hebrew MSS. belong to one and the same recension. It is true that some have distinguished them into *Masoretic* and *Ante-masoretic*; but the existence of the latter is a mere fiction. One great family alone, viz., the *Masoretic*, can be distinctly traced. Since the time of Lachmann's first edition, greater importance has been attached by N. T. critics to the age of MSS. It has been the object of his followers in the same department to adhere for the most part to the oldest copies. This is right within certain limits. The true text of the N. T., as far as we can now obtain it, lies in the MSS. of the 4th till the 8th centuries, accompanied and modified by the testimony of ancient versions and fathers during that period. But within this period we can easily distinguish MSS. of a second order in goodness, viz., E, F, G, H, K, M, S, U, V, from those of the first class, A, B, C, Z (see Davidson's *Biblical Criticism*, vol. ii.

and the prolegomena to the editions of Wetstein, Griesbach, Scholz, Tischendorf, especially the last, where the best account of the sources of Greek Testament textual criticism is given).—S. D.

MAOCH (מַעֲוֶה; Sept. Ἀμαχ; Alex. Μαδβ), the father of Achish, king of Gath, with whom David found refuge (1 Sam. xxvii. 2). In 1 Kings ii. 39, Achish king of Gath is called the son of Maachah. There can be little doubt that מַעֲוֶה and מַעֲכָה are forms of the same word (the Syr. reads Maoch in both places); and it is quite possible that it is the same person who is mentioned in both places.—W. L. A.

MAON (מַעֲוֶה; Sept. Μαών), a town in the tribe of Judah (Josh. xv. 55) which gave name to a wilderness where David hid himself from Saul, and around which the churlish Nabal had great possessions (1 Sam. xxiii. 24, 25; xxv. 2). Eusebius and Jerome place it to the east of Daroma (*Onomast.*, s. v. Maon). Dr. Robinson regards it as one of the sites first identified by himself; he finds it in the present Ma'in, which is about seven miles south by east from Hebron. Here there is a conical hill about 200 feet high, on the top of which are some ruins of no great extent, consisting of foundations of hewn stone, a square enclosure, the remains probably of a tower or castle, and several cisterns. The view from the summit is extensive. This is Ma'in. The traveller found here a band of peasants keeping their flocks, and dwelling in caves amid the ruins (*Bibl. Researches*, ii. 190-196). [HACHILAH.]—J. K.

MAONITES (מַעֲוֶה; Μαδύμ; Chanaan). It is to be observed that, though in our A. V. the name *Maonites* occurs in Judg. x. 12, yet the Hebrew word so rendered is the same elsewhere translated MAON (Josh. xv. 55; 1 Sam. xxiii. 24), and applied to a city and wilderness in the south of Judah. There can be no doubt that in this passage 'Maon' (מַעֲוֶה), like 'Amalek' (עַמְלֵק), though in the singular, is applied to a *people*, and not to a place.—The Sidonians also, and Amalek, and Maon did oppress you.' The Septuagint reads (Μαδύμ) *Midian*, and the Vulgate *Chanaan*, doubtless from a desire to reconcile this statement with previous history; but this is against the rules of sound criticism. Where there is no MS. authority, the reading of versions can never warrant a change in the sacred text. It is quite true that the Maonites are nowhere mentioned as having oppressed Israel before this period; but the Bible was never intended to contain a *complete* history.

Traces of the name *Maon* are found in several localities. It is given to a town in the south of Judah, now identified with the ruins of Tell Ma'in (MAON; *Handbook for S. and P.*, p. 61). It is given to the bleak and hilly 'pasture-lands' (Hebrew מִדְבָּר; DESERT) which extend away to the southward of the town of Maon (1 Sam. xxiii. 25). In pronouncing a prophetic curse upon Moab, Jeremiah mentions Beth-Meon (בֵּית מַעֲוֶה; xlviii. 23), which may perhaps be the same as the Beth-Baal-Meon of Josh. xii. 17, and the Baal-Meon of Num. xxxii. 38, and would thus be identical with the ruin Ma'in, three miles south of Heshbon. Still another *Maon* is mentioned in 2 Chron. xxvi.

VOL. III.

7, where it is said of King Uzziah, that 'God helped him against the Philistines, and against the Arabians that dwelt in Gur-baal, and the *Meunim*' (A. V. *Mehunims*; but Heb. הַמְעֻנִּים, which is

the plural of מַעֲוֶה; *Mu'atim*). The LXX. also renders the word translated '*habitations*' (הַמְעֻנִּים; Keri הַמְעֻנִּים; which in form is identical with 2 Chron. xxvi. 7) in the A. V. of 1 Chron. iv. 41, *Minaioi* (*Mu'atōi*); and both the form of the Hebrew word, and the sense of the passage, seem to show that it is a proper name. It is probable that all these names indicate the presence of an ancient and powerful nomad tribe, which was allied to the Phœnicians (or Sidonians), whose earliest settlements were in the vale of Sodom, and with the Amalekites who dwelt in the wilderness south of Palestine. These Maonites migrated eastward, leaving their name at Maon in the south of Judah, where they may have had their head-quarters for a time, and again at Beth-Meon, on the plateau of Moab; and also at the large modern village of

Ma'an (مَعَان), on the eastern border of Edom, about fifteen miles from Petra. Ma'an is one of the most important stations on the Syrian *Haj* ('pilgrim caravan') route. It contains an old castle and some other remains of antiquity among the modern houses; and around it are gardens and orchards (Burckhardt, *Travels in Syria*, p. 436; *Handbk.*, p. 58; Ritter, *Pal. und Syr.*, 1004, *seq.*; Winer, *R. W.*, s. v.; Abulfeda, *Tab. Syr.*, p. 14; and especially Wallin, in *Journal of R. G. S.*, vol. xxiv. pp. 121-128). This was perhaps one of the chief stations of the Maonites. It is not uncommon at the present day to find the names of great Arab tribes attached to their principal camping-grounds, though very far apart. One of the most celebrated of the Arabian tribes at the commencement of our era was the *Mimai* (Strabo, xvi. pp. 768, 776; Pliny, vi. 32; Ptolemy, vi. 7); but they seem to have resided in southern or south-eastern Arabia, much too far distant from Palestine to be identified with the Maonites, as has been shown by Bochart (*Opp.*, i. 121; Forster's *Arabia*, ii. 254, *seq.*).—J. L. P.

MARAH (מָרָה, bitterness; Sept. Μαρά). The Israelites, in departing from Egypt, made some stay on the shores of the Red Sea, at the place where it had been crossed by them. From this spot they proceeded southward for three days without finding any water, and then came to a well, the waters of which were so bitter, that, thirsty as they were, they could not drink them (Exod. xv. 22-24; Num. xxxiii. 8). The well was called *Marah*, from the quality of its waters. Unaccustomed as yet to the hardships of the desert, and having been in the habit of drinking of the best water in the world, they were much distressed by the scarcity of water in the region wherein they now wandered; and in their disappointment of the relief expected from this well, they murmured greatly against Moses for having brought them into such a dry wilderness, and asked him, 'What shall we drink?' On this, Moses cried to Jehovah, who indicated to him 'a certain tree,' on throwing the branches of which into the well, its waters became sweet and fit for use. Attempts have been made to set aside the miraculous character of this transaction by the discovery of some tree belonging to that district the

wood or fruit of which has the property of rendering bitter water sweet. No such, however, has been discovered (Kitto, *Pictorial Hist. of Palestine*, p. 209, 210). As respects the locality of this transaction, since Burckhardt's time the fountain Howârah, situated in the Wady el-Amârah, has been generally regarded as probably the Marah of the Israelites, though some think it should rather be sought in the neighbouring Wady Ghurundel. The latter, however, is probably the Elim of Scripture (Robinson, i. 96-100). The water of the Howârah fountain is unpleasant to the taste, saltish and bitter, so that the Arabs use it only when hard pressed, though camels drink it freely; and this has been generally relied on as a proof of the identity of this fountain with Marah. This is valid, however, only on the supposition that the change produced by Moses was of temporary duration; a supposition to which the miraculous character of the transaction is somewhat opposed (comp. 2 Kings ii. 21). Tradition identifies Marah with the 'Ayun Mûsa or *Fountains of Moses*, but these are too near to the Red Sea to correspond with a place which it took the Israelites three days to reach.

MARALAH (מַרְלָה; 'trembling'; Μαγελδά; Alex. Μαράδα; *Merala*), a town on the southern border of Zebulun (Josh. xix. 11). It was unknown to Eusebius and Jerome; and the former even locates it in Manasseh (*Onomast.*, s. v. *Marala*). The situation of Maralah we have not yet sufficient data to determine. In defining the southern border of the tribe, Sarid is made the starting-point; but its site is unknown. From Sarid the border 'went up to the westward (A. V. 'toward the sea'; but Heb. לְיָמָה) and Maralah, and reached to Dabbasheth, and reached to the river that is before Jokmeam, and turned from Sarid eastward . . . unto the border of Chisloth-Tabor.' Sarid then lay to the west of Chisloth-Tabor, and Maralah west of Sarid. This would indicate a spot at the southern base of the hills of Galilee, and near the plain of Esdraelon; and here, about four miles south-west of Nazareth, on the top of a hill, stands the little village of *Malûl*, containing the ruins of a temple, and other vestiges of antiquity. In the surrounding rocks and cliffs are some excavated tombs. This may probably mark the site of Maralah (*Handbook*, p. 385). To locate Maralah on Carmel, as Keil has attempted to do, is against the plain indications of Scripture (Keil on Joshua, l. c.)—J. L. P.

MARANATHA. [ANATHEMA.]

MARBLE. [BAHAT; DAR; SOHERETH; SHESH L.]

MARCHESHVAN (מַרְחֶשְׁוָן; Joseph. *Antiq.* i. 3, *Μαρσούνης*; the Macedonian Δῖος) is the name of that month which was the eighth of the sacred, and the second of the civil, year of the Jews; which began with the new moon of our November. There was a fast on the 6th, in memory of Zedekiah's being blinded after he had witnessed the slaughter of his sons (2 Kings xxv. 7).

This month is always spoken of in the O. T. by its numerical designation, except once, when it is called Bul (בּוּל, 1 Kings vi. 38; Sept. Βαδλ). Ac-

cording to Kimchi, Bul is a shortened form of the Hebrew בּוּל, 'rain,' from בָּל. The signification of *rain-month* is exactly suitable to November in the climate of Palestine. Others derive it from בָּל. Benfey, availing himself of the fact that the Palmyrene inscriptions express the name of the god Baal, according to their dialect, by בּוּל (as עֲנַלְבּוּל, Ἀγλιβόλος), has ventured to suggest that, as the months are often called after the deities, Bul may have received its name from that form of Baal (*Monatsnamen*, p. 182). The rendering of the Septuagint might have been appealed to as some sanction of this view. He supposes that Marcheshvân is a compound name, of which the syllable *mar* is taken from the Zend *Ameretât*, or its later Persian form *Mordâd*; and that *cheshvân* is the Persian *cheshân*, 'autumn:' both of which are names belonging to the same month (l. c. p. 136, sq.)—J. N.

MARCK, JOHANN VAN, a distinguished Dutch theologian, born 31st December 1655 at Sneek, in Friesland. He studied at the University of Leyden, and such was his early reputation, that before the completion of his twenty-first year he was appointed to the professorship of theology at Franeker. In 1682 he removed to Groningen as Professor Primarius of Theology and University preacher. In 1690 he accepted a theological chair at Leyden, and in 1720 succeeded the younger Spanheim as Professor of Ecclesiastical History. He died 30th January 1731. In addition to several works on dogmatic theology, which are highly esteemed in the Reformed Church, he made various valuable contributions to the interpretation of the Scriptures. Of these the principal are: 1. *In Apocalypsim Commentaria seu analysis exegetica*, 4to, Lugd. Bat. 1689, Ed. auct. 1699. 2. *In Canticum Salomonis Commentarius seu analysis exegetica cum analysi Ps. xlv.*, Lugd. 1703, 4to. 3. *In præcipuas quasdam partes Pentateuchi Commentarius; seu ultimorum Jacobi, reliquorum Bilhami et novissimorum Mosi analysis exegetica*, Lugd. 1713, 4to. 4. *Commentarii seu analysis exegetica in Prophetas minores*, 5 vols., Amst. 1696-1701, 4to. This is a very complete and carefully-executed work. Walch characterises it as one of the best of the commentaries on the minor prophets. 5. *Sylloge dissertationum philologico-exegeticarum ad selectos quosdam textus N. T.*, Rotterd. 1721, 4to. 6. *Fasciculus dissertationum philologico-exegeticarum ad selectos textus V. et N. Testamenti*, 2 vols., Lugd. 1724-1727.—S. N.

MARESHAH (מַרְשָׁה; Sept. Μαρσά), a town in the tribe of Judah (Josh. xv. 44), rebuilt and fortified by Rehoboam (2 Chron. xi. 8). The Ethiopians under Zerah were defeated by Asa in the valley near Mareshah (2 Chron. xiv. 9-13). It was laid desolate by Judas Maccabæus, on his march from Hebron to Ashdod (1 Maccab. v. 65-68; Joseph. *Antiq.* xii. 8. 6). Josephus mentions it among the towns possessed by Alexander Jannæus, which had been in the hands of the Syrians (*Antiq.* xiii. 15. 4); but by Pompey it was restored to the former inhabitants, and attached to the province of Syria (*Ib.* xiv. 4. 4). Maresa was among the towns rebuilt by Gabinius (*Ib.* xiv. 5. 3), but was again destroyed by the Parthians in their irruption against Herod (*Ib.* xiv. 13. 9). A place so often mentioned in history

must have been of considerable importance; but it does not appear that it was ever again rebuilt. The site, however, is set down by Eusebius and Jerome (*Onomast.* s. v. Morasthi) as within two miles of Eleutheropolis, but the direction is not stated. Dr. Robinson (*Bibl. Researches*, ii. 422) found, at a mile and a half south of the site of Eleutheropolis, a remarkable *tel*, or artificial hill, with foundations of some buildings. As there are no other ruins in the vicinity, and as the site is admirably sited for a fortress, this, he supposes, may have been Mareshah.—J. K.

MARGARITES (μαργαρίτης, s.c. λίθος = the shining stone, from μαργαρεύω) is the designation of the pearl, which is a secretion found in certain of the mollusca, and collects on the shell, usually around some grain of sand which has intruded itself between the shell and the delicate mantle of the animal. The best pearls are those found in the *Meleagrina Margaritifera* of the Indian Ocean, but they are found also in the common oyster, the mussel, and especially in the pearl-mussel of our own waters. From an early period the pearl has been esteemed as a precious stone, and has been used as an ornament (1 Tim. ii. 9; comp. Hor. *Epod.* viii. 13, 14; Sen. *De Benef.* vii. 9; *Hippol.* 391; Plin. *H. N.* ix. 56, ed. Franz, etc.) As the true pearl was—as it still is—a costly gem, the name came to be extended so as to designate stones of great price in general; it is thus used generally in the N. T. (Matt. xiii. 45; Rev. xvii. 4; xviii. 12, 16; xxi. 21). It is used also metaphorically to designate anything precious (Matt. vii. 6; cf. Wettstein, *in loc.*)—W. L. A.

MARK. 'John whose surname was Mark,' with whom the evangelist may almost certainly be identified, was the son of a Jewish matron of substance and position, residing at Jerusalem. Her house formed an ordinary place of assemblage for Christians even in times of danger and persecution (Acts xii. 12), to which St. Peter at once resorted on his miraculous deliverance from prison. Thus we find that the very first mention of John Mark prepares us for the future intimate connection between him and that apostle, and supports his identity with the evangelist. Mark is mentioned by St. Paul among those *οἱ ὄντες ἐκ περιτομῆς* (Col. iv. 10), and he was therefore certainly a Jew by birth, and, according to the very probable supposition of Ewald (vi. 411), of an Hellenistic family settled at Jerusalem. Barnabas of Cyprus was his cousin (not as in the A. V. 'sister's son'), Col. iv. 10, but we cannot thence infer, with Cave, that he was of the tribe of Levi. His original name was 'John'; the Latin surname 'Marcus' having been assumed from some unexplained cause, by a process of which the change of Saul into the universally known 'Paul' affords an exactly analogous instance, became the prevalent name in the church. The Acts and Epistles enable us to trace the gradual acceptance of the new name—'John, whose surname was Mark,' cf. Acts xii. 12, 25, xv. 37, is 'John' alone xiii. 5, 13; becomes 'Mark,' xv. 39; and thenceforward appears by that name alone, Col. iv. 10; Philem. 24; 2 Tim. iv. 11. Of his earlier history nothing can be known with any certainty. The statement that he was one of the seventy (Hippolyt. *Philosophumena*, vii. 20; Epiphani. *Contr. Hier.*, li. 6), who (as is also recorded of St. Luke with as little warrant) took offence at our

Lord's 'hard saying,' John vi. 60-66, is entirely groundless, and is inconsistent with the words of Papias, *οὔτε γὰρ ἤκουσε τοῦ Κυρίου, οὔτε παρηκολούθησεν αὐτῷ*. Little more can be said in support of the theory first started by Townson, and elaborately defended by Greswell, which has found considerable acceptance, as being in keeping with the supposed ardent and impulsive character of St. Mark, that he was the 'young man' mentioned by him (Mark xiv. 51, 52) as being suddenly awakened from sleep on the night of the Betrayal, and with difficulty escaping the soldiers' hands. Such identifications, however specious, must be always accepted with extreme caution, as they usually arise from an unwillingness to acquiesce in the fragmentariness of the gospels. Da Costa's identification of him with the 'devout soldier' (Acts x. 7) is a still more groundless fancy. When we consider how naturally Mark's intercourse with the apostle at his mother's house may have ripened into his conversion, we can hardly be wrong in looking on Peter as his spiritual father, and interpreting *νιός* (1 Pet. v. 13) in that sense. It has been taken as implying the natural relation by Bengel, Neander, Credner, Hottinger, Tholuck, Stanley (*Serm. on Apost. Age*, p. 95), but this is contrary to the view of the earlier writers (Origen, ap. Euseb. *H. E.*, vi. 25; Euseb. *H. E.*, ii. 15; Jerome, *de Vir. Ill.*, c. 8), and is based on the feeble argument, that because St. Paul always employs *τέκνον* of the spiritual connection, St. Peter must have done the same. Besides, the view that *ἡ ἐν Βαβυλῶνι συνεκλεκτή* means St. Peter's wife, has been rejected by the soundest critics (cf. Wieseler, *Apostol. Zeitalt.*, p. 558; De Wette, *Exeg. Handbuch*, *in loc.*) The silence of all early writers on a point of so much interest appears conclusive. The visit of Saul and Barnabas to Jerusalem, as bearers of the alms of the church of Antioch immediately after Peter's miraculous deliverance, was a turning-point in the history of the young convert. The natural tie of relationship was strengthened by a closer bond, and on the return of the apostles we read they were accompanied by 'John, whose surname was Mark' (Acts xii. 25). On their first missionary voyage Mark attended them as their *ὑπηρετής* (Acts xii. 5); but on leaving the perhaps familiar ground of Cyprus, the native country of his kinsman Barnabas (Acts iv. 26), for the unknown dangers of the Asiatic mountains, his heart would appear to have failed him, and forsaking his companions at Perga in Pamphylia, where, as Dr. Howson suggests, he may have found a ship sailing to Palestine, he 'returned to Jerusalem,' to his mother and his home. This event was productive of most important consequences. When starting a second time on their missionary enterprise, Barnabas was led by natural affection again to select his young kinsman as the companion of their journey. Paul was unwilling to have the attendance of one who, from his natural timidity, might give way just when his services were most needed, and prove a hindrance and not a help. Neither was willing to yield to the other, and the issue was a 'sharp contention,' resulting in the temporary estrangement and permanent separation of the fellow-labourers. Mark accompanied Barnabas to Cyprus, where St. Luke's narrative takes leave of him (Acts xv. 37-39). The after history of Mark, it has been truly said, 'affords a specimen of the rare change from timidity to boldness' (Newman, *Paroch.*

*Serm.*, ii. 197), and when he reappears in the sacred volume it is pleasing to find him by the side of the apostle whose good opinion he had once seemed to have entirely lost—acknowledged by him as one of his few ‘fellow-labourers unto the kingdom of God’ who had been ‘a comfort’ to him in his weary imprisonment (Col. iv. 10, 11; Philem. 24). At that time Mark appears to have had in contemplation a journey into Asia Minor, and perhaps in consequence of his character having suffered from his previous desertion of the apostle, St. Paul thought it desirable to prepare the Colossians to give him a friendly reception. We have a still further proof of the high esteem in which he was held by St. Paul towards the close of his life, in the request to Timothy, that on his approaching visit to Rome he would bring Mark with him, inasmuch as he was ‘profitable’ to him ‘for the ministry,’ which the aged apostle foresaw he was so soon to lay down (2 Tim. iv. 11). As St. Mark was at this time in Timothy’s neighbourhood, we may infer that the projected journey to Asia Minor took place, and since we find him with St. Peter (1 Pet. v. 13) in Babylon (which must certainly be taken in its plain sense, and not allegorized as signifying Rome—the subscription to a letter being the last place in which one would look for a mystical meaning), it would appear probable that he rejoined his beloved father in the faith, and aided him in his labours among his own countrymen in that city, which at that time, and for some hundred years afterwards, was one of the chief seats of Jewish culture.

From this point we have nothing to guide us but the vague and often inconsistent indications of tradition. On the intimate relation in which Mark and his gospel stood to St. Peter, however, all early writers, from Papias downward, are so unanimous, that if tradition is to be accepted at all it is hardly possible to gainsay it. (Papias apud Euseb. *H. E.*, iii. 39; Irenæus, *ibid.*, v. 8; Clemens Alex., *ibid.*, ii. 15; vi. 14; Euseb. *Demonst. Evang.* iii. 5; Tert. *cont. Marc.* iv. 5; Jerome *ad Heb. lib.* quest. xi.) What is the exact signification of the word *ἐρμηνεύτης*, the office which Mark is said to have filled to St. Peter, has been much controverted. Eichhorn, Bertholdt, Kuinoel, etc., took it in its modern sense, as though St. Mark had, as with modern missionaries, translated into Greek the original Aramaic discourses of his master. But it is far more probable that, in the words of Tholuck, ‘he was the assistant of Peter, and either orally or in writing communicated and developed what Peter taught’ (Valesius, Lange, Fritzsche, Meyer, Alford, etc.).

The tradition that St. Mark was the companion of St. Peter at Rome does not appear in Papias, but is of considerable antiquity. It may be traced up to Clemens Alex. (apud Euseb. ii. 15, vi. 14), who states that he received it from the presbyters of old time, *τῶν ἀνέκαθεν πρεσβυτέρων*, after which time it becomes general. It is not, however, free from suspicion, as it is expressly connected with the erroneous identification of Rome with Babylon (Jerome *de Vir. illust.*, c. 8; Euseb. *H. E.* ii. 15). According to Eusebius (*H. E.* ii. 16), after Peter’s death Mark visited Egypt, and published the gospel he had written, and founded the church of Alexandria, in which city, according to a singular tradition of late date, he met with and excited the admiration of Philo, and where, according to Je-

rome (*u. s.*), he died in the eighth year of Nero. The late and credulous Nicephorus, and Simeon Metaphrastes, state that he suffered martyrdom. According to the legend his remains were obtained from Alexandria by the Venetians through a pious stratagem, and conveyed to their city, 827 A. D. Venice was thenceforward solemnly placed under his protection, and the lion, which mediæval theology had selected from the apocalyptic beasts as his emblem, became the standard of the republic. The place of the deposition of his body having been lost, a miracle was subsequently wrought for its discovery, A.D. 1094, which figures in many famous works of art. Where his remains now lie is, according to the Roman Catholic Eustace, ‘acknowledged to be an undivulged secret; or, perhaps, in less cautious language, to be utterly unknown.’

In the above remarks we have identified the evangelist with the ‘John Mark’ of the Acts and the ‘Mark’ of the Epistles. It has, however, been maintained by Grotius, Calovius, Du Pin, Tillemont, Schleiermacher, Credner, Da Costa, and others, that they were two distinct persons. Kienlin has even ascribed the gospel to the Pauline and not the Petrine Mark, while Hitzig has been led by the identity of the name to propound the idea that John Mark was the author of the Apocalypse. But in the pithy words of Lightfoot, ‘to suppose two Marks, one with Peter and another with Paul, is to breed confusion where there needeth none. It is easily seen how John Mark came into familiarity with Paul and Peter, and other Mark we can find none in the N. T. unless of our own invention’ (*Harm. of N. T.*, vol. i. p. 336).—E. V.

MARK, GOSPEL OF.—1. *Authorship.*—The voice of the church with one consent assigns our second gospel to Mark, the ‘son’ (1 Pet. v. 17) and ‘interpreter’ (Papias ap. Euseb. *H. E.*, iii. 39) of St. Peter. The existence of this ascription is the best evidence of its truth. Had not Mark been its author, no sufficient reason can be given for its having borne the name of one so undistinguished in the history of the Church. His identity with the ‘John Mark’ of the Acts and Epistles has usually been taken for granted, nor (see last article) is there any sufficient ground for calling it in question. It must, however, be acknowledged that there is no early testimony for the fact—as there is none *against* it—which appears first in the preface to the *Commentary* on the Evangelist usually attributed to Victor of Antioch, *circa* 407 A. D. (Cramer, *Catena* i., p. 263), and in a note of Ammonius (*Ibid.* ii., p. iv.), where it is mentioned with some expression of doubt *τάχα οὗτός ἐστιν Μάρκος ὁ εὐαγγελιστής . . . πιθανὸς δὲ ὁ λόγος* (Westcott, *Introd.*, p. 212). An argument in favour of their identity has been drawn with much acuteness by Tregelles (*Journ. of Philol.* 1855, p. 224; Horne’s *Introd. to N. T.*, p. 433) from the singular epithet ‘stump-fingered,’ *κολοβοδακτύλος*, applied to the evangelist in the *Philosophumena* vii. 30, as illustrated by the words of the Latin preface found in some MSS. ‘at least nearly coeval with Jerome,’ ‘amputasse sibi post fidem pollicem dicitur ut sacerdotio reprobis haberetur;’ as though by his desertion of the apostles (Acts xiii. 13) he had become figuratively a ‘pollice truncus’—a poltroon.

2. *Relation to St. Peter.*—The unanimous testimony of the early church declares that Mark

wrote his gospel under the special influence and direction of St. Peter. The words of John the presbyter, as quoted by Papias (Euseb. *H. E.* iii. 39), are explicit on this point—‘This, then, was the statement of the elder :—Mark having become Peter’s interpreter (*ἐρμηνεύτης*) wrote accurately all that he remembered (*ἐμνημόνευσε*), but he did not record the words and deeds of Christ in order (*οὐ μὲν τοι τάξει τὰ ὑπὸ τοῦ Χριστοῦ ἢ λεχθέντα ἢ πραχθέντα*), for he was neither a hearer nor a follower of our Lord, but afterwards, as I said, became a follower of Peter, who used to adapt his instruction to meet the requirements of his hearers, but not as making a connected arrangement of our Lord’s discourses (*ἀλλ’ οὐχ ὥσπερ σύνταξιν τῶν κυριακῶν ποιούμενος λόγων*); so Mark committed no error in writing down particulars as he remembered them (*ἐνία γράψας ὡς ἀπεμνημόνευσε*), for he made one thing his object, to omit nothing of what he heard, and to make no erroneous statement in them.’ The value of the foregoing extract, from its almost apostolic date, is extremely great, though too much stress has been laid upon some of its expressions by Schleiermacher and others, to discredit the genuineness of the existing Gospel of St. Mark. In addition to St. Peter’s teaching having been the basis of the gospel, we learn from it three facts of the greatest importance for the right comprehension of the origin of the gospels, ‘the historic character of the oral gospel, the special purpose with which it was framed, and the fragmentariness of its contents’ (Westcott, *Introd.*, p. 168). The testimony of later writers is equally definite, though probably to a certain extent derived from that of Papias. Justin quotes from the present gospel under the title *τὰ ἀπομνημονεύματα Πέτρου*. Irenæus (Euseb. *H. E.*, iii. 1) asserts that Mark ‘delivered in writing the things preached by Peter;’ and Origen (*Ibid.* vi. 25), that he ‘composed it as Peter directed him—ὡς Πέτρος ἰδηγγήσατο αὐτῷ ποιήσαντα. Clement of Alexandria enters more into detail, and according to Eusebius’ report of his words (*H. E.* vi. 14; ii. 15) contradicts himself. He ascribes the origin of the gospel to the importunity of Peter’s hearers in Rome, who were anxious to retain a lasting record of his preaching from the pen of his *ἐρμηνεύτης*, which, when completed, the apostle viewed with approbation, sanctioning it with his authority, and commanding that it should be read in the churches: while elsewhere we have the inconsistent statement, that when Peter knew what had been done ‘he neither forbade nor encouraged it.’ Tertullian’s witness is to the same effect, ‘Marcus quod edidit evangelium Petri affirmatur’ (*Adv. Marc.* vi. 5); as is that of Eusebius (*H. E.*, iii. 5), and Jerome (*de Vir. Ill.*, c. viii.; *ad Hedib.*, c. ii.), who in the last passage writes, ‘eujus (Marci) evangelium Petro narrante et illo scribente compositum est.’

Such, so early and so uniform, is the tradition which connects, in the closest manner, St. Mark’s Gospel with the Apostle Peter. To estimate its value we must inquire how far it is consistent with facts; and here it must be candidly acknowledged that the gospel itself supplies very little to an unbiassed reader to confirm the tradition. The narrative keeps more completely to the common cycle of the Synoptic record, and even to its language, than is consistent with the individual recollections of one of the chief actors in the history; while the

differences of detail, though most real and important, are of too minute and refined a character to allow us to entertain the belief that Peter was in any way *directly* engaged in its composition. Any record derived immediately from St. Peter could hardly fail to have given us far more original matter than the slender additions made by Mark to the common stock of the Synoptical gospels. It is certainly true that there are a few unimportant passages where Peter is specially mentioned by Mark, and is omitted by one or both of the others (i. 36; v. 37; xi. 20; xiii. 3; xvi. 7); but, on the other hand, there are still more and more prominent instances which would almost show that St. Mark was less intimately acquainted with St. Peter’s life than they. He omits his name when given by Matthew (xv. 15 cf. Mark vii. 17); passes over his walking on the sea (Matt. xiv. 28-31; cf. Mark vi. 50, 51) and the miracle of the tribute-money (Matt. xvii. 24-27 cf. Mark ix. 33), as well as the blessing pronounced on him by our Lord, and his designation as the rock on which the Church should be built (Matt. xvi. 17-19 cf. Mark viii. 29, 30). Although he was one of the two disciples sent to make ready the Passover (Luke xxii. 8), his name is not given by Mark (xiv. 13). We do not find in Mark the remarkable words, ‘I have prayed for thee,’ etc. (Luke xxii. 31-32). The notice of his repentance also, *ἐπιβαλὼν ἑλκυσεν* (xiv. 72), is tame when contrasted with the *ἐξελθὼν ἔξω ἐκλαυσεν πικρῶς* of Matthew and Luke. Advocates are never at a loss for plausible reasons to support their preconceived views, and it has been the habit from very early times (Eusebius, Chrysostom) to attribute these omissions to the modesty of Peter, who was unwilling to record that which might specially tend to his own honour; an explanation unsatisfactory in itself, and which cannot be applied with any consistency. Indeed, we can hardly have a more striking proof of the readiness with which men see what they wish to see, and make the most stubborn facts bend to their own foregone conclusions, than that a gospel, in which no unbiassed reader would have discovered any special connection with Peter, should have yielded so many fancied proofs of Petrine origin. But while we are unable to admit any considerable *direct* influence of Peter in the composition of the gospel, it is by no means improbable that his oral communications may have *indirectly* influenced it, and that it is to him the minuteness of its details and the graphic colouring which specially distinguish it are due. Its richness in subtle and picturesque touches, by which he sets, as it were, the scene he is describing before us in all its outward features, with the very look and demeanour of the actors, betoken the report of an eye-witness; and with the testimony of the early Church before us, which can hardly be set aside, we are warranted in the conclusion that this eye-witness was Peter. Not that the narrative, as we have it, was his; but that when Mark, under the Holy Spirit’s guidance, after separation from his master, undertook the task of setting forth that cycle of gospel teaching, to which—from grounds never yet, nor perhaps ever to be satisfactorily explained—the Synoptists chiefly confine themselves, he was enabled to introduce into it many pictorial details which he had derived from his master, and which had been impressed on his memory by frequent repetition.

3. *Relation to St. Matthew and St. Luke.*—The question of priority of composition among the Synoptic Gospels has long been the subject of vehement controversy, and to judge by the diversity of the views entertained, and the confidence each appears to feel of the correctness of his own, it would seem to be as far as ever from being settled. May it not be that we are not yet, and perhaps never shall be, in possession of data sufficient for the solution of the problem?

The position of St. Mark in relation to the other two has, in particular, given rise to the widest differences of opinion. The independence of his record was maintained up to the time of Augustine. He conceived the view, which, however, he does not employ with much consistency, that Mark was merely 'tanquam pedissequus et breviator' of St. Matthew (*De Consens. Ev.*, i. 4); and from his day it has been held by many that Mark deliberately set himself to make an abridgment of one or both the other Synoptists. Griesbach expressed this opinion most decidedly in his 'Commentatio quo Marci Evangelium totum a Matthæi et Lucæ commentariis decerptum esse monstratur;' and it has been stated in a more or less modified form by Paulus, Schleiermacher, Thiele, DeWette, Delitzsch, Fritzsche, and Bleek, the two last named adding St. John's Gospel to the materials before him. Nor can it be denied that at first sight this view is not devoid of plausibility, especially as regards St. Matthew. We find the same events recorded, and apparently in the same way, and very often in the same words. St. Mark's is the shorter work, and that principally, as it would seem, by the omission of the discourses and parables, which are a leading feature in the others. And yet, though this opinion was for a long time regarded almost as an established fact, no very searching investigation is needed to show its baselessness. Instead of St. Mark's narrative being an abridgment of that of St. Matthew or of St. Luke, it is often much fuller. Particulars are introduced which an abridger aiming at condensation would have been certain to prune away if he had found them in his authority; while the freshness and graphic power of the history, the life-like touches which almost put us on the stage with the actors, and his superior accuracy as regards persons, words, times, and places, prove the originality and independence of his work. Of late, therefore, opinion has been tending as violently in the opposite direction, and the prevailing view among modern critics is, that in St. Mark we have the primitive gospel, '*Urevangelium*,' from which both those of St. Matthew and St. Luke were derived. This is held by Weiss, Wilke, Ewald, Lachmann, Hitzig, Reuss, Ritschel, Thiersch, Meyer, etc., and has been lately maintained with considerable ingenuity in Mr. Kenrick's *Biblical Essays*. Hilgenfeld again adopts an intermediate view, and considers St. Mark to have held a middle position both as regards form and internal character; himself deriving his gospel from St. Matthew, and in his turn supplying materials for that of St. Luke; while doctrinally he is considered to hold the mean between the Judaic gospel of the first, and the universal gospel of the third evangelist.

Many formidable difficulties beset each of these theories, and their credit severally is impaired by the fact that the very same data which are urged by one writer as proofs of the priority of St. Mark,

are used by another as irrefragable evidence of its later date. We even find critics, like Baur, bold enough to attribute the vivid details which are justly viewed as evidences of the independence and originality of his record, to the fancy of the evangelist; thus importing the art of the modern novelist into times and works to the spirit of which it is entirely alien.

So much, however, we may safely grant, while maintaining the substantial independence of each of the Synoptic gospels—that St. Mark exhibits the oral tradition of the official life of our Lord in its earliest extant form, and furnishes the most direct representation of the common basis on which they all rest. 'In essence, if not in composition,' says Mr. Westcott, *Introd.*, p. 190 (the two not being necessarily identical, the earlier tradition being perhaps possibly the latest committed to writing), 'it is the oldest.' The intermediate theory has also so much of truth in it, that St. Mark does actually occupy the central position in regard to diction; frequently, as it were, combining the language of the other two (i. 32 cf. Matt. viii. 16; Luke iv. 40—i. 42 cf. Matt. viii. 3; Luke v. 13—ii. 13-18 cf. Matt. ix. 9-14; Luke v. 27-33—iv. 30-32, cf. Matt. xiii. 31-33; Luke xiii. 18-21), as indeed would naturally be the case if we consider that his gospel most closely represents the original from which all were developed. In conclusion we may say, that a careful comparison of the three gospels can hardly fail to convince the unprejudiced reader, that while St. Mark adds hardly anything to the general narrative, we have in his gospel, in the words of Meyer (*Comment.*), 'a fresher stream from the apostolic fountain,' without which we should have wanted many important elements for a true conception of our blessed Lord's nature and work.

If we now proceed to a detailed comparison of the matter contained in the gospels, we shall find, that while the history of the conception and birth and childhood of our Lord and His forerunner have no parallel in St. Mark, afterwards the main course of the narrative (Luke ix. 51—xviii. 14, being of course excepted) is on the whole coincident; and that the difference is mainly due to the absence of the parables and discourses, which were foreign to his purpose of setting forth the *active* ministry of Christ. Of our Lord's parables he only gives us four: 'the sower,' 'the mustard seed,' and 'the wicked husbandmen'—common also to Matthew and Luke; and one, 'the seed growing secretly,' iv. 26-29 (unless indeed it be an abbreviated and independent form of the 'tares'), peculiar to himself. Of the discourses, he entirely omits the sermon on the mount, the denunciations against the Scribes and Pharisees, and almost entirely the instructions to the twelve; while of the other shorter discourses he only gives that on fasting (ii. 19-22), the Sabbath (ii. 25-28), the casting out devils by Beelzebub (iii. 23-29), on eating with unwashed hands and Corban (vii. 6-23), and divorce (x. 5-9). That on 'the last things' (xiii.) is the only one reported at any length. On the other hand, his object being to develop our Lord's Messianic character in deeds rather than words, he records the greater part of the miracles given by the Synoptists. Of the twenty-seven narrated by them, eighteen are found in St. Mark, twelve being common to all three; three—the Syrophenician's daughter, the feeding of the four thousand, and the cursing of the fig-tree—common to him and

St. Matthew; one—the demoniac in the synagogue—to him and St. Luke; and two—the deaf stammerer (vii. 31-37), and the blind man at Bethsaida (viii. 22-26), (supplying remarkable points of correspondence, in the withdrawal of the object of the cure from the crowd, the use of external signs, and the gradual process of restoration)—peculiar to himself. Of the nine omitted by him, only three are found in St. Matthew, of which the centurion's servant is given also by St. Luke. The others are found in St. Luke alone. If we suppose that St. Mark had the Gospels of St. Matthew and St. Luke before him, it is difficult to assign any tolerably satisfactory reason for his omission of these miracles, especially that of the centurion's servant, so kindred to the object of his work. On the contrary hypothesis, that they copied from him, how can we account for their omitting the two remarkable miracles mentioned above?

The arrangement of the narrative, especially of our Lord's earlier Galilean ministry, agrees with St. Luke in opposition to that of St. Matthew, which appears rather to have been according to similarity of subject than order of time.

According to Norton (*Genuineness of Gospels*) there are not more than twenty-four verses in Mark to which parallels, more or less exact, do not exist in the other Synoptists. The same painstaking investigator informs us, that while the *general* coincidences between St. Mark and one of the other two amount to thirteen-fourteenths of the whole gospel, the *verbal* coincidences are one-sixth, and of these four-fifths in St. Mark occur in the recital of the words of our Lord and others; and only one-fifth in the narrative portion, which, roughly speaking, forms one-half of his gospel.

Additions peculiar to St. Mark are, 'the Sabbath made for man' (ii. 27); our Lord's friends seeking to lay hold on Him (iii. 21); many particulars in the miracles of the Gadarene demoniac (v. 1-20); Jairus's daughter, and the woman with issue of blood (v. 22-43); the stilling of the tempest (iv. 35-41), and the lunatic child (ix. 14-29); the salting with fire (ix. 49); that 'the common people heard Him gladly' (xii. 37); the command to watch (xiii. 33-37); the young man with the linen cloth about his body (xiv. 51); the want of agreement between the testimony of the false witnesses (xiv. 59); Pilate's investigation of the reality of Christ's death (xv. 44), and the difficulty felt by the women as to the rolling away the stone (xvi. 3, 4). St. Mark has also preserved several words and phrases, and entire sayings of our Lord, which merit close attention (i. 15; iv. 13; vi. 31, 34; vii. 8; viii. 38; ix. 12, 39; x. 21, 24, 30; xi. 17; xiii. 32; xiv. 18-37; xvi. 7, [15-18]).

4. *Characteristics.*—In the gospel now under review, our Lord is presented to us, not as in St. Matthew, as the Messiah, the Son of David and Abraham, the theocratic King of the chosen people; nor, as in St. Luke, as the universal Saviour of our fallen humanity; but as the 'incarnate and wonder-working Son of God, for whose emblem the early church justly selected 'the lion of the tribe of Judah.' His record is emphatically 'the gospel of Jesus Christ, the Son of God' (Mark i. 1), living and working among men, and developing His mission more in acts than by words. The limits of his narrative and its general character can hardly be better stated than in the words of his great teacher, Acts x. 36-42.

Commencing with the Baptist preaching in the wilderness, and announcing the 'Mightier One' who was at hand, he tells us how, at His baptism, 'God anointed Jesus of Nazareth with the Holy Ghost and with power,' and declared Him to be His 'Beloved Son,' gathering up the temptation into the pregnant fact, 'He was with the wild beasts;' thus setting the Son of God before us as the Lord of nature, in whom the original grant to man of dominion over the lower creation was fulfilled (Maurice, *Unity of N. T.*, p. 226; Bengel, *in loc.*; Wilberforce, *Doctrine of Incarnation*, pp. 89, 90). As we advance, we find him detailing every exercise of our Lord's power over man and nature distinctly and minutely—not merely chronicling the incidents, as is St. Matthew's way, but surrounding them with all the circumstances that made them impressive to the bystanders, and making us feel how deep that impression was; how great the awe and wonder with which His mighty works and preaching were regarded, not only by the crowd (i. 22, 27; ii. 12; vi. 2), but by the disciples themselves (iv. 41; vi. 51; x. 24, 26, 32); how the crowds thronged and pressed upon Him (iii. 10; v. 21, 31; vi. 33; viii. 1), so that there was scarce room to stand or sit (ii. 2; iii. 32; iv. 1), or leisure even to eat (iii. 20; vi. 31); how His fame spread the more He sought to conceal it (i. 45; iii. 7; v. 20; vii. 36, 37); and how, in consequence, the people crowded about Him, bringing their sick (i. 32-34; iii. 10); and 'whithersoever He entered into villages, or cities, or country, they laid the sick in streets, and besought that they might touch, if it were but the border of His garment, and as many as touched were made perfectly whole' (vi. 56); how the unclean spirits, seeing Him, at once fell down before Him and acknowledged His power, crying, 'Thou art the Son of God' (i. 23-26; iii. 11); how, again, in St. Peter's words, 'He went about doing good, and healing all that were oppressed of the devil, for God was with Him.'

But while the element of divine power is that which specially arrests our attention in reading his gospel, there is none in which the human personality is more conspicuous. The single word *ὁ τέκτων* (vi. 3) throws a flood of life on our Lord's early life as man in His native village. The limitation of His knowledge is expressly stated (xiii. 32, *οὐδὲ ὁ Πῖλος*); and we continually meet with mention of human emotions—anger (iii. 5; viii. 12, 33; x. 14), wonder (vi. 6), pity (vi. 34), love (x. 21), grief (vii. 34; viii. 12); and human infirmities—sleep (iv. 38), desire for repose (vi. 31), hunger (xi. 12).

In St. Mark we have no attempt to draw up a continuous narrative. His gospel is a rapid succession of vivid pictures loosely strung together (usually by *καὶ, καὶ πάλιν, or εὐθὺς*), without much attempt to bind them into a whole, or give the events in their natural sequence. This pictorial power is that which specially characterises this evangelist; so that, as has been well said, 'if any one desires to know an evangelical fact, not only in its main features and grand results, but also in its most minute and, so to speak, more graphic delineation, he must betake himself to St. Mark' (Da Costa, *Four Witnesses*, p. 88). This power is especially apparent in all that concerns our Lord Himself. Nowhere else are we permitted so clearly to behold His very gesture and look; see His very position; to read His feelings and to hear His very

words. It is St. Mark who reveals to us the comprehensive gaze of Christ (*περιβλεψάμενος*, iii. 5, 34; v. 32; x. 23; xi. 11); His loving embrace of the children brought to Him (*ἐναγκαλισάμενος*, ix. 36; x. 16); His preceding His disciples, while they follow in awe and amazement (x. 32). We see Him taking His seat to address His disciples (*καθίσας*, ix. 35); and turning round in holy anger to rebuke Peter (*ἐπισταραφείς*, viii. 33); we hear the sighs which burst from His bosom (vii. 34; viii. 12), and listen to His very accents ('*Talitha cumi*,' v. 41; 'Ephphatha,' vii. 34; 'Abba,' xiv. 36). At one time we have an event portrayed with a freshness and pictorial power which places the whole scene before us with its minute accessories—the paralytic (ii. 1-12), the storm (iv. 36-41), the demoniac (v. 1-20), Herod's feast (vi. 21-29), the feeding of the 5000 (vi. 30-45), the lunatic child (ix. 14-29), the young ruler (x. 17-22), Bartimeus (x. 46-52), etc. At another, details are brought out by the addition of a single word (*κύβας*, i. 7; *σχίζομένους*, i. 10; *σπλαγχνισθείς*, i. 41; *τοῖς ἔξω*, iv. 11; *προσωμίσθησαν*, vi. 53; *ἔσθωθεν*, *ἔξωθεν*, vii. 21, 23; *κράζας*, *σπαράζας*, ix. 26; *στυγνάσας*, x. 22; *συντρίψασα*, xiv. 3; *ἐμβλέψασα*, xiv. 67); or by the substitution of a more precise and graphic word for one less distinctive (*ἐκβάλλει*, i. 12; *ἐξίστασθαι*, ii. 12; *γемίξεσθαι*, iv. 37; *ἐξηράνθη*, v. 29; *ἀποσταζόμενος*, vi. 46; *ἀθετεῖτε*, vii. 9; *ἐκθαμβεῖσθαι*, xiv. 33). It is to St. Mark, also, that we are indebted for the record of minute particulars of persons, places, times, and number, which stamp on his narrative an impress of authenticity.

(1.) *Persons*.—i. 20; ii. 14; iii. 5, 17, 32, 34; iv. 11; v. 32, 37, 40; vi. 40, 48; vii. 1, 25, 26; viii. 10, 27; ix. 15, 36; x. 16, 23, 35, 46; xi. 21, 27; xiii. 1, 3; xiv. 20, 37, 65; xv. 7, 21, 40, 47; xvi. 7.

(2.) *Places*.—i. 28; iv. 1, 38; v. 11, 20, 21; vi. 55; vii. 17, 31; viii. 10, 27; ix. 30; xi. 4; xii. 41; xiv. 66; xv. 16, 39; xvi. 5.

(3.) *Time*.—i. 32, 35; ii. 1, 26; iv. 35; v. 2, 18, 21; vi. 2; xi. 11, 19, 20; xiv. 1, 12, 17, 30, 68, 72; xv. 1, 25, 33, 34, 42; xvi. 1, 2.

(4.) *Number*.—v. 13, 42; vi. 7; viii. 24; xiv. 30, 72.

Other smaller variations are continually occurring. Here a single word, there a short parenthesis, sometimes an apparently trivial accession—which impart a striking air of life to the record; e.g., Zebedee left with the hired servants (i. 20); our Lord praying (i. 35); the paralytic borne of four (ii. 3); the command that a ship should wait on Him (iii. 9); 'thy sisters' (iii. 32); our Lord taken 'even as He was in the ship' (iv. 36); 'other little ships with them' (*ibid.*); Jairus' daughter 'walked' (v. 42); 'divers came from far' (viii. 3); only 'one loaf' in the ship (viii. 14); 'so as no fuller on earth can white' (ix. 2); the danger of *trusting* in riches (x. 24); 'with persecutions' (x. 30); 'no vessel suffered to be carried through the temple' (xi. 16); 'a house of prayer for all nations' (xi. 17); 'she hath done what she could' (xiv. 8); Barabbas, one of a party of insurrectionists *all* guilty of bloodshed (xv. 7).

We cannot conclude our remarks on this head better than in the words of Mr. Westcott (*Introd.*, p. 348)—that 'if all other arguments against the mythic origin of the evangelic narratives were wanting, this vivid and simple record, stamped with the most distinct impress of independence

and originality, would be sufficient to refute a theory subversive of all faith in history.'

5. *Style and Diction*.—The style of St. Mark may be characterised as vigorous and abrupt. His terms of connection and transition are terse and lively; he is fond of employing the direct for the indirect (iv. 39; v. 8, 9, 12; vi. 23, 31, 37; ix. 25, 33; xii. 6), the present for the past (i. 25, 40, 44; ii. 3, 4, 5; iii. 4, 5, 13, 20, 31, 34; iv. 37, etc. etc.), and the substantive instead of the pronoun; he employs the cognate accusative (iii. 28; vii. 13; xiii. 19; iv. 41; v. 42), accumulates negatives (*οὐκ ἐτι οὐδεὶς*, vii. 12; ix. 8; xii. 34; xv. 5; *οὐκ ἐτι οὐ μὴ*, xiv. 25; *μηκέτι μηδεὶς*, xi. 14), and for sake of emphasis repeats what he has said in other words, or appends the opposite (i. 22, 45; ii. 27; iii. 26, 27, 29; iv. 17, 33, 34), and piles up synonyms (iv. 6, 8, 39; v. 12, 23; viii. 15; xiii. 33; xiv. 68), combining this forcible style with a conciseness and economy of expressions consistent with the elaboration of every detail.

St. Mark's diction is nearer to that of St. Matthew than to St. Luke. It is more Hebraistic than the latter, though rather in general colouring than in special phrases. According to Davidson (*Introd.*, i. 154), there are forty-five words peculiar to him and St. Matthew, and only eighteen common to him and St. Luke. Aramaic words, especially those used by our Lord, are introduced, but explained for Gentile readers (see below). Latinisms are more frequent than in the other gospels; *κεντρίων*, xv. 39, 44, 45; *σπεκουλάτωρ*, vi. 27; *τὸ ἱκανὸν ποιῆσαι*, xv. 15; *ἔσσης*, vii. 4, 8; are peculiar to him. Others, *ὄρνιθιον*, *κῆρσος*, *λεγιών*, *πραιτώριον*, *φραγελλῶς*, *κοδράντης*, he has in common with others of the evangelists. He is fond of diminutives, *θυγάτριον*, *κοράσιον*, *κυνάρια*, *ώτάριον*, but they are not peculiar to him. He employs unusual words and phrases, e.g., *ἀλαλάζειν*, *ἐπισυντρέχειν*, *κωμόπολις*, *μεγιστάνες*, *νάρδος πιστική*, *ρουνεχῶς*, *παιδιῶθεν*, *πλοῖάριον*, *προμεριμνῶν*, *τρυμαλία*, *ὑπολήριον*, *στοιβάς*, *σμιρνιζόμενος οἶνος*, *συνθλίβειν*, *ἐντελεῖν*. Of other noticeable words and expressions we may remark, *ἀκάθαρτον πνεῦμα*, eleven times, Matt. six, Luke three; *ἤρξατο λέγειν*, *κράζειν*, twenty-five times; *διεστέλλω*, and *-στέλλω*, five times, Matt. once; compounds of *πορεύεσθαι*; e.g., *εἰσπορ.*, eight times, Matt. once, Luke four; *ἐκπορ.*, eleven times, Matt. six, Luke three; *παρπορ.*, four times, Matt. once; *προσπορ.* The verb *ἐπερωτᾶω* occurs twenty-five times, to eight times in Matt. and eighteen in Luke; *εὐαγγελίζω*, eight times, Matt. four, but the verb not once; *εὐθέως*, forty times, Matt. fifteen, Luke eight. Other favourite words are, *κηρύσσειν*, fourteen, Matt. nine, Luke nine; *μακρόθεν*, five, Matt. two, Luke four; *οὐκέτι* and *μηκέτι*, ten, Matt. three, Luke four; *περιβλέπω*, six times, Luke once; *πιστεύω*, fourteen, Matt. eleven, Luke nine; *πρῶτ.*, six times, Matt. twice, John once; *φέρω*, thirteen, Matt. four, Luke four times. Of words only found in St. Mark, as compared with St. Matthew and St. Luke, we may mention—*ἀμάρτημα*, *ἀναθεματίζω*, *ἐξάπινα*, *εὐκαιρος*, and *-ρος*, *ἐσχίμων*, *ἡδέως*, *θαμβεῖσθαι*, *θυρῶδ.*, *κτίσις*, *κυλιόμαι*, *μογιάλος*, *μορφή*, *παράβλαιν*, *παράδεχέσθαι*, *παρόμοιος*, *προστρέχω*, *συνπῶσις*, *συστασιαστής*, *στίλβειν*, *σκόληξ*. Words not found at all, or found less frequently in St. Mark, are—*ἀγαθός*, only twice, in the same context (x. 17, 18), Matt. sixteen, Luke fifteen times; *νόμος*, *παῖς*, *στόμα*, *ὥσπερ*, *ἀνοίγω*, *δξιος*,

κελεύω, μεριμνάω, μακάριος, ὀφείλω, καλέω, only three times, to Matt. twenty-six, Luke forty-two; πέμπω, only once; Χριστός, seven, Matt. sixteen, Luke thirteen. Publicans are only mentioned twice, Samaria and its inhabitants not once.

6. *Whom written for.*—A dispassionate review of the gospel confirms the traditional statement that it was intended primarily for Gentiles, and among these the use of Latinisms, and the concise abrupt character 'suitable for the vigorous intelligence of a Roman audience' (Westcott, *Introd.*, p. 348), seem to point out those for whom it was specially meant. In consistency with this view, words which would not be understood by Gentile readers are interpreted, Boanerges (iii. 17); Talitha cumi (v. 40); Corban (vii. 11); Bartimeus (x. 46); Abba (xiv. 36); Eloi lama sabachthani (xv. 34); two mites 'make a farthing' (xii. 42); Gehenna is 'unquenchable fire' (ix. 43); Jewish usages, and other matters with which none but Jews could be expected to be familiar, are explained, e.g., the washing before meals (vii. 3, 4); in the days of unleavened bread the Passover was killed (xiv. 12); at the Passover the season of figs was not come (xi. 13); the preparation is 'the day before the Sabbath' (xv. 42); the Mount of Olives is 'over against the Temple' (xiii. 3). All reference to the law of Moses is omitted, and even the word νόμος does not occur; the Sabbath was appointed for the good of man (ii. 27); and in the quotation from Isaiah (lvi. 7) he adds 'of all nations.' In conclusion, the absence of all quotations from the O. T. made on his own authority, with the exception of those in the opening verses from Mal. iii. 1, Is. xl. 3 (xv. 28 being rejected as interpolated), points the same way. The only citations he introduces are those made by our Lord, or by those addressing Him.

7. *Citations from Scripture.*—The following are the only direct citations:—

Mal. iii. 1 - i. 2.	(b) Is. lvi. 7 - - } xi. 17.
Is. xl. 3 - - i. 3.	Jer. vii. 11 - - }
Is. vi. 9, 11 - iv. 12.	Ps. cxviii. 22, 23 xii. 10, 11.
Is. xxix. 13 - vii. 6.	Deut. xxv. 5 - 19.
Ex. xx. 12 - - }	Ex. iii. 6 - - 26.
xxi. 17 } 10.	Deut. vi. 4 - 29, 30.
(a) Is. lxvi. 24 - ix. 44, 46,	Lev. xix. 18 - 31.
48.	Ps. cx. 1 - - 36.
Gen. i. 27 - - x. 6.	Dan. ix. 27 } xiii. 14.
Gen. ii. 24 - - 7, 8.	xii. 11 }
Ex. xx. 12-15 - 19.	Zech. xiii. 7 - xiv. 27.
Ps. cxviii. 25, 26 xi. 9.	Is. liii. 12 (?) - xv. 28.
	Ps. xxii. 1 - 34.

Of these (a) is the only one peculiar to St. Mark. In (b) we have the addition of a few words to the Synoptical quotation. We have also references to the O. T. in the following passages:—

Lev. xiv. 2 - - i. 44.	Is. xiii. 10 - - xiii. 24.
1 Sam. xxi. 6 - - ii. 25.	Dan. vii. 13 - - xiv. 62.
Deut. xxiv. 1 - - x. 4.	

8. *Time and Place of Composition.*—On these points the gospel itself affords no information, except that we may certainly affirm, against Baur, Hilgenfeld, Weiss, etc., that it was composed before the fall of Jerusalem, since otherwise so remarkable a fulfilment of our Lord's predictions could not but have been noticed. Ecclesiastical tradition is, as usual, vacillatory and untrustworthy. Clement, as quoted by Eusebius, *u.s.*, places the composition of the gospel in the lifetime of Peter,

while Irenæus, with much greater probability, asserts that it was not written till after the decease (ἐξοδόν, not 'departure from Rome,' Mill, Grabe, Ebrard) of Peter and Paul. Later authorities are, as ever, much more definite. Theophylact and Euthym. Zigab., with the Chron. Pasch. Gregor. Syncell., and Hesychius, place it ten years after the Ascension, *i.e.*, A. D. 40; Eusebius, in his *Chronicon*, A. D. 43, when Peter, Paul, and Philo were together in Rome. We may probably correctly date it between Peter's martyrdom, *circa* A. D. 63, and the destruction of Jerusalem, A. D. 70.

As to the place, the uniform testimony of early writers (Clement, Eusebius, Jerome, Epiphanius, etc.) is, that the gospel was written and published in Rome. In this view most modern writers of weight agree. Chrysostom asserts that it was published in Alexandria, but his statement is not confirmed, as if true it must certainly have been, by any Alexandrine writer. Some (Eichhorn, R. Simon) maintain a combination of the Roman and Alexandrine view under the theory of a double publication, first in one city and then in the other. Storr is alone in his view that it was first made public at Antioch.

9. *Language.*—There can be no reason for questioning that the gospel was composed in Greek. To suppose that it was written in Latin—as is stated in the subscription to the Peshito, and some early Greek MSS., ἐγράφη Ῥωμαῖσι ἐν Ῥώμῃ—because it was intended for the use of Roman Christians, implies complete ignorance of the Roman Church of that age, which in language, organization, and ritual, was entirely Greek, maintaining its character in common with most of the churches of the west as 'a Greek religious colony' (Milman, *Lat. Christ.*, i. 27). The attempt made by Baronius, Bellarmine, etc., to strengthen the authority of the Vulgate by this means was therefore, as one of their own church, R. Simon, has shown, entirely futile; and the pretended Latin autograph, said to be preserved in the library of St. Mark's at Venice, turned out to be part of an ancient Latin codex of the four gospels, now known as 'Cod. Forojuliensis.'

10. *Contents.*—The Gospel of St. Mark may be divided into three parts.

(1.) The occurrences previous to the commencement of the public ministry of our Lord, including the preaching and baptism of John, our Lord's baptism and temptation (i. 1-13).

(2.) Our Lord's ministry in Galilee, including that in Eastern Galilee (i. 14-vii. 23); that in Northern Galilee (vii. 24-ix. 37); that in Peræa, and the journeyings toward Jerusalem (ix. 38-x. 52).

(3.) His triumphant entry, passion, death, resurrection, and ascension (xi. 1-xvi. 8 [20]).

11. *Genuineness and Integrity.*—The genuineness of St. Mark's Gospel was never doubted before Schleiermacher, who, struck by an apparent discrepancy between the orderly narrative we now possess and the description of Papias, *u.s.*, broached the view followed by Credner, Ewald, and others, that the gospel in its present form is not the work of Mark the companion of Peter. This led to the notion, which has met with much acceptance among German critics (Baur, Hilgenfeld, Köstlin, etc.), of an original, præcanonical, Mark, 'the Gospel of Peter,' probably written in Aramaic, which, with other oral and documentary sources, formed the basis on which some unknown later

writers formed the existing gospel. But even if, on other grounds, this view were probable, all historical testimony is against it; and we should have to account for the entire disappearance of an original document of so much importance without leaving a trace of its existence, and the silent substitution of a later work for it, and its acceptance by the whole church. If ordinary historical testimony is to have any weight, we can have no doubt that the gospel we now have, and which has always borne his name, was that originally composed by St. Mark. We can have no reason to think that either John the presbyter or Papias were infallible, and if the ordinary interpretation of *ὁ ράξει* was correct, and the description of the gospel given by Papias was really at variance with its present form, it would be at least equally probable that their judgment was erroneous, and their view mistaken. There can, however, be little doubt that the meaning of *ὁ ράξει* has been strained and distorted, and that the words do really describe not St. Mark's alone, but all three Synoptic Gospels as we have them; not, that is, 'Lives of Christ' chronologically arranged, but 'a summary of representative facts' given according to a moral and not a historic sequence, following a higher order than that of mere time.

As regards the integrity of the gospel, Ewald, Reuss, and others, have called in question the genuineness of the opening verses (i. 1-13). But the external evidence for them is as great as that for the authenticity of any part of the gospels. Internal evidence is too subtle a thing, and varies too much with the subjectivity of the writer, for us to rely on it exclusively.

The case is very different with the closing portion (xvi. 9-20), where the evidence, both external and internal, is very strong against its having formed a part of St. Mark's original gospel; which, for causes on which it is now idle to speculate, appears to have broken off abruptly with the words *ἐφοβήντο γὰρ* (for various theories to account for this, the death of St. Peter, that of St. Mark, sudden persecution, flight, the loss of the last leaf, etc., see Hug, Meyer, Schott). No less than twenty-one words and expressions occur in it, some of them repeatedly, which are never elsewhere used by St. Mark. This alone, when we remember the peculiarities of diction in the pastoral epistles, as compared with St. Paul's other writings, would not be sufficient to prove that it was not written by the same author; though when taken in connection with the external evidence, it would seem to show that it was not composed at the same time. On this ground, therefore, we must conclude that if not the work of another hand, it was written at a later period than the rest of the gospel. The external evidence, though somewhat inconsistent, points the same way. While it is found in all codices of weight, including A, C, D, and all versions, and is repeatedly quoted, without question, by early writers from the time of Irenæus (*Hæc.* iii. 10. 6), and appears in the very ancient Syriac recension published by Cureton, it is absent from the Vatican and Sinaitic MSS. (in the former of which, after the subscription, the greater part of the column and the whole of the next are left vacant, a phenomenon nowhere else found in the N. T. portion of the codex), while in several MSS. that contain it, it is noted that it is wanting in others, and those the most accurate copies.

Jerome (*ad Hedib.* iv. 172) speaks of it as being found in but few copies of the gospels, and deficient in almost all the Greek MSS. Eusebius (*ad Marin.* Quest. I.) states that it is wanting 'in nearly all the more accurate copies,' while the canons that bear his name and the Ammonian sections do not go beyond v. 8. Of later critics, Olshausen and De Wette pronounce for its genuineness. The note of the latter may be consulted, as well as those of Alford and Meyer, who take the other side, for a full statement of the evidence for and against. The citation of v. 19 as Scripture by Irenæus appears sufficient to establish its canonicity.

With regard to St. Mark's Gospel generally, as it presents so few facts peculiar to himself, we cannot be surprised that there are but few references to it in the early Fathers. The Muratorian canon, however (*circa* 170), commences with words which evidently refer to it. It is mentioned by Papias. Justin Martyr refers to it for the name Boanerges (*Tryph.* 106), as the 'Memoirs of Peter.' Irenæus, as we have seen above, quotes from it, and in the 19th Clementine Homily (ed. Dusseld. 1853) a peculiar phrase of St. Mark (iv. 34) is repeated verbatim. The fact also recorded by Irenæus (*Hæc.* iii. 11. 7), that the Docetic heretics preferred the Gospel of St. Mark to the others, affords an early proof of its acceptance in the church.

*Commentaries.*—The Gospel of St. Mark has been the subject of but few separate commentaries. In addition to the works on the gospels and the N. T. generally, Walch mentions special comments and annotations by the Lutheran divines, Hegendorf, Erasmus Sarcenius, Winckelman, Klemm, and Heupel, as well as by Myconius and Danæus of the Reformed, and Del Pas and Novarinus of the Romish Church. We may also refer to the works of Elsner, Van Wiles, and Baumgarten-Crusius, Baur, and Hilgenfeld, and the very suggestive little treatise of Kenrick in his recently published *Biblical Essays*.—E. V.

MARLORATUS, AUGUSTINUS, a French Protestant divine, born at Bar-le-Duc, department of Meuse, in the year 1506. Left an orphan at an early age, he was placed by his guardian in a monastery of the Augustinians, and in his eighteenth year he took the monastic vows, and subsequently became prior of the convent at Bourges. As early as 1533 he began to exhibit in his sermons some approach towards the reformed doctrines. After some time he openly avowed himself a Protestant, and, to save his life, fled to Geneva. Here he worked for a while as a corrector of the press, but subsequently removed to Lausanne, and gave himself to the study of theology. In 1549 he was appointed pastor at Crissier, and a little later was invited to Vevey. In 1560 he was called to the responsible duty of superintending the Reformed Church at Rouen. He took a prominent part at the Conference of Poissy in 1561, and in May of the same year presided at the Provincial Synod at Dieppe. In the spring of the following year war began between the Huguenots and Catholics, and Rouen was seized by the former. Although Marlatus laboured to the utmost to moderate the violence of the Protestants, and kept aloof from all political affairs, he was apprehended by the royalists, after the recapture of the town, and condemned

to death. He was executed in front of the church of Notre-Dame on 30th October or 1st November 1563. His various exegetical works may be best described as a painstaking and not injudicious selection of the interpretations of other writers, of all ages of the Church. They are—1. *Novi Testamenti Catholica expositio ecclesiastica seu bibliotheca expositionum Novi Testamenti*, Genev. 1561, fol. This work passed rapidly through a large number of editions, and several portions have been translated into English, the Gospels of Matthew, Mark, and Luke, by Thomas Timme, 1570-83; John, 1575; Jude, by J. D., 1584; and the Apocalypse, by Arthur Golding, 1574. 2. *In 150 Psalmos Davidis et aliorum SS. Prophetarum explicatio ecclesiastica, sive bibliotheca expositionum in Psalmos. Item Cantica sacra ex diversis Bibliorum locis cum simili expositione*, Genev. 1562, fol. Selections from this were translated into English under the title *Prayers in the Psalms*, by Rodolph Warcup, Lond. 1571, 16mo. 3. *Esaie Prophetia cum cath. exp. eccl.*, Paris 1564, Genev. 1610, fol. 4. *Expositio in Jobum*, Genev. 1585. 5. *Genesis, cum cath. exp. eccl.*, Paris 1562.—S. N.

MAROTH (מָרוֹת; pl. of מָרָה 'bitterness'; *δδύας*; in *doloribus*), a place mentioned only in Mic. i. 12; the situation is not indicated, though it would seem from the passage not to have been far distant from Jerusalem. The verse may be translated as follows: 'The dweller in Maroth surely grieveth for goods (לְטוֹבוֹ), for evil hath come from the Lord to the gate of Jerusalem' (See Rosenmüller and De Wette, *ad loc.*) Reference is apparently made to the army of Rabshakeh coming from Lachish (cf. 2 Kings xviii. 17). The name is radically different from *Maarath* (מֵעֶרֶת) of Josh. xv. 59.—J. L. P.

MARRIAGE. It is very remarkable, as well as significant, that there is no word in the whole Hebrew Scriptures for *the estate of marriage*, or to express the abstract idea of *wedlock*, *matrimony*, as the Germ. *che* does. It is only in the post-exile period, when the laws of marriage had gradually developed themselves, that we meet with the abstract מִשְׁוֹת וְזוֹן = *ἑσθῆς* (*Jerusalem Jebamoth*, vi. 5; *Jerusalem Kiddushin*, i. 2; *Babylon Jebamoth*, 52 b; 59 b; *Kiddushin*, 1, 2 b); the former denoting *the legal*, and the latter *the natural* side of matrimony. But even then no such definition of marriage is to be found in the Hebrew writings, as we find in the Roman law, *nuptie sunt conjunctio maris et femine et consortium omnis vite, divini et humani juris communicatio* (*Dig.*, lib. xxiii. tit. 2, De ritu nupt.) This makes it sufficiently evident that, in discussing the question of marriage, it is most essential to keep the notices of each period separate, so as not to transfer from one epoch into another those usages and laws which were called into existence by the special circumstances of each period, and gradually developed themselves with the growth of the nation. Accordingly, we have to distinguish three periods; viz.—i. The pre-Mosaic period; ii. The period dating from the giving of the Law to the Babylonish captivity; and iii. The post-exile period.

#### i. THE PRE-MOSAIC PERIOD.

1. *Mode of selecting a Bride, Betrothal and Marriage-price*.—Imitating the example of the Father of the Universe, who provided the man he made

with a wife, fathers from the beginning considered it both their duty and prerogative to find or select wives for their sons (Gen. xxiv. 3; xxxviii. 6). In the absence of the father, the selection devolved upon the mother (Gen. xxi. 21). Even in cases where the wishes of the son were consulted, the proposals were made by the father (Gen. xxxiv. 4, 8); and the violation of this parental prerogative on the part of the son was 'a grief of mind' to the father (Gen. xxvi. 35). The proposals were generally made by the parents of the young man, except when there was a difference of rank; in such a case the negotiations proceeded from the father of the maiden (Exod. ii. 21), and when accepted by the parents on both sides, sometimes also consulting the opinion of the adult brothers of the maiden (Gen. xxiv. 51; xxxiv. 11), the matter was considered as settled without requiring the consent of the bride. The case of Rebekah (Gen. xxiv. 58) forms no exception to this general practice, inasmuch as the alliance had already been concluded between Eleazar and Laban, and the question put to her afterwards was, to consult her opinion, not about it, but about the time of her departure. Before, however, the marriage-contract was finally concluded, a price (מֹדָר) was stipulated for, which the young man had to pay to the father of the maiden (Gen. xxxi. 15; xxxiv. 12), besides giving presents (מִתְּנָן) to her relations (Gen. xxiv. 53; xxxiv. 12). This marriage-price was regarded as a compensation due to the parents for the loss of service which they sustained by the departure of their daughter, as well as for the trouble and expense which they incurred in her education. Hence, if the proffered young man had not the requisite compensation, he was obliged to make it up in service (Gen. xxix. 20; Exod. ii. 21; iii. 1). Some indeed deny that a price had to be paid down to the father for parting with his daughter, and appeal for support to Gen. xxxi. 15, where, according to them, 'the daughters of Laban make it a matter of complaint, that their father bargained for the services of Jacob in exchange for their hands, just as if they were *strangers*;' thus showing that the sale of daughters was regarded as an unjust act and a matter of complaint (Saalschütz, *Das Mosaische Recht*, p. 733; Mr. Bevan, in *Smith's Dictionary of the Bible*, s.v. *Marriage*). But, on a closer inspection of the passage in question, it will be seen that Rachel and Leah do not at all complain of any indignity heaped on them by being sold just as if they were strangers, but, on the contrary, mention the sale, to corroborate their statement that they are no longer their father's property, have no more any portion in his possession, and are now regarded by him as strangers, since, according to the usual custom, they have been duly sold to their husband, and hence agree with the latter that it is time for them to depart. Besides, the marriage-price is distinctly mentioned

\* According to the analogy of דָּהַר from דָּר, לָהֵט from לָהֵט, and מֹדָר from מָדָר is to be derived from מָדָר, to exchange. Hence מֹדָר denotes the exchange, the price given for a bride to her parents (Gen. xxxiv. 12; Exod. xxii. 16; 1 Sam. xviii. 25); Greek, *ἔδωκ*; comp. Gesenius, *Hebr. Handwörterbuch*, ed. Dietrich, Leipzig 1863; and Fürst, *Hebr. Handwörterbuch*, s.v.

in other passages of Scripture (Exod. xxii. 15, 16; 1 Sam. xviii. 23, 25; Ruth iv. 10; Hos. iii. 2), and was commonly demanded by the nations of antiquity; as the Babylonians (Herod. i. 196); Assyrians (Ælian, *V. H.*, iv. 1; Strabo, xvi. 745); the ancient Greeks (*Odys.*, viii. 318, ff.; Arist. *Polit.*, ii. 8; Pausan., iii. 12. 2); the Germans (Tacitus, *Germ.*, xviii.), and still obtains in the East to the present day. In fact, it could not be otherwise where polygamy was practised. As the number of maidens was under such circumstances less than that of wooers, it called forth competition, and it was but natural that he who offered the highest marriage-price obtained the damsel. There was therefore no fixed marriage-price; it varied according to circumstances. We meet with no dowry given with the bride by her father during the patriarchal age, except a maid-servant (Gen. xxiv. 61; xxix. 24, 29).

2. *Marriage*.—When the proposals were accepted, and the marriage-price (מֹדֶר), as well as the sundry other gifts (מִתְּנָה), were duly distributed, the bridegroom (חָתָן) could at once remove the bride (כִּלְהָ) from her father's house to his own house, and this removal of the maiden, under the benedictions of her family, but without any definite religious ceremony whatever, and cohabitation, consummated and expressed *marriage* (לָקַח אִשָּׁה). Thus we are told that Isaac, when meeting Eleazar and Rebekah in the field, as soon as he was informed by the former of what had transpired, took Rebekah to the tent of his departed mother, and this without farther ceremony constituted the marriage, and she *thereby* became his wife (וַתְּהִי לוֹ).

לָאִשָּׁה, Gen. xxiv. 63-67). Under more ordinary circumstances, however, when the bride had not at once to quit her parental roof under the protection of a friend, as in the case just mentioned, but where the marriage took place in the house of the bride's parents, it was celebrated by a feast to which all the friends and neighbours were invited, and which lasted seven days (Gen. xxix. 22, 27). On the day of the marriage, the bride was conducted to her future husband veiled, or more properly in an outdoor wrapper or shawl (צַעֲרֵי), which nearly enveloped her whole form, so that it was impossible to recognise the person, thus accounting for the deception practised on Jacob (Gen. xxiv. 65; xxix. 23), and on Judah (Gen. xxxviii. 14).

3. *Polygamy and Concubinage*.—Though the history of the protoplasts—in which we are told that God in the beginning created a single pair, one of each sex—seems to exhibit a standard for monogamy, yet the Scriptures record that from the remotest periods men had simultaneously several wives, occupying either co-ordinate or subordinate positions. Against the opinion that Lamech, sixth in descent from Adam through Cain, introduced polygamy—based on the circumstance that he is the first who is recorded as having married two wives (Gen. iv. 19)—is to be urged that (1.) Lamech is the first whose marriage or taking of a wife is recorded, and consequently it is impossible to say how many wives his five progenitors had; (2.) The mention of Lamech's two wives is incidental, and is entirely owing to the fact that the sacred historian had to notice the useful inventions made by their respective sons Jabel, Jubal, and Tubal-Cain, as well as to give the oldest piece of

rhythmical composition which was addressed to the wives, celebrating one of these inventions; and (3.) If polygamy had been for the first time introduced by Lamech, the sacred writer would have as distinctly mentioned it as he mentions the things which were first introduced by Lamech's sons. The manner in which Sarah urges Abraham to take her servant Hagar, and the fact that Sarah herself gives the maiden to her own husband

(לָאִשָּׁה) to be his wife, the readiness with which the patriarch accepts the proposal (Gen. xvi. 1-4), unquestionably show that it was a common custom to have one or more secondary wives. In fact, it is distinctly mentioned that Nahor, Abraham's own brother, who had eight sons by Milcah, his principal wife, and consequently did not require another wife for the purpose of securing progeny,

had nevertheless a secondary wife (פְּלִגִּישׁ), by whom he had four sons (Gen. xxii. 21-24). Besides, it is now pretty generally admitted that Gen. xxv. 1 describes Abraham himself to have taken another or secondary wife in the lifetime of Sarah, in addition to Hagar, who was given to him by his principal wife, as is evident from Gen. xxv. 6, 1 Chron. i. 32 [KETURAH], and that he could not have taken her for the sake of obtaining an heir. If any more proof be wanted for the prevalence of polygamy in the patriarchal age, we refer to Esau, who, to please his father, married his cousin Mahalath in addition to the several wives whom he had (Gen. xxviii. 8, 9); and to Jacob, who had not the slightest scruple to marry two sisters, and take two half-wives at the same time (Gen. xxix. 23-30; xxx. 4, 9), which would be unaccountable on the supposition that polygamy was something strange. Though sacred history is silent about the number of wives of the twelve patriarchs, yet there can be little doubt that the large number of children and grandchildren which Benjamin had at so early an age (Gen. xlv. 21; Num. xxvi. 38-41; 1 Chron. vii. 6-12; viii. 1), must have been the result of polygamy; and that Simeon, at all events, had more than one wife (Exod. vi. 15). The extraordinary rate at which the Jews increased in Egypt implies that they practised polygamy during their bondage. This is, moreover, corroborated by the incidental notice that Asher, Judah's grandson, had two wives (1 Chron. iv. 5 with ii. 24); that Caleb, Judah's great-grandson, had three principal and two subordinate wives (1 Chron. ii. 9, 18, 42, 46, 48); that Aharaim, probably Benjamin's great-grandson, had three wives (1 Chron. viii. 8-11); and that Moses had two wives (Exod. ii. 21; Num. xii. 1); as well as by the fact that the Mosaic legislation assumes the existence of polygamy (Lev. xiii. 14; Deut. xxv. 47). Still, the theory of monogamy seems to be exhibited in the case of Noah and his three sons (Gen. vi. 18; vii. 7, 13; viii. 16), of Aaron, and of Eleazar.

4. *Proscribed Degrees and Laws of Inter-marriage*.—There were no proscribed degrees within which a man was forbidden to marry in the pre-Mosaic period. On the contrary, the fact that Adam married 'bone of his bone and flesh of his flesh,' and that his sons married their own sisters, rather engendered the aversion to marry out of one's own kindred. Hence we find that Abraham married his half-sister (Gen. xx. 12); Nahor, Abraham's brother, married the daughter of his brother Haran, or his niece (Gen. xi. 29); Jacob married

two sisters at the same time, who were the daughters of his mother's brother (Gen. xxviii. 2; xxix. 26); Esau married his cousin Mahalath, the daughter of Ishmael (Gen. xxviii. 8, 9); Amram married his aunt Jochebed, his father's sister (Exod. vi. 20); and Judah married his daughter-in-law, Tamar, the widow of his own son (Gen. xxxviii. 26-30). This aversion to intermarriage with strangers and other tribes, which made Abraham pledge his faithful steward by the most sacred oath not to take for his son a wife from the daughters of the Canaanites (Gen. xxiv. 2-4); which occasioned such 'a grief of mind' to Isaac, because his son Esau married Hittite women (Gen. xxvi. 34, 35); and which was the cause of great dissatisfaction in the family of Moses when he married a Midianitish woman (Exod. ii. 21); was afterwards greatly increased on the ground of difference of creed. The same feeling of aversion against intermarriage (*ἐντὶ γαμου*) with foreigners prevailed among other nations of antiquity, and may also have been the cause why marriages with the nearest of kin were practised among them. Thus the Athenians were allowed to marry half-sisters by the father's side (Corn. Nepos, *Pref.*; *Cimon* i.; Plutarch, *Cimon* iv.; *Themistocl.* xxxii.); the Spartans married half-sisters by the same mother (Philo, *de Spec. Leg.*, p. 779); and the Assyrians and Egyptians full sisters (Lucian, *Sacrific.* 5; Diod. i. 27; Philo, *de Spec. Leg.*, p. 779; Selden, *de jure naturali et gentium*, v. 11). In later times, when the desire to preserve purity of blood, which was the primary cause for not intermarrying with alien tribes, was superseded by religious motives, the patriarchal instances of epigamy recorded without censure during this period became very inconvenient. Hence means were adopted to explain them away. Thus the marriage of Judah with a heathen woman, the daughter of Shuah, a Canaanite (Gen. xxxviii. 2), is made orthodox by the Chaldee Paraphrase, the Midrash (*Beresith Rabba*, c. lxxxv.), the Talmud (*Pessachim*, 50 a), Rashi (*in loco*), etc., by explaining כַּנְעָנִי to mean תַּנְרָא, *merchant*, as in Job xl. 30; Prov. xxxi. 24; and the Jerusalem Targum finds it necessary to add that Judah converted her to Judaism (וַיִּירֶה). The marriage of Simeon with a Canaanite (Gen. xli. 10) is explained away in a similar manner (comp. *Beresith Rabba*, c. lxxx.; and Rashi on Gen. xli. 10).

5. *Sanctity of Marriage, and Mutual Rights of Husband and Wife.*—Though at the creation the wife occupied an equal position with the husband, being a part of him, yet as she became the cause of his sin, God ordained it as part of her punishment that the wife should be in subjection to the will of her husband, and that he should be her master, and 'rule over her' (Gen. iii. 16). This dependence of the wife on her husband is henceforth declared by the very Hebrew appellation (בעל) for husband (Exod. xxi. 3, 22), which literally denotes *lord, master, owner*, and is seen in the conduct of Sarah, who speaks of her husband Abraham as (אדני) *my lord* (Gen. xviii. 12), which is commended by St. Peter as illustrating the proper position of a wife (1 Pet. iii. 6). From this mastery of the husband over the wife arose the different standard of virtue which obtained in married life. The wife, as subject to her husband, her lord and master, was not allowed to practise polyandry; she was obliged to regard the sanctity

of marriage as absolute, and any unchastity on her part was visited with capital punishment; whilst the husband could take any unmarried woman he liked and violate the laws of chastity, as we should view it, with impunity (Gen. xxxviii. 24). This absolute sanctity of marriage on the part of the wife was also acknowledged by other nations of antiquity, as is gathered from the narratives of the patriarchs. Thus Abraham knew that Pharaoh would not take Sarah from her husband, and we are told that as soon as the Egyptian monarch discovered that she was a married woman, he immediately restored her to her husband (Gen. xii. 15-19); and this is confirmed by Egyptology, which, based on ancient writers and monuments, shows that he who seduced a married woman received a thousand rods, and that the woman had her nose cut off (Uhlemann, *Egypt. Alterthumsk.*, 11, sec. 25, 65). The same sanctity was attached to a married woman in Philistia (Gen. xx. 1-18; xxvi. 9-11).

6. *Divorce.*—The arbitrary power of the husband over his wife in the patriarchal age is also seen in the fact that he could divorce her at his pleasure. There is but one instance of it recorded, but it is a very significant one. Abraham, though he has a child by Hagar, sends away his half-wife, not requiring any legal or religious intervention (Gen. xxi. 14), but, as in the case of marriage, effecting it by a mere verbal declaration.

7. *Levirate Law.*—The only power which a woman had over the man during this period in matrimonial matters, was when her husband died without issue. The widow could then claim his next brother to marry her; if the second also died without progeny, she could ask the third, and so on. The object of this Levirate-marriage, as it is called, from the Latin, *levir*, brother-in-law (Hebrew, יָבֵם; Greek, *ἐπιγαμβρέω*), is 'to raise up seed to the departed brother,' which should preserve his name upon his inheritance, and prevent it from being erased from among his brethren, and from the gate of his town (Gen. xxxviii. 8; Deut. xxv. 6; Ruth iv. 10); since the Hebrews regarded childlessness as a great evil (Gen. xvi. 4; xix. 31), and entire excision as a most dire calamity and awful punishment from God (Deut. ix. 14; Ps. ix. 7; cix. 15). To remove this reproach from the departed, it was regarded as the sacred duty of the eldest surviving brother to marry the widow, and the first-born son resulting from such an alliance was to all intents and purposes considered as the representative and heir of the deceased. Thus we are told that when Er, Judah's eldest son, who was married to Tamar, died without issue, the second son was called upon to marry his deceased brother's widow, and that when he again died leaving no children, Tamar, the widow, had still a claim upon the only surviving son, for whom she had to wait, as he was not as yet marriageable (Gen. xxxviii. 6-12, 14, 26). Ultimately, Judah himself had to marry his daughter-in-law, for she inveigled him into it as a punishment for neglecting to give her his third son (Gen. xxxviii. 26-30); and Pharez, the issue of this Levirate-marriage, not only became the founder of a numerous and illustrious family, but was the direct line from which the royal family of David descended, and the channel through which the Messiah was born (Gen. xxxviii. 29, with Matt. i. 3). This Levirate-marriage was not peculiar to the Hebrews. It also obtained among

the Moabites (Ruth i. 11-13), Persians (Kleuker, *Zendavesta*, iii. 226), Indians (*Asiatic Researches*, iii. 35), and still exists in Arabia (Burekhardt, *Notes* i., p. 112; Niebuhr, *Voyage*, p. 61), among the tribes of the Caucasus (Hanthausen, *Transcaucasia*, p. 403), and other nations (comp. Leyser, in *Herzog, Real-Encyclopädie* viii. 358, s. v. *Leviratsche*).

## ii. THE PERIOD FROM THE GIVING OF THE LAW TO THE BABYLONISH CAPTIVITY.

As the aim of the Mosaic enactments was not to uproot the ancient institutions which obtained among the people, but simply to mitigate certain evils connected with them, as well as to bring those practices thus ameliorated and modified under the regulations and amenableness of law, we shall best see to what degree this was effected, by discussing the different regulations bearing upon the diverse points of the marriage-question, in the same order as we have detailed them in the pre-Mosaic period.

1. *Mode of Selecting a Bride—Betrothal and Marriage-price.*—The Mosaic enactments introduced no changes into these usages. The father's power over the child in matters of marriage continued paramount, and he could give his children to any one he pleased without asking their consent. Thus Caleb offers his daughter Achsah (Josh. xv. 16, 17) as wife to any one who will conquer Kirjath-sepher (Judg. i. 12). Saul promises his daughter to him who shall kill the Philistine, and barter his daughter Michal for the prepuces of a hundred slain Philistines (1 Sam. xvii. 26, 27; xviii. 25-27); and Iban takes thirty wives for his thirty sons (Judg. xii. 9). A judicial marriage-price (*מזר הבתולת*) was now introduced, which was fixed at fifty silver shekels (Exod. xxii. 16, with Deut. xxii. 29), being the highest rate of a servant (Lev. xxvii. 3), so that one had to pay as much for a wife as for a bondwoman. When the father of the maiden was rich and *did not want the marriage-price* (*אין חפץ במהר*), he expected some service by way of compensation for giving away his daughter (1 Sam. xviii. 25). As soon as the bargain was concluded, and the marriage-price paid, or the required service was rendered, the maiden was regarded as betrothed to her wooer, and as sacredly belonging to him. In fact, she was legally treated as a *married woman* (*אשת איש*); she could not be separated from her intended husband without a bill of divorce, and the same law was applicable to her as to married people. If she was *persuaded* to criminal conduct between the espousals and the bringing her home to her husband's house, both she and her seducer were publicly stoned to death; and if she was violated, the culprit suffered capital punishment (Deut. xxii. 23-27, with ver. 22; and Lev. xx. 10). With such sacredness was betrothal regarded, that even if a bond-maid who was bought with the intention of ultimately becoming a secondary wife (Exod. xxi. 7-11), was guilty of unchastity prior to her entering into that state, both she and her seducer were scourged, whilst the latter was also obliged to bring a sin-offering, and the priest had to pray for the forgiveness of his sin (Lev. xix. 20-22). Every betrothed man was by the Mosaic law exempt from military service (Deut. xx. 7).

2. *Marriage.*—The Mosaic law prescribes no civil or religious forms for the celebration of marriage. The contract or promise made at the pay-

ment of the marriage-price, or when the service which was required in its stead was rendered, constituted the solemn bond which henceforth united the espoused parties, as is evident from the fact pointed out in the preceding sections, that a betrothed maiden was both called a *married woman*, and was legally treated as such. There can, however, be no doubt that the ancient custom of celebrating the consummation of the marriage by a feast, which lasted seven days (Gen. xxix. 22, 27), must have become pretty general by this time. Thus we are told that when Samson went to Timnath to take his wife, he made there a feast, which continued for seven days, according to the usage of young men on such occasions (*כִּי כָן עָשׂוּ הַבְּחֹרִים*), that the parents of the bride invited thirty young men (*νῆοι τοῦ νυμφῶνος*, Matt. ix. 15) to honour his nuptials, and that to relieve their entertainment, Samson, in harmony with the prevailing custom among the nations of antiquity, proposed enigmas (Judg. xiv. 10-18). We afterwards find that the bridal-pair were adorned with nuptial crowns (Song of Songs, iii. 11; Is. lxi. 10) made of various materials—gold, silver, myrtle, or olive—varying in costliness according to the circumstances of the parties (*Mishna, Sota* ix. 14; *Gemara*, 49 a and b; Selden, *Ux. Ebr.* ii. 15), and that the bride especially wore gorgeous apparel, and a peculiar girdle (Ps. xlv. 13, 14; Is. xlix. 18; Jer. ii. 12), whence in fact she derived her name *Kallah* (*כלה*), which signifies *the ornamented, the adorned*. Thus attired, the bridegroom and bride were led in joyous procession through the streets, accompanied by bands of singers and musicians (Jer. vii. 34; xxv. 10; xxxiii. 11), and saluted by the greetings of the maidens of the place, who manifested the liveliest interest in the nuptial train (Song of Songs, iii. 11), to the house of the bridegroom or that of his father. Here the feast was prepared, to which all the friends and the neighbours were invited, and at which most probably that sacred covenant was concluded which came into vogue during the post-Mosaic period (Prov. ii. 17; Ezek. xvi. 8; Mal. ii. 14). The bride, thickly veiled, was then conducted to the (*חדר*) bridal-chamber (Gen. xxix. 23; Judg. xv. 11; Joel ii. 6), where a nuptial couch (*חפה*) was prepared (Ps. xix. 5; Joel ii. 16) in such a manner as to afford facility for ascertaining the following morning whether she had preserved her maiden purity; for in the absence of the *signa virginitalis* she was stoned to death before her father's house (Deut. xxii. 13-21).

3. *Polygamy and Concubinage.*—In the case of polygamy, as in that of other national customs, the Mosaic law adheres to the established usage. Hence there is not only no express statute to prohibit polygamy, which was previously held lawful, but the Mosaic law presupposes its existence and practice, bases its legislation thereupon, and thus authorises it, as is evident from the following enactments:—1. It is ordained that a king 'shall not multiply wives unto himself' (Deut. xvii. 17), which, as Bishop Patrick rightly remarks, 'is not a prohibition to take more wives than one, but not to have an excessive number, after the manner of eastern kings, whom Solomon seems to have imitated;' thus, in fact, legalizing a moderate number. The *Mishna* (*Sanhedrin*, ii. 4), the *Talmud* (*Babylon Sanhedrin*, 21 a), Rashi (*on Deut.* xvii. 17), etc., in harmony with ancient tradition, regard

eighteen wives, including half wives, as a moderate number, and as not violating the injunction contained in the expression 'multiply.' 2. The law enacts that a man is not to marry his wife's sister to vex her while she lives (Lev. xviii. 18), which, as the same prelate justly urges, manifestly means 'that though two wives at a time, or more, were permitted in those days, no man should take two sisters (as Jacob had formerly done) begotten of the same father or born of the same mother;' or, in other words, a man is at liberty to take another wife besides the first, and during her lifetime, provided only they are not sisters. 3. The law of primogeniture (Deut. xxi. 15-17) actually presupposes the case of a man having *two* wives, one beloved and the other not, as it was with Jacob and his two wives, and ordains that if the one less beloved is the mother of his first-born, the husband is not to transfer the right of primogeniture to the son of his favourite wife, but is to acknowledge him as first-born who is actually so. 4. Exod. xxi. 9, 10, permits a father who had given his son a bondswoman for a wife, to give him a second wife of *freer birth*, and prescribes how the first is then to be treated—that she is to have alimony, clothes, and the conjugal duty; and 5. Deut. xxv. 47 expressly enjoins that a man, though having a wife already, is to marry his deceased brother's widow.

Having existed before the Mosaic law, and being acknowledged and made the basis of legislation by it, polygamy continued in full force during the whole of this period. Thus, during the government of the judges, we find Gideon, the celebrated judge of Israel, 'had many wives, and threescore and ten sons' (Judg. viii. 30); Jair the Gileadite, also a judge of Israel, had thirty grown-up sons (Judg. x. 4) and a proportioned number of daughters. Ibzan, another judge of Israel, had thirty full-grown sons and thirty full-grown daughters (Judg. xii. 9); and Abdon, also a judge of Israel, had forty adult sons and thirty adult daughters—which was utterly impossible without polygamy; the pious Elkanah, father of Samuel the illustrious judge and prophet, had two wives (1 Sam. i. 2). During the monarchy, we find Saul, the first king of Israel, had many wives and half wives (2 Sam. iii. 7; xii. 8); David, the royal singer of Israel, 'their best king,' as Bishop Patrick remarks in his comment on Lev. xviii. 18, 'who read God's law day and night, and could not but understand it, took many wives without any reproof; nay, God gave him more than he had before, by delivering his master's wives to him' (2 Sam. xii. 8); Solomon, the wise monarch, had no less than a thousand wives and half wives (1 Kings xi. 3); Rehoboam, his son and successor, had eighteen wives and threescore half wives (2 Chron. xi. 21); Abijah, his son and successor to the throne of Judah, married fourteen wives (2 Chron. xiv. 21); and Joash, the tenth king, including David, who reigned from 378 to 338 B.C., had two wives given to him by the godly high-priest Jehoiada, who restored both the throne of David and the worship of the true God according to the law of Moses (2 Chron. xxiv. 3). A very remarkable illustration of the prevalence of polygamy in private life is given in 1 Chron. vii. 4, where we are told that not only did the five fathers, all of them chief men of the tribe of Issachar, live in polygamy, but that their descendants, numbering 36,000 men, 'had many wives.' De Wette indeed affirms that 'the Hebrew moral teachers speak

decidedly for monogamy, as is evident from their always speaking of one wife, and from the high notion which they have of a good wedded wife—'A virtuous woman is the diadem of her husband, but a bad wife is like rottenness in the bones' (Prov. xii. 4); 'Whoso findeth a wife findeth happiness' (Prov. xviii. 22); 'a house and wealth are an inheritance from parents, but a discreet wife is from the Lord' (*ibid.* xix. 14). Prov. xxxi. 10-31 describes an industrious and managing wife in such a manner as one only could be it (comp. *Christl. Sittenlehre*, iii., sec. 472). Similarly Ewald, 'Wherever a prophet alludes to matrimonial matters, he always assumes faithful and sacred monogamy contracted for the whole life as the legal one' (*Die Alterthümer Israels*, p. 177, ff.). But we have exactly analogous passages where parental felicity is described, 'A wise son is happiness to the father, but a foolish son is the grief of his mother' (Prov. x. 1; xv. 20); 'A wise son heareth his father's instruction' (Prov. xiii. 1); and upon the same parity of reasoning it might be said that the theory of having only one son is assumed by the sacred moralist, because, when speaking of happiness or misery, which parents derive from their offspring, only one son is alluded to. Besides, the facts which we have enumerated cannot be set aside by arguments.

#### 4. *Proscribed Degrees and Laws of Inter-marriage.*

—The regulations now introduced in this respect are of a twofold nature: *i.* Enactments about inter-marriages among the Israelites themselves; and *ii.* Epigamy with other nations.

*i.* The most important change in the Biblical gamology is the Mosaic law about the prohibited degrees. Whilst in the pre-Mosaic period no prohibition whatever existed against marrying one's nearest and dearest relatives, the Mosaic law (Lev. xviii. 7-17; xx. 11, etc.) proscribes no less than fifteen marriages within specified degrees of both consanguinity and affinity. In neither consanguinity nor affinity, however, does the law extend beyond two degrees—viz., the mother, her daughter, aunt, father's wife, father's sister, sister on the father's side, wife of the father's brother, brother's wife (excepting in the case of a Levirate marriage), daughter-in-law, grand-daughter, either from a son or daughter, a woman and her daughter, or her grand-daughter either from a son or daughter, and two sisters together. The subjoined table exhibits these degrees. We must only remark that the squares stand for *males*, the circles for *females*, the triangles within the squares for *deceased*, the numbers refer to the order in which they are enumerated in Lev. xviii. 17, and that the husband and wife, who form the starting-point, are represented by a double square and double circle.

It will be seen from the following table that whilst some kindred are proscribed, others are allowed, *e.g.*, a father's sister is forbidden whilst a brother's daughter is not. This has occasioned great difficulty in tracing the principle which underlies these prohibitions. Philippson is of opinion that it may be deduced from the remarks which accompany the respective vetos. The stepmother is proscribed because 'it is thy father's nakedness' (Lev. xviii. 8); the son's or daughter's daughter because it 'is thine own nakedness' (ver. 10); the father's or mother's sister because she is the 'father's or mother's flesh' (vers. 12, 13); and the brother's wife because 'it is the nakedness of thy brother'

(ver. 16). 'From this it is evident,' this erudite chief Rabbi submits, 'that on the one side, son, daughter, and grandchild, are identified with the father, whilst on the other side brothers and sisters are identified with each other, *because they have one and the same source of life*. Accordingly, we obtain the following data. All members proceeding from a common father or mother constitute one issue, because they possess *together* the same source of life; whilst the ascendants and the descendants in a straight line form *one line*, because they have *one after the other and from*

*each other* the same source of life; and hence the law—1. Two members of the same issue, or two members of the same line, are *not* to intermarry, because they have the same source of life. But inasmuch as the ascending is the primary to each descending issue, and the descending the derived to every ascending, an ascending issue may press forward out of the straight line, or step down into the following, *i. e.*, the primary into the one derived from it; whilst the succeeding cannot go backwards into the foregoing, *i. e.*, the derived into the primary. Now, as the man is the moving cause in

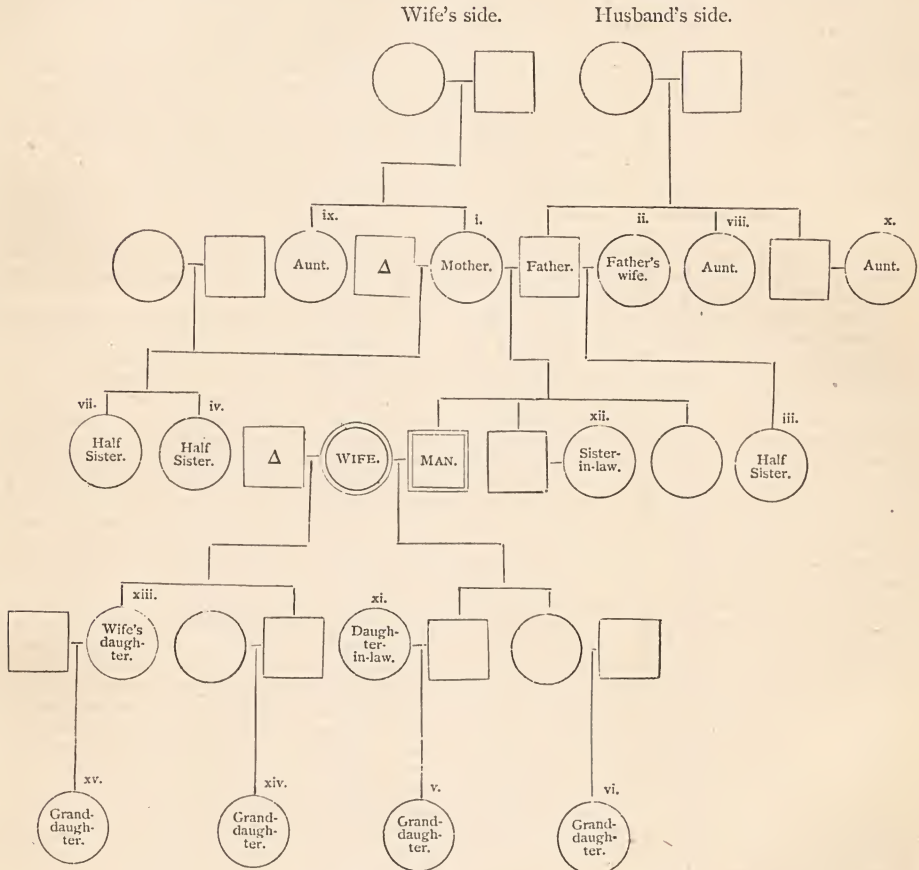

TABLE OF PROHIBITED DEGREES IN MARRIAGE.

carnal intercourse, hence the law—2. A male member of the succeeding issue must not marry a female member of the preceding issue, whilst, on the contrary, a male member of the preceding issue may marry a female of the succeeding issue, provided they are not both of a direct line. Half-blood and step-relations make no difference in this respect, since they are identified, both in the issue and in the line, because husband and wife become identified. It is for this reason also that the relationship, which the wife always assumes in marriage with regard to her husband, is such as a blood re-

lation bears to her; hence it is, for instance, that a brother's wife is proscribed, whilst the wife's sister is allowed. Thus the principle of the Mosaic proscriptions is a profound one, and is fully borne out by nature. Connubial intercourse has for its object to produce a third by the connection of two opposites; but that which proceeds from the same source of life is merely of the same kind. Hence, when two, originally of the same kind, unite, it is contrary to the true design of copulation, and can only proceed from an overpowering and excess of rude and animal passions. It is a desecration of

the nature and morality of man, and the highest defilement' (*Israelitische Bibel*, vol. i. p. 598, ff.; 3d ed. Leipzig 1863).

Different penalties are attached to the infringement of these prohibitions. The punishment of death is to be inflicted for marrying a father's wife (Lev. xviii. 8; xx. 11), or a daughter-in-law (Lev. xviii. 15; xx. 12); of death by fire for marrying a woman and her daughter at the same time (xviii. 17; xx. 14); of being cut off or excommunicated for marrying a sister on the father's side or on the mother's side (xviii. 9; xx. 17); of not being pardoned for marrying a father's or mother's sister (xviii. 12, 13; xx. 19); of not being pardoned and childlessness for marrying a father's brother's wife (xviii. 14; xx. 20); and of childlessness alone for marrying a brother's wife (xviii. 16; xx. 21), excepting the case of a Levirate marriage (Deut. xxv. 5-10). No penalty is mentioned for marrying one's mother (xviii. 7), grand-daughter (xviii. 10), or two sisters together (xviii. 18). From this enumeration it will be seen, that it only specifies *three instances* in which capital punishment is to be inflicted; and we are therefore not a little surprised at the assertion of Mr. Bevan, the writer of the excellent article *Marriage* in Dr. Smith's *Dictionary of the Bible*, that 'the general penalty [for the infringement of these prohibitions] being death (Lev. xxii. 17), but in the case of the aunt and the brother's wife childlessness (vers. 19-21), involving probably the stain of illegitimacy in cases where there was an issue, while in the case of two sisters no penalty is stated.'

Besides the proscribed degrees, the Mosaic law also forbids the following intermarriages: i. No Israelite is to marry the progeny of incestuous and unlawful copulations, or a *mamzer* (מומזר), Deut. xxiii. 2). In the absence of any Biblical definition of this much-disputed expression, we must accept the ancient traditional explanation contained in the Mishna, which is as follows: 'When there is betrothal without transgression of the law about forbidden marriages—*e.g.*, if the daughters of priests, Levites, or Israelites, are married to priests, Levites, or Israelites—the child goes after the father; where there is betrothal, and this law has been transgressed—*e.g.*, if a widow is married to a high-priest, a divorced woman or one who performed the ceremony of *chalitzah* to an ordinary priest, or a bastardess or a female *Nethin* to an Israelite; or, *vice versa*, if a Jewess is married to a bastard or *Nethin*—the child goes after the inferior party; where the woman cannot be betrothed to the man, but might legally be betrothed to another person—*e.g.*, if a man married within any one of the degrees proscribed by the law—the child is a *bastard* or *Mamzer*' (*Kiddushin*, iii. 12). ii. Any person who is *פצוע דכה*, *cujus testiculi vulnereati sunt, vel certe unus eorum*, *ברות שפכה*, *cujus membrum virile præcisum est*, as the Mishna (*Yebamoth*, viii. 2) explains it, is not allowed to marry (Deut. xxiii. 1). iii. A man is not to remarry a woman whom he had divorced, and who, after marrying another husband, had become a widow, or been divorced again (Deut. xxiv. 2-4). iv. Heiresses are not allowed to intermarry with persons of another tribe (Num. xxxvi. 5-9). v. A high-priest is forbidden to marry a widow, a divorced woman, a profane woman, or a harlot, and restricted to a pure Jewish maiden (Lev. xxi. 13, 14); and vi. Ordinary priests are prohibited from marrying prostitutes and divorced women (Lev. xxi. 7).

ii. The proscription of epigamy with non-Israelites is absolute with regard to some nations, and conditional with regard to others. The Mosaic law absolutely forbids intermarriage with the seven Canaanitish nations, on the ground that it would lead the Israelites into idolatry (Exod. xxxiv. 15, 16; Deut. vii. 3, 4); and with the Ammonites and Moabites on account of national antipathy (Deut. xxiii. 4-8); whilst the prohibition against marriage with the Edomites and Egyptians only extends to the third generation (Deut. xxiii. 7, 8). The Talmud, which rightly expounds the prohibition to 'enter into the congregation of the Lord' as necessarily extending to epigamy (comp. 1 Kings xi. 2; *Kiddushin*, iv. 3), takes the third generation to mean of those who became proselytes, *i.e.*, the grand-children of an Ammonite or Moabite who professes Judaism (Mishna, *Yebamoth*, viii. 3; Maimonides, *Iad Ha-Chazaka*, *Issure Bi'ah*, xii. 19, 20). This view is confirmed by the fact, that the Bible only mentions *three* intermarriages with Egyptians, and records at least two out of the three to show the evil effects of it. One occurred after the Exodus and in the wilderness, and we are told that the son of this intermarriage, whilst quarrelling with a brother Jew, blasphemed the name of God, and suffered capital punishment (Lev. xxiv. 10-14); the second occurred towards the end of the rulership of the judges, and tradition endeavours to show, that Ishmael the murderer of Gedaliah (Jer. xli. 1, 2) was a descendant of Jarha the Egyptian son-in-law of Sheshan (1 Chron. ii. 34, 35; and Rashi *in loco*); and the third is the intermarriage of Solomon, which is censured in the book of Kings (1 Kings iii. 1; xi. 1, 2). Of intermarriages with Edomites not a single instance is recorded in the O. T.; the Jewish antipathy against them was transmitted down to a very late period, as we find in the declaration of Jesus son of Sirach, that his soul hates the inhabitants of Seir (Eccles. iv. 25, 26), and in the fact that Judas Maccabæus carried on a deadly war with them (1 Maccab. v. 3; 2 Maccab. xx. 15-23).

An exception is made in the case of female captives of war (Deut. xxi. 10-14), which is evidently designed to obviate as far as possible the outrages committed after the evil passions have been stirred up in the conflict. The law, however, most humanely ordains that the captor, before making her his wife, should first allow her to indulge herself for a full month in mourning for her parents from whom she is snatched away, and to practise the following customary rites expressive of grief:—1. Cut off the hair of her head, which was the usual sign of mourning both among the Jews and other nations of antiquity (Ezra ix. 3; Job i. 20; Is. xv. 2; Jer. vii. 29, xvi. 6; Ezek. vii. 18, xxvii. 31; Amos viii. 10; Micah i. 16); 2. Cut off her nails, which were stained to form a part of personal adornment; and 3. Put off the raiment in which she was taken captive, since the women who followed their fathers and husbands to the war put on their finest dresses and ornaments previous to an engagement, in the hope of finding favour in the eyes of their captors in case of a defeat (Ovid, *Remed. Amor.* 343; Rosenmüller, *Das alte u. neue Morgenland*, ii. 308).

The first complaint of epigamy with aliens is, strange to say, made against Moses, the lawgiver himself (Num. xii. 1). In the days of the Judges the law against intermarriage was commonly trans-

gressed (Judges iii. 6), and from the earlier portions of the book of Proverbs, which ring with repeated denunciations of foreign women (Prov. ii. 16, 17; v. 8-11; xv. 17), as well as from the warnings of Isaiah (ii. 6), it is evident that intermarriages with foreign women were generally practised in private life in after times. Of the twenty-nine kings of Israel who reigned from the division of the kingdom to the Babylonish captivity, Ahab is the only one mentioned who married a foreign wife (1 Kings xvi. 31); whilst of twenty kings of Judah, Jeroboam alone intermarried with aliens.

5. *Sanctity of Marriage, and Mutual Rights of Husband and Wife.*—Recognizing the previously existing inequality of husband and wife, and basing its laws upon the then prevailing notion that the husband is lord over his wife, that he can take as many wives as he likes, and send them away whenever he dislikes them, the Mosaic gamology, as a matter of course, could neither impose the same obligation of nuptial fidelity nor confer the same rights on both. This is evident from the following facts:—

1. The husband had a right to expect from his wife connubial chastity, and in case of infidelity could demand her death as well as that of her seducer (Lev. xx. 10; Deut. xxii. 20-22; Ezek. xvi. 40; John viii. 5). 2. If he became jealous and suspicious of her, *even when she had not been unfaithful*, he could bring her before the priest and have administered to her the water of jealousy (Num. v. 12-31). But if the husband was suspected, or was actually guilty of carnal intercourse with an unmarried woman, no statute was enacted to enable the wife or wives to arraign him for a breach of marriage or infringement of her or their rights. Even when he was discovered with another man's wife, it was the injured husband that had the power to demand the death of the seducer, but not the wife of the criminal. 3. If the wife vowed anything to the Lord, or imposed upon herself voluntary obligations to the Deity, her husband could nullify it (Num. xxx. 6-8). 4. He could send her away or divorce her when she displeased him (Deut. xxiv. 1-4). The woman again is protected by the following laws:—1. When a Hebrew maiden is sold by her father to a man, with the understanding that she is to be his half-wife (פילגש = אמה), Exod. xxi. 7; Judg. ix. 18, with Judg. viii. 31), the law enacts that, in case her master and intended husband is displeased with her, and he refuses to redeem his promise—i. He is not to keep her till the Sabbatic year, and then give her her liberty like ordinary servants; ii. He is not to sell her to any one else as a wife; iii. He may give her to his son as a wife, and in that case must treat her as a daughter-in-law; iv. If he gives his son an additional wife, she is to obtain—*a.* her food, *b.* raiment, and *c.* conjugal right as heretofore; and, v. If these three last-mentioned points are refused to her, she is forthwith to be set at liberty (Exod. xxi. 7-11).\* 2.

\* This we believe to be the meaning of this confessedly difficult passage: the pronoun לו in the margin, or the *Keri*, according to our opinion, is the proper reading; and the negative particle לא in the text, or the *Kethiv*, belongs to והפרה, i.e.

והפרה ולא הפרה, אשר לו יעדה ולא הפרה, *who hath betrothed her to himself, but who hath not caused her to be redeemed—i.e., by his promise—or redeemed her.*

If he maliciously impugns her chastity, he is to be scourged and loses his right over her to divorce her (Deut. xxii. 13-19). 3. If she has children, they must render equal obedience to her as to the father (Exod. xx. 12; Deut. xxvii. 16). 4. The husband must not vex her by marrying two sisters simultaneously (Lev. xviii. 18). 5. He is not allowed to annoy his less beloved wife by transferring the primogeniture from her son to the child of his favourite wife (Deut. xxi. 15-17). 6. If her husband dislikes her, he is not arbitrarily to dismiss her, but give her a 'bill of divorcement' (Deut. xxiv. 1), which requires the interposition of legal advisers. And, 7. When a woman is divorced, or her husband dies, she is free, and at liberty to marry any one she likes, as is evident from the enactments in Lev. xxi. 7, 8, 13; Deut. xxiv. 2-4; xxv. 5; which are based upon this fact.

6. *Divorce.*—It must be remarked that the Mosaic law does not *institute* divorce, but, as in other matters, recognises and most humanely regulates the prevailing patriarchal practice (Deut. xxiv. 1-4). The ground on which the law allows a divorce is termed ערות רבר, *any shameful thing*. What the precise meaning of this ambiguous phrase is, and what, according to the Mosaic gamology, gives a husband the right to divorce his wife, have been greatly disputed in the schools of Shammai and Hillel, which were founded before the advent of Christ [EDUCATION], and is given below. It is, however, certain that the phrase does not denote *fornication or adultery*, for in that case the woman was not divorced, but *stoned* (Lev. xx. 10; Deut. xxii. 20-22; Ezek. xvi. 40; John viii. 5). Moreover, the phrase מוצא הן בעיני

פלגני, with which this statute begins, when used of opposite sexes, as in the case before us, generally denotes *favourable impression which one produces on the other, by graceful manners, or beautiful appearance* (Gen. xxxix. 4; Ruth ii. 2, 10, 13; Ezek. v. 2, with 8). That it has this sense here seems to be warranted by ver. 3, where it is supposed that the divorced woman marries again, and her second husband also divorces her, and that not on account of immorality, but because *he does not like her*. The humane regulations which the Mosaic gamology introduced in order to render a divorce legal were as follows:—1. If a man dislikes his wife, or finds that he cannot live happily together with her, he is not summarily to send her away by word of mouth as heretofore, but is to give her a formal and judicial *bill of divorcement* (ספר כריתת), which required the intervention of a legal adviser, and caused delay, thus affording time for reflection, and preventing many a divorce resolved on under the influence of passion. 2. Allowing the parties, even after the dissolution of the marriage, to renew the connection if they wished it, provided the divorced wife had not, in the meantime, married another husband, and become a widow, or been again divorced. When Mr. Hayman (the writer of the article *Divorce* in Smith's *Dictionary of the Bible*) denies this, and asserts that 'Winer is surely mistaken (s. v. *Ehescheidung*) in supposing that a man might take back as wife her whom he had divorced, except in the cases when her second husband had died or had divorced her,' we can only say that not only are Bishop Patrick (on Deut. xxiv. 4), Michaelis (*Law of Moses*, ii. 137,

English translation), and many other Christian expositors, of the same opinion, but that it has been so understood and acted upon by those who were charged with the administration of the law from time immemorial. The only exception which the sages made was when a man divorced his wife because of an evil report, which he maliciously circulated about her; then he was not allowed to re-marry her (Mishna, *Gittin* iv. 7). 3. If the divorced woman marries again, and the second husband either dies or divorces her, she is not allowed to re-marry her first husband; so as to preclude the possibility of procuring the death of, or a divorce from, the second husband, in case the parties wished to be reunited. 4. If a man seduces a maiden, and on this account is legally obliged to marry her, 'he may not put her away all his life' (Deut. xxii. 28, 29); or 5. If he groundlessly impugns her chastity, he also loses the power of ever divorcing her (Deut. xxii. 13-19). This, as well as the preceding benign law, was evidently designed to make men care for those women whom they had either virtually or actually deprived of their moral character, and who, if these men were allowed to desert them, might never be able to get husbands. Thus these laws, whilst checking seduction, inasmuch as the man knew that he would have all his lifetime to be wedded to and care for the injured woman, also prevented those females who had momentarily fallen, from being branded for life, and compelled to give themselves up to prostitution; and 6. Though the Mosaic law has no express statute that the wife, under certain circumstances, may demand a divorce from her husband, yet it is undoubtedly implied in the enactment contained in Exod. xxi. 10. For if a bondswoman who became the wife of her master could quit him if he did not fulfil the conditions of a husband, it is but natural to conclude that a *free* wife would, under similar circumstances, be able to claim the protection of the same law. A few instances of the violation of the divorce law, between the period of its enactment and the Babylonish captivity, are incidentally recorded without any censure whatever. Thus we are told that Saul took away Michal, his daughter, David's wife, without David formally divorcing her, and gave her to Phalti (1 Sam. xxv. 44), and that David took back again Michal, who had been united to another husband (2 Sam. iii. 14-16). Still the laws of divorce and of prohibiting reunion after the divorced woman had been married to another husband, are alluded to by Jeremiah, as well known and commonly observed (iii. 1, 8).

7. *Levirate Law*.—This law, which, as we have seen, existed from time immemorial both among the patriarchs and other nations of antiquity, is now formally enacted as part of the Biblical gamology. In adopting this law, however, as in the case of other primitive practices incorporated in the Mosaic code, the sacred legislator both prescribes for it definite limits, and most humanely deprives it of the irksome and odious features which it possessed in ancient times. This is evident from the enactment itself, which is as follows: 'If brothers dwell together, and one of them die and have no child, the wife of the deceased shall not marry out of the family a stranger; her husband's brother shall go in unto her, and take her as his wife, and perform the duty of a brother-in-law. Her first-born shall then succeed in the

name of the deceased brother, so that his name be not blotted out of Israel' (Deut. xxv. 5, 6). Accordingly—i. Levirate is restricted to brothers who *dwell together*, i.e., in contiguous properties, as the rabbinical law explains it according to the meaning of the phrase שבת יוריו in Gen. xiii. 6, xxxvi. 7, and elsewhere. If the brothers lived far away, or if the deceased had not brothers at all, it was an understood thing that it devolved upon the nearest of kin to marry the widow, or care for her if she was too old, when of course it passed over from the domain of Levirate into that of *Gool* or *redeemer* (Ruth ii. 20; iii. 9; iv. 15, 16). And ii. To cases where no issue whatever is left, as בן is here used in its general sense of *offspring* and not specifically for *son*. This is not only confirmed by the Sept. (στέρμα), Matt. (μὴ ἔχω στέρμα, xxii. 5), Mark (xii. 19), Luke (ἀρεκνος, xx. 28), Josephus (*Antiq.* iv. 8. 23), and the Talmud (*Sebamoth*, 22 b), but is evident from the law of inheritance (Num. xxvii. 8-11), in which it is declared that if a man dies without leaving a son, his daughter is to inherit the property. For if his widow could claim the surviving brother to marry her in order to raise up a son to the deceased, the daughter who legally came to the inheritance would either have to lose her possessions, or the son born of the Levirate marriage would have to be without patrimony.

In fulfilling the duty of the *Levir* in the patriarchal age the surviving brother had to make great sacrifices. He had not only to renounce the perpetuating of his own name through the first-born son (Gen. xxxviii. 9), and mar his own inheritance (Ruth iv. 6); but, what was most galling, he was obliged to take the widow whether he had an inclination for any such marriage or not, as the *Levir* in the patriarchal age had no alternative. Now, the Mosaic law removed this hardship by opening to the man a door of escape: 'But if the man like not to take his brother's wife, then let his brother's wife go up to the gate of the elders and say, My husband's brother refuseth to raise up unto his brother a name in Israel; he will not perform the Levirate duty. And the elders of the city shall call him, and speak unto him. But if he still persist and say, I like not to take her, then shall his brother's wife come in to him in the presence of the elders, and loose his shoe from off his foot, and spit in his face and say, So shall it be done unto that man that will not build up his brother's house; and his house shall be called in Israel the house of the bare-foot' (Deut. xxv. 7-10). Thus the Mosaic gamology does not impose it as an inexorable law, but simply enjoins it as a duty of love, which the *Levir* might escape by submitting to censure and reproach. Of this he could not complain, for he not only neglected to perform towards his deceased brother the most sacred offices of love, but by refusing to do so, he openly declared his dislike to the widow, and thus publicly insulted her. The symbolic manner in which she took away in the public court his right to her and his deceased brother's possession, has its origin in the fact that the possession of property was claimed by planting the foot on it. Hence, when the transfer of property was effected by an amicable transaction, the original owner signified the renunciation of his rights by taking off his shoe and giving it to the new possessor (Ruth iv. 7, 8). A similar custom obtained among the Indians (Benary, *De Hebræorum Leviratu*, Berol.

1835, p. 14) and the ancient Germans (Grimm, *Deutsche Rechtsalterthümer*, p. 156). In the case before us, however, where the privilege of possession was not renounced by a mutual understanding, but involved insult both to the deceased brother and the surviving widow, the outraged sister-in-law snatched the right from him by pulling off his shoe.

### iii. THE POST-EXILE PERIOD.

During this period Scriptural gamology reached its highest state of development through the minute expositions and definitions of the spiritual heads of the nation, which were called forth by the difficulties experienced in the course of time in the administration of the concise Mosaic laws under peculiar circumstances and un contemplated phases. In describing the state of the law bearing on the different points of the marriage-question during this period, we shall follow the order adopted in the preceding two periods, so that the reader may be able to trace the development of each department separately.

1. *Mode of Selecting a Bride—Betrothal and Marriage-price.*—As long as the children were minors—which, in the case of a son, was up to thirteen, and a daughter, to twelve years of age—the parents could betroth them to any one they chose; but when they became of age their consent was required (Maimonides, *Hilchoth Ishuth*, iii. 11, 12). It not unfrequently happened, however, that the selection of partners for life was made by the young people themselves. For this, the ceremonies connected with the celebration of the festivals in the Temple afforded an excellent opportunity, as may be gathered from the following remark in the Mishna:—‘R. Simeon b. Gamaliel says, ‘There were never more joyous festivals in Israel than the 15th of Ab [WOOD-CARRYING, FEAST OF] and the Day of Atonement. On these the maidens of Jerusalem used to come out dressed in white garments, which they borrowed, in order not to shame those who had none of their own, and which they had immersed [for fear of being polluted]. Thus arrayed, these maidens of Jerusalem went out and danced in the vineyards, and singing, Young man, lift up thine eyes, and see whom thou art about to choose; fix not thine eye upon beauty, but look rather to a pious family; for gracefulness is deceit, and beauty is vanity, but the woman that fears the Lord, she is worthy of praise’ (*Megilla*, iv. 8). Having made his choice, the young man or his father informed the maiden’s father of it, whereupon the young people were legally betrothed. The betrothal was celebrated by a feast made in the house of the bride (*Jebamoth*, 43 a; *Taanith*, 26 b; *Pessachim*, 49 a; *Kiddushin*, 45 b), and is called *קידושין*, made sacred, for by it the bride was made sacred to her bridegroom, and was not to be touched by any one else. It is also called *אירוסין*, which may be from *אירש = אירש, to betroth*. For a betrothal to be legal, it has to be effected in one of the following three modes:—1. *By money*, or *money’s worth*, which, according to the school of Shammai, must be a *denar* (*דינר*) = 90 grains of pure gold, or, according to the school of Hillel, a *peruta* (*פרוטה*) = half a grain of pure silver, and which is to be given to the maiden, or, if she is a minor, to her father, as betrothal price (*כסף*), *שטר אירוסין* (2. *By letter or contract* (*שטר אירוסין*), which the young man, either in person or through a proxy, has to give to the maiden, or to her father when she is a minor; or, 3. *By cohabitation* (*ביאה*),

*usus*), when the young man and maiden, having pronounced the betrothal formula in the presence of two witnesses, retire into a separate room. This, however, is considered immodest, and the man is scourged (*Kiddushin*, 12 b). The legal formula to be pronounced is:—‘Behold, thou art betrothed or sanctified to (הרי את מקודשת לי ברת)

(משה וישראל according to the law of Moses and Israel’ (*Kiddushin*, i. 1, iv. 9; *Tosiftha Kethuboth*, iv.; *Jerusalem Kethuboth*, iv. 8; Maimonides, *Hilchoth Ishuth*, iii.; *Eben Ha-Ezer*, xxxii.)

Though betrothment, as we have seen before, was the beginning of marriage itself, and, like it, could only be broken off by a regular bill of divorce (*גט*), yet twelve months were generally allowed to intervene between it and actual marriage (*הופה*) in the case of a maiden, to prepare her outfit, and thirty days in the case of a widow (*Kethuboth*, 57 a). The intercourse of the betrothed during this period was regulated by the customs of the different towns (*Mishna Kethuboth*, v. 2). When this more solemn betrothment (*קידושין*) was afterwards united with the marriage-ceremony (*הופה*), engagements (*שדוכין*) more in our sense of the word took its place. Its nature and obligation will best be understood by perusing the contents of the contract (*תנאים*) which is made and signed by the parties, and which is as follows:—‘May He who declares the end from the beginning give stability to the words of this contract, and to the covenant made between these two parties!—namely, between A, bachelor, with the consent of his father B, and C, who is proxy for his daughter D, spinster. The said A, bachelor, engages under happy auspices, to take the afore-mentioned D, spinster, by marriage and betrothal (*הופה וקידושין*), according to the law of Moses and Israel. These henceforth are not to conceal anything from each other appertaining to money or goods, but to have equal power over their property. Moreover, C, the said father of the bridegroom, is to dress his son in goodly apparel before the marriage, and to give the sum of . . . in cash; whilst C, father of the said bride, is to give his daughter before the marriage a dowry in cash to the amount of . . . as well as jewellery to the amount of . . . to dress her in goodly apparel corresponding to the dowry, to give her an outfit,

and the bridegroom the *Talith* (*טלית*), i.e., the fringed wrapper used at prayer [FRINGED GARMENT], and *Kittel* (*קיטל*), i.e., the white burial garment, in harmony with his position and in proportion to the dowry. The marriage is to be (d.v.) on the . . . in the place . . . at the expense of the said C, the bride’s father; and if agreed to by both parties, may take place within the specified period. Now the two parties have pledged themselves to all this, and have taken upon themselves by an oath to abide by it, on the penalty of the great anathema, and at the peril of forfeiting half the dowry, but the forfeit is not to absolve from the anathema, nor is the anathema to absolve from the forfeit. The said father of the bride also undertakes to board at his table the newly-married couple for the space of . . . and furnish them with lodgings for the space of . . . The surety on the part of the bridegroom is E, son of F; and on the part of the bride, G, son of H. The two bridal parties, however, guarantee that

these sureties shall not suffer thereby. Farther, C, the said father of the bride, is to give his daughter an assurance letter, that, in the event of his death, she is to get half the inheritance of a son (שטר חצי בן); whilst the bridegroom pledges himself to get his brothers, in the event of his dying without issue, to give her a *Chaliza document* [for which see below], without any compensation. But if there should be dispute or delay on the subject, which God forbid, the decision is to be left to the Jewish congregation. We have taken all this in possession from the party and sureties, for the benefit of the other parties, so that everything afore mentioned may be observed; with the usual witness which qualified us to take care of it. Done this day . . . Everything must be observed and kept. (Signed) . . . (Comp. *Nachlas Shiva*, 9b). This contract, which is written in Rabbinic Hebrew, is used by all orthodox Jews to the present day.

2. *Marriage*.—The proper age for marriage is fixed in the Mishna at eighteen (*Aboth*, v. 31), and though, for the sake of preserving morality, puberty was regarded as the desirable age, yet men generally married when they were *seventeen* (*Sebamoth*, 62; *Kiddushin*, 29). The day originally fixed for marriage was Wednesday for maidens and Friday for widows (*Mishna, Kethuboth*, i. 1). But the Talmud already partially discarded this arrangement (*Gemara, ibid.*, 3 a), and in the middle ages it became quite obsolete (*Eben Ha-Ezer*, lxxv.) The primitive practice of the sages, however, has been resumed among the orthodox Jews in Russia, Poland, etc. The wedding feast was celebrated in the house of the bridegroom (*Kethuboth*, 8 a, 10 a) and in the evening, for the bridal pair fasted all day, since on it, as on the day of atonement, they confessed their sins, and their transgressions were forgiven. On the day of the wedding, the bride, with her hair flowing and a myrtle wreath on her head (if she was a maiden, *Mishna Kethuboth*, ii. 1), was conducted, with music, singing, and dancing, to the house of the bridegroom, by her relations and friends, who were adorned with chaplets of myrtle, and carried palm branches in their hands (*Kethuboth*, 16, 17; *Sabbath*, 110 a; *Sota*, 49 b). The streets through which the nuptial procession passed were lined with the daughters of Israel, who greeted the joyous train, and scattered before them cakes and roasted ears of wheat, whilst fountains freely poured forth wine (*Kethuboth*, 15 b; *Berachoth*, 50 b). Having reached the house, the bridegroom, accompanied by the groom's men, met the bride, took her by the hand, and led her to the threshold. The *Kethuba* (כתובה) = *donatio propter et ante nuptias*, or the marriage-settlement, alluded to in the book of Tobit (vii. 15), was then written, which in the case of a maiden always promises 200, and in the case of a widow 100 *denar* (each *denar* being equal to 90 grains of pure gold), whether the parties are rich or poor (*Mishna, Kethuboth*, i. 2), though it may be enlarged by a special covenant (תוספות, כתובה). The marriage must not be celebrated before this settlement is written (*Baba Kama*, 89). The wording of this instrument has undergone various changes in the course of time (*Kethuboth*, 82 b). The form in which it is given in the Talmud, by Maimonides, etc., is as follows: 'Upon the fourth day of the week, on the . . . of the month, in the year . . . of the creation of the world, according to the computation adopted in

this place, A, son of B, said to C, spinster, daughter of E, 'Be thou my wife according to the law of Moses and Israel, and I will work for thee, honour thee, maintain thee, and provide for thee according to the custom of Jewish husbands, who work for their wives, honour them, maintain them, and provide for them honestly; I also give thee the dowry of thy virginity, 200 silver *Sus*, which belong to thee by the law, as well as thy food, thy apparel, and whatsoever is required for thy maintenance, and I will go in to thee according to the custom of the whole earth.' And C, the spinster, consented, and became his wife. The dowry which she brought him from the house of her father, in silver, gold, and ornaments, as well as in apparel, domestic utensils, and bedding, amounts to . . . pure silver, and A the bridegroom has consented to add to it from his own property the same sum; and the bridegroom said thus, 'I undertake for myself and my heirs after me the security for this *Kethuba*, this dowry and this addition, so that the same shall be paid from the best and most choice of my possessions which I have under the whole heaven, which I have acquired or shall acquire in real or personal property. All this property is to be mortgaged and pledged, yea, even the coat which I have on is to go in order to pay this *Kethuba*, this dowry and this addition, from this day to all eternity.' And the surety of this *Kethuba*, this dowry and this addition, A, the bridegroom, has undertaken in the strictness of all the *Kethubas* and supplement instruments usual among the daughters of Israel, and which are written according to the order of our sages of blessed memory, not after the manner of a mere visionary promise or empty formula. We have taken possession of it from A, the bridegroom, and given it to C, spinster, daughter of D, according to all that is written and explained above, by means of such a garment as is legal in the taking of possession. All this is yea and amen. (Signed) . . . Comp. Maimonides, *Jad Ha Chazaka Hilchoth Gebim Ve-Cheliza*, iv. 33. After the document was handed over to the bride, crowns, varying in expense according to the circumstances of the parties, were placed upon the heads of the bridal pair (*Sota*, 49 a, b), and they with their relations and friends sat down to a sumptuous repast; the marriage-feast was enlivened by the guests, who sang various songs and asked each other amusing riddles (*Berachoth*, 31 a; *Nedarim*, 51 a), parched corn was distributed among the guests if the bride was a virgin (*Keth.* ii.), and when the meal was concluded with customary prayer of thanksgiving, the bridegroom supplemented it with pronouncing over a cup of wine the seven nuptial benedictions (שבע ברכות) in the presence of at least ten persons (*Kethuboth*, 7 b), which gave the last religious consecration to the marriage-covenant, and which are as follows:—i. 'Blessed art thou, O Lord our God, king of the universe, who hast created everything for thy glory.' ii. 'Blessed art thou, O Lord our God, king of the universe, who hast created man.' iii. 'Blessed art thou, O Lord our God, king of the universe, who hast created man in thine image, in the image of the likeness of thy own form, and hast prepared for him, in himself, a building for the perpetuity of the species. Blessed art thou, O Lord, the creator of man.' iv. 'The barren woman shall rejoice exceedingly and shout for joy when her children are gathered around her

in delight. Blessed art thou, O Lord, who rejoicest Zion in her children,' *vi*. 'Make this loving pair to rejoice exceedingly, as thou hast made thy creature rejoice in the garden of Eden in the beginning. Blessed art thou, O Lord, who rejoicest the bridegroom and the bride.' *vi*. 'Blessed art thou, O Lord our God, king of the universe, who hast ordained joy and gladness, bride and bridegroom, delight and song, pleasure and intimacy, love and friendship, peace and concord; speedily, O Lord our God, let there be heard in the cities of Judah and in the streets of Jerusalem the voice of joy and the voice of gladness, the voice of the bridegroom and the voice of the bride, the voice of jubilant bridegrooms under their canopies, and of the young men at the nuptial feast playing music. Blessed art thou, O Lord our God, who makest the bridegroom rejoice with his bride.' And *vii*. 'Remove all suffering and anger; then will the dumb be heard in song; lead us in the paths of righteousness, listen to the benedictions of the children of Jeshurun! With the permission of our seniors and rabbins, and my masters, let us bless our God in whose dwelling is joy, and of whose bounties we have partaken!' to which the guests respond: 'Blessed be our God, in whose dwelling is joy, of whose bounties we have partaken, and by whose goodness we live;' and he then answers, 'Then let us bless our God, in whose dwelling is joy, of whose bounties we have partaken, and by whose goodness we live' (*Kethuboth*, 7 b, 8). The married couple were then conducted to an elaborately ornamented nuptial chamber (*חופה*), where the bridal couch (*thalamus*) was carefully prepared, and at the production of the *linteum virginitatis* the following morning (Deut. xxii. 13-21), which was anxiously awaited, the following benediction was pronounced by the bridegroom, 'Blessed art thou, O Lord our God, king of the universe, who hast placed a nut in paradise, the rose of the valleys—a stranger must not rule over this sealed fountain; this is why the hind of love has preserved the holy seed in purity, and has not broken the compact. Blessed art thou, O Lord, who hast chosen Abraham and his seed after him!' (comp. *Halachoth Gedoloth*, ed. Vienna, 51 b, and Pliny, *Hist. Natur.* xv. 24, where an explanation will be found of the use of *אגוז*, *nut*, in this connection). Festivities continued for seven days (*Kethuboth*, 7 a).

As important religious questions had to be put to the bridal pair which required a learned man to do (*Gittin*, 6; *Kiddushin*, 6, 13), it was afterwards resolved that the marriage-ceremony should be performed by a rabbi, and it is celebrated in the following manner:—A beautifully embroidered silk or velvet canopy about three or four yards square, supported by four long poles, is held by four men out of doors on the day of the wedding. Under this *chupa* (*חופה*), which represents the ancient bridal chamber, the bridegroom is led by his male friends preceded by a band of music, and welcomed by the joyous spectators with the exclamation, *Blessed is he who is now come!* (*ברוך הבא*); the bride, with her face veiled (*nuptiae*), is then brought to him by her female friends and led three times round the bridegroom, in accordance, as they say, with the remark of Jeremiah, 'the woman shall compass the man' (xxx. 22), when he takes her round once amidst the congratulations of the bystanders and then places her at his right hand (Ps. xlv. 10), both standing with their faces

to the south and their backs to the north. The rabbi then covers the bridal pair with the *Talit*, or fringed wrapper [FRINGED GARMENTS] which the bridegroom has on (comp. Ruth iii. 19; Ezek. xvi. 8), joins their hands together and pronounces over a cup of wine the benediction of affiance (*ברכת ארוסין*), which is as follows: 'Blessed art thou, O Lord our God, king of the universe, who hast created the fruit of the vine. Blessed art thou, O Lord our God, king of the universe, who hast sanctified us with thy commandments, and has forbidden to us consanguinity, and has prohibited us the betrothed, but hast permitted us those whom we take by marriage and betrothal. Blessed art thou, O Lord, who hast sanctified thy people Israel by betrothal and marriage' (*Kethuboth*, 7 a). Whereupon the bridegroom and bride taste of the cup of blessing, and the former produces a plain gold ring, and, in the presence of all the party, puts it on the bride's finger, saying, 'Behold thou art consecrated unto me with this ring according to the rites of Moses and Israel!' The rabbi then reads aloud, in the presence of appointed witnesses, the *Kethuba*, or the marriage-settlement, which is written in Syro-Chaldaic, and concludes by pronouncing over another cup of wine the seven benedictions (*שבע ברכות*), which the bridegroom in ancient times, before the ceremony of marriage became a public act and was delegated to the spiritual head, used to pronounce himself at the end of the meal. The bridegroom and bride taste again of this cup of blessing, and when the glass is emptied it is put on the ground and the bridegroom breaks it with his foot, as a symbol to remind them in the midst of their joys, that just as this glass is destroyed so Jerusalem is destroyed and trodden down under the foot of the Gentiles. With this the ceremony is concluded, amidst the shouts, *May you be happy!* (*מזל טוב*).

3. *Polygamy and Concubinage*.—As nothing is said in the post-exile portions of the Bible to discourage polygamy, this ancient practice also continued among the Jews during this period. During the second temple, we find that Herod the Great had nine wives (Joseph. *Antiq.* xvii. 1. 3); his two sons, Archelaus the Ethnarch, and Antipas the Tetrarch of Galilee, had each two wives (Joseph. *Antiq.* xvii. 13. 2; xviii. 5. 1); and John the Baptist and other Jews, who censured the one for violating the Mosaic law by the marriage of his deceased brother's wife who had children (Joseph. *Antiq.* xviii. 13. 2), and the other for marrying Herodias, the wife of his half-brother Herod-Philip (Matt. xiv. 3, 4; Matt. vi. 17, 18; Luke iii. 19), raised no cry against their practising polygamy; because, as Josephus tells us, 'the Jews of those days adhered to their ancient practice to have many wives at the same time' (Joseph. *Antiq.* xvii. 1. 2). In harmony with this ancestral custom, the post-exile legislation enacted various statutes to regulate polygamy and protect the rights and settlement of each wife (*Mishna Jebamoth*, iv. 11; *Kethuboth*, x. 1-6; *Kiddushin*, ii. 7). As a striking illustration of the prevalence and legality of polygamy during this period, may be mentioned the following circumstance which is recorded in the Talmud: Twelve widows appealed to their brother-in-law to perform the duty of *Levir*, which he refused to do, because he saw no prospect how to maintain such an additional number of wives and possibly a large

increase of children. The case was then brought before Jehudah the Holy, who promised that if the man would do the duty enjoined on him by the Mosaic law, he himself would maintain the family and their children, in case there should be any, every Sabbatical year when no produce was to be got from the land which was at rest. The offer was accepted by the *Levir*, and he accordingly married his twelve sisters-in-law; and after three years these twelve wives appeared with thirty-six children before Jehudah the Holy, to claim the promised alimony, as it was then the Sabbatical year, and they actually obtained it (*Jerusalem Jebamoth*, iv. 12). Rabba b. Joseph, founder and president of the college at Machuza (A.D. 338-352, see art. EDUCATION in this Cyclopædia), taught that a man may take as many wives as he pleases, provided that he can maintain them all (רבא אמר) רבא ארם כמה נשים על אשתו והוא דאית ליה

למזונינהו, *Jebamoth*, 65 a). From the remark in the Mishna, that a *Levir* may marry his deceased brother's four widows (*Jebamoth*, iv. 11), the Babylonian Gemara concluded that it recommends a man to have no more than this number (*Babyl. Jebamoth*, 44 a); from which most probably Mohammed's injunction is derived (*Koran Sura*, iv. 3). It was Rabanu Gershom b. Jehudah of France (born circa 960, died 1028), who, in the 11th century, prohibited polygamy under pains of excommunication, saving in exceptional cases (Graetz, *Geschichte der Juden*, v. 405-507). His motive for doing so is a matter of dispute; the older Occidental rabbins say that the prohibition originated in a desire to preserve the peace of the family, whilst the Oriental rabbins will have it that it was dictated by the governments of Christian countries. His interdict, however, made but slow progress, even in Germany and France, for which it was chiefly designed. Thus Simon b. Abraham of Sens, one of the most celebrated French Tossafists, tells us (circa 1200): 'The institution of R. Gershom has made no progress either in our neighbourhood or in the provinces of France. On the contrary, it happens that pious and learned men and many other people marry a second wife in the lifetime of the first' (*B. Joseph, Eben Ha-Ezer* 1). The practice of marrying a second wife in the event of the first having no issue within ten years also obtained in Italy till about the 15th century—the Pope giving a special dispensation for it. The Spanish Jews never recognised R. Gershom's interdict; bigamy was practised in Castile till the 14th century, whilst the Christian government of Navarre declared polygamy among the Jews as legal, and the law of King Theobald allowed them to marry as many wives as they could maintain and govern, but they were not permitted to divorce any one of them without sending all away (Kayslering, *Geschichte der Juden in Spanien*, i. 71). Nor was the said interdict acknowledged by the Jews in the East; and monogamy is there practised simply because the bride makes a special agreement and has a clause inserted in the *Kethuba* (כתובה), or marriage-settlement, that her husband is not to marry another as long as she lives. An exception, however, is made in case there is no issue. As to the opinion of the Karaites on monogamy and polygamy, the celebrated Jehudah b. Elia Hadassi (flourished 1149) remarks, in his famous work against rabbinic Judaism, 'The Pentateuch pro-

hibits one to marry two wives with a view to vex one of them (לצורר אהת מזה), Lev. xviii. 18); but he may take them provided he loves them and does not grieve either of them, and treats them both affectionately. If he does not diminish their food, raiment, and conjugal rights (Exod. xxi. 11), he is allowed to take two wives or more, just as Elkanah married Hannah and Peninnah, and as David, peace be upon him, and other kings and judges did' (*Eshkol Ha-Copher*, ed. Eupatoria 1836, p. 129). From this it is evident that polygamy was not prohibited by the Jewish law nor was it regarded as a sin, and that the monogamy of the Jews in the present day is simply in obedience to the laws of the countries in which they live. There were, however, always some rabbins who discouraged polygamy (*Abolth*, ii. 7; *Jebamoth*, 65 a, al.); and the elevated notion which they had of monogamy is seen in the statutes which they enacted, that the high-priest is to be the husband of one wife and to keep to her ( . . . כהן גדול

אינו נושא שתי נשים לעולם כאחת שנאמר אשה

אחת ולא שתיים, *Jebamoth*, 58 a; Maimonides, *Hilchoth Issure Bia*, xviii. 13; *μὴν δ' αὐτῷ δέδωκε γαμεῖν παρθένον καὶ ταύτην φυλάττειν*, Joseph. *Antiq.* iii. 12. 2; Maimonides), and which the Apostle Paul also urges on Christian bishops (1 Tim. iii. 2; Titus i. 16).

4. *Proscribed Degrees and Laws of Intermarriage*.—Besides the fifteen proscribed degrees enumerated in Lev. xviii. 7-17; xx. 11, etc., the *Sopherim* or scribes (B.C. 322-221) prohibited marriage with other relations (*Mishna, Jebamoth*, ii. 4), and those prohibitions were afterwards extended still by R. Chiya b. Abba the Babylonian (A.D. 163-193), and friend of Jehudah I. the Holy (*Jebamoth*, 22 a). The prohibited degrees of the scribes are denominated *שניות*, i.e. *לעריות*, the *second* or *sub-ordinate in rank* with respect to those forbidden in the Bible, and may be seen in the following list given by Maimonides: 'i. The mother's mother, and this is infinite, for the mother's mother's mother's mother, and so upwards, are proscribed; ii. The mother of his father's mother, and no further; iii. His father's mother, and this is infinite, for even the father's mother's mother's mother, and so upwards, are proscribed; iv. The mother of his father's father only; v. The wife of his father's father, and this is infinite, for even if she were the wife of our father Jacob, she is forbidden to every one of us; vi. The wife of his mother's father only; vii. The wife of his father's brother by the mother; viii. The wife of his mother's brother, whether by the mother or by the father; ix. His son's daughter-in-law, i.e., his son's son's wife, and this is infinite, for even if she were the son's son's son's wife, descending to the end of the world, she is forbidden, so that if, as long as the wife of one of us lives, she is secondary or forbidden to our father Jacob; x. His daughter's daughter-in-law, i.e., son's wife only; xi. The daughter of his son's daughter only; xii. The daughter of his son's son only; xiii. The daughter of his daughter's daughter only; xiv. The daughter of his daughter's son only; xv. The daughter of his wife's son only; xvi. The daughter of his wife's daughter's daughter only; xvii. The mother of his wife's father's mother only; xviii. The mother of his wife's mother's father only; xix. The mother of his wife's mother's mother

only; *xx*. The mother of his wife's father's father only. Thus, of these secondary prohibitions, there are four which are infinite; *a*, the mother's mother and all upwards; *b*, the father's mother and all upwards; *c*, the grandfather's wife and all upwards; and *d*, the son's son's wife and all downwards' (*Hilchoth Ishuth*, i. 6). The principle by which the scribes were guided was to extend the prohibition to the whole line wherever the Mosaic law refers to lineal ascendants or descendants, as well as to those who might easily be mistaken by having a common appellation. Thus, mother's mother's mother, *ad infinitum*, is forbidden, because the Mosaic law proscribes the mother, so also the wife of the grandfather, because the wife's father is forbidden in the Mosaic law; whilst the mother of the father is proscribed, because the appellation grandmother is used without distinction for both the mother's and father's mother. From Maimonides' list, however, it will be seen that he, like Alfasi, restricts prohibition *ii*. to the mother of the grandfather, and prohibitions *xii*.-*xvi*., *xx*., to the son's grandchildren, great-grandmother and great-grandchildren, but does not extend it to any further ascendants or descendants. The whole subject is extensively discussed in the Talmud (*Jebamoth* 21, 22; *Jerusalem Jebamoth*, ii. 4), and by Maimonides, *Iad Ha-Chazaka*, *Hilchoth Ishuth*, i. 6, etc.), to which we must refer. It must however be remarked that Philo's list of proscribed degrees is much shorter. After explaining why Moses prohibited marriage with one's own mother or sister, he says, 'For this reason he has also forbidden other matrimonial connections, inasmuch as he ordained that a man shall not marry his grand-daughter (*μη θυγατρὸς ἑκῆς, μη υἱῆς*), nor his aunt on the father's or mother's side, nor the wife of an uncle, son, or brother; nor a step-daughter whilst in the lifetime of her mother or after her death, because a step-father takes the place of a father, and a step-daughter is to be looked upon as his own daughter. Neither does he allow the same man to marry two sisters, either at the same time or at different times, even in case one of them had been married to another and is divorced. For he did not consider it pious that one sister should succeed to the place of her unfortunate sister, whether the latter is still cohabiting with him, or is divorced and has no husband, or is married to another husband' (*De special. legis*, 780). Still shorter is the list of Josephus, who says, 'The law prohibits it as a heavy sin and an abomination to have carnal intercourse with one's mother, step-mother, father's or mother's sister, one's own sister, or a son's wife' (Joseph. *Antiq.* iii. 12. 1). Marriage with a wife's step-mother is allowed by Babylonian and forbidden by the Jerusalem Talmud; the Spanish Jews follow the former, whilst the Germano-French communities adopt the latter. Inter-marriages between cousins, uncle and niece, entire step-brother and step-sister, are quite legitimate. Indeed, for an uncle to marry a niece, which the English law forbids, has been considered by the Jews from time immemorial as something specially meritorious. The Talmud says that the promise given in Isaiah, 'Then shalt thou call and the Lord shall answer' (lviii. 9), refers to that man especially *האווה את שכניו והמקרב את קרוביו* 'who loves his neighbours, befriends his

relations, marries his brother's daughter, and lends money to the poor in the hour of need' (*Jebamoth*, 62 b, 63 a).

As to the ethical cause of the prescribed marriages, or the cases specified, including parallels by affinity, the ancient Jews, to whom the oracles of God were committed, and who had to explain and administer the law in practical life, knew nothing about it. The Palestinian doctors regarded the proscribed degrees as a *positive* law, the cause of which cannot be divined by human reason (*Sifra*, *Kadoshim*, ix. 12; *Talmud*, *Sabbath*, 130 a; *Joma*, 75 a). The only attempt to rationalize on the subject is on the apparent inconsistency of the Mosaic law in prohibiting marriage with the wife of the father's brother, in case she is divorced or left a widow, and not forbidding the wife of the mother's brother. Upon this the Talmud remarks, that a man visits his father's relations more than

התם שכיח ואויל להבא לא שכיח

his mother's (*שכיח ואויל להבא לא שכיח*), and Rashi on this passage

(למשפחת אביו אדם רגיל לילך); and it is submitted, and we believe with perfect reason, and based on Num. i. 2, that it is the father's relations who constitute the family, and not the mother's (*משפחת אב קרוי משפחה כמשפחת אם אינה קרוי משפחה*). We thus see that up to the time of the Ptolemies, when the Greek loose barriers of consanguinity threatened to fall among the Jewish families, the ancient Hebrews were bound only by the specific proscriptions in the Mosaic law, and that even after the prohibitions were extended by the Scribes, the proscription of a male relative by blood did not imply the wife's relatives of the like degree, because of the strong distinction made by them between consanguinity and affinity by marriage; the former being permanent and sacred, and the latter uncertain and vague, as a man might any moment divorce his wife, or take as many as he pleased, and because the husband's family were regarded as the relations, whilst the wife's were not esteemed beyond those who are especially mentioned.

The proscribed degrees were sacredly avoided by the Jews during this period, and no dispensation could be obtained by any one, no matter how high his position, as Judaism never invested any spiritual functionary with power to absolve, even in extraordinary cases, from the obligations of the law. Hence the outcry against Herod the Great, who married his half-sister (Joseph. *Antiq.* xvii. 1, 3); against Archelaus, who took his deceased brother's widow when she was the mother of children (*ibid.* xvii. 13. 1); and against Herod Antipas, for which John the Baptist had to atone with his life (Joseph. *Antiq.* xviii. 5. 1; Matt. xiv. 3).

Besides the proscribed degrees, the Rabbinic law also enacted—i. A man must not marry a divorced woman with whom he has committed adultery prior to her divorce (*Sota*, 27), or even if he is only suspected of it (*Jebamoth*, 24; Maimonides, *Sota*, ii. 12); ii. A man who attested the death of the husband is not allowed to marry the widow, nor is the bearer of a divorce permitted to marry the divorced woman, to avoid suspicion (*Jebamoth*, ii. 9, 10); iii. If a man's wife dies, he must not marry again till three festivals after his wife's death (*Moed Katon*, 23); iv. A man

is not to marry a woman who has lost two husbands (*Jebamoth*, 64) ; v. A father is not to give a young daughter in marriage to an old man, nor is a young man to marry an old woman (*Jebamoth*, 101 ; Maimonides, *Isure Bia*, xxi. 26) ; vi. A man is not to marry within thirty days of the death of a near relation (*Mo'ed Katon*, 23) ; vii. Widows are not to marry within ninety days of the loss of their husbands, nor are divorced women to marry within ninety days of their being divorced, in order that the paternity of the newly-born child might

be distinguished (להבחין בין רעו של ראשון לרעו של שני *Jebamoth*, 41 a) ; viii. If a widow or a divorced woman is nursing an infant, she must not marry within twenty-four months of the birth of the baby (*Jebamoth*, 41 ; *Kethuboth*, 60 ; and *Tosafoth* on these passages).

5. *Sanctity of Marriage, and Mutual Rights of Husband and Wife.*—The notions about sanctity of marriage were loftier during this period than in the preceding epochs, as may be judged from the fact that unfaithfulness to a wife is denounced by the prophet Malachi as violating a sacred covenant to the transaction of which God himself was a witness (ii. 14). And though it may be questioned whether the prophet's appeal to God as having been witness to the marriage-contract refers to the above-named seven benedictions (שבע ברכות) which the bridegroom had to pronounce at the marriage-feast, and in which he invoked God's presence and blessing to the compact, as Abrahanel will have it, yet there can be no doubt that marriage is here for the first time expressly described as a *covenant* (ברית) *made in the presence of God*. With such a view of the sanctity of marriage, the notion that a wife is a plaything for a leisure hour rapidly disappeared, and the sages who had to expound the law to the people in the time of Christ, taught that the declaration 'Peace shall be in thy house' (Job v. 24), will be realised by him (האחוב את אשתו כנפול והמכרה יותר) 'who loves his wife as himself, and honours her more than himself, and trains his sons and daughters up in the way of righteousness' (*Jebamoth*, 62 b). Moreover, marriage was regarded as illegal if the man had not given to his wife the instrument (כתובה), in which he promises his wife, 'I will work for thee, honour thee, maintain thee, and provide for thee, according to the custom of Jewish husbands.' The Rabbinic laws both define this promise and insist upon its being fulfilled, as may be seen from the following enactments :—i. A wife is to be kept in proportion to the circumstances of her husband, and have her meals with him at the table ; if he ill-treats her and she removes from him, he is obliged to send her maintenance (*Jebamoth*, 64 b) ; ii. If the husband goes on a three months' journey without making provision for his wife, the legal authorities of the place are to maintain her from his property (*Kethuboth*, 48 a, 107) ; iii. He is obliged to perform the duties of a husband within a stated period (*Mishna*, *Kethuboth*, v. 6) ; iv. If her husband dies, she is to be maintained from his property, or by the children, in the manner as she was in his lifetime, till she is betrothed to another man, and her rights must be attended to before the claims of any one else (*Kethuboth*, 43, 51, 52, 68, 103 ; *Jerusalem Kethuboth* iv. 14). v. If a

woman marries a man of higher rank than herself, she rises with him, but if he is inferior to

her she does not descend to him (אינה עולה עמו), (*Kethuboth* 48 a, 61 a). For other rights which the wife possesses we must refer to the *Kethuba* or the marriage-instrument given in *section 2* of this period. The husband, on the other hand, has a right to expect from his wife chastity which is beyond the reach of suspicion, unreserved obedience, and to do the work of a housewife. The latter is defined in the *Mishna* as follows :— 'She must grind corn, bake, wash, cook, suckle her children, make his bed, and work in wool. If she brings a bondswoman with her, she is not required to grind, bake, or wash. If she brings two, she need not cook nor suckle her child ; if three, she need not make his bed nor work in wool ; and if four, she may sit in her easy chair (καθέδρα=ישיבת בקתרהא *Mishna*, *Kethuboth* v. 5). Other rights are given in the following section on *Divorce*.

6. *Divorce.*—The rather uncertain grounds on which the Mosaic law permits divorce (*Deut.* xxiv. 1-4) were minutely defined during this period. And though the school of Shammai restricts the phrase, ערות דבר, to *unchastity*, and the Sadducees too insisted that divorce is not to be tolerated except when the woman is guilty of *adultery* (*Eshcol Ha-Copher*, *Alphab.* xcix. ; *Ben Chonania*, iv. 276), yet the Jews as a nation, as well as most Christian expositors, agree with the school of Hillel (*Mishna Gittin* ix. 10), that it denotes *faults or deformities*, as the context plainly shows it. Now, in stating the grounds on which the Jewish expositors of the law, in the time of Christ and after, regarded dissolution of marriage as justifiable, we must distinguish the cases in which the law authorities themselves took up the matter, from those in which the married parties asked for divorce.

a. *Dissolution of marriage occasioned by the law authorities* took place—i. When the woman is guilty of *adultery* ; ii. When the woman carries on secret intercourse with a man after her husband has warned her against it (*Sota*, 27 ; *Jebamoth*, 24) ; iii. Where, though betrothal had taken place, yet a matrimonial law (*matrimonium injustum*) is violated, either referring to the proscribed degrees or to other matters enacted by the Rabbins ; and iv. When the husband is infected with leprosy (*Kethuboth*, 77). b. *It was granted on the demand of the married parties.* Thus the husband could effect a dissolution of marriage—i. When his wife, by violating the Mosaic law, caused him, without knowing it, to be guilty of transgression (*Mishna*, *Kethuboth*, vii. 6) ; ii. If the wife violates the bounds of modesty—e.g., by going into the street with uncovered hair, flirting with young men, etc. (*ibid.*) ; iii. If the wife is suspected of adultery ; iv. If the woman curses her father-in-law in the presence of her husband (*Kethuboth*, 72) ; v. If the wife will not follow her husband to another place (*Kethuboth*, 110) ; vi. If the wife refuses her husband the conjugal rights for twelve months. The wife can demand a divorce—i. If after marriage the husband contracts a loathsome disease (*Mishna*, *Kethuboth*, vii. 9, 10) ; ii. If he after marriage betakes himself to a disgusting business (*ibid.* the Gemara thereon, 75) ; iii. If he treats her cruelly (*Eben Ha-Ezar*, 154) ; iv. If her husband changes his religion

(*ibid.*) ; *v.* If the husband commits an offence which makes him flee from his country (*Eben Ha-Ezar*, 9) ; *vi.* If he leads a dissolute and immoral life (*Eben Ha-Ezar*, *Gloss on Sects*, 11) ; *vii.* If he wastes his property and neglects to maintain her (*Mishna, Kethuboth*, vii. 1) ; or, *viii.* If he refuses her conjugal rights (*Mishna, Kethuboth*, v. 6). There are other grounds on which divorce can be obtained, but for these we must refer to the *Mishna Gittin*, as they are too numerous to be detailed. The bill of divorcement must be handed over, either by the husband or a messenger, to the wife or one deputed by her, with the words, 'This is thy divorce ; thou art henceforth divorced from me, and canst marry whomsoever thou likest' (*Mishna Gittin*, ix.) It must, however, be remarked that divorce was greatly discouraged by the Talmudists, and it is declared that 'he who divorces his wife is hated of God. The altar sheds tears over him who divorces the wife and companion of his youth' (*Gittin*, 90 a).

7. *Levirate Law*.—That this patriarchal law, which, as we have seen, was incorporated in the Mosaic gamology, continued in its full force after the Captivity, is evident from Matthew (xxii. 25-27), Mark (xii. 19-23), and Luke (xx. 28-33). From the question put to our Saviour in these passages, it will be seen that it was incumbent upon each surviving brother in succession to perform the duty of the *Levir*. There were, however, cases where this duty could not be performed, about which the Mosaic law gives no directions whatever—*e.g.*, when the deceased brother's widow was a near relation of the *Levir*, and came within the proscribed degrees, of which the *Mishna (Jebamoth*, i. 1) gives fifteen cases ; or when the latter was a child when his brother died and left a widow without issue. There can, therefore, be no question that the administrators of the law in time of the prophets and at the advent of our Saviour had to define and supplement Levirate law. As the space of this article does not permit us to enumerate these important definitions and enactments, we must refer to the *Mishna, Tract Jebamoth*, which derives its name (יבמות) from the fact that it embodies these laws. It only remains to be remarked, that the fear lest the performance of the duty of *Levir* should come in collision with the law of consanguinity, made the ancient Rabbins declare that (תליצה קודם ליבום) the ceremony of taking off the shoe is preferable to marrying the widow, and thus virtually set aside Levirate marriages. As his ceremony, which is called *Chaliza* (חליצה from חליץ, to draw out, to pull off), supersedes the ancient law, the Rabbins gave very minute orders about the manner in which it is to be performed. The ceremony is performed in the synagogue after morning prayer, in the presence of three Rabbis and two witnesses, attended by others of the congregation as auditors and spectators. The *Levir* and widow are called forward, and after being questioned by the principal Rabbi, and avowing his determination not to marry her, the man puts on a shoe of a peculiar form and made for this purpose, and the woman repeats, 'My husband's brother refuseth to raise up unto his brother a name in Israel ; he will not perform the duty of my husband's brother.' To which the *Levir* replies, 'I like not to take her.' Upon this declaration the widow unties the shoe with her right hand, takes it off, throws it on the ground, and spits before him, saying in Hebrew, 'So shall it be done

unto that man that will not build up his brother's house ; and his name shall be called in Israel, The house of him that hath his shoe loosed ;' when the persons present exclaim three times, 'His shoe is loosed !' This concludes the ceremony, and the Rabbi tells the widow that she is now at liberty to marry whom she pleases.

*Literature*.—The most important ancient literature on all the marriage questions is contained in the third order (סדר) of the *Mishna*, five tractates of which treat respectively—1. On the Levirate law ; 2. On the marriage-instrument ; 3. On suspicion of having violated the marriage-bond ; 4. On divorce ; and 5. On betrothal. To this must be added the *Gemaras* or *Talmuds* on these tractates. Maimonides devotes six tractates of the second volume of his *Jad Ha-Chazaka* to Biblical and Talmudic gamology, giving an abridgment of the traditional enactments. Jacob b. Asher occupies the entire third volume of his *Tur*, called *Eben Ha-Ezar*, with marriage in its various ramifications, and gives a lucid epitome of the ancient code. The life and works of this author are given in the article JACOB B. ASHER of this Cyclopædia. Of modern writers are to be mentioned Michaelis, *Commentaries on the Laws of Moses*, vol. i. p. 450 ff., ii. p. i. ff. ; Saalschütz, *Das Mosaische Recht*, vol. ii. p. 735 ff. ; by the same author, *Archäologie der Hebräer*, vol. ii. p. 173 ff. ; Ewald, *Die Alterthümer der Völker Israel*, 218 ff. ; Geiger, *Wissenschaftliche Zeitschrift*, Frankfort-on-the-Maine, vol. iv. 36 ff., 345 ff. ; *Jüdische Zeitschrift*, Breslau 1862, vol. i. p. 19 ff., 253 ff. ; Stein and Süskind's *Israelitische Volks-lehrer*, vol. i. 192, iv. 282, 301, 315, v. 323, vi. 74, vii. 264, viii. 73, ix. 171 ; Frankel, *Grundlinien des Mosaisch-talmudischen Eherechts*, Breslau 1860 ; Leopold Löw, *Ben Chananiah*, vols. iii.-vi.—C. D. G.

#### MARS HILL. [AREOPAGUS.]

MARSH, HERBERT, D.D., Bishop of Peterborough, one of the acutest and most truly learned divines of his day, was born in 1757, entered St. John's Coll., Cambridge, as a sizar in 1776, where he greatly distinguished himself, taking his B.A. degree as second wrangler and second Smith's prizeman in 1779 ; was elected Fellow of his college, and became M.A. in 1782. The next year he visited Germany, and resided some years at Göttingen, but on the approach of the French armies he returned home, and resumed his duties at Cambridge and became B.D. in 1792. In 1793 the trial of the notorious Friend, and his consequent banishment from the university, took place, after which, as his relative and confidential friend, Marsh's position became so unpleasant that he resolved to return to Germany, and took up his residence at Leipsic. While there, he published a German pamphlet to prove that the French were the aggressors in the war, which, together with some important political information he transmitted to the home government, so ingratiated him with Pitt that he granted him a pension of £500. He returned to England in 1800, and succeeded Dr. Mainwaring as Lady Margaret's Professor of Divinity in 1807, in which capacity he delivered English instead of Latin lectures, which were afterwards published, and went through several editions. He received the degree of D.D. by royal mandate in 1808. In 1816 he was appointed Bishop of Llandaff, whence, in 1819, he was removed to the see of Peterborough, which he held till his death, May 1, 1839.

As a bishop he had the reputation of being attentive to his clergy, prompt and exact in the dispatch of business, liberal in his views, of great benevolence, and much beloved by his friends. During his episcopate he was embroiled in many controversies, some of which occasioned much heat and bitterness. His contributions to theological literature evidence unwearied assiduity in research, extreme acuteness, and clearness of expression. His great work is his translation of J. D. Michaelis' *Introduction to the N. T.*, to which he appended very valuable notes, and a most able and searching disquisition on the *Origin and Composition of the Three First Gospels*, the publication of which formed an epoch in theological literature both in England and on the Continent. Of his other works, we may specify—(1.) *Lectures on Divinity, with an account of the principal authors who have excelled in theological learning*, in seven parts, Camb. 1809-23; Lond. 1838. (2.) *Essay on the usefulness and necessity of Theological Learning to those designed for Holy Orders*, 1792. (3.) *The Authenticity of the Five Books of Moses*, 1792. (4.) *Comparative View of the Churches of England and Rome*, Camb. 1814; third edit. Lond. 1841.—E. V.

MARSHAM, SIR JOHN, Bart., was born in London in 1602, and educated at Westminster School, and St. John's College, Oxford. He chose the law as his profession, and having completed his studies at the Temple, was appointed to a chief clerkship in Chancery. He was created a baronet soon after the Restoration, for his faithful services as a Royalist in the time of the Commonwealth. His learning was both extensive and curious, as is evident from his great work, *Chronicus Canon Aegyptiacus Hebraicus Græcus et disquisitiones*, folio, London 1672; Lips. 1676, 4to; Frank. 1696, 4to. The author's chief aim in this work is to fix the chronology of the Egyptian dynasties; but it is doubtful if he has succeeded in it, although Shuckford and others have maintained he did. The tendency of the book is adverse to the chronology of the Bible. Witsius, who replied to it, allows it to be a work of value, discovering much reading and thought calculated to aid the inquirer in pursuing the obscure and perplexing labyrinths of antiquity (Orme's *Bib. Bib.*) Marsham died in 1685.—W. J. C.

MARTHA (Μάρθα), sister of Lazarus and Mary, who resided in the same house with them at Bethany. From the house at Bethany being called 'her house' in Luke x. 38, and from the leading part which Martha is always seen to take in domestic matters, it has seemed to some that she was a widow, to whom the house at Bethany belonged, and with whom her brother and sister lodged; but this is uncertain, and the common opinion, that the sisters managed the household of their brother, is more probable. Luke probably calls it her house because he had no occasion to mention, and does not mention, Lazarus; and when we speak of a house which is occupied by different persons, we avoid circumlocution by calling it the house of the individual who happens to be the subject of our discourse. Jesus was intimate with this family, and their house was often his home when at Jerusalem, being accustomed to retire thither in the evening, after having spent the day in the city. The point which the evangelists bring out most distinctly with respect to Martha,

lies in the contrariety of disposition between her and her sister Mary. The first notice of Christ's visiting this family occurs in Luke x. 38-42. He was received with great attention by the sisters; and Martha soon hastened to provide suitable entertainment for the Lord and his followers, while Mary remained in his presence, sitting at his feet, and drinking in the sacred words that fell from his lips. The active, bustling solicitude of Martha, anxious that the best things in the house should be made subservient to the Master's use and solace, and the quiet earnestness of Mary, more desirous to profit by the golden opportunity of hearing his instructions, than to minister to his personal wants, strongly mark the points of contrast in the characters of the two sisters. Martha, apprehending her own act to be good, and supposing her sister's wrong, because it was not the same, appealed to Jesus, saying, 'Lord, carest thou not that my sister leaveth me to serve alone?' and no doubt expected that he would commend her active zeal, and send away Mary with a slight reproof. Great, therefore, was her surprise to hear him say, 'Martha, Martha, thou art careful and troubled about many things: but *one* thing is needful: and Mary hath chosen that good part, which shall not be taken away from her.' This has been variously explained; but the obvious reference is to the value of the soul as compared with that of the body, and to the eternal welfare of the one as compared with the temporary interests of the other.

The part taken by the sisters in the transactions connected with the death and resurrection of Lazarus, is entirely and beautifully in accordance with their previous history. Martha is still more engrossed with outward things, while Mary surrenders herself more to her feelings, and to inward meditation. When they heard that Jesus was approaching, Martha hastened beyond the village to meet him, 'but Mary sat still in the house' (John xi. 20, 22). When she saw Jesus actually appear, whose presence had been so anxiously desired, she exhibits a strong degree of faith, and hesitates not to express a confident hope that he, to whom all things were possible, would even yet afford relief. But, as is usual with persons of her lively character, when Christ answered, with what seemed to her the vague intimation, 'Thy brother shall rise again,' she was instantly cast down from her height of confidence, the reply being less direct than she expected: she referred this saying to the general resurrection at the last day, and thereon relapsed into despondency and grief. This feeling Jesus reproveth, by directing her attention, before all other things, to that inward, eternal, and divine life, which consists in union with him, and which is raised far above the power even of the grave. This he did in the words, 'I am the resurrection, and the life: he that believeth in me, though he were dead, yet shall he live: and whosoever liveth and believeth in me shall never die. Believeth thou this?' Sorrow and shame permitted the troubled Martha, in whose heart the feeling of an unconditional and entire surrender to his will was reawakened, to make only the general confession that he was actually the promised Messiah; in which confession she, however, comprised an acknowledgment of his power and greatness. It is clear, however, that she found nothing in this discourse with Christ to encourage her first expectation of relief. With the usual rapid change in

persons of lively susceptibilities, she had now as completely abandoned all hope of rescue for her brother, as she had before been sanguine of his restoration to life. Thus, when Jesus directed the stone to be rolled away from the sepulchre, she gathered from this no ground of hope, but rather objected to its being done, because the body, which had been four days in the tomb, must already have become disagreeable. The reproof of Christ, 'Said I not unto thee, that, if thou wouldest believe, thou shouldst see the glory of God?' suggests that more discourse had passed between them than the evangelist has recorded, seeing that no such assurance is contained in the previous narrative (John xi. 39, 40).

Nothing more is recorded of Martha save that some time after, at a supper given to Christ and his disciples at Bethany, she, as usual, busied herself in the external service. Lazarus, so marvelously restored from the grave, sat with her guests at table. 'Martha served,' and Mary occupied her favourite station at the feet of Jesus, which she bathed with her tears, and anointed with costly ointment (John xii. 1, 2). [LAZARUS; MARY.]

There are few characters in the N. T., and certainly no female character, so strongly brought out in its natural points as that of Martha; and it is interesting to observe that Luke and John, although relating different transactions in which she was concerned, perfectly agree in the traits of character which they assign to her. Tholuck has skillfully followed out its development in his *Commentary* on the eleventh chapter of St. John. See also Niemeyer, *Charakt.* i. 66; and Hall's *Contemplations*, vol. iii., b. 4, *Contemp.*, 17, 23, 24.—J. K.

MARTIANAY, JEAN, a learned Benedictine of the Congregation of St. Maur, was born at St. Sever-Cap 30th December 1647, and died 16th June 1717 at St. Germain-des-Prés, of which he was abbot. He devoted himself chiefly to Biblical studies, and was the author of several valuable works in this department. Of these may be mentioned: *Défense du texte Hébr. et de la chronologie de la Vulgate*, Par. 1689; *Continuation de la Défense*, etc., 1693 [in these works he advocates the Hebrew text in preference to the LXX., and maintains that only 4000 years elapsed between the Creation and the Advent]; *Traité de la connaissance et de la vérité de l'Ecrit. Ste.*, 4 vols., 1694-95; *Traité méthodique ou manière d'expliquer l'Ecrit. par le secours des trois Syntaxes, la propre, la figurée, et l'harmonique*, 1704; *Le Nouveau Testament trad. en François sur la Vulg.*, 3 vols., 1712; *Méthode Sacrée pour apprendre à expliquer l'E. S. par l'E. même*, 1716. He also edited the works of St. Jerome in 5 vols. fol., Par. 1693-1706; and wrote *Vie de S. Jerome*, 1706.—W. L. A.

MARTIN, DAVID, was born at Revel in 1639, and died in 1721 at Utrecht, where he was pastor of the French church. His principal works are *Le N. T. expliqué par des notes courtes et claires*, 4to, Utr. 1696; *Histoire du V. et du N. T.*, 2 vols. fol., Amst. 1700. He also revised the Geneva version of the Bible, 2 vols. fol., Amst. 1707 [FRENCH VERSIONS]. All these works have passed through several editions. His dissertation on 1 John v. 7 was translated into English (Lond. 1719), and was the occasion of a controversy which made some noise at the time [EMLYN].—W. L. A.

MARY, THE VIRGIN (*Μαριάμ*). Two great prophecies were to be fulfilled in the birth of the Messiah: the one that he was to be in a peculiar and emphatic sense the 'seed of the woman,' the other that he was to be the Son of David. The former, first uttered by the Almighty in the sentence pronounced upon the tempter (Gen. iii. 15), was more widely developed by Isaiah (vii. 14) and Jeremiah (xxxii. 22), and received its full accomplishment in the event foretold by the angel Gabriel to the Virgin Mary (Luke i. 35). But how was the other prophecy fulfilled? That the Messiah was to be the son of David we have the concurrent testimony of the O. and N. T. in a great number of passages. Moreover, we have the concurrent belief of the Jewish nation, ancient and modern, and of the church of Christ in all ages. And yet in those two documents which profess to give us the genealogy of Jesus Christ there is no notice whatever of the connection of his only earthly parent with the stock of David. On the contrary, both the genealogies profess to give us the descent of Joseph, to connect our Lord with whom, by natural generation, would be to falsify the whole story of his miraculous birth, and overthrow the Christian faith.

Two opinions have been entertained in reference to this difficulty. The one most favoured by modern writers on the genealogies (Lord Arthur Hervey, Wordsworth, Alford, etc.), is that Mary's connection with the line of David though real was purposely passed over in silence by the sacred writers, and that the combined effect of the two genealogies of the N. T. is to establish Joseph's right to the throne of David, as shown in Matthew, in virtue of his lineal descent from David, as given in Luke, and, consequently, the right of Jesus, his legal and acknowledged, though not natural son, to the same honours. The other, which is ably maintained in the article on the Genealogy of Jesus Christ in this work, and which has also the support of the learned Dr. Hales, following Lightfoot, of Bengel, and other authorities, is that the genealogy of St. Matthew gives the lineal descent of Joseph, while that of St. Luke gives the lineal descent of Mary, and that we are to understand this latter genealogy as stating Joseph to be not the actual son but the son-in-law of Heli, in virtue of his marriage with Mary, the daughter of Heli.

One thing is certain, that our belief in Mary's descent from David is grounded on inference and tradition, not on any direct statement of the sacred writers. Had she not been of the royal line, the adversaries of the gospel could easily have proved it by showing her actual parentage. The carelessness of the evangelist to substantiate her descent from David, while they so unmistakably assume that her son proceeded from his loins, appears in the incidental statement of St. Luke that Elizabeth was her cousin. This would naturally lead to the inference that Mary, like Elizabeth, was a daughter of Aaron (Luke i. 5). Indeed it is broadly asserted by Gregory Nazianzen, and other Christian writers, that she *was* of the tribe of Levi. This descent, according to the flesh, would give to our Lord, it might be thought, a claim to the priestly office in virtue of his descent from Aaron. But the words of St. Paul are express on this point:—He of whom these things are spoken pertaineth to another tribe, of which no man gave attendance at the altar. For it is evident that our

Lord sprang out of Juda, of which tribe Moses spake nothing concerning the priesthood' (Heb. vii. 13, 14). And may not this remarkable concealment of the *very line* by which he descended from David amidst the blaze of light which proclaims him to be David's son, afford an illustration of the peculiarity of his priesthood as being of the order of Melchizedec, of whom it is said that he was without father, without mother, without descent, or, as the margin reads, without pedigree, having neither beginning of days nor end of life. But Melchizedec and Mary must both have had a line of ancestors, though their names nowhere appear in the sacred genealogies; and there has been a ceaseless endeavour, both among ancients and moderns, to gratify the natural craving for knowledge on this subject. According to the traditions of Christian antiquity, Mary was the great-great-grand-daughter of Levi who is named in St. Luke's genealogy as the great-grandfather of Joseph: it is generally agreed that her father's name was Joachim, and her mother's Anna, and the names of Panther and Barpanther are given as those of her great-grandfather and grandfather. It is said that the records of this genealogy were destroyed by Herod, but its substance kept in memory by the Desposyni or brethren of the Lord. There are, however, grave reasons against this tradition, which are discussed by Lord Arthur Hervey in his *Genealogy of our Lord*, and also by the writer of the article on that subject in this work. Having made these remarks on the descent of Mary, we may now turn to the history of her life.

As to her early condition, the gospel simply tells us that she was a virgin espoused to a man whose name was Joseph, of the house of David. It has been supposed—and very reasonably—that Joseph and Mary, and their immediate relations, were now the only representatives of the house of David. Mary, too, may have been the representative of the eldest, and Joseph of the youngest branch of the surviving family, and as such it is by no means unlikely that Mary may have possessed some small inheritance at Bethlehem. We know how strictly it was the aim of the Mosaic law to prevent the alienation of property from the tribe and family to which it originally belonged, and nothing would be more accordant with the customs of the nation than for Joseph—supposing him to be the heir of David's throne—to have espoused Mary the inheritress of his patrimony. During the period of her espousal she would, according to the custom of the Jews, reside with her parents, and have no communication with her intended husband except through a third person, and the effect of her espousal would be to add a higher degree of sacredness to her virginity, since the punishment inflicted by the law of Moses for a violation of chastity on the part of a betrothed damsel was the death by stoning of both the guilty persons, while the consequence of the same offence in the case of a damsel not betrothed was only the imposition of a trifling fine upon the man, and the marriage of the woman. Various opinions have been held as to the purpose of divine wisdom in causing the Saviour to be born of a *betrothed* rather than a *dis-engaged* virgin. It seems eminently seemly and decorous, that the mother of the Messiah should have some one to vouch for her virginity, and to act as her protector, and the foster-father of her child, and that he should be one who, as heir of the

throne of David, would give to his adopted son the legal rights to the same dignity, while, of all persons, he was the most interested in resisting the claims of a pretender. Origen, following Ignatius, thinks it was in order to baffle the cunning of the devil and keep him in ignorance of the fact of the Lord's advent. The simpler and more natural reason appears the better one.

The announcement of her coming greatness was made to her by the same angelic messenger, Gabriel, the MAN OF GOD, who had declared that seventy weeks of years were to elapse before the advent of the Messiah (Dan. ix. 24). That time being fulfilled, he comes again to announce the fact to her who was to be the immediate instrument of its accomplishment. Nothing can be conceived more full of grace and dignity; nothing more expressive of sublime elevation and lowly surrender to the divine will, than the conduct of Mary in her interview with the angel. One can hardly doubt that he appeared to her under the form of a man, as in the case of earlier angelic appearances, and yet one cannot but believe that there was a glory in his features which at once convinced Mary of the true nature of her visitor, entering as he did unannounced, most probably into her secret chamber—most probably at the time of her devotions. He addresses her as *κεχαριτωμένη*, a word which the doctors of the Church of Rome have translated 'full of grace,' and on which they have built the theory that she had all the seven gifts of the Spirit, and all the theological and moral virtues, and such a fulness of the graces of the Holy Ghost as none ever had the like (Lightfoot). The word does not occur in classical Greek, but the analogy of similar words leads us to the meaning of 'highly favoured,' and such is, no doubt, its meaning in Eph. i. 6, the only other place where it occurs in the N. T. At the first salutation of the angel, Mary was troubled, wondering what its purport might be, for as yet he had only told her that she was blessed among women. But when he reassures her, and reveals to her in express terms the divine intention that she should conceive, and become a mother, and bear a son who should sit on the throne of his father David, her trouble changes, not into unbelief, as was the case with Zacharias (Luke i. 18, 20), but into a devout inquiry as to the manner in which so great a miracle was to be wrought in her. How shall these things be, seeing I know not a man? It clearly follows from this reply that she already understood the angel to mean that she should, *as she then was*, and previously to the consummation of her marriage with Joseph, conceive and bear a son; otherwise there was no marvel in the announcement. This is the more remarkable, since the angel said that her son was to sit on the throne of his father David, and Joseph, her betrothed husband, was himself the heir of David's throne. What was more natural than that, after the consummation of her marriage with him, all that the angel promised her should be fulfilled? But she clearly understood it otherwise. She clearly understood the angel to mean that she, virgin as she was, should conceive, and thus become the mother of the son of David. Joseph appears to be forgotten, and yet that *her* son should be the son of David was no wonder: the wonder was that she should become a mother without knowing man. We may surely infer from this that she knew herself to be a daughter of David. The angel then tells her that

the Holy Ghost should come upon her, and the power of the Highest should overshadow her; wherefore also that holy thing which should be born of her should be called the Son of God. To which she replies with exquisite dignity and meekness, Behold the handmaid of the Lord, be it unto me according to thy word.

To quicken Mary's faith, and show her that with God nothing is impossible, the angel had told her that her cousin Elisabeth, who had lived to old age in barrenness, had conceived, and was now in the sixth month of her pregnancy, and Mary hastens to visit her. Very opposite views are entertained in reference to the time, object, and circumstances of this visit. It has generally been held that the time of Mary's conception was, when bowing with reverential submission to the will of God, she said, 'Behold the handmaid of the Lord, be it unto me according to thy word.' Lightfoot, however, while acknowledging that this is the received opinion, thinks that her journey to the hill country was especially intended to allow her conception to take place there. She went to the hill country to a city of Judah. This city is pronounced by Lightfoot—than whom none has paid more attention to the chorography of Scripture—to be Hebron. For unto the sons of Aaron Joshua gave the city of Arba, which is Hebron in the hill country of Judah (Josh. xxi. 11). It was a sacred city, and the scene of some of the greatest events of the early history of God's people. There was given the promise of Isaac and the covenant of circumcision. There Abraham had his first land and David his first crown. There lay interred Abraham and Sarah, Isaac and Rebekkah, Jacob and Leah. What could be more fitting than that the Messiah should be conceived in the city of those patriarchs to whom the promise of the Messiah was given? that this Shiloh of the tribe of Judah and of David should be conceived in a city of Judah and of David? On the other hand, it is argued that Mary, as a betrothed virgin, could not travel, and that her being reported to be with child (Matt. i. 18) must have occurred before her journey to the hill country. This, by giving occasion to Joseph to take her to his own house, would also enable her to travel, with or without him, into Judea. It is remarkable that when she arrives Elisabeth salutes her as the mother of her Lord, an expression which would accord better with the supposition that she had already conceived, while the glorious hymn of praise into which she bursts on hearing the salutation of Elisabeth might very well spring from such an outpouring of the Holy Ghost as we may believe to have attended the moment of her conception. Much, too, has been written as to the manner of this miraculous act. All that is proper to be said about it has been said by Bishop Pearson with his usual judgment and comprehensiveness. One thing may be referred to here—the importance of guarding against the notion that the Holy Ghost is the father of Jesus Christ. On this he says: 'Because the Holy Ghost did not beget Christ by any communication of his essence, therefore he is not the father of him, though Christ was conceived by him. . . . The Word was conceived in the womb of a woman, not after the manner of men, but by the singular, powerful, invisible, immediate operation of the Holy Ghost, whereby a virgin was beyond the law of nature enabled to conceive, and that which was conceived in her was originally and completely sanctified.'

We now turn our thoughts to her betrothed husband. When the fact of Mary's being with child was made known to him, he drew the inference which was natural under the circumstances, and felt it to be right to break the compact between them. We should probably look in vain for the precise law of the Mosaic code under which he might have acted had he wished to make her a public example, or that under which he intended to act in putting her away privily. Num. v. and Deut. xxii. and xxiv. have been referred to. But the punishment of death by stoning seems only to have been prescribed when the guilty parties were found in the very act, and it is probable that this law was not strictly executed in our Saviour's days (John viii.)

But the anxieties of this just man were soon ended by the same divine messenger who had appeared to Mary. 'Joseph, thou son of David,' said the angel, 'fear not to take unto thee Mary thy wife, for that which is conceived in her is of the Holy Ghost. And she shall bring forth a son, and thou shalt call his name Jesus, for he shall save his people from their sins.' St. Matthew adds, 'Now all this was done that it might be fulfilled which was spoken of the Lord by the prophet: Behold a virgin shall be with child, and shall bring forth a son, and thou shalt call his name Emmanuel, which, being interpreted, is, God with us.' [VIRGIN.]

The next event in the life of Mary was her visit to Bethlehem on the occasion of a census of the empire commanded by Augustus. Her going there with Joseph at a time when travelling would naturally be inconvenient, is an additional proof that she, as well as he, was of the house and lineage of David. The journey was one of about seventy-five miles, and had been travelled over eight or nine months before by Mary, on her way to the hill country of Judea, ten or fifteen miles beyond it. And how often was the same country traversed by Mary's divine son, in his many journeys to and from Jerusalem! Bethlehem stands on the narrow ridge of a long grey hill running east and west, and its position suggests the difficulty that a crowd of travellers would have in finding shelter within it. Already, in the 2d century, a neighbouring cave was fixed upon as the stable where Joseph abode, and where accordingly Christ was born and laid in the manger. The hill sides are covered with vineyards, and a range of convents occupies the height, and incloses within it the cave of the nativity; but there are grassy slopes adjoining, where the shepherds may have kept watch over their flocks, seen the vision of the angelic hosts, and heard the divine song of, 'Glory to God in the highest, on earth peace and good will towards men.' Full of wonder and hope, they sought the lowly sojourn of the Virgin, and there saw with their own eyes what the Lord had made known to them. But while they publish abroad and spread the wondrous tale, Mary kept all these things and pondered them in her heart. Her first duty in connection with her son was his circumcision—his first experience of the sharp pains of human life, her first occasion of sympathy with his sorrows. As usual, it was performed on the eighth day, probably by his reputed father Joseph, and he then received the name of Jesus, which was given to him by the angel. On the fortieth day after his birth, she took him to Jerusalem, for the double

purpose of presenting him to the Lord, and making the offering prescribed by the law of Moses for her own purification. It is remarkable that the Greek text says *their*, not (as the A. V.) *her* purification; especially remarkable, as the Levitical law says nothing about the purification of the *child*. Possibly common usage may have applied the word *καθαρismus* to the presentation of the child as well as the purification of the mother, so as to include both rites under one term. A touching evidence of the 'low estate' of Mary is given by the reference to the offering enjoined in cases similar to hers by the law of Moses—a pair of turtle doves or two young pigeons. If we refer to the law in question, we shall find that this offering was only prescribed where the woman was too poor to bring a lamb. But though tokens of poverty attended her on this occasion, she was met by notes of welcome and hymns of grateful joy, by the worthiest and most venerable of Jerusalem. Simeon, we know, was a just and devout man, one who waited for the consolation of Israel, and had revelations from the Holy Ghost. But tradition also says, that he was the great Rabbi Simeon, the son of Hillel, and father of Gamaliel, in whose days, according to the Rabbis, the birth of Jesus of Nazareth took place (Rosenmüller, quoted by Wordsworth). And Anna, who had spent her long life in daily attendance at the worship of the temple, was evidently the centre of a devout circle, whose minds had been led by the study of Scripture to an expectation of redemption. Mary wondered when Simeon took her child into his arms, and received him as the promised salvation of the Lord, the light of the Gentiles, and the glory of Israel; but it was the wonder of joy at the unexpected confirmation of the promise already given to her by the angel. Other words were added, showing the spiritual character and the momentous importance of the kingdom of her son, and closing a prophetic allusion to the opposition he should encounter, with the touchingly suggestive declaration, 'Yea, a sword shall pierce through thy own soul also.'

But that hour was yet distant, and new honours awaited the son of Mary. She had returned to Bethlehem, and probably she and Joseph intended to make it their abode. Such an intention might spring from her ancestral connection with the place, and the unevolved but distinct assurances of the coming kingdom of her son. It is certain that their eventual return to Nazareth may be said to have been accidental, being occasioned by the reports they heard of Archelaus on their return from Egypt. But while they continued at Bethlehem, a party of Persian magi appeared at Jerusalem. They had come on a strange errand, to seek and to worship him that was born King of the Jews. [MAGI.] The alarmed attention with which their inquiry was met by the Jewish Sanhedrim and by Herod, shows how alive *they* were to the expectation of a real or pretended Jewish deliverer, nor was there a doubt as to the place where he ought to be found according to prophecy. To Bethlehem, then, they went, under engagement to return and report the result of their inquiries. The miraculous star foretold by Balaam, and which they had seen in the east, shone brightly in the heavens over the dwelling of Joseph and Mary. What the star was we need not inquire. The argument for its being a conjunction of Jupiter and Saturn in the constellation Pisces, is strikingly put by Dean Alford, while

Wordsworth rejects this view, holding with Ignatius, Chrysostom, and St. Augustine, that it was a new star created at the nativity. But whatever was its nature, the magi, when they saw it, rejoiced with exceeding great joy, and testified their adoration of the infant to whom it directed them by gifts of great value and deep significance. We soon find Mary and her child, guided by Joseph, wending their way over the green hills of Judah, towards that Egypt, now a Roman province, from which God's people had been called so many centuries before. It was now much frequented by Jews, was not more than sixty miles from Bethlehem, and was separated from Herod's jurisdiction by the river Sihor. It seems a natural inference, from the precaution taken by Herod (Matt. ii. 16), that our Lord was about two years old at this time, and it was but a few months later that the death of Herod enabled him to return into Palestine. Now, however, though apparently intending to remain in Judea, they returned to Nazareth, and settled there.

We hear no more of Mary till that most touching incident which occurred when her son was twelve years old, on the occasion of one of their annual visits to Jerusalem at the Feast of the Passover. Our Lord had attained the age when a boy was called by the Jews *בֶּן הַתּוֹרָה* (Ben Ha-Torah), son of the law. Till now he had been in a more especial manner the child of his mother. We see the comparative independence into which he had grown by her indifference to the fact of his non-appearance in the company of herself and Joseph when they started from Jerusalem on their return. We also have in it an evidence of his undeviating rectitude of conduct and good sense. But when the evening came without him, their human feelings took alarm, an alarm which was not quieted till they saw him in the midst of the doctors—not teaching them, but, as an intelligent Jewish child, hearing them, and learning of them by asking questions. We may imagine how Mary's heart leaped up when she saw her divine son, and the reflections into which she would be thrown by his first recorded gentle, but serious rebuke, 'Wist ye not that I must be about my Father's business?'

We meet with no further mention of Mary till the marriage of Cana of Galilee, to which Mary, now probably a widow, seems to have been invited as an honoured relative. Lightfoot supposes the marriage to have taken place in the house of Alpheus, Mary's brother-in-law, as his son Symon is called the Canaanite, or man of Cana. Cana itself is identified with the modern Kana el jelil, or Kirbet Cana, about seven miles north of Nazareth, and ten south-west of Capernaum. It is clear that Mary felt herself to be invested with some authority in the house. Jesus was naturally there as her son, and the disciples as those whom he had called and adopted as his especial friends. As yet, the Lord had done no miracle; and it has been questioned whether Mary, in drawing his attention to the failure of the wine, meant to invoke his miraculous powers, or merely to submit the fact to his judgment, that he might do what was best under the circumstances, either withdrawing from the feast with his disciples, or engaging the attention of the guests by his discourse. The better opinion, however, seems to be, that she knew he was about now to enter on his public ministry, and that

miracles would be wrought by him in proof of his divine mission; and the early fathers do not scruple to say, that a desire to gain *clat* by the powers of her son, was one motive for her wish that he should supply the deficiency of the wine, and that by his reply he meant to condemn this feeling. The writers of the Church of Rome are very desirous to clear our Lord's answer of all intention of rebuke, and say that what he intended was to teach a general lesson that miracles were not to be performed from regard to human affinity, but solely from love, and his object of manifesting his glory. And this is true, but first among those to be taught this was she herself who had tempted him to work a miracle from that regard (Alford quoting Trench). But Mary having received this lesson, having heard from his lips the words, respectful but decided, 'Woman, what have I to do with thee? mine hour is not yet come,' is by no means shaken in her conviction that he will perform the miracle; her faith triumphs over the apparent rebuke. She had been taught that, though she was the mother of his humanity, it was not her part to interfere with the exercise of his divine power, that what he wrought he would work at his own time and in his own way; but still she was assured both of his power and of his will to perform, and accordingly she says to the servants, 'Whatsoever he may say unto you, do.' In what strange opposition to the whole spirit of this incident, and to the comments upon it, of Irenæus, Chrysostom, and Augustine, is the prayer offered to Mary by the Romish church—'Monstra te esse matrem, jure matris impera filio!'

It was probably not long afterwards, and when he was in the full career of his Galilean ministry, teaching, preaching, and healing, in house, in synagogue, on the shore, on the mountain, and not having leisure so much as to eat, that his kindred were seized by the idea that he was beside himself. Even his mother seems to have been taken with the notion that he was doing too much. For we find her with his brethren pressing upon the skirts of the crowd which surrounded the house where he was at Capernaum, and desiring to speak with him. It is a natural picture of maternal anxiety. But when the circumstance was mentioned to our Lord, he once more taught the lesson that earthly relationships were as nothing compared with that new relationship which was to subsist between himself and his church:—'Whoso heareth my word and keepeth it, the same is my brother, and sister, and mother.' Chrysostom, however, and other fathers of the church, taking a different view of the transaction, animadvert in strong terms on the vainglory of the Virgin, who desired to share the honour which he gained by his miracles, and to show the people her connection with him and influence over him. 'Such comments show what would have been the opinion of St. Chrysostom and the church in his age on the dogma now enforced by the Church of Rome as an article of faith—viz., that the blessed Virgin was exempt from original and actual sin' (Wordsworth *on Matt.* xii. 48).

The mention of our Lord's brethren naturally leads to the question whether Mary had children by Joseph after the birth of Jesus. On this point we cannot do better than quote the words of Pearson: 'We believe the mother of our Lord to have been not only before and after his nativity,

but also for ever, the most immaculate and blessed Virgin. For although it may be thought sufficient as to the mystery of the incarnation, that when our Saviour was conceived and born his mother was a virgin; . . . yet the peculiar eminency and unparalleled privilege of that mother; the special honour and reverence due unto that Son, and ever paid by her; the regard of that Holy Ghost who came upon her, and the power of the Highest which overshadowed her; the singular goodness and piety of Joseph to whom she was espoused;—have persuaded the church of God in all ages to believe that she still continued in the same virginity, and therefore is to be acknowledged the Ever-Virgin Mary.' As if the gate of the sanctuary in the Prophet Ezekiel were to be understood of her, 'This gate shall be shut, it shall not be opened, and no man shall enter in by it; because the Lord the God of Israel hath entered in by it, therefore it shall be shut.' In accordance with this view, the better opinion appears to be that the brethren of the Lord were (not, as was held by many, the sons of Joseph by a former marriage) but the sons of Alpheus by Mary the sister of the virgin.

But in that last and most touching interview between Mary and her divine Son, while he hung on the cross, it was to the care of none of these his kindred according to the flesh that Mary was confided, but to that of John, the disciple whom Jesus loved. This, according to Chrysostom, was that hour of weakness when he should again be subject to the ties and anxieties of human affinity, which he contemplated afar off when his mother seemed to exact from him a token of submission to her authority at Cana in Galilee. We see in it a proof that, as ever so now, he was perfect man, ever sympathizing with our wants, ever touched with a feeling of our infirmities: 'Woman,' said he to the weeping Mary, 'behold thy son!' and then turning to the beloved disciple, 'Behold thy mother! And from that day that disciple took her unto his own home.'

Beyond the fact stated by St. Luke in the first chapter of the Acts, that she, with the eleven apostles and the women and the brethren of Jesus, continued in prayer and supplication in an upper room after our Lord's ascension into heaven, there is no further mention of Mary in the sacred volume. Other Marys attended at his sepulchre, and witnessed his resurrection; but Mary, the mother of our Lord, has passed from before us, and we see her no more.

Not so, however, in legendary story, and in the history of the church. Here the name of Mary bursts out afresh with new but artificial lustre. The legend says that when the apostles dispersed to spread the gospel through the world, Mary continued to reside near Mount Zion, and spent her days in visiting the places which had been made sacred by the most memorable events of her Son's life—his baptism, his fasting, his prayer, his passion, his burial, his resurrection, and his ascension, which last event she survived twenty-four years, and died at the age of seventy-two; others say she died at the age of sixty, having survived him twelve years. According to the legend of the assumption, her soul took flight in the presence of all the apostles, who were miraculously brought together to witness her departure. The soul flew, at his call, into the arms of her son; but was afterwards, at his command, re-united with the body, that as

she had known no spot of carnal sin, so she should suffer in the tomb no bodily decay; and then she was carried up all glorious into heaven, accompanied by a multitude of angels (see the *Golden Legend* of Jac. de Voragine). A more unpretending tradition is that she went to Ephesus with St. John, and died there at the age of seventy-three; and the general council which was held at Ephesus, A.D. 431, seems to support the belief that she was buried there. Another well-supported opinion is that she died at Jerusalem before the dispersion of the apostles, and that she was buried at Gethsemane.

We must now glance at the Jewish and Mohammedan traditions respecting her.

We have already a hint during our Lord's ministry of the Jewish calumnies as to his birth. 'We be not born of fornication' (John viii. 41), seems to be an insinuation on their parts that *he* was. This is one of the charges on the part of Celsus that Origen had to refute. Celsus not only states that her husband the carpenter had to put her away for adultery, but he gives the name of the adulterer, speaking of Mary as *τίκτουσα ἀπὸ τινος στρατιώτου Πανθήρα τοῦνομα*. Lightfoot quotes the same story from the Talmudists (Hebrew and Talmud *Exercit.*, Matt. xxvii. 56), who, he says, often vilify her under the name of Satdah, and repeats a story in which she is called Mary the daughter of Heli, and is represented as hanging in torment among the damned, with the great bar of hell's gate hung at her ear (*ibid.*, Luke iii. 23). Similar charges may be found in the *Historia Jeschue Nazareni*, by Huldric (Leyden 1705), and are well refuted by Wagenseil, in his *Tela Ignea Satanae hoc est arcani et horribiles adversus Christum Deum et Christianam religionem* ANEKAOTOI, Altdorf 1681. The most formal set of accusations against Mary are to be found in a work entitled *Toldoth Jesu*, which was at one time supposed to be of very great antiquity. But Wagenseil has proved it to be a composition of the 13th century. It makes Mary the wife of a good man named Johanan, residing at Bethlehem, and states that she was deceived in the dark by one Joseph Pandera, who pretended to be her husband. Johanan, though advised by Rabbi Simeon to bring his wife before the Sanhedrim, fled with her to Babylon, where she had a son, Jehoshua, who discovered the art of working miracles by stealing the knowledge of the sacred name from the temple, but being defeated by the superior art of a certain Juda, was crucified, and his body hidden under a water-course.

The Mohammedan traditions, on the contrary, treat Mary with the greatest respect. One chapter of the Koran is inscribed with her name, and several others speak not only of her birth, but also of the circumstances which preceded it, of her education in the house of Zacharias and in the temple, and of the miraculous birth of her son. Hossain Vaez, commenting on the Koran, informs us that every child coming into the world is handled and squeezed by the devil until it cries, and that Mary and her son Jesus are the only ones that were preserved from this diabolical handling, an opinion curiously in accordance with the modern doctrine of the immaculate conception. He also tells us that Anna, the mother of Mary, had devoted her daughter to God from before her birth, and that when she presented her in the temple she said—using the words of the Koran—'Behold the pre-

sent which I make you, a present from which God is to proceed.' He says that God named her Miriam, a servant of God, and that Zacharias—her appointed guardian—kept her in a chamber of the temple, which was only accessible by a ladder, and of which he always kept the key, and that he frequently paid her visits, and always found her furnished with the finest fruits of the Holy Land, and when he asked her where they came from, Mary replied, 'All that you see comes from God, who bestows all things without reckoning and without number on those on whom he wills.' The Koran appears to confound her with Miriam, the sister of Moses and Aaron, and the commentators on the Koran note the mistake, and try lamely enough to explain it away by saying that Joachim or Amram, the father of the virgin, was the son of Matheus, and consequently a different person from Amram the father of Moses and Aaron. The Mohammedans accuse the Christians of making Mary the third person of the Trinity. D'Herbelot says that this mistake arises from the Eastern Christians calling her *Al Seidat* (the lady), and from St. Cyril's having said that she was the complement or supplement of the Trinity.

The Church of Rome must not be charged, except indirectly, with all the extravagances which have been held and taught by her members respecting the Virgin Mary. These vain stories and notions were introduced at a very early date, and for several centuries the authority of the papal chair was exercised for their repression. But age after age fresh stories were invented, fresh pretended revelations were received, and these gave rise to fresh dissensions and fresh appeals to authority, and at length Rome gave way under the pressure of the popular opinion. This will best appear in tracing the history of the several festivals which have been instituted in honour of the Virgin Mary.

*The Feast of the Immaculate Conception.*—The dogma now held on this point was evolved by the subtleties and refinements of the schoolmen in the 12th and 13th centuries; and after a debate of 600 years, in which popes and cardinals, kings and their ambassadors, sage doctors of philosophy and heated enthusiasts, have taken part, it has only been made an article of faith by a decree of Pope Pius the ninth within the last ten years (Dec. 8th, 1854). The doctrine asserted is that the Virgin Mary was conceived without original sin. The distinction established is between absolute freedom from original sin *in* the first instant of conception, and absolute freedom from original sin *from* the first instant of conception; for many theologians who granted the latter hypothesis would not allow the former. The arguments to prove it—partly the fitness of things, partly the miracles performed by the Virgin in favour of the most dissolute and wicked of both sexes, provided they were diligent in the celebration of her 'hours,' and the injunctions she laid upon those whom she had rescued from death under such circumstances, to celebrate the feast of her conception. The suppositions by which it is rendered credible—either that all Adam's posterity were implicated in his guilt, with a reservation in favour of that person of whom the Son of God was to be born, or that the curse fell upon the whole man Adam, with the exception of one single particle of his substance, which was to descend uncontaminated through all his posterity in one line, and ultimately to be formed into the

sinless body of the Virgin. Foremost amongst its abettors were Duns Scotus and his followers the Scotists, and his commentator Bellarmine—the canons of Lyons, whose church was one of the first to celebrate her immaculate conception, and who thereby exposed themselves to the castigation of St. Bernard—the fathers of the council of Basle, who pronounced in its favour after the council itself had been declared schismatic (1438)—the kings Philip III. and IV. of Spain, who in vain solicited the Popes Paul V. and Gregory XV. to pronounce in its favour—and several popes who, without venturing to make it an article of belief, approved of offices for its celebration, gave indulgences to those who celebrated them, and sanctioned fraternities and sisterhoods instituted in its honour. Against the dogma we have St. Augustine and the whole body of the fathers who wrote before the controversy, but expressed themselves unequivocally on the point—Peter Lombard, St. Thomas Aquinas, Bonaventure, St. Bernard, and the Dominican brotherhood, with Vincent Baudello the general of their order. The feast is said to have been instituted on the occasion of the preservation from shipwreck of St. Anselm, afterwards Archbishop of Canterbury, and by the direction of Mary herself, who informed him that the day of her conception was the 8th of December.

*The Nativity of the Virgin.*—There is a good deal of controversy as to the time of its first celebration, and its origin. It is celebrated on the 8th September, and is not traceable further back than the 9th century. There is a Romish calumny that Queen Elizabeth substituted her own birthday in its place.

*Her Presentation in the Temple*, November 21, mentioned in very early martyrologies, and in a constitution of the Emperor Manuel Comnenus.

*Her Espousals*, January 23.

*The Annunciation*, March 25.

*The Visitation*, July 2, established by Urbain VI., and approved by the council of Basle.

*The Purification*, February 2, established in the East under the Emperor Justinian, and a little later in the West.

*The Assumption* (*κοίμησις*, in the Greek Church), celebrated originally at different times, but fixed to be on the 15th August about the time of Charlemagne. There has been almost as much diversity of opinion as to whether the body of the Virgin was taken into heaven, as there has been on the subject of her immaculate conception. Usuard, a writer of the 9th century, whose opinion is respected in the Church of Rome, says, 'That although her sacred body is not found on earth, the church, which is a pious mother, celebrates her blessed memory, not doubting in the least but that she died according to the condition of all mankind. But the church being deliberate in her judgments, hath rather chosen to own she knows not where this sacred temple of the Holy Ghost is hidden, than teach anything herein either vain or apocryphal.' These words of Usuard were originally introduced into the service of the feast of the assumption, but were afterwards, about 1550, taken from it to introduce instead a sermon which taught just the reverse. But this sermon was again suppressed by the chapter of the Cathedral of Notre Dame at Paris, in 1668, and the passage from Usuard restored (Fleetwood, Bishop of Ely, in Gibson's *Preservative from Popery*). The

principal authorities on this subject are Launoy, Jacques Boileau, Joly, Combefis, Tillemont, on one side, and Gaudin and l'Advocat Billiad on the other. There appeared at Louvain, in 1786, *Discussio Historica an de fide sit Assumptio*, by P. J. Marant, a work which excited a good deal of indignation among the Belgian Catholics.

Besides the great festivals in honour of Mary, particular churches and fraternities have had their private ones. Several religious orders have chosen her for their especial patroness, and the whole kingdom of France was, in 1638, placed under her protection by a vow of Louis XIII. Festivals have been established in honour of particular objects connected with her, as the chamber in which she was born, and which was conveyed miraculously from Nazareth to Loretto, la Cintola at Prato, la Saint Chemise at Chartres, the rosary which she gave to Saint Dominick, and the scapular which she gave to Simon Stock; and indulgences have been granted on the occasion of these festivals, and the devotions they elicited. Books have been written to describe her miraculous pictures and images, and the boundless extent and diversity of the literature to which her worship has given rise may be inferred from a description of two of the 115 works, all on the same subject, of Hyppolyte Marracci, a member of the congregation of the Clerks of the Mother of God, born 1604. *Bibliotheca Mariana* is a biographical and bibliographical notice in alphabetical order of all the authors who have written on any of the attributes or perfections of the holy Virgin, with a list of their works. The number of writers amounts to more than 3000, and the number of works in print or MS. to twice as many. This rare and highly valued work is accompanied by five curious and useful indices. The other is *Conceptio immaculatae Deiparae Virginis Mariae celebrata MCXV anagrammatibus prorsus puris ex hoc salutationis Angelicae programma deductis 'Ave Maria gratia plena Dominus tecum.'* This work, of which he was only the editor, certainly exceeds in laborious trifling the production of Father J. B. Hepburne, the Scotch Minim, who dedicated to his patron, Paul V., seventy-two encomiums on the Virgin, in as many different languages.

It would take volumes to relate all that has been said on the mere subject of her name, and to enumerate the epithets by which she has been addressed. Gesenius derives מַרְיָה from מָרַי, contumacia; Schleusner, referring to Ruth i. 20, from מָרַר, amarus fuit, or from רָם, altum esse, eminere, the ך passing into an ם mobile, and the hemantic ם being prefixed. This last derivation is the more affected by the learned of the Church of Rome. But the devotees of Mary are bound by no puny rules of verbal criticism; with them *Star of the Sea* is the favourite meaning of the name; others prefer myrrh of the sea, and others say that God called the gathering together of the waters *Maria* (seas), that he might be the first to pronounce the name of Mary.

The cultus of the Virgin, though in some respects repulsive, and though directly at variance with the solemn words 'Thou shalt worship the Lord thy God and him only shalt thou serve,' was, under many of its aspects, touchingly beautiful, and there cannot be a doubt that to the veneration

and love with which she was regarded we are indebted for efforts in art, and emotions in connection with it, which could not possibly have resulted from any other cause.

(Lightfoot's *Works*; Alford's *Greek Testament*; Wordsworth, *Do.*; Bengel's *Gnomon*; *Biographie Universelle*; Gibson's *Preservative from Popery*).—M. H.

MARY MAGDALENE (Μαρία ἡ Μαγδαληνή). Each of the four Evangelists mentions Mary Magdalene by name, and in each case she is referred to as being in attendance on our Lord. She is first mentioned with two other women whom he had healed of certain infirmities, and who, like her, testified their gratitude by ministering to him of their substance. Hence it appears that they were women of some means, which in the case of one of them is accounted for by her being the wife of Herod's steward, a position of great trust, and which no doubt gave to its possessor large means of acquiring wealth. Whatever Mary's wealth may have been—and we may suppose her, as being first mentioned, to have been distinguished in some way above the others—her cause of gratitude to the Lord was greater than theirs, for he had released her from an aggravated form of that mysterious affliction, possession by evil spirits. He had cast out of her seven devils. Was this affliction necessarily or usually connected with moral guilt? Lightfoot tells us that the Jews sometimes called vices by the name of devils, as *an evil affliction is Satan*. *Drunkennes by new wine is a devil*. See also the *Hom. in Evang.* of Gregory the Great, 25 and 53. And we know that the man possessed of a legion of devils was thereby prompted to acts of extraordinary violence; and the daughter of the Syrophenician woman is said specifically to have been possessed with the spirit of an *unclean* devil; and it is very likely that a deadening, and an apparent obliteration of the moral sense may have been an accompaniment of diabolical possession. But one can hardly suppose that so distinctly *mental* an affliction would allow scope for that exercise of the understanding and the will which is necessary to constitute a person pre-eminently a sinner; and it would seem especially to incapacitate from that independent life of sin which has been traditionally, and we may almost say authoritatively, ascribed to Mary Magdalene. We should be disposed rather to consider her as a person of some worldly importance, anxiously watched during the period of her infirmity by friends and attendants, if not by relatives, and devoting all her time and means after her deliverance to the service of that Saviour who had made her whole.

This, however, is not the inference which has been drawn by the general assent of the Christian church, and is sanctioned by our own A. V. of the N. T. In the heading of the 7th chapter of St. Luke the name of Mary Magdalene is given to that woman whom Simon knew to be a sinner, who presented herself unbidden among his guests, who washed our Lord's feet with her tears and wiped them with the hairs of her head, and anointed them with ointment, and by so doing gave occasion for one of the most touching and instructive acts of our Lord's ministry; and it would certainly not be surprising if we should find the person who had been so pardoned, and so restored to a life of innocence as she was, devoting herself to an assiduous

attendance upon him from that very hour. Nor is it improbable that the evangelist, in speaking of her good works, at the beginning of the 8th chapter, should purposely disconnect her in thought from the woman whose conversion from a life of sin he had mentioned at the end of the 7th; and besides the general verdict of tradition, some evidence for the common belief is to be drawn from an independent source. Little reliance is to be placed on any direct assertions of the Talmudists, but the indirect evidence which they give is sometimes valuable, and it is certain that they speak of some one—in connection with certain calumnies against our Lord, under the name of Ben Satda—

whom they call מרים מנדלָה נשים, *Mary, the plaiter of women's hair*—the word which indicates the plaiting or curling of the hair being *Magdala*; and they speak of this person as having been shut up under suspicion by her husband, and having in consequence broken out into adulteries. This has been supposed not only to confirm the common opinion as to Mary Magdalene's previous life, but also to suggest the derivation of her name; and it must be granted that such an expression as *Μαρία ἡ καλονύμενη Μαγδαληνή* (Luke viii. 3), is a manner of phrase rarely used when persons are named after their country (Lightfoot, *Hebrew and Talmud. Exercit.*, Matt. xxvii. 56.)

Still, the more obvious and commonly received derivation of her name is from *Magdala*, originally a tower or fortress as its name indicates, the situation of which is probably the same with that of the modern village of el-Mejdel, on the western shore of the lake of Tiberias (Stanley). But Lightfoot starts another supposition, both with regard to the place of residence and to the identity of Mary Magdalene. He shows that there was a place called *Magdala* very near Jerusalem, so near that a person who set up his candles in order on the eve of the Sabbath, might afterwards go to Jerusalem, pray there, and return and light up his candles when the Sabbath was now coming in (*Talmud. Exercit.*, John xii. 3.) This place is stated in the Talmud to have been destroyed on account of its adulteries. Now, it is argued by Baronius, that Mary Magdalene must have been the same person as Mary the sister of Martha and Lazarus, and on this point Lightfoot entirely agrees with him, and he thinks that, Bethany and *Magdala* being both near Jerusalem, she may have married a man of *Magdala*, and acquired the dissolute morals of the place; or that *Magdala* may have been another name for Bethany.

It must, however, be remembered that the first mention of Mary Magdalene is made when our Lord was in Galilee (Luke viii. 2), nor can there be a doubt that the persons mentioned in Luke xxiv. 10, where her name next occurs, as *ἡ Μαγδαληνή Μαρία καὶ Ἰωάννα καὶ Μαρία Ἰακώβου καὶ αἱ λοιπαὶ σὺν αὐταῖς*, were the same as those described in the 49th and 55th vers. of the 23d chapter in the words *γυναῖκες αἱ συνακολουθήσαναι αὐτῷ ἀπὸ τῆς Γαλιλαίας*, and *γυναῖκες αἰτίνας ἦσαν συνελθυνύσαι αὐτῷ ἐκ τῆς Γαλιλαίας*. This appears to mark her unmistakably as a Galilean (see also Matt. xxviii. 55, 56; and Mark xv. 40, 41), and consequently as of *Magdala* in Galilee, and not of the ill-famed *Magdala* near Jerusalem. But though one would be glad to clear the character of her former life from groundless aspersions, one cannot

but observe how all her actions, as detailed by the evangelists, at the closing scene of our Lord's life, and after his resurrection, are in unison with the feelings of the woman who washed his feet with her tears, and wiped them with the hair of her head, and who loved much because she had much forgiven. While Jesus hung upon the cross, and committed his mother to the care of the beloved disciple, she was one of those who stood close by. When the awful scene of the crucifixion had been enacted, and even the ordinary spectators among the crowd smote their breasts and retired, she was one of that little band of friends who stood afar off, beholding these things in silent consternation. And when Joseph of Arimathea obtained possession of the body from Pilate, she followed those who took it down from the cross to carry it to the neighbouring garden; and while they laid it in the new sepulchre hewn in stone, she sat with Mary the mother of Jesus over against the sepulchre to see how they laid it. The whole of that day of agonizing grief she had followed and watched him, and then she returned with the other women and prepared spices and ointments, and on the Sabbath day she rested.

St. John gives us a life-like and beautiful account of her acts on the day following that Sabbath—the first blessed Easter Sunday of the world. There is no doubt considerable difficulty in reconciling his account with the inferences we should be disposed to draw from the statements of the other evangelists, but if we take his narrative for our guide, we shall find Mary Magdalene alone at a very early hour, while it was yet dark, at the sepulchre, where she discovered to her great surprise that the stone which closed its entrance had already been removed. She ran to tell Peter and John what she had seen, and when she came to them she said, 'They have taken away the Lord out of the sepulchre, and we know not where they have laid him.' In the meantime other women may have gone to the sepulchre, and that may have occurred which is related by Matthew, Mark, and Luke, as it was probably some distance from the sepulchre to the house of Peter and John. Peter and John ran to the sepulchre and became separated from Mary Magdalene, as well as from each other, and having satisfied themselves as to the fact of the resurrection, returned home. Mary, who had followed them, still clung to the place. Peter and John had both gone into the sepulchre—she stood without, near it, weeping, not yet convinced that he was risen. The opening into the sepulchre was so situated that it was necessary to stoop in order either to enter it or to look within it. Mary stooped down, and saw the two angels sitting, the one at the head and the other at the feet, where the body of Jesus had lain. They ask her why she wept? She answers, 'Because they have taken away my Lord, and I know not where they have laid him.' She scarcely seems to view the angels as supernatural beings; and when she turns round and sees the Lord himself, she fails to recognise him at first, her whole mind being engaged by the one idea of finding his body. We see her tearful preoccupied countenance, and her gaze wandering from side to side, in the question of the Lord, 'Woman, why weepest thou? whom seekest thou?' and she seems to answer with averted face, 'Sir, if thou have borne him hence, tell me where thou hast laid him, and

I will take him away;' for it was not till she heard the well-known sound of 'Mary' from his own lips that she turned herself and said unto him, 'Rabboni.' The sudden change of manner on this recognition, the eager movement to fall before him and embrace his feet, is all but indicated in the words, 'Touch me not.' Jesus saith unto her, 'Touch me not, for I have not yet ascended to my Father; but go to my brethren and say to them, I ascend unto my Father and your Father, and to my God and your God. Thus it was that Mary Magdalene received the assurance of our Lord's resurrection, probably a short time after the other women had been convinced of the fact, without seeing him, by the vision of the angels. Then Mary Magdalene came and told the disciples that she had seen the Lord, and that he had spoken these things unto her. The little apparent discrepancies between the several accounts of these marvellous transactions rather confirm than shake the credibility of the story, and could be reconciled in many ways. We must take each account separately as a picture complete in itself. No scheme for harmonising them, however plausible, can be looked upon as certainly true.

Besides the derivations of the appellation Magdalene already given, it may be mentioned that Jerome derives it from Migdol, a tower, and Origen from מגדל, to be great. The great force of modern opinion, both among Protestants and Roman Catholics, separates Mary Magdalene on the one hand from the penitent woman, and on the other from the sister of Martha. Dr. Pusey and Isaac Williams adhere with Bishop Andrews, Lightfoot, and Baronius, to the supposition of their identity (Dean Alford, *Greek Testament*; Wordsworth, *Do*; Bengel, Lightfoot, *Biographie Universelle*, etc.)—M. H.

MARY, THE SISTER OF LAZARUS (*Mapla*). Whatever may be the teaching of tradition, and whatever inference we may be disposed to draw from the similarity of their feelings and conduct towards our Lord, and of his towards each of them, there can be no doubt that the words of Scripture present to our minds Mary the sister of Martha and Lazarus, and Mary Magdalene, as two distinct individuals. The first mention of Mary the sister of Martha is in the 10th chapter of St. Luke, where he says that in a certain village there was a woman named Martha who received Christ into her house, καὶ τῇδε ἦν ἀδελφὴ καλουμένη Μαρία. Now, it seems impossible that he should have introduced to us in this manner a person of whom he had spoken in the 8th chapter as Μαρία ἡ καλουμένη Μαгдаληνή, ἀφ' ἧς δαίμονια ἐπτα ἐξεληλύθει. The specific description of each at their first mention seems to imply a purpose of distinguishing them, and would obviously be a source of error which St. Luke would have avoided had he been relating different things of the same person. Then if we take St. John's Gospel, we shall find Mary the sister of Martha introduced in the 11th chapter with a particular description, ἦν δὲ Μαρία ἡ ἀλείψασα τὸν κύριον μύρον καὶ ἐκμάσασα τοὺς πόδας αὐτοῦ τοῖς ὀρεξίν αὐτῆς ἧς ὁ ἀδελφὸς Λάζαρος ἠσθένει—'it was that Mary who anointed the Lord with ointment and wiped his feet with her hair, whose brother Lazarus was sick.' Let this be interpreted by St. John himself, and we shall find a full account of the transaction in the beginning of the 12th chapter.

He also specifies another Mary as *Μαρία ἡ Μαγδαληνή*. Had he not mentioned the anointing by Mary the sister of Lazarus in the 12th chapter, and were we obliged to explain John xi. 2 by Luke vii. 38, there would be ground for believing Mary the sister of Lazarus to be the woman who was a sinner; but if we let each gospel explain itself, the anointing by Mary at Bethany was a different anointing from that by the penitent woman in the house of Simon the Pharisee. And we may add that the very fact of this latter anointing having been described by St. Luke would have deterred St. John, if he was acquainted with St. Luke's gospel, from describing Mary the sister of Lazarus as *Μαρία ἡ ἀλείψασα τὸν κύριον*, etc., had the penitent woman of Luke vii. 38 also been named Mary. This consideration gives some additional probability to the opinion that the penitent woman was *not* Mary Magdalene.

The opinion that Mary the sister of Lazarus was the Magdalene is grounded by Baronius on the improbability that one who loved him so much should not have been named as present at his death and resurrection. There is no great weight in this argument, for by the same rule we should have expected a mention of Martha. It is possible that both Martha and Mary may have been included in the *αἱ λοιπαὶ* of Luke xxiv. 10, just as we may suppose Mary Magdalene to be included in the *γυναῖξιν* of Acts i. 14.

But who was the woman mentioned by Matthew and Mark as having poured the ointment on his head in the house of Simon the leper? Certainly Mary the sister of Martha and Lazarus; and certainly this anointing was the same as that mentioned in John xii. 3. It is remarkable that neither Matthew nor Mark makes any specific reference to the household at Bethany of which we have such a lively description in St. Luke and St. John, or to any of its members by name, but both of these Evangelists record our Lord's most memorable prophecy, 'Verily I say unto you, whosoever this gospel shall be preached in the whole world, there shall also this that this woman hath done be told for a memorial of her.' Can we consider this prophecy to be fulfilled unless we know the name of the person who performed this good work? If it is the *same* transaction which St. John describes, the name *is* declared to us; if a different transaction, then St. John, who does not relate the prophecy, leads the whole Christian world into the error of attributing to Mary the sister of Lazarus an honour which our Lord did not promise to her, but to another person. We infer, therefore, that it is the same transaction, and that St. John's account supplements that of St. Matthew and St. Mark. Having thus shown what appears to be the correct view as to the identity of Mary the sister of Lazarus, we have only to relate briefly what the Evangelists say respecting her. She is introduced to us by St. Luke, sitting at the feet of Jesus in the house of her sister Martha, an active and hospitable person of comfortable means and simple habits, who received our Lord at Bethany. Martha, troubled and anxious in her preparations for his entertainment, comes in and reproaches her sister for not helping her in her work, and gives our Lord occasion to pronounce that beautiful commendation of Mary's spirituality of mind, 'Martha, Martha, thou art careful and troubled about many things; but one thing is needful, and Mary hath

chosen that good part which shall not be taken away from her.'

This occurred about the time of the Feast of Tabernacles, in the month Tisri, or September, of the year before our Lord's crucifixion. Some months afterwards he was at Bethany again, on the occasion of the illness and death of Lazarus. When the sisters sent to him, he was at another Bethany, in Peræa, beyond Jordan, whither he had retired to escape the malicious plottings of the Jews. He did not come at once on hearing from them, foreseeing the great miracle he had to perform; and the sisters seem to have been left in doubt as to his intentions. In the meantime Lazarus died, and was buried. Martha was probably outside the house when she heard that he was coming, and went at once to meet him; while Mary, not aware of his approach, remained sitting within, surrounded by her mourning friends.\* She was aroused from her attitude of silent grief by a whisper from Martha, 'The Master is come, and calleth for thee.' He was still at the spot where Martha had met him, wishing, perhaps, to keep as much as might be out of observation. Mary instantly rose and went to him. Her friends—they are called *Ἰουδαῖοι*, and this word usually designates persons of position and influence among the Jews—rose and followed her, thinking she was going to weep at the tomb. When Mary met the Lord, she fell at his feet and said, 'Lord, if thou hadst been here, my brother had not died.' There is a touching tenderness in the Greek of these words as compared with those of Martha, which does not appear in the English of the A. V., and cannot very easily be expressed, Martha had said, *Κύριε, εἰ ἦς ὥδε, οὐκ ἂν ὁ ἀδελφός μου ἐτεθνήκει*, My brother would not be (now) dead; Mary says, *Κύριε, εἰ ἦς ὥδε, οὐκ ἂν μου ἀπέθανεν ὁ ἀδελφός*, My brother would not (or perhaps *could* not) have died; while the recurrence of the same thought from the lips of both sisters almost admits us into the sick chamber of Lazarus to hear the very words spoken at his bedside. The intensity with which Mary appropriated Lazarus to herself as *her* brother, would seem to have some significance, as if Lazarus really did belong to her in a stronger sense than he did to Martha. And it would seem from the 45th verse, that it was especially with *Mary* that the Jews came to condole. Martha was evidently the mistress of the house, probably much older than Lazarus and Mary, perhaps by a different mother.

After the great miracle had been performed, our Lord again retired from Judæa until the beginning of the Passover. We may suppose him to have arrived at Bethany on the evening before the Sabbath which ushered in the feast. On the following evening, that of the Sabbath day itself, a supper was made for him in the house of one Simon, who was surnamed the Leper, as having been at one time afflicted with leprosy, though now free from it—another monument, perhaps, of the healing mercies of Christ. Simon's name is not mentioned by John, who only says, 'They made him a supper,' whence it might be inferred that it was in

\* Bengel thinks she knew of our Lord's approach, and that her quieter and less excitable nature, and unwillingness to leave the Jews, kept her within. This does not correspond with the eagerness of her movements when Martha told her he was come.

Martha's house. And yet John's statement that 'Martha served, and Lazarus was one of them that sat at the table with him,' seems to indicate that it was in another person's house rather than in their own, where such an arrangement might naturally be expected. Simon was probably a relative. But what share did Mary take in the honours rendered to the Lord? She brought a quantity of a very costly unguent, *μύρον νάρδων πιστικῆς πολυτίμου*,\* in a box or vessel of alabaster, a substance very beautiful and easily cut, but very brittle, and she crushed the box in her hand, and poured its contents on his head, and, 'like the precious ointment upon the head, which ran down upon the beard, even Aaron's beard, and that went down to the skirts of his garments,' it bedewed his whole person, and distilled upon his feet, and she wiped his feet with her hair, and the house was filled with the odour of the ointment. Then said Judas Iscariot, 'Why was not this ointment sold for three hundred pence, and given to the poor?' Jesus replied, 'Let her alone; against the day of my burying hath she kept this. For the poor always ye have with you, but me ye have not always.' He also added, 'Verily I say unto you, Whosoever this gospel shall be preached in the whole world, there shall also this, that this woman hath done, be told for a memorial of her.'

This is the last mention of Mary, the sister of Martha, in the N. T. (Wordsworth's *Greek Testament*; Dean Alford's *Do.*; Bengeli's *Gnomon*, etc.)—M. H.

MARY, THE WIFE OF CLEOPHAS (*Μαρία ἡ τοῦ Κλωπᾶ*). St. John (xix. 25) calls her the sister of the mother of Jesus. 'Now there stood,' he says, 'by the cross of Jesus, his mother and his mother's sister, Mary the wife of Cleophas, and Mary Magdalene.' There is a little ambiguity in the words, and the punctuation of the A. V. rather favours the opinion that his mother's sister and Mary the wife of Cleophas were different persons, and that four and not three individuals are spoken of. And it has been thought that his mother's sister was Salome, the wife of Zebedee and the mother of James and John. The objection to the other and more received opinion, on the ground that the two sisters were not likely to have the same name, is of very little weight. We have seen [JERUSALEM] that the high-priest Onias III. had a brother also named Onias, who eventually succeeded him in his office under the adopted name of Menelaus. We have the authority of the earliest traditions for the opinion that our Lord's mother had at least one sister called Mary. Indeed, it is an old opinion, that Anna, the mother of the Virgin Mary, had three daughters of that name by different husbands; and Dr. Routh, in his *Reliquiæ Sacre*, gives us from Papias the scholar of St. John (*ex Cod. MS. Bibl. Bodl.*, 2397), the following enumeration of four Marys of the N. T.:—1. Maria, Mater Domini; 2. Maria, Cleophae sive Alphei uxor, quæ fuit mater Jacobi Episcopi et Apostoli, et Simonis, et Thadæi, et ejusdam Joseph; 3. Maria Salome uxor Zebedei, mater Johannis evan-

geliste et Jacobi; 4. Maria Magdalene. It is further stated in this fragment of Papias, that both Mary the wife of Cleophas and Mary Salome were aunts of our Lord, and consequently sisters of the Virgin Mary. In Matt. xxvii. 56, we read—instead of *Μαρία ἡ τοῦ Κλωπᾶ*—*Μαρία ἡ τοῦ Ἰακώβου καὶ Ἰωσὴ Μήτηρ*; and in Mark xv. 40, *Μαρία ἡ τοῦ Ἰακώβου τοῦ μικροῦ καὶ Ἰωσὴ μήτηρ*. She was, therefore, besides being the wife of Cleophas, the mother of James the less and Josès. Now, in Matt. (x. 3), where the apostles are mentioned name by name, this James is called the son of Alpheus; the other James being the brother of John and son of Zebedee. Hence Mary the mother of James was Mary the wife of Alpheus. How comes she to be called the wife of Cleophas? St. John's words are, *Μαρία ἡ τοῦ Κλωπᾶ*, and may mean Mary the daughter, not the wife, of Cleophas; and the fragment of Papias, to which we have referred, says that St. John calls her *Μαρία ἡ τοῦ Κλωπᾶ* for this or some similar reason. Maria Jacobi minoris et Joseph mater soror fuit Mariæ Matris domini, quam Cleophae Joannes nominat vel a patre vel a gentilitatis familiâ, vel aliâ causâ. The more general opinion is now, that Cleophas and Alpheus were the same person, the two Greek words being only different ways of expressing the same Hebrew name *עֲלִפָּה*. The sons

of Mary and Alpheus are generally allowed to be those who are called the brethren of the Lord, and from the way in which they were spoken of by the Jews, they were probably brought up with Jesus, and belonged to the same household. Most likely Joseph, the husband of the younger Mary, and Alpheus, the husband of the elder one, had both died before our Lord's ministry began, and the two sisters thenceforth lived together. This would account for the sons of Alpheus being called the brethren of the Lord, and throw light on several passages of the N. T. (see Matt. xiii. 55, 57; Mark iii. 21, 31-35; Mark vi. 3-4; John vii. 3-5); and may not their want of faith and occasional opposition to his work account in some degree for the low place which they occupy in every classification of the apostles, and perhaps for our Lord's transferring his mother from their care to that of the beloved apostle at his death, while they give point to the words, 'If any man come to me and hate not his father, and mother, and wife, and children, and brethren and sisters, yea and his own life also, he cannot be my disciple' (Luke xiv. 26). —M. H.

MARY, THE MOTHER OF JOHN WHOSE SURNAME WAS MARK. From the circumstance mentioned respecting her, in Acts xii. 12, that many of the Christians were gathered together praying at her house during Peter's imprisonment by Herod, we may judge that she was at that time a pious and distinguished member of the church of Jerusalem. We also gather from the statement of St. Paul (Col. iv. 10), that she was a sister of Barnabas, that noble son of consolation of the country of Cyprus who sold his land and laid the price of it at the apostles' feet. Of this statement we have a pleasing verification in the fact, that when Barnabas accompanied Paul in his return from Jerusalem to Antioch, they took her son John Mark with them as their companion and 'minister' (Acts xii. 25; xiii. 5). Whatever may have been

\* The word *πιστικῆς* is best interpreted by genuine. *Νάρδος πιστικῆς* is contrasted with Pseudonardus (Pliny, *N. H.*, xii. 26), sunt multa ejus genera sed omnia hebetiora præter Indicum quod pretiosius est (Bede).

his motive for leaving them in the midst of their labours at Perga, he no doubt returned to his mother's house at Jerusalem.—M. H.

MASALOTH (Μασαλὼθ, Μεσσαλὼθ, Vulg. *Masaloth*), mentioned 1 Maccab. ix. 2, as a place in Arbela besieged and captured by Bacchides and Alcimus as they advanced by the way which leadeth to Galgala to invade Judæa. A comparison of the account given by Josephus of the transaction (*Antiq.* xii. 11. 1) makes it evident that under this name are designated the fortified caverns described by the historian (*Vit.* 37) near Arbela, and which are identified with the singular remains of Kul'at Ibn Ma'an near Irbid [BETH-ARBEL]. Dr. Robinson suggests (*Bib. Res.* ii. 398, note) that the word Masaloth is the Heb. מַסְלוֹת, in the sense of *terraces, steps*, as in 2 Chron. ix. 11.—H. C. G.

MASCHIL. [PSALMS.]

MASH (מַשׁ; Sam. מִשָּׁה; Sept. Μοσῆχ; Vulg. *Mes*), the fourth son of Aram (Gen. x. 23); called Meshech in 1 Chron. i. 17. He seems to have settled in the north-east of Mesopotamia, as, since Borchart's investigations (*Phal.* ii. 11), the name has been traced in Mons Masius, on the borders of Armenia and Mesopotamia, below which lay Nisibis (Strab. xi. 12; xvi. 1), and in the river Masche which flowed past that city. Josephus (*Antiq.* i. 6. 4) locates him in Mesene, a region bordering on the north of the Persian Gulf; but he is thus separated by a wide distance from the rest of the Aramite nations. To the same objection is exposed the view of Knobel (*Völkert.* p. 237), adopted by Fürst (*H. W. B.*), that an offshoot of the family of Mash left their original settlement in the north-east of Mesopotamia and migrated to Mesene. The readings of the Alexandrian translator and of the author of 1 Chron. i. 17, suggest that in later times the name was known to the Hebrews under the modified form מַשֶּׁךְ, which in Ps. cxx. 5 is combined with Kedar, and hence must designate some nomadic tribe in the neighbourhood of the Euphrates. It is remarkable that among the Asiatic confederates of the Khita, or Hittites, who are enumerated as conquered by Rameses II. at Kadesh on the Orontes, is found the Prince of Masou or Masa (Brugsch, *Hist. d'Égypte*, i. 140, 142).—H. C. G.

MASHAL (מַשָּׁל; Μαασάλ; Alex. Μασάλ; *Masal*), a city of Asher assigned to the Levites (1 Chron. vi. 74 [59]). This is a contracted form of the name, which is found written fully in Josh. xix. 26 and xxi. 30—*Mishal* (מִישָׁעַל; Μαασά; Alex. Μασάψ; but in xxi. 30, Βασελλά, Alex. Μασάδλ). Mashal was one of the border cities of Asher, and was situated apparently near Carmel, and not far from the sea coast (xix. 26; and also Eusebius and Jerome in *Onomast.*, s.v. *Masan*). It has not been identified.—J. L. P.

MASORAH, MASORETH, or MASSORETH (מַסְרָה, מִסְרֶת, מִסְרֹת), the name given to a grammatico-critical commentary on the O. T., the design of which is to indicate the correct reading of the text in respect of words, vowels, accents, etc., so as to preserve it from all corruption. The word denotes *tradition*, from מָסַר, which is used in

Chald. in the sense of *to give over, to commit* (corresponding to the Heb. חָסַר, סָנַר, cf. Targ. on 1 Sam. xvii. 46; xxiv. 11; 1 Kings xx. 13; Exod. xxi. 3; Amos vi. 8), and hence by the rabbinical writers in the sense of *to deliver* with reference to the oral communication of doctrine, opinion, or fact. The derivation, from מָסַר, *to bind*, seems to have been an afterthought, suggested by the sentiment that the Masorah is a hedge to the Torah. The Masorah, however, is not confined to what is communicated by *oral* tradition; in the state in which it has come down to us it embraces all that has been delivered traditionally, whether orally

or in writing. Its correlate is קַבָּלָה (*Kabbala*), *reception*; and as the latter denotes whatever has been *received* traditionally, the former embraces whatever has been *delivered* traditionally; though in usage Kabbala is generally restricted to matters of theologic and mystic import, while Masorah has reference rather to matters affecting the condition of the text of Scripture. It takes account not only of various readings, but also contains notes of a grammatical and lexicographical character.

*Origin of the Masorah.*—The Masorah is the work of certain Jewish critics who from their work have received the title of בעלי המסורת (*Baali Hammasoreth*), *masters of the Masorah*, or, as they are generally designated, *Masoretes*. Who they were, and when or where their work was accomplished, are points involved in some uncertainty. According to Jewish tradition, the work began with Moses; from him it was committed to the wise men till Ezra and the great Synagogue, and was then transferred to the learned men at Tiberias, by whom it was committed to writing and called the Masorah (El. Levita, *Masorah Hammasorah*, Pref. p. 2). Some even claim Ezra as the author of the written collection (Buxtorf, *Tiberias*, c. 11, p. 102; Leusden, *Philol. Heb. Diss.* 25, sec. 4; Pfeiffer, *De Masora*, cap. ii., Opp. p. 891, etc.); but the arguments which have been adduced in support of this opinion are not sufficient to sustain it. Ibn Ezra says expressly, 'So was the usage of the wise men of Tiberias, for from them were the men the authors of the Masorah, and from them have we received the whole punctuation' (*Zachuth*, cited by Buxtorf, *Tib.*, c. 3, p. 9); and even Buxtorf himself unconsciously gives in to the opinion he opposes by the title he has put on his work. That various readings had been noted before this, even in pre-talmudic times, is not to be doubted. In the Talmud itself we have not only directions given for the correct writing of the Biblical books, but references to varieties of reading as then existing (*Hierosol. Tr. Taanith*, f. 68, c. 1; cf. Kennicott, *Diss. Gen.*, sec. 34; de Wette, *Einleit. ins A. T.*, sec. 89; Hävernicks, *Introd.*, p. 280); especial mention is made of the *Itur Sopherim* (עֲטוּר סֹפְרִים, *ablatio Scribarum*; *Nedarim*, f. 37, c. 2), of the *Keri velo Ketibh*, the *Ketibh velo Keri*, and the *Keri vehetibh* (*Nedarim*, l. c., *Tr. Sota* v. 5; *Joma*, f. 21, c. 2), and the *puncta extraordinaria*, which, however, are not properly of critical import, but rather point to allegorical explanations of the passage (*Tr. Nasir*, f. 23, c. 1; cf. Hieronym. *Quast. in Gen.* xviii. 35); and already the middle consonant, the middle word, and the middle verse of the Pentateuch are noted as in the Masorah. In the *Tr. Sopherim*, written between the Talmud and the Masorah,

there are also notes of the same kind; though not exactly agreeing with those in the Masorah. But these variants had not before been formally collected and reduced to order in writing. This was the work of the Jewish scholars who, from the 6th century after Christ, flourished in Palestine, and had their principal seat at Tiberias (Zunz, *Gottesdienstlichen Vorträge der Juden*, p. 309).

*Contents of the Masorah.*—These are partly palaeographic, partly critical, partly exegetical, partly grammatical. They embrace notes concerning—1. *The consonants of the Hebrew text.*—Concerning these the Masoretes note about thirty letters which are larger than the others, about thirty that are *less*, four which are *suspended* or placed above the line of the others in the same word, and nine which are *inverted* or written upside down; to these peculiarities reference is made also in the Talmud, and the use of them as merely marking the middle of a book or section indicated (Tr. *Kiddushin*, fol. 30, c. 1; Hävernick, *l. c.*, p. 282). The Masoretes also note a case in which the final **ד** is found in the heart of a

word (לסרכה, Is. ix. 6); one in which the initial **מ** is found at the end (חמ, Neh. ii. 13); and one in which the initial **נ** occurs at the end (מונ, Job xviii. 1), irregularities for which no reason can be assigned (cf. Leusden, *Phil. Heb.*, Diss. x.) They have noted how often each letter occurs; and they signalise the middle of each book; the middle letter of the Pentateuch (the **ו** in נחור, Lev. xi. 42); the middle letter of the Psalter (the **ע** in מיער, Ps. lxxx. 14); the number of times each of the five letters which have final forms occurs in its final and in its initial form. 2. *The vowel-points and accents in the Hebrew text.*—Here the Masoretes note the peculiarities or anomalies in the use of the vowel-points, of the dagesh and mappik, and of the accents in the text—a fact to which Buxtorf appeals with considerable force, as proving that the authors of the Masorah, as we have it, were not the *inventors* of the diacritical marks by which vowels and accents are indicated in the Hebrew text; for had they been so, they would not have confined themselves to laboriously noting anomalies into which they themselves had fallen, but would at once have removed them. 3. *Words.*—In respect of these the Masoretes note—(1), The

cases of *Scriptio plena* (מלאים) and *defectiva* (חסרים); (2), The number of times in which certain words occur at the beginning of a verse (as, *ex. gr.*, קום, which they say is nine times the first word of a verse) or the end of a verse (as הארץ, which they say occurs thrice as the final word of a verse); (3), Words of which the meaning is ambiguous, and to which they affix the proper meaning in the place where they occur; (4), Words which have over them the *puncta extraordinaria*; and (5), Words which present anomalies in writing or grammar, and which some have thought should be altered, or peculiarities which need to be explained (סכריין). 4. *Verses.*—The Masoretes number the verses in each book of the O. T., as well as in each of the larger sections of the Pentateuch, and they note the middle verse of each book of the O. T.; they also note the number of verses in which certain expressions occur, the first and last letters of each verse, and in many cases the number of letters of which it is composed; and, in fine, they have marked twenty-five or

twenty-eight places where there is a pause in the middle of a verse, or where a hiatus is supposed to be found in the meaning (as, *ex. gr.*, in Gen. iv.

8, where, after the words ויאמר קין אל-הבל אחיו, there is in Rabbinical editions of the O. T. a space left vacant (פסקא, *piska*) to indicate that something is probably omitted). 5. *Tikkun Sopherim* (תקון סופרים, *ordinatio, sive correctio Scribarum*).—On the word כבודם, Ps. cvi. 20, the Masorah

has this note מלן בקריאה תקון כבודם חד מן יה"מ כבודם סופרים, *the word כבודם is one of eighteen words in Scripture which are an ordination of the Scribes.* These eighteen words are also enumerated in a note at the beginning of Numbers. The passages where they occur are presented in the following table:—

	<i>Tikkun Sopherim.</i>	<i>Erroneous reading.</i>
Gen. xviii. 22	לפני יהוה . . . . . אברהם	לפני אברהם יהוה
Num. xi. 15	ברעתו	ברעתם
Num. xii. 12	אמו	אמינו
	בשרו	בשרנו
1 Sam. iii. 13	להם	לי
2 Sam. xvi. 12	בעיני	בעניי
1 Kings xii. 16	לאחליו	לאלהיו
2 Chron. x. 16	אל אפם	אל אפי
Ezek. viii. 17	לא נמות	לא תמות
Hab. i. 12	אותו	אותי
Mal. i. 13	עינו	עניי
Zech. ii. 8	כבדו	כבודי
Jer. ii. 11	כבודם	כבודי
Hos. iv. 7	כבודם	כבודי
Ps. cvi. 20	כבודם	כבודי
Job vii. 20	עלי	עליך
Job xxxii. 3	את איוב	את דיך
Lam. iii. 20	עלי	עליך

Charges have been rashly advanced against these Sopherim of having corrupted the sacred text (Galatin, *De Arcanis Cathol. Ver.*, l. i. c. 8); but for this there is no foundation (see B. Chajim's *Introduction to the Rabbinic Bible*, translated by Ginsburg, p. 21). Eichhorn concludes from 'the character of the readings' that 'this recension took note only of certain errors which had crept into the text through transcribers, and which were corrected by collation of MSS.' (*Einleit. ins A. T.*, sec. 116). Bleek, however, thinks that this is affirmed without evidence, and that in some cases the rejected reading is probably the original one, as, *ex. gr.*, in Gen. xviii. 22, and Hab. i. 12 (*Einleit. ins A. T.*, p. 803). 6. *Ittur Sopherim* (עטור סופרים, *Ablatio Scribarum*).—The Masoretes have noted four instances in which the letter **י** has been erroneously prefixed to the letter **א**—viz., Gen. xviii. 5; xxiv. 55; Num. xii. 14; and Ps. lxxviii. 26; they note also that it has been erroneously prefixed to the word משפטך in Ps. xxxvi. 7. Of these passages the only one in which the injunction of the Sopherim to remove the **י** has been neglected is Num. xii. 14; a neglect at which Buxtorf expresses surprise (*Lex. Talmud*, in voc. עטר). 7. *Keri and Ketiv* [see the article KERI and KETHIV in this work].

*Form of the Masorah.*—The greater part of the notes of which the *Masorah* is composed was at first written on separate leaves, or in books, as occasion demanded. Afterwards they were appended as marginal notes to the text, sometimes on the upper

and lower margin, sometimes in a more curt form on the space between the text and the Chaldee version, where, from scarcity of room, many abbreviations and symbols were resorted to, and considerable omissions were made. Hence arose a distinction

between *מסורה גדולה*, the *Masora Magna*, and the *מסורה קטנה*, the *M. Parva*; the former of which comprehends the entire body of critical remark on the margins, the latter the more curt and condensed notes inserted in the intermediate space. The latter has frequently been represented as an abbreviated compend of the former; but this is not strictly correct, for the lesser Masorah contains many things not found in the greater. At an early period the scribes introduced the practice of adorning their annotations with all manner of figures and symbols and caligraphic ingenuities, and from this, as well as from causes connected with their method of selection and arrangement, the whole came into such a state of confusion that it was rendered almost useless. In this state it remained until the publication of Bomberg's *Rabbinical Bible*, Venet. 1526 (the second Bomberg *Biblia Rabbin.*, not the first, as is sometimes stated), for which the learned R. Jacob ben Chajim, with immense labour, prepared and arranged the *Masorah* [JACOB BEN CHAJIM]. To facilitate the use of the Greater Masorah, he placed at the end of his work what has been called the *Masora maxima* or *finalis*, and which forms a sort of Masoretic Concordance in alphabetic order.

*Value of the Masorah.*—Whilst there is much in the Masorah that can be regarded in no other light than as laborious trifling, it is far from deserving the scorn which has sometimes been poured upon it. There can be no doubt that it preserves to us much valuable traditional information concerning the constitution and the meaning of the sacred text. It is the source whence materials for a critical revision of the O. T. text can now alone be derived. It is a pity that it is now impossible to discriminate the older from the more recent of its contents. We would earnestly reiterate the wish of Eichhorn, that some one would undertake the 'bitter task' of making complete critical excerpts from the Masorah.

*Literature.*—*Elias Levita*, *מסורת המסורת*, Ven. 1538; German trans. by Semler, Halle 1770; Buxtorf, *Tiberias, sive Comment. Masoreth. triplex histor. didact. crit.*, Basel 1620, 4to; Cappell, *Crit. Sac.*, lib. iii.; Ol. Celsius, *De Masora Disput.*; Leusden, *Philol. Heb.*, Diss. xxii.-xxv.; Walton, *Prolegg. in Polyglott*, No. viii.; Carpzov, *Crit. Sac.*, p. 283; Waehtner, *Antiq. Hebr.*, sec. i, c. 36; Eichhorn, *Einleit. ins A. T.*, vol. i. sec. 140-158; De Wette, *Einleit.*, sec. 90-92; Hävernick, *Introd. to the O. T.*, p. 279, ff.; Bleek, *Einleit. ins A. T.*, p. 803, ff.; Ginsburg, *Introduction to the Rabbinic Bible* by Jac. b. Chajim, translated in *Journal of Sacred Literature* for July 1863; art. *Masorah* in Herzog's *Real. Encyk.*—W. L. A.

**MASPHA** (*Μασσηφά*), the place where the Israelites under Judas Maccabæus assembled to fast and pray in the prospect of encountering the army sent against them by Antiochus (1 Maccab. iii. 46). It is described as 'over against Jerusalem,' and as 'the place where they prayed aforetime in Israel.' The allusion here is probably to Judg. xx. 1, or to 1 Sam. vii. 5, which would identify Maspha with Mizpeh of Benjamin, now represented

by the *Nebi Samw'el*, a ridge in the neighbourhood of Jerusalem (Robinson, *B. R.*, ii. 143).

Another Maspha (Alex. *Μασφά*) is mentioned 1 Maccab. v. 35. Assuming the reading to be correct, it remains doubtful whether it be Mizpeh of Moab (1 Sam. xxii. 3) or Mizpeh of Gilead (Judg. xi. 29, etc.) that is intended. The Syr. has *ܡܝܣܦܗ* here, one Greek cod. *eis* "Αλεμα, another *eis* Σάλεμα, another *eis* Λέμα; but this seems to be a mere arbitrary correction from ver. 26 by some one who thought that the places mentioned in both verses should be the same. Michaelis, however, would combine the two readings, and make the place *Mizpeh-Elim*. Josephus calls it *Μάλλη*, which Grimm thinks has arisen from the transposition of "Αλεμα into *Μάλεα* (*Exaget. Hdb. zu d. Apokr.* in loc.)—W. L. A.

**MASREKAH** (*מִסְרֵקָה*; 'vineyard,' *Μασσεκκάς* and *Μασεκκάς*; *Masreka*), the native place of Samlah, one of the kings of Edom, and only mentioned in Gen. xxxvi. 36, and 1 Chron. i. 47. It was perhaps situated in Edom, though this is not absolutely certain; and the way in which the king's name is mentioned might indicate a foreigner. The student will observe that while some of the kings are mentioned with the addition, 'and the name of his town was' (*וְשֵׁם עִירוֹ*), others are introduced as 'coming from' (*בָּא*). Kalisch remarks that the former seems to comprise native Idumeans, the latter foreigners (*ad loc.*) If this be so, then Samlah was a foreigner, and Masrekah lay beyond the borders of Edom. Eusebius and Jerome, however, locate Masrekah in Gebalene, a province embracing the northern section of Edom (GEBAL; *Onomast.*, s. v. *Masraca*), and now called *Jebâl*. It is worthy of note that a portion of it is still famous for its vineyards, which perhaps may be considered as affording some little confirmation to the statement of Eusebius (Burckhardt, *Syria*, p. 418). The site of Masrekah has not been identified.—J. L. P.

**MASSA** (*מִסָּא*; *Μασση*; *Massa*), a son of Ishmael, and also, apparently, the name of the place in which his descendants settled (Gen. xxv. 14, 16). Some identify Massa with the *Masani* (*Μασανί*) of Ptolemy, a people of Eastern Arabia, bordering on Babylonia (v. 19), and doubtless the same as the *Masei* of Pliny, a nomad tribe of Mesopotamia (*H. N.*, vi. 30). If this identity be admitted, then, as Mr. Forster states, we have evidence of the truth of the Mosaic statement that the twelve sons of Ishmael peopled the whole section of the Arabian Peninsula, extending from Shur to Havilah (*Geogr. of Arabia*, i. 284; cf. Winer, *B. W.*, ii. 59; Kalisch on Gen. *ad loc.*) Hitzig has propounded another theory, according to which he locates Dumah in Wady el-Kora, about 50 miles S.E. of Akabah, and then places Masrekah between it and Mount Seir (Zeller, *Fahrbb.* 1844; Winer, *B. W.*, ii. 742). But this theory has no substantial basis on which to rest.—J. L. P.

**MASSAH** (*מִסָּה*, 'temptation,' *πειρασμός*; *tentatio*), a name given to the place where the Israelites encamped in Rephidim. The people had no water to drink, therefore 'they did chide with Moses . . . and Moses said, Why do ye chide with me? wherefore do ye *tempt* (*תִּנְּסֶה*) the Lord?' (Exod. xvii. 2). When water was procured from

the smitten rock, Moses 'called the name of the place *Massah* ('temptation,' from root מָסָה) and Meribah' (ver. 7). Ever after this period the sacred writers, when speaking of this event, call the place Massah, and not Rephidim (Deut. vi. 16; ix. 22; xxxiii. 8). So also, in Ps. xcv. 8, which ought to be translated, 'Harden not your heart as in Meribah, as in the day of *Massah*, in the wilderness.' For the geographical position of Massah, see REPHIDIM, and WILDERNESS OF WANDERING.—J. L. P.

#### MASTICH. [SCHINOS.]

MATTANAH (מַתָּנָה; 'a gift,' as in Gen. xxv. 6; *Matṣavalev*; *Matthana*), one of the stations of the Israelites. It lay on the border between Moab and the Amorites, on the north side of the Arnon, and eastward toward the wilderness of Arabia (Num. xxi. 11, 13-18). The whole passage in which this name occurs is obscure (vers. 14-20). In the previous verses the journeyings of the people are regularly given in the usual form—'from thence they removed and pitched in,' etc.; but at the beginning of ver. 14 the historian breaks off the itinerary to introduce a quotation from the 'book of the wars of the Lord,' the meaning and bearing of which are doubtful. The itinerary appears in the A. V. to be taken up again in ver. 16; but the verbs 'journeyed from' and 'pitched in' are wanting. We find only כָּאֵרָה (and then a short song of praise, or ode of dedication, is introduced, after which comes very abruptly, 'And from the wilderness Mattanah (וּמִמִּדְבַּר מַתָּנָה), and from Mattanah Nahaliel,' etc., which appears more like a continuation of the ode than prose narration. On comparing the passage with the systematic itinerary in Num. xxxiii. 43-47, we find a difference of names. All these circumstances appear to favour the conclusion of Kennicott, that while the words in ch. xxxiii. are the proper names of places, Mattanah and the other words used here are intended to express figuratively and poetically some signal blessings or extraordinary circumstances which occurred to the Israelites at those places. By Mattanah allusion is probably made to some great gift from God—perhaps the 'well' just mentioned (Kennicott, *Remarks on Passages of the O. T.*, p. 60; cf. *Targum of Onkelos*. For other interpretations consult Rosenmüller, Clarke, Gesenius, etc.)—J. L. P.

MATTANIAH (מַתָּנְיָה, once מַתָּנְיָה; Sept. *Matṭanias*, *Matṭanias*, *Matṭanias*, *Matṭanias*, *Matṭanias*, *Matṭanias*; Alex. *Matṭanias*, *Matṭanias*), the name of ten persons mentioned in Scripture. Regarding one of these, Mattaniah the Levite, who is mentioned as the leader of the temple-choir in the time of Ezra (Neh. xi. 17; xii. 8), there is a difficulty arising from his great-grandson Zechariah apparently being named as amongst the 'priests' sons' who blew the trumpet in Ezra's procession round the walls (Neh. xii. 35). If Zechariah was a priest's son, and if he was old enough to blow a trumpet in Ezra's time, how could he be descended from Mattaniah the Levite, or how could the latter be the leader of the temple-choir at the same date? It seems improbable that the Mattaniah of Neh. xii. 35 is a different person from the Mattaniah of xi. 17; xii. 8, 25; so that we are forced to suspect an omission in xii. 35 after 'Shemaiah, the son of,'

and to connect 'Mattaniah, the son of Micaiah,' etc., with 'his brethren' (comp. ver. 8) named in ver. 36. Bertheau (*Exeg. Hdb.*, in loc.) suggests the supplying of 1 before Zechariah, so as to take him from among 'the priests' sons;' but though this removes one difficulty, it leaves the other standing, unless we suppose Mattaniah to have retained his powers to a very great age.—W. L. A.

MATTHAEI, CHRISTIAN FRIEDRICH VON, was born in Thuringia in 1744. He held a professorship first in Moscow, next in Wittemberg, and again in Moscow, where, in addition to the professorship of classical literature, he held the honourable office of Aulic Councillor. Taking advantage of the Moscow MSS., which his researches were the means of bringing to light, he prepared and published his once famous *Novum Testamentum Graece et Latine; Textum denuovariis Lectionibus numquam antea Vulgatas collegit, Scholia Graeca addidit, animadversiones criticas adiecit*, etc., Rigae 1782-88, 12 vols. 8vo; 1803-7, 3 vols. 8vo. The extensive researches and criticism of more recent scholars have superseded in a large measure this edition of the Greek Testament. The competent judgment of Michaelis pronounces its just value in few words. Michaelis says, 'He has made his collection of various readings with great labour and diligence; he found in his MSS. a confirmation of many readings, which I should have hardly expected, because they are found in MSS. of a different kind and of a different country from those which he used; nay, even those of the Western Edition, of which he speaks with the utmost contempt, he has corroborated by the evidence of his Moscow MSS. This edition is absolutely necessary for every man who is engaged in the criticism of the Greek Testament.' Matthaei also edited from MSS. portions of the works of several ancient authors, and some inedited scholia. He died in 1811.—W. J. C.

MATTAN (Ματθᾶν), the grandfather of Joseph according to the genealogy in Matthew (i. 15, 16). By some he is identified with Matthat in the genealogy of Luke (iii. 24); but this is more than doubtful [GENEALOGY OF JESUS CHRIST].

MATTATH (Ματθᾶν, Tisch. Μαθᾶν), the name of two of our Lord's ancestors in the genealogy of Luke (iii. 24, 29).

MATTHEW (Ματθαῖος; Lachmann, Alford, *Matṭhaios*, with B. D.; *Matthaus*). Few things are more suggestive to the thoughtful mind than the scantiness of our knowledge of the lives and actions of the apostles and evangelists of our Lord. Of several of the twelve nothing beyond the names has reached us; others are barely mentioned in the gospel narrative, and that chiefly in the way of blame or remonstrance. Of the very chiefest of them, the thing to be noted is, not what we know, but what we do not know. Of their work in the evangelization of the world little or nothing remains beyond vague traditions. St. Matthew is no exception to this rule. Once, and once only, he appears in the gospel history. He is called from 'the receipt of custom,' when the Lord—

'beside yon breezy lake  
Bade the meek publican his gainful seat forsake.'  
(Keble's *Christian Year*. 'St. Matthew's Day.')  
He leaves all at His command,—

‘At once he rose, and left his gold ;  
His treasure and his heart transferred ;’—*Id.*

makes a great feast in Christ's honour, and then disappears, nor is ever seen again except in the catalogues of the apostles. Tradition, as we shall see, adds more ; but its statements are inconsistent, and the sharpness of their definitions, increasing the further we remove from the facts, inspires little confidence. Matthew had also the name of Levi, Mark ii. 14 ; Luke v. 27 ; and, according to Mark, he was the son of Alphæus, who has been identified by many able commentators with the father of James the Less, Mark iii. 18 (Euthym. Zigab., Schleusner, Paulus, Bretschneider, Grotius, Ewald, Doddridge). In the catalogues—Mark iii. 18 ; Luke vi. 15—he is coupled with Thomas, which has given rise to the not altogether unfounded conjecture, that Matthew was the twin brother of Thomas (Θῶμα=a twin), whose real name, according to Euseb. *H. E.*, i. 13, was Judas, and that they were both ‘brethren of our Lord’ (Donaldson, *Jashar*, p. 10 ; cf. Matt. xiii. 55 ; Mark vi. 3). This would account for Matthew's immediate obedience to the call of Christ, but is hardly consistent with the indefiniteness of the words with which he is introduced—ἀνθρῶπον Ματθ. λεγόμεν., Matt. ix. 9 ; τελῶντην ὀνόματι Λευί, Luke v. 27—or the unbelief of our Lord's brothers, John vii. 5. The identity of profession, the place and circumstances of the call, and its immediate consequences, and even the very words in which it is recorded, leave no reasonable doubt that the three evangelists are describing the same event, and that Levi and Matthew are one and the same person. The grounds on which this has been questioned are very insufficient. Heracleon, as quoted by Clem. Alex. (*Strom.* iv. 11), mentions Levi as well as Matthew among the early teachers who did not suffer martyrdom. Origen also (*Contr. Cels.*, i., sec. 62 [48]) speaks of ὁ Λεβῆς τελῶνης ἀκολουθήσας τῷ Ἰησοῦ, together with ‘Matthew the publican ;’ but the names Λεβῆς and Λευῆς are by no means identical, and there is a hesitation about his language which shows that even then the tradition was hardly trustworthy. The attempt of Theod. Hase (*Bibl. Brem.*, tom. v. p. 475) to identify Levi with the apostle Lebbæus, is an example of misapplied ingenuity which deserves little attention (cf. Wolf. *Cur.* ad Marc. ii. 14). The distinction between Levi and Matthew has, however, been maintained by Grotius (though he acknowledges that the voice of antiquity is against him, ‘et sane congruunt circumstantiæ’), Michaelis, De Wette, Sieffert, Ewald, etc. But it is in the highest degree improbable that two publicans should have been called by Christ in the same words, at the same place, and with the same attendant circumstances and consequences ; and that, while one became an apostle, the other dropt entirely out of memory. Still less can we acquiesce in the hypothesis of Sieffert (*Urspr. d. erst. Kanon. Ev.*, p. 59) and Ewald (*Drei Erst. Ev.*, p. 344 ; *Christus*, pp. 289, 321), that the name ‘Matthew’ is due to the Greek editor of St. Matthew's Gospel, who substituted it by an error in the narrative of the call of Levi. On the other hand, their identity was assumed by Eusebius and Jerome, and most ancient writers, and has been accepted by the soundest commentators (Tischendorf, Meyer, Neander, Lardner, Ellicott, etc. etc.) The double name only supplies a difficulty to those who are

resolved to find such everywhere in the gospel narrative. It is analogous to what we find in the case of Simon Peter, John Mark, Paul, Jude, etc., which may all admit of the same explanation, and be regarded as indicating a crisis in the spiritual life of the individual, and his passing into new external relations. Matthew, like Matthias, according to Geseuius, is a contraction of Mattathias, and= מַתְתִּיָּא, Θεόδωρος or Θεόδοτος, ‘the gift of Jehovah ;’ and we may reasonably believe, that, ‘after and in memory of his call, the grateful publican changed his name to one more appropriate and significant.

He was no longer לֵוִי but מַתְתִּיָּא, not *Levi* but *Theodore*—one who might well deem both himself and all his future life a veritable ‘gift of God’ (Ellicott, *Hist. Lect.*, p. 172 ; cf. Meyer, *Comment.* i. 2 ; Winer, *R. W. B.*, s. v. Matthäus, Name). The τελῶναι, of whom he was one, are not to be identified with the *publicani*, properly so called—the equestrian capitalists who farmed the taxes under the Romans—but with the ‘*portitores*,’ their underlings, a body generally regarded as infamous, and hated by their countrymen as traitors and apostates, the willing tools of the Roman oppressor. A ‘dangerous class,’ among whom He who ‘came to seek and to save that which was lost,’ found a reception denied Him by the respectable Pharisees, and won some of His most glorious triumphs. St. Matthew's special occupation was probably the collection of dues and customs from persons and goods crossing the lake of Gennesareth. It was while he was actually engaged in his duties, καθημέρον ἐπὶ τὸ τελῶναι, that he received the call, which he obeyed without delay. Our Lord was then invited by him to a ‘great feast,’ Luke v. 29, to which perhaps, as Neander has suggested (*Life of Christ*, p. 230, Bohn ; cf. Blunt, *Undes. Coincid.*, p. 257), by way of farewell, his old associates, ὄχλος τελῶνων πολλῶς, were summoned. Those on the look out for discrepancies fancy they see one in the account of this feast ; but we may probably account for St. Matthew's silence about himself to his humility, of which we see another proof in his catalogue of the twelve, where alone his name appears with the title of infamy, ‘Matthew the publican’ (Matt. x. 3, cf. Euseb., *Dem. Evan.*, iii. 5).

St. Matthew is found once again in the company of his brother apostles after the ascension, Acts i. 13, but of his after history we have no trustworthy information. According to the Κήρυγμα Πέτρου, cited by Clem. Alex., *Strom.* vi. 5. 43, which is referred to as a *traditional* statement by Apollonius, *cir.* 180 (ap. Euseb. *H. E.*, v. 18), all apostles remained at Jerusalem twelve years after the crucifixion, devoting their labours to their own countrymen ; and, according to Eusebius, when Matthew was called to leave them, he sought to supply the want of his personal presence, τὸ λείπον τῇ αὐτοῦ παρουσίᾳ, by the gift of his Aramaic gospel (*H. E.*, iii. 24). Eusebius could only tell us that he went to preach ‘to others,’ ἐφ’ ἑτέροισ ; nor was Origen (Euseb., *H. E.* iii. 1) or Jerome (*De Vir. Ill.*) able to supply any thing more definite. This deficiency is, as usual, amply supplied by later writers, by whom the field of his missionary labours is specified as Macedonia (Isid. Hispal.), Syria (Symeon, Metaph.), Persia (Ambrose), Parthia, and Media. The favourite place was Ethiopia, a tradition probably based on Euseb.,

*H. E.* v. 10 (Socrates, *H. E.* i. 19; Ruff., *H. E.* x. 9). Nicephorus Callistus, ii. 41 (*cir.* 1350, A. D.), the latest of all, knows most about the evangelist, and finds him hearers and converts among the Anthropophagi. He also makes him die a martyr's death, which is accepted by the *Martyrolog. Roman.*, in defiance of the testimony of the early church that his end was natural. According to Clem. Alex., *Paed.* ii. 1, he practised rigid asceticism, 'living on seeds and fruits, and herbs, without flesh,' and exaggerating the abstinence of the Baptist. The apocryphal 'Acts and Martyrdom of Matthew,' published by Tischendorf, are unworthy of attention.—E. V.

MATTHEW, GOSPEL OF. I. *Author.*—There is no ancient book with regard to the authorship of which we have earlier, fuller, and more unanimous testimony. From Papias, almost if not quite contemporary with the apostles, downwards, we have a stream of unimpeachable witnesses to the fact that Matthew was the author of a gospel; while the quotations which abound in the works of the Fathers prove that at least as early as Irenæus—if we may not also add Justin, whose 'Memorabilia of Christ' we cannot but identify with the 'Gospels' he speaks of as in public use—prove that the gospel received by the church under his name was the same as that which has reached us. As in the case of the other synoptists, a subsidiary argument of no small weight in favour of the correctness of this assignment, may be drawn from the comparative insignificance of St. Matthew among the twelve. Any one desirous of imposing a spurious gospel on the church would have naturally assumed one of the principal apostles as its author, instead of one whose name could add but little weight or authority to the composition.

2. *Time and Place of its Composition.*—There is little in the gospel itself to throw any light on the date of its composition. In xxvii. 7, 8; xxviii. 15, we have evidences of a date some years subsequent to the Resurrection; but these may well be additions of a later hand, and prove nothing as to the age of the substance of the gospel. Little trust can be placed in the dates given by some late writers; e. g., Theophylact, Euthymius Zigabenus, Euseb. *Chron.* eight years after the Ascension; Niceph., Callist., and the *Chron. Pasch.*, A. D. 45. The only early testimony is that of Irenæus (*Hæc.* iii. 1, p. 174), that it was written 'when St. Peter and St. Paul were preaching in Rome, and founding the church.' This would bring it down to about 63 A. D.; probably somewhat earlier, as this is the latest date assigned for St. Luke's Gospel; and we have the authority of a tradition accepted by Origen, for the priority of that of St. Matthew, *ἐν παραδόσει μαθὼν . . . ὅτι πρῶτον μὲν γέγραπται τὸ κατὰ τὸν ποτε τελώνην ὑστερον δὲ ἀπόστ.* I. Xp. Ματθαίου (Euseb., *H. E.*, vi. 25). The most probable date is between 50 and 60 A. D., though this is by no means universally accepted by modern writers. Tillemont maintains 33 A. D.; Townson 37 A. D.; Owen and Tomline 38 A. D.; Davidson, *Introd. N. T.*, inclines to 41-43 A. D.; while Hug, Eichhorn, Credner, Bertholdt, etc., identifying 'Zacharias the son of Barachias' (xxiii. 35) with Zacharias the son of Baruch, whose murder is recorded by Josephus (*Bell. Jud.* iv. 6. 4), place its composition shortly after the fall of Jerusalem, a theory which is rejected by De Wette and Meyer,

and may safely be dismissed as untenable. When the external evidence is so inconsistent, and the internal evidence so scanty and precarious, no definite conclusion can well be arrived at.

With regard to the place, there is no difference of opinion. All ancient authorities agree that St. Matthew wrote his gospel in Palestine, and this has been as unanimously received by modern critics.

3. *For what readers was it written?*—As with the place of its composition, so with the persons for whose use it was primarily intended. The concurrent testimony of the early church that St. Matthew drew up his gospel for the benefit of the Jewish Christians of Palestine (*τοῖς ἀπὸ Ἰουδαϊσμοῦ πιστεύουσι*, Orig. *apud* Euseb. *H. E.* vi. 25), has been accepted without question, and may be regarded as a settled point. The statement of Eusebius is that, 'having previously preached to the Hebrews, when he was about to go to others also, he committed to writing in his native tongue his gospel (*τὸ κατ' αὐτὸν εὐαγγέλιον*), and so filled up by his writing that which was lacking of his presence to those whom he was departing from' (Euseb. *H. E.* iii. 24). The testimony of Jerome, frequently repeated, is to the same effect (*Præf. ad Matt.*; *de Vir. Ill.*; *Comm. in Hos.* xi.). The passages quoted and referred to above, it is true, have reference to the supposed Aramaic original, and not to the present Greek gospel. But whatever conclusion may be arrived at on the perplexed question of the origin of the existing gospel, Mr. Westcott has shown (*Introd. to Gospels*, p. 208) that 'there is no sufficient reason to depart from the unhesitating habit of the earliest writers who notice the subject, in practically identifying the revised version with the original text,' so that whatever has been stated of the purpose or characteristics of the one may unhesitatingly be regarded as applicable to the other also.

Looking therefore to our present gospel for proofs of its original destination, we find internal evidence tending to confirm the traditional statement. The great object of the evangelist is evidently to prove to his countrymen that Jesus of Nazareth was the promised Messiah, the antitype of the figures of the old covenant, and the fulfilment of all prophecy. The opening words of his gospel declare his purpose. Jesus Christ is set forth as 'the son of David,' and 'the son of Abraham' fulfilling 'the promises made to the fathers,' and reviving the faded glories of the nation in the heir of David's royal line, Abraham's promised seed (cf. Iren. *Fragm.* xxix.; *Hæc.* iii. 9. 1; Orig. *in Joann.*, tom. iv., p. 4). In the symmetrical arrangement of the genealogy also, 'its divisions' (as Dean Goodwin has remarked, *Comm. in St. Matt.*, *Introd.*), 'corresponding to the two great crises in their national life—the maximum and minimum points of Hebrew prosperity'—we have an accommodation to Jewish prejudices and Jewish habits of thought, in marked contrast with the continuous order of the universalistic St. Luke. As we advance we find that the accomplishment of the promises, the proof that Jesus Christ is He of whom 'Moses in the law and the prophets did write,' is the object nearest to his heart. Thus he is continually speaking of the necessity of this or that event happening, in order that a particular prophecy might be fulfilled (*ἵνα πληρωθῇ τὸ ῥηθὲν ὑπὸ τοῦ Κυρίου* (or *Θεοῦ*) *διὰ τοῦ προφήτου*, i. 22, ii. 15, xxi. 4, xxvi. 56, cf. ii. 17, iii. 3, iv. 14,

viii. 17, etc.); while his whole gospel is full of allusions to those passages and sayings of the O. T. in which the Christ was predicted and foreshadowed. As Da Costa has remarked (*Four Witnesses*, p. 20), he regards the events he narrates as 'realised prophecy,' and everything is recorded with this view, that he may lead his countrymen to recognise in Jesus their promised Deliverer and King.

It is in keeping with the destination of his gospel that we find in St. Matthew less frequent explanations of Jewish customs, laws, and localities, than in the other gospels. In the Sermon on the Mount Christ is introduced declaring himself not as the destroyer but the fulfiller of the Mosaic law. When the twelve are sent forth they are forbidden to go 'into the way of the Gentiles' (x. 5, cf. xv. 24). And in the same passage—the only one in which the Samaritans are mentioned—that abhorred race is put on a level with the heathen, not at once to be gladdened with the gospel message.

But while we keep this in view, as the evangelist's first object, we must not strain it too narrowly, as though he had no other purpose than to combat the objections and to satisfy the prepossessions of the Jews. No evangelist expresses with greater distinctness the universality of Christ's mission, or does more to break down the narrow notion of a Messiah for Israel, who was not one also for the whole world; none delivers stronger warnings against trusting to an Abrahamian descent for acceptance with God. It is in St. Matthew that we read of the visit of the Magi (ii. 1, ff.), symbolizing the manifestation of Christ to the Gentiles; it is he that speaks of the fulfilment of Isaiah's prophecy, when 'the nations that sat in darkness saw a great light' (iv. 15, 16), and adds to the narrative of the cure of the centurion's servant what is wanting to the universalistic Luke, that 'many should come from the East and West,' etc. (viii. 11). The narrative of the Syrophenician woman, omitted by St. Luke, is given by St. Matthew, in whom alone we also find the command to 'make disciples of all nations' (xxviii. 19), and the unrestricted invitation to 'all that labour and are heavy laden' (xi. 28). Nowhere are we made more conscious of the deep contrast between the spiritual teaching of Christ and the formal teaching of the rulers of the Jewish church. We see also that others besides Jewish readers were contemplated, from the interpretations and explanations occasionally added, e.g., Immanuel, i. 23; Gollgotha, xxvii. 33; Eli, lama sabachthani? ver. 46.

4. *Original Language.*—We have seen that, with regard to those for whom this gospel was originally composed, the external evidence is supported and confirmed by the internal. It is not so with the difficult question we now proceed to consider. While there is absolutely nothing in the gospel itself to lead us to imagine that it is a translation, and, on the contrary, everything favours the view that in the present Greek text, with its perpetual verbal correspondence with the other synoptists, we have the original composition of the author himself; the unanimous testimony of all antiquity affirms that St. Matthew wrote his gospel in *Hebrew*, i.e., the Aramaic or Syro-Chaldaic dialect, which was the vernacular tongue of the then inhabitants of Palestine. The internal evidence therefore is at variance with the external, and it is by no means easy to adjust the claims of the two.

To look first at the external evidence. The unanimity of all ancient authorities as to the Hebrew origin of this gospel is complete. In the words of the late Canon Cureton (*Syriac Recension*, p. lxxiii.), 'no fact relating to the history of the gospels is more fully and satisfactorily established. From the days of the apostles down to the end of the 4th century, every writer who had occasion to refer to this matter has testified the same thing. Papias, Irenæus, Pantænus, Origen, Cyril of Jerusalem, Athanasius, Epiphanius, Jerome, all with one consent affirm this. Such a chain of historical evidence appears to be amply sufficient to establish the fact that St. Matthew wrote his gospel originally in the Hebrew dialect of that time, for the benefit of Jews who understood and spoke the language.' To look at the evidence more particularly—(1.) The earliest witness is Papias, Bishop of Hierapolis in Phrygia, in the beginning of the 2d century; a hearer of the apostle, or more probably the presbyter John, and companion of Polycarp (Iren., *Her.* v. 33. 4). Eusebius describes him (*H. E.*, iii. 36) as 'a man of the widest general information, and well acquainted with the Scriptures,' ἀνὴρ τὰ πάντα ἐνὶ μέλει λογιστάτος καὶ γραφῆς εἰδήμων; and though in another place he depreciates his intellectual power, σφόδρα μικρὸς ὢν τὸν νοῦν (*H. E.*, iii. 39), this unfavourable view seems chiefly to have reference to his millenarian views (cf. Iren., *Her.* v. 33. 3), and can hardly invalidate his testimony on a matter of fact. Papias says, it would seem on the authority of John the Presbyter, 'Matthew compiled his gospel (or 'the oracles') in the Hebrew dialect; while each interpreted them according to his ability' (Ματθαῖος μὲν οὖν Εβραϊδὶ διαλέκτῳ τὰ λόγια συνεγράψατο: ἡρμηνεύσε δ' αὐτὰ ὡς ἦν δυνατὸς ἕκαστος). In estimating the value of this testimony two important points have to be considered; the meaning of the term *λόγια*; and whether Papias is speaking of the present or the past. On the latter point there can be little doubt. His use of the aorist, ἡρμηνεύσε, not ἡρμηνεύει, evidently shows that the state of things to which he or his original authority referred had passed away, and that individual translation was no longer necessary. It would seem, therefore, to follow, that 'an authorised Greek representative of the Hebrew St. Matthew' had come into use 'in the generation after the apostles' (Westcott, *Introd.*, p. 207, note). The signification of *λόγια* has been much controverted. Schleiermacher (*Stud. u. Krit.*, 1832, p. 735) was the first to explain the term of a supposed 'collection of discourses' which is held to have been the basis which, by gradual modification and interpolation, was transformed into the existing gospel (Meyer, *Comm.*, i. 13). This view has found wide acceptance, and has been strenuously maintained by Lachmann (*S. u. K.*, 1835), Meyer, De Wette, Credner, Wieseler, B. Crusius, Ewald, Renan, etc., but has been controverted by Lücke (*S. u. K.*, 1833), Hug, Ebrard, Bauer, Delitzsch, Hilgenfeld, Thiersch, Alford, Westcott, etc. But *λόγια*, in the N. T., signifies the *whole revelation* made by God, rather than the mere *words* in which that revelation is contained (Acts vii. 38; Rom. iii. 2; Heb. v. 12; 1 Pet. iv. 11); and, as has been convincingly shown by Hug and Ebrard, the patristic use of the word confirms the opinion that, as used by Papias, both in this passage and in the title of his own work (λογίων κυριακῶν ἐξηγήσεις), it implies a combined record of

facts and discourses corresponding to the later use of the word 'gospel.' (2.) The next witness is Irenæus, who, as quoted by Euseb. (*H. E.*, v. 8), says, that 'Matthew among the Hebrews published also a written gospel in their own language'—*τῇ ἰδίᾳ αὐτῶν διαλέκτῳ*. Hug and others have attempted to invalidate this testimony, as a mere repetition of that of Papias, whose disciple, according to Jerome, Irenæus was; but we may safely accept it as independent evidence. (3.) Pantænus, the next witness, cannot be considered to strengthen the case for the Hebrew original much. Though, as far as it goes, his evidence is definite enough. His story, as reported by Eusebius, is that 'he is said to have gone to the Indians' (probably in the south of Arabia), 'where it is reported that the Gospel of St. Matthew had preceded him among some who had there acknowledged Christ, to whom it is said the Apostle Bartholomew had preached, and had left with them the writing of Matthew in Hebrew letters' (*Ἑβραίων γράμμασι τὴν τοῦ Ματθαίου καταλείψαι γραφὴν*), and that it was preserved to the time mentioned.' Jerome tells the same tale, with the addition that Pantænus brought back this Hebrew gospel with him (*de Vir. Ill.*, 36). No works of Pantænus have been preserved, and we have no means of confirming or refuting the tale, which has somewhat of a mythical air, and is related as a mere story (*λέγεται, λόγος εὐρεῖν αὐτὸν*), even by Eusebius. (4.) The testimony of Origen has been already referred to. It is equally definite with those quoted above on the fact that the gospel was 'published for Jewish believers, and composed in Hebrew letters' (*ἐκδεδοκῶτα αὐτὸ τοῖς ἀπὸ Ἰουδαϊσμοῦ πιστεύουσι, γράμμασιν Ἑβραϊκοῖς συνεταγμένον*, Euseb. *H. E.*, vi. 25). There is no reason for questioning the independence of Origen's evidence, or for tracing it back to Papias. He clearly states what was the belief of the church at that time, and without a doubt as to its correctness. (For a refutation of the objections brought against it by Masch and Hug, etc., see Marsh's *Michaelis*, iv. 128, 135, ff.) (5.) We have already given the testimony of Eusebius (*H. E.*, iii. 24), to which may be added a passage (*ad Marin. quæst.*, ii. p. 941) in which he ascribes the words, *ὅπερ τοῦ σαββᾶτου*, to the translator, *παρὰ τοῦ ἐρμηνεύσαντος τὴν γραφὴν*, adding, 'for the evangelist Matthew delivered his gospel in the Hebrew tongue.' This is very important evidence as to the belief of Eusebius, which was clearly that of the church generally, that the gospel was originally composed in Hebrew. (6.) Epiphanius (*Hær.*, xxix. 9, p. 124) states the same fact without the shadow of a doubt, adding, that Matthew was the only evangelist who wrote *ἑβραϊστὶ καὶ ἑβραϊκοῖς γράμμασιν*. The value of his evidence, however, is impaired by his identification of the Hebrew original with that employed by the Nazarenes and Ebionites, by whom he asserts it was still preserved, *ἐν τῷ σώζοντι*. (7.) The same observation may also be made concerning the testimony of Jerome, whose references to this subject are very frequent, and who is the only one of the fathers who appears to have actually seen the supposed Hebrew archetype (*Præf. ad Matt.*; *De Vir. Ill.* 3 and 36; in *Quæt. Ev. ad Dam. præf.*; *Ep. Dam. de Osanna*; *Ep. ad Hedib. quæst. viii.*; *Comm. in Hos. xi.*) A perusal of these passages shows that there was a book preserved in the library collected by Pamphilus at Cæsarea, which was supposed to be the Hebrew original, *ἰψὺμ*

*Hebraicum*, and was as such transcribed and translated into Greek and Latin by Jerome, *circa* 392 A. D., from a copy obtained from the Nazarenes at the Syrian city of Berea. Afterwards, *circa* 398 A. D. (*Comm. in Matt.* xii. 13), he speaks more doubtfully of it, '*quod vocatur a plerisque Matt. authenticum*.' Later on, 415 A. D. (*Contr. Pelag.* iii. 1), he modifies his opinion still further, and describes the book used by the Nazarenes and preserved in the library at Cæsarea as '*Ev. juxta Hebræos . . . secundum Apostolos, sive ut plerique autumant juxta Mattheum*' (cf. *Edin. Rev.*, July 1851, p. 39; De Wette, *Einl.*, p. 100). While then we may safely accept Jerome as an additional witness to the belief of the early church that St. Matthew's gospel was originally composed in Hebrew (Aramaic), which he mentions as something universally recognised without a hint of a doubt, we may reasonably question whether the book he translated had any sound claims to be considered the genuine work of St. Matthew, and whether Jerome himself did not ultimately discover his mistake, though he shrunk from openly confessing it. We may remark, in confirmation of this, that unless the Aramaic book had differed considerably from the Greek gospel, Jerome would hardly have taken the trouble to translate it; and that while, whenever he refers to St. Matthew, he cites it according to the present text, he never quotes the Nazarene gospel as a work of canonical authority, but only in such terms as, '*quo utuntur Nazareni*,' '*quod lectitant Nazareii*,' '*quod juxta Heb. Nazar. legere consueverunt*,' and still more doubtfully, '*qui crediderit evangelio, quod secundum Hebræos editum nuper transtulimus*,' language inconsistent with his having regarded it as canonical Scripture. (8.) The statements of later writers, Cyril of Jer., Athanas., Chrysos., August., Greg. Naz., etc., merely echo the same testimony, and need not be more particularly referred to.

An impartial survey of the above evidence leads to the conclusion, that in the face of so many independent witnesses we should be violating the first principles of historical criticism if we refused to accept the fact that St. Matthew wrote his gospel originally in Hebrew. But whether this original was ever seen by Jerome or Epiphanius, is more than questionable.

What, then, is the origin of our present gospel? To whom are we to ascribe its existing form and language? What is its authority? These are the questions which now meet us, and to which it must be confessed it is not easy to give a satisfactory answer. We may, at the outset, lay down, as indisputable, in opposition to Cureton (who asserts, *u. s.*, that 'a careful critical examination of the Greek text will afford very strong confirmation' of the Hebrew original), that the phenomena of the gospel as we have it—its language, its coincidences with and divergences from the other synoptists, the quotations from the O. T. it contains, and the citations made from it by ancient writers, all oppose the notion of the present Greek text being a translation, and support its canonical authority. (1.) An important argument may be drawn from the use made of the existing gospel by all ancient writers. As Olshausen remarks (Clark's ed., i. xxviii.), while all the fathers of the church assert the Hebrew origin of the gospel, they without exception make use of the existing Greek text as canonical Scripture, and that without doubt or

question, or any thing that would lead to the belief that they regarded it as of less authority than the original Hebrew, or possessed it in any other form than that in which we now have it. (2.) Another argument in favour of the authoritative character of our present gospel arises from its universal diffusion and general acceptance, both in the church and among her adversaries. Had the Hebrew gospel been really clothed with the authority of the sole apostolic archetype, and our Greek gospel been a mere translation, executed, as Jerome asserts, by some unknown individual, 'quis postea in græcum transtulerit non satis certum est' (*De Vir. Ill.* 3), would not, as Olshausen remarks, *u.s.*, objections to it have been urged in some quarter or other, particularly in the country where Matthew himself laboured, and for whose inhabitants the Hebrew was written? Would its statements have been accepted without a cavil by the opponents of the church? No trace of such opposition is, however, to be met with. Not a doubt is ever breathed of its canonical authority. (3.) Again, the text itself bears no marks of a translation. This is especially evident in the mode of dealing with the citations from the O. T. These are of two kinds: (a), Those standing in the discourses of our Lord himself, and the interlocutors; and (b), Those introduced by the evangelist as proofs of our Lord's Messiahship. Now, if we assume, as is certainly most probable (though the contrary has been maintained by Hug, the late Duke of Manchester, and more recently by the Rev. Alexander Roberts, whose learned and able 'Discussions on the Gospels' demand attentive consideration from every Biblical student), that Aramaic, not Greek, was the language ordinarily used by our Lord and His Jewish contemporaries, we should certainly expect that any citations from the O. T., made by them in ordinary discourse, would be from the original Hebrew or its Aramaic counterpart, not from the Septuagint version, and would stand as such in the Aramaic record; while it would argue more than the ordinary license of a mere translator to substitute the LXX. renderings, even when at variance with the Hebrew before him. And yet what is the case? While in the class (b), due to the evangelist himself, which may be supposed to have had no representative in the current Greek oral tradition which we assume as the basis of the synoptical gospels, we find original renderings of the Hebrew text; in the class (a), on the other hand, where we might, *a priori*, have looked for an even closer correspondence, the citations are usually from the LXX. even where it deviates from the Hebrew. (In (a) we may reckon iii. 3; iv. 4, 6, 7, 10; xv. 4, 8, 9; xix. 5, 18; xxi. 13; xxi. 42; xxii. 39, 44; xxiii. 39; xxiv. 15; xxvi. 31; xxvii. 46. In (b), called by Westcott (*Introd.* p. 208, note 1), 'Cyclic quotations,' i. 23; ii. 6, 15, 18; iv. 15, 16; viii. 17; xii. 18, ff.; xiii. 35; xxi. 5; xxvii. 9, 10.) In two cases St. Matthew's citations agree with the synoptic parallels in a deviation from the LXX., all being drawn from the same oral groundwork. St. Matthew's quotations have been examined by Credner, one of the soundest of modern scholars, who pronounces decidedly for their derivation from the Greek (*Einleit.*, p. 94, cf. De Wette, *Einl.*, 198). We may therefore not unwarrantably find here additional evidence, that in the existing Greek text we have the work, not of a mere translator, but of an independent and autho-

ritative writer. (4.) The verbal correspondences between St. Matthew and the other synoptists in their narratives, and especially in the report of the speeches of our Lord and others, are difficult to account for if we regard it as a translation. As Alford remarks (*Gr. Test.*, Proleg. i. 28), 'The translator must have been either acquainted with the other two gospels, in which case it is inconceivable that, in the midst of the present coincidences in many passages, such divergences should have occurred, or unacquainted with them, in which case the identity itself would be altogether inexplicable.' Indeed, in the words of Credner (*Einleit.*, 94, 95), 'the Greek original of this gospel is affirmed by its continual correspondence with those of Mark and Luke, and that not only in generals and important facts, but in particulars and minute details, in the general plan, in entire clauses, and in separate words—a phenomenon which admits of no explanation under the hypotheses of a translation from the Hebrew.'

(5.) This inference in favour of an original Greek gospel is strongly confirmed by the fact that all versions, even the Peshito Syriac, the language in which the gospel is said to have been originally written, are taken from the present Greek text. It is true that Canon Cureton (*Syriac Recens.*, p. lxxv., ff.) argues with much ability against this, and expends much learning and skill in proof of his hypothesis, that the Syriac version of St. Matthew published by him is more ancient than the Peshito, and may be regarded as, in the main, identical with the Aramaic gospel of St. Matthew; which he also considers to have been identical with the *Gospel according to the Hebrews*, used by the Nazarenes and Ebionites, 'modified by some additions, interpolations, and perhaps some omissions.' His statement (p. xlii.) that 'there is a marked difference between the recension of St. Matthew and that of the other gospels, proving that they are by different hands—the former showing no signs, as the others do, of translation from the Greek'—demands the respect due to so careful a scholar; but he fails entirely to explain the extraordinary fact, that in the very country where St. Matthew published his gospel, and within a comparatively short period, a version from the Greek was substituted for the authentic original; nor have his views met with general acceptance among scholars.

Having thus stated the arguments in favour of a Hebrew and Greek original respectively, it remains for us to inquire whether there is any way of adjusting the claims of the two. We think there is, and that Mr. Westcott—to whom the study of the gospels owes so much—has pointed out the road to it. Not that the difficulties which beset this matter can be regarded as cleared up, or the question finally and satisfactorily settled, but a mode of reconciling the inconsistency between testimony and fact has been indicated, which, if pursued, may, we think, lead to a decision. 'It has been shown,' says Mr. Westcott, *Introd.* p. 208, note, 'that the oral gospel probably existed from the first both in Aramaic and in Greek, and in this way a preparation for a fresh representative of the Hebrew gospel was at once found. The parts of the Aramaic oral gospels which were adopted by St. Matthew already existed in the Greek counterpart. The change was not so much a version as a substitution; and frequent coincidence with common parts of St. Mark and St. Luke, which were derived from the same

oral Greek gospel, was a necessary consequence. Yet it may have happened that, as long as the Hebrew and Greek churches were in close connection, perhaps till the destruction of Jerusalem, no authoritative Greek gospel of St. Matthew—*i.e.*, such a version of the Greek oral gospel as would exactly answer to St. Matthew's version of the Aramaic—was committed to writing. When, however, the separation between the two sections grew more marked, the Greek gospel was written, not indeed as a translation, but as a representation of the original, as a Greek oral counterpart was already current.' This theory of the origin of the Greek gospel, it appears to us, meets the facts of the case, and satisfies its requirements more fully than any other. We have seen above that the language of Papias indicates that, even in his day, the gospel of St. Matthew existed substantially in Greek, and its universal diffusion and general authority in the earliest ages of the Church prove that its composition cannot be placed much after the times of the apostles. May it not have been then that the two—the Aramaic and the Greek gospel—existed for some time in their most important portions as an oral tradition side by side—that the Aramaic was the first to be committed to writing, and gained a wide though temporary circulation among the Hebrew Christians of Syria and Palestine?—that when, as would soon be the case, the want of a Greek gospel for the use of the Hellenistic Jews was felt, this also was published in its written form, either by St. Matthew himself (as is maintained by Thiersch, Olshausen, and Lee), or by those to whom, from constant repetition, the main portions were familiar; perhaps under the apostle's eye, and with the virtual, if not the formal sanction of the church at Jerusalem? As it supplied a need widely felt by the Gentile Christians, it would at once obtain currency, and as the Gentile church rapidly extended her borders, while that of the Jewish believers was continually becoming confined within narrower limits, this Greek gospel would speedily supplant its Hebrew predecessor, and thus furnish a fresh and most striking example of what Mr. Westcott, in his excellent work on *The Bible in the Church*, Introd. p. viii., calls 'that doctrine of a divine providence separating (as it were) and preserving special books for the perpetual instruction of the church, which is the true correlative and complement of every sound and reverend theory of inspiration.' No other hypothesis, as Dr. Lee has satisfactorily shown (*Inspir. of H. Sc.*, Appendix M), than the Greek gospel being either actually or substantially the production of St. Matthew himself, 'accounts for the profound silence of ancient writers respecting the translation, . . . or for the absence of the least trace of any other Greek translation of the Hebrew original.' The hypotheses which assign the translation to St. Barnabas (Isid. Hispal., *Chron.* p. 272), St. John (Theophyl., Euthym. Zigab.), St. Mark (Greswell), St. Luke and St. Paul conjointly (Anastas. Sinaita), or James the brother of our Lord (*Syn. Sacr. Scr. apud* Athanas. t. ii. p. 202), are mere arbitrary assertions without any foundation in early tradition. The last named is the most ingenious, as we may reasonably suppose that the Bishop of Jerusalem would feel solicitude for the spiritual wants of the Hellenistic Christians of that city.

Those who desire to pursue the investigation of this subject will find ample materials for doing so in the 'Introductions' of Hug, De Wette, and Credner;

Marsh's *Michaelis*, vol. iii. part i., where the patristic authorities are fully discussed; Lardner's *Credibility*, vol. v.; Reuss's *Gesch. d. Kanon*; Tregelles on *The Original Language of St. Matthew*; Rev. A. Roberts' *Discussions on the Gospels*; the commentaries of Olshausen, Meyer, Alford, Weststein, Kuhnoel, Fritzsche, Lange, etc.; and the works on the Gospels of Norton (*Credibility*), Westcott, Baur, Gieseler (*Entstehung*), Hilgenfeld, etc.; Cureton's *Syriac Recension*, Preface; and Dr. W. Lee on *Inspiration*, Append. M; Jeremiah Jones' *Vindication of St. Matthew*; Ewald, *die drei Erst. Ev.*; and *Jahrbuch, d. Bibl. Wissensch.*, 1848-1849.

5. *Characteristics.*—St. Matthew's is emphatically the Gospel of the Kingdom. The main object of the evangelist is to portray the kingly character of Christ, and to show that in Him the ideal of the King reigning in righteousness, the true Heir of David's throne, was fulfilled (cf. August., *De Consens. Ev.*, passim). And thus the tone throughout is majestic and kingly. He views things in the grand general aspect; and, indifferent to the details in which St. Mark loves so much to dwell, he gathers up all in the great result. His narrative proceeds with a majestic simplicity, regardless of time and place, according to another and deeper order, ready to sacrifice mere chronology or locality to the development of his idea. Thus he brings together events separated sometimes by considerable intervals, according to the unity of their nature or purpose, and with a grand but simple power accumulates in groups the discourses, parables, and miracles of our Lord (I. Williams, *Study of Gospels*, p. 28). From the formation and objects of the gospels, we should expect that their prevailing characteristics should be indicated rather by a general tone and spirit than by minute peculiarities. Not, however, that these latter are wanting. It has been already remarked how the genealogy with which St. Matthew's gospel opens sets our Lord forth in His kingly character, as the heir of the throne of David, the representative of the royal line of which He was the true successor and fulfilment. As we advance we find His birth hailed, not by lowly shepherds as in St. Luke, but by wise men coming to wait on Him with royal gifts, inquiring, 'Where is He that is born king of the Jews.' In the Sermon on the Mount the same majesty and authority appear. We hear the Judge himself delivering His sentence; the King laying down the laws of His kingdom, 'I say unto you,' and astonishing His hearers with the 'authority' with which He speaks.

The awful majesty of our Lord's reproofs in His teaching in the temple, and His denunciations of the Scribes and Pharisees, also evidence the authority of a king and lawgiver—'one who knew the mind of God and could reveal it;' which may also be noticed in the lengthened discourses that mark the close of His ministry, in which 'the king' and 'the kingdom of heaven' come forward with so much frequency (xxi. 31, 43; xxii. 2, ff.; xxiii. 14; xxiv. 14; xxv. 1, 34, 40). Nor can we overlook the remarkable circumstance, that in the parable of the marriage-feast, so similar in its general circumstances with that in St. Luke (xiv. 16), instead of 'a certain man,' it is 'a king' making a marriage for his son, and in kingly guise sending forth his armies and binding the unworthy guest. The addition of the doxology also to the Lord's Prayer, with its ascription of 'the kingdom, the power,

and the glory,' is in such true harmony with the same prevailing tone as to lead many to see in this fact alone the strongest argument for its genuineness.

But we must not in this, or in any of the gospels, direct our attention too exclusively to any one side of our Lord's character. 'The King is one and the same in all; and so is the Son of Man, and the Priest. . . . He who is the King is also the Sacrifice' (Williams, *u. s.*, p. 32). The gospel is that of the king, but it is the king 'meek' (xxi. 5), 'meek and lowly of heart' (xi. 29); the kingdom is that of 'the poor in spirit,' 'the persecuted for righteousness' sake' (vers. 3, 10), into which 'the weary and heavy laden' are invited, and which they enter by submitting to the 'yoke' of its king. And He, it tells us, was to be one of ourselves, 'whose brotherhood with man answered all the anticipations the Jewish prophets had formed of their king, and whose power to relieve the woes of humanity could not be separated from his participation in them, who 'Himself took our infirmities and bare our sicknesses'' (viii. 17) — (Maurice, *Unity of N. T.*, p. 190). As the son of David and the son of Abraham He was the partaker of the sorrows as well as the glories of the throne—the heir of the curse as well as the blessing. The source of all blessings to mankind, fulfilling the original promise to Abraham, the curse due to man's sin meets and centres in Him, and is transformed into a blessing when the cross becomes His kingly throne; and from the lowest point of His degradation He reappears, in His resurrection, as the Lord and King to whom 'all power is given in heaven and earth.' He fulfils the promise, 'in thy seed shall all families of the earth be blessed;' in the command to 'go and make disciples of all nations,' he 'expands the I AM, which was the ground of the national polity, into the name of 'the Father, the Son, and the Holy Ghost'' (Maurice, *u. s.*, p. 221).

And once again, the kingdom He came to establish was to be a fatherly kingdom. The king He made known was One reigning in God's name, and as His representative. And that God was the father of His people, as of Him, in and through whom human beings were to be adopted as the children of God. This characteristic of the gospel is perpetually meeting us. At every turn St. Matthew represents our Lord bringing out the mind of God and showing it to be the mind of a Father. The fatherly relation is the ground of all His words of counsel, command, warning, comfort. Especially is this the case in the Sermon on the Mount. Every command, as to good works (v. 16, 45, 48), almsgiving (vi. 1, 2), prayer (vi. 6, 8), forgiveness (vi. 14, 15), fasting (vi. 18), trust and faith (vi. 26; vii. 11), is based on the revelation of a Father. The twelve are sent forth in the same name and strength (x. 20, 29). The kingdom Christ came to establish is not so much a kingdom as a family—the *Ecclesia*, a word found only in St. Matthew (xvi. 18; xviii. 17)—'held together by the law of forgiveness and mutual sacrifice, with their elder Brother in the midst of them, and their will so identified with that which rules heaven and earth, that whatever they shall agree to ask shall be done by their Father.' This characteristic of St. Matthew is remarkably evidenced by a comparative survey of the usage of the evangelists. In St. Mark we find our Lord speaking of to or God, as His Father, three times, in St. Luke twelve times, in St. Matthew twenty-two times; as the Father of

His people, in St. Mark twice, in St. Luke five times, in St. Matthew twenty-two times.

Another minor characteristic which deserves remark, is St. Matthew's use of the plural, where the other evangelists have the singular. Thus, in the temptation, we have 'stones' and 'loaves' (iv. 3), two demoniacs (viii. 28), *τοὺς χόρτους* (xiv. 19), two blind men (xx. 30, cf. ix. 27), the ass and her colt (xxi. 2), servants (xxi. 34, 36), both thieves blaspheming (xxvii. 44). This is ingeniously accounted for by Da Costa (*Four Witnesses*, p. 322), though this is not universally applicable, on the idea that 'his point of view—regarding the events he narrates as fulfilled prophecies—leads him to regard the species rather than the individual; the entire plenitude of the prophecy rather than the isolated fulfilment.'

6. *Relation to Mark and Luke—Arrangement.*—It is needless again to enter into the maze of conflicting opinions as to the order of priority of the synoptic gospels, of which we have already spoken (see MARK and LUKE). In the article on Mark we have expressed our opinion that, while his gospel is probably *in essence* the oldest, there is nothing seriously to invalidate the traditional statement that St. Matthew's was the earliest in composition—the first committed to writing. Neither does a careful review of the text of the gospel allow us to accept the view put forth by Ewald with his usual dogmatism, and defended with his wonted acuteness, that, as we have it, it is a fusion of four different elements—(1.) An original Greek gospel of the simplest and briefest form; (2.) an Aramaic 'collection of sayings,' *τὰ λόγια*; (3.) the narrative of St. Mark; and (4.) 'a book of higher history.' That our gospel is no such curious mosaic is evident from the unity of plan and unity of language which pervades the whole, and to an unprejudiced reader Ewald's theory refutes itself.

Comparing St. Matthew's gospel with those of St. Mark and St. Luke, we find the following passages peculiar to him: chap. i. (with the exception of the great central fact), and chap. ii. entirely. The genealogy, the suspicions of Joseph, the visit of the Magi, the flight into Egypt and return thence, the massacre of the innocents, and the reason of the settlement at Nazareth, are given by St. Matthew alone. To him we owe the notice that 'the Pharisees and Sadducees' came to John's baptism (iii. 7); that John was unwilling to baptize our Lord, and the words in which Jesus satisfied his scruples (ver. 13-15); the Sermon on the Mount in its fullest form (v., vi., vii.); the prediction of the call of the Gentiles, appended to the miracle of the centurion's servant (viii. 11, 12); the cure of the two blind men (ix. 27-30); and that memorable passage by which, if by nothing else, St. Matthew will for ever be remembered with thankfulness—which, as perhaps the fullest exposition of the spirit of the gospel anywhere to be found in Holy Scripture, taught St. Augustine the difference between the teaching of Christ and that of the best philosophers (xi. 28-30); the solemn passage about 'idle words' (xii. 36, 37); four of the parables in chap. xiii., the tares, the hid treasure, the pearl, and the draw-net; several incidents relating to St. Peter, his walking on the water (xiv. 28-31), the blessing pronounced upon him (xvi. 17-19), the tribute money (xvii. 24-27); nearly the whole of chap. xviii., with its lessons of humility and for-

givenness, and the parable of the unmerciful servant; the lessons on voluntary continence (xix. 10, 12); the promise to the twelve (ver. 28); the parables of the labourers in the vineyard (xx. 1-16), the two sons (xxi. 28-32), the transference of the kingdom to the Gentiles (ver. 43); the parable of the marriage of the king's son (xxii. 1-14); nearly the whole of the denunciations against the Scribes and Pharisees in chap. xxiii.; the parables of the last things in chap. xxv. In the history of the passion the peculiarities are numerous and uniform in character, tending to show how, in the midst of His betrayal, sufferings, and death, our Lord's Messiahship was attested. It is in St. Matthew alone that we read of the covenant with Judas for 'thirty pieces of silver' (xxvi. 15); his inquiry 'Is it I?' (xxvi. 25), as well as the restoration of the money in his despair, and its ultimate destination in unconscious fulfilment of prophecy (xxvii. 3-10); the cup 'for the remission of sins' (xxvi. 28); the mention of the 'twelve legions of angels' (ver. 52-54); Pilate's wife's dream (xxvii. 19), his washing his hands (ver. 24), and the imprecation 'His blood be on us,' etc. (ver. 25); the opening of the graves (ver. 52, 53), and the watch placed at the sepulchre (ver. 62-66). In the account of the resurrection we find only in St. Matthew the great earthquake (xxviii. 2), the descent of the angel, his glorious appearance striking terror into the guards (ver. 2-4), their flight, and the falsehood spread by them at the instigation of the priests (ver. 11-15); our Lord's appearance to the women (ver. 9, 10); the adoration and doubt of the apostles (ver. 17); and finally, the parting commission and promise of His ever-abiding presence (ver. 18-20).

This review of the gospel will show us that of the matter peculiar to St. Matthew, the larger part consists of parables and discourses, and that he adds comparatively little to the narrative. Of thirty-three recorded miracles eighteen are given by St. Matthew, but only two, the cure of the blind men (ix. 27-30) and the tribute money (xvii. 24-27), are peculiar to him. Of twenty-nine parables St. Matthew records fifteen; ten, as noticed above, being peculiar to him.

St. Matthew's order of arrangement we have already seen is according to subject-matter rather than chronological sequence, which in the first half is completely disregarded. More attention is paid to order of time in the latter half, where the arrangement agrees with that of St. Mark. The main body of his gospel divides itself into groups of discourses collected according to their leading tendency, and separated from one another by groups of anecdotes and miracles. We may distinguish *seven* such collections of discourses—(1.) The Sermon on the Mount, a specimen of our Lord's ordinary didactic instruction (v-vii.); divided by a group of works of healing, comprising no less than ten out of eighteen recorded miracles, from (2.) the commission of the twelve (chap. x.) The following chapters (xi. xii.) give the result of our Lord's own teaching, and, introducing a change of feeling towards Him, prepare us for (3.) His first open denunciation of His enemies (xii. 25-45), and pave the way for (4.) the group of parables, including seven out of fifteen recorded by him (chap. xiii.). The next four chapters, containing the culminating point of our Lord's history in Peter's confession (xvi. 13-20), and the transfiguration (xvii.), with the first glimpses of the cross (xvi. 21; xvii. 12),

are bound together by historical sequence. In (5), comprising chap. xviii., we have a complete treatise in itself, made up of fragments on humility and brotherly love. The counsels of perfection, in xix. 1-xx. 16, are followed by the disputes with the Scribes and Pharisees (xxi. 23-xxii. 46), which supply the ground for (6.) the solemn denunciations of the hypocrisies and sophisms by which they nullified the spirit of the law (chap. xxiii.), followed by (7.) the prophecy of the last things (xxiv. xxv.).

The view that St. Matthew's gospel is arranged chronologically, was revived by Eichhorn, who has been followed by Marsh, De Wette, and others. But it has been controverted by Hug, Olshausen, Greswell, Ellicott, and others, and is almost universally held to be untenable.

Reuss, dividing the matter contained in the synoptical gospels into 100 sections, finds 73 of them in St. Matthew, 63 in St. Mark, in St. Luke, the richest of all, 82. Of these, 49 are common to all three; 9 common to St. Matthew and St. Mark; 8 to St. Matthew and St. Luke; 3 to St. Mark and St. Luke. Only 7 of these are peculiar to St. Matthew; 2 to St. Mark; while St. Luke contains no less than 22.

St. Matthew's narrative, as a rule, is the least graphic. The great features of the history which bring into prominence our Lord's character as teacher and prophet, the substance of type and prophecy, the Messianic king, are traced with broad outline, without minute or circumstantial details. We are conscious of a want of that picturesque power and vivid painting which delights us in the other gospels, especially that of St. Mark. This deficiency, however, is more than compensated for by the grand simplicity of the narrative, in which everything is secondary to the evangelist's great object. The facts which prove the Messianic dignity of his Lord are all in all with him, the circumstantials almost nothing, while he portrays the earthly form and theocratic glory of the new dispensation, and unfolds the glorious consummation of 'the kingdom of heaven.'

7. *Style and Diction.*—The language of St. Matthew is less characteristic than that of the other evangelists. Of the three synoptical gospels it is the most decidedly Hebraistic, both in diction and construction, but less so than that of St. John. Credner and others have remarked the following instances of Hebraistic phraseology:—

(1.) ἡ βασιλεία τῶν οὐρανῶν, which occurs thirty-two times in St. Matt. and not once in the other evangelists, who use instead ἡ βασ. τ. θεοῦ, employed also by St. Matt. (vi. 33; xii. 28; xxi. 31, 43.)

(2.) ὁ πατήρ ὁ ἐν τοῖς οὐρανοῖς (ὁ οὐράνιος, four times), sixteen times, only twice in Mark, not at all in Luke.

(3.) Ἰῶς Δαβὶδ, to designate Jesus as the Messiah, seven times, three times each in Mark and Luke.

(4.) Ἡ ἀγία πόλις, and ὁ ἅγιος τόπος, for Jerusalem, three times; not in the other evangelists.

(5.) ἡ συντελεία τοῦ αἵωνος, 'the consummation of the age'—'the end of the world,' is found five times in Matt., nowhere else in the N. T. except Heb. ix. 26, in the plural, αἰώνων.

(6.) ἵνα (ὅπως) πληρωθῇ τὸ ρηθὲν, eight times, nowhere else in the N. T. St. John uses ἵνα πληρ. ὁ λόγ., or ἡ γραφ.; St. Mark once (xiv. 49), ἵνα πληρ. αἱ γραφ.

(7.) τὸ ρηθὲν (always used by Matt. when quoting Holy Scripture *himself*, in other citations γέγραπ-

ται, with the other evangelists), twelve times; ὁ ῥηθὲς, once (iii. 3). He never uses the singular, γραφή. Mark once uses τὸ ῥηθὲν (xiii. 14).

(8.) ἐθνικός, twice; nowhere else in N. T.

(9.) ὀμνέειν ἐν, seven times; not elsewhere, save Rev. x. 6.

(10.) καὶ ἰδοὺ, in narrative, twenty-three times; in Luke sixteen times; not in Mark. ἰδοὺ, after a genitive absolute, nine times.

(11.) προσέρχεσθαι and πορεύεσθαι, continually used to give a pictorial colouring to the narrative (e.g., iv. 3; viii. 5, 19, 25; ix. 14, 20, etc.; ii. 8; ix. 13; xi. 4, etc.)

(12.) λέγων, absolutely, without the dative of the person (e.g., i. 20; iii. 2, 13, 20; iii. 2, 14, 17; v. 2; vi. 31, etc.)

(13.) Other peculiarities, establishing the unity of authorship, may be noticed:—(1.) The use of τότε, as the ordinary particle of transition, ninety times; six times in Mark, and fourteen in Luke. (2.) καὶ ἐγένετο ὅτε, five times; Luke uses ὅτε δὲ ἐγένετο, or καὶ ὅτε ἐγένετο. (3.) ἕως οὗ, seven times. (4.) ἐν ἐκείνῳ τῷ καιρῷ, ἐν τῇ ὥρᾳ ἐκ. and ἀπὸ τ. ὥρ. ἐκ. scarcely found in Mark or Luke. (5.) ἀναχωρεῖν, 'to retire,' ten times. (6.) κατ' ὄναρ, six times. (7.) ποιῶν ὡς, ὥσπερ, καθὼς, ὡσαύτως; Luke, ποι. ὁμοίως. (8.) τάφος, six times; only Rom. iii. 13 besides in N. T. (9.) σφόδρα, and other adverbs, after the verb, except οὕτω, always before it. (10.) προσκυνεῖν, with the dative, ten times; twice in Mark, three times in John. Other words which are found either only or more frequently in Matthew, are φρόνιμος, οἰκιακός, ὑστερον, ἐκείθεν, διατάζειν, καταποντίζεσθαι, μεταρρεῖν, συναρρεῖν λόγον, συμβούλιον λαμβάνειν, μαλακία—kos, etc. (cf. Credner, *Einleit.*, p. 63, ff.; Gersdorf, *Beiträge z. Sprachcharact. d. N. T.*)

8. Citations from the O. T.—Few facts are more significant of the original purpose of this gospel, and the persons for whom it was designed, than the frequency of citations from and references to the O. T. Scriptures. While in St. Luke and St. Mark, the Gentile gospels, we have only twenty-four and twenty-three respectively, St. Matthew supplies no less than fifty-four. The character of the quotations is no less noticeable than the number. In St. Matthew the O. T. is cited verbally no less than forty-three times, many of the quotations being peculiar to this evangelist; in St. Luke we have not more than nineteen direct citations, and only eight quotations (in St. Mark only two), which are not found elsewhere. The two classes into which these citations are distinguished—those more or less directly from the LXX., and those which give an original rendering of the Hebrew text—have been alluded to above. The citations peculiar to St. Matthew are marked with an asterisk (\*), and those which he quotes as having been fulfilled in our Lord's life with (a).

9. *Genuineness.*—Notwithstanding the doubts that have been thrown upon it, the genuineness of St. Matthew is as satisfactorily established as that of any ancient book whatever. From the days of Justin we find perpetual quotations corresponding with the existing text of the gospel, which prove that the book then in circulation, as of canonical authority, was the same as that we now have. Of the various recensions by which we are invited by Marsh, Hilgenfeld, Schleiermacher, Ewald, etc., to believe that the gospel assumed its present form, there is absolutely no external evidence, while the

internal, arising from style and diction, are entirely in favour of the whole having substantially proceeded from one hand. Other supposed internal evidence varies so much, according to the subjective position of critics, and leads them by the same data to such opposite results, as to be little worth. This branch of the subject has been amply discussed by Hug, *Einleit.*; Norton, *Genuineness*; Westcott, *Canon*; to whose works the reader may be referred.

The genuineness of the first two chapters has been called in question, but on no sufficient grounds. See Meyer's note, *Comment.* i. 65, who adduces as arguments for their genuineness, that—(1) they are found in all MSS. and ancient versions, and are quoted by the fathers of the 2d and 3d centuries; Irenæus, Clem. Alex., etc., and are referred to by Celsus (*Orig., C. Cels.*, i. 38; ii. 32). (2.) The facts they record are perfectly in keeping with a gospel written for Jewish Christians. (3.) The opening of chap. iii., *ἐν δὲ ταῖς ἡμέραις* etc. refers back, by its construction, to the close of chap. ii.; and iv. 13 would be unintelligible without ii. 23. (4.) There is no distinction between the diction and constructions and those in the other parts of the gospel.

The opponents of these two chapters rest chiefly on their alleged absence from the Gospel of the Hebrews in use among the Ebionites (Epiphanius, *Har.*, xxx. 13). But Epiphanius describes that book as 'incomplete, adulterated, and mutilated,' and as the Ebionites regarded Jesus simply as the human Messiah co-ordinate with Adam and Moses, the absence of the two chapters may be readily accounted for on doctrinal grounds. The same explanation may be given for the alleged absence from the Diatessaron of Tatian of these chapters, and the corresponding parts of St. Luke containing the genealogy, and all the other passages which show that the Lord was born of the seed of David 'according to the flesh;' (Theodor., *Har.*, fab. i. 20). The case must be a weak one which requires us to appeal to acknowledged heretics for the correction of our canon. The supposed discrepancy between the opening chapters of St. Matthew and St. Luke, which has led even Professor Norton to follow Strauss, Paulus, Schleiermacher, etc., in rejecting them, have been abundantly discussed in all recent commentaries, and by Wieseler, *Synopsis*; Neander, *Life of Christ*; Mill, *Pantheism*; Kern, *Ursprung d. Ev. Mat.*, etc., as well as in the various answers to Strauss.

MATTHIAS (*Μαθθίας*), the disciple chosen to be the successor of the Apostle Judas Iscariot. Nothing is known of his previous history. He must, however, have been among those who had frequent intercourse with our Lord throughout his three years' ministry (Acts i. 21). It has therefore

been supposed that he was one of the Seventy (Euseb., *H. E.*, i. 12). The manner of his appointment was this:—The 120 who were assembled together at Jerusalem after the ascension, at the suggestion of St. Peter, selected two from among those who had been eye and ear-witnesses of Christ's whole official life—Joseph, called Barsabas, who was surnamed Justus; and Matthias. They then prayed to their ascended Lord, and besought him to signify on which of the two his choice rested. They then cast lots, expecting that, as they were not yet possessors of the Spirit which should teach and guide them in all things, the Lord would in this way, as oftentimes he had done before, signify his will; and the lot having fallen upon Matthias, he was straightway numbered among the apostles. Nothing reliable is recorded of his after life. He is not mentioned again in the N. T. One tradition says that he preached the gospel in Judæa, and was there stoned to death by the Jews. Others make him a martyr—by crucifixion—in Ethiopia or Colchis. An apocryphal gospel bearing his name is referred to by Eusebius (*H. E.*, iii. 12).—J. G. C.

MATTOCK, an instrument of husbandry, occurs four times in the O. T. 1. מוֹרְשֵׁת, *δρέπανον*, *sarculum*, rendered 'share,' meaning 'ploughshare;' and מַחְרֶשֶׁת, *θερισθήριον*, *vomer*, rendered 'mattock,' 1 Sam. xiii. 20. Both words are derived from the one root חָרַשׁ, 'to cut into' or 'carve.'

In ver. 21, same chap., מַחְרֵשֹׁת occurs as the plural form common to each; but which was the ploughshare, and which the mattock, it is now impossible to determine. We only know, as Gesenius says, that both instruments had sharp edges, and were used in the cultivation of the soil (see *Ges., Lex.*, p. 466).

2. 'Mattock' in 2 Chron. xxiv. 6 (בְּתֵיחִים, *τὸ πῶς*) is a misrendering for 'places' or districts.\*

3. מַעְדֵּר, *sarculum*, Is. vii. 25, 'dugged with a mattock.' This implement was made of wood, and, like the mattock in common use in Egypt, could be used either as a spade, hoe, or mattock. It resembled in form the grubbing-tool or picking-axe of our own country (see Wilkinson's *Ancient Egypt*; Niebuhr, *Description de l'Arabie*, tom. i. Tab., 15 G.)—W. J. C.

MAUL. This word occurs only in Prov. xxv. 18. It is there given as the translation of the Hebrew מַכְרֵי, a derivative from the root פָּרַץ or נָפַץ, 'to break into pieces with violence,' and thence 'to disperse.' The same Hebrew term is also found in Nah. ii. 2 (ver. 1 in A. V.), where it is rendered in the margin 'the disperser.' The cognate form מַכְרֵץ occurs in Jer. li. 20, translated 'battle-axe,' and the expression מַכְרֵץ מַכְרֵץ, 'weapon of smashing' (A. V., 'a slaughter weapon'), is used in Ezek. ix. 2. In these passages some instrument of war, such as might be used for break-

\* [The K'ri here is בְּחֶרְבֵיהֶם, *with their swords*, but this hardly makes sense. If we read בְּחֶרְבֵיהֶם, *in their desolate place* (comp. Ps. cix. 10), a better sense is obtained.]

ing in pieces and dispersing, is clearly described, and there is little room for doubting that the weapon referred to is the war-club. This is the interpretation put upon the term by the LXX., who render it by the Greek *ρόπαλον*. It is remarkable that of the various nations whose warlike equipments are described by Herodotus, the only two mentioned as bearing the club are nations with whom the Israelites were brought into frequent contact—namely, the Assyrians and the Ethiopians (Herod. vii. 63, 69). Representations of the Ethiopian club are given by Rawlinson (*Herod.*, vol. ii., p. 488), and also (vol. iv., p. 64) of the Assyrian maces, taken from Layard.—S. N.

MAUZZIM (מַעְזִים) occurs (Dan. xi. 38) in connection with the word, מַלְאָכִים, *God*. By some it is retained as the proper name or characteristic epithet of the Deity; so Theodotion, *θεὸν Μαζωεμ*, Vulg. *Deum Maozim*; Arab. 'Aziza (عزیز); Syr. 'Ashisho (ܐܫܝܫܐ). From Julian's Hymn to the Sun we learn that 'Αἰζών was a name of the Tyrian Hercules, Melkarth; derived doubtless from *ἰσ*, *strong*, and applied to him because of his strength (Beyer, *Addit. ad Seldeni De Diis Syr. Syntag.*, p. 275). The majority of interpreters, however, translate the word, and to this the use of it in other parts of the chapter naturally leads. By the usage of the word we are led to regard 'strongholds,' which is the rendering given by the A. V. in ver. 39, as better than 'forces,' the rendering given in ver. 38 (comp. מַעְזֵי אֲרָץ, ver. 19, and מַעְזָה, ver. 10). Aquila renders by *θεὸν λαχύνω*, the LXX. by *ἐθνη λαχύνει* (*Cod. Chisian.*, comp. מַלְאָכִים), in Bugati, *Daniel sec. cod. Syr. Ambros.*, p. 105), though Jerome says (*Comment. in Dan.*, in loc.) that the rendering of the LXX. was 'deum fortissimum.' Maurer's rendering is 'Deus munimentorum,' and with this Hävernack, Gesenius, von Lengerke, and others, accord. Hitzig (*Exeget. Hdb.*, in loc.) suggests, and Fürst (*Heb. Chald. W. B.*, s. v.) seems to approve, that מַעְזִים should be resolved into מַעְזָה = *fortress of the sea*, sc. Tyre; thus making the deity referred to one of the idols of that city. But this seems hardly to accord with what follows, where the idol in question is said to have been formerly unknown to the Jews, whose intercourse with Tyre must have made them acquainted with its idols.

As to the particular idol referred to in this passage, opinions are divided between Melkarth, Mars, Jupiter Olympius, and Jupiter Capitolinus. The weight of authority is in favour of the last. This was a purely Roman deity, and unknown to the people of the East until introduced to their knowledge by Antiochus Epiphanes, who affected everything Roman (Polyb. xxvi. 10), and among other works of a similar kind had purposed to erect a magnificent temple to the Capitoline Jove at Antioch (Liv. xli. 20). Sir Isaac Newton, Mede, Bishop Newton, and Wintle, understand by Mauzzim *protectors* or *guardians*, and suppose the passage to be a prediction of the introduction of the worship of guardian angels by the Romish Antichrist. This is altogether arbitrary. Many of

the Fathers, however, understood the prediction of Antichrist. Thus Theodoret, who retains the reading of Theodotion, and gives the explanation *θεὸν λαχύνει καὶ θανάτῳ*, of the words before us, regards the whole passage. Jerome inclines to the same view. If Antiochus be viewed as the typical Antichrist this reference may be accepted, and the interpretation of the whole section thereby rendered more satisfactory.—W. L. A.

#### MAZZAROTH. [ASTRONOMY.]

MEADOW. The representative in the A. V. of two distinct words, neither of which is accurately rendered by it.

(1.) מַדְבָּר, *achu* (Gen. xli. 2, 18). In the only other place where it occurs (Job viii. 11) it is translated 'flag,' LXX. *βούτομον*, and corresponds to מַדְבָּר, *gōme*, LXX. *πάπυρος*, the paper reed of Egypt, of which Moses's ark was constructed (Exod. ii. 3). We may conclude therefore that it does not signify the place, but the growth of the place; not a 'meadow,' but the rank vegetation of reeds and coarse grass which fringes the borders of a river, especially in warm countries. Gesenius asserts that the word is of Egyptian origin, which as such has been retained in the Greek of the LXX., Gen. xli. 2, 18, *ἐβόσκοντο ἐν τῷ Ἀχέι*, as well as Is. xix. 7, 'the paper reeds by the brooks,' A. V., Heb. *עֲרֹות*, and Ecclus. xl. 16. Jerome (*Es.* xix. 7) says, 'Quum ab eruditis quærerem quid Ἀχέι significaret audiui ab Ægyptiis hoc nomine lingua eorum omne quod in palude virens nascitur significari.' The Vulgate not incorrectly renders it 'locis palustribus' or 'pastu paludis,' Vatablus, 'in carecto.' [ACHU.]

(2.) מַעְרָה (Judg. xx. 33), 'the meadows of Gibeah.' The word with this pointing is a *ἀπαξ λεγόμενον*, and its meaning is doubtful. Gesenius, with the Targum and Kimchi, renders it 'an open plain without wood,' which, however, would hardly be a suitable place for an ambush. The LXX., according to the Vatican MS., leave it untranslated *ἀπὸ Μαραγαβέ*, while the reading adopted by Grabe, from the Cod. Alex., *ἀπὸ δυσμῶν τῆς Γαβαά*, which appears also in the Vulgate, 'ab occidentali urbis parte,' bears witness to another word in the Hebrew text מַעְרָב, 'from the west.'

Others, as Tremellius, Piscator, Buxtorf, translate it 'post denudationem Gibeah,' explaining it of the desertion of the town by its inhabitants (ver. 32), the moment seized by the ambush to rise up and make themselves masters of the place. This is adopted by Bertheau (*Kurzgefasst. Handbd. z. A. T.*) as the only interpretation possible without a change in the pointing or reading, for which there is no warrant. The Peshito, however, by the rendering 'from the cave,' shows that in the text used the word was pointed מַעְרָה. This would suit the locality, the limestone hills of Palestine being full of caverns, but does not accord with the fact that the liers in wait were set 'round about' the city (ver. 29).—E. V.

MEAH (מֵאָה, 'a hundred'; *ἑκατὼ*; *Emath*), one of the towers (מִגְדָּל) in the wall of Jerusalem, as rebuilt after the return from the captivity (Neh. iii. 1). In the Septuagint the word is translated *ἑως*

πύργου τῶν ἑκατὸν, and in the Vulgate it is rendered *ad turrim centum cubitorum* in one passage, but in the other *turrim Emath* (xii. 38). The topography of Jerusalem in the time of Nehemiah is very uncertain. The tower of Meah lay between the *Sheep-gate* and the tower of *Hananeeh*, but the sites of both these are disputed. The most probable theory appears to be that the Sheep-gate adjoined the temple on the north, and that Meah was only a short distance from it, thus occupying the position on which the great fortress of Antonia was afterwards built. Those who adopt this view, however, are not agreed as to the size of the temple-courts, and consequently they differ as to the real site of Meah (cf. Lewin, p. 64; Thrupp, p. 124). Barclay places Meah east of the temple, on the very brink of the Kidron (*City of the Great King*, 152). Fergusson again would identify it with the tower rebuilt or repaired by Herod, and called *Mariamne*, and would locate it near the north-western angle of the ancient city (*Jerusalem*, p. 59). The writer of this article believes that the whole of the wall which now bounds the *Haram* on the east is in part ancient, and stands on ancient foundations; that the northern section of it formed the eastern rampart of the fortress of Antonia, and that the tower of Meah probably stood on those colossal foundations which are now seen at the north-eastern angle (*Handbook*, p. 128; Robinson, *B. R.*, i. 292; iii. 230, *seq.*)—J. L. P.

MEALS. [FOOD; HOSPITALITY.]

MEARAH (מַעְרָה, 'a cave'=Arab. مغارة; *Maara*), a place only mentioned in Josh. xiii. 4. The historian, in describing the land which at that time still remained unsubdued, mentions as one district, 'Mearah which belongs to the Sidonians' (ומערה אשר לצידונים). The LXX. has in both MSS. simply of Σιδωνιῶν, 'the Sidonians'; and the Chaldee and Syriac translate the word *cave*, and are followed by Keil and others (on Josh. *ad loc.*; *Critici Sac.*, *ad loc.*) The scope of the passage shows that some place—either a city or district—must be meant. About half-way between Tyre and Sidon, close to the shore, are the ruins of an ancient town; and in the neighbouring cliffs are large numbers of caves and grottoes hewn in the rock, and formerly used as tombs. Dr. Robinson suggested that this may be 'Mearah of the Sidonians' (ii. 474). The ruins are now called *Adlân*; but perhaps take that name from the village on the mountain-side. William of Tyre mentions a cave in the territory of Sidon which was fortified and occupied by the Crusaders. It may possibly have been the same place (*Hist.* xix. 11; cf. Rosenmüller, *Bib. Geog.* ii.)—J. L. P.

MEASURES. [WEIGHTS AND MEASURES.]

MEAT. [FLESH.]

MEAT-OFFERING. [OFFERING.]

MEBUNNAI. [HUSHATHITE.]

MEDAD. [ELDAD.]

MEDAN (מִדְיָן, 'strife'; *Madân*, and *Madâm*; *Madan*), the third son of Abraham by Keturah (Gen. xxv. 2; 1 Chron. i. 32). All the sons of Keturah appear to have become the heads of Arab tribes, and some of them, as Jokshan and Midian,

were celebrated in after history. Medan, however, is not again mentioned; for though its regular plural *Medanim* (מִדְיָנִים, rendered in A. V. 'Midianites') occurs in Gen. xxxvii. 36, yet it is manifestly identical with the *Midyanim* (מִדְיָנִים) of verse 28. Some have thought that perhaps the two families were so closely allied, both by descent and abode, that they came to be considered as one, and were called by both names (Kalisch on Gen., *ad loc.*; cf. Delitzsch and Keil). Forster believes that the descendants of Medan and Midian remained distinct; and that the former may be identified with an Arab nomad tribe called *Medan* or *Madan*. Some settlements of this tribe were discovered by Gen. Chesney (*Euphrates Expedition*) on the banks of the river Euphrates; and there also he found a village called *Madan*. There is, besides, a place in the interior of the Hejaz called *Maadan*, mentioned by D'Anville (*Géographie Ancienne*) and Burckhardt (*Travels in Arabia*, 457), which Forster supposes to be named from the same tribe. The latter place adjoins the region of Midian on the east, and may perhaps, if the name can be depended on, be identical with *Medan*.

D'Anville, however, writes the name *Maadan*, and interprets it as derived from 'mines.' If this be so, then the word is radically different from the

Hebrew (מִדְיָן from מִדְיָן). Burckhardt spells

it *Meddyen* (مدائن pl. of مَدِينَة, 'a city'; l. c.), and gives a different account of the origin of the name. On such uncertain data we cannot ground any trustworthy identification (see, however, Forster, *Geog. of Arabia*, i. 336).—J. L. P.

MEDE, JOSEPH, was born October 1586 in Berden in Essex, and died at Cambridge 1st October 1638. Meeting with Bellarmine's Hebrew Grammar, he was attracted to the study of Hebrew while a boy at school. In 1602 he entered Christ's College, Cambridge, where subsequently he was elected fellow. In 1626 he declined the provostship of Trinity College, Dublin, to which he was recommended by primate Usher. He published little; but after his death his writings were collected and published. The best edition is that by Dr. Worthington, fol., 1672. Although now chiefly known by his labours on the Apocalypse, his *Discourses on several texts of Scripture* contains much of value bearing on the explanation of many passages of the Bible. In his *Clavis Apocalyptica*, 1627, and *Commentarius in Apocal.*, 1632, works which still are of reputation, he maintained the continuous historical interpretation. His other writings on Prophetical Scriptures are: *A Paraphrase and Exposition of the Prophecy of S. Peter concerning the Day of Christ's Second Coming*; *The Apostasy of the Latter Times*; and *Three Treatises upon some Obscure Passages in Daniel*. He also wrote *The Christian Sacrifice*, and some tracts *On Churches, and the Worship of God therein*, but any notice of these does not come within the scope of the present work.—H. C. G.

MEDEBA (מִידְבָּה, 'water of rest;' in Num. xxi. 30, *Mwdb*; *Maïdabân*; *Mhdaßá*; in Josh. xiii. 16 the LXX. omits the word; and in Is. xv. 2, it

reads *Μωαβιτιδος*; *Medaba*), a city of Moab, first mentioned in the short ode describing the conquest of that country by Sihon the Amorite (Num. xxi. 27-30). From Josh. xiii. 9 we learn that it gave its name to a section of the high plain [MISHOR] of Moab, south of Heshbon (cf. ver. 16). In the days of King David it appears to have passed into possession of the Ammonites, for there they concentrated their forces and allies to resist an attack which their own insolence and folly led them to anticipate. They were totally defeated by Joab, David's general; the allies were dispersed; but the Ammonites found refuge in Medeba (1 Chron. xix. 1-15). In the prophetic curse pronounced upon Moab by Isaiah, Medeba is mentioned as one of its chief cities (xv. 2). The Moabites had at that time regained possession of their ancient country [MOAB]. It is somewhat remarkable that Medeba is not found in the list of cities assigned to Reuben, though it was evidently within the borders of that tribe; nor have we any proof that it was ever possessed by the Israelites. The whole plain of Medeba was occupied by the Reubenites; but the city itself was perhaps strongly fortified, and suffered to remain, like many in western Palestine, in the hands of its old inhabitants (Josh. xiii. 9, 16-20). It is true we find it stated (ver. 21) that 'all the cities of the plain' were given by Moses to Reuben; but had Medeba been included it would in all probability have been named with the other principal cities. The city continued to be an important fortress during the rule of the Maccabees, and its people succeeded in capturing John, the brother of Jonathan the Jewish prince (1 Maccab. ix. 35-37), for which treacherous act they were afterwards made to suffer (Joseph. *Antiq.* xiii. 1. 4; 9. 1). Medeba (written *Μηδύβα* and *Μηδάβα*) is mentioned by Ptolemy as a town of Arabia Petraea (v. 17), between Bostra and Petra (Reland, p. 666); and the name occurs also among the episcopal cities of the province of Arabia (Reland, p. 217). It was known to Eusebius and Jerome, for they describe Cariatha as a village of Christians west of Medaba (*Onomast.*, s. v. *Cariatha*); and they state that 'Medaba is to this day a city of Arabia near Heshbon, retaining its ancient name' (*Onomast.*, s. v.).

The ruins of Medeba still exist and bear their old name, under the Arabic form *Mādeba*. They lie about four miles south-east of Heshbon, with which they are connected by an ancient paved road. The city occupied a low hill a mile and a half in circumference. The whole site is covered with ruins, not a solitary building remains standing. The only objects of interest are a large cistern, and the remains of a massive temple of the Doric order. The plain around it, though now desolate, is fertile, and thickly dotted with ancient cities (Burckhardt, *Syria*, p. 366; Irby and Mangles, p. 471; *Handbook*, p. 303; Reland, *Pal.* 893).—J. L. P.

MEDIA and MEDES (מִדְיָן). The same Hebrew word is used in the O. T. as the name of a son of Japhet, of the nation which he founded, and of their country. Hence we find it rendered in four different ways in our A. V. In most cases these renderings are arbitrary, and tend to confuse rather than explain—(1.) *Madai*, the proper rendering (Gen. x. 2; *Maḏol*; Alex. *Maḏal*; *Madai*; 1 Chron. i. 5, *Maḏaḏu*); (2.) *Medes* (*Μήδοι*, 2 Kings xvii. 6; xviii. 11; Esther i. 19; Is. xiii. 17;

Jer. xxv. 25; Dan. ix. 1; v. 28; *Μήδεα*, Ezra i. 22; *Medoi*); (3.) *Media* (*Μήδοι*, *Medoi*, Esther i. 3; x. 2; Is. xxi. 2; Dan. viii. 20); (4.) *Mede*, only in Dan. xi. 1.

*Early History.*—In Gen. x. 2 we are told that Madai was the third son of Japhet (cf. 1 Chron. i. 5). The names in that invaluable ethnological summary were not merely those of individuals but of the nations which descended from them; for the historian says, 'By these were the isles of the Gentiles divided in their lands, every one after his tongue, after their families, in their nations' (ver. 5). For a period of fifteen centuries the Medes are not again mentioned in Scripture. Then Isaiah, in pronouncing the prophetic doom of Babylon, says, 'I will stir up the Medes against them' (xiii. 17). This prophecy was uttered about B.C. 720. There is no direct evidence connecting Madai the son of Japhet, and the nation he founded, with the Medes (*Madai*) of whom Isaiah speaks; but the names are identical in Hebrew; and the genealogical tables of Genesis appear to have been intended to show the origin of those nations which afterwards bore an important part in the history of God's people.

Berosus, the Babylonian priest and historian, states that at a very remote period (cir. B.C. 2000) the Medes ruled in Babylon (Eusebius, *Chron.* i. 4). Though we may not be able to rely upon either his dates or his facts, yet we may infer from his words and references, that the Medes were one of the great primeval races which established themselves in central Asia. Herodotus gives a very graphic and circumstantial account of the early history of the Medes, and the establishment of the empire: 'The Medes were called anciently by all people *Arians*; but when Medæa, the Colchian, came to them from Athens, they changed their name. Such is the account which they themselves give' (vii. 62). This is opposed to what appears to be the opinion of the sacred writers; but there can be no doubt that during the time of ascendancy of Greek arms, literature, and art, eastern nations were all anxious to claim some sort of connection with Greece, and this may account for Herodotus' story (cf. Rawlinson's *Herod.*, iv. 61, 1st ed.)

The Medes appear, however, to have been a branch of the Arian family, who probably had their primitive seat on the east bank of the Indus, and thence sent their colonies eastward into India, and westward to Media, Persia, Greece, etc. (Müller, *Science of Language*). It has been supposed by some that there was a Scythic tribe of Madai who conquered and held Babylonia long previous to the irruption of the Arian family, and that it is to them Berosus alludes. There are no good grounds for this belief; and it is worthy of note as tending to disprove the theory, that the name 'Mede' does not appear upon the Assyrian monuments before the year B.C. 880 (Rawlinson's *Commentary on Assyrian Inscriptions*). To that date is assigned the inscription on the famous black obelisk, discovered by Layard at Nimrūd, which contains a record of the victories of Temen-bar the Assyrian monarch. In the twenty-fourth year of his reign he invaded the territory of the Medes (Vaux, *Nineveh and Persepolis*, p. 263, where a translation of the inscription is given). At this time the Medes were independent, occupying an extensive country with many cities, and divided, like the Persians, into a number of tribes having

each a chief. This remarkable monument thus fixes the date of the first conquest of the Medes by the Assyrians; but it does not determine the date of the settlement of the former in Media. Sir H. Rawlinson thinks that the way in which the nations are grouped in that inscription seems to indicate that the Medes when attacked were in the act of migrating (*Commentary*). This, however, is very uncertain.

The invasion of Temen-bar was probably more like an Arab raid than a military conquest. His successors on the Assyrian throne were almost incessantly engaged in hostilities with the Medes (Rawlinson's *Herodot.*, i. 404); and Sargon appears to have been the first who attempted to occupy the country with regular garrisons. He built cities in Media, and reduced the people to tribute (Rawlinson's *Herod.*, i. c.; and *Comment.*) Sargon was that king of Assyria 'who took Samaria, and carried Israel captive,' and placed some of them 'in the cities of the Medes' (2 Kings xvii. 6; cf. xviii. 17; Is. xx. 1). The truth of Scripture history is here strongly confirmed by monuments recently disintegrated from the ruins of Sargon's palace at Khorsabad. On its walls are inscribed the records of his conquests, in which both Media and Judæa are mentioned—the former as on the eastern, and the latter on the western limits of his vast empire (Rawlinson's *Comment.*, p. 61; Rawlinson's *Herodot.*, i., p. 405).

Media was not yet a kingdom. It was occupied by a number of petty chiefs, each ruling his own tribe. From these chiefs the Assyrian monarchs exacted tribute. The tribes increased in numbers, influence, and power. They held a country naturally strong. The Assyrian yoke was galling to their free spirits, and probably this first induced them to unite their forces, elect a common leader, and assert their independence. The exact date of this revolution cannot now be fixed, but the fact of it is certain. Herodotus' account of it is as follows:—'The Assyrians had held the empire of Upper Asia for a space of 520 years, when the Medes set the example of revolt. They took arms for the recovery of their freedom, and fought a battle with the Assyrians, in which they behaved with such gallantry as to shake off the yoke of servitude' (i. 95). He then tells how the empire was formed by a certain Deioces, who, in consequence of his wisdom and justice, was elected monarch by the six tribes composing the nation (i. 96-101). Deioces built the great city of Ecbatana; and after a prosperous reign of fifty-three years left the throne to his son Phraortes. Phraortes conquered Persia, vastly enlarged the Median empire, and reigned twenty-two years. He was succeeded by his son Cyaxeres. During his reign, while engaged in a war against Nineveh, Media was overrun by a horde of Scythians, who held a great part of Western Asia for twenty-eight years. The Scythian leaders were at length treacherously murdered by Cyaxeres, and the Median monarchy re-established. He ruled forty years, and then left the kingdom to his son Astyages, whose daughter Mandane was married to a Persian noble, and became mother of the great Cyrus. According to this narrative, the Median monarchy was established about B.C. 708 (Rawlinson's *Herodot.*, i. 407). There is good reason to believe, however, that the early portion of the narrative is apocryphal, and that Cyaxeres was the real founder of the

Median empire. He is so represented by most ancient historians (Diodorus Sic., ii. 32; Æschylus, *Persæ*, 761; Grote's *Hist. of Greece*, vol. iii.) The Assyrian monumental annals are almost complete down to the reign of the son of Eserhadden (B.C. 640), and they contain no mention of any Median irruptions; on the contrary, they represent the Median chiefs as giving tribute to Eserhadden (Rawlinson's *Herodot.*, i. 405, 408).

Ctesias, as quoted by Diodorus Siculus (ii. 32), assigns to the Median monarchy a still older date than Herodotus. He gives a list of eight kings who ruled before Astyages, for an aggregate period of 282 years, which would fix the establishment of the monarchy about B.C. 875. The names of the kings are different from those of Herodotus; and it is vain to attempt to reconcile the narratives (see, however, Hales' *Analysis of Chronology*, iii. 84; Heeren, *Manual of Ancient Hist.*) Rawlinson has clearly shown that Ctesias' narrative is fabulous (*Herodot.*, i. 406).

*The Median Empire.*—From the foregoing notices, we may conclude that the Medes migrated from beyond the Indus to the country on the southern shores of the Caspian Sea not later than the 9th century B.C.; that they settled there as a number of distinct tribes (probably six, as Herodotus states, *l. c.*), and so remained during a period of three or four centuries; that some Scythian tribes either occupied the country with them or invaded it at a later date; and that (about B.C. 633) Cyaxeres rose suddenly to power, united the Medes under his sway, drove out the Scythians, and established the monarchy. Before this time the Medes are only once mentioned in Scripture, and then, as has been seen, their country was subject to Assyria (2 Kings xvii. 6).

A few years after the establishment of his empire, Cyaxeres made a league with the Babylonian monarch, and invaded Assyria. Nineveh was captured and destroyed, B.C. 625. The incidents of the siege and capture, as related by Diodorus Siculus (ii. 27, 28; Nahum i. 8; ii. 5, 6; iii. 13, 14), contain a remarkable fulfilment of the prophecies uttered by Nahum nearly a century previously; and recent excavations by Layard illustrate both (*Nineveh and Babylon*, pp. 71, 103, etc. See art. NINEVEH). The Assyrian monarchy was then overthrown (Rawlinson, *Ancient Monarchies*, ii. 521).

*Geography of Media.*—The extent and boundaries of the kingdom of Media as first established by Cyaxeres cannot now be accurately determined. The country appears to have been divided from the earliest times into two provinces—(1.) *Upper Media*, afterwards called *Atropatene*, from Atropates, the Persian satrap who gained its independence in the time of Alexander the Great (Arrian, *Exped. Alex.*, iii. 8; vi. 29; Strabo, xi. p. 523). It was bounded on the north by the river Cyrus; on the east by the Caspian Sea; and on the west by Armenia. It thus embraced the lake and fertile plain of Urumiah, the *Spautia* of Strabo (*l. c.*) The greater part of it is mountainous, and towards the north the mountain-ranges are wild, bleak, and barren, but are intersected by spacious upland plains and fertile valleys, which produce abundance of grain where cultivated. The cold during winter is intense. The people lived principally on fruits and game. Its chief city was Ecbatana, which, according to Sir H. Rawlinson, was the

ancient capital of the Medes to which Herodotus refers. It was situated in a plain encompassed by mountains, south-east of Urumiah, and has been identified with the modern *Tukht-i-Suleiman* (Rawlinson, in *Journ. of R. G. S.*, vol. x. pt. 1). It is supposed to have been the *Canzaca* of the Byzantine historians (Procopius, *Bell. Pers.*, ii.), and the *Gazaca* of Ammianus (ii. 84; cf. Strabo, xi., p. 523; Ptolemy vi. 18), which is frequently mentioned by classic historians as the capital of Atropatene. The mountains of this province are connected with the ranges of Zagros and Taurus. The modern province of Azerbaijan corresponds pretty nearly in extent to Atropatene. The present capital is Tabriz, which is a summer residence of the kings of Persia.

(2.) *Lower Media*, or *Media Magna*, lay to the south of the former. It was bounded on the west by the Zagros mountains, which separated it from Assyria and Babylonia; on the south by Susiana and Persia; and on the east by the Great Salt Desert and the Caspian Gates, beyond which lay Parthia (Strabo, *l. c.*; Pliny, vi. 14). This province consists of a number of high plains, varying from 2000 to 4000 feet above the sea, and long rich valleys winding through the adjoining mountain-chains. The country in general is fertile, the air cool, water abundant, and pasture luxuriant. It was famous for its breed of horses, called *Nisaeans*, from a plain in which they were chiefly reared (Herod. vii. 40; Ammian. Mar. xxiii. 6; Strabo, xi., p. 524). Media Magna comprehended the modern provinces of Irak Ajem and Ardelan, with part of Kurdistan. Its capital was *Ecbatana* (*Ἐκβάτανα*; but more properly *Ἀγβάτανα*), situated in a plain twelve stadia from Mount Orontes. It was a city of great strength and beauty, though the extravagant descriptions given of it by Herodotus and some other ancient writers are to a large extent fabulous [see ACHMETHA]. It has been satisfactorily identified with the modern *Hamadân*.

Professor Rawlinson estimates the entire length of the kingdom of Media at 550 miles, and its breadth at from 250 to 300 (Herodotus, vol. i., p. 574). Southern Ecbatana, or Achmetha, as it is called in Scripture (Ezra vi. 2), was the capital of the kingdom.

*Enlargement of the Empire.*—The conquest of Assyria produced a great change in the Median Empire, and on the whole of Western Asia. Babylon then regained its independence, and formed a close alliance with Media. The Israelites, who had been led captive by the Assyrians, were placed under new rulers. Cyaxeres led his victorious armies into Syria and Asia Minor (Herod., i. 103). When Pharaoh-necho marched to the banks of the Euphrates against Babylon, the Babylonians were aided by the Medes (Joseph. *Antiq.* x. 5. 1). It was in attempting to oppose this expedition of the Egyptian monarch that King Josiah was slain at Megiddo (Jer. xli. 2; 2 Chron. xxxv. 20; 2 Kings xxiii. 29). We also learn that Nebuchadnezzar was aided by the Medes in the conquest of the Jews and capture of Jerusalem (Eusebius, *Pr. Evang.*; cf. 2 Kings xxiv. 1; 2 Chron. xxxvi. 5). Media was now the most powerful monarchy in Western Asia. It ruled a country extending from the borders of Parthia to the banks of the Halys in Asia Minor, and from the plains of Babylonia to the Caucasus.

Its rise was rapid, and appears to have been chiefly owing to the genius of one man—Cyaxeres. The power of Media was short-lived. With Cyaxeres it rose, and with him it passed away. At his death he left his throne to Astyages, of whom little is known except the stories told by Herodotus (i. 110-129) and Nicolaus of Damascus, who probably borrowed from Ctesias; and on these little reliance can be placed. They are founded on fact; and we may infer from them that during the reign of Astyages a war broke out between the Medes and Persians, in which the latter were victorious, and Cyrus, the Persian king, who was himself closely related to Astyages, united the two nations under one sceptre (B. C. 558). The life of Astyages was spared, and even the title of king continued with him.

It has been conjectured, and is probably true, that Astyages and 'Darius the Mede,' so often mentioned by Daniel, were only different names of the same person. 'If the identification be regarded as sufficiently established, we must believe that Cyrus, when he conquered Astyages, did not deprive him of the name or state of king, but left him during his life the royal title, contenting himself with the real possession of the chief power. This would be the more likely if Astyages were, as Herodotus maintains, his grandfather. When the combined armies of Persia and Media captured Babylon, Astyages, whose real name may possibly have been Darius, might appear to the Jews to be the actual king of Babylon—more especially if he was left there to exercise the kingly office, while Cyrus pursued his career of conquest. At his death Cyrus may have taken openly the royal title and honours, and so have come to be recognised as king by the Jews' (Rawlinson, *Herodotus*, i. 417; cf. Joseph. *Antiq.* x. 11. 2, *seq.*; Dan. v. 31; vi. 1; ix. 1; see art. DARIUS).

*Overthrow of the Empire.*—Astyages (or Darius) was the last king of Media. When he was conquered by Cyrus, the Median monarchy virtually ceased to exist, and Media thenceforth became a province of Persia. The close connection of these two great nations, and the position which the Medes continued to occupy in the Persian court and kingdom, have created much difficulty and controversy among historians. They cannot be accounted for by any alliance, however intimate, between the royal families. The true solution appears to be that the two nations were branches of the same great Arian family (Herodot. vii. 62; Strabo, xv. p. 720). They were thus identical in origin, in language, in religion, in manners and customs, and in dress (Rawlinson's *Herodot.*, i. 670-673; *Commentary*). Separated for a long period by geographical position, and by the state of neighbouring nations, they were, by the accidents of war, brought together again, and coalesced as one people. In this way we can account for the almost universal occurrence of the two names in the records of Persian conquests, laws, and ordinary historic events. In the book of Esther, written half a century after the overthrow of the Median Empire, the phrase 'Persia and Media' occurs five times. Daniel, interpreting the miraculous inscription on the palace-wall just before the destruction of Babylon, says, 'The kingdom is given to the Medes and Persians' (ver. 28); and he repeatedly mentions 'the laws of the Medes and Persians' (vi. 8, 12, 15). So also in classic authors

the names are used as convertible (Herodot. i. 163; vi. 64; Thucyd. i. 14, 23). Upon this subject Prof. Rawlinson has well said, 'We see how natural it was that there should be an intimate union, if not an absolute fusion, of two peoples so nearly allied; how it was likely that the name of either should apply to both; how they would have one law and one dress, as well as one religion and one language, and would stand almost, if not quite, upon a par, at the head of the other nations, who in language, religion, and descent were aliens' (Herodot., i. p. 403).

The foregoing facts also illustrate the predictions of Isaiah (xlii. 17) and Jeremiah (li. 11, 28), which represent the Medes as the chief agents in the overthrow of Babylon. They acted there in conjunction with the Persians, and apparently under the immediate command of their own monarch.

The subsequent history of Media is unimportant. It held the first rank among the Persian satrapies; but this did not satisfy the proud spirit of the Medes. In the third year of Darius Hystaspes they joined the Assyrians and Armenians in an attempt to throw off the Persian yoke. They even elected a king. Darius went against them in person, defeated their army, captured the usurper at the city of Rhages, and put him to death at Ecbatana (Herodot. i. 130; Rawlinson, *Behist. Inscript.* i.; Grote, *Hist. of Greece*, iv. 304). Again they rebelled during the reign of Darius Nothus, but were easily put down (Xen., *Hellen.* i. 2, 9). Media, with the rest of the Persian empire, fell under the sway of Alexander the Great. At his death the northern province was erected by the satrap *Atropates* into an independent state, and called *Atropatene*. The southern province, *Media Magna*, was attached with Babylon to the kingdom of the Seleucidæ. The whole country eventually passed over to the Parthian monarchy (Strabo, xvi. p. 745). It is now included in the dominions of the Shah of Persia.

*Character, Manners and Customs.*—The ancient Medes were a warlike people, particularly celebrated, as Herodotus (vii. 61) and Strabo (xi. p. 525) inform us, for their skill in archery. Xenophon says their bows were three ells long. This illustrates the language of Isaiah describing the attack of the Medes on Babylon: 'Their bows also shall dash the young men to pieces' (xiii. 18). Their cavalry was also excellent, their horses being fleet and strong, and their men skilful riders. It is doubtless in reference to this fact that Jeremiah, speaking of the overthrow of Babylon, says, 'They (the enemies) shall hold the bow and the lance . . . and they shall ride upon horses' (li. 42). Strabo states that the province of Atropatene alone was able to bring into the field an army of 10,000 horse (xi. p. 523). Xenophon affirms that the Medes did not fight for plunder. Military glory was their great ambition, and they would never permit gold or silver to turn them aside from their object. How striking do the words of Isaiah thus appear! 'Behold I will stir up the Medes against them, which shall not regard silver, and as for gold, they shall not delight in it' (xlii. 18). The wealth of Babylon could not save it, for the Medes could not be bought off (Rosenmüller, *Bib. Geog.*, i. 176). The conquests of the Medes, and their intercourse with other nations, produced a marked change upon their character. They became fond of dress and

display; those settled in cities engaged in commerce, and lost their hardy habits and bravery. The splendour of the Median robes became proverbial, and their princes and nobles ruled the fashion in the East. They were imitated by the Persian court (Herodot. vi. 112; Xen., *Cyrop.* i. 3. 2; Strabo, xi. p. 525). The Medes thus gave way to luxury and its consequent vices, and they soon became an easy prey to their more warlike neighbours. The northern mountaineers retained their primitive habits, and consequently their independence for a much longer period.

*Religion.*—The ancient religion of the Medes we learn from the *Zend* books. It was identical with that of the Persians. It mainly consisted of the adoration of two great beings—the principle of *Good* and the principle of *Evil*. They also connected with this the worship of the heavenly bodies, especially the sun, moon, and planets. To this they added at a later period the worship of the elements, and of *fire* as the chief (Herodot. i. 131; iii. 16). Their priesthood then constituted a distinct class, called *Magi*, who laid claim to mysterious and miraculous power—consulting the stars, interpreting dreams, explaining visions, and prognosticating the future (Rawlinson's *Herodot.*, i. 424, seq.).

The ancient authorities for the history and geography of Media and the Medes are *Herodotus*, especially when read with the learned and valuable notes of Rawlinson; *Strabo*, *Xenophon*, *Ptolemy*, *Diodorus Siculus*, *Arrian*, and *Josephus*. The monuments and inscriptions discovered, and in part deciphered, within the last few years, add vastly to our stores of information. The various works and articles of Sir H. Rawlinson referred to in the body of this article serve to set forth and illustrate their contents. Among modern writers the student may consult *Bochart*, *Cellarius*, *Ritter*, *Grote's History of Greece*, and Prof. Rawlinson's *Ancient Monarchies*. For the present state of the country, Sir K. Porter's *Travels*; Kinnier's *Persian Empire*; Layard's *Nineveh and Babylon*; Sir H. Rawlinson's articles in the *Journal of R. G. S.*, vols. ix. and x.; and the valuable Dissertations in Rawlinson's *Herodotus*, vol. i.—J. L. P.

*MEDIATOR* (Μεσίτης, 'mediator') is a word peculiar to the Scriptures (see Beza, *Annot. in Gr. Test.*), and is used to signify an intermedium, or ambassador, one who stands as the channel of communication between two contracting parties. Some commentators think that the Apostle Paul, in Gal. iii. 19, calls Moses *mediator*, because he conveyed the expression of God's will to the people, and reported to God their wants, wishes, and determinations. In reference to this passage of Scripture, Basil (*De Spiritu Sancto*, cap. xiv.) says, 'Mosen figuram representasse quando inter Deum et populum intermedium extiterit.' Many ancient and modern divines, however, are of opinion that Christ himself, and not Moses, is here meant by the inspired apostle, and this view would seem to be confirmed by comparing Deut. xxxiii. 2 with Acts vii. 38-52. Christ it was who, surrounded by angelic spirits, communicated with Moses on Mount Sinai. On this point the words of the learned and pious Chrysostom, on Gal. iii., are very express: 'Here,' says he, 'Paul calls Christ Mediator, declaring thereby that he existed before the law, and that by him the law was revealed.' This application of the passage will be the more evident

if we consider the scope of the apostle's argument, which evidently is to point out the dignity of the law. How could he present a clearer demonstration of this than by showing that it was the second person of the ever-blessed Trinity who stood forth on the mount to communicate between God the Father and his creature man! Moreover, to contradistinguish Christ's mediation from that of Moses, the former is emphatically styled *μεσίτης κρείττονος διαθήκης* (Heb. viii. 6).

Christ is called Mediator by virtue of the reconciliation he has effected between a justly offended God and his rebellious creature man (see Grotius, *De Satisfactione Christi*, cap. viii.) In this sense of the term Moses was, on many occasions, an eminent type of Christ. The latter, however, was not *Mediator* merely by reason of his coming between God and his creatures, as certain heretics would affirm (see Cyril Alex. *Dial. I. de Sancta Trinitate*, p. 410); but because he appeased his wrath, and made reconciliation for iniquity. 'Christ is the Mediator,' observes Theophylact, commenting on Gal. iii., 'of two, *i.e.*, of God and man. He exercises this office between both by making peace, and putting a stop to that spiritual war which man wages against God. To accomplish this he assumed our nature, joining in a marvellous manner the human, by reason of sin unfriendly, to the divine nature.' 'Hence,' he adds, 'he made reconciliation.' Occumenius expresses similar sentiments on the same passage of Scripture. Again, Cyril, in his work before quoted, remarks: 'He is esteemed mediator because the divine and human nature being disjointed by sin, he has shown them united in his own person; and in this manner he reunites us to God the Father.'—J. W. D.

# MEDICINE. [PHYSIC.]

MEGIDDO (מֶגִּדּוֹ, and in Zech. xii. 11 מְגִדּוֹ; Μαγεδδών and Μαγεδδών; Alex. Μαγεδδών; *Mageddo*), an ancient royal city of the Canaanites enumerated among those whose kings were slain by Joshua (Josh. xii. 21). Though within the allotted territory of Issachar, it, with several other cities in the plain, was assigned to Manasseh (xvii. 11). This arrangement was made partly to supplement the mountain-territory of Manasseh and partly to give those strongly-fortified places to a tribe who, from their courage and their alliance with Ephraim, might be able to drive out the old inhabitants. The task, however, proved too great even for the warlike Manassites; but when the power of Israel was fully established, the Canaanites were reduced to slavery (xvii. 13-18; Judg. i. 27, 28).

Megiddo was situated on the southern border of the great plain which intersects Palestine, extending across it from the Mediterranean to the Jordan, and having on its southern side the ranges of Carmel and Samaria, and on its northern Tabor and the hills of Galilee. The plain is usually called *Esdraelon*, the Greek form of 'Jezreel'; but it is also called the '*Valley of Megiddo*' (2 Chron. xxxv. 22). It was the battle-field of Palestine, where the Israelites gained some of their most glorious victories, and sustained some of their most terrible defeats. From two of these battles Megiddo has derived its greatest celebrity. The first was the victory of Barak. Jabin, king of Hazor, successor of the prince who had organized the northern con-

federation against Joshua, was now the oppressor of Israel, and Sisera was his general. The army of Jabin, with its 900 chariots of iron, was led down into the great plain, and drawn up at Megiddo, in a position to afford the best ground for the terrible war-chariots. With much difficulty Deborah the prophetess induced Barak to collect the warriors of the northern tribes. They assembled on Tabor. Deborah gave the signal, and the Israelites marched down to attack the enemy, full of hope and enthusiasm. At this moment a hail-storm from the east burst over the plain, and drove full in the faces of the advancing Canaanites (Joseph. *Antiq.* v. 4). 'The stars in their courses fought against Sisera.' His army was thrown into confusion. The waters of the Kishon rose rapidly, the low plain became a morass; chariots, horses, soldiers, all together were engulfed (Judg. iv. and v.) The writer visited Megiddo and traversed its plain in the spring of 1857, after a heavy fall of rain, and found the Kishon greatly swollen, its banks quagmires, and all the ordinary roads impassable.

Six centuries later Megiddo saw another sight, and heard, instead of a song of triumph, a funeral wail from the vanquished host of Israel (Zech. xii. 11). Pharaoh-necho was on his march against the king of Assyria. He passed up the plains of Philistia and Sharon, and king Josiah foolishly attempted to stop him while defiling through the glens of Carmel into the plain of Megiddo. He was defeated, and as he fled the Egyptian archers shot him in his chariot. He was taken to Jerusalem, but appears to have died on the road (2 Kings xxiii. 29; 2 Chron. xxxv. 20-24). The whole land mourned for the good king so bitterly that the mourning became proverbial; and Zechariah says, 'In that day there shall be a great mourning, as the mourning of Hadad-rimmon in the valley of Megiddon' (xii. 11).

Megiddo, with some neighbouring cities on the great plain, was assigned to one of Solomon's twelve purveyors (1 Kings iv. 12); and it was one of the cities which that wise monarch fortified for the protection of his kingdom (ix. 15). Holding Megiddo, he was able to command Esdraelon and the leading road from Egypt through Palestine. After the division of the kingdom, Megiddo appears to have been retained in the hands of Judah, for to it Ahaziah fled when wounded by Jehu at Jezreel, and he died there (2 Kings ix. 17); and there, as has been seen, Josiah took his stand to resist the army of Pharaoh-necho.

The name of Megiddo does not again appear in history. Herodotus mentions a *Magdolis*, where Pharaoh-necho conquered the Syrians in a pitched battle; by which it is probable he means Megiddo (ii. 159). The city was evidently unknown to Eusebius and Jerome, for though it is found in the *Onomasticon* (s. v. *Majeddo*), there is no reference to its site or its existing state. These writers, however, frequently mention a city called *Legio*, which stood in that part of the plain where Megiddo must have been situated, and was the capital of a large district (*Onomast.*, s. v. *Nazareth*, *Camon*, *Thaanach*, etc.) *Legio* is a Roman name, and was doubtless given to an old city. Its position in the plain, and its proximity to Taanach (four miles)—with which Megiddo is almost uniformly joined in Scripture—lead to the belief that *Legio* was just the Roman name of the Hebrew Megiddo. This appears to have been first suggested by R. Parchi in

the 14th century (*Benj. of Tud.* by Asher, ii. 433); and it has since been maintained by Robinson (*B. R.*, ii. 328, *seq.*), Van de Velde (*Memoir*, 333), and others.

The ruins of Legio are now called *El-Lejjûn*. They stand on both banks of a glen which cuts through a low spur of Carmel, and consist of some heavy foundations and heaps of hewn stones among corn-fields, intermixed with columns of granite, marble, and limestone. The traces of a large *khan*, which was still habitable in Maundrell's day (*Early Travels*, Bohn, p. 430), are visible. Along the bottom of the glen winds a stream whose waters drive two or three mills; and through the glen passes the ancient road to Sharon, Philistia, and Egypt. About three quarters of a mile north of the ruins is a large truncated tell, called *Till el-Mutsellim*, 'The Governor's Hill.' It is a most commanding site, affording a view of the whole plain and of the ancient cities of Shunem, Jezreel, and Taanach. The writer felt convinced, when he visited it, that upon this tell stood the stronghold of Megiddo. It has for ages been under cultivation, but some few faint traces of old buildings may be seen, and the sides of the hill have evidently been scarped for the purposes of defence. Not far from the base of the tell flows, in its deep bed, the stream which passes Lejjûn. Here are doubtless 'the waters of Megiddo,' and on the level plain beyond the glen, extending away to the tell on which lie the remains of Taanach, was fought the great battle between Barak and Sisera. And when one stands on this ancient site he can understand the appropriateness of the geographical allusions in Deborah's war-song, 'The kings came and fought; then fought the kings of Canaan in Taanach by the waters of Megiddo' (*Judg.* v. 19).

Von Raumer (*Paläst.* 402, 3d ed.) has endeavoured to identify Lejjûn with *Maximianopolis*, as well as Legio. This seems very improbable. It would imply that two Roman names were given at the same time to the same ancient city (see Robinson, *B. R.*, iii. 118; and in *Bibliotheca Sacra*, February 1844). Jerome identifies Maximianopolis with Hadadrimmon (on *Zech.* xii. 11). Consequently, if Raumer's theory be admitted, this ancient site had no less than four names, two Hebrew and two Roman. Van de Velde may be correct in stating that Hadadrimmon is now represented by the hamlet of *Rummâneh* at the foot of the hills four miles south of Lejjûn (*Travels*, i. 355; *Memoir*, p. 333).

It may be that this 'plain of Meggido'—this great battle-field of Israel—was before the mind of the Apostle John when he figuratively described the final conflict between good and evil, who were gathered to a place 'called in the Hebrew tongue *Ar-Mageddon*,' that is, 'the city of Megiddo' (*Rev.* xvi. 16; Stanley, *S. and P.*, 330); or if we regard the aspirated *ḥ* as equivalent to the Hebrew *הר*, then the meaning will be 'mountain of Megiddo,' which would likewise be appropriate (*Alford, in loc.*)—J. L. P.

MEGIDDON, VALLEY OF (בְּקַעַת מְגִדּוֹן; *ἐν πεδίῳ ἑκκοπτομένου*; *Campus Mageddon*), the form of the name Megiddo found in *Zech.* xii. 11. The word is translated in the Septuagint as if derived from the root *גִּדַּד*, *incidit*. See preceding article.

—J. L. P.

MEGILLOTH (מְגִלּוֹת, *rolls*, from מָגַל). The Hebrew MSS. were on rolls of parchment, usually written on one side, though sometimes also on both (*Ezek.* ii. 10). Afterwards the term מְגִלּוֹת was used of a *book* consisting of several leaves fastened together (*Jer.* xxxvi. 23, 24); once it occurs in Scripture as designating the Pentateuch (*Ps.* xl. 8 [7]). In later Jewish usage the term Megilloth was applied to the five books, viz., Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther, which were read on certain festivals in the Synagogue [*HAPHTHARA*, vol. ii., p. 225]. The title Megillah was used κατ' ἐξοχήν of the book of Esther [*ESTHER*, BOOK OF]; and from this it is supposed it was transferred to the others. To the reading of this at the Feast of Purim special importance was attached by the Jews (*Talmud*, Tr. *Megillah*, ed. Surenhus., ii., p. 387).—W. L. A.

MEHUNIMS. [MAONITES.]

MEJARKON (מֵי הַיֶּרְקוֹן; ἀπό θαλάσσης Ἱερὰ-κων; *Aque Jercon*), a town of Dan, mentioned only in *Josh.* xix. 46, and apparently situated in the plain near Joppa. In the Hebrew there are two words, the proper translation of which would be 'The water of yellowness;' and the first word, מֵי, is translated in most ancient versions. It is probable the place took its name from some fountain or pool. The site is unknown.—J. L. P.

MEKONAH (מְכֹנָה, 'a place' = Arab. مَكَان; LXX., omit; *Mechona*), one of the towns occupied by the tribe of Judah on the return from captivity. It appears to have been situated on the southern border of Palestine, as it is mentioned in connection with Ziklag (*Neh.* xi. 28). Reland thinks it may be identical with *Mechamim*, a village located by Jerome between Eleutheropolis and Jerusalem, eight miles from the former (*Reland, Pal.* p. 892; *Onomast.*, s. v. *Bethmachah*). It seems strange that Jerome should speak of a village south of Jerusalem when describing Bethmachah, which lay at the northern extremity of Palestine (2 *Sam.* xx. 14); and Reland's conjecture is equally devoid of foundation. The site of Mekonah is unknown.—J. L. P.

MELANCHTHON (PHILIP), one of the greatest of the reformers, was born at Bretten in the duchy of Baden, 16th February 1497. His proper name was Schwartzerd, which, in compliance with a fashion of the times, he Grecised into Melanchthon. He received his education at the school of Pforzheim, and the universities of Heidelberg and Tübingen. In 1518 he came to Wittenberg, where he lectured on the N. T. with such acceptance that he had often an audience of above 2000. In alliance with Luther, he laboured earnestly and powerfully to advance the cause of the Reformation; and was of especial service in promoting the cause of education, and settling the theological position of the Lutheran Church. After Luther's death he led for some years a rather changeful life, teaching successively at Herbst, Wittenberg, Magdeburg, and Jena, or residing in literary quiet at various monasteries in different parts of Germany. He died at Wittenberg, 19th April 1560. Melanchthon's literary labours were chiefly directed to systematic and polemic theology, but, like all the

reformers, he was devoted to the study of Scripture, and occupied himself in the exposition of it to others. His exegetical works, several of which appeared after his death, consist of brief notes on Genesis, Daniel, Zechariah, Malachi, Psalms, Proverbs, Ecclesiastes, the Gospels by Matthew and John, and the principal epistles of Paul. His collected works have appeared in 4 vols. fol., Witeb. 1601, but a more complete edition in 4to was begun by Bretschneider in 1834, and continued after his death by Bindseil, of which 25 vols. have appeared.—W. L. A.

MELCHIZEDEK מֶלְכִּי צֶדֶק; Sept. Μελχι-σέδεκ), 'priest of the most high God,' and king of Salem, who went forth to meet Abraham on his return from the pursuit of Chedorlaomer and his allies, who had carried Lot away captive. [According to the author of the Epistle to the Hebrews (vii. 2), the name means βασιλεὺς δικαιοσύνης, *King of righteousness*. Philo (*Leg. Allegor.* iii. 25, p. 102, Sylb.) and Josephus (*Antiq.* i. 10. 2) gives a similar though less exact rendering, βασιλεὺς δίκαιος.] We read that Melchizedek, on the occasion referred to, brought refreshment, described in the general terms of 'bread and wine,' for the fatigued warriors, and bestowed his blessing upon their leader, who, in return, gave to the royal priest a tenth of all the spoil which had been acquired in his expedition (Gen. xiv. 18, 20). This statement seems sufficiently plain, and to offer nothing very extraordinary; yet it has formed the basis of much speculation and controversy. In particular, the fact that Abraham gave a tithe to Melchizedek attracted much attention among the later Jews. In one of the Messianic Psalms (cx. 4), it is foretold that the Messiah should be 'a priest after the order of Melchizedek;' which the author of the Epistle to the Hebrews (vi. 20) cites as showing that Melchizedek was a type of Christ; and the Jews themselves, certainly, on the authority of this passage of the Psalms, regarded Melchizedek as a type of the regal priesthood, higher than that of Aaron, to which the Messiah should belong. The bread and wine which were set forth on the table of show-bread, were also supposed to be represented by the bread and wine which the king of Salem brought forth to Abraham (Schöttgen, *Hor. Heb.* ii. 645). A mysterious supremacy came also to be assigned to Melchizedek, by reason of his having received tithes from the Hebrew patriarch; and on this point the Epistle to the Hebrews (vii. 1-10) expatiates strongly, as showing the inferiority of the priesthood represented by Aaron to that of Melchizedek, to which the Messiah belonged. 'Consider how great this man was, unto whom even the patriarch Abraham gave a tenth of the spoils;' and he goes on to argue that the Aaronic priesthood, who themselves received tithes of the Jews, actually paid tithes to Melchizedek in the person of their great ancestor. This superiority is, as we take it, inherent in his typical rather than his personal character. But the Jews, in admitting this official or personal superiority of Melchizedek to Abraham, sought to account for it by alleging that the royal priest was no other than Shem, the most pious of Noah's sons, who, according to the shorter chronology, might have lived to the time of Abraham (Bochart, *Phaleg*, ii. 1). Christian writers have not failed to enter into the same unprofitable researches, and would make Melchizedek

to have been either Shem, or Mizraim, or Canaan, the sons of Ham, or Ham himself, or even Enoch (Deyling, *Observat. Sacr.* ii. 71, seq.; Clayton, *Chronolog. of the Heb. Bible*, p. 100). The last-named conjectures seem to require no notice; but the one which holds Melchizedek to have been Shem, and which we find in the Jerusalem Targum, and also that of Jonathan, requires an explanation of how his name came to be changed, how he is found reigning in a country inhabited by the descendants of Ham, how he came forth to congratulate Abraham on the defeat of one of his own descendants, as was Chedorlaomer, and how he could be said to have been without recorded parentage (Heb. vii. 3), since the pedigree of Shem must have been notorious. In that case also, the difference of the priesthoods of Melchizedek and Levi would not be so distinct as to bear the argument which the Epistle to the Hebrews founds upon it. ['Levi qui exstitit in lumbis Abrahami exstitit quoque in lumbis Shemi tanquam proavi, et sic ipse decimas tum dedisset in lumbis nempe Abrahami, et accepisset in lumbis Shemi, quod incongruum est et a mente apostoli alienum.' Deyling, *Obs. Sac.*, ii. p. 78.] Rejecting on such grounds this opinion, others, in their anxiety to vindicate the dignity of Abraham from marks of spiritual submission to any mortal man, have held that Melchizedek was no other than the Son of God himself. But in this case it would hardly have been said that he was made 'like unto the Son of God' (Heb. vii. 3), or that Christ was constituted 'a priest' after the order of Melchizedek (Heb. vi. 20), or, in other words, was a type of himself. Some who do not go so far as this, take him to have been an angel; and this was one of the wild notions of Origen and several of his school. The best founded opinion seems to be that of Carpzov (*Apparat. Antiq. Sacr. Cod.*, c. iv. p. 52) and most judicious moderns, who, after Josephus (*De Bell. Jud.* vi. 10), allege that he was a principal person among the Canaanites and posterity of Noah, and eminent for holiness and justice, and therefore discharged the priestly as well as regal functions among the people: and we may conclude that his twofold capacity of king and priest (characters very commonly united in the remote ages) afforded Abraham an opportunity of testifying his thankfulness to God in the manner usual in those times, by offering a tenth of all the spoil. This combination of characters happens for the first time in Scripture to be exhibited in his person. [Whether his priesthood was an appendage of his royalty, or his royalty was enjoyed in virtue of his sacred office, is a question on which it is impossible to come to a certain conclusion. Perhaps we shall most justly think of him if we suppose that, being a man venerable for his religious character, he gathered around him a number of disciples, and that these gradually multiplied until they formed a community over which Melchizedek reigned without remitting his priestly functions. In the midst of a turbulent and idolatrous community, his city of peace would be a sort of asylum for all who desired to escape from the agitations and pollutions of Canaanitish society, and devote themselves to religious contemplation and service.] The union of the royal and priestly offices in him, together with the abrupt manner in which he is introduced, and the nature of the intercourse between him and Abraham, render him in various respects an appro-

priate and obvious type of the Messiah in his united regal and priestly character.

Salem, of which Melchizedek was king, is usually supposed to have been the original of Jerusalem (Joseph. *Antiq.* i. 10. 2; Jerome, *Quæst. in Genes.*) But in another place (*ad Evagrium*, iii. fol. 13) Jerome mentions a town near Scythopolis, which in his time bore the name of Salem, and where was shown the palace of Melchizedek, which from the extent of the ruins must have been very magnificent. This he takes to have been the Shalem of Gen. xxxiii. 18; and the Salim near to which John was baptizing (John iii. 23). The fact stated by Jerome shows that the place was in his time regarded as the Salem of Melchizedek; but the tradition on which this intimation rests is too late to be of much value; and as Jerusalem is called Salem in Ps. lxxvi. 2, the site of the Salem in question must be determined by the intimations of the context, which are more in agreement with Jerusalem than with any site near Bethshan. [To these considerations may be added—1. That ancient Jewish tradition is opposed to this hypothesis; 2. That this hypothesis supposes Abraham on his return from Damascus to Hebron, whence he had set out, to have made a vast and needless detour; 3. That

at Jerusalem the roads to Hebron and to Sodom would naturally diverge, so that here was the most likely spot for Bera to await the return of Abraham; 4. The king's dale where they met was probably in the vicinity of Jerusalem [KING'S DALE]; 5. It is more probable that Σαλειμ (John iii.

23), represents סַלְמִי than סַלְמִי, for the pl. ending סַלְמִי is generally represented in Greek by εμ, whereas סַלְמִי is represented by ημ, εμ, or υμ (Knobel, *Exeget. Hdb.*, in loc.)] Besides the cited authorities, see Heidegger, *Hist. Patriarch.*, ii. note 2; Borger, *Hist. Crit. Melchisedeci*; Fabrici, *Cod. MELITA (Μελίτη), an island in the Mediterranean, on which the ship which was conveying St. Paul as a prisoner to Rome was wrecked, and which was the scene of the interesting circumstances recorded in Acts xxvii. xxviii.

352. Malta.

Melita was the ancient name of Malta, and also of a small island in the Adriatic, now called Meleda, and each of these has found warm advocates for its identification with the Melita of Scripture. The received and long-established opinion is undoubtedly in favour of Malta; and those who uphold the claims of Meleda are to be regarded as dissenting from the general conclusion. This dissent proceeds chiefly upon the ground that the ship of St. Paul was 'driven about in (the sea of) Adria,' when wrecked on Melita. The conclusions deducible from this strong position are vigorously stated by P. Abate D. Ignazio Giorgi, in his *Ispezione Anticritiche*, published at Venice in 1730, and which then attracted considerable atten-

tion. There is a curious account of the controversy to which this gave rise in Ciantar's edit. of Abela's *Malta Illustrata*, i. 609, seq. The view thus advocated was in this country taken up by the learned Bryant, and more lately by Dr. Falconer, in his clever *Dissertation on St. Paul's Voyage*, 1817. These writers do not, however, seem to be aware of the very solid answers to this notion, and the arguments in support of the received conclusions, which were produced at the time. There was nothing to answer but this one objection; for if that could be obviated, the historical and other probabilities in favour of Malta remained in their former force, although they could have no counter-vailing weight if the limitation of the name Adria

to the gulf of Venice could be established. The course taken was, therefore, to show from ancient writers that the name Adria was *not*, in its ancient acceptation, limited to the present Adriatic Sea, but comprehended the seas of Greece and Sicily, and extended even to Africa. This seems to have been established beyond dispute, and every one acquainted with the mass of evidence brought to bear on this point, must regard the only strong argument in favour of Meleda as having been entirely overthrown. Those who have any curiosity or doubt in the matter may find this evidence copiously produced in Ciantar's edition of Abela's work, and also in Wetstein. Abela, after disposing of this part of his subject, very properly calls attention to the ample memorials of St. Paul's visit which exist in Malta, and the utter absence of any such in Meleda:—'Finalmente in Meleda non vi fu ma vestigio, o memoria di S. Paolo, non che Tempio ad onor di lui edificato; ma sibbene nella nostra isola vene sono molte memorie: anzi non v'è luogo, in cui non si celebri il glorioso nome dell' Appostolo (*Malta Illustrata*, i. 608). He goes on to enumerate particulars, which we will spare the reader, although the present writer's personal acquaintance with the island would enable him greatly to extend Abela's list of the Pauline associations which it contains. There is, perhaps, no piece of land of the same extent in the world which is made to contain reference so diversified and so numerous to any one person, as the island of Malta to St. Paul, who is, in fact, the tutelary saint of the island. These appropriations of Pauline memorials may in detail be open to dispute, or may possibly all be erroneous, but they serve in the mass to indicate a current of opinion which may be traced back to a remote source in ancient times.

The name of St. Paul's Bay has been given to the place where the shipwreck is supposed to have taken place. This, the sacred historian says, was at 'a certain creek with a shore,' *i. e.*, a seemingly practicable shore, on which they purposed, if possible, to strand the vessel, as their only apparent chance to escape being broken on the rocks. In attempting this the ship seems to have struck and gone to pieces on the rocky headland at the entrance of the creek. This agrees very well with St. Paul's Bay, more so than with any other creek of the island. This bay is a deep inlet on the north side of the island, being the last indentation of the coast but one from the western extremity of the island. It is about two miles deep, by one mile broad. The harbour which it forms is very unsafe at some distance from the shore, although there is good anchorage in the middle for light vessels. The most dangerous part is the western headland at the entrance of the bay, particularly as there is close to it a small island (Salamone), and a still smaller islet (Salamonetta), the currents and shoals around which are particularly dangerous in stormy weather. It is usually supposed that the vessel struck at this point. From this place the ancient capital of Malta (now Citta Vecchia, Old City) is distinctly seen at the distance of about five miles; and on looking towards the bay from the top of the church on the summit of the hill whereon the city stands, it occurred to the present writer that the people of the town might easily from this spot have perceived in the morning that a wreck had taken place; and this is a circumstance which

throws a fresh light on some of the circumstances of the deeply interesting transactions which ensued.

The sacred historian calls the inhabitants *βάρβαροι*, 'barbarians:—'the barbarous people showed us no small kindness.' This is far from implying that they were savages or uncivilized men: it merely intimates that they were not of Greek or Roman origin. This description applies to the ancient inhabitants of Malta most accurately; and as it could not apply to the inhabitants of Melida, who were Greeks, this is another argument to show that not Melida but Malta is the Melita of Scripture.

The island of Malta lies in the Mediterranean, about sixty miles south from Cape Passaro in Sicily. It is sixty miles in circumference, twenty in length, and twelve in breadth. Near it, on the west, is a smaller island, called Gozo, about thirty miles in circumference. Malta has no mountains or high hills, and makes no figure from the sea. It is naturally a barren rock, but has been made in parts abundantly fertile by the industry and toil of man. The island was first colonized by the Phœnicians, from whom it was taken by the Greek colonists in Sicily about B.C. 736; but the Carthaginians began to dispute its possession about B.C. 528, and eventually became entire masters of it. From their hands it passed into those of the Romans, B.C. 242, who treated the inhabitants well, making Melita a municipium, and allowing the people to be governed by their own laws. The government was administered by a propretor, who depended upon the prætor of Sicily; and this office appears to have been held by Publius when Paul was on the island (Acts xxviii. 7). On the division of the Roman empire, Melita belonged to the western portion; but having, in A.D. 553, been recovered from the Vandals by Belisarius, it was afterwards attached to the empire of the East. About the end of the 9th century, the island was taken from the Greeks by the Arabs, who made it a dependency upon Sicily, which was also in their possession. The Arabs have left the impress of their aspect, language, and many of their customs, upon the present inhabitants, whose dialect is to this day perfectly intelligible to the Arabians, and to the Moors of Africa. Malta was taken from the Arabs by the Normans in A.D. 1090, and afterwards underwent other changes till A.D. 1530, when Charles V., who had annexed it to his empire, transferred it to the Knights of St. John of Jerusalem, whom the Turks had recently dispossessed of Rhodes. Under the knights it became a flourishing state, and was the scene of their greatest glory and most signal exploits. The institution having become unsuited to modern times, the Order of St. John of Jerusalem, commonly called Knights of Malta, gradually fell into decay, and the island was surrendered to the French under Buonaparte when on his way to Egypt in 1798. From them it was retaken by the English with the concurrence and assistance of the natives; and it was to have been restored to the Knights of Malta by the stipulations of the treaty of Amiens; but as no sufficient security for the independence of the order (composed mostly of Frenchmen) could be obtained, the English retained it in their hands; which necessary infraction of the treaty was the ostensible ground of the war which only ended with the battle of Waterloo. The island is

still in the hands of the English, who have lately remodelled the government to meet the wishes of the numerous inhabitants. It has lately become the actual seat of an Anglican bishopric, which, however, takes its title from Gibraltar, out of deference to the existing Catholic bishopric of Malta—a deference not paid to the Oriental churches in recently establishing the Anglican bishopric of Jerusalem. MELKART. [HERAKLES.]

MELON. [ABATTICHIM.]

MELZAR (מֶלְזָר). In the A. V. (Dan. i. 11, 16) and most of the modern versions, this appears as a proper name, though in the margin of the A. V. we have for this 'the steward;' and Diodati in a marginal note says, 'Mostra che sia un nome d'ufficio, come e calco o proveditore.' The LXX. give in both places a quite different name, Ἀβιεδρί, which Josephus follows; Theodotion has Ἀμελσᾶδ; Alex. Ἀμερσάρ. The use of the article, however (which Theodotion has made part of the name), indicates that this is an appellative. The word is not Semitic; it is probably Persian. By some it is explained from the Pers. ملسر, *melsar*, *vini princeps*; but the officer in question seems rather to have fulfilled the function of a παιδαγωγός or τροφός in the royal household, than that of a cup-bearer. The old Jewish version of Athias renders it by 'Küchenmeister,' *surveyor of the kitchen*; Zunz gives 'Aufseher,' *overseer*; and De Wette, 'Kellermeister,' *butler*. The Melzar was an officer under the Rabсарis. The use of the article does not necessarily indicate that there was only one officer with this title; it simply points out the one specially entrusted with the charge of Daniel and his companions.—W. L. A.

MEMPHIS, a city of Egypt called in the Hebrew text Noph נֹפֶח, or Moph מֹפֶח, LXX. Μέμφις; Vulg. *Memphis*. Memphis occurs once in the A. V., in Hosea ix. 6, where the Hebrew has Moph. These two Hebrew forms are contractions of the ancient Egyptian MEN-NUFR or MEN-NEFRU, whence the Coptic ⲙⲉⲛⲡⲣⲓ, ⲙⲉⲛⲡⲣⲓ, ⲙⲉⲛⲡⲣⲓ, ⲙⲉⲛⲡⲣⲓ (M.), and ⲙⲉⲛⲡⲣⲓ (S.), the Greek name, and the Arabic

مَنْف, Menf. The Hebrew forms were probably in use among the Shemites in Lower Egypt, and perhaps among the Egyptians, in the vulgar dialect.

The ancient Egyptian common name signifies either 'the good abode,\*' or 'the abode of the

good one.' Plutarch, whose Egyptian\* information in the treatise de *Iside et Osiride* is generally valuable, indicates that the latter or a similar explanation was current among the Egyptian priests. He tells us that some interpreted the name the 'haven of good ones,' others, 'the sepulchre of Osiris' (καὶ τὴν μὲν πόλιν οἱ μὲν ὄρμον ἀγαθῶν ἐρμηνεύουσιν, οἱ δ' [ἰδ.] τὸν τάφον Ὀσίριδος, c. 20). 'To come to port' is, in hieroglyphics, MENA or MAN, and in Coptic the long vowel is not only preserved but sometimes repeated (cf. ⲙⲉⲛⲡⲣⲓ, ⲙⲉⲛⲡⲣⲓ, ⲙⲉⲛⲡⲣⲓ,

ⲙⲉⲛⲡⲣⲓ). There is, however, no expressed vowel

in the name of Memphis, which we take therefore to commence with the word MEN, 'abode,' like the name of a town or village MEN-HEB, 'the abode, or mansion, of assembly,' cited by Brugsch (*Geographische Inschriften*, i., p. 191, No. 851, tav. xxxvii.) 'The good abode' is the more probable rendering, for there is no preposition, which, however, might possibly be omitted in an archaic form. The special determinative of a pyramid follows the name of Memphis, because it was the pyramid-city, pyramids having perhaps been already raised there as early as the reign of Venephes, the fourth king of the first dynasty (Manetho ap. Cory, *Anc. Frag.*, pp. 96, 97; cf. Brugsch, *Geogr. Inschr.*, i., p. 240). Thus we may read the name 'MEN-NUFR,' or 'MEN-NEFRU, the pyramid city.'

The sacred name of Memphis was HA-PTAH, PA-PTAH, or HA-PTAH-KA, or HA-KA-PTAH, 'the abode of Ptah,' or 'of the being of Ptah' (Brugsch, i., pp. 235, 236, Nos. 1102, 1103, 1104, 1105, tav. xlii.)

Memphis was well chosen as the capital city of all Egypt. It stands just above the ancient point of the Delta, where the Pelusiatic, Sebennytic, and Canopic branches separated. It was within the valley of Upper Egypt, yet it was close to the plain of Lower Egypt. If further north it could not have been in a position naturally strong: if anywhere but at the division of the two regions of Egypt it could not have been the seat of a sovereign who wished to unite and command the two. Where the valley of Upper Egypt is about to open into the plain it is about five miles broad. On the east, this valley is bounded almost to the river's brink by the light yellow limestone mountains which slope abruptly to the narrow slip of fertile land. On the west, a broad surface of cultivation extends to the low edge of the Great Desert, upon which rise, like landmarks, the long series of Memphite pyramids. The valley is perfectly flat, except where a village stands on the mound of some ancient town, and unvaried but by the long groves of date-palms which extend along the river, and the smaller groups of the villages. The Nile occupies the midst with its great volume of water, and to the west, not far beneath the Libyan range, is the great canal called the Bahr Yoosuf, or 'River of Joseph.' The scene is beautiful from the contrast of its colours, the delicate tints of the bare desert-mountains or hills bright with the light of an Egyptian sun, and the tender green of the fields, for a great part of the year, except when the Nile spreads its inundating waters from desert to desert, or when the harvest is yellow with such plenteous ears as Pharaoh saw in his dream. And the beauty is enhanced by the recollection that here stood that capital of Egypt which was in times very

\* Dr. Brugsch would translate it indifferently *mansio bona*, or *portus bonus*, but we take the second signification to be inapplicable to the first word of the name in the ancient language, as we have later argued (see *Geographische Inschriften*, i., pp. 190, 191).

remote a guardian of ancient civilization; that here, as those pyramids—which triflers in all ages have mocked at—were raised to attest, the doctrine of a future state was firmly believed and handed down till revelation gave it its true significance; and that here many of the great events of sacred history may have taken place, certainly many of its chief personages may have wondered at remains which in the days of Abraham were the work of an older and stronger generation.

But for the pyramids it would be difficult to trace the site of Memphis, and the pyramids, extending for twenty miles, do not materially help us. No lofty mounds, as at Bubastis and Saïs, mark the place of the great city; no splendid temples, as at Thebes, enable us almost to recall its magnificence. The valley between the Libyan Desert and the Nile is flat and unmarked by standing columns, or even, as at neighbouring Heliopolis, by a solitary obelisk. Happily a fallen colossal statue and some trifling remains near by, half-buried in the mud, and annually drowned by the inundation, show us where stood the chief temple of Memphis, and doubtless the most ancient part of the city, near the modern village of Meet-Raheeneh. This central position is in the valley very near the present west bank of the river, and three miles from the edge of the Great Desert. The distance above Cairo is about nine miles, and that above the ancient head of the Delta about sixteen. The ancient city was no doubt of great extent, but it is impossible, now that its remains have been destroyed and their traces swallowed up by the alluvial deposit of the Nile, to determine its limits, or to decide whether the different quarters mentioned in the hieroglyphic inscriptions were portions of one connected city; or again, whether the Memphis known to classical writers was smaller than the old capital, a central part of it from which the later additions had, in a time of decay, been gradually separated. In the inscriptions we find three quarters distinguished:—The 'White Wall,' mentioned by the classical writers, *λευκὸν τεῖχος*, has the same name in hieroglyphics, in which we find SEBT-HET, 'White Wall,' in the name of the Memphite Nome, HESP SEBT-HET, 'Nome of the White Wall,' and also separately NU-SEBT-HET, 'White-wall-city' (Brugsch, *G. I.*, i., pp. 120, 234, 235; i tav. xv., Nos. 1091-1094; tav. xlii.) That Memphis is meant in the name of the nome appears, not only from the circumstance that Memphis was the capital of the Memphite Nome, but also from the occurrence of HA-PTAH-KA or HA-KA-PTAH, as the equivalent of SEBT-HET in the name of the nome (Brugsch, *G. I.*, i., tav. xv., i. 1, i. 1, etc., and *Nomen aus dem neuen Reiche*, 1). The White Wall is put in the nome-name for Memphis itself, probably as the oldest part of the city. Herodotus mentions the White Wall as the citadel of Memphis, for he relates that it held a garrison of 120,000 Persians (iii. 91), and he also speaks of it by the name of the Citadel simply (*τὸ τεῖχος*, 13, 14). Thucydides speaks of the White Wall as the third, and, as we may infer, the strongest part of Memphis, but does not give the names of the other two parts (i. 104). The Scholiast remarks that Memphis had three walls, and that whereas the others were of brick, the third, or White Wall, was of stone (*φασὶ γὰρ ὅτι τρία τεῖχη εἶχεν ἡ Μέμφις. τῶν οὖν δύο ληφθέντων, πρὸς τὸ τρίτον ἡ μάχη ἐγίνετο. λευκὸν δὲ ἐκαλεῖτο, ὡς τῶν ἄλλων*

*μὲν ἀπὸ πλινθῶν ἐσκενασμένον, ἐκείνου δὲ ἀπὸ λίθων, ad loc.*) No doubt the commentator had in his mind Greek towns surrounded by more than a single wall, and did not know that Egyptian towns were rarely if ever walled. But his idea of the origin of the name white as applied to the citadel of Memphis is very probably correct. The Egyptian forts known to us are of crude brick, therefore a stone fort, very possible in a city like Memphis, famous for its great works in masonry, would receive a name denoting its peculiarity. It is noticeable that the monuments mention two other quarters, 'The two regions of life' (Brugsch, *G. I.*, i., pp. 236, 237, Nos. 1107, *seq.*, tav. xlii. xliii.), and AMHEE or PER-AMHEE (*Id.*, p. 237, No. 1114 a, tav. xliii.)

Before speaking of the monuments of Memphis we must notice its history. The foundation of the city is assigned to Menes, the first king of Egypt, head of the 1st dynasty (*Herod.*, ii. 99). The situation, as already observed, is admirable for a capital of the whole country, and it was probably chosen with that object. According to Herodotus, Menes raised a dyke which still protected Memphis from the inundations of the Nile. Previously the river had flowed under the Libyan range; but Menes, by banking up the stream at the bend it took 100 stadia south of Memphis, made the ancient channel dry, and dug a new course for the river between the two ranges of hills. The historian adds, that in his time the Persians carefully guarded the point where the Nile had been forced into the new channel, lest Memphis should be endangered by a flood (*l. c.*) Sir Gardner Wilkinson observes, 'The dyke of Menes was probably near the modern Kafr el-Eiyât, 14 miles south of Meet-Raheeneh, where the Nile takes a considerable bend, and from which point it would (if the previous direction of its course continued) run immediately below the Libyan mountains, and over the site of Memphis. Calculating from the outside of Memphis, this bend agrees exactly with the hundred stadia, or nearly 11½ English miles—Meet-Raheeneh being about the centre of the old city. No traces of these dykes (*sic*) are now seen' (Rawlinson's *Herod.*, vol. ii., p. 163, note 6). Herodotus also states that Menes excavated a lake outside the town to the north and west, communicating with the river which bounded it on the east (iii. 99). That the dyke has been allowed to fall into neglect, and ultimately to disappear, may be accounted for by the gradual obliteration of the old bed, and the cessation of any necessity to keep the inundation from the site of Memphis, which, on the contrary, as the city contracted, became cultivable soil and required to be annually fertilized. But are we to suppose that Menes executed the great engineering works attributed to him? It is remarkable that the higher we advance towards the beginnings of Egyptian history, the more vast are the works of manual labour. The Lake Moëris, probably excavated under the 6th dynasty, put to shade all later works of its or any other kind executed in Egypt. The chief pyramids, which, if reaching down to this time, can scarcely reach later, increase in importance as we go higher, the greatest being those of El-Geezeh, sepulchres of the earlier kings of the 4th dynasty. This state of things implies the existence of a large serf-population gradually decreasing towards later times, and shows that Menes might well have diverted the

course of the Nile. The digging a new course seems doubtful, and it may be conjectured that the branch that became the main stream was already existent. It would appear from the fragments of Manetho's history that Memphis continued the seat of government of kings of all Egypt as late as the reign of Venephes the third successor of Menes. Athothis, the son and successor of Menes, built the palace there, and the king first mentioned built the pyramids near Cochoime (Cory's *Anc. Frag.*, 2d ed., pp. 94-97): pyramids are scarcely seen but at Memphis, and Cochoime is probably the name of part of the Memphite necropolis, as will be noticed later. The 3d dynasty was of Memphite kings, the 2d and part of the 1st having probably lost the undivided rule of Egypt. The 4th dynasty, which succeeded about B. C. 2440, was the most powerful Memphite line, and under its earlier kings the pyramids of El-Geezeh were built. It is probable that other Egyptian lines were tributary to this, which not only commanded all the resources of Egypt to the quarries of Syene on the southern border, but also worked the copper mines of the Sinaitic Peninsula. The 5th dynasty appears to have been contemporary with the 4th and 6th, the latter a Memphite house which continued the succession. At the close of the latter Memphis fell, according to our opinion, into the hands of the Shepherd kings, foreign strangers who, more or less, held Egypt for 500 years. At the beginning of the 18th dynasty we once more find hieroglyphic notices of Memphis after a silence of some centuries. During that dynasty and its two successors, while the Egyptian empire lasted, Memphis was its second city, though, as the sovereigns were Thebans, Thebes was the capital. After the decline of the empire, we hear little of it until the Persian period, when the provincial dynasties gave it a preference over Thebes as the chief city of Egypt. With the Greek rule, its political importance rose, and while Thebes had dwindled to a thinly-populated collection of small towns, Memphis became the native capital, where the sovereigns were crowned by the Egyptian priests; but Alexandria gradually destroyed its power, and the policy of the Romans hastened a natural decay. At length, after the Arab conquest, the establishment of a succession of rival capitals, on the opposite bank of the Nile, El-Fustât, El-Askar, El-Katâ-ë, and El-Kahireh, the later Cairo, drew away the remains of its population, and at last left nothing to mark the site of the ancient capital but ruins, which were long the quarries for any who wished for costly marbles, massive columns, or mere blocks of stone for the numerous mosques of the Muslim seats of government.

Of the buildings of Memphis none remain above ground; the tombs of the neighbouring necropolis alone attest its importance. It is, however, necessary to speak of those temples which ancient writers mention, and especially of such of these as are known by remaining fragments. The chief temple was that of Ptah, the Egyptian Vulcan, assigned by Herodotus to Menes as its founder (ii. 99), the site of which is near the village of Meet-Raheeneh. The only important vestige of this great temple, probably second only, if second, to that of Amen-ra at Thebes, now called the temple of El-Karnak, is a broken colossal statue of limestone representing Rameses II., which once stood,

probably with a fellow that has been destroyed, before one of the propyla of the temple. This statue, complete from the head to below the knees, is the finest Egyptian colossus known. It belongs to the British government, which has never yet spared the necessary cost of transporting it to England. Near this temple was one of Apis, or Hapi, the celebrated sacred bull, worshipped with extraordinary honours at Memphis, and from which the Israelites possibly took the idea of the golden calf. The Serapeum, or temple of Serapis, or Osir-hapi, that is, Osiris-Apis, the ideal correspondent to the animal, lay in the desert to the westward, between the modern villages of Abou-Seer and Sakkarah, though to the west of both. Near this temple was the burial-place of the bulls Apis, a vast excavation, in which they were sepulchred in sarcophagi of stone in the most costly manner. M. Mariette recently discovered this monument, and thus added greatly to our knowledge of Egyptology, especially as the tablets in the burial-places of the sacred bulls afforded very important chronological and historical information. There were also at Memphis a temple of Sokari-Osiris, whence the modern name of Sakkarah (as Abou-Seer, from Busiris, records the existence of a temple of Osiris, PA-HESAR), a temple of AY-EM-HETP, the Egyptian Æsculapius, and another of Anubis. And we must not forget that temple of the Foreign Venus (Ἰβὼν, τὸ καλεῖται ξένης Ἀφροδίτης) which Herodotus mentions as situate in the Tyrians' Camp (Τυρίων στρατόπεδον), inhabited in his time by Phœnicians of Tyre (ii. 112), and the fact that in a tablet of Amenoph II., of the 18th dynasty, in the opposite quarries of Tura, the Canaanite and Phœnician goddess Ashtoreth is represented as a local divinity. Perhaps the name of the camp and the worship dated from the capture of Memphis by the Shepherds. The memory of a like event was as long traditionally preserved in the Coptic name of El-Geezeh, the town on the bank of the Nile eastward of the most famous group of pyramids

†περσιοί, which, if it do not record the place of the Persian camp when Cambyses besieged Memphis, must record something similar during the Persian occupation.

The necropolis of Memphis has escaped the destruction that has obliterated almost all traces of the city, partly from its being beyond the convenient reach of the inhabitants of the Muslim capitals, partly from the unrivalled massive solidity of its chief edifices. The pyramids that belong to Memphis extend along the low edge of the Libyan range, and form four groups—those of El-Geezeh, Abou-Seer, Sakkarah, and Dahshoor—all so named from a neighbouring town or village. The principal pyramids of El-Geezeh—those called the First or Great, Second, and Third—are respectively the tombs of Khufu or Shufu, the Cheops of Herodotus and Suphis I. of Manetho, of the 4th dynasty; of Khafra or Shafra, Cephren (Hdt.), of the 5th? and of Menkaura Mycerinus or Mencheres of the 4th. The Great Pyramid has a base measuring 733 feet square, and a perpendicular height of 456 feet, having lost about twenty-five feet of its original height, which must have been at least 480 feet (Mr. Lane in Mrs. Poole's *Englishwoman in Egypt*, ii., pp. 121, 125). It is of solid stone, except a low core of rock, and a very small space allowed for chambers and passages leading to

them. The Second Pyramid is not far inferior to this in size. Next in order come the two stone pyramids of Dahshoor. The rest are much smaller. In the Dahshoor group are two built of crude brick, the only examples in the Memphite necropolis. The whole number that can now be traced is upwards of thirty, but Dr. Lepsius supposes that anciently there were about sixty, including those south of Dahshoor, the last of which are as far as the Feiyoom, about sixty miles above the site of Memphis by the course of the river. The principal pyramids in the Memphite necropolis are twenty in number; the pyramid of Aboo-Ruweysh, the three chief pyramids of El-Geezeh, the three of Aboo-Seer, the nine of Sakkarah, and the four of Dahshoor. The 'pyramids' built by Venephes near Cochoime may have been in the groups of Aboo-Seer, at Sakkarah, for the part of the necropolis where the Serapeum lay was called in Egyptian KEM-KA or KA-KEM, also KEM or KEMEE, as Brugsch has shown, remarking as its probable identity with Cochoime (*G. Z.*, i., p. 240, Nos. 1121, 1122, 1123, tav. xliii.) The pyramids were tombs of kings, and possibly of members of royal families. Around them were the tombs of subjects, of which the oldest were probably in general of the time of the king who raised each pyramid. The private tombs were either built upon the rock, or excavated, wherever it presented a suitable face in which a grotto could be cut, and in either case the mummies were deposited in chambers at the foot of deep pits. Sometimes these pits were not guarded by the upper structure or grotto, though probably they were then originally protected by crude brick walls. A curious inquiry is suggested by the circumstance that the Egyptians localized in the neighbourhood of Memphis those terrestrial scenes which they supposed to symbolize the geography of the hidden world, and that in these the Greeks found the first ideas of their own poetical form of the more precise belief of the older race, of the Acherusian Lake, the Ferry, Charon, and the 'Meads of Asphodel,' but this captivating subject cannot be here pursued (see Brugsch, *G. Z.*, i., pp. 240, 241, 242).

The notices of Memphis in the Bible are wholly of the period of the kings. Many have thought that the Land of Goshen lay not very far from this city, and that the Pharaohs who protected the Israelites, as well as their oppressors, ruled at Memphis. The indications of Scripture seem, however, to point to the valley through which ran the canal of the Red Sea, the Wádi-t-Tumeylát of the present inhabitants of Egypt, as the old Land of Goshen, and to Zoan, or Tanis, as the capital of the oppressors, if not also of the Pharaohs who protected the Israelites. A careful examination of the narrative of the events that preceded the Exodus seems indeed to put any city not in the easternmost portion of the Delta wholly out of the question.

It was in the time of the decline of the Israelite kingdom, and during the subsequent existence of that of Judah, that Memphis became important to the Hebrews. The Ethiopians of the 25th dynasty, or their Egyptian vassals of the 23d and 24th, probably, and the Saïtes of the 26th, certainly, made Memphis the political capital of Egypt. Hosea mentions Memphis only with Egypt, as the great city, predicting of the Israelite fugitives, 'Mizraim shall gather them up, Noph shall bury

them' (ix. 6). Memphis, the city of the vast necropolis, where Osiris and Anubis, gods of the dead, threatened to put in the shade the worship of the local divinity, Ptah, could not be more accurately characterized. No other city but Abydos was as much occupied with burial, and Abydos was far inferior in the extent of its necropolis. With the same force that personifies Memphis as the burier of the unhappy fugitives, the prophet Nahum describes Thebes as walled and fortified by the sea (iii. 8), as the Nile has been called in ancient and modern times, for Thebes alone of the cities of Egypt lay on both sides of the river (Smith's *Dictionary of the Bible*, NOPH, NO-AMMON). Isaiah, in the wonderful Burden of Egypt, which has been more markedly and literally fulfilled than perhaps any other like portion of Scripture, couples the princes of Zoan (Tanis) with the princes of Noph as evil advisers of Pharaoh and Egypt (xix. 13). Egypt was then weakly governed by the last Tanite king of the 23d dynasty, as ally or vassal of Tirhakah; and Memphis, as already remarked, was the political capital. In Jeremiah, Noph is spoken of with 'Tahapanes,' the frontier stronghold Daphnæ, as an enemy of Israel (ii. 16). It is difficult to explain the importance here given to 'Tahapanes.' Was it to warn the Israelites that the first city of Egypt which they should afterwards enter in their forbidden flight was a city of enemies? In his prophecy of the overthrow of Pharaoh Necho's army, the same prophet warns Migdol, Noph, and 'Tahpanhes' of the approach of the invader (xlv. 14), warns the capital, and the frontier towns. When Migdol and 'Tahpanhes' had fallen, or whatever other strongholds guarded the eastern border, the Delta could not be defended. When Memphis was taken, not only the capital was in the hands of the enemy, but the frontier-fort commanding the entrance of the valley of Upper Egypt had fallen. And later he says that 'Noph shall be waste and desolate, without an inhabitant' (19). And so it is, while many other cities of that day yet flourish—as Hermopolis Parva and Sebennytus in the Delta; Lycopolis, Latopolis, and Syene, in Upper Egypt; or still exist as villages, like Chemmis (Panopolis), Tentyra, and Hermonthis, in the latter division—it is doubtful if any village on the site of Memphis, once the most populous city of Egypt, even preserves its name. Latest in time, Ezekiel prophesies the coming distress and final overthrow of Memphis. Egypt is to be filled with slain; the rivers are to be dried and the lands made waste; idols and false gods are to cease out of Noph; there is to be 'no more a prince of the land of Egypt.' So much is general, and refers to an invasion by Nebuchadnezzar. Noph, as by Hosea, is coupled with Egypt—the capital with the state. Then more particularly Pathros, Zoan, and No are to suffer; Sin and No again; and with more vivid distinctness the distresses of Sin, No, Noph, Aven, Pi-beseth, and 'Tehaphnehes' are foretold, as though the prophet witnessed the advance of fire and sword, each city taken, its garrison and fighting citizens, 'the young men,' slain, and its fair buildings given over to the flames, as the invader marched upon Daphnæ, Pelusium, Tanis, Bubastis, and Heliopolis, until Memphis fell before him, and beyond Memphis Thebes alone offered resistance, and met with the like overthrow (xxx. 1-19). Perhaps these vivid images represent, by the force of repetition and their climax-like

arrangement, but one series of calamities: perhaps they represent three invasions—that of Nebuchadnezzar, of which we may expect history one day to tell us;\* that of Cambyses; and last, and most ruinous of all, that of Ochus. The minuteness with which the first and more particular prediction as to Memphis has been fulfilled is very noticeable. The images and idols of Noph have disappeared; when the site of almost every other ancient town of Egypt is marked by colossi and statues, but one, and that fallen, with some insignificant neighbours, is found where once stood its greatest city.

Howard Vyse, *Pyramids of Gizeh*, fol. plates, and 8vo text and plates; Sir J. G. Wilkinson, *Modern Egypt and Thebes*, and *Handbook to Egypt*; and Mrs. Poole, *Englishwoman in Egypt*, where the topography and description of the necropolis and the pyramids are by Mr. Lane.—R. S. P.

MENAHEM (מְנַחֵם, *consoler*; Sept. מנחם), sixteenth king of Israel, who began to reign B.C. 772, and reigned ten years. Menahem appears to have been one of the generals of king Zachariah. When he heard the news of the murder of that prince, and the usurpation of Shallum, he was at Tirzah, but immediately marched to Samaria, where Shallum had shut himself up, and slew him in that city. He then usurped the throne in his turn; and forthwith marched to Tiphseh, which refused to acknowledge his rule. Having taken this place, after a siege, he treated the inhabitants with a degree of savage barbarity, which, as Josephus remarks (*Antiq.* ix. 11. 1), would not have been pardonable even to foreigners. He adhered to the sin of Jeroboam, like the other kings of Israel. In his time the Assyrians, under their king Pul, made their first appearance on the borders of Palestine; and Menahem was only able to save himself from this great invading power at the heavy price of 1000 talents of silver, which he raised by a tax of 50 shekels from every man of substance in Israel. This was probably the only choice left to him; and he is not therefore to be blamed, as he had not that resource in the treasures of the temple of which the kings of Judah availed themselves in similar emergencies. Menahem died in B.C. 761, leaving the throne to his son Pekahiah (2 Kings xv. 14-22).—J. K.

MENDELSSOHN, MOSES, also called *Ramban* (רמב"ן), from the initials of משה בן מנחם (Moses b. Menachem Mendel and Moses Dessau), was born Sept. 6, 1729. His early life was spent amid circumstances of extreme penury, approaching at times to the verge of destitution; but in spite of these he prosecuted with dauntless perseverance his literary and philosophical studies, first at Dessau and afterwards at Berlin. At length, however, a Jewish merchant employed him (1750) to educate his children. Being thus relieved from want, he devoted himself more than ever to the acquisition of learning, and, though only one-and-twenty, began publishing a weekly periodical in

Hebrew, entitled *קהלת מוסר*, *A Collection of Ethics*. The philosophical works which he now published spread his fame over Europe, and secured for him the friendship of eminent literary men, who were constantly corresponding with him about philosophical, archæological, religious, and Biblical subjects, and who solicited his aid in literary enterprises. From the very starting of the *Bibliothek der schönen Wissenschaften* he was a contributor to it, and published in it (1756) the masterly analysis of Lowth's *Lectures on Hebrew Poetry* [LOWTH]. His contributions to Biblical literature are as follows:—(1.) A Commentary on Ecclesiastes, written in Hebrew, Berlin 1769; *ibid.* 1788. It was translated into German by Rabe, the translator of the Mishna, Aispach 1771; and into English by Theodore Preston, London 1845. (2.) A German translation of the Pentateuch, made by himself, with a grammatical and exegetical commentary in Hebrew, contributed by several Jewish literati—viz., the commentary on Genesis by Dubno [DUBNO], with the exception of that on ch. i. 1-vi. 8, which is by Mendelssohn himself, Berlin 1780; the commentary on Exodus by Mendelssohn himself, who used the fragments of Dubno, Berlin 1781; the commentary on Leviticus principally by Wessely, Berlin 1782; the commentary on Numbers by Jaroslaw, Berlin 1783; and the commentary on Deuteronomy by Homberg, except a few chapters at the beginning and end, Berlin 1783. This important work is entitled ספר

נתיבות השלום, *The Book of the Paths of Peace*, and is preceded by an elaborate and most valuable introduction written in Hebrew, called אור לנתיבה, *A Light to the Path*, in which Mendelssohn discusses various topics connected with Biblical exegesis and literature. This was published separately before the completion of the commentary (December 1782), and now accompanies the translation and commentary. It is given in a German translation with his translation of the Pentateuch in his *Collected Works*, vol. vii., Leipzig 1845, p. 18, ff.; and in English in *The Hebrew Review*, edited by Breslau, London 1860. (3.) A German translation of the Psalms, Berlin 1783; *ibid.*, 1788; and in his *Collected Works*, vol. vi., p. 127, ff. where are also his annotations on divers Psalms. (4.) A German translation of the Song of Solomon, published three years after his death, Berlin 1789, also given in his *Collected Works*, vol. vi., p. 369, ff. (5.) A logical and philosophical treatise on the Hebrew

language, entitled לשון הזהב, *The Tongue of Gold*, Berlin 1782; and (6.) *Ritualgesetze der Juden*, or Ritual Laws of the Jews, Berlin 1778, which he published at the request of the Government, and which is essential to the understanding of the Jewish rites, manners, and customs. It is contained in vol. vi. of his works. Mendelssohn died January 4, 1786. The influence which this famous philosopher and Hebraist exercised over the Jewish nation is incalculable. He effected a reformation in Judaism, and founded in Berlin that new school of Hebrew literature and Biblical exegesis which has now produced so many and such distinguished Jewish literati, not only in Germany, but throughout Europe. No wonder that the Jews express their gratitude to him, and reverence for him in the saying משה ועד משה לא קם כמותו, מומשה למשה ועד משה לא קם כמותו,

\* The recent discovery of Assyrian conquests of Egypt warns us not to trust to the negative evidence of classical writers as to a Babylonian one.

'from Moses (the lawgiver) to Moses (Maimonides) and Moses (Mendelssohn), no one hath arisen like Moses,' alluding to Deut. xxxiv. 10; comp. Dr. Mendelssohn's edition of *Mendelssohn's Works*, 7 vols., Leipzig 1843-1845; Jost, *Geschichte des Judenthums*, iii. 293, ff.; Kayserling, *Moses Mendelssohn, Sein Leben und seine Werke*, Leipzig 1862.—C. MENELAUS (Μενέλαος), brother of Simon, the governor of the Temple (2 Maccab. iv. 23); or, according to Josephus (*Antiq.* xii. 5), brother of Jason and Onias. Jason, who by the offer of a large bribe had persuaded Antiochus Epiphanes to make him high-priest, sent Menelaus to bear the money to the king. But, by flattery and the promise of a large bribe, Menelaus got the priesthood to himself (B.C. 172). Not having paid this money, he was summoned to appear before the king; but an insurrection in Tarsus requiring the presence of Antiochus, Andronicus was deputed to deal with the matter. Menelaus stole certain vessels of gold out of the temple, and by the gift of these to Andronicus, made easy terms with him, and even persuaded him to kill Onias, who had ventured to speak against the sacrilege. Andronicus, on the charge of the indignant Jews, was put to death for this crime; but Menelaus does not seem to have been suspected of instigating it. Afterwards he was accused to the king of encouraging Lysimachus to sacrilegious deeds, and was actually convicted; but by promise of much money he induced one Ptolemy to pacify the king, and even procure the death of his accusers (2 Maccab. iv.). He is next mentioned as among the governors whom Antiochus 'left to vex the [Jewish] nation' (v. 23). Ultimately, on the intimidation of Lysias, 'that this man was the cause of all mischief,' Antiochus Eupator caused him to be put to death at Berea (xiii. 3-8).—J. G. C.

MENE, MENE, TEKEL, UPHARSIN (מְנֵה, מְנֵה, תְּקֵל, וּפְרָסִין; Sept. Μανή, Θεκέλ, Φάρες; Vulg. *Mane, Thecel, Phares*), the inscription supernaturally written 'upon the plaster of the wall' in Belshazzar's palace at Babylon (Dan. v. 5-25); which 'the astrologers, the Chaldeans, and the soothsayers,' could neither read nor interpret, but which Daniel first read and then interpreted. Yet the words, as they are found in Daniel, are pure Chaldee, and if they appeared in the Chaldee character, could have been read, at least, by any person present on the occasion who understood the alphabet of his own language. To account for their inability to decipher this inscription, it has been supposed that it consisted of those Chaldee words written in another character. Dr. Hales thinks that it may have been written in the primitive Hebrew character, from which the Samaritan was formed, and that, in order to show on this occasion that the writer of the inscription was the offended God of Israel, whose authority was being at that moment peculiarly despised (ver. 2, 3, 4), he adopted his own sacred character, in which he had originally written the decalogue, in which Moses could transcribe it into the law, and whose autograph copy was found in Josiah's days, and was most probably brought to Babylon in the care of Daniel, who could therefore understand the character without inspiration, but which would be unknown to 'the wise men of Babylon' (*Neu*

*Analysis of Chronology*, vol. i., p. 505, Lond. 1811). This theory has the recommendation, that it involves as little as possible of miraculous agency. Josephus makes Daniel discourse to Belshazzar as if the inscription had been in Greek. The passage is certainly curious: 'Εδῆλον δὲ τὰ γεγραμμένα τὰδε. ΜΑΝΗ. τούτο δ' ἔλεγεν Ἑλλάδι γλώττῃ σημαίνει' ἂν ἀριθμὸς· ὥσπερ τῆς ζωῆς σου τοσοῦτον χρόνον καὶ τῆς ἀρχῆς ἡρίθμηκεν ὁ θεός, καὶ περισσεύει ἐπὶ σοὶ βραχὺν χρόνον. ΘΕΚΕΛ. σημαίνει τούτο σταθμὸν. στήσας οὖν σου λέγει τὸν χρόνον τῆς βασιλείας ὁ θεός, ἥδη καταφερομένην δηλοῖ. ΦΑΡΕΣ. καὶ τούτο κλάσμα δηλοῖ κατὰ Ἑλλάδα γλώτταν. κλάσει τοιαυτοῦν σου τὴν βασιλείαν, καὶ Μήδοις αὐτὴν καὶ Πέρσας διανεμεῖ. 'He (Daniel) explained the writing thus: ΜΑΝΗ. 'This,' said he, 'in the Greek language, may mean a number; thus God hath numbered so long a time for thy life and for thy government, and that there remains a short time for thee.' ΘΕΚΕΛ. This signifies *weight*; hence he says, 'God having weighed in a balance the time of thy kingdom, finds it already going down.' ΦΑΡΕΣ. This also, according to the Greek language, denotes a *fragment*; hence 'he will break in pieces thy kingdom, and divide it among the Medes and Persians' (*Antiq.* x. 11. 3). There is some doubt whether the reading ἔλεγεν be genuine, but Josephus evidently represents the whole passage as addressed by Daniel to the king, and makes him speak as if the inscription had been in Greek. Still Josephus, for some cause or other, represents Daniel as speaking doubtfully ('may mean') in the former part of the passage, and scarcely less so in the latter. It has been supposed by some, that 'the wise men' were not so much at fault to read the inscription, as to explain its meaning, which, it is said, they might sufficiently understand to see its boding import to the monarch, and be unwilling to consider further—like the disciples in regard to the predictions of our Lord's death (Luke ix. 45), where it is said, 'this saying was hid from them, they perceived it not, and they feared to ask him of that saying.' And certainly it is said throughout our narrative that 'the wise men could not read the writing, nor make known the interpretation of it,' phrases which would seem to mean one and the same thing; since, if they mean different things, the order of ideas would be that they could not interpret nor even read it, and Wintle accordingly translates, 'could not read so as to interpret it' (*Improved Version of Daniel*, Lond. 1807). At all events the meaning of the inscription by itself would be extremely enigmatical and obscure. To determine the application, and to give the full sense, of an isolated device which amounted to no more than 'he or it is numbered, he or it is numbered, he or it is weighed, they are divided' (and there is even a riddle or paranomasia on the last word פָּרַס; comp. Susannah, ver. 54, 55 and 58, 59, Greek, and Jer. i. 11, 12, Hebrew; which may either mean 'they divide,' or 'the Persians,' according as it is pronounced), must surely have required a supernatural endowment on the part of Daniel—a conclusion which is confirmed by the exact coincidence of the event with the prediction which he propounded with so much fortitude (ver. 30, 31).—J. F. D.

MENI, מְנִי, Is. lxx. 11, the only place where the word occurs. It is rendered by the LXX.

ἡ τύχη, although some copies have τῶ δαμονίῳ, and ἡ τύχη in the former clause as the equivalent of מְנִי.

This transposition is adopted by Jerome (*et paratis fortunæ mensam, et impletis dæmoni potionem*), who also in his commentary 'exerte monet τοὺς Ὁ vocem מְנִי reddidisse τῶ δαμονίῳ.' But Vitrina, 'suspiciatur, Hieronymum, cum ex doctrina Magistri Judæi alle sibi impressisset מְנִי esse fortunam, locum festinante oculo sic legisse, ut alterum pro altero sumpserit' (Schleusneri *Lex.* s. v. τύχη). The Vulg., following a peculiar various reading, has super *eam*, referring to 'Mensam' in the preceding clause. Similar must have been the reading which the Syr. translator had before him, as he renders

ܡܢܝ, for them. Luther retains the Hebrew

word, Meni. De Wette renders it, *Verhängniss*; Alexander, *fate*; the A. V., *number*. The whole verse in which the word occurs runs thus: 'Ye are forsakers of Jehovah, forgetters of his holy mountain, who prepare for Gad a table, and fill up for Meni a mixture.' There can be little doubt that *Gad* and *Meni* are proper names of certain objects of idolatrous reverence among the apostate Jews. The only question is, What are the objects denoted by the names? On this point opinions are very much divided. Omitting the former word [see GAP], we confine ourselves to the latter. The radical meaning of the word is, *allotting, apportioning, measuring out*, from מָנָה. Most of the inter-

pretations proposed keep this in view. A sample of these follow:—1. *Number*, because the Jews referred to in the context, after the manner of the Pythagoreans, worshipped number. 2. The *Stars*, because they are so numerous. 3. *Idols*, because they were innumerable. 4. A certain deity called *Meni*, worshipped in Armenia and Phrygia. The ancient name of Armenia, Minni, it is said, was derived from an illustrious king who reigned over that country in ancient times, and who, after his death, was translated among the gods. 5. The planet *Mercury*, 'the god of numbers,' which was regarded as exercising an influence on human affairs, and to which libations were poured out to secure a happy issue of events. 6. The *Moon*, because most peoples were accustomed to measure their time according to it, following the lunar rather than the solar year. The similarity of מְנִי to the Hebrew word is regarded as a confirmation of this view. 7. The planet *Saturn*, *Gad* denoting Jupiter (Ewald). 8. The same as the idol worshipped by the Arabians before the time of Mohammed, and called in Arabic *Manah*. [See for authorities, *Poli Synop. Crit.*, in loco; Alexander's *Earlier and Later Prophecies of Isaiah*; Henderson's *Isaiah*; Ges., *Thes.*, etc.] 9. Fürst takes the word as denoting *fate*—the goddess of fate. It is, he says, 'N. pr. idoli vel sideris quod superstitione lectisterniis et libationibus a Judæis in Babylonia extorribus colebatur, a v. מְנָה, adsignare, attribueret, hinc, attributio, μοῖρα, fortuna, deinde Dea fati (Schicksalsgöttin). Fortuna, arab. مَنَاة, una ex tribus Dei filius ut fert Mythologia Arabum vetusta' (*Vet. Test. Concord. Heb. et Chal.*, in v.) 10. Gesenius says, 'Fortunæ significatio ex com. 12. certa est, et non potest non numen aliquod dici, quod fortunæ, s. fato praeesse credebatur. Intelligende igitur Veneris stella, quam ut fortunæ datricem uno cum Gado (i. e., Jove Stella) cole-

bant veteres Semitæ' (*Thes.* 798). 'Amidst this diversity of theories and explanations . . . it is satisfactory to find that there is a perfect unanimity upon the only point of exegetical importance, that the passage is a description of idolatrous worship' (Alexander). The kind of worship given to *Gad* and *Meni* is supposed to be identical with the *lectisternia* of Roman writers, 'feasts offered to the gods, in which their images were placed on couches before tables covered with viands' (Smith's *Lat. Dic.*) The מְנִי filled for *Meni* denotes a mixture, i. e., most probably, of spiced wine. The custom mentioned by *Jerome* as having existed in ancient Egypt is thought to illustrate the present passage. On the last day of the year the Egyptians placed a table covered with dishes of various kinds, and a cup filled with mead [the mixture], as an offering in acknowledgment of the fertility of the past year, and to secure a continuance of the blessing (see *Com.*, in loco).—I. J.

MENOCHIVS, JOHN STEPHEN, a Jesuit priest, was born at Pavia in 1576, and died at Rome, 4th February 1655. He was selected by his brethren to expound the Scriptures in the college at Milan, a duty which he discharged with great success. The substance of his lectures appeared in the form of commentaries on all the books of Scripture. The best edition is that edited by Tournamin and published at Paris in 1719, in 2 vols. fol. He had a share also in the annotations in the *Biblia Magna*, published at Paris in 1643 in 5 vols. fol. His commentaries are appended to an edition of the Vulgate which appeared at Vienna in 1755 in 7 vols. 4to. They consist chiefly of selections from the notes of others; but these are made with much judgment, are well arranged, and are presented in a clear style, so that the compilation is, as a whole, very useful.—W. L. A.

MEONENIM. The word occurs in the A. V. (Judg. ix. 37) in the proper name Elon-Meonenim (אֵלֹן מְעֹנְנִים), 'the plain'; or, as it should be rendered, 'the oak of Meonenim' (LXX. Ἠλὼν Μαιωνενίμ, cod. Alex. δένος ἀποβλεπόντων, marg. A. V. 'regardars of times').\* Meonenim means 'sorcerers,' and is derived either from מְנִי, 'time' (Exod. xxi. 10), from עֵין, 'the eye,' or else, which is more probable, from עָנָה, 'a cloud'; it means, therefore, those dealers in forbidden arts who observe times, or practice fascination, or take auguries from the signs of the sky. For a full examination of the word in all its possible meanings, see DIVINATION, vol. i. 685, 686. Whatever was its original meaning, Meonenim was afterwards used in a perfectly general sense (Deut. xviii. 10, 14; 2 Kings xxi. 6; Micah v. 12) for wizards.

In this article, therefore, we are only concerned with 'the Oak of the Sorcerers,' a celebrated tree near Shechem, mentioned in Judg. ix. 37, where Gaal, son of Ebed, the Shechemite conspirator, standing 'in the entering of the gate,' sees the soldiers of Abimelech first on the hill-tops, and then in two companies, of which one approached by the 'Oak of the Sorcerers,' which is evidently

\* In the A. V. Meonenim is variously rendered 'soothsayers,' 'regardars of times,' etc.

pointed out as a conspicuous\* land-mark. Now it happens that in Scripture no less than *four* other celebrated trees in the immediate neighbourhood of Shechem are prominently mentioned in connection with important events, and it is interesting to inquire whether all or any of these can be identified with 'the Sorcerer's Oak.'

1. In Gen. xii. 6 we are told that Abraham 'passed through the land unto the place of Shechem, unto the oak of Moreh' (LXX., *τὴν δρὸν τὴν ὑψηλήν*), where the use of the singular points to *one* tree of note, although at Shechem there was a grove of oaks (Deut. xi. 30). It was, therefore, in all probability conspicuous for size and beauty, and the vision which Abraham there commemorated by building an altar would add to it a sacred and venerable association.

2. In Gen. xxxv. 4 we read that Jacob, on his way to Bethel, took from his family all the strange gods which were in their hand, and all their earrings which were in their ears, and hid them under the oak which was by Shechem (*הָאֵלֶּה אֲשֶׁר עִם* *הָאֵלֶּה*). The use of the article in this verse is not indeed absolutely decisive, but would lead naturally to the supposition that this tree was the one already so famous in the religious history of the Israelite family. That *אֵלֶּה* is used (LXX., *τερεβινθος*) and not *אֲלֵן*, is a consideration of no importance, for it seems certain that the two words are synonymous (see Gesenius, *Thes.*, pp. 50, 51), or at any rate are used interchangeably.

3. In Josh. xxiv. 26, Joshua, after addressing the assembled tribes at Shechem, 'took a great stone and set it up there under an oak (*the oak, הָאֵלֶּה*) that was by the sanctuary of the Lord.' The use of the definite article again renders it probable that this is the same tree as that which had been connected with the memories of Abraham's vision, and Jacob's rejection of idolatrous possessions; and the probability is strengthened into certainty by the fact that Joshua's injunction in ver. 14 ('put away the gods which your fathers served on the other side of the flood') is almost identical with that which Jacob had addressed to his family on that very spot (Gen. xxxv. 2) some 300 years before. Kalisch indeed objects that a 'sanctuary of the Lord' would never have been erected at the place of idols (*Genesis*, p. 586); but, to say nothing of the fact that *several* of the Jewish high-places seem to have been also connected with the worship of the Canaanites, a place where idols had been buried, and so rejected and scorned, would surely be most fitted for the sanctuary, especially if it had been hallowed by a previous protest made by the great forefather of the race against the idolatry which there surrounded him (Gen. xii. 7).

4. In Judg. ix. 6, we read that 'all the men of Shechem . . . made Abimelech king, by the oak (A. V. plain) of the pillar that was in Shechem (*עֵם* *בְּשֶׁכֶם*). The word *מֵצֵב* is very obscure, and Jerome's version, 'quercus quæ stabat

in Sichem,' seems to show that it may once have *foli-  
loved* *אֲשֶׁר*. The LXX. render it *πρὸς τῇ βαλάνῳ*

(*τῇ εὐρετῇ*) *τῆς στάσεως τῆς ἐν Σικίμοις*, where *στάσις* means 'a military station,' a rendering approved by Gesenius (*Thes.*, p. 904), who compares Is. xxix. 3. Our A. V. refers it to the sacred stone set up by Joshua, and this seems a very probable rendering, from the constant use of the word *Mattsebah* for similar erections (Gen. xxviii. 18; Exod. xxiv. 4; 2 Kings iii. 2; Micah v. 13, etc.) The argument that this tree cannot be identical with Jacob's, because *that* is spoken of as *near* (*עִם*),

and *this* as *in* (*ב*) Shechem, is quite unconvincing, both because the use of the prepositions by Hebrew writers is by no means minutely\* accurate, in this way corresponding to their general *ἀγνοογραφία*, and because Shechem may mean the *district*† *round the city*, as well as the city itself. We believe, therefore, that all these trees are one and the same, which thus becomes connected with four most memorable events in the lives of Abraham, Jacob, Joshua, and Abimelech.

Was this tree also the 'oak of the sorcerers?' Mr. Grove (Smith's *Bibl. Dict.*, ii. 323) thinks there is a positive reason *against* the identification, because (1.) The name 'sorcerers,' or 'enchanters,' would not be particularly suitable to the tree, which Kalisch also thinks might with more propriety have been called the 'oak of idols,' or of 'witchcraft,' than the oak of enchanters (*Gen.*, p. 586); and (2.) Because Gaal evidently points to the Elon Meonenim at a distance from the city, whereas Jacob's tree was in it. Of this second argument we have already disposed;‡ and besides, Gaal's expression may merely mean that one company was on the *road which led by* 'the sorcerer's oak.' As regards the first argument, the Elon Meonenim may have been the same as Jacob's tree, and yet *not* have received its name from the idols and amulets which Jacob buried there. The close connection of earrings with talismans and magic arts is well known, and in the Chaldee the word used for earring is *קְרִישָׁא*, so that it does seem *reasonable* to suppose that there is a connection between the name and the event. But if not, *may not the name have originated in some use made of the tree by the priests and necromancers of the neighbouring shrine of Baal-Berith?* (Judg. viii. 33; ix. 36). And if it be asked how it was that a tree so sacred as this could have received an *opprobrious name*, it must be borne in mind that this name only occurs on the lips of Gaal, *who in all probability was an aboriginal Canaanite of the old royal family* (ix. 28; cf. Gen. xxiv. 2, 6), and *who would therefore be likely to call the tree by a name derived from its associations with idolatrous rather than with Jewish worship.*—F. W. F.

\* Thus Rosenmüller, in commenting on Josh. xxiv. 26, says, 'Præpositio ב pro אֵל capienda' (*Schol.* ad. loc.)

† For a decisive case in point, see Josh. v. 13, where the Vulgate rightly renders *בְּיִרְיָח* by 'in agris urbis Jericho.'

‡ Indeed, Mr. Grove cannot attach any great importance to it, for he identifies Jacob's oak with *Joshua's*, although the very same argument holds against that identification.

\* It would be the better suited for this purpose because oaks are rare in Palestine, except in the hills. For other trees used as land-marks, see Gen. xxxv. 8; 1 Sam. xxii. 6; x. 3; xiv. 2, etc.

MEPHAATH (מִפְּעַת; Jer. xlviii. 21 (Kethibh) מִפְּעַת; Vulg. *Mephaath, Mephath*). A city in the tribe of Reuben, situated in the plain country or Mishor; assigned to the sons of Merari; subsequently in the possession of the Moabites (Josh. xiii. 18; xxi. 37; 1 Chron. vi. 79; Jer. xlviii. 21). In the time of Eusebius, who writes the name Μηφάθ, it was the station of a Roman garrison, placed there on account of the proximity of the desert (*Onomast.*) As it is always mentioned in combination with either Jahaza or Kedemoth, its site cannot have been far from these cities; and the meaning of the word, as derived by Fürst (*II. W. B.*), from מִפְּעַת, to be prominent, conspicuous, seems to point to it as placed on an eminence. The renderings of the name in the Sept. are very various: Josh. xiii. 18, Μαφάαδ, Alex. Μηφάαδ; xxi. 37, Μαφά, Alex. Μασφά; 1 Chron. vi. 79, Μαεφλά, Alex. Φάαδ; Jer. xlviii. 21, Μωφάδ.—H. C. G.

MEPHIBOSHETH (מִפִּי בִשֶׁת; Sept. Μεμφι-βοσθῆ)—1. The son of Saul by Rizpah his concubine (2 Sam. xxi. 8). He and his brother Armoni were, with the five sons of Michal [MERAB], delivered up by David to the Gibeonites, by whom they were 'hanged up' as a sacrifice of purgation for the guilt brought by Saul on the land by the slaughter of the Gibeonites. That the verb translated 'hanged up,' in the A. V., intimates that their bodies were fastened by some means to a stake, seems certain (comp. Num. xxv. 4); but it is not so certain that the Vulgate rendering *crucifixerunt* is the right one here. The LXX. give ἐξηλασαν, which decides nothing as to the mode of exposure; but Aquila has ἀνέπηξαν, which would rather convey the meaning that they were impaled (comp. Aristoph., *Eccles.* 843). In whatever manner fastened, their bodies were exposed to the action of the elements from the beginning of harvest till the rains began to fall—that is, from April to October; during which time they were defended from the attacks of birds and beasts of prey by the pious care of Rizpah who watched them day and night for that period (2 Sam. xxi. 10).—W. L. A.

2. The son of Jonathan, and nephew of the preceding (2 Sam. iv. 4; also in 1 Chron. ix. 40, MERIB-BAAI). He was only five years of age when his father and grandfather were slain in Mount Gilboa; and on the news of this catastrophe, the woman who had charge of the child, apprehending that David would exterminate the whole house of Saul, fled away with him; but in her hasty flight she stumbled with the child, and lamed him for life (B.C. 1055). Under this calamity, which was very incapacitating in times when agility and strength were of prime importance, Mephibosheth was unable to take any part in the stirring political events of his early life. According to our notions, he should have been the heir of the house of Saul; but in those times a younger son of an actual king was considered to have at least as good a claim as the son of an heir-apparent who had never reigned, and even a better claim if the latter were a minor. This, with his lameness, prevented Mephibosheth from ever appearing as the opponent or rival of his uncle Ishbosheth on the one hand, or of David on the other (2 Sam. ix.) He thus grew up in quiet obscurity in the house of Machir, one of the great

men of the country beyond the Jordan (2 Sam. ix. 4; xvii. 27); and his very existence was unknown to David till that monarch, when firmly settled in his kingdom, inquired whether any of the family of Jonathan survived, to whom he might show kindness for his father's sake. Hearing then of Mephibosheth from Ziba, who had been the royal steward under Saul, he invited him to Jerusalem, assigned him a place at his own table, and bestowed upon him lands, which were managed for him by Ziba, and which enabled him to support an establishment suited to his rank. He lived in this manner till the revolt of Absalom, and then David, in his flight, having noticed the absence of Mephibosheth, inquired for him of Ziba, and being informed that he had remained behind in the hope of being restored to his father's throne, instantly and very hastily revoked the grant of land, and bestowed it on Ziba (2 Sam. xvi. 1-4). Afterwards, on his return to Jerusalem, he was met with sincere congratulations by Mephibosheth, who explained that, being lame, he had been unable to follow the king on foot, and that Ziba had purposely prevented his beast from being made ready to carry him; and he declared that, so far from having joined in heart, or even appearance, the enemies of the king, he had remained as a mourner, and, as his appearance declared, had not changed his clothes, or trimmed his beard, or even dressed his feet, from the day that the king departed to that on which he returned. David could not but have been sensible that he had acted wrong, and ought to have been touched by the devotedness of his friend's son, and angry at the imposition of Ziba; but to cover one fault by another, or from indifference, or from reluctance to offend Ziba, who had adhered to him when so many old friends forsook him, he answered coarsely, 'Whyspeakest thou any more of thy matters? I have said, thou and Ziba divide the land.' The answer of Mephibosheth was worthy of the son of the generous Jonathan:—'Yea, let him take all; forasmuch as my lord the king is come again in peace unto his own house' (2 Sam. xix. 24-30). Undoubtedly David does not shine in this part of his conduct to Mephibosheth; but some of the German writers, in their eagerness to impugn the character and motives of 'the man after God's own heart,' have handled the matter much more severely than a due consideration of the difficult circumstances in which the king was placed will be found to justify.

We hear no more of Mephibosheth, except that David was careful that he should not be included in the vengeance which the Gibeonites were suffered to execute upon the house of Saul for the great wrong they had sustained during his reign (2 Sam. xxi. 7).—J. K.

MERAB (מֵרָב; LXX. Μεράβ; Joseph. Μεράβη; Vulg. *Merab*), the elder of Saul's two daughters (1 Sam. xiv. 49; xviii. 17; Joseph. *Antiq.* vi. 6. 5), whom her father promised to give in marriage to David, in the hope that the warlike service which was imposed as a condition would issue in the death of the latter at the hands of the king's enemies. It has been inferred from David's reply (ver. 18) that he was disinclined to this alliance; but his words appear to be nothing more than the customary expression of self-depreciation which Eastern politeness expected from those who were about to receive a favour from a

superior. Similar expressions are used, 1 Sam. xviii. 23; xxv. 41; 2 Sam. ix. 8; where it is plain that no disinclination is either expressed or implied. The offer of Saul was accepted by David, and the condition it imposed was probably fulfilled by one or more military expeditions; but at the time when Merab should have been given to David, the king was faithless to his promise, and gave his daughter to Adriel the son of Barzillai the Meholahtite. Of this marriage five sons were the issue, and these, with the two sons of Rizpah, were the seven members of the family of Saul whom David delivered to the Gibeonites as an atonement for the wrong which Saul had done to that people (2 Sam. xxi. 8). In the Hebrew text of the passage just referred to, the mother of the five sons of Adriel is named Michal. There is scarcely room for doubting that this is an error of transcription, although of very early date, for it must have existed in the copies used by the LXX., and is followed by Josephus; such at least seems to be the most probable explanation of the incredible statement respecting Michal made by this writer (*Antiq.* vii. 4. 3). The translators of the A. V., following the explanation given by the Targum, have endeavoured to evade the difficulty by rendering יָלְדָה 'she brought up,' notwithstanding they had already translated the same word in the former part of the verse by 'she bare.' The Syriac has, in this verse, the same name as that given in all the other passages in which she is mentioned to the elder daughter of Saul, which, according to the present text, is נֹדֹב. — S. N.

MERAIOTH (מֵרַיֹוֹת; Sept. Μαρεϊθ, 1 Chron. vi. 6, 7, 52; Μαρεώθ, Ezra vii. 3; Μαριώθ, Neh. xi. 11; Alex. Μαραιώθ, 1 Chron. vi. 6, 7; Ezra vii. 3; Μεραϊώθ, 1 Chron. vi. 52). 1. A descendant of Aaron through Eleazar. Lightfoot (*Temple Service*, ch. iv. sec. 1) makes him the last high-priest of the line of Eleazar, and makes him precede Eli, the first of that of Ithamar; 2. A priest who, in the genealogy of Azariah, is placed between Ahitub and Zadok (1 Chron. ix. 11; Sept. Μεραϊώθ; Alex. Μαριώθ); 3. The head of a priestly house, which, in the time of Joshua, was represented by Helkai (Neh. xii. 15; Sept. Μαριώθ). In ver. 3 he is called Meremoth, for which Meraioth is probably a clerical mistake. — †

MERAN (Μερράν), a place mentioned along with Theman (Θαμάν), as famous for its merchants and its wise men (Bar. iii. 23). As the connection leads us to Arabia, we are probably to seek for Meran there. It may be Mohrah in Desert Arabia, or Marane of which Pliny speaks (*N. II.*, vi. 28, 32). Strabo (xvi. 4, p. 776) and Diodor. Sic. (iii. 43) also mention the Μαπαῖρα. The conjecture of Grotius that it is the Mearah mentioned Josh. xiii. 4 [MEARAH]; that of Hitzig (*Psalmen II.* p. 119) that Μερράν is a mistake for the word מֵרַיֹוֹת of the Heb. original; and that of Hävernicks (*De libro Baruch*, p. 5) that it is the Syrian town סַלְסַסִּינֹס, are mere guesses without any ground or reason (comp. Fritzsche, *Exeg. Hdb. z. Apok.*, in loc. — W. L. A.

MERARI (מֵרַאֲרִי, bitter; Sept. Μεραρι), youngest son of Levi, born in Canaan (Gen. xlv. 11; Exod. vi. 16; Num. iii. 17; 1 Chron. vi. 1).

He is only known from his name having been given to one of the three great divisions of the Levitical tribe. [LEVITES.]

MERATHAIM (מֵרַתַּיִם). When pronouncing a prophetic doom upon Babylon, Jeremiah makes use of these words, 'Go up against the land of Merathaim, even against it, and against the inhabitants of Pekod; waste and utterly destroy after them, saith the Lord' (l. 21). The word *Merathaim* appears to be an epithet or symbolic name applied to Babylon, and the kingdom of which it was then the capital, to indicate the relation in which it stood to the Jews. מֵרַתַּיִם is dual of מָרָה, which signifies 'bitter affliction;' it may, therefore, be intended to express the double captivity—that of Israel and that of Judah. Gesenius renders מֵרַתַּיִם הָאָרֶץ, *terra duplicis contumacie* (*Thes.* p. 819); and all the ancient versions agree in translating the word as an appellative, and not a proper name. The LXX. is very loose, the only word representing Merathaim is πικρῶς; the Vulgate has *super terram dominantium* (see Maurer, *ad loc.*)—J. L. P.

MERCERUS, JOHN (Mercier, John le), a very eminent Orientalist of the 16th century. He was a native of Languedoc, and held the chair of Hebrew and Chaldee in the Royal College of Paris in 1549. Dupin remarks that his lectures were so popular and interesting that 'the royal auditory was always full when he read.' His great works are the following:—*In Genesin Commentarius addita Theodori Beza prefatione*, fol., Gen. 1598; *Commentarii in Jobum et Proverbia, Ecclesiasten, Canticum Canticorum*, fol., L. Bat. 1651; *Commentarii in Prophetas quinque priores, Minores*, fol., Gen. 1573; *Commentarii in Vates quinque priores quibus adjuncti sunt R. Jarchi, Aben Ezra et R. Kimchii Commentarii ab Latinitate donati. Editio Altera*, Cura G. C. Bürklini, Gissæ 1695. Mercerus having, after much earnest inquiry, fully embraced the Protestant faith, left Paris, and went to live in Venice. As a commentator he is described as having 'joined to an extensive knowledge of the languages, particularly Hebrew, a vast erudition, much judgment, candour, and simplicity.' Mercerus died in 1570.—W. J. C.

MERCURY. [HERMES.]

MERCY-SEAT (כִּפֹּרֶת; Sept. ἱλαστήριον; Vulg. *propitiatorium*; Luth. *gnadenstuhl*). The Hebrew name literally denotes a *cover*, and, in fact, describes the lid of the ark with cherubim, over which appeared 'the glory of God' (Exod. xxvi. 17, *seq.*; xxx. 8; xxxi. 7, and elsewhere). [ARK.] Compare 1 Chron. xxviii. 11, where the holy of holies is called the בֵּית הַכִּפֹּרֶת, 'house of the mercy-seat.' The idea involved in these translations seems to be founded upon the metaphorical application of the word כִּפֹּר *copher*, to *cover*, thus making 'to cover sin' mean to forgive or expiate it. The word used in the Septuagint and N. T. to translate the term, is ἱλαστήριον, the 'expiatory,' or 'propitiatory,' in allusion to that application of the Hebrew word which we have noted: which application is in this instance justified and explained by reference to the custom of the high-priest once a year entering the most holy place, and sprinkling the lid of the ark with the blood of an expiatory victim, whereby 'he made atonement

for the sins of the people.' As this was the most solemn and significant act of the Hebrew ritual, it is natural that a reference to it should be involved in the name which the covering of the ark acquired. By a comparison of the texts in which the word occurs, it will be seen that there would, in fact, have been little occasion to name the cover of the ark separately from the ark itself, but for this important ceremonial. From this it seems to follow that 'mercy-seat' is not a good or correct representative of the idea involved in the metaphorical sense of the original Hebrew, and still less of the Greek *ἱλαστήριον*. It carries the idea a stage further from the original. The lid of the ark was no doubt the 'seat of mercy,' but it was mercy conferred through the act of expiation; and therefore a name bringing the sense nearer to the idea of expiation or of propitiation would be more exact. The term 'mercie seat' occurs in Barker's Bible, but is explained there by 'or covering, or propitiatorie;' and the notion which led the English translators to call it 'mercie-seate,' is expressed in the note—'There God appeared mercifully unto them: and this was a figure of Christ.' In the same Bible a figure of the covering of the ark is given separately, and the explanatory description is, 'The propitiatorie, or mercie-seate, which is the covering of the arke of the testimonie.'—J. K.

MERED (מֶרֶד, LXX. *Μωράδ, Μωρήδ*), a man of the tribe of Judah, mentioned in an obscure part of its genealogies (1 Chron. iv. 17, 18). His period is uncertain, but it is probable that he lived not long after the occupation of Palestine. Othniel, and Caleb the son of Jephunneh, are mentioned just before him (13, 15), and amongst his apparent sons were fathers of cities, therefore probably founders or first Israelite occupiers of them (18). In his genealogy the name Miriam also occurs, seemingly as that of a daughter. Respecting him a remarkable circumstance is related, that he married an Egyptian princess. It is said, after mention of the names thought to be of his children, 'And these [are] the sons of Bithiah the daughter of Pharaoh, which Mered took' (18). Another wife is spoken of called 'the Jewess' Jehudijah (18), apparently the same as Hodiah (19). It has been supposed that Pharaoh is here the name of an Israelite, but there are strong reasons for the common and contrary opinion. The name Bithiah, 'daughter,' that is 'Servant, of the Lord,' is appropriate to a convert. It may be observed that the Muslims of the present day very frequently give the name 'Abdallah, 'Servant of God,' to those who adopt their religion. That another wife was called the Jewess, is in favour of Bithiah's Egyptian origin. The name Miriam, if, as we believe, Egyptian, is especially suitable to the child of an Egyptian. We therefore suppose Mered's wife Bithia to have been the daughter of an Egyptian king. [BITHIA.] If, as we hold, the Exodus took place before the 18th dynasty, her father may have been one of the contemporary sovereigns who then ruled Egypt, and she may have been taken in border warfare. If she were the daughter of a king of the 18th or a later dynasty of the empire, it would be probable that she was given in marriage to Mered, who would appear to have been a powerful chief, from the mention of towns colonized, as it seems, by his descendants.—R. S. P.

MEREMOTH (מֶרְמוֹת). 1. (Sept. *Μερμώθ*; Alex. *Μαρμώθ*.) A priest to whom was entrusted the weighing of the silver, the gold, and the vessels of the temple in the time of Ezra (viii. 33). He is mentioned also by Nehemiah (iii. 4; Sept. *Παμώθ*) as taking part in the building of the wall of Jerusalem, and it is probably the same person who is named in ver. 21 (Sept. *Μερμώθ*). He was the son of Uriah, of the family of Koz. After the statement in Ezra ii. 62 respecting the exclusion of this family from the priesthood, it is puzzling to find one of this family recognised as a priest; but probably the exclusion did not extend to the whole family, some being able to establish their pedigree.—2. One of the sons of Bani who had married a foreign wife (Ezra x. 36; Sept. *Μαρμώθ*).—3. A priestly family who signed the covenant (Neh. x. 5; xii. 3, *Μερμώθ*). In the days of Jeshua this family was represented by Helkai. [MERAIOTH, 3.]—W. L. A.

MERI-BAAL, or MERIB-BAAL (מֶרִי-בַעַל, generally מֶרִי-בַעַל; Sept. *Μεριβάαλ, Μερειβάαλ*; Alex. *Μεφριβάαλ, Μεχριβάαλ*), a name given to Mephibosheth, son of Jonathan, in 1 Chron. viii. 34; ix. 40 [MEPHIBOSHETH]. Of the two, the latter seems the more correct form. Some think that the difference has arisen from some corruption of the text; but, from the analogy of Ishbosheth, whose original name was Esh-baal, it seems more like a designed alteration, arising probably from the reluctance of the Israelites to pronounce the name of Baal. [ISHBOSHETH.]

MERIBAH (מֶרִיבָה, *quarrel, strife*). 1. One of the names given by Moses to the fountain in the desert of Sin, on the western gulf of the Red Sea, which issued from the rock which he smote by the divine command (Exod. xvii. 1-7). He called the place, indeed, Massa (temptation) and Meribah, and the reason is assigned 'because of the chiding of the children of Israel, and because they did there tempt the Lord.' [WANDERING.]

2. Another fountain produced in the same manner, and under similar circumstances, in the desert of Zin (Wady Arabah), near Kadesh; and to which the name was given with a similar reference to the previous misconduct of the Israelites (Num. xx. 13, 24; Deut. xxxiii. 8). In the last text, which is the only one where the two places are mentioned together, the former is called Massah only, to prevent the confusion of the two Meribahs. Indeed, this latter Meribah is almost always indicated by the addition of 'waters,' *i. e.*, 'waters of Meribah' (מִי מֶרִיבָה), as if further to distinguish it from the other (Ps. lxxxi. 7; cvi. 32); and still more distinctly, 'waters of Meribah in Kadesh' (Num. xxvii. 14; Deut. xxxii. 51; Ezek. xlvii. 19). Only once is this place called simply Meribah (Ps. xcv. 8). It is strange that, with all this carefulness of distinction in Scripture, the two places should rarely have been properly discriminated. The distance of place from the former Meribah, the distance of time, and the difference of the people in a new generation, are circumstances which, when the positive conditions of the two wells were so equal, explain why Moses might give the same name to two places.—J. K.

MERODACH (מֶרֶדַךְ; Sept. Μαρωδάχ) occurs in Jer. I. 2, in such connection with idols as to leave no doubt that it is the name of a Babylonian god. In conformity with the general character of Babylonian idolatry, Merodach is supposed to be the name of a planet; and, as the Tsbian and Arabic names for Mars are Nerig and Mirrich, 'arrow' (the latter of which Gesenius thinks may be for Mirdich, which is very nearly the same as Merodach), there is some presumption that it may be Mars. As for etymologies of the word, Gesenius has suggested that it is the Persian *mardak*, the diminutive of *mard*, 'man,' used as a term of endearment; or, rather, that it is from the Persian and Indo-Germanic *mord*, or *mort* (which means death, and is so far in harmony with the conception of Mars, as the lesser star of evil omen), and the affix *och*, which is found in many Assyrian names, as Nisroch, etc. The bloody rites with which Mars was worshipped by the ancient Arabs are described in Norberg's *Onomast. Codicis Nasar.*, p. 107.—J. N.

[It is doubtful if any phonetic representative of Merodach has been found on the monuments. There is great uncertainty also as to his titles and attributes. In the most ancient monuments he seems to be called 'the old man of the gods,' and 'the judge.' Though primarily a Babylonian deity, and perhaps the tutelary deity of the city of Babylon, he was also worshipped in Assyria. As to the etymology of the name, it is very doubtful if we should seek for it in a Semitic or Aryan source (Rawlinson, *Ancient Monarchies*, i. 169; ii. 255; *Translation of Herodotus*, i. 627-31)].

#### MERODACH BALADAN (מֶרֶדַךְ בַּלְאָדָן)

'son of Baladan, king of Babylon,' sent letters and gifts to Hezekiah, ostensibly as an embassy of congratulation on Hezekiah's recovery from his sickness (2 Kings xx. 12, where the name is miswritten *Berodach B.*; Is. xxxix. 1; in 2 Chron. xxxii. 31 the writer mentions only 'the ambassadors of the princes of Babylon who sent unto him to inquire of the wonder that was done in the land'). That the embassy had a political object (Joseph. *Antiq.* x. 2. 9) is very probable; and, perhaps, the statement, 'Hezekiah was glad of them,'\* and the mention of his showing them 'all his treasures and all the house of his armour,' may imply that he was disposed to listen to overtures of alliance. Any such intention, however, on the part of Hezekiah was effectually checked by the stern reproof of the prophet Isaiah.

This incident forms one of the connecting points between sacred and profane chronology [CHRONOLOGY, sec. 12-15]. Indeed, of late it has become cardinal to the whole question of the relations subsisting between the Biblical annals and those of Assyria and Babylon for the time of Sargon and Sennacherib. It is placed, with the connecting words 'At that time,' immediately after Hezekiah's recovery, which, as being 15 years before the close of his reign of 29 years, should fall in his 14th year, which is expressly named as the year of Sennacherib's invasion (2 Kings xviii. 2, 13; xx. 6;

Is. xxxvi. 1; xxxviii. 5). This 14th year, as it lies 107 years before 4 Jehoiakim = 1 Nebuchadnezzar, comes to 713 or 711 B.C. according as 1 Neb. is set on Biblical data at 606, or with the Canon at 604 B.C. Now the Canon has *Mardokempad* reigning in Babylon 12 years at Ae. Nab. 26-38 = 721-709 B.C. The time agrees; and the name, read *Mardok-empal* (A for Δ), is well explained as *Mardok-bal* (by the consideration that the modern Greek uses μπ to denote the *b* of other languages, its own β being our *v*), with the *adan* dropt for shortness. So Bunsen, *App. to Egypt's Place*, i. 726; Dr. Hincks, *Journal of Sac. Lit.*, No. xv. 134. Knobel's explanation, on Is. xxxix. 1, is less satisfactory; Ewald, *Gesch. des V. Isr.*, iii. 344, makes *empad* an abbreviation from *empalad*.

But the Armenian version of the lost *Chronicon* of Eusebius brought to light a passage of Berossus, preserved by the Polyhistor, which, if authentic, disproved the identification of Merodach Baladan with Mardokempad, and altogether disturbed the received chronology of Hezekiah's reign. It purports that 'after the reign in Babylon of a brother of *Senecherim*, Akises had reigned not 30 days when he was slain by *Marudach Baldan*, who, after an usurpation of six months, was slain by one *Elibus*. But in the third year of this *Elibus*, *Senecherim*, king of Assyria, invaded Babylon, took *Elibus* captive, and made his own son *Asordanes* king' (*Chron. Armeno-lat.*, i. 5). To this the Polyhistor appends an enumeration of reigns amounting to 88 years, from 1 Senn. to 1 Neb., which makes 1 Senn. = 692 B.C., *i.e.*, 17 years after the end of the 12 years of Mardokempad, and 5 (or 3) years after the death of Hezekiah in the usual chronology. But it happens that at this precise year, 692 B.C., the Canon has *Mesessi-Mordak* reigning in Babylon 4 years: this, then, becomes the Merodach Baladan of Scripture and Berossus to those who accept the numbers of Polyhistor, and therewith Niebuhr's proposal to strike off 20 years from the 55 of Manasseh, so lowering 1 Hezekiah to 704 B.C., and 14 Hezekiah to 691 B.C., synchronizing with the 2d of Sennacherib and of Mesessi-Mordak (Movers, *die Phönizier*, i. 154; v. Gumpach, *Abriss der Bab. Assy. Gesch.*; Lepsius, *Königsbuch der Aeg.*, 97, ff.; Scheuchzer, *Pul u. Nabonassar*). Of those who held to the Biblical numbers and to Mardokempad as the M. B. of Scripture, some, rejecting Polyhistor's numbers, affirmed the M. B. of Berossus to be the M. B. of Scripture (Gesenius, *Comm. über Jesai.*, 998, ff.; Brandis, *Rerum Assy. temp. emend.*—retracted in a later work; *Ordo Saec.* sec. 496—also retracted): by most this identity was denied (Winer, *R. W. B.*, s. v.; Ewald, *Gesch.* iii. 344; Hitzig, *über d. Begriff der Kritik*; Knobel, *in loc.* Esai.; Thénius, *in loc.* 2 Kings). A third view, taken by Duncker (*Gesch. des Alterth.*, i. 456), involves the assumption that the embassy from M. B. (of Berossus, not = Mardokempad) occurred long after the Assyrian invasion and Hezekiah's illness (see Knobel, *u. s.*): this, which also requires an alteration of Polyhistor's numbers, is quite incompatible with the Scripture narrative [HEZEKIAH, p. 296, col. 2].

So far the inquiry was confined to the collation of Scripture, the Canon, and Berossus. It has passed those limits now. The information obtained from *Assyrian monuments* can no longer be ignored, now that the substantial reality of their decipherment is a fact not to be gainsaid but by the wilfully blind.

\* וַיִּשְׁמְעוּ עֲלֵיהֶם, ἐχάρη ἐπ' αὐτῶν, LXX., and so all the versions; the ungrammatical וַיִּשְׁמְעוּ, 'hearkened to them,' of 2 Kings, is corrupt.

(1.) In the great inscription of Khorsabad, *Salles* iv., vii., viii., x., published with interlinear Iecipherment and Latin translation by Oppert and Ménant (*Fastes de Sargon*, 1863), the king Sargina (Is. xx. 1) relates, p. 7, how he made war upon *Marudak Bal-idin*, son of *Jakin*, who 'for twelve years, against the will of the gods, had forcibly held Babylon.' In another large inscription, *Salles* ii., v., xiii., xiv., which, as detailing the campaigns year by year, may be called the *Annals of Sargon*, the defeat and dethronement of this *Marudak Bal-idin* are related under Sargon's twelfth year. Hence it appears that Sargon and M. B. began to reign in the same year. And the inscription, in giving to this M. B. a reign of twelve years, is held, and justly, to prove him identical with *Mardokempad*, to whom, and to no other of its Babylonian kings, the Canon gives twelve years of reign. So, the epoch of Sargon is defined to the year 721 B.C.

(2.) From the lists of the *eponymi*, or high officers by whose names the years were designated (as at Athens by archons, at Rome by consuls, etc.), it appears that Sargina reigned 17, or, according to one copy (Canon 4), 18 years. See the lists as rendered by Sir H. Rawlinson in *Athen*. May and July '62, and by Oppert in *Inscr. des Sargonides*, p. 15, ff. (but comp. *Athen*. '63, p. 245, note 13). Hence the reign of Sennacherib would begin 704 or 703 B.C.

(3.) Sennacherib, in his *Annals* (on the 'Taylor Cylinder,' dated in his 15th year), records that in his first year\* he vanquished *Marudak Bal-idin*, king of lower Chaldea: the 'Bellino Cylinder,' dated in his 4th year, records further that he gave the vacant throne to a certain officer whose name Sir H. Rawlinson originally read *Bel-adon*, now *Bel-ipni* or *Bel-abana*, *Athen*. Aug. 1862, p. 85; Oppert, *Bel-ibnuu*; but Dr. Hincks reads it *Bel-ib*, and so Brandis, *über den hist. Gewinn*, etc., p. 44, note. In the 3d year ('Taylor Cylinder') is related the expedition against Syria, with the defeat and submission of *Hezekiah*; in the 4th year, *Marudak Bal-idin* reappears, is again defeated, and Sennacherib's son *Assurnadin* is placed on the throne of Babylon (Oppert, *Inscr. des Sarg.*, p. 41, ff., comp. Talbot, *Journal R. Asiat. Soc.*, xix. 135, ff.) But the Canon has a *Belibus* king in Babylon, and with him this *Bel-ib* is identified on these grounds: (a), *Belibus* in the Canon stands at 702 B.C. *Bel-ib* was made king at the end of the first or early in the second year of Sennacherib, i.e. (if Sargon has 18 years as in Canon 4), late in 703 or early in 702 B.C. Or thus: the Canon has  $12 + 5 + 2 = 19$  years from 1 *Mardokempad*, which is 1 Sargon, to 1 *Belibus*—the monuments show the same interval of 19 years from 1 Sargina to end of 1 Sennacherib, i.e., to epoch 1 *Bel-ib*. (b), In the Canon, *Belibus* reigns 3 years—in the *Annals*, the reign of *Bel-ib* reaches its third year; beginning at

\* Sennacherib, indeed, speaks of 'campaigns,' not 'years,' and it has been assumed that the first or Babylonian campaign was in his third year (Mr. Rawlinson, *Anc. Empires*, ii. 429, comp. 444). It is possible that the eight campaigns recorded on the Taylor Cylinder were spread over 14 years; but that the first four campaigns were in the first four years respectively is proved by the coincidences between monument and Canon pointed out in this section.

1 Sennacherib *fin.* it ends in 4 Sennacherib. (c), In the *Annals*, *Bel-ib* is succeeded by *Assur-nadin*—in the Canon, *Belibus* by *AIAPANAΔΙΟΣ*, which is easily explained as a corruption of *ΑΣΣΑΡ-ΝΑΔΙΟΣ*, *Assar-nadios*.\* Or thus: the Canon from 1 *Mardokempad* (= 1 Sargon) to 1 *Assar-nadios* has 22 years—the inscriptions from 1 Sargon to 4 Sennacherib *fin.* = 1 *Assurnadin*,  $18 + 4 = 22$  years. Even the account in *Berosus* agrees so far as this, that it has an *Elibus* (= *Belibus*) with a third year of reign, and with Sennacherib's son *Asordanes* for his successor. These coincidences are too close to be accidental. In the face of these it is useless to contend (as v. Gumpach does) for the lower date given by Polyhistor's misreported summation. The casual partial resemblance of the name *Mesessi-mordak* counts for nothing; the *Apis-stele* prove only that *Tirhaka* reigned in Egypt not before 697 B.C. at the earliest; it is as king of Ethiopia that he appears in the Biblical story together with a contemporaneous king of Egypt [CHRONOLOGY, sec. 14]; and in fact Sennacherib's own annals of the 3d year distinguish a king of Egypt and a king of *Mirukha* (*Meröe*, Ethiopia); Sir H. Rawlinson, *Trans. R. S. Lit.*, vii. 154; Oppert, *Inscr. des Sarg.*, 44.

For the construction of an Assyrian chronology we have, therefore, not one but two cardinal, extra-biblical, synchronisms. 1. The 1st year of Sargina is wholly or in part the 1st of *Marudak Bal-idin*, i.e. of *Mardokempad*, which began 721 B.C. 2. In the 1st year of Sennacherib, and late in it, began the 1st of *Bel-ib* = *Belibus*, whose epoch in the canon is 702 B.C. These two substantive synchronisms are linked together by the fact, as above shown, that Sargina reigned 18 years, therefore 1 Sennacherib = 703 B.C.† All this is independent of the Biblical narrative. The connection of Biblical with Assyrian and Babylonian chronology is determined, *prima facie*, by the express statement, 'In the 14th year of *Hezekiah*, Sennacherib came up, etc.,' 2 Kings xviii. 13; Is. xxxvi. 1: for Sennacherib's own monumental annals give that expedition to his third year, i.e., to the year 701 B.C. Hence it would follow that there is

\* Sir H. Rawlinson reads the name *Assur-inadisu*, in curious agreement with which a various reading of the Canon (Syncecl. cod. B.) gives the name *Απαρναδιος*.

† In the Lists of *Eponymi*, Sennacherib has 23 years (if Sargon has 18, canon 4). The son *Esarhaddon* is plainly *Assuridin* of the canon, who begins to reign in Babylon at 680 B.C., just 23 years after 703. Polyhistor's summation may be corrected by restoring 21 for 20 *Nabopolassar* and *IH'* for *H'* *Asordanes*: so the 88 become 99 years, and epoch of Sennacherib becomes  $604 + 99 = 703$  B.C. But the distribution of the 36 years of Sennacherib and *Esarhaddon* into  $18 + 18$  instead of  $23 + 13$  is wrong, placing *Esarhaddon* 5 years too high. Perhaps *Berosus* was misled by a list of *eponymi* like No. 3 of Rawlinson, in which Sennacherib, after a reign of 18 years, seems to be followed by another king, with 5 years, and then *Esarhaddon*. Mr. Bosanquet wishes to infer from this circumstance that Sennacherib did not begin to reign, *de facto*, till the 19th year after the death of Sargon. Unfortunately this 19th year is 685 B.C.: Mr. B.'s scheme requires 692 B.C., and so he makes it (*Athen*. 1862, p. 761; *R. Asiat. Soc.*, March 1864).

something wrong in the Biblical numbers, according to which the 14 Hezekiah is not 701 but 713 (or 711) B.C. But there is another synchronism, which, it is supposed, overrules this. The *Fall of Samaria*, which is expressly assigned to 6th Hezekiah, 2 Kings xviii. 10, appears to be recorded in the *Fasti* and *Annals* of Sargina (Oppert, *Fastes de Sargon*, p. 3, l. 2; *Inscr. des Sargonides*, p. 19; Dr. Hincks, *Journ. S. Lit.*, No. xv., 133, ff.; Mr. Rawlinson, *Herodot.* i. 386, comp. Sir H. Rawlinson, *Athen.*, Aug. 1863, p. 246) as occurring in his 1st, or possibly 2d year. The statement, 'I appointed a governor (or judges, lieutenants) over them' seems to imply that the monarchy of Hoshea had come to an end. The deportation there recorded was partial; completed in some later year. No subsequent expedition against Samaria is mentioned. Now 1 Sargina begins 721 B.C., and that is precisely 6th Hezekiah in the usual chronology—which, unless this Assyrian synchronism can be invalidated, is thus made good against the objections raised from other quarters (the numbers of Polyhistor, Egyptian dates, etc.) But if 6 Hezekiah is 1 Sargina, 14 Hezekiah cannot be 3 Sennacherib, which, being 20 years later, is 26 Hezekiah. For solution of this difficulty, Dr. Hincks, *u.s.*, assumes that the Biblical text has undergone a displacement. Originally, he thinks, it stood thus: (1.) 2 Kings xviii. 13 a—'Now in the 14th year of Hezekiah the king of Assyria came up'—meaning Sargon, whose monuments show that he was in Palestine in his 10th year, which Dr. Hincks makes = 14 Hezekiah. (2.) xx. 1-19—'In those days Hezekiah was sick,' etc. . . . 'At that time Merodach B.,' etc.—*i.e.* the M. B. of Sargina's time, Mardokempad of the canon (3.) xviii. 13 b-xix. fin., 'And Sennacherib king of Assyria came up,' etc. Mr. Rawlinson, *Herodot.* i. 393, note, proposes, 'as the least change,' to read 27th for 14th Hez., suggesting that 'the error may have arisen from a correction made by a transcriber who regarded the invasion of Senn. and the illness of Hez., which last was certainly in his 14th year, as synchronous; whereas the words 'In those days' were in fact used with a good deal of latitude by the sacred writers'—which is no improvement on Dr. Hincks' solution, as it does not explain what could have induced the sacred writer to relate after the invasion what happened so long before it. But, indeed, the present writer finds it impossible to accept any view in which the embassy from Merodach B. is placed elsewhere than after the deliverance from the Assyrians. The pointed mention of *Babylon* (2 Kings xx. 17) of itself shows that the Assyrian crisis was then past; and this is clearly implied in H.'s expression, 'There shall be peace and truth in my days' (ver. 19). It is clear that, according to the narrative, H.'s sickness and recovery took place before the deliverance, and during, or shortly before the invasion: the embassy, soon after the deliverance. But as, by hypothesis, the number *fourteenth* is wrong, the most obvious supposition is that it should be read *twenty-fourth* (עשרה ועשרים), which is not indeed the actual year of the invasion, but is *the first year of Sennacherib*, and, as such, forms a momentous epoch. It should be observed that, during the latter years of Sargon, the power of Assyria must have been on the decline. The record of his campaigns reaches only to his 15th year, and the canon shows that in his last year (18th) Babylon was in revolt.

It was perhaps during these latter years that Hezekiah 'rebelled against the king of Assyria and served him not,' 2 Kings xviii. 17. But the accession of Sennacherib greatly changed the face of affairs for the revolted provinces; and the year of Hezekiah in which this befell—probably marked by a demand of instant submission—may be supposed to have been noted in that fuller record 'The Chronicles of the Kings of Judah,' from which the existing condensed narrative was drawn. Its compiler, by retaining only this initial date, and passing on at once to the invasion, two years later, seems to place this in the 24th year. This, however, may have been the year of H.'s illness, which seems in fact to have occurred at a time when the peril from Assyria was impending, but not actually present; and it will not be disjoining it too far from the Babylonian embassy to suppose it to have befallen late in the 24th year (the invasion in the 26th and the embassy in the 27th). In any case, it is not likely that the number *fifteen* in the promise of added life has undergone any change. It may therefore be necessary to make the term of Hezekiah's reign 39 instead of 29 years, and to retrench 10 years from the 55 of Manasseh. All this rests on the supposition that the synchronism 6 Hez. = year of Fall of Samaria = 1 Sargina = 721 B.C., is unassailable (comp. Sir H. Rawlinson, *Trans. R. S. Lit.*, vii. 156).\*

But should monumental evidence yet come to light, proving that the expedition of Sargina's first year did not effect the final overthrow of Samaria, the cardinal synchronism will once more be 14 Hez. = 3 Senn. = 701 B.C. Then 6 Hezekiah will be 709 B.C., and it will be necessary to reduce the reign of Manasseh to 43 years (comp. Sir H. Rawlinson, *Athen.*, Aug. 1862, p. 247).

Whatever uncertainty may still attach to this point of chronology (*i.e.*, whether 3 Senn., which is 701 B.C., be 14 or 26 Hezekiah), we can put together a connected account in which Scripture, Canon, Berosus, and monuments, all fit into each other. It is nowhere intimated on Senn.'s monuments that the Marudak Bal-idin, with whom he contended, was the M. B. whom his father had dethroned; nor is he called, as on Sargina's monu-

\* Tiglath-Pileser records that in his 8th year he received tribute of the king of Judea, the king of Samaria, and Rezin, king of Syria. Except in the names given to the two former, this fully accords with the Biblical account, 2 Kings xv. 29, xvi. 7-9, of the submission of *Ahaz* and the overthrow of *Pekah* and Rezin, in a year which would be Pekah's last; for his defeat was immediately followed by insurrection and by his death. Now, according to the list of eponymi (canon 4 as above), T. P. began to reign 24 years before Sargon, therefore 745 B.C.; consequently his 8th year is 738 B.C. But if 1 Sargon, which is 721 B.C., is 6 Hez., which is 21 Ahaz, which is 37 Pekah, then 738 B.C. is 20 Pekah—*i.e.*, the last year of his reign. So far this record completely attests the synchronism in the text. But the names do not agree: they are *Minikhimmi* and *Jahu-khaz*. The latter is well explained by Mr. Tyrwhitt, *Athen.*, April 1862, p. 500; the other may have been ignorantly copied as the name of the king of Samaria from the records of Pul, to whom *Menahem* paid tribute. See Sir H. Rawlinson, *Athen.*, 1862, p. 330; Aug. 1863, p. 245, f.; Mr. Rawlinson, *Herodot.* i. 384.

ments, 'son of Jakin.' But the Biblical M. B. is 'son of Baladan.' It seems, then, there were two persons of the name, father and son; the first, 'son of Jakin' in Sargina's time,\* named in the Canon Mardokempad, in Scripture simply Baladan, father of the second, who is the M. B. of Hezekiah and Sennacherib named by Berossus, but not in the Canon (comp. Brandis, *über den h. Gewinn*, etc., p. 53; others assume but one M. B.) Of the father, after his dethronement by Sargon (709 B.C.), we hear no more. Five years later, a time of anarchy in Babylon is marked in the Canon at 704-703 B.C., i.e., in the last year of Sargon and first of Sennacherib, and partly described by Berossus. During this revolutionary period, Merodach Baladan, second of the name, repossessed himself of his father's throne in Babylon for a time of 6 months according to Berossus (who, however, is wrong in saying that he was then slain), to be driven from it late in the 1st year of Sennacherib (703). Between that time and 4 Senn. = 700 B.C. something befell which encouraged M. B. once more to raise insurrection in Babylon. That 'something' may well be conceived to have been the reverse sustained by Senn. in Palestine (701), and nothing could be more natural than that M. B. should seek to strengthen himself by alliance with that Hezekiah in invading whom the great king had been so ignominiously checked in his career of conquest.—It is here assumed that the defeat which is related in 2 Kings xviii. befell in the 3d year of Sennacherib, which year, in his account of it (dated in his 15th year), is filled only with victories. The disparity between the Biblical and the monumental record has led to the inference that there were two invasions—the first in 3 Senn., briefly related ver. 13-16; the second, of which there is no monumental record, that of xviii. 17-xix. fin., which is placed a year or two later by Dr. Hincks, *Journal of S. Lit.*, u.s., and Mr. Rawlinson, *Herodot.* i. 393; *Anc. Empires*, ii. 439; but by Sir H. Rawlinson at least 10 years later,† *Trans. R. S. Lit.*, vii. 155; *Athen.*, Aug. 1863, p. 247.

In the view of the present writer, vers. 13-16 are condensed from a fuller report of the transactions from Sennacherib's accession to Hezekiah's submission. It does not appear, indeed, that S. was himself in Palestine during the first two years of his

reign, but his generals may have been, and their successes, together with his own in the early part of the campaign, the tribute levied, the tale of spoil and deported captives, furnished matter of glorification, twelve years later, for a year which ended in disaster. 'Great king, mighty king, king of hosts,' he wrote his own story on his palace walls—with whom to gainsay it? After long ages the record is disinterred and deciphered—with whom to vouch for it? On the bringing to light of some new and unexpected document, the fortunate discoverers are prone to claim a too implicit credence for its contents: to the calm inquirer the genuine and the authentic are still distinct considerations, nor does the truth of the decipherment carry with it the truth of the thing deciphered.—H. B.

#### MEROM, WATERS OF (מֵי מְרֹם; *Mapōw*; Alex.

*Meppōw* and *Mappōw*; *Merom*), the place where Joshua attacked and defeated the confederate princes of northern Palestine who had been collected by Jabin king of Hazor (Josh. xi. 5, 7). It is only mentioned in the one passage of Scripture, and no clear indication is given of its geographical position. The name would seem to indicate some elevated position; the word מְרֹם signifying 'height,' from the root מָרַם.\* 'The Waters of Merom' must have been in the north of Palestine, and not far distant from Hazor, for after Joshua had pursued the routed Canaanites to Zidon, it is said 'he turned back and took Hazor' (ver. 8, 10). It is somewhat remarkable that Josephus, in giving an account of this great battle, states that the scene of it was 'Beroth, a city of upper Galilee, not far from Kadesh' (*Antiq.* v. 1. 18); and he does not mention the Waters of Merom.

Most geographers identify the Waters of Merom with the lake *Samochonitis*, now called *el-Hülch* (Reland, p. 262; Robinson, *B. R.*, ii. 440). The words of Josephus, though they do not expressly state this, yet seem to indicate it. He describes the city of Hazor as situated 'over the lake Samochonitis' (*Antiq.* v. 5. 1); and Hazor, as has been seen, must have been at or near the Waters of Merom (Cellarius, *Geogr. Ant.*, ii. 480). The name *Samochonitis* (Σαμοχωνίτις, or as it is sometimes written, Σεμεχωνίτις), may perhaps be derived

from the Arabic root *samak*, سَمَك, *altus fuit*, and would thus be identical in meaning with the Hebrew Merom† (Gesenius, *Thes.* p. 1276; Reland, p. 262). It is true that the usual Hebrew word

\* And, indeed, early in the time of T. Pileser, on whose monuments he is frequently mentioned, not in connection with Babylon, but only with his ancestral territory, Beth Jakin.

† 'The more that we examine this period of history, and the more light that is thrown upon it from the Egyptian and Assyrian monuments, the more certain does it become that there must have been two distinct expeditions conducted by Sennacherib,' etc. The argument from Tirhaka is, as above remarked, quite inconclusive. The only Assyrian evidence (known to the present writer) consists in the circumstance that Esarhaddon speaks of 'the city of Edom of the Arabians' as having been taken by his father Sennacherib (Oppert, *Inscr. des Sarg.*, p. 55); whereas Senn. mentions under his 3d year, 'Yorammi king of Edom' in a list of kings who did homage and paid tribute to him (Oppert, p. 44). But the 'taking' may have been prior to the submission; or, which is as likely, Esarhaddon magnifies the temporary submission into a permanent right of conquest.

\* Perhaps the phrase מֵי מְרֹם might be rendered *aque superiores*, 'the upper waters'; that is, the upper lake or collection of waters formed by the river Jordan (see Reland, p. 262).

† Several other explanations of this word have been given. 1. It is derived from the Chaldee סִמֹךְ, 'red,' because of the ruddy colour of its water. 2. From סִבְךְ, 'a thorn,' because its shores abound with thorn-bushes (Lightfoot, *Opp.* ii., p. 172).

3. From the Arabic سَمَك, 'a fish' (Reland, p. 262). These explanations appear to be all too fanciful (cf. Stanley, *Sin. and Pal.*, p. 383. note). Josephus mentions a city called *Meroth* (Μηρώθ or Μηρώ, *Vita*, 37; *Bell. Jud.*, ii. 20. 6), which Ritter connects with the lake *Samochonitis* (*Pal. und Syr.*, ii. 235).

for 'sea' or 'lake' is מַי; but it seems to be applied generally to a large expanse of water. The word מַי ('waters') here used with Merom is employed in a great variety of meanings in Scripture. It signifies 'waters,' whether in fountain, river, tank, lake, or sea; and may therefore be given appropriately to the lake Samochonitis. There is besides no other collection of waters in northern Palestine answering to the notices of Merom in the book of Joshua; and it may also be added that the shores of this lake form the only ground near the site of Hazor where war-chariots could be used with any effect against an enemy. It may therefore be safely admitted that 'the Waters of Merom' are identical with the Samochonitis of Josephus, and the modern Bahret el-Hüleh.

The name *Hüleh* appears also to be of high antiquity. The whole of the rich plain north of the lake, as far as the fountains of the Jordan at Baniâs and Dan, is called *Ard el-Hüleh*, 'The land or province of Hüleh'; and from it the lake appears to have taken its name. This name we find in Bohadin's *Life of Saladin* (p. 98) applied to a district. Looking still farther back, Josephus states that the region of *Ulatia* (Ὀὐλάτια) and Paneas was given by Augustus to Herod, and he describes it as lying between Trachon and Galilee (*Antiq.* xv. 10. 3). There cannot be a doubt that *Ulatia* is the Greek form of the Arabic

*Hüleh* (حولة). This fact leads us up to a far more remote period, and shows that the name is among the oldest on record. In Gen. x. 23 we

read that *Hul* (חול) was the second son of Aram, and the sacred historian indicates that all the persons mentioned in this valuable ethnological summary were founders of nations to which they gave their own names. Now the Hebrew *Hul* is radically identical with the Arabic *Hüleh*. The Septuagint reading is Ὀὐλα, and that of Josephus Ὀὐλος (*Antiq.* i. 6. 4), which is just the primitive form of Ὀὐλάτια, the name of the district (cf. Ritter, *Pal. und Syr.* ii. 234; Stanley, *S. and P.*, p. 383). It would seem, therefore, that the original name of the district at or around the sea has continued the same from the remotest ages to modern times—*Hul* or *Hüleh*—and from this the lake took its common modern appellation. This, however, is not its only name; Abulfeda calls it the lake of Baniâs (*Tab. Syr.*, p. 147).

'The waters of Merom,' or Lake *Hüleh*, is a sheet of water triangular in form, its apex pointing southward to the place where the Jordan issues from it. Its length is about four and a half miles, and its breadth three and a half; but it is subject to periodical variations in extent, owing to the fall of rain and the melting of the snow on the neighbouring mountains. It occupies the southern end of a plain or large basin, fifteen miles long by five wide. Round the lake is a broad margin of marshy ground, which extends several miles to the northward along the banks of the streams, and is covered with dense jungles of canes, the home of wild swine and buffaloes. Beyond the marshes is a wider border of fertile ground, reaching to the mountain ranges on each side, and embracing more than a half of the northern section of the plain. A large portion of its rich soil is now cultivated, partly by local tribes of Bedawin who live in tents and reed huts, and partly by some sheikhs of Lebanon and

merchants of Damascus. These latter may be regarded as the modern representative of the old merchant princes of Phœnicia, who planted their agricultural colonies here, in the city of Laish, thirty centuries ago (*Judg.* xviii. 7-10).

The lake is fed by numerous streams and fountains. The largest is the Jordan, which falls in near the north-eastern angle, and is made up of the united streams from Dan, Baniâs, and Hasbeiya [*JORDAN*]. West of the Jordan is the stream from Merj 'Ayûn, the Ijon of Scripture [*IJON*]. At the foot of the mountains of Naphtali, on the western side of *Ard el-Hüleh*, are several large fountains, whose waters flow into the lake. The chief of these are 'Ain Belât, and 'Ain Mellâhah. The latter gives to the lake one of its names. William of Tyre calls it *Lacus Meleha* (*Hist.* xviii. 13); and the name now usually given to it by the neighbouring Arabs is Bahret el-Mellâhah. Schwartz calls the fountain *Ein el-Maleha*, which he translates 'the king's spring,' a manifest confounding

of two widely different Arabic words—مَلَاخَة,

'salt,' and مَلِك, 'king.' According to Dr.

Thomson the district of *Hüleh* is also called *Ard el-Khait*, and the lake Bahret el-Khait (*Bibliotheca Sacra*, iii., p. 199); but the writer never heard this name (see Reland, p. 262; Ritter, *Pal. und Syr.*, ii. 231, *seq.*; De Bertou, *Itinéraire*, etc.; Rosenmüller, *Bibl. Alt.* ii.)—J. L. P.

MERORIM (מְרֹרִים) occurs in two places in Scripture, and is in both translated *bitter herbs* in our A. V., as well as in several others (*Exod.* xii. 8; *Num.* ix. 11). The word *merorim* is universally acknowledged to signify *bitter*, and the word *herbs* has been supplied to complete the sense. By the Sept. it has been translated ἐν τῇ πικρῶν, and by St. Jerome, 'cum lactucis agrestibus.' Several interpreters, however, render it simply *amara*; which Celsius adopts, and considers that *merorim* has reference to the ξυβάμμα which was eaten with the paschal lamb, and that it signifies 'cum amaritudinibus, vel rebus amaris.' In the Arabic a word similar to the Hebrew has also reference to bitterness, and, like the Greek word πικρός, came to be applied to a bitter plant. Thus the Arabic *murr*, 'bitter,' pl. *murar*, signifies a species of bitter tree or plant; as does *maru*, a fragrant herb which has always some degree of bitterness. *Murooa* is in India applied both to the bitter *Artemisia*, or wormwood, and to the fragrant *Ocimum pilosum*, a species of Basil; in Arabia, to the bitter Centaury, according to Forskal. It is extremely probable that a bitter herb of some kind is intended, but whether a particular species or any bitter herb, it is difficult to say. The Jews, as we learn from the Mishna (*Tract. Pesachim*, cap. ii. sec. 6, as quoted by Bochart, *Hieroz.* i. l. ii. c. 50), used five kinds of bitter herbs, thus given by Dr. Harris: '1. *Chazareth*, taken for lettuce; 2. *Ulsin*, supposed to be endive, or succory; 3. *Tamca*, probably tansy; 4. *Charubbinim*, which Bochart thought might be the nettle, but Scheuchzer shows to be the camomile; 5. *Meror*, the sow-thistle, or dent-delion, or wild lettuce.' All these translations betray their European origin. To interpret them with anything like accuracy, it is requisite, in the first place, to have a complete Flora of the countries, from Egypt

to Syria, with the Arabic names of the useful plants, accompanied by a notice of their properties. Science is as yet far from having anything of the kind. We have seen that the succory or endive was early selected as being the bitter herb especially intended; and Dr. Geddes justly remarks, that 'the Jews of Alexandria, who translated the Pentateuch, could not be ignorant what herbs were eaten with the paschal lamb in their days.' Jerome understood it in the same manner; and Pseudo-Jonathan expressly mentions *horehound* and *lettuces*. Forskal informs us that the Jews at Sana and in Egypt eat the lettuce with the paschal lamb. Lady Calcott inquires whether mint was originally one of the bitter herbs with which the Israelites ate the paschal, as our use of it with roast lamb, particularly about Easter time, inclined her to suppose it was. Ibn Ezra, as quoted by Rosenmüller, states that the Egyptians used bitter herbs in every meal: so in India some of the bitter *Cucurbitaceae*, as *kurella*, are constantly employed as food [PAKYOTH]. It is curious that the two sets of plants which appear to have the greatest number of points in their favour are the endive or succory, and one of the fragrant and usually also bitter labiate plants; because we find that the term *marooa* is in the East applied even in the present day both to the bitter wormwood and the fragrant *Ocymum*. Moreover the Chaldee translator, Jonathan, expressly mentions lettuce and *horehound*, or *marrubium*, which is also one of the Labiate. It is important to observe that the Artemisia, and some of these fragrant labiate, are found in many parts of Arabia and Syria; that is, in warm, dry, barren regions. The endive is also found in similar situations, but requires, upon the whole, a greater degree of moisture. Thus it is evident that the Israelites would be able to obtain suitable plants during their long wanderings in the Desert, though it is difficult for us to select any one out of the several which might have been employed by them.—J. F. R.

MEROZ (מֶרוֹז; Sept. Μηροζ), a place in the northern part of Palestine, the inhabitants of which are severely reprehended in Judg. v. 23, for not having taken the field with Barak against Sisera. It would seem as if they had had an opportunity of rendering some particular and important service to the public cause which they neglected. The site is not known: Eusebius and Jerome (*Onomast.*, s. v. 'Merus') fix it twelve Roman miles from Sebaste, on the road to Dothaim; but this position would place it too far south of the field of battle to agree with the history. [Meroz must have been near Kishon, and not far from Kedesh Naphthali. This would bring it close on the lake Merom, and Fürst suggests it may have been the original name of this place which gave name to these waters (*H. W. B.*, s. v.) Wilson (*Lands of the Bible*, ii. 89) identifies it with the *Kefr-Mesr* on the southern slope of Mount Tabor, and this Van de Velde approves (*Mem.*, p. 334).]

MESECH and MESHECH (מֶשֶׁח; מוֹשֶׁח; Mosoch, and Μεσόχ; *Mosoch*), the sixth son of Japheth, and founder of an ancient nation (Gen. x. 2; 1 Chron. i. 5). His posterity is not mentioned in either Genesis or Chronicles; but the nation is evidently alluded to in Ps. cxx. 5, in conjunction with Kedar, apparently as representing places so remote and barbarous that exile to them would be regarded as

a grievous punishment: 'Woe is me that I sojourn in Mesech, that I dwell in the tents of Kedar.' The LXX. here reads, 'Woe is me that my sojourning is prolonged' (ὁποῦν ὅτι ἡ παροικία μου ἐμακρύνῃ; Vulgate, *quod incolatus meus prolongatus est*), a rendering which the Hebrew text in its present state will not bear. Several commentators translate the word as an appellative, though the construction of the parallelism indicate the contrary (see Venema, and *Pol. Synopsis Crit.*, ad loc.) Meshech is mentioned by Ezekiel among those nations which traded in the marts of Tyre, bringing slaves and vessels of brass (xxvii. 13); and again, as involved in the ruin of Egypt (xxxii. 26). The same prophet also connects Meshech with Gog and Magog (xxxviii. 2; xxxix. 1).

There is no indication given in any of these passages of the geographical position of Meshech farther than that the nation had its possessions among the descendants of Japheth. It is worthy of note that Meshech and Tubal are almost uniformly connected in Scripture as neighbouring nations, joining also in traffic (Ezek., *l. c.*) Now, in the writings of Herodotus we find two very ancient tribes, the *Moschi* and *Tiburimi*, associated as forming part of the nineteenth satrapy of Persia (iii. 94); and again, as armed in the same way, and under the command of one leader in the army of Xerxes (vii. 78). There can be no doubt that these are identical with Meshech and Tubal of Scripture. The names are also joined frequently on the Assyrian inscriptions (Rawlinson's *Herodotus*, i. 651; cf. Pliny, vi. 4). The primitive seat of the Moschi appears to have been among the Caucasus mountains, on the south-eastern shores of the Black Sea, immediately north of Armenia (Strabo, xi., pp. 498, *seq.*); and, according to Strabo, a part of the great chain or group of mountains took the name Moschi (xi. p. 521). The Moschi were, however, a wild and warlike race, and extended their depredations and conquests far beyond the confines of their native hills. Cappadocia appears to have been, at least in part, occupied by them (Joseph. *Antiq.* i. 6. 1), and probably from them its capital city took its name *Mazaka* (Strabo, xii. p. 538; Rawlinson's *Herodotus*, iv. 222). In the time of the Hebrew prophets their power was felt even in Syria and Egypt in conjunction with their Scythic allies, Gog and Magog, under whose command they had apparently placed themselves. It is interesting to observe how Ezekiel's description of their equipments—'bucklers, small shields (מִנִּי), and swords' (Ezek. xxxviii. 1-4)—corresponds with that of Herodotus (vii. 78). Tubal and Meshech are also mentioned by Ezekiel (xxvii. 13) as supplying Tyre with copper and slaves; and it is known that copper abounds in northern Armenia, while to the present day the tribes of the Caucasus—the Georgians and Circassians—supply the Turkish harams with female slaves; and it appears that this infamous traffic has continued uninterrupted from the earliest ages (see Bochart, *Opera*, i. 182). During the ascendancy of the Babylonians and Persians in western Asia the Moschi were subdued; but it seems probable that a large number of them crossed the Caucasus range and spread over the northern steppes, mingling with the Scythians. There they became known as *Muskovs*, and gave that name to the Russian nation, and its ancient capital, by which they are still universally known throughout the East (Rawlinson's *Herod.*, iv. 222).

The word מֶשָׁה occurs in Is. lxvi. 19, and is translated in the A. V., 'that draw the bow.' The LXX. renders the word as a proper name, Μωσάχ, and omits קִשֶׁת ('bow'). Lowth thinks that the Hebrew is corrupted and the Greek version correct; but this is against all evidence (cf. Jer. xlvi. 9). The same word is found in Jer. v. 8, and Ibn Ezra conjectures that it is a proper name, but the construction of the passage is against him.

For fuller information regarding Meshech, consult Bochart (*l. c.*); also Kalisch (*on Gen. x.*); Michaelis (*Spicileg.* i. 50); Ritter (*Erdkunde*, x. 816); Rawlinson (*l. c.*)—J. L. P.

MESHA (מֶשָׁה); Μωσῆ; Alex. Μωσῆ; (*Messa*), a place only mentioned in Gen. x. 30, where Moses, in describing the possessions of the Joktanites, states that 'their dwelling was from Mesha, as thou goest unto Sephar, a mount of the east.' This explanatory note is of great importance, as clearly defining the limits of the great nation founded by Joktan. The interpretation of it given by Kalisch (*Comment. on Gen.*, p. 283) appears to be at variance with the plain meaning of the Hebrew. He thus renders it—'Their abode was from Mesha towards Sephar, to the mount of the east;' thus distinguishing 'Sephar' from 'the mount of the east;' whereas the Hebrew is כְּמִשְׁא בְּהַר הַקֶּדֶם, 'From Mesha until thou comest to Sephar the mountain of the east' (cf. ver. 19; xiii. 10); making Sephar the mountain of the east, and representing this mountain as the limit of the territory on the one side, while Mesha was the limit on the other (see, however, Gesenius, *Thes.* p. 823). We are not warranted in concluding from this, however, that Mesha was the western and Sephar the eastern limit. Nothing is here said as to the relative directions of the two places.

The situation of Mesha has been a subject of much controversy among geographers. Bochart identifies it with the ancient city of *Musa* (Μούσα), a port of Arabia near the mouth of the Red Sea, mentioned by Ptolemy (vi. 7), Pliny (vi. 23), and others, and probably the same as the Músa discovered by Niebuhr (*Voyage en Arabie*, i. 296; Vincent, *Periplus*, p. 315). He farther identifies Sephar with a mountain of that name a short distance eastward of Musa; and he interprets the passage, 'et fuit habitatio eorum à Mesa, cum tendis Saphar montem Orientis;' and farther explains the meaning—'Musa emporium, unde iter erat ad Saphar' (*Opera*, i. 144). But the Hebrew כְּמִשְׁא בְּהַר הַקֶּדֶם will not bear such a rendering. It evidently means 'until thou comest to Sephar.' Therefore, if Mount Sephar be rightly identified, as it seems to be, Mesha cannot be identical with Musa, for sufficient room is not left between them for the great family of Joktan; and it is well known that the Joktanites occupied nearly all Arabia Felix. Besides, the Arabic form of *Musa* appears to be مَوْسَى, which is radically different from מֶשָׁה (Gesen. *Thes.* p. 823; Michaelis, *Spicileg.* ii. 214).

Gesenius would identify Mesha with *Mesene*, once an island, but now a portion of the delta at the mouth of the Tigris in the Persian Gulf, and which is frequently mentioned by classic and ecclesiastical writers (Philostorg. *Hist. Eccl.* iii. 7; Strabo, ii. 84; Gesen. *Thes.* p. 823). This view

is adopted by Kalisch (*on Gen.*, p. 283). But it is very doubtful whether the island, which has been formed by the deposits of the river, was in existence in the days of Moses; and it is still more doubtful that such a spot could at that early period have attained to any political or geographical notoriety. Besides, it is not likely that an accurate writer would describe a purely Arabian territory as commencing on the east side of the Tigris.

The theory of Mr. Forster is much more probable than either of the preceding. He identifies Mesha with a mountain-range called *Zames* by Ptolemy (vi. 7), which commences near the Persian Gulf, and runs in a south-western direction nearly across the peninsula. It is an undoubted fact that the various Joktánite tribes, or Beni Kahtán as they are called by Arab writers, are still found, and have been from the earliest period, in the wide region extending from Mount Zames to the Indian Ocean and Red Sea; and that this range separates them from the Ishmaelite Arabs (Forster, *Geog. of Arabia*, i. 95, *seq.*) Forster farther conjectures that the name Zames is radically identical with Mesha, the syllables being inverted, as is very common in Arabic words;—thus Mesza = Mesha (the Arabic); taking the place

of the Heb. שָׁ). The Zames range is now called by the general name of the 'Nejd Mountains,' and the country extending thence to the Indian Ocean on the east, and the Red Sea on the south, embraces the most fertile part of Arabia—the classic *Arabia Felix*, now called *Yemen* (Ritter, *Erdkunde*, xii. 708, *seq.*) The mountains of Nejd are now famous for their pastures and for their horses, which are considered the best in Arabia (Ritter, pp. 918-1035; Fresnel, *Lettres sur la Geog. de l'Arabie*, in *Journ. Asiat.* v.; also Burckhardt, *Travels in Arabia*; Wellsted, *Trav. in Arabia*; Niebuhr, *Descript. de l'Arabie*; Forster, *Geog. of Arabia*).—J. L. P.

MESHACH (מִשְׁחָךְ); Sept. Μισάχ; Alex. Μισάκ), the name given to Mishael, one of the companions of Daniel (Dan. i. 7). Gesenius resolves it into מִיז שָׁח *miz shah*, the guest of the shah; Hitzig (*Exeget. Hdb.*, in loc.) and Fürst (*H. W. B.*, s. v.) refer it to the Sans. *Mśhah*, *Ram*, and regard it as a name of the sun-god. The changing of the names of persons taken into a family as servants or slaves was common in ancient times among both the Orientals and the Greeks (Jahn, *Archæol.*, Th. I. Bd. 2, p. 280; Theodoret on Dan. i. 7; Chrysostom, *Opp.* v. 286; Hävernick, *Comm. heb. Dan.*, p. 30).—W. L. A.

MESHELEMLIAH (מִשְׁלֵמְיָהוּ); Sept. Μωσολλάμ; Alex. Μωσολλάμ), the father of Zechariah, one of the porters of the door of the tabernacle of the congregation (1 Chron. ix. 21). The name appears also in the form מִשְׁלֵמְיָהוּ; Sept. Μωσολλάμ; Alex. Μωσολλάμ, in 1 Chron. xxvi. 1, 2, 9; in ver. 14 he is called Shelemiah, and in ix. 18 Shallum. It is probably he also who is called Meshullam, Neh. xii. 25.—†

MESHULLAM (מִשְׁלָלָם); Sept. Μεσολλάμ), a name borne by twenty-one persons mentioned in the O. T., none of whom require special notice.—†

MESOPOTAMIA (Μεσποταμία), the district lying between the rivers Tigris and Euphrates, and deriving its name from this circumstance (Arrian, *Alex.*, vii. 7; Tacit. *Ann.*, vi. 37). Its limits seem to have varied at different periods, or the name was vaguely used so as to be applied to different extents of territory by different writers. Thus, whilst Strabo draws a line between it and Babylonia (xvi. p. 746), Pliny assigns it to Assyria, and extends it southwards as far as the Persian gulf (*N. H.*, v. 24; vi. 26). It belongs to physical, not to political geography, as it was at no time the designation of any territory artificially determined.

The LXX. use this word to represent the Aram-Naharaim of Gen. xxiv. 10; Deut. xxiii. 4; and also the Padan-Aram of Gen. xxv. 20; xxxi. 18). By this they have been generally understood as intending to identify these districts with the Babylonian Mesopotamia. This, however, may be doubted. There was a Syrian Mesopotamia known to the ancients, as well as that between the Tigris and the Euphrates (see Mela, *De situ Orbis*, i. 11), and that it is to this that the LXX. translators refer in the case before us appears probable, 1. from their expressly stating that it was the Syrian Mesopotamia (ἐκ τῆς Μεσποταμίας Συρίας) from which Rebecca, the daughter of Laban the Syrian, came to be the wife of Isaac (Gen. xxv. 20); 2. from their rendering Aram-Naharaim in Judg. iii. 8, 10, by Συρία ποταμῶν, *Syria of the rivers*; and 3. from their calling the place to which Jacob went for a wife πεδίον Συρίας, *the plain of Syria* (Hos. xii. 12), by which they doubtless intended the *Ager Damascus* of the classical writers (Plin. *N. H.*, v. 13). Why this country should be called Mesopotamia, or Syria of the rivers, will be at once seen by observing its position between the Abana and the Parpar. To Dr. Tilstone Beke is due the credit of having first suggested that we are to seek the Aram-Naharaim and the Padan-Aram of the Bible in this district. His reasons for this were first presented in his *Origines Biblicæ*, p. 123, ff., and have since been urged by him in various publications. They rest chiefly on the identification of the Haran of the Bible with the *Harrân-el-Awamid*, or *Harrân of the Pillars*, a village four hours east of Damascus, first brought to notice by Mr. Porter, and mentioned by him in *Five Years in Damascus*, i. 376. If this identification can be established, Dr. Beke's opinion as to the position of Aram-Naharaim and Padan-Aram will hardly admit of question. Dr. Beke has recently visited the place, and traversed the ground from Harrân to Gilead, along the supposed route of Jacob when he fled from Laban. His notes, which are printed in the *Journal of the Geographical Society* for 1862, are full of interest, and have tended to confirm his opinion in the judgment of several who were previously disposed to pass it by as fanciful.

In the address of Stephen (Acts viii. 2) Mesopotamia proper is mentioned as the seat of the family of Terah when Abraham left it to settle at Haran. This, as Dr. Beke has noticed, is proof of itself that the Haran of the Bible was not in Mesopotamia proper, and therefore is incorrectly identified by Jerome with the city Charra, beyond Edessa (*Onomast.*, s. v. Charan). The principal ancient accounts of the Babylonian Mesopotamia are to be found in Quintus Curtius, v. 1; Strabo, xvi. p. 766; Ptolemy, v. 18; Pliny, v. 2. 4; vi. 9.

For modern accounts see Pococke, *Descr. of the East*, ii. 1. 17; Niebuhr, *Voyage en Arabie*, ii. p. 300, ff.; Layard, *Nineveh and Babylon*, ch. xiv. xv. See also ARAM and HARAN in this work.—W. L. A.

MESSIAH, MESSIAS. The Hebrew word מָשִׁיחַ is in every instance of its use (thirty-nine times) rendered in the Sept. by the suitable term Χριστός, which becomes so illustrious in the N. T. as the official designation of the Holy Saviour. It is a verbal noun (see Simonis, *Arcanum Form. Hebr. Ling.*, p. 92, sqq.), derived from מָשַׁח, and has much the same meaning as the participle מְשֻׁחָה (2 Sam. iii. 39, and occasionally in the Pentateuch), i. e., *Anointed*. The prevalent and all but universal (Is. xxi. 5 and Jer. xxii. 14 being perhaps the sole exceptions) sense of the root מָשַׁח, points to the consecration of objects to sacred purposes by means of anointing oil. Inanimate objects (such as the tabernacle, altar, laver, etc.) are included under the use of the verb; but the noun מָשִׁיחַ is applied only\* to animate objects. The official persons ('the Christs of the O. T.; Perowne, *Coherence of O. and N. T.*) who were consecrated with oil were *Priests* (Exod. xxviii. 41; Levit. iv. 3, 5, 16; Num. xxxv. 35), *Kings* (1 Sam. ix. 16; xvi. 3; 2 Sam. xii. 7; 1 Kings i. 34), and *Prophets* (1 Kings xix. 16). The great Antitype, the Christ of the N. T., embraced and exhausted in himself these several offices, which, in fact, were shadows of his threefold function as the Prophet, Priest, and King of his people. And it is the pre-eminence which this combination of anointed offices gave him which seems to be pointed at in Psalm xlv. 8, where the great Messiah is anointed 'above his fellows'; above the Christs of old, whether of one only function, as the priest Aaron, or the prophet Elisha, or the king Saul; or of two functions, as Melchizedec the priest and king, or Moses the priest and prophet, or David the king and prophet. In our Saviour Christ is uniquely found the triple comprehension, the recapitulation in

\* There is, however, some doubt as to 2 Sam.

i. 21—מִגֵּן שָׂאֹל בְּמָשִׁיחַ בִּשְׁמֶן—where, according to some (Maurer, Gesenius, Fürst; see also Corn. a Lapide, *in loc.*), the phrase, 'not anointed with oil,' is applied to *the shield* (comp. Is. xxi. 5). The majority of commentators refer it to *Saul*, 'as if he had not been anointed with oil.' So A. V., which seems to follow the Vulgate. This version, however (*quasi non esset unctus oleo*), is really as inexplicit as the original, admitting the application of 'anointed' to either the king or his shield. This double sense is avoided by the Septuagint (Θυπέος Σαούλ οὐκ ἐχρίσθη ἐν ἐλαίῳ), which assigns the anointing, as an epithet, to the shield. The Targum of Jonathan refers the מָשִׁיחַ to Saul, but drops the negative. To us the unvarying use of the word, as a *human* epithet, in all the other (thirty-eight) passages, two of them occurring in the very context of the disputed place (2 Sam. i. 14, 16), settles the point in favour of our A. V., as if the king had fallen on the fatal field of Gilboa like one of the common soldiers, 'not as one who had been anointed with oil.'

himself of the three offices (see Eusebius, *Hist. Eccles.* i. 3, vol. i. p. 24, by Burton, Oxon. 1838). But not only were the ancient offices typical, the material of consecration had also its antitype, in the Holy Ghost (St. Cyril of Jerusalem, *Catech. Illum.* x. 99; *Catech. Neoph.*, pp. 202, 203; St. Basil, *contra Eunom.* v.; St. Chrysostom on Psalm xlv.; Theodoret, *Epit. divin. Decret.* xi., p. 279; Theophylact. on Matt. i.; Ecumenius on Rom. i., etc.) The prophecy of Is. lxi. 1 ('The Spirit of the Lord Jehovah is upon me, because Jehovah hath anointed me') was expressly claimed by Jesus for fulfilment in the synagogue at Nazareth (Luke iv. 16-21) on his return to Galilee 'in the power of the Spirit' (ver. 14), which he had plenarily received at his recent baptism (ver. 1), and by which he was subsequently led into the wilderness (ver. 1). This anointing of our Lord to his Messianic functions is referred to, in a general sense, in such passages as Is. xi. 2 and Acts x. 38. But from the more specific statement of St. Peter (Acts ii. 36), it would appear that it was not before his resurrection and consequent ascension that Christ was fully inducted into his Messianic dignities. 'He was anointed to his prophetic office at his baptism; but thereby rather initiated to be, than actually made Christ and Lord. Unto these two offices of everlasting Priest and everlasting King he was not actually anointed, or fully consecrated, until his resurrection from the dead' (Dean Jackson, *Works*, vii. 368). As often as the evangelists do instill him *Christ* before his resurrection from the dead, it is by way of *anticipation* (*Ibid.*, p. 296). On this point, indeed, the grammatical note of Gersdorf (*Sprachechar.* i. 39, 272), as quoted by Winer (*Gram. des N. T. sprachid.*, iii. 18, p. 107; Clark, p. 130), is interesting: 'The four evangelists almost always write ὁ Χριστός [the expected Messiah, like ὁ ἐρχόμενος], while Paul and Peter employ Χριστός, as the appellation had become more of a proper name. In the epistles of Paul and Peter, however, the word has the article when a governing noun precedes.' (For extremely elaborate tables, containing every combination of the sacred names of Christ in the N. T., the reader is referred to the last edition of Bishop Middleton's *Doctrine of the Greek Article*, by H. J. Rose, B. D., App. ii. pp. 486-496). Respecting the official name itself, see JESUS CHRIST [*Import of the designation*, vol. ii., p. 542, col. 2]; we here simply add, that twice only in N. T. does the Hebrew form of it (Messias) occur, in John i. 41 and iv. 25; and twice only in the O. T. have our translators retained the same form (Messiah), in Dan. ix. 25 and 26. In these passages, both in the Greek of the evangelist [*Μεσσίας*, or (as Griesbach preferred to read) *Μεσias*, more closely like the original] and in the Hebrew of the prophet [מָשִׁיחַ], there is an absence

of the article—the word having, in fact, grown out of its appellative state, which so often occurs in the earlier books, into a proper name; thus resembling the course of the *Χριστός* of the Christian Scriptures.

We are forbidden by our limits to fully treat this great subject, which is in fact commensurate with the Scriptures themselves. The substance of the O. T., from the *Protevangelium* of Gen. iii. 15 to the latest prediction of Malachi, with the intermediate communications of type and prophecy,

points to 'the coming one' (ὁ ἐρχόμενος of Matt. xi. 3 and Luke vii. 19), 'the desire of all nations' (Hag. ii. 7), 'the light of the Gentiles, and the glory of Israel' (Luke ii. 32); while the N. T. supplies the historical counterpart, gathering up and applying the ancient testimony to Jesus of Nazareth, and (like St. Paul, as the first-fruits of his conversion) 'proving that he is the very Christ,' or Messiah (Acts ix. 22). The Messianic interpretation of the salient predictions of the Jewish Scriptures is inevitable to the careful student of the N. T. In the N. T. there occurs a double guarantee of such interpretation, a *general* and a *specific* direction. In such passages as Matt. xxi. 42; xxvi. 54, 56; Mark xiv. 49; Luke xxiv. 27, 32, 44; and John v. 39, we have Jesus asserting for himself a *general* fulfilment of the ancient Scriptures in his earthly career; and his leading disciples, in their confession and teaching, fully maintained this general application of prophecy to their Master—thus did the Apostle Philip, in John i. 45; St. Peter, in Acts x. 43 (comp. 1 Pet. i. 10-12); St. Paul (Acts xvii. 1-3; xxvi. 22; xxviii. 23); and St. John, in Rev. xix. 10. While the accomplishment of particular prophecies is *specifically* vouched for still more fully and frequently, of which instances will be given in the course of this Article. We now proceed to notice, briefly,

*The gradual growth of the Messianic Revelation.*

—1. In the primeval promise (Gen. iii. 15) lies the germ of a universal blessing. 'The seed of the woman,' the vagueness and obscurity of which phrase was so suited to the period of the protevangelium, is cleared in the light of the N. T. (see Gal. iv. 4, where the γενόμενον ἐκ γυναικός explains the original נָחֶשֶׁת). The deliverance intimated was

no doubt understood by our first parents to be universal, like the injury sustained, and it is no absurdity to suppose that the promise was cherished afterwards by thoughtful Gentiles as well as believing Jews; only to the latter it was subsequently shaped into increasing precision by supplementary revelations, while to the former it never lost its formal vagueness and obscurity. The O. T. gives us occasional gleams of the glorious primeval light as it struggled with the gross traditions of the heathen. The nearer to Israel the clearer the light; as in the cases of the Abimelechs (Gen. xx. 6; xxvi. 28), and Melchizedek (Gen. xiv. 18), and Job (xix. 25), and Balaam (Num. xxiv. 17), and the Magi (Matt. ii.), and the Samaritan woman (John iv. 25; and see, on *The Christology of the Samaritans*, Westcott's *Introduction*, pp. 148, 149). But, even at a distance from Israel, the light still flickered to the last, as 'the unconscious prophecies of heathendom' show, as Archbishop Trench happily designates—though in a somewhat different sense—the yearnings of the Gentiles after a deliverer (*Hulsean Lectures* for 1846; see also Bishop Horsley's *Dissert. on the Messianic Prophecies dispersed among the Heathen, Sermons*, vol. ii. (ed. 1829), pp. 263-318; and comp. Virgil's well-known eclogue *Pollio*, and the expectations mentioned by Suetonius, *Vit. Vespasian*, c. iv. 8, and Tacitus, *Hist.* v. 9, 13, and the Sibylline oracles, discussed by Horsley [*ut antea*], with a strong leaning to their authenticity). But although the promise was absolutely indefinite to the first father of man (on which see Bishop Horsley, *Sermon* xvi., pp. 234, 235, comp. with Dr. Stanley

Faber's *Prophetical Dissert.* vii., 4 and 5), additional light was given, after the Deluge, to the second father of the human race. 2. To Noah it was given to see a special reservation of blessing for one of his sons in preference to the other two, and—as if words failed him—he exclaimed, 'Blessed be Jehovah, the God of Shem!' (Gen. ix. 26). Not that at any time God meant to *confine* a monopoly of blessing to the individual selected as the special depository thereof. In the present instance Japheth, in the next verse, is associated with his brother for at least some secondary advantage: 'God shall enlarge Japheth, and he shall dwell in the tents of Shem.' 3. The principle of limitation goes on. One of Shem's descendants has three sons. One only of these is selected as the peculiar treasurer of the divine favour. But not for himself alone was Abraham chosen. As in Shem's instance, so here again Abraham was to be the centre of blessing to even a larger scope. More than once was he assured of this: 'In thy seed ['in thee,' chap. xii. 3] shall all the nations of the earth be blessed' (Gen. xxii. 18). The Messianic purport of this repeated promise cannot be doubted after Christ's own statement (John viii. 56), and St. Paul's comment (Gal. iii. 16). 4. In Abraham's grandson—the father of twin sons—we meet with another limitation; Jacob not only secures the traditional blessing to himself, but is inspired to concentrate it at his death on Judah, to the exclusion of the eleven other members of his family. 'Judah, thou art he whom thy brethren praise. . . The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until *Shiloh* come' (Gen. xlix. 8, 10) [SHILOH]; also to Perowne's *Essay*, pp. 26, 188; Delitzsch, *in loc.*; Bishop Pearson, *Cread.* art. ii.; Hengstenberg, *Christol.* i. 59, 60; Davison, *On Prophecy*, p. 106; Döllinger, *Gentile and Jew in the Courts of the Temple of Christ*, translated by Darnell, ii. 392. Onkelos and Raschi, it may be worth while to add, make 'Shiloh' here to refer to the Messiah, as do D. Kimchi and Abendana.) To us the Messianic interpretation of the passage seems to be called for by the principle of periodical limitation, which amounts to a law in the Christological Scriptures. We accept the conclusion, therefore, that the מְשִׁיחַ of this verse is the שֶׁרֶשֶׁת שְׁלוֹם, 'Prince of Peace' of Is. ix. 5 [6]; and the מְשִׁיחַ שְׁלוֹם, 'This man is peace,' of Micah v. 4; and the דְּבַר שְׁלוֹם, 'the peace-speaker,' of Zech. ix. 10; and the Εἰρημὸν ἡμῶν, 'our peace,' of St. Paul, Eph. ii. 14—in a word, our Messiah, Jesus Christ. 5. Passing by the later predictions of the Pentateuch, 'the prophet like unto Moses,' and 'the star' and 'the sceptre' of Balaam, we come to the next salient period of prophecy in the age of David. Here another advance is found in prophetic limitation. Jacob had only specified the *Tribe*, now the particular *Family* is indicated from which Messiah was to spring. From the great promise made to David (2 Sam. vii. 11, 16), and so frequently referred to afterwards (1 Kings xi. 34, 38; Ps. lxxxix. 30-37; Is. lv. 3; Acts xiii. 34), and described by the *svet psalmist* of Israel himself as 'an everlasting covenant ordered in all things and sure' (2 Sam. xxiii. 5), arose that concentrated expectation of the Messiah expressed by the popular phrase *Son of David*, of which we hear so much in the N. T. (comp. Matt. ix. 27; xii.

23; xxi. 9; xxii. 42; Mark x. 47, 48; xi. 10; Luke i. 32; xviii. 38, 39; John vii. 42; Rom. i. 3; Rev. xxii. 16; with Jer. xxiii. 5). Having now confined Messiah's descent to the family of the illustrious king who was 'the man after God's own heart,' prophecy will await God's own express identification of the *Individual* (see it given Matt. iii. 17; xvii. 5; Mark i. 11; ix. 7; Luke iii. 22; ix. 35; and referred to 2 Pet. i. 17). But it will not idly wait. It has other particulars to announce, to give point and precision to a nation's hopes.

All the more important events of the coming Redeemer's life and death, and subsequent kingdom and exaltation, were foretold. . . . Bethlehem was to be his birth-place (Micah v. 2, comp. with Matt. ii. 1-6); Galilee his country (Is. ix. 1, 2, comp. with Matt. iv. 14-16); a virgin his mother (Is. vii. 14, comp. with Matt. i. 23); he was to preach glad tidings to the meek and to bind up the broken-hearted (Is. lxi. 1, comp. with Luke iv. 17-21); though her king, he was to come to the daughter of Zion just and having salvation, lowly and riding upon an ass, and upon a colt, the foal of an ass (Zech. ix. 9, comp. with John xii. 14, 15); he was to be despised and rejected of men; was to be led like a lamb to the slaughter (Is. liii. 3, 7, comp. with Ps. xxii. 6; John i. 11; xviii. 40; Mark xiv. 61 and xv. 5); his garments were to be parted, and lots cast upon his vesture (Ps. xxii. 18, comp. with John xix. 23, 24); his hands and feet were to be pierced (Ps. xxii. 16, comp. with Luke xxiii. 33, and John xx. 25); he was to have vinegar given to him to drink (Ps. lxix. 21, comp. with Matt. xxvii. 34, 48); he was to pour out his soul unto death; was to be numbered with the transgressors; and his grave, though intended to be with wicked men [see this trans. in Mason and Bernard's *Hebr. Gram.*, ii. 305], was in reality destined to be with a rich man (Is. liii. 9, comp. with Matt. xxvii. 57, 58); his soul was not to be left in hell, nor his flesh to see corruption (Ps. xvi. 10, comp. with Acts ii. 31, and xiii. 34-36); he was to sit on the right hand of Jehovah till his foes were made his footstool (Ps. cx. 1, comp. with 1 Pet. iii. 22; Heb. i. 3; Mark xvi. 19, and 1 Cor. xv. 25); his kingdom was to spread until ultimately 'the kingdom and dominion, and the greatness of the kingdom under the whole heaven, should be given to the saints of the Most High' (Dan. vii. 27; see Perowne, *Coherence*, pp. 29, 30). Slight as is this sketch of the prophetic announcements with which God was pleased to sustain human hope amidst human misery, 'as a light that shineth in a dark place' (2 Pet. i. 19), 'shining more and more unto the perfect day' (Prov. iv. 18), it is yet enough to suggest to us how great must have been the longing for their Deliverer which such persistent and progressive promises were likely to excite in the hearts of faithful men and women.

It is therefore quite consistent with the probability of the case, that we are informed by St. Luke of the existence of what seems to have been a considerable number of persons 'that looked for redemption in Israel' (ii. 38). The demeanour of these believers was exhibited in a close and conscientious adherence to the law of Moses, which was, in its statutes and ordinances, at once the rule of pious life and the schoolmaster to guide men to their Messiah (Gal. iii. 24). As examples of these 'just and devout' persons, the evangelist

presents us with a few short but beautiful sketches in his first and second chapters. Besides the blessed Mary and faithful Joseph, there are Zacharias and Elizabeth, Simeon and Anna—pictures of holiness to be met with among men and women, married and unmarried, whose piety was strongly toned with this eminent feature, which is expressly attributed to one of them, ‘*waiting for the consolation of Israel*’ (comp. Luke i. 6, with ii. 25, and 37, 38). Such hopes, stimulated by a profound and far-sighted faith, were exhibited at the birth and infancy of the Messiah Jesus by these expectant Jews; and they were not alone. Gentiles displayed a not less marvellous faith, when ‘the wise men from the East’ did their homage to the babe of Bethlehem, undeterred by the disguise of humiliation with which the Messiah’s glory was to human eye obscured (Matt. ii. 2, 11). But at his death, no less than at his birth, under a still darker veil of ignominy, similar acknowledgments of faith in his Messiahship were exhibited. St. Mark mentions it as one of the points in the character of Joseph of Arimathea, that he ‘waited for the kingdom of God;’ and it would seem as if this faith urged him to that holy ‘boldness’ of using his influence with Pilate to rescue the body of Jesus, and commit it to an honourable tomb, as if he realised the truth of Isaiah’s great prophecy, and saw in the Crucified no less than Messiah himself (Mark xv. 43). To a like faith must be imputed the remarkable confession of the repentant thief upon the cross (Luke xxiii. 42)—a faith which brought even the Gentile centurion who superintended the execution of Jesus to the conviction that the expiring sufferer was not only innocent (Luke xxiii. 47), but even ‘the Son of God’ (Matt. xxvii. 54, and Mark xv. 39). This conjunction of Gentile faith with that of Hebrews is most interesting, and, indeed, consistent with the progress of the promise. We have seen above, how, in the earliest stages of the revelation, Gentile interests were not overlooked. Abraham, who saw Messiah’s day (John viii. 56), was repeatedly assured of the share which all nations were destined to have in the blessings of his death (Gen. xii. 3; xxii. 18; Acts iii. 25). Nor was the breadth of the promise afterwards narrowed. Moses called ‘the nations’ to rejoice with the chosen people (Deut. xxxii. 43). Isaiah proclaimed Messiah expressly as ‘the light of the Gentiles’ (xlii. 6; xlix. 6); Haggai foretold his coming as ‘the desire of all nations’ (ii. 7); and when he came at last, holy Simeon inaugurated his life on earth under the title of ‘a light to lighten the Gentiles’ (Luke ii. 32); and when his gospel was beginning to run its free course, the two missionaries for the heathen quoted this great prophetic note as the warrant of their ministry: ‘I have set thee to be a light of the Gentiles, that thou shouldest be for salvation unto the ends of the earth’ (Acts xiii. 47). Plain, however, as was the general scope of the Messianic prophecies, there were features in it which the Jewish nation failed to perceive. Framing their ideal not so much from their Scriptures as from their desires, and impatient of a hated heathen yoke, they longed for an avenging Messiah who should inflict upon their oppressors retaliation for many wrongs. This wish coloured all their national hopes; and it should be borne in mind by the student of the gospels, on which it throws much light. Not only was the more religious class, such as Christ’s own

apostles and pupils, affected by this thought of an external kingdom, even so late as his last journey to Jerusalem (Mark x. 37); but the indiscriminating crowds, who would have forcibly made him king (John vi. 15)—so strongly did his miracles attest his Messianic mission even in their view (ver. 14)—and who afterwards followed him to the capital and shouted hosannas to his praise, most abruptly withdrew their popular favour from him and joined in his destruction, because he gave them no signs of an earthly empire or of political emancipation. [JESUS CHRIST, *Life on Earth*, vol. ii. p. 571, col. 2; and p. 572, col. 1.] Christ’s kingdom was ‘not of this world,’ is a proposition which, although containing the very essence of Christianity, offended the Jewish people, when Jesus presented himself as their veritable Messiah, and led to their rejection of him. Moreover, his lowly condition, sufferings, and death, have been a stumbling-block in the way of their recognition of him ever since.

*A suffering Messiah.*—The portrait of an afflicted and suffering Messiah\* is too minutely sketched by the psalmist (Ps. xxii., xlii., xliii., lxix.), by Isaiah (ch. liii.), by Zechariah (ch. xi.-xiii.), and Daniel (ix. 24-27), to be ignored even by reluctant Jews; and strange is the embarrassment observable in Talmudic Judaism to obviate the advantage which accrues to Christianity from its tenure of this unpalatable doctrine. Long ago did Tryphon, Justin Martyr’s Jew, own the force of the prophetic Scriptures, which delineated Messiah as ‘a man of sorrows,’ Παθητόν μὲν, said he, τὸν Χριστὸν ὅτι αἱ γραφαὶ κηρύσσουσιν φανερόν ἐστιν (Justin., *Dial.* 89). In later times, after the Talmud of Babylon (7th century) became influential, the doctrine of two Messiahs was held among the Jews.† For several centuries it was their current belief that Messiah-Ben-David was referred to in all the prophecies which spoke of glory and triumph, while on Messiah-Ben-Joseph of Ephraim fell all the predicted woes and sufferings. By this expedient they both gratified their traditional idea which exonerated their chief Messiah, of David’s illustrious race, from all humiliation, and likewise saved their nominal deference to the inspired prophets who had written of the sorrows of Messiah. (For a popular sketch of this opinion of two Messiahs, the reader is referred to Mr. Payne Smith’s Oxford Sermons, on the *Messianic Prophecies of Isaiah*, pp. 177-181; see also Buxtorf’s *Rabbinical Lexicon*, s. v. משיח, pp. 1126-

1127, and s. v. אַרְמִיָּהוּ, Eisenmenger’s *Entdecktes Judenthum*, ii. 720-750; Otho’s *Rabbinical Lexicon*; Schoettgen, *Hore*, *Heb. et Rabbin.*, ii. 1-778.)

\* ‘Even in the first prediction, of the woman’s seed bruising the serpent’s head, there is the idea of a painful struggle and of a victory, which leaves the mark of suffering upon the Conqueror’ (Smith’s *Messianic Prophecies of Isaiah* [1862], p. 164).

† All the references to a suffering Messiah made by great writers, such as Raschi, Ibn Esra, and D. Kimchi, are to ‘Messiah-Ben-Joseph;’ while of the more than seventy quotations cited by Buxtorf (*Lex. Rabbin.*, s. v. משיח) from the Targums, including Onkelos, not one refers to the Messiah as suffering. This early Targumist literature (as distinguished from the later Rabbinical) dwells on the glories, triumphs, and power of a conquering Messiah.

However absurd this distortion was, it was yet felt to be too great a homage to the plain interpretation of the prophetic Scriptures as given by Christian writers, who showed to the votaries of the Talmud that their earlier authors had applied to the Son of David the very passages which they were for referring to the Son of Joseph. From the 10th and 11th centuries, therefore, other interpretations have been sought for. Maimonides omits the whole story of Messiah-Ben-Joseph in his account of the Messiah; see Pococke, *Append. on Malachi*. *The Messiah has been withdrawn altogether from the reach of all predicted sufferings*. Such passages as Is. liii. have been and still are applied to some persecuted servant of God, Jeremiah especially, or to the aggregate Jewish nation. This anti-Messianic exegesis is prevalent among the Neologians of Germany and France, and their 'free-handling' disciples of the English school (see Dr. Rowland Williams, *Essays and Reviews*, pp. 71-75 [edit. 2]). Thus Jewish sentiment has either reverted to that low standard of mere worldly expectation which recognised no humiliation in Messiah, but only a career of unmixed triumph and glory, or else has collapsed in a disappointment and despair, which forbids all speculation of a Messiah whatever (Eisenmenger, *Entdecktes Jud.*, i. 677). 'We have waited so long for the Messiah you have promised us,' said the Jews of Constantinople to their Rabbi, 'without his arrival, that if you do not soon terminate our disappointment, we will turn Christians' (Chevalier Drach, *L'église et la synagogue*, pp. 98, 99). But Jewish despair does not often resolve itself into Christian hope. Here and there affecting instances of the genuine change occur, such as the two mentioned by Bishop Thirlwall (*Reply to Dr. W.'s earnestly respectful letter*, p. 78); in the second of which—that of Isaac da Costa—conversion arose from his thoughtful reflections on the present dispersion of the Jewish race for its sins. His acceptance of Jesus as the Messiah solved all enigmas to him, and enabled him to estimate the importance of such prophetic promises as are yet unfulfilled to Israel. But the normal state of Jewish Messianic opinion is that sickness of heart which comes from deferred hopes. This despair produces an abasement of faith,\* and a lowering of religious tone, or

else finds occasional relief in looking out after pretended Messiahs. Upwards of thirty cases of these are noticed by Basnage and other historians, as having deluded the nation in its scattered state since the destruction of Jerusalem. The havoc of life and reputation caused by these attempts has tended more than anything else to the discouragement of Messianic hopes among the modern Jews. Foremost in the unhappy catalogue of these fanatics stands the formidable rebellion under Bar-Cocheba, in the 2d century. Rabbi Akiba, 'the second Moses,' the great light of the day in Jewry, declared before the Sanhedrim that Bar-Cocheba was the Messiah. Rabbi Jochanan alone made opposition, and said, 'Grass, O Akiba, will grow out of thy jaws, and yet the Son of David not have come.' We know not what was the fate of Bar-Cocheba (or Bar-Coseba, 'the son of lying,' as his disappointed dupes at length called him), but the gray-headed Akiba was taken by the Romans and executed. More are said to have perished in this attempt than in the previous war of Titus. Embarrassing as all these failures are to the Jew, they only add one more to the many proofs of the Messiahship of Jesus of Nazareth, who expressly foretold these delusions of 'false Christs' (Matt. xxiv. 24; Mark xiii. 22), as one class of retributions which should avenge on Israel the guilt of his own rejection. Not only, however, from the lowliness and suffering of the Christian Messiah, but in a still greater degree from his exalted character, there arises a difficulty of faith to the Jewish objection. The divinity of nature which Jesus claimed for himself, and on account of which the Sanhedrim procured his death, is perhaps the greatest stumbling-block in the way of his reception among the Jews. But on this we cannot now dwell.

*Authorities.*—Besides the works which we have already referred to, use has been made of Jost, *Geschichte des Judenthums*, 3 vols., 1857; Ewald, *Geschichte des Volkes Israel*; Pye Smith, *Testimony of the Messiah*, 3 vols., 1829; Bishop Kidder, *Demonstration of the Messiah*, folio, 1726; Bleek, *Einleitung in das A. T.*, 1860; Dr. McCaul, *Messiahship of Jesus*, Warburton Lectures, 1852; Reimke, *Die Messianischen Psalmen*, and *Der Prophet Malachi*; and Oehler, art. *Messias*, Herzog, ix. 408-441.—P. H.

\* This degeneracy of faith will, among other proofs, be evident to the reader who contrasts the old creed of the Jews with the *advanced* opinion of their modern writers. Maimonides on the Mishna (*Sanhed. c. Pelék*), calls the belief in the Messiah a fundamental article, and he quotes Article xii., which runs thus:—'I believe with a firm and perfect faith that the Messiah is yet to come; and although he tarrieth, I will wait or expect his coming daily.' And this expectation is no doubt cherished by the devout Jew still, who at the close of every grace after meal pray—'Merciful God, make us worthy of seeing the days of Messiah.' On the other hand, the learned rationalist Jew Salvador (*Histoire des Instit. de Moïse*, ed. 1862, vol. ii. p. 525), says—'Comme cette idée [of the coming of Messiah] n'est pas consignée d'une manière expresse dans les cinq livres fondamentaux [Pentateuch], elle ne forme nullement, quoiqu'en ait dit Maimonide, un article indispensable de la foi des Hébreux.' In a note, he quotes the renowned Joseph Albo, of 15th century, who re-

METALS. The principal metals are in this work considered separately under their several names; and a few general observations alone are necessary in this place.

The mountains of Palestine contained metals, nor were the Hebrews ignorant of the fact (Deut. viii. 9); but they do not appear to have understood the art of mining. They therefore obtained from others the superior as well as the inferior metals, and worked them up. They received also metal utensils ready made, or metal in plates (Jer. x. 9), from neighbouring and distant countries of Asia and Europe. The metals named in the O. T.

proves Maimonides for stretching too far the fundamental doctrines of Judaism, and not distinguishing between them and private opinions, such as he was content to regard the Messianic belief as being; and further justifies his rejection of this belief by the great authority of Hillel, who in the 1st century of the Christian era maintained that Israel must no longer expect a Messiah.

are ברזל *barzel*, iron (steel, Jer. xv. 12); נחשת *nechosheth*, copper, or copper ore; כסף *ceseph*, silver; זהב *zahab*, gold; עפרת *ophereth*, lead;

and בריל *bedil*, tin. The trade in these metals was chiefly in the hands of the Phœnicians (Ezek. xxvii. 7), who obtained them from their colonies, principally those in Spain (Jer. x. 9; Ezek. xxvii. 12). Some also came from Arabia (Ezek. xxvii. 19), and some apparently from the countries of the Caucasus (Ezek. xxvii. 13). A composition of several metals is expressed by the Hebrew word

חשמל *chasmil* (which see). In general the ancients had a variety of metallic compositions, and that which the word *chasmil* describes appears to have been very valuable. Whether it was the same as that precious compound known among the ancients as Corinthian brass is uncertain, but it is likely that in later times the Jews possessed splendid vessels of the costly compound known by that name. Indeed this is distinctly affirmed by Josephus (*Vita*, 13).

The vast quantity of silver and gold used in the temple in the time of Solomon, and which was otherwise possessed by the Jews during the flourishing time of the nation, is very remarkable, under whatever interpretation we regard such texts as 1 Chron. xxii. 14; xxix. 4, etc. In like manner, we find among other ancient Asiatic nations, and also among the Romans, extraordinary wealth in gold and silver vessels and ornaments of jewellery. As all the accounts, received from sources so various, cannot be founded on exaggeration, we may rest assured that the precious metals were in those ancient times obtained abundantly from mines—gold from Africa, India, and perhaps even then from Northern Asia; and silver principally from Spain.

The following are the metallic manufactures named in the O. T.:—Of *iron*, axes (Deut. xix. 5; 2 Kings vi. 5); saws (2 Sam. xii. 31); stone-cutters' tools (Deut. xxvii. 5); sauce-pans (Ezek. iv. 3); bolts, chains, knives, etc., but especially weapons of war (1 Sam. xvii. 7; 1 Maccab. vi. 35). Bedsteads were even sometimes made of iron (Deut. iii. 11); 'chariots of iron,' *i.e.*, war-chariots, are noticed elsewhere. [CHARIOTS.] Of *copper* we find vessels of all kinds (Lev. vi. 28; Num. xvi. 39; 2 Chron. iv. 16; Ezek. xxvii. 13; and also weapons of war, principally helmets, cuirasses, shields, spears (1 Sam. xvii. 5, 6, 38; 2 Sam. xxi. 16); also chains (Judg. xvi. 21); and even mirrors (Exod. xxxviii. 8). [COPPER.] *Gold* and *silver* furnished articles of ornament, also vessels, such as cups, goblets, etc. The holy vessels of the temple were mostly of gold (Ezra v. 14). Idolaters had idols and other sacred objects of silver (Exod. xx. 23; Is. ii. 20; Acts xvii. 29; xix. 24). *Lead* is mentioned as being used for weights, and for plumb-lines in measuring (Amos vii. 7; Zech. v. 8). Some of the tools of workers in metal are also mentioned: פַּעַם *paam*, anvil (Is. xli. 7); מַקְבֵּה *makkabah* (Is. xlv. 12); פַּטִּישׁ *pattish*, hammer (Is. xli. 7); מַל קָחִים *mal kachim*, pincers; and מַפְּחָה *mapphach*, bellows (Jer. vi. 29); מִצְרֶפֶת *matzreph*, crucible (Prov. xiii. 3); כּוּר *cur*, melting-furnace (Ezek. xxii. 18).

There are also allusions to various operations connected with the preparation of metals. 1. The smelting of metal was not only for the purpose of

rendering it fluid, but in order to separate and purify the richer metal when mixed with baser minerals, as silver from lead, etc. (Is. i. 25; comp. Plin. *Hist. Nat.* xxxvii. 47; Ezek. xxii. 18-20). The dross separated by this process is called סִיגִים *sigim*, although this word also applies to metal not yet purified from its dross. For the actual or chemical separation other materials were mixed in the smelting, such as alkaline salts, בּוֹר *bor* (Is. i. 25); and lead (Jer. vi. 29; comp. Plin. *Hist. Nat.* xxxiii. 31). 2. The casting of images (Exod. xxv. 12; xxvi. 37; Is. xl. 19), which are always of gold, silver, or copper. The casting of iron is not mentioned, and was perhaps unknown to the ancients (Hausmann, in *Commentatt. Soc. Goett.*, iv. 53, sqq.; Müller, *Archäol.* p. 371). 3. The hammering of metal, and making it into broad sheets (Num. xvi. 38; Is. xlv. 12; Jer. x.) 4. Soldering and welding parts of metal together (Is. xli. 7). 5. Smoothing and polishing metals (1 Kings vii. 45). 6. Overlaying with plates of gold and silver and copper (Exod. xxv. 11-24; 1 Kings vi. 20; 2 Chron. iii. 5; comp. Is. xl. 19). The execution of these different metallurgic operations appears to have formed three distinct branches of handicraft before the Exile; for we read of the blacksmith, by the name of the 'worker in iron'

(רוֹשֵׁי בְרֹזֶל, Is. xlv. 12); the brass-founder (1 Kings vii. 14); and the gold and silver smith (Judg. xvii. 4; Mal. iii. 2). [HANDICRAFT.]

The invention of the metallurgic arts is in Scripture ascribed to Tubal-cain (Gen. iv. 22). In later times the manufacture of useful utensils and implements in metals seems to have been carried on to a considerable extent among the Israelites, if we may judge from the frequent allusions to them by the poets and prophets. But it does not appear that, in the finer and more elaborate branches of this great art, they made much, if any progress, during the flourishing times of their commonwealth; and it will be remembered that Solomon was obliged to obtain assistance from the Phœnicians in executing the metal work of the temple (1 Kings vii. 13).

The Hebrew workers in iron, and especially such as made arms, were frequently carried away by the different conquerors of the Israelites (1 Sam. xiii. 19; 2 Kings xxiv. 14, 15; Jer. xxiv. 1; xxix. 2); which is one circumstance among others to show the high estimation in which this branch of handicraft was anciently held.—J. K.

METHEG-AMMAH (מֶתֶגֶת אַמָּה). In the A.V. of 2 Sam. viii. 1 we read, 'David took *Metheg-Ammah* out of the hand of the Philistines;' but in the margin instead of 'Metheg-Ammah' is 'the bridle of Ammah.' It seems most probable that the sacred writer did not give the word as a proper name, but as a descriptive epithet. It is not found in any other part of the Bible, nor in any ancient writer. The parallel passage in 1 Chron. xviii. 1 is, in the Hebrew, word for word the same as this, except that instead of 'Metheg-Ammah,' it has 'Gath and her daughters' (אֶת־גֹּת וּבָנֶיהָ); it would seem, therefore, that the phrase 'Metheg-Ammah' must be in some sense equivalent to 'Gath and her daughters.' The word *Metheg* signifies 'bridle'; and *Ammah* (אִמָּה) is the same as *em* (אִם), 'mother,' which, like the

Arabic *um* (أُم), may mean 'metropolis' (cf. 2 Sam. xx. 19). *Metheg-haammah* (for it has the article) may therefore mean 'the bridle (that is, 'the command or government') of the metropolis.' Thus interpreted, the parallel passages are identical in meaning. Gaza was the metropolis of Philistia. When David took 'Gaza and her daughters,' he took 'the government of the metropolis' from the Philistines. This is substantially the interpretation of Gesenius, who thus translates the clause, '*et sumsit Davides frenum metropoleos e manu Philistæorum; i. e., metropolin Philistæorum sibi subject'*' (*Thesaurus*, p. 113).

The LXX. renders the clause ἔλαβε Δαυὶδ τὴν ἀφωρισμένην ἐκ, κ. τ. λ.; though what is meant by ἀφωρισμένην, or how *Metheg-haammah* could be so rendered, it is now impossible to tell. The Vulgate has *frenum tribut*, 'the bridle of bondage,' a translation which the Hebrew will not legitimately bear, though Forster (*Dict. Heb.*) tries to defend it by saying that *Metheg-haammah* means literally *frenum cubiti*, which is equivalent to *frenum tribut* seu *subjectionis*. Others suppose *Ammah* to be the name of a mountain at or near Gath, mentioned by Pliny (v. 13) as *Amgar*; and the 'bridle of Ammah' was thus equivalent to Gath (so Pool, Patrick). Other interpretations are given by Glassius (*Philolog. Sac.*, p. 639), but they are not worth recording.—J. L. P.

METHUSAEŁ (מֶתוּשָׁאֵל, *man of God*; Sept. Μαθουσαλα), son of Mehujael, of the race of Cain (Gen. iv. 18).

METHUSELAH (מֶתוּשֶׁלַח, *man of the dust*; Sept. Μαθουσαλα), son of Enoch, and remarkable as being the oldest of those antediluvian patriarchs whose great ages are recorded Gen. v. 21, 22. At the age of 187 years he begat Lamech (the father of Noah); after which he lived 782 years, making altogether 969 years. [LONGEVITY.]—J. K.

#### MEUNIMS. [MAONITES.]

MEUSCHEN, JOHANN GERHARD, a learned divine and philologist, was born in 1680, at Osnabrück, in Westphalia, studied at Jena, and obtained the degree of A.M. in 1702. He then went to Kiel, where he eventually became professor of philosophy in 1704. Having returned to his native place, he assisted his father for some time in the ministry, until he was elected preacher at St. Catherine's. In 1708 he was made pastor of the Lutheran congregation in the Hague; in 1716 he became court preacher of Hanau, and subsequently general superintendent of Coburg, church-councillor and professor of theology at Coburg, where he died in 1743. His most important works in the field of Biblical literature are—*Diatriba de Nasi principe et direttore Synedrui Magni Hebræorum*, Coburg 1724; *Novum Testamentum e Talmude illustratum*, Leip. 1736; *Bibliotheca Medici sacri, seu recensio scriptorum qui Scripturam Sacram ex medicina et philosophia naturali illustrarunt*, the Hague 1712. Besides publishing many sermons and smaller dissertations, on topics of practical or historical interest, he edited H. Eygas' *Chronicon Universale*, Leyd. 1643.—E. D.

MEZAHAB (מֵי זָהָב; Sept. Μαζωβ; Alex.

Μεζωβ), the grandfather of Mehetabel, the wife of Hadar, one of the kings of Edom (Gen. xxxvi. 39; 1 Chron. i. 50). The name means *gold-water*, i. e., probably *auriferous stream*. Some regard it as the name of a place rather than a person, and suppose that *daughter* is used in the sense of *inhabitant* or *native*; but this is unnecessary, for though it may seem strange to call a man a stream or water, yet analogous instances are not wanting

(comp. בְּאֵרִי, יָבֵל, etc.). To what this prince was indebted for his name, whether to his material wealth—he was called Mezahab because gold was in his house as water' (Abarbanel)—or to some exuberance of mental resources, such as led Cicero to say of Aristotle, ὅτι χρυσίου ποταμοῦ εἰν ῥέοντος (Plutarch, *Vit. Cic.*, vol. iv., p. 465, of Bryan's edit.), it is impossible to say. The Targ. Onkel. abolishes the proper name, and renders 'daughter of a worker in gold.' The Targ. Jonath. and the T. Hierosol. resolve the name into מֵי, *What is*

*gold?* and apply it to Matred, who, say they, 'was a man that laboured with much assiduity and vigilance, and after he became rich and was full of wealth, his mind was purified, and he repented and said, What is gold, and what is silver?' Jarchi gives a similar rendering, but assigns a different reason for the name; 'he was,' says he, 'a rich man, and gold was not of any value in his eyes.'—W. L. A.

MEZUZA, pl. MEZUZOTH (מְזוּזוֹת, מזוזות), the place on which the Mosaic law enjoins the Israelites to write passages of Scriptures, Deut. vi. 9; xi. 20.

1. *Signification of the Word, and Design of the Injunction.*—The word מְזוּזָה (from זָז, *to push about, to move*) denotes either that which is most prominent, hence *the post of a door*, or that on which the door moves, or on which the hinges turn—hence a *door-post*. This is the sense in which it occurs in the Hebrew Scriptures. From the fact, however, that on it were written passages of the law, the term *Mezuzah* came afterwards synecdochically to denote the writing itself, or the passages of Scripture affixed to the door-post, and this is the sense in which the word is used in the Chaldee paraphrases, and in the Jewish writings generally. As books were exceedingly rare and expensive in ancient times, and could only be possessed by very few, the practice obtained, among the nations of antiquity, and still prevails in the East, of writing, engraving, or painting, such sacred mottoes or sage maxims over the doors of dwellings as the parents were especially anxious to record or to impart to their children. Thus, the ancient Egyptians had brief hieroglyphical legends over their doorways (Wilkinson, *Manners and Customs of Ancient Egypt*, ii. 102; Wathen, p. 101), the Greeks and Romans had inscriptions over their doors (Virgil, *Georg.*, iii. 26, *seq.*) Other nations had their laws written upon their gates (Huetius, *Demonstratio Evangelica*, p. 58); and the Moslems to the present day, 'never set up a gate, cover a fountain, build a bridge, or erect a house, without writing on it choice sentences from the Koran, or from their best poets' (Thomson, *The Land and the Book*, p. 98). Now Moses in this instance, as in many other cases, availed himself of a prevalent custom, in

order to keep the divine precepts ever before the eyes of the people, and to enable them to instruct their children in the law of God. Hence Maimonides beautifully remarks, 'The commandment about the *Mezuzah* is binding on every one. For whenever an Israelite comes into the house, or goes out, he, seeing on it the name of the Holy One, blessed be he, will thereby be reminded of his love; and when he awakens from his sleep, and from his thoughts about the vanities of time, he will thereby be led to remember, that there is nothing which endures for ever and throughout all eternity except the knowledge of the everlasting Rock, and he will reflect and walk in the paths of righteousness' (*Iad Ha-Chezaka, Hilchoth Tefillin*, vi. 13).

2. *The Manner in which this Injunction has been and still is observed.*—That the Jews of old literally observed this injunction is not only evident from the above-mentioned prevailing custom of antiquity, but also from Josephus, who distinctly says that the Jews 'inscribe the greatest blessings of God upon their doors' (*Antiq.* iv. 8. 13); from the Chaldee paraphrase of Onkelos, who translates Deut. vi. 9, xi. 20, 'and thou shalt write them upon scrolls, and affix them on the door-posts of thy houses and thy gates;' from the Jerusalem Targum, Jonathan ben Uziel, Jerusalem Talmud (*Pea*, i. 1), Babylonian Talmud (*Erubin*, 96 b; *Aboda Sora*, 11 a), etc. These authorities, moreover, show that the Hebrews, at least after the Babylonish captivity, and at the time of Christ, wrote the passages containing this injunction on a piece of parchment, and affixed it to the door-posts, and that this *Mezuzah*, as it is called, is substantially the same as the Jews now have it, which is made in the following manner:—On the inside of a piece of square parchment, prepared by a Jew especially for this purpose, are written Deut. vi. 4-9,

353.

and xi. 13-21, whilst on the outside are written the divine name *שדי*, the Almighty, on the place where the first passage ends, and the words *במוכסז כוז*, *Kuzu Bemuchzas Kuzu*, to the left at the bottom. Thus written, the schedule is then rolled up in such a manner that the divine name *שדי* is outside, and is put into a reed, or hollow cylinder

made of lead, brass, or silver, varying in costliness according to the circumstances of the people. In this tube there is a little hole, just large enough to show the divine name, which is protected by a piece of glass, forming as it were a little window through which *שדי* is seen. Such a *Mezuzah* must be affixed to the right hand door-post of every door in the house by a nail at each end. The fixing of it is accompanied by the following prayer, 'Behold I prepare my hands to perform the commandment which my Creator has given me about the *Mezuzah*. In the name of the one, holy, most blessed God and his Shechinah, who is concealed, mysterious, and incorporated in the name of all Israel. Blessed art thou, O Lord our God, king of the universe, who has sanctified us by thy commandments, and has enjoined us to affix the *Mezuzah*!' Like the Greeks and Romans, who attached amulets to the jambs of the doors, and ascribed to them magic power, the Jews from a very early period believed that the *Mezuzah* guarded the house against the entrance of diseases and evil spirits, as may be seen

from the remarks in the Talmud *מילה דאת דמן*

*לך והיא מנטרה לך*, *Jerusalem Pea*, i. 1; and *בי היכי דתנטרי*, *Babylonian Aboda Sora*, 11 a;

*Menachoth*, 33 b, to which Rashi adds *לכל הבית* (*מן המזיקין*) and the Chaldee paraphrase of the Song of Solomon viii. 3, which is, 'I have affixed the *Mezuzah* to the right side of my door, in the third part thereof, towards the inside, so that the evil spirits may have no power to hurt me.' Hence the divine name *שדי* is made to denote the *Guardian of the dwellings of Israel*, the *ש* standing for

*ישראל*, the *י* for *דירת*, and the *ד* for *שומר*, according to the exegetical rule called *נוטריקון* (= *notarium* from *notarius*, a short-hand writer, one who writes with abbreviations), which regards every letter of a word as an initial or abbreviation of a word; whilst the words *כוז במוכסז כוז*, supposed to be the name of the guardian angel, or of

God himself, are made to stand for *אלהינו יהוה*, *Jehovah our God is Jehovah*, by another exegetical rule which exchanges each letter of a word with its immediate predecessor in the alphabet; e. g., the *כ* in *כוז* is exchanged for *י*, the *ו* for *ה*, the *ז* for *ו*, and the *י* for *ה*, thus yielding *יהוה*. Every pious Jew, as often as he passes the *Mezuzah*, in leaving the house or in entering it, touches the divine name with the finger of his right hand, puts it to his mouth, and kisses it, saying in Hebrew, 'The Lord shall preserve thy going out and thy coming in, from this time forth, and for ever more' (Ps. cxxi. 8); and when leaving on a business expedition, he says, after touching it, *בשמן*

*כוז במוכסז כוז אלך ואצליח*, *Kuzu Bemuchzas Kuzu* (= God), I go out and shall prosper.

3. *Literature.*—Maimonides, *Iad Ha-Chezaka Hilchoth Tefillin U-Mezuzah Ve-Sepher Tora*, v. vi.; *Forc Dea*, sections 285-295; the Jewish ritual entitled *Derech Ha-Chajim*, containing a summary of all the laws connected with the Jewish observances, Vienna 1859, p. 31, ff.—C. D. G.

MIBHAR (מִבְהָר; Sept. Μεβδαλ; Alex. Μαβάρ), son of Haggeri (1 Chron. xi. 38). [HAGARITE.]

MIBSAM (מִבְסָם; Sept. Μασσάμ). 1. One of the sons of Ishmael (Gen. xxv. 13; 1 Chron. i. 29). Knobel (*Gen. in loc.*), followed by Bunsen (*Bibelwerk, in loc.*), founding on the meaning of the word, *Balsam* or *sweet odour*, suggests that this is 'the name of a tribe between Mecca and Medina, where the mountain land of the *Beni Sobh*, a section of the great tribe of the *Beni Harb*, the proper site of the Mecca balsam lies.' But this is purely conjectural. 2. A son of Simeon (1 Chron. iv. 25). The occurrence of Mibsam and Mishma, both in the family of Ishmael and in that of Simeon, shows that the same names may occur in families of cognate relationship; so that there is no force in the argument which, from the similarity of names, would infer that the two genealogical lists in Gen. iv. and v. are merely different forms of the same.—W. L. A.

MIBZAR (מִבְצָר; Sept. Μαζάρ in Gen.; Βαζ-σάρ Alex., Μαβσάρ in Chron.), one of the dukes of Edom or Esau (Gen. xxxvi. 42; 1 Chron. i. 53). The word signifies *fortress* or *keep*, and from this Knobel, followed by Bunsen, suggests that it may be Petra. He compares Pss. cviii. 10, and lx. 9, where the principal city of Edom is called עִיר מִבְצָר and עִיר מוֹצֹר.—W. L. A.

MICAH, THE PROPHET. Sept. Μιχαῖς; Vulg. *Michaeas*. The full form of the Hebrew name is מִיכָיָהוּ (who is like Jehovah?), 2 Chron. xiii. 2; xvii. 7; abbreviated first to מִיכָיָה, Judg. xvii. 1-4; then to מִכָּיָה, Jer. xxxvi. 11, or מִיכָיָה, 1 Kings xxii. 13; and finally to מִיכָה. In the Septuagint Micah ranks third among the prophets, and in the arrangement of the present Hebrew copies he is placed the sixth of the minor prophets. In point of time he might be classed as fourth in the prophetic series—Jonah, Joel, and Amos having preceded him. Of his life nothing is known. In Jer. xxvi. 18, and in the inscription to his oracles, he is called 'Micah the Morasthite.' The epithet was probably given to distinguish him from an older prophet, Micaiah the son of Imlah, who lived in the period of Elijah. Some of the fathers, as Jerome, Athanasius, and Eusebius, have identified the two men, though they were separated by more than a century, and, according to Bleek, the compiler of the Book of Kings has fallen into the same anachronism (*Einleit.* p. 539). Bleek's one proof is the similarity between the beginning of this prophecy and an oracle of Micaiah the son of Imlah, recorded in 1 Kings xxii. 28, the repeated formula being the simple one, 'Hearken, O people, every one of you.' The assertion of Hengstenberg, and of Naegelsbach (Herzog's *Encyclopaedia*, art. *Micah*), that this repetition was intentional, and was meant to form a kind of link in the prophetic succession, is as unwarranted, on the one hand, as is that of Bleek on the other, for such an initial note of warning was surely natural to one bearing a momentous divine message. Micah was of Moresheth—either as born in it or identified with it as his home—though Jerusalem seems to have been the scene of his prophetic activity. Jerome and Eusebius call it Morasthi, and the first says it is a hamlet—*haud grandis viculus*—to the east of Eleutheropolis and in its immediate neighbourhood. The Morasthite is therefore no patronymic, as the Septuagint gives

it—ὄν τοῦ Μωρασθελ—in this place, though the reading is different under Jer. xxvi. 18—ὁ Μωρα-θλητης. The word in this first verse is translated by the Chaldee and Syriac versionists, and in the Septuagint and Vulgate, as a common noun—κληρονομία, Haereditas. It is probable, but not absolutely certain, that the place is the same as Moresheth-gath, i. 14—a town belonging to Judah. It is doubtful, as Robinson suggests, whether Jerome does not confound Mareshah with Moresheth—or perhaps they were near one another. Jerome says further of the place—'Sepulchrum quondam Michaiæ prophetæ nunc Ecclesiam,' Ep. 108, ad Eustochium [MORESHETH-GATH; MARESHAH]. (Robinson's *Biblical Researches*, vol. ii. p. 68.) Ewald remarks that Micah gives proof that he belonged to a small city of the lowlands, as he chiefly refers to such towns both in his threatenings and in his promises of mercy (i. 10, 15; v. 2), *Die Propheten*, p. 324. According to Sozomen, *Hist. Eccles.* vii. 29, the remains of Habakkuk and Micah were brought to light under the Emperor Theodosius—those of the latter being found at a place called Beratsatia, ten stadia from Cela—while his tomb was ignorantly called by the people Nephsamemana, an Aramaic word which he interprets into Greek as *μνημα πλοστον*.

According to the inscription—and there is no reason to doubt its genuineness—Micah prophesied 'in the reigns of Jotham, Ahaz, and Hezekiah, kings of Judah.' His ministry began at some point in Jotham's reign, and terminated at some point in Hezekiah's, giving a duration of from twenty to twenty-five years—for one need not give the extreme termini of the accession of Jotham and the death of Hezekiah, comprising a period of more than half a century, or from B.C. 756 to 697. The inscription, however, has been called in question. On the one hand, Bertholdt holds that none of Micah's oracles belong to the period of Hezekiah, but to the times of Ahaz and Manasseh, *Einleit.* sec. 411. But his proofs based on denunciations of idolatry are very precarious, for even in the days of Jotham and Hezekiah polytheism had deeply leavened the people, bringing along with it superstitious practices and moral declension. Hartmann and Eichhorn go still farther, and refer them wholly to the reign of Manasseh, though they admit that Micah flourished in Hezekiah's time, or from the 14th year of his reign. De Wette would give the last years of Ahaz and the first of Hezekiah, as the period of Micah's prophetic work. Little argument can be gathered from the allusions to neighbouring kingdoms, since what is said of them in Micah quite harmonizes with what is known of them during the reigns of these three Jewish sovereigns. On the other hand, Ewald, Hitzig, Bleek, Knobel (*Prophetismus*, ii. p. 203), and Maurer (*Comment. Gram.*, ii. p. 243), while not denying that the prophet may have lived and laboured under Jotham and Ahaz, maintain that the oracles, as preserved in his book, belong all to the reign of Hezekiah. But it may be replied, that many references fit in to the reigns of Jotham and Ahaz. The allusion in v. 10 to the war-horses and chariots, and fortresses, is surely applicable to the reign of Jotham, the successor of him who fortified the capital, built towers, invented 'engines to shoot arrows and great stones,' and had a large and disciplined body-guard, as well as a prodigious host, equipped with the finest armour (2 Chron. xxvi. 9, 10, 14, 15).

The allusions to idolatrous usages are in keeping with the historical accounts of the reign of Ahaz. It is said of him (1 Kings xvi. 3), 'that he walked in the way of the king of Israel;' and Micah gives, as one reason of the divine anger, 'The statutes of Omri are kept, and all the works of the house of Ahab, and ye walk in their counsels.' 'Shall I give my first-born for my transgression?' was a question of peculiar point under a sovereign who 'burned his children in the fire' (2 Chron. xxviii. 3). The frightful state of morals, false teaching, selfishness, rapacity, and injustice described in Micah agrees well with the reign of Ahaz, by whom the nation was brought to the verge of ruin, and who was not privileged to be buried 'in the sepulchres of the kings' (2 Chron. xxviii. 27). While the first chapter refers to the fall of idolatrous Samaria as a catastrophe soon to happen, it at the same time menaces Jerusalem, especially on account of its 'high places.' Besides, would it not be strange that the oracles delivered under Jotham and Ahaz had perished, and only those under Hezekiah were preserved? Better is it to suppose that Micah's prophecies were recast and collected together as we now have them in the early period of Hezekiah, or before the sixth year of his reign—the period of the destruction of Samaria. Great stress is laid on the quotation from Micah iii. 12 in Jer. xxvi. 18, 'Then rose up certain of the elders of the land, and spake unto all the assembly of the people, saying—Micah the Morasthite prophesied in the days of Hezekiah, king of Judah, and spake to all the people of Judah, saying, Thus saith the Lord of Hosts, 'Zion shall be ploughed like a field,' etc. This appeal was made in the reign of Jehoiakim. It is as useless on the part of Ewald to base the reference on the 'good historical recollection' of the elders, as it is on the part of Hävernicks to suppose that the elders were survivors from the period of its first utterance. Nor can we agree with Hengstenberg (*Christol.* i. 480), apparently endorsed by Keil (*Einleit.*, p. 297), that Hezekiah is singled out because he alone of the three kings mentioned in the inscription was possessed of theocratic authority, in that he had listened to the voice of the prophets; and because Micah probably collected his oracles under his reign. But really, the quotation by the elders only proves that this individual prophecy was delivered in the reign of Hezekiah, and it affirms nothing as to the time of the other oracles. Nay more, the quotation affords a strong presumption in favour of the genuineness of the inscription; as a mere redactor, aware of the reference in Jeremiah to king Hezekiah, would have been strongly tempted to place the era of Micah's prophetic activity under that monarch alone. We can lay no stress on another argument which Caspari (*Ueber Micha*, p. 60) adduces as of convincing power, and which is based on the identity of a paragraph in Isaiah ii. 2-5, with that in Micah i. 1-4. He assumes that the passage in Micah is the original, and that Isaiah made a borrowed use of it; Pusey adds, that the opinion is 'owned well-nigh on all hands' (*Minor Prophets*, p. 289). If Micah be the author, then it would prove him a contemporary of Isaiah at an early period of his career, even when Jotham was associated in the government with his father Uzziah. But it is hard to find which is the earlier composition. If it be said that in Micah it appears

to be an integral part of an oracle, brought out into relief by the previous prediction of the overthrow of Jerusalem, then it may be replied, that in Isaiah it stands as the first formal utterance, immediately after the distinct preamble—the word that 'Isaiah the son of Amoz saw concerning Judah and Jerusalem.' The probability is rather that the oracle used by both belongs to an earlier age, and commended itself to two prophets of kindred spirit. Perhaps, however, the original form is more distinctly preserved in Micah. The last or fourth verse seems an essential part of the oracle, and verse 5—so terse, rythmical, and suggestive, in Micah—is toned down into a brief exhortation in Isaiah. But see Gesenius (*Commentar über d. Jesaja*, in loc., p. 177). The use of the abbreviated form of the prophet's name in the inscription does not point of itself to a late age. The Kethib, indeed, gives the longer form in Jer. xxvi. 18, but the shorter occurs even in Judg. xvii. 1, 4, 5, 8; and though the briefer form of such a word is always a second form, it is impossible to say when the change was effected, or how gradually it came into use. Lastly, the arrangement of Wells (*Micah*, Pref., sec. 4-6) cannot be borne out, as it is too minute and mechanical; for he places the first chapter under Jotham, the next two chapters under Ahaz, and the rest under Hezekiah—while there are really no palpable criteria for such a sharp and definite adjustment.

The book has been variously divided: Eichhorn cuts it into five *Volksreden*; Henderson and Stähelin (*Spec. Einleit.* p. 247) divide it into two parts—the first comprising the earlier five chapters, and the second the remainder. Caspari, Keil, Bunsen, and Ewald, virtually make three divisions, each introduced by the warning שִׁמְעוּ, 'hear ye;' the first comprising chaps. i. and ii., the second iii.-v., and the last vi., vii. The objection to this arrangement, that the word שִׁמְעוּ stands too abruptly at

the beginning of the second section, has no force; especially if we suppose, with Knobel, Ewald, De Wette, Meier, Keil, and Pusey, that though the oracles were spoken at various times and as occasion required, they were collected together and moulded into their present form and connection in the reign of Hezekiah. One consequence is that the various sections have an inner connection, while they may admit of formal separation. Each section begins with a warning or expostulation, and passes into blessed promise. The first opens with the awful descent of Jehovah to judge the people; announces the doom of Samaria; sketches the path of the conqueror toward Jerusalem; reprobrates the sins of selfishness, rapacity, and falsehood; and menaces captivity to Jerusalem, but promises a return. The second deals with the iniquities of the rulers, their lawless refusal of justice, and their wanton cruelty in 'building up Zion with blood.' How can Bleek say that Micah does not blame 'political misdeeds,' when he singles out oppression and maladministration, and pictures the rulers as flaying the skin, breaking the bones, and chopping in pieces the people as flesh 'for a cauldron?' This section, while it threatens that 'Zion shall be ploughed as a field,' passes on to glorious prospects of restored nationality and worship. In fact, the oracles in this portion are the most magnificent in the book, culminating with the announcement of Messiah's birth at Bethlehem. The third section is in part

dramatic. God speaks (vi. 1)—the people reply, or make inquiry (ver. 6). The prophecy concludes with a glowing anthem, which finds a fitting place in the ode of Zechariah (Luke i. 68).

The style of Micah is rich, full, and musical—as nervous, vehement, and bold, in many sections, as Hosea, and as abrupt, too, in transitions from menace to mercy. He presents, at the same time, no little resemblance to Isaiah in grandeur of thought, in richness and variety of imagery, and in roundness and cadence of parallelism. The sudden changes are so far hidden from the English reader, because our version interprets as well as translates. The simple connective *ו*, is often rendered by some logical term, as ‘therefore’ (i. 6), ‘then’ (iii. 7), ‘but’ (iv. i.), ‘notwithstanding’ (vii. 13), etc. Concise and pointed questions are put suddenly; persons are changed rapidly; the people are spoken of, and then in a moment spoken to; the nation is addressed now as a unit, and now edged appeals are directed to individuals. The language is also pure and classical—intercourse with northern countries had not yet debased it. An under-tone of deep earnestness pervades the book, everywhere are discerned the workings of an intensely pious and patriotic soul. The figures are drawn from pastoral and rural life; the industrial life with which he was familiar in the vicinity of Moresheth-Gath, the low country of Judæa. Plays upon words are not uncommon, as in chap. i. 10-15, in which the rest of the clause in which a proper name occurs has a corresponding meaning with it, or bears a paronomastic relation to it. In these verses there is also vivid grouping, as place after place is challenged along the line of the conqueror’s march. Each town is seen to carry its doom in its very name. And that doom is told in many ways—either to them or of them; either in the prophet’s name or as a divine burden; either as an event about to come or a judgment which will certainly overtake them. Perhaps in vii. 18 there is an allusion to the meaning of the prophet’s own name. Correspondences to some extent with Isaiah may be seen—Mic. i. 1-4, Is. ii. 2-4; Mic. i. 9-16, Is. x. 28-32; Mic. ii. 2, Is. v. 8; Mic. ii. 6, 11, Is. xxx. 10, 11; Mic. iv. 10, Is. xxxii. 11; Mic. vi. 6-8, Is. i. 11-17; Mic. vii. 7, Is. viii. 17; Mic. vii. 12, Is. xi. 11. Allusions to the past history of the people are found in many places. There are also several expressions which are found in the Mosaic writings, though it might be rash to say that Micah takes them directly from the Pentateuch. Nor would we indorse all the instances in which, as Caspari affirms, later prophets, as Jeremiah and Ezekiel, Habakkuk and Zephaniah, have adopted the language of Micah (*Micha*, 449, etc.).

The prophecies of Micah thus comprehend many great events—the overthrow of Israel and ruin of Samaria; the invasion of Judah; the Babylonish captivity and the restoration; with the re-establishment of a new kingdom, and the birth of the great Ruler at Bethlehem. The punishment of the nations who oppressed the chosen people is also, but rather obscurely, fore-pictured. It requires some ingenuity to find the minuter shades of prophecy which Jahn and others have detected, such as the Maccabæan dynasty, with its victories and subsequent peace. For the future is Messianic and remote—a period of tranquillity and universal theocratic dominion.

Micah vii. 6 is alluded to in Matt. x. 35; Mark

xiii. 12; and Luke xii. 53. Micah v. 2 is referred to in John vii. 42, and quoted with some variation in Matt. ii. 5, 6. In Micah the words are—‘But thou, Bethlehem Ephratah, though thou be little among the thousands of Judah, yet out of thee shall he come forth unto me that is to be ruler in Israel.’ In Matthew the quotation runs—‘And thou, Bethlehem, in the land of Juda, art not the least among the princes of Juda: for out of thee shall come a Governor, that shall rule my people Israel.’ It is needless to say that the form in Matthew is only the Sanhedrim’s quotation. Nor need we give the verbal criticisms of Meyer, Fritzsche, and others upon it. The variation is not very important. In Micah emphasis is laid on the actual smallness of Bethlehem to enjoy such an honour; in Matthew the prominent idea is the honour itself, and its ideal grandeur—the converse side of the statement. Pocock cuts the knot by adopting Rabbi Tanchum’s odd opinion that the term *בֵּית לֵחֶם* means

both little and great, the prophet selecting the one sense and the evangelist the other. Nor can we hold, with the Jewish Rabbis Kimchi, Abarbanel, and Ibn Esra, followed by Theodore of Mopsuestia, Paulus, Strauss, and Davidson (*Introduction*, iii. p. 289), that the prophecy simply implies that the Messiah was to be of Davidic descent. The evangelist adopts the quotation in proof that Jesus was born in Bethlehem, so that it ranks with the other quotations adduced directly by him in the earlier chapters of his gospel. The current interpretation of the earlier Jews also contradicts this weak exegesis. The plain meaning is, that the Messiah, as David’s son, should be born in David’s town (Hofmann, *Weiss. u. Erf.*, p. 249). Tertullian also presses the argument that the Messiah has come, for Bethlehem was deserted—*neminem de genere Israel in civitate Bethlehem remansisse* (*Adversus Judæos*, xiii.; *Opera*, vol. ii. p. 734, ed. Oehler). To give the vague sense of Davidic extraction, and yet to deny that the words point out the place of birth, was thus a necessary but feeble Jewish subterfuge. Renan admits the usual interpretation of the prophecy, though he affirms that Jesus was really not of the family of David, and was born at Nazareth (*Vie de Jésus*, chap. ii.) The application of the oracle to Zerubbabel advocated by Grotius is wholly out of the question (*Opera*, vol. i. p. 527, ed. London 1679). The same exposition was held in former times by some whom Chrysostom calls *ἀνασχυντοῦρες*, persons past shame, for the Hebrew leader ‘was born in Babylon’ (Chrys., *Hom. vii. in Matt.*; *Opera*, vol. vii. p. 121, ed. Paris 1836). The Targum gives the reference formally to the Messiah.

The genuineness of the book has not been called in question. Only Ewald in his *Jahrb.* xi. 29, is disposed to maintain that the two concluding chapters are the work of a different author. His objections, however, have no force against the universal opinion.

MICAH, or MICAIAH (מִיכָה, or as in i. 1-4, מִיכָה; *Mīkalas*; *Mīká*; Michas, Micha. (See for different forms of name, under Micah the prophet.) Micah was 'a man of Mount Ephraim,' a peculiarly suggestive episode in whose life has been preserved in the 17th and 18th chapters of the book of Judges. Micah had in some way appropriated eleven hundred shekels of silver belonging to his mother, but, as her curses on him that had done the robbery rang in his ear, he confessed the theft and returned the money. The superstitious mother admitted that she had saved up the silver 'that she might wholly dedicate it unto Jehovah' in the form of images; and with a fifth part of it she at once provided a graven and a molten image for her son's idol-chapel. The other portion was probably reserved for the support of the establishment; for Micah had already a house of gods—idols of various styles, and teraphim too, while the sacerdotal ephod was worn by his son, who, in flagrant contravention of the law, had become his priest. This idolatry, so carefully and expensively fostered, was evidently regarded and venerated as in harmony with the worship of Jehovah. 'Blessed be thou of Jehovah,' said the mother to the son. 'Now I know that Jehovah will do me good,' said the patron of this organized superstition. In course of time a Levite, without any fixed residence, strayed into the settlement, and bargained, for a trifling recompense, to superintend the image-worship, consenting at the same time to be consecrated by Micah, who was anxious to have his worship under one who belonged at least to the sacred caste. This vagabond Levite was a grandson of Moses (for the true reading in xviii. 30 is not Manasses but Moses), a person, therefore, of some note; though we know not how one of such illustrious descent came to be a houseless and aimless wanderer. The incident shows how prone the nation was to relapse into idolatry, and how such idol-worship was creeping in and sustaining itself, from its symbolic character, or its supposed imitation of the cherubim forms in the tabernacle. We cannot tell why two images are so distinctly characterised, a 'graven' one and a 'molten' one. Deut. xxvii. 15. Perhaps the pair formed one symbolic representation, and the representation was probably analogous to that which was devised at Sinai and borrowed from the calf-worship of Egypt.

By and by some adventurous Danites, unable to dispossess the Amorites (Judg. i. 34), and longing for new settlements, sent five spies to reconnoitre the northern part of the country. These spies, happening to lodge in Micah's house, and recognising the voice of the grandson of Moses, were told his history and present occupation. On receiving his official blessing, they went their adventurous way. A body of Danites, on learning their report, soon followed. 'Six hundred armed men' traversed the country, and, apparently fired with religious zeal, entered Micah's sanctuary, and took violent possession of his priest and his images. Micah's remonstrances were vain. The armed band suc-

ceeded in its sudden invasion of Laish, so, 'quiet and secure,' changed its name into Dan, and formally set up, in that remote district, the idol-worship which they had despoiled in the house of Micah. This establishment, a rival to that of Shiloh, remained long in existence—'until the day of the captivity of the land;' and perhaps it suggested to Jeroboam the expedient which ensnared the ten tribes—the calf at Dan and the other at Bethel.

The time of these lawless incidents—betokening a state of declension and anarchy—may be assigned to the period immediately after that of 'the elders that overlived Joshua.' Dan apparently had possession of ships and a portion of sea-coast by the time of Deborah, and therefore this conquest seems to have happened before the monarchy of Jabin 'who reigned in Hazor.' At this early period, and in the disjointed tribal state of the kingdom, there was no central controlling power, the judges had but limited territorial sway, and the nation had been accustomed to arms during the conquest under Joshua; so that we can easily believe that a band of fierce soldiers, like these Danites, might work out their lawless will without opposition, especially as they were going in quest of new lands. One of these encampments, named after them Mahaneh-dan (xviii. 12), is referred to in Judg. xiii. 25. The words have a melancholy emphasis: 'In those days there was no king in Israel, but every man did that which was right in his own eyes.'

The date of the composition of this appendix to the book of Judges must be placed after the establishment of the monarchy, as the phrase 'there was no king in Israel' clearly indicates. The allusion to the time, 'that the house of God was in Shiloh,' might suggest a date posterior to the earlier part of Saul's reign, when the ark was removed to Nob. Some, like Le Clerc, argue for a later date, from the phrase, 'until the day of the captivity of the land' in xviii. 30, as if it necessarily referred to the Assyrian invasion. The reading is doubtful. Studer and Hitzig take the 30th verse as a later interpolation; Kimchi, Hävernicks, Hengstenberg, and Bleek refer the phrase to the captivity of the ark in the time of Eli, but on no good ground, unless the reading הָאָרֶץ be changed, as some prefer, into הָאָרֶן. Stähelin and Ewald,

regarding the verse as a later addition, place the composition about the period of Asa or Jehoshaphat; Stähelin insisting, too, that the diction does not belong to the purer period of the language. Verse 30, indeed, does not quite agree with 31, which seems to limit the duration of the Danite idolatry to the period of the station of the ark at Shiloh; and the phrase, 'until the day of the captivity,' as Keil remarks, may refer to some unknown invasion on the part of the neighbouring Syrians (*Biblischer Commentar über das A. T.*, 2d part, vol. i. p. 336, Leipzig 1863). Besides, it can scarcely be supposed that this idolatrous cultus, so directly and openly opposed to the spirit and letter of the Mosaic law, would have been allowed to stand in the zealous days of Samuel and David. See Stanley's *Lectures on the Jewish Church*, pp. 296-97.—J. E.

MICAIAH (מִיכָה, *who as Jehovah?* Sept. *Mīkalov*), a prophet of the time of Ahab. Accord-

ing to Josephus, he was the prophet who had rebuked Ahab for not putting Benhadad to death after he had conquered him at Samaria (1 Kings xx.); and that in consequence of this Ahab had imprisoned him. This will account for his not being among the prophets who assembled at the summons of Ahab when he and Jehoshaphat were preparing to make war on the Syrians. For some reason, Jehoshaphat being dissatisfied with the counsel given by the prophets, Micaiah was sent for at his special request; and as he declared against the enterprise, which the other prophets encouraged, Ahab commanded him to be imprisoned, and allowed only 'bread and water of affliction,' till he returned from the wars in peace. To which the prophet ominously answered, 'If thou return at all in peace, then the Lord hath not spoken by me' (1 Kings xxii. 8-28). The event corresponded with this intimation [AHAB]; but we have no further information concerning the prophet, excepting some statements of Josephus, for which he gives no authority (*Antiq.* viii. 15. 6).

MICHAEL (מִיכָאֵל, *who as God?* Sept. Μεχαήλ). This, which seems to have been a common name among the Jews (comp. Num. xiii. 13; 1 Chron. v. 13, 14; vi. 40; vii. 3; viii. 16; xii. 20; xxvii. 18; 2 Chron. xxi. 2, 4; Ezek. viii. 8), is the name given to one of the chief angels, who, in Dan. x. 13-21, is described as having special charge of the Israelites as a nation; and in Jude 9 as disputing with Satan about the body of Moses, in which dispute, instead of bringing against the arch-enemy any railing accusation, he only said, 'The Lord rebuke thee!' Again, in Rev. xii. 7-9, Michael and his angels are represented as warring with Satan and his angels in the upper regions (*ἐν τοῖς οὐρανοῖς*), from which the latter are cast down upon the earth. This is all the reference to Michael which we find in the Bible.

On the authority of the first of these texts the Jews have made Michael not only one of the 'seven' archangels, but the chief of them; and on the authority of all three the Christian church has been disposed to concur in this impression. The Jews regard the archangels as being such, not simply as a class by themselves, but as respectively the chiefs of the several classes into which they suppose the angels to be divided; and of these classes Michael is the head of the first, and therefore chief of all the archangels (*Sepher Othioth*, fol. 16).

The passages in Daniel and Revelations must be taken as symbolical, and in that view offer little difficulty. The allusion in Jude 9 is more difficult to understand, unless, with Vitrina, Lardner, Macknight, and others, we regard it also as symbolical; in which case the dispute referred to is that indicated in Zech. iii. 1; and 'the body of Moses' as a symbolical phrase for the Mosaic law and institutions. A comparison of Jude 9 with Zech. iii. 1 gives much force and probability to this conjecture.—J. K.

[There seems good reason for regarding Michael as a name of the Messiah. Such was the opinion of the best among the ancient Jews (Wetstein, *N. T.*, note on Jude 9; Surenhusius *Biblos Katal.*, p. 701, etc.) With this all the Bible representations of Michael agree. He appears as the Great Prince who standeth for Israel (Dan. xii. 1), and he is called 'the prince of Israel' (Dan. x. 21); expressions

which may be compared with that used in chap. ix. 25 of the Messiah. So in the *N. T.* Michael appears as the defender of the church against Satan (Rev. xii. 7), the special work of the Christ (1 John iii. 8). The allusion in Jude 9 can hardly be understood as above suggested; for though the church is called the body of Christ (Eph. i. 23), it is not in such a sense as admits of our giving an analogous explanation to the phrase 'body of Moses;' the ancient Jewish state was never so incorporated into Moses as the spiritual church is into Christ. Jude doubtless cites here a Jewish tradition which there is no reason for not regarding as true; for aught that can be shown to the contrary, Satan and the Logos, as Michael, may have contended for the body of Moses as a deep symbol of their grand contest for the spiritual dominion of the race. The appearance of Moses in a body at the transfiguration gives some countenance to the belief that he was on this occasion delivered from him that hath the power of death, and, like Elijah, triumphantly carried into heaven. As for an order of archangels, Scripture knows nothing of it. The Bible names but one archangel, Michael, the archangel, even the Lord, who shall come to judge the quick and the dead (1 Thess. iv. 16).]

MICHAELIS is the name of a German family, of which several members have been eminent in theological and Biblical literature since the Reformation. The writings of some of these men, although valued in their day, have now fallen into oblivion; but this cannot be said of the publications of the following members of this family:—I. JOHN BENEDICT MICHAELIS, from whose pen we have a valuable treatise on *The Capital Punishments of the Jews and other Eastern nations mentioned in the Bible*. Much learned illustration of several obscure passages of Scripture is to be met with in this dissertation, which is reprinted in Ugolino, *Thesaur.*, vol. xxvi. col. 233-264. II. JOHN FREDERICK MICHAELIS, pupil of Danzius, author of a philological dissertation on the derivation and meaning of the

sacred name מִיכָאֵל, also reprinted in Ugolino, *Thes.* xxiv. 105-138; with this treatise it is worth while to compare J. D. Michaelis' remarks, *Supplement. ad Lex. Hebraic.*, 85-87; and Gesenius, *Thes.* 95-99. III. JOHN GEORGE MICHAELIS, divinity professor at Halle, author of several learned works; one, on the famous Catechetical school of Alexandria, was first published in 1739; another work, more connected with Biblical literature, proceeded from his pen in 1752, *De progressu et incremento doctrine salutis inde a protovangelio usque ad Noachum*; he is, however, better known for his *Observationes Sacre*, a volume of great and varied erudition, comprising certain disputations which he had held at the University of Frankfort [now Breslau]. This volume was published at Utrecht in 1738; we add the titles of such as claim mention in this work—*De incisura propter mortuos*; *De Elisao, a probro puerorum Bethlehensium justo Dei judicio vindicato*; *De cane, symbolo prophete*; *De Spiritu Sancto, sub externo linguarum ignearum symbolo Apostolis communicato*; *De crustulis quotidianis pontificis maximi*; *De Sacerdote, ex ministerio suffitus non divite*. In Ugolino, *Thes.* xi. 727-748, there occurs a valuable

dissertation, *De Thuribulo Adyti*, in which our author fully considers the high-priest's sacrificial duties on the great day of atonement, and takes occasion to illustrate, in an interesting manner, the priesthood of Christ in some of its features as indicated in the Epistle to the Hebrews, ix. 7-15.

IV. JOHN HENRY MICHAELIS, who was, upon the whole, the most accurately learned of all the accomplished members of his family, was born at Klettenberg, in Hohnstein, in the year 1668. He studied Oriental literature for some years at Frankfurt-on-the-Oder, where he had the celebrated Ludolf for his instructor in Ethiopic. He removed to Halle, the head-quarters of Spener's influence, and became professor of the Oriental languages, and eventually of divinity, in that university. Halle was at that time the most renowned of the German universities; its professors were eminent men, and its schools crowded with eager students, and J. Henry Michaelis was the soul of the place. Fifty years before Kennicott's publication, J. H. Michaelis, after some thirty years' conscientious labour, led the way in O. T. textual criticism, by issuing from the press a carefully edited Hebrew Bible in two 4to volumes, at Halle in 1720. Kennicott, who was impetuous in judgment, spoke slightly of this work, as if the author, from favour of the Masoretic text, had improperly used his MSS. (see Kennicott's *Annual Accounts of Hebr. Coll.*, p. 146). He afterwards modified his opinion in the following statement, which we extract, as giving a good description of Michaelis' labours:—'This edition was the first which contained any various readings collected from Hebrew MSS. by a Christian editor. The text is taken from Jablonski's edition, with some few emendations. . . . There were collated for this Bible most of the best printed editions, and also five Hebrew MSS. belonging to the library at Erfurt; two of which contain the verses in Joshua excluded by the Masora. The propriety of selecting various readings from Hebrew MSS. and ancient versions is set forth in the preface' (*Hist of Hebr. Text. Dissert.*, ii. p. 487, Teller's edition, p. 465). Three 4to volumes of exegesis, in the shape of a commentary on the *Hagiographa*, accompanied the critical text. This is a work of still acknowledged value. J. H. Michaelis was the general editor of the whole work; but he received assistance from his nephew and Rambach in some portions of it. The annotations on the Psalms, Job, Canticles, Ezra, and the Chronicles, were contributed by him (on the critical merit of our author, see Wiseman, *Connection between Science*, etc., 2d edit., p. 349). Other works of John Henry Michaelis are worthy of mention here: such as a dissertation, *De Paradiso*; a tract, *De peculiaribus Hebræorum loquendi modis*, Halle 1702; *De Iesaja propheta ejusque vaticinio*, Halle 1710; and on the N. T., *De textu N. T. græco*, Halle 1707; *Introductio in Jacobi epistolam*, Halle 1722, in a 4to volume. This diligent and profound scholar ended his labours in the year 1731. Associated with him in much of his learned occupation was—V. His nephew, CHRISTIAN BENEDICT MICHAELIS, who was born at Elrich, in Hohnstein, in the beginning of 1680. Educated at Halle, he became in 1713 'extraordinary,' and the year after, 'ordinary,' professor of philosophy, and in 1731 professor of theology. In 1738 he succeeded to the chairs of Greek and Oriental literature, to the duties of

which he continued to apply himself until the year of his death, 1764, at the ripe age of eighty-four. He was not so extensive an author as his uncle, but what writings he left show him to have been an intelligent and careful scholar. His knowledge of Hebrew was very sound, and he was in advance of many of his contemporaries in his method of teaching it. Herein he was a follower of Schultens, whom he excelled in judgment if not in erudition. Cardinal Wiseman (*Lectures*, p. 364) has mentioned his merits in just terms. Referring to 'the true and solid method' of this school, he says, 'It consisted in not attempting to reach at once a full and comprehensive system of grammar, but in illustrating particular points—either from the cognate dialects, or by a collation of numerous passages in the Bible itself. C. B. Michaelis laudably attended to both methods.' Still more recently an equally competent critic has pronounced a high opinion on two of our author's works, as 'replete with excellent observations, and partly based on a judicious comparison of the dialects' (Kalisch, *Hebr. Gram.*, vol. ii. p. 39). We will mention his chief works: [I.] *On Hebrew Grammar and Philology*; '*Dissertatio, qua solacismus casuum ab Ebraismo S. Codicis, depellitur*,' Halle 1729; '*Dissert. qua solacismus generis a Syntaxi S. Codicis Ebraici depellitur*,' Halle 1739; A treatise against the etymological hypothesis, defended by Hermann Hardt and others, that Hebrew and the cognate tongues were derived from Greek, Halle 1726; A treatise on the Hebrew points, in which he took the side of Capellus, Halle 1739; A dissertation on *Scripture Paronomasia*, Halle 1737; A disputation on *Hebrew Ellipses*, Halle 1724. [II.] *On Biblical Exegesis*: '*De Herba Borith*,' Halle 1728; '*De Idumæa et ejus Antiqu. Historia*,' Halle 1733; '*Philologemata Medica*' (in which he discusses certain points of the *ars medica* of the Bible); '*Observationes philologicae de nominibus propriis Ebraicis*,' a work which was a worthy predecessor of Simonis *Onomasticon V. T.*; '*Dissertatio philologica de antiquitatibus æconomie patriarchalis*,' reprinted in Ugolino, *Thesaur.* xxiv. 323. In the year 1749, he published at Halle in a 4to volume an elaborate treatise on the various readings of the Greek Text., in which work he exhibited proofs of an accurate critical judgment, and gave some account of the MSS. known in his day, both Greek and Latin; of the ancient versions, and of the patristic quotations. We must not omit to mention the co-operation of C. B. Michaelis with his uncle in the valuable commentary on the *Hagiographa*, to which we have already referred. Our author contributed the annotations on the Proverbs, Lamentations, and Daniel; moreover he was associated with J. H. Michaelis in a commentary on the first two of the greater prophets. Simultaneously with the work of the latter on Isaiah, noticed above, appeared C. B. Michaelis' treatise, '*De Jeremia et Vaticinio ejus*,' Halle 1712. In the year 1736 he published a short work, '*De vaticinio Amosi, propheta*,' VI. The last and greatest of this learned clan was JOHN DAVID MICHAELIS, who has been in many respects more influential than any other of the great German writers in Biblical literature whom Germany has produced during the last 150 years. Born in 1717, and surviving until 1791, Michaelis, whose indomitable activity and inquiring spirit evaded

nothing of interest, was a connecting link between the old orthodoxy, which took everything on trust, and the new rationalism, which rejected authority and accepted nothing but what stood the trial of critical search. Michaelis felt the transition, and his consistency suffered from its influence. Retaining much of the traditional respect of his family for the Church's dogmas, but ever striving after independent opinion and new light, his works are too frequently disfigured with the incongruities of sacred subjects dressed in sceptical clothes, which have an ill fit. Although not a sceptic, he could never enter into the true spirit of revealed truth. After all drawbacks, however, the discriminating and careful student will seldom consult Michaelis without benefiting by his erudition and clearness of illustration; and often will he find objections on Scripture refuted with much force and felicitous originality. At the beginning of his literary career, at his birth-place Halle, Michaelis seemed for a time to take the side of the ultra-orthodox. His *Dissertatio de Punctorum Hebr. Antiquitate*, Halle 1739, was quite Buxtorfian. But his mind speedily began to change; in 1745 he published at Halle a Hebrew grammar, in which he defends the views of Schultens. Previous to this he visited England, and formed a friendship with Bishop Lowth and some other learned men both in this country and in Holland. His advancing views made him impatient of Halle, and in 1746 he removed to Göttingen, in which university he became professor of philosophy and Oriental literature. Although he spent the remainder of his life and died at Göttingen, he became connected with other countries by literary and political ties. He was made a Knight of the Polar Star by the King of Sweden in 1775 (whence he is sometimes called SIR J. D. Michaelis), and in 1789 he was elected a Fellow of the Royal Society of London. Intent on the interests of his favourite pursuit, Biblical science, Michaelis planned, in the year 1756, the expedition to Arabia and India, which was conducted by Carsten Niebuhr. The project being submitted to Frederick V., king of Denmark, by his minister Bernstorff, was accepted by that liberal monarch. The choice of the travellers was left to Michaelis, who drew up a series of questions for their guidance. These questions discuss the most interesting points of Biblical science—Sacred geography; Oriental habits and customs; Natural productions mentioned in the Bible; Diseases which still afflict men in the East, as they did of old. The perspicuity, and precision, and learning, with which our author proposes the questions, and the information in answer to them obtained by Niebuhr and Forskal (as embodied in the *Voyage en Arabie*, and *Description de l'Arabie* of the former, and in the *Descriptiones Animalium*, etc., of the latter), strikingly illustrate the sagacity of Michaelis; and the literary results of the expedition, though short of the exaggerated expectations of the time, have, in the shape of five quarto volumes, been permanently beneficial to Biblical science. The principal works of this voluminous writer, which are suitable for mention in this *Cyclopaedia* are—[1.] '*Spicilegium Geographiae Hebraeorum externa post Bochartum*' (Göttingen 1769, 1780); an edition of the *Abulfeda Tabula Aegypti*.—[2.] Several grammars of Oriental tongues. Besides the Hebrew already mentioned, he wrote Chaldee, Syriac, and Arabic grammars, and dissertations on

philological points connected with these languages. Linguistic learning, however, it must be confessed, was not a very strong point with Michaelis.—[3.] '*The Oriental and Exegetical Library*,' a valuable periodical, conducted by him from 1771 to 1795, in 24 volumes.—[4.] '*Supplementa ad Lexica Hebraica*' (6 parts in 2 vols. quarto); useful, not more for the language illustrated, than for the information afforded on Biblical geography, archaeology, and natural history.—[5.] Various *exegetical* works, such as his monograph on the three chief Messianic Psalms [viz., x. xl. cx.], in which we are much indebted to him for an able defence of their prophetic character—see Card. Wiseman, *Lectures*, etc., p. 378—(1759; republished by Schleusner, 1793); his Commentary on the Book of Maccabees (1778), on Ecclesiastes (1762); but especially his Paraphrastic Translations of portions of the O. T. (13 parts quarto, 1769-1786) and of N. T. (2 parts quarto, 1790), accompanied with useful\* notes for unlearned persons.—[6.] Several dissertations from time to time on the Laws and Antiquities of the Jews, the substance of which is embodied in his celebrated '*Mosaïsches Recht*' (6 vols. 1770-1775; second edition in 1776-1780). This, his most original work, was translated by a Scotch clergyman, Dr. Alexander Smith, in 4 vols. 8vo, 1814. If defective in method, these '*Commentaries on the Laws of Moses*,' as the translator designated them, have been justly valued for the perspicuity, wide views, and historical illustrations wherewith the author has so learnedly investigated the whole subject.—[7.] Learned notes on Bp. Lowth's *Sacra Poesis Hebraeorum* (reprinted in the Oxford edition, with farther annotations, by E. F. C. Rosenmüller, 1821).—[8.] 'The Burial and Resurrection of Jesus Christ, according to the Four Evangelists,' an able vindication of the sacred history (English Trans. 1827; the original work was published at Halle, 1783).—[9.] The best known of Michaelis' works is his '*Introduction to the New Testament*.' The late Bishop Marsh brought English students acquainted with this work, by an excellent translation of the fourth German edition, which he considerably augmented, with notes and a dissertation on the origin and composition of the three first gospels. (This translation was first made in 1802† [4th and best edition, of six vols. in four, was published in 1823]; but the first edition of the original appeared as early as 1750; little, however, of the original treatise survived in the fourth edition of 1788 [in 2 quarto vols.] which Marsh translated, so greatly did the author's critical opinions change and develope). Much controversy arose in this country on the appearance of Bp. Marsh's translation. The opinions of both author and translator

\* A part of this work was published as early as 1740, in a 4to vol., entitled 'Paraphrases und Anmerkungen über die Briefe Pauli an die Galater, Epheser, Philipper, Colosser, Thessalonicher, den Timotheus, Titus, und Philemon.' Walchius highly commends the work: 'Hic liber erudite atque accurate conscriptus merito laudari ac commendari debet. Paraphrases sunt breves ac perspicuae: notae non vulgares; sed selectae ac saepe ea exhibent, quae alii interpretes neglexerunt.'—*Bibliotheca Theologica*, vol. iv. p. 671.

† The first edition, however, was also translated and published in a quarto volume as early as the year 1761.

were freely canvassed; much general caution was offered to unwary students on what was said to be 'the tendency of the work, in several particulars, to lower the credit of the sacred writings, and consequently to weaken the foundation of our faith, by raising unnecessary doubts, and magnifying little difficulties' (*Remarks on Michaelis*, 2d edition, 1802), and specific objections have been justly urged by various writers (e.g., by Cardinal Wiseman, *Lectures*, pp. 379-385, who ably refutes Michaelis' attack on the authenticity of chapters i. and ii. of St. Matthew's Gospel). It would, however, be an unworthy prejudice to deny to this work, after all drawbacks, a great amount of excellent information (especially on the textual criticism of the N. T.), which was not only much in advance of the age when it was produced, but which, owing to Michaelis' vivid and effective treatment, is still, and long will be, considered as worthy of careful perusal. Eichhorn's eulogy is not too strong: 'For the criticism of the N. T. we are indebted in the most part to Michaelis: he received it poor and uncultivated; he left it rich and matured.' (*On the Life and Writings of J. D. Mich.*, p. 31). He contemplated, in his active old age, an 'Introduction to the O. T.' on the plan of his great work on the N. T., and the first part appeared at Hamburgh in 1787. The vigour and ripe learning which this attempt exhibited, justify the supposition that Michaelis would, if he had lived a few more years in equal vigour, have produced a work on a great and difficult subject which would have adorned his genius as its crowning effort. We have not mentioned his numerous miscellaneous writings, and therefore have only partially represented to the reader the product of Michaelis' adamant labours. He was one of the most industrious of men, and few have written so little, out of stores so vast, which has fallen ineffectual to the ground. Living, as he did, in a time of transition, it is no wonder if his views were not full grown; but it is remarkable that so much of what he propounded has stood the test of subsequent development, and, instead of being swept away as obsolete, has been reproduced and perfected by other scholars on the continent and among ourselves.—P. H.

MICHAIAH (מִיכָיָהוּ; Sept. *Mīchālas*, *Mīchala*; Alex. *Mīchāla*, *Maaḡā*), the same name as Micaiah and as Micah or Micha. Of the six persons called Michaiah in the A. V., two are elsewhere called Micah—viz., the father of Achbor (2 Kings xxii. 12; comp. 2 Chron. xxxiv. 20) and the son of Zaccur (Neh. xii. 35; comp. 1 Chron. ix. 15; Neh. xi. 17). In 2 Chron. xiii. 2, Michaiah appears as the name of a female, the same who is elsewhere called Maacah (1 Kings xv. 2; 2 Chron. xi. 20); and so the LXX. and the Syr. read it here. The other Michaiahs are—1. One of the princes whom Jehoshaphat sent to teach the law in the cities of Judah (2 Chron. xvii. 7); 2. One of the priests who blew the trumpets at the dedication of the wall of Jerusalem by Nehemiah (Neh. xii. 41); 3. The son of Gamariah and grandson of Shaphan the scribe, who after having heard Baruch read in his father's house the predictions of Jeremiah announcing calamity upon the nation, went, apparently with good intentions, and reported what he had heard to the king's officers (Jer. xxxvi. 11-13).—W. L. A.

VOL. III.

\*

MICHAL (מִיכָל, *who as God?* Sept. *Μελαχδλ*), youngest daughter of King Saul (1 Sam. xiv. 49). She became attached to David, and made no secret of her love; so that Saul, after he had disappointed David of the elder daughter [MERAB], deemed it prudent to bestow Michal in marriage upon him (1 Sam. xviii. 20-28). Saul had hoped to make her the instrument of his designs against David, but was foiled in his attempt through the devoted attachment of the wife to her husband. Of this a most memorable instance is given in 1 Sam. xix. 11-17. When David escaped the javelin of Saul he retired to his own house, upon which the king set a guard over-night, with the intention to slay him in the morning. This being discovered by Michal, she assisted him to make his escape by a window, and afterwards amused the intended assassins under various pretences, in order to retard the pursuit. 'She took an image (*teraph*), and laid it in the bed, and put a pillow of goat's hair for a bolster, and covered it with a cloth.' This she pretended was David, sick in bed; and it was not until Saul had commanded him to be brought forth, even in that state, that the deception was discovered. Michal then pretended to her father that David had threatened her with death if she did not assist his escape. Saul probably did not believe this; but he took advantage of it by cancelling the marriage, and bestowing her upon a person named Phalti (1 Sam. xxv. 44). David, however, as the divorce had been without his consent, felt that the law (Deut. xxiv. 4) against a husband taking back a divorced wife could not apply in this case: he therefore formally reclaimed her of Ish-bosheth, who employed no less a personage than Abner to take her from Phalti, and conduct her with all honour to David. It was under cover of this mission that Abner sounded the elders of Israel respecting their acceptance of David for king, and conferred with David himself on the same subject at Hebron (2 Sam. iii. 12-21). As this demand was not made by David until Abner had contrived to intimate his design, it has been supposed by some that it was contrived between them solely to afford Abner an ostensible errand in going to Hebron; but it is more pleasant to suppose that, although the matter happened to be so timed as to give a colour to this suspicion, the demand really arose from David's revived affection for his first wife and earliest love.

The re-union was less happy than might have been hoped. On that great day when the ark was brought to Jerusalem, Michal viewed the procession from a window, and the royal notions she had imbibed were so shocked at the sight of the king not only taking part in, but leading, the holy transports of his people, that she met him on his return home with a keen sarcasm on his undignified and unkingly behaviour. This ill-timed sneer, and the unsympathising state of feeling which it manifested, drew from David a severe but not unmerited retort; and the Great King, in whose honour David incurred this contumely, seems to have punished the wrong done to him, for we are told that 'therefore Michal, the daughter of Saul, had no child to the day of her death' (2 Sam. vi. 16-23). It was thus, perhaps, as Abarbanel remarks, ordered by providence that the race of Saul and David should not be mixed, and that no one deriving any apparent right from Saul should succeed to the throne.—J. K.

M

MICHMAS, or MICHMASH (מִכְמָשׁ; Sept. *Maxmas*), a town of Benjamin (Ezra ii. 27; Neh. xi. 31; comp. vii. 31), east of Beth-aven (1 Sam. xiii. 5), and south from Migron, on the road to Jerusalem (Is. x. 28). The words of 1 Sam. xiii. 2; xiv. 4; and Is. x. 29, show that at Michmas was a pass where the progress of a military body might be impeded or opposed. It was perhaps for this reason that Jonathan Maccabæus fixed his abode at Michmas (1 Maccab. ix. 73); and it is from the chivalrous exploit of another hero of the same name, the son of Saul, that the place is chiefly celebrated (1 Sam. xiii., xiv. 4-16). Eusebius describes Michmas as a large village nine Roman miles from Jerusalem, on the road to Ramah (*Onomast.*, s. v. *Maxmas*). Travellers have usually identified it with Bir or El-Bireh; but Dr. Robinson (*Researches*, ii. 117) recognises it in a place still bearing the name of Mukhmas, at a distance and position which correspond well with these intimations. This is a village situated upon a slope to the north of a valley called Wady es-Suweinit. It is small, and almost desolate, but bears marks of having been once a place of strength and importance. There are many foundations of hewn stones, and some columns lie among them. The valley es-Suweinit, steep and precipitous, is probably 'the passage of Michmash' mentioned in Scripture. 'In it,' says Dr. Robinson, 'just at the left of where we crossed, are two hills of a conical, or rather spherical, form, having steep rocky sides, with small wadys running up between each so as almost to isolate them. One of them is on the side towards Jeba (Gibeah), and the other towards Mukhmas. These would seem to be the two rocks mentioned in connection with Jonathan's adventure (1 Sam. xiv. 4, 5). They are not, indeed, so 'sharp' as the language of Scripture would seem to imply; but they are the only rocks of the kind in this vicinity. The northern one is connected towards the west with an eminence still more distinctly isolated.—J. K.

MICHMETHAH (הַמִּכְמֶתָה; Sept. *Ἰκαμῶν*, *Δηλὰρδᾶ*; Alex. *Μαχμάθ*; *Machmethah*), a town on the northern border of Ephraim (Josh. xvi. 6). In defining the boundaries of Manasseh Joshua says of Michmethah that 'it is before, or in the face of, Shechem' (אֲשֶׁר עֲלֵי-פָנֶי שֶׁכֶם), xvii. 7), which may mean either that it was situated opposite to it within sight, or east of it. This note fixes the site of Michmethah, locating it a short distance from Shechem, and probably on its east side. It seems difficult, however, to reconcile this with the words of chap. xvi. 6, the only other passage in which the name occurs: 'The border of Ephraim . . . on the east side was Ataroth-addar, unto Beth-horon the upper; and the border went out to the sea (or westward, *הַיָּם*) to the Michmath (הַמִּכְמֶתָה) on the north' (מִצְפֹּן). From this it would appear as if Michmath (the final ה is local) lay on the sea-coast, at the north-western border of Ephraim; and if so it cannot be identical with the Michmath near Shechem. It is not unusual to find the same name applied to two cities. Reland supposes that the two words in xvii. 7 should be united, and that the passage ought to be read, 'And the coast of Manasseh was from *Asher-Hammichmethah*,' etc., and this view would favour the theory that this city was different from the former Michmath; but

the Masoretic text will not bear Reland's interpretation (Reland, *Pal.*, p. 596). Michmethah is not mentioned by Eusebius or Jerome, and its site is unknown. With our present data it is impossible to determine whether the sacred writer refers to one town or two. If to one town only, then it must have been situated near Shechem, and the meaning of Josh. xvi. 6 will be: 'The border went out to (or along) the west side (*הַיָּם*) to Michmath on the north.' We have no authority, from either MSS. or ancient versions, for saying with Keil that the text of this verse is corrupt (Keil, *ad loc.*)—J. L. P.

MICHTAM. [PSALMS.]

MIDDIN (מִדִּין, 'measures,' from מִדָּה=Arab. *Ṣad*); the Vat. text of the LXX. is very corrupt in Josh. xv. 61; it seems to read here *Αἰνών*; Alex. *Μαδών*; *Meddin*), a town in the wilderness (מִדְבָּר) of Judah, grouped with Engedi, and only mentioned in Josh. xv. 61. The 'wilderness' lay along the western shore of the Dead Sea, and included nearly the whole eastern declivities of the mountain-range. Somewhere in this wild region Middin must have been situated, but its site is unknown; and it appears to have been also unknown to ancient as well as modern geographers.—J. L. P.

MIDDLETON, THOMAS FANSHAW, D.D., first bishop of Calcutta, was the only son of the Rev. Thomas Middleton, rector of Kedleston, in Derbyshire. He was born Jan. 26, 1769. When ten years old he was admitted to Christ's Hospital, where he was a contemporary and friend of Coleridge and C. Lamb. Thence he proceeded as exhibitor to Pembroke College, Cambridge, and took his degree as B.A. in 1792, appearing as fourth Sen. Optime. The same year he was ordained and became tutor to the sons of Archdeacon Pretyma, whose brother, Bishop Pretyma (Tomline), presented him to the living of Tansor, Northants, in 1795. In 1805 he published the work by which his name is chiefly known, *The Doctrine of the Greek Article applied to the Criticism and Illustration of the N. T.* He became D.D. the same year; prebendary of Lincoln, 1809; vicar of St. Pancras, Middlesex, 1811; Archdeacon of Huntingdon, 1812; and was consecrated first Bishop of Calcutta, May 8, 1814. He reached his diocese in the following November, and was untiring in his efforts to promote the spread of Christianity and education. He made three visitations of his enormous diocese, and paid special attention to the Syrian Christians of the Malabar coast. The 'Bishop's College' of Calcutta was established by him in 1820. He was cut off in the midst of his labours, after a brief episcopate of eight years, July 8, 1822, in the 54th year of his age. New and improved editions of his work on the Greek Article were published by Prof. Scholefield in 1828, and by H. J. Rose in 1833. The arguments for the divinity of Christ he deduces from the force of the article have, as was natural, been warmly controverted by Unitarian critics, and it is possible that in some cases they may be overstrained; but his line of proof demands attentive consideration, and its general results have been accepted by the majority of scholars.—E. V.

MIDIAN (מִדְיָן; 'strife,' *Μαδύμ*; *Madian*), the name of Abraham's fourth son by Keturah, and of

a powerful and celebrated nation that sprung from him (Gen. xxv. 2; Num. xxii.) The Gentile noun is מִדְיָנִי (Num. x. 29; *Μαδιανῆς*), fem. מִדְיָנִית.

The plural מִדְיָנִים (*Μαδιανῆται* and *Μαδιανῆται*) is used a few times (Gen. xxxvii. 28; Num. xxv. 17); but the usual name given to the nation is simply מִדְיָן, *Midian*. In the N. T. (Acts vii. 29, *Text. Rec.*) the form *Μαδιάν* is used as in the LXX.

Midian, though not the oldest, was the most celebrated son of Keturah. What Judah became among the tribes of Israel, Midian became among the tribes of Arabia. It is true we find the other branches of the Keturites spoken of a few times in sacred history, and mentioned in such a way as to prove that as tribes they never lost their individuality; yet the Midianites were the dominant people, and Midian is the great name which always comes out prominently before the historian. Not only so; but the Midianites appear to have been for a lengthened period the virtual rulers of Arabia, combining into a grand confederacy, and then guiding or controlling, as circumstances required, all the Arabian branches of the Hebrew race. This fact comes out incidentally in many parts of Scripture; and we require to keep it carefully in view in order to understand the sacred narrative.

Midian had five sons, who, doubtless, in accordance with Arab custom, became heads of distinct tribes (Gen. xxv. 4; cf. Num. xxxi. 8). We are told that while 'Abraham gave all that he had to Isaac,' that is, made him his heir—head of his house and patrimony—to the sons of the concubines Abraham gave gifts, and sent them away from Isaac his son while he yet lived, eastward, to the land in the east' (vers. 5, 6). This is the first indication of the country occupied by the Midianites and other descendants of Keturah. The expression is not very definite. Abraham's principal place of residence was southern Palestine, Mamre and Beersheba. The 'country of the east' appears to have included the whole region on the east side of the Arabah or great valley which reaches from the fountains of the Jordan to the Ælanitic Gulf. All Arabia, in fact, and even Mesopotamia were included in the 'country of the east' (Gen. xxix. 1; Num. xxiii. 7, etc.). Another incidental notice in Gen. xxxvi. 35 points more clearly to the exact territory of Midian. Hadad, one of the early kings of Edom, is said to have 'smitten Midian in the field of Moab.' We may conclude from this that the Midianites were at that time settled on the eastern borders of Moab and Edom. They were, like all Arabians, a nomad, or semi-nomad people; having some settlements around fountains and in fertile valleys, but forced to wander in their tents from place to place to secure sufficient pasture for their flocks. The Midianites were an enterprising people. They were not satisfied with the dull routine of pastoral and agricultural life. From the first they appear to have engaged in commercial pursuits. Some districts of Arabia, eastern Palestine, and Lebanon, yielded valuable spices and perfumes which were in great demand in Egypt, not merely for the luxuries of the living, but for the embalming of the dead. In this profitable trade the Midianites engaged. It was to one of their caravans passing through Palestine from Gilead to Egypt, that Joseph was sold by his brethren (Gen. xxxvii. 25, *seq.*) Slaves at that time found as ready a market in Egypt as they do

now. It will be observed that the traders are called by the historian both *Ishmaelites* and *Midianites*, the two names being used as synonymous. The reason probably is, that these were the dominant tribes in Arabia, and carried on the trade jointly, hence they were known among strangers by both names. It would seem, however, that the merchants in this caravan were true Midianites, though they may have been accompanied by Ishmaelites (verses 28, 36; but cf. 25, 27).\*

The next notice of Midian is in connection with the eventful history of Moses—'Moses fled from the face of Pharaoh, and dwelt in the land of *Midian*' (Exod. ii. 15). Reuel or Jethro, the priest of Midian, became his master and father-in-law. Moses kept his flock. The subsequent incidents of this strange narrative show clearly the region then inhabited by Jethro, and called 'the land of Midian.' It was the peninsula of Sinai, and it was while watching his flock there on the side of Horeb that he saw the glory of the Lord in the burning bush, and received the commission to return to Egypt for the deliverance of Israel (Exod. iii. 1, *seq.*) It would appear, from a comparison of the several incidental notices of Jethro given in the Pentateuch, that the peninsula of Sinai was not his settled place of abode. When Israel was encamped at Horeb, Jethro brought thither Moses' wife and two sons; and after a brief stay, we are told that 'he went his way into his own land' (Exod. xviii. 1-3, 27; cf. Num. x. 29, 30). The Midianites were nomads roaming over a very wide region, but, like most Arab tribes, having one permanent nucleus. This nucleus was specially their home: it was the 'land of their kindred'; yet they also claimed the whole region in which they pastured their flocks as their own. The nucleus of the Midianites was somewhere on the eastern border of Edom, but their pasture-grounds extended probably as far as Gilead and Bashan on the north, while on the south they embraced an extensive territory along both shores of the Ælanitic Gulf. Hence Horeb was said to be in the land of Midian (Exod. ii. 15 with iii. 1), while we read in another place that Jethro left the camp of Israel at Horeb, 'and went his way unto his own land' (*l.c.*); that is, to the chief seat of his tribe on the east of Edom. The Midianites were thus accustomed to lead their flocks and herds over the whole of that region which the Israelites afterwards traversed—the choice pastures, the fountains, and the wells in the desert were all known to them. This fact throws light on Moses' urgent request to his father-in-law—'Leave us not, I pray thee: forasmuch as thou knowest how we are to encamp in the wilderness, and thou mayest be to us instead of eyes' (Num. x. 31).

The Midianites were a wise and a wily people. So long as the Israelites only traversed their outlying pasture-grounds on the west of the Arabah, they were content to cultivate their friendship; but when, in the latter part of their journey, having

\* In verse 36 the Hebrew is מִדְיָנִים, the *Medanites*, which is the regular plural of *Medan* (מִדְיָן), the third son of Keturah (Gen. xxv. 2); while in verse 28 the word is מִדְיָנִים, the regular plural of מִדְיָן. There can be little doubt that the Midianites are referred to in both passages as represented in the Septuagint, Vulgate, Targums, and other ancient versions.

passed round the southern end of Edom, they entered the proper territory of Midian, the Midianites tried every plan and used every effort to work their destruction. They consulted with their neighbours, the chiefs of Moab, and resolved to bring the prophet Balaam to curse the powerful strangers (Num. xxii. 4-7). Balaam came, and the Lord turned the intended curse into a blessing. The prophet, however, adopted a more effectual mode of injuring the Israelites than by the agency of enchantments. He persuaded the women of Midian and Moab to work upon the passions of the Israelites, and entice them to the licentious festivals of their idols, and thus bring upon them the curse of heaven (xxi. 16). This infamous scheme proved only too successful (xxv.), and had it not been checked by the almost complete annihilation of the Midianites, it would have brought destruction upon the whole host of Israel (xxv. 17; xxxi. 2). The vengeance then executed upon Midian was terrible. Their cities and castles were burned; the entire males that fell into the hands of the conquerors were put to death, and with them all the married females; and the young women and children were reduced to slavery. It has been affirmed that these acts of vengeance are so cruel, so barbarous in their character, that they could never have been prompted by a God of love, and that, therefore, the narrative cannot be considered as of divine authority. Those who bring such an accusation against the Scriptures must surely overlook the leading circumstances of the case—they must forget that the God of love is also the God of justice. The whole Midianitish nation, male and female, had deliberately combined and conspired by wile and stratagem, to wean the Israelites from their allegiance to the God of heaven; and not only so, but wantonly to allure them to the commission of the most foul and degrading crimes. Was it inconsistent with justice for the moral Governor of the universe to punish such guilt? Could any punishment less sweeping have freed the earth from crime so deep-rooted and so dangerous?

The details of this war given by Moses afford us some little insight into the nature of the country of Midian, and the occupations of the people. The Midianites were not pure nomads; they had cities and goodly castles (xxxi. 10). Their principal wealth consisted, however, in flocks and herds, for the Israelites captured 675,000 sheep, 72,000 beeves, and 61,000 asses. It is singular that camels are not mentioned; but it is probable that as the Israelites were all footmen, the camels escaped to the desert. Recent investigations have shown that the whole desert east of Edom and Moab is thickly studded with the ruins of ancient cities and castles (Wallin, in *Journal of R. G. S.*, xxiv. 115, seq.; Porter, *Damascus*, ii. 188; Wetzstein, *Reisebericht über Hauran*, etc.; Graham, in *Journal of R. G. S.* for 1859). These were doubtless the habitations of the Midianites. The whole region around their cities, extending from the mountains of Haurân to the Ælanitic Gulf, though now dreary and desolate, is not barren. In spring and early summer it is covered with vegetation, and it has many rich valleys, a few patches of which are still here and there cultivated by the Arab tribes. Everywhere there are evidences of partial cultivation in former days, and there are also traces of a comparatively dense population.

Some time previous to the exodus it appears that the Midianites had allied themselves closely to the

Moabites. Sihon, king of the Amorites, made war upon Moab and Ammon, conquered a large part of their territory, and retained possession of it (Judg. xi. 13-23). At the same time he made Midian, the ally of Moab, tributary; and hence the five princes of Midian are called by Joshua 'vassals' (נְסִיכִי; Keil on *Josh.* xiii. 21) or 'dukes' of Sihon. The defeat of Sihon by the Israelites secured the freedom of the Midianites; and then they, fearing that they should in like manner be subdued by Moses, conspired to destroy Israel, and thus brought destruction upon themselves. The government of Midian was doubtless similar to that of all the nations of Arabia—patriarchal. The nation was divided into a number of tribes, each of which was independent, and led by its own *sheikh* or chief. In time of common danger or of war, the sheikhs of the various tribes formed a council, but always acknowledged the presidency of the head of one leading family, who was (and still is) styled the 'prince' (*Emir*) of the nation. Five of the sheikhs of Midian are mentioned in Judges as subjects of Sihon. In Num. xxxi. 8 they are called 'kings' (מְלָכִי); while in chap. xxii. 4, Moab is said to have consulted with the 'elders' (זְקֵנֵי) of Midian. The great Arab tribes have two classes of chiefs: one class is composed of the rulers of the leading divisions of the tribe; the other of the rulers of subdivisions. The former are hereditary, the latter are simply influential or warlike men who, by their talents, have gathered round them a number of families. It would seem to be the former class—the hereditary rulers of Midian—who are called 'kings'; while the others, the influential leaders or senators of the tribe, are termed 'elders.'

There is no farther mention of the Midianites in history for two hundred years. During that period the nation had completely recovered its ancient influence and power, and they again turned their arms against their old enemies the Israelites. For seven years they oppressed them so grievously that the people were forced to flee from the open country, and to seek an asylum in mountain fastnesses, in caves, and in fortified cities (Judg. vi. 1, 2). Midian was now at the head of a great confederacy, comprising the Amalekites and the leading tribes of Arabia, called by the sacred historian *Beni Kadm* ('children of the East,' ver. 3). In early spring the confederates assembled their vast flocks and herds, descended through the defiles of Gilead, crossed the Jordan, and overran the rich plains of central Palestine, plundering and destroying all before them—'sheep, oxen, asses,' property, the young corn, and the luxuriant pastures: 'For they came up with their cattle, and their tents, and they came as grasshoppers for multitude; for both they and their camels were without number; and they entered into the land to destroy it' (ver. 5). In their distress the Israelites cried unto the Lord, and he sent a deliverer in the person of Gideon (ver. 8-13). The invaders were concentrated on Esdraelon—their flocks covering the whole of that splendid plain, and their encampment lying along the base of 'the hill of Moreh,' now called little Hermon (ver. 33; vii. 1, 12). Gideon assembled his band of warriors at the well of Harod, or fountain of Jezreel, situated at the foot of Gilboa, and famed in after days as the scene of Saul's defeat and death (vii. 1); HAROD. The romantic incidents

of the attack, and the rout and slaughter of the Midianites, are well known. Gideon having collected the forces of Israel (ver. 23), followed the fugitives across the Jordan, up the hills of Gilead, and away over the plain into the heart of their own country. There he completely overthrew the whole host (viii. 12). Two of their 'princes' (שָׂרִי, literally 'generals') had already fallen at the fords of the Jordan, having been intercepted by Ephraim

(vii. 25); but their two 'kings' (מְלָכִי), Zebah and Zalmunna, had escaped with the remnant of their followers to Midian. These were captured by Gideon and slain in revenge for his brothers, whom they had put to death at Tabor (viii. 18-21). The power of Midian was completely broken. In a single campaign they lost their princes, the flower of their warriors, and their vast wealth. 'Thus was Midian subdued before the children of Israel, so that they lifted up their heads no more' (viii. 28). Their name as a nation appears no more in history.

The graphic narrative of the book of Judges places before us a most interesting and vivid picture of life, costume, and warfare among the wild desert tribes in those early ages; and the writer can testify that little change has taken place in them during the lapse of 3000 years. A few years ago he had an opportunity of witnessing a somewhat similar gathering of Arab tribes on the very same plain of Esdraelon, and a fierce battle fought by them on the northern slopes of Tabor (*Handbook*, p. 355). The Bedawin, from beyond Jordan—'the children of the East'—to this day cross the river periodically in early spring, pasture their immense droves of camels and flocks of sheep on the plain of Jezreel, and plunder the villages far and near. Their dress and trappings are the same as those of the Midianites—scarlet robes on the chiefs; crescent-shaped ornaments and chains of gold and silver round the necks of their horses and dromedaries; necklaces, earrings, and nose-jewels on all their women (Judg. viii. 24-26).\*

It has been seen that Jethro was priest of Midian, and belonged to that nation. Now, in Judg. i. 16 he is called a Kenite; and his people, the Kenites, are represented as entering Palestine with the Israelites and settling among them. There is a difficulty here which cannot now be solved in an entirely satisfactory manner. It seems most probable that the Kenites were a branch of the Midianites—a sub-tribe organised and led by Jethro. They may have remained in connection with their brethren so long as they were at peace with Israel; but when war broke out, and the Divine vengeance was impending over Midian, then the Kenites joined the Israelites. [KENITES.]

Isaiah makes a passing reference to Midian, but it seems probable that it is a mere poetical figure, having no reference to the existing state of the nation (lx. 6). Such also is the allusion to 'curtains of the land of Midian' by Habakkuk (iii. 7). Eusebius and Jerome describe Madian (Μαδιάν) as a city south of Arabia, on the eastern shore of

the Red Sea, in the desert of the Saracens (*Onomast.*, s. v.) This town is also mentioned by Arab geographers (Edrisi iii. 5); Abulfeda states that it lies on the shore of the Ælaniatic Gulf, five days' journey from Aila (*Arab.*, p. 77, ed. Rommel). It is doubtless the same place which Ptolemy calls *Modlava* (vi. 7), and Josephus *Μαδιανή* (*Antiq.* xii. 11. 1). It is now ruined and deserted, though retaining its old name, and thus bringing down the name of Abraham's son to modern times (see Winer, *R. W.*, s. v. *Midianiter*; Forster, *Geogr. of Arabia*, i. 339, *seq.*; Reland, *Pal.* 97, *seq.*; Stanley, *Eastern Church*, 337, *seq.*; Cellarius, *Geogr.* ii. 677.—J. L. P.

MIDRASH (מִדְרַשׁ), plural MIDRASHIM, MIDRASHOTH (מִדְרָשִׁים, מִדְרָשׁוֹת), the most ancient Jewish exposition of the Hebrew Scriptures.

1. *Title and its Signification*, etc. The term מִדְרַשׁ, which is strangely rendered in the text of the A. V. by *story* (2 Chron. xiii. 22; xxiv. 27), is the Aramaic infinitive of דְּרַשׁ, *to search into, to examine, to investigate, to explain*, and primarily denotes *the study, the exposition of Holy Scripture* in the abstract and general sense. Thus it is said, 'Not the study of it (הַמִּדְרַשׁ) but the doing of the law is the chief thing' (*Aboth*, i. 17). The study or exposition of Holy Writ (מִדְרַשׁ) was effected in earlier times through public discourses delivered on Sabbaths, festivals, and days of assembly, by the priests, Levites, elders of Israel, and prophets. During the period of the second temple, when the canonical books and the written discourses of the older prophets became unintelligible to the mass of the people who spoke Hebrew-Aramaic, these public expositions became more formal and were delivered on a larger scale by the lawyers, or Scribes (סוֹפְרִים) as they are called in the N. T., the directors of schools (רַבְּנֵי), graduated rabbins (רַבּוֹת, only with suff. רַבּוֹתֵינוּ), or learned men in general and members of societies (תַּרְבִּימִים).

2. *Design and Classification*.—The design of the *Midrash* or exposition varied according to circumstances. Sometimes the lecturer (דוֹרֵשׁ, דְּרַשָׁן) confined himself to giving a running paraphrase (מִתּוֹרֵמִן) into the vulgar Aramaic, or the other dialects of the country, of the lessons from the Law and Prophets which were read in Hebrew [HAPHTARA], thus gradually giving rise to the Chaldee, Syriac, and Greek versions, so that these *Targumim* may be regarded as being the result, or forming part of the *Midrash*. The chief design of the *Midrash*, however, was to propound the Scriptures either *legally* or *homiletically*. Hence obtained that twofold mode of exposition called the *legal* or *Halachic exegesis*, and the *homiletic* or *Hagadic exegesis*, and their respective literatures.

A. *The Legal or Halachic Exegesis*.—The object of this branch of exposition is to ascertain, by analogy, combination, or otherwise, the meaning of the Law respecting exceptional cases about which there is no direct enactment in the Mosaic code, as it was the only rule of practice in the political and religious government of the Jews under all vicissitudes of the commonwealth, and as the motto of the expositors and administrators of it was 'Turn it (*i.e.*, the inspired code) over and over again, for everything is in it and will be discovered therein' (*Aboth*, v. 22). The laws thus obtained, either by deduction from the text or introduction into it, are called *Halachoth* (הַלְכוֹת),

\* The word translated 'ornaments' שְׁהָרִים (ver. 26), signifies 'little moons' or 'crescents'; in the LXX. *μηνίσκοι*; Vulg. *lunulae*. The Midianites probably worshipped the moon, and carried these peculiar ornaments as charms. Hence, doubtless, originated the *crescent* as the standard and symbol of Mohammedanism.

sing. הלכה, from הלך, to go, the rule by which to go, the binding precept, the authoritative law, being equivalent to the Hebrew word משפטים (comp. Chaldee Paraphrase on Exod. xxi. 9), and this mode of exposition, which is chiefly confined to the Pentateuch as the legal part of the O. T., is termed *Halachic Exegesis*. These *Halachoth*

(הלכות), some of which are coeval with the enactments in the Pentateuch itself (Deut. xvii. 11), and some are the labours of the Great Synagogue or the *Sopherim*=Scribes—beginning with Ezra and terminating with Simon the Just—were for centuries transmitted orally, and hence are also called *Shematha* (שמעתי), i. e., that which was heard, or that which was received by members of the chain of tradition (שמעתי מפי השמועה). Those prohibitory laws or *Fences* (סיני, גדר, later גזירה) which the *Sopherim* were obliged to make on their own account in consequence of the new wants of the times, without being indicated in the Pentateuch, and which are called *Sopheric precepts* (דברי סופרים), and in the N. T. *Tradition of the Elders* (παράδοσις τῶν πρεσβυτέρων, Matt. xv. 2; Mark vii. 3), are distinguished from the traditional laws which are deduced from the Bible. The latter are designated *Deductions from the Law* (עקר) (ראוריתא), and are of equal authority with the Biblical precepts. The few learned men who during the period of the *Sopherim* (B.C. 450-300) wrote down some of these laws, or indicated them by certain signs (סמנים) or hints (רמזים) in their scrolls of the Pentateuch, only did so to assist their memory, and the documents are called

*Secret Scrolls* (ספרים סתרים). These marginal glosses in the MSS. of the Law became the basis of the *Massora*. Gradually, however, these *Halachoth* were fully written down, and are embodied in the following works.

i. It was not till the period of the *Tanaim* (תנאים, sing. תנאי, frequentative of the Chaldee תנה, i. q., Heb. שנה=שנא, to repeat, hence the repeaters, the readers, an honourable appellation given to those doctors who transmitted the oral law), 220 B.C.—220 A.D., that the fixing, collecting and final redaction of the *Halacha*, or this mass of juridico-political and religious practice, or doctrine of human and divine law (*humani et divini juris*), took place. The first attempt at a compilation and rubrication of it was made by Hillel I. (75 B.C.—75 A.D.), who classified and arranged the diverse laws under six *sedarim* (סדרים) or orders [HILLEL I.]. In this he was followed by 'Akiba (A.D. 20-120), and Simon III. b. Gamaliel II., who was the president of the Synedrium A.D. 140-163, and whose son R. Jehudah I. the Holy, called *Rabbi kar' ēxoxhē* (died circa 193 A.D.), completed the final redaction of the code called *Mishna*.\*

\* There is a difference of opinion about the etymology and signification of the word משנה. Some derive it from שנה, to repeat, and explain it to mean repetition, i. e., the second, or oral law (so Epiphanius, δεινέπωρος; Zunz, Gottesdienstliche Vorträge, p. 45; Steinschneider, Jewish Literature, p. 271, etc., etc.) Whilst others again submit that as the construct is משנת ר' מאיר (comp. משנת ר' מאיר, etc.), and not משנה, as Deut. xvii. 18, it must be derived from the Aramaic תנה, to explain, to unfold. Hence also מתניתין. This explanation is not only mentioned in the *Aruch*,

ii. The *Mishna*, however, like the Pentateuch, soon became the subject of discussion or study (מדרש), as many of its expositions and enactments are not only couched in obscure language, but are derived from antagonistic sources. Hence, like the divine code of the law, which it both supplements and expounds, the *Mishna* itself was expounded during the period of the *Amoraim* (אמוראים, sing. אמורא, from אמר, to say, to hold forth, to expound, hence expositors; an appellation given to the public expositors of the oral law

הלכות, recorded by the *Tanaim*), 220-540 A.D., both in Jerusalem and Babylon. The result of these expositions is the two *Talmuds*, or more properly *Gemaras*,\* viz., the Jerusalem and the Babylon. [TALMUD; EDUCATION.]

iii. Prior in point of age to the compilation of the *Mishna* is the commentary on Exodus called

*Mechilta* (מכילתא, plur. מכילתין, i. q., Heb. מדה, measure, axiom), i. e., Norm or Rule. The *Mechilta* is composed of nine Tractates (מסיכתות) subdivided into sections (פרשיות), and treats on select sections of Exodus in the following order:—The first Tract treats on Exod. xii. 1-xiii. 6, in eighteen sections; the second Tract is on xiii. 7-xiv. 31, in six sections; the third is on xv. 1-21, in ten sections; the fourth is on xv. 22-xvii. 7, in seven sections; the fifth is on xvii. 8-xviii. 27, in four sections; the sixth is on xix. 1-xx. 22, in eleven sections; the seventh is on xxi. 1-xxii. 22, in eight sections; the eighth is on xxii. 23-xxiii. 19, in two sections; and the ninth tract is on chap. xxxi. 12-17; xxxv. 1-3, in two sections. The first compilation of the *Mechilta* was most probably made under the influence of R. Ishmael b. Elisa, circa 90 A.D. [ISHMAEL B. ELISA], which accounts for its containing so many of his maxims not to be found elsewhere. It was, however, re-edited afterwards, and greatly altered (comp. Geiger, *Urschrift*, 434, ff.) It was first printed in Constantinople, 1515, then again in Venice, 1545, then with a commentary and revised text by M. Frankfurter, Amst. 1712; but the best edition is that of Landau, Vilna 1844. A Latin translation of it by Ugolini is given in his *Thesaurus Antiquitatum Sacrum*, vol. xiv., Venice 1752.

iv. Commentary on Leviticus, called *Siphra*, *Sifra* (ספרא), the Book; also *Siphra D'be Rab* (ספרא דבי רב), *Siphra* of the school of Rab, because Rab=Abba Areka, the first of the *Amoraim*, and founder of the celebrated school at Sora, of which he was president twenty-eight years, 219-247 A.D. [EDUCATION], is its author; and by some it is denominated *Boraitha shel Torath Cohanim* (בריתא של תורת כהנים), because the book of *Leviticus* which it expounds is called by the Jews the *Code of the Priests* (תורת כהנים), *Jebamoth*, 72 b.;

where וישננתם (Deut. vi. 7) is quoted to corroborate it; but is defended by Frankel (*Ueber palästinische und alexandrinische Schriftforschung*, p. 7), who also adduces the expression ותנננו from Onkelos, and is in perfect accordance with the import of its cognate terms תורה, מדרש, and תלמוד, all of which denote teaching, exposition, study.

\* For the signification of the words Talmud (תלמוד) and *Gemara* (גמרא), see the preceding note.

Rashi, on *Levit.* ix. 23). The Siphra is divided into treatises (דיבורים) which are subdivided into sections (פרשות), and these again into chapters (פרקים). The first edition of it appeared together with the *Mechilta* and *Siphri*, Constantinople 1515, then Venice 1545; and, with a very extensive commentary by Ibn Chajim, Venice 1609-11, with the commentary *Ha-Tora Veba-Mitzva*, by M. L. Malbim, Bucharest 1860. The best edition, however, is that by Schlossberg, with the commentary of Abraham b. David, and the Massoreth Ha-Talmud of Weiss, Vienna 1862. A Latin translation of it by Ugolini is given in his *Thesaurus Antiquitatum Sacrum*, vol. xiv., Venice 1752.

v. Commentary on Numbers and Deuteronomy, called *Siphre* or *Siphri* (ספרי), the *Books*, also *Siphri D'be Rab* (ספרי דבי רב), because Rab, the author of the preceding work, is also the author of this commentary, and *Vishalchu* (וישלחו), because it begins with Num. v. 2, where this word occurs. The commentary on Numbers is divided into one hundred and sixty-one chapters, and that on Deuteronomy into three hundred and fifty-seven. The *Siphre* first appeared with the *Mechilta* and *Siphra*, Constantinople 1515, Venice, 1545. The best edition of it is in two volumes, with the extensive commentary by Lichtstein, the first volume of which was published, Dyrhensfort 1810, and the second Radwill 1819. A Latin translation of it by Ugolini is given in his *Thesaurus Antiquitatum Sacrum*, vol. xv., Venice 1753.

B. *The Homiletic or Hagadic Exegesis.*—The design of this branch of the Midrash or exposition is to edify the people of Israel in their most holy faith, to encourage them to obedience, to commend to them the paths of virtue and morality, to stimulate them to all good works, and to comfort them in tribulation by setting before them the marvellous dealings of Providence with the children of man, the illustrious examples of the holy patriarchs, and the signal punishment of evil doers from bygone history—investing each character, and every event, with the halo or contumely, the poetry or the legend, which the fertile genius of the Hebrew nation and the creative power of tradition had called into existence in the course of time. This branch of exposition extends over the whole Hebrew Scriptures, whilst the *Halachic* interpretation, as we have seen, is chiefly confined to the Pentateuch, which is the civil and legal portion of the Bible. It is also called *Hagada* (הגדה; Chaldee אנדרה, from נגד, to say), said, reported, on dit, without its having any binding authority in contradistinction to the *Halacha*, which is authoritative law. When it is stated that this department of Biblical exegesis is interspersed with homiletics, the beautiful maxims and ethical sayings of illustrious men, attractive mystical expositions about angels and demons, paradise and hell, Messiah and the Prince of Darkness; poetical allegories, symbolical interpretations of all the feasts and fasts, charming parables, witty epithalamiums, touching funeral orations, amazing legends, biographical and characteristic sketches of Biblical persons and national heroes; popular narratives and historical notices of men, women, and events of bygone days; philosophical disquisitions, satirical assaults on the heathen and their rites, able defences of Judaism, etc. etc.—it will be readily understood why the Jewish nation gradually transferred to this store-

house of Biblical and national lore the name *Midrash*=the exposition, κατ' ἐξήγησιν. This branch of public and popular exposition, in which the people at large naturally felt far more interest than in the dry disquisitions about legal enactments, being thus called by them *The Midrash*, the collection of works which contain this sacred and national lore, obtained the name *Midrashim* (מדרשים), *Commentaries*, in the sense of Cæsar's *Commentaries*. Hence the term *Midrashic* or *Hagadic* exegesis so commonly used in Jewish writings, by which is meant an interpretation effected in the spirit of those national and traditional views. The following are the principal *Midrashim*, or commentaries in the more restricted sense of the word,\* which contain the ancient Hagadic expositions.

i. *Midrash Rabbah* (מדרש רבות), or simply *Rabbah* (רבנות), which is ascribed to Oshaja b. Nachmani (fl. 278, A.D.), and derives its name from the fact that this collection begins with a *Hagada* of Oshaja Rabba (רבא, of which רבות is the pl.) It contains ten *Midrashim*, which bear the respective names of—1. *Bereshith Rabba* (בראשית רבא), abbreviated from *Bereshith d'Rabbi Oshaja Rabba* (בראשית דבי אושעיא רבא), on Genesis, divided into a hundred sections (פרשות); 2. *Shemoth Rabba* (שמות רבא), on Exodus, in fifty-two sections; 3. *Vajikra Rabba* (ויקרא רבא), on Leviticus, in thirty-seven sections; 4. *Bamidbar Rabba* (במדבר רבא), on Numbers, in twenty-three sections; 5. *Debarim Rabba* (דברים רבא), on Deuteronomy, in eleven sections; 6. *Shir Ha-Shirim Rabba* (שיר השירים רבא), also called *Agadath Chasith* (אגדת חיות), because the text begins with the word *Chasith*, on the Song of Songs; 7. *Midrash Ruth Rabba* (מדרש רות רבא), on Ruth; 8. *Midrash Eicha Rabbathi* (איכה רבתי), on Lamentations; 9. *Midrash Coheleth* (מדרש קהלת), on Ecclesiastes; and 10. *Midrash Megillath Esther* (מדרש מגילת אסתר),

also called *Hagadath Megilla* (הגדת מגילה), on Esther. This entire collection was first published in Venice, 1545, it has been reprinted many times since; but the best edition of it is that published by Schrentzel with the different commentaries, two vols., Stettin 1863. Excerpts of the *Midrash* on Ruth, Esther, and Lamentations, have been published in Latin by Schnell, Altdorf. 1650. The age of the compilation of the separate *Midrashim* constituting this collection is critically and elaborately discussed by Zunz, *Die Gottesdienstlichen Vorträge der Juden*, p. 174-184, 263, ff.

ii. *Pesikta* (פסיקתא), compiled by Cahana or Kahana b. Tachlifa, who was born about 330

\* It must here be remarked that as this branch of the Midrash embraces the whole cycle of ethics, metaphysics, history, theosophy, etc., as well as Biblical exposition, it has been divided into—i. *General Hagada* or *Hagada Midrash*, in its wider sense, treating almost exclusively on morals, history, etc.; and ii. into *Special Hagada* or *Hagada Midrash*, in its narrower, and *Midrash* in its narrowed sense, occupying itself almost entirely with Biblical exposition, and making the elements of the general Hagada subservient to its purpose. It would be foreign to the design of this article were we to discuss anything more than the Midrash in its narrowest sense.

A.D., and died in 411 [EDUCATION]. This Midrash, which comprises a complete cycle of lectures on the Pericopes of the feasts and fasts [HAPHTARA], and which was lost for several centuries, has been restored by an anonymous writer about the year 846 A.D., and edited under the name *Pesikta Rabbathi* (פסיקתא רבתי), intermixing it, however, with portions from the *Midrash Yelamdenu*. In this new form the *Pesikta* was first published by Isaac b. Chajim Ha-Cohen, Prague 1655. An excellent edition, entitled *עם הנהגת פרוש*, was published in Breslau 1831. The nature and date of this Midrash are discussed in a most masterly manner by Zunz, *Die Gottesdienstlichen Vorträge*, 185-226, 239-251; Rapaport, *Erech Millin*, p. 171; see also the article CAHANA B. TACHLIFA in this Cyclopædia.

iii. *Midrash Tanchuma* (מדרש תנחומא), i.e., the Midrash, compiled by Tanchuma b. Abba (flour. circa 440 A.D.), also called *Midrash Yelamdenu* (מדרש ילמדנו), from the fact that eighty-two

sections begin with the formula ילמדנו, *it teaches us*, or *we are taught*. This Midrash extends over the whole Pentateuch, and consists of 140 sections. It contains extracts from the Mechilta, Siphre, Va-Ikra Rabba, Pesikta, and Boraitha de Rabbi Eliezer, and was first published after a redaction of the first Geonim period, when a great deal of it was lost, altered, and interpolated, by Joseph b. Shoshan, Constantinople 1520 (not 1528 as is stated by Etheridge, *Jerusalem and Tiberias*, p. 233); then Venice 1545; Mantua 1563; Salonica 1578; with corrections after two MSS. and additions, Verona 1595; and at different other places; but the best edition is that with the twofold commentary by Chan. Sandel b. Joseph, Vilna 1833. For a thorough analysis of this Midrash we must refer to Zunz, *Die Gottesdienstlichen Vorträge*, p. 226-238.

iv. *Pirke Rabbi Eliezer* (פרקי רבי אליעזר), also called *Boraitha* or *Agada de Rabbi Eliezer* (אגדה

או ברייתא דרבי אליעזר), because Eliezer b. Hyrcanus (flour. circa 70 A.D.) is its reputed author. This Midrash, which discusses the principal events recorded in the Pentateuch, consists of fifty-four sections, treating respectively on the following important subjects:—the life of R. Eliezer (secs. i. and ii.); the creation (iii.-vi.); new moon (vii.); intercalary year (viii.); the fifth day's creation (ix.); the flight of Jonah, and his abode in the fish (x.); the sixth day's creation (xi.); Adam, paradise, and the creation of the plants (xii.); the fall (xiii.); the curse (xiv.); paradise and hell (xv.); Isaac and Rebecca (xvi.); the offices to be performed to bridal pairs and mourners (xvii.); the creation (xviii.); the ten things created on the eve of the sixth creation day (xix.); the expulsion from paradise (xx.); Adam, Eve, Cain, and Abel (xxi.); the degeneracy of Cain's descendants and the Flood (xxii.); the ark and its occupants (xxiii.); the descendants of Noah, the tower of Babel (xxiv.); Sodom, Lot, and his wife (xxv.); the ten temptations of Abraham (xxvi.); his rescuing Lot (xxvii.); God's covenant with Abraham (xxviii.); his circumcision (xxix.); the sending away of Hagar and Ishmael, the condition of

the Jews in the days of Messiah (xxx.); Abraham about to sacrifice Isaac (xxxi.); Isaac bestowing the blessing on Jacob (xxxii.); the resurrection (xxxiii.); future state (xxxiv.); Jacob's dream (xxxv.); his sojourn with Laban (xxxvi.); his wrestling with the angel (xxxvii.); the selling of Joseph (xxxviii.); Jacob's sojourn in Egypt (xxxix.); God's manifestation in the bush (xl.); the giving of the Law (xli.); the exodus (xlii.); the power of repentance (xliii.); the conflict of Moses with Amalek (xliv.); the golden calf (xlv.); the tables of stone and the atonement (xlvi.); the exploit of Phineas (xlvii.); the birth of Moses and the redemption from Egypt (xlviii.); Samuel, Saul, Agag, Haman, Mordecai, Titus, Nebuchadnezzar, Ahasuerus, Vashiti, and Esther (xlix.-l.); the new creation (li.); the seven wonders of the world (lii.); the punishment of calumny, Absalom and David (liii.); and the leprosy of Miriam (liv.) This Midrash, which is chiefly written in pure and easy Hebrew, was first published in Constantinople 1514, and has since been reprinted numerous times, but the best edition is with the critical commentary

called *the Great Edifice* (בית הגדול), emended text and references to Talmud and Midrashim by Broda, Vilna 1838. A convenient edition of it has appeared in Lemberg 1858, and a Latin translation by Vorst has been published under the title *Capitula R. Eliezeris continentia imprimis succinctam historiam sacre recensionem, etc., cum vet. Rabb. Commentariis*, Leyden 1644. The composition and age of this Midrash are discussed by Zunz, *Die Gottesdienstlichen Vorträge*, p. 271-278.

v. Midrash on Samuel, called *מדרש שמואל* [רבנא] *Midrash Shmuel* [Rabbatha], divided into thirty-two sections (פרשות), twenty-four of which are devoted to 1 Sam. and eight to 2 Sam. It is chiefly made up of excerpts from older works, and the compiler is supposed to have lived about the beginning of the 11th century. Rashi is the first who quotes this Midrash (*Comment. on Chron. x. 13*). It was first published in Constantinople 1517, and has since been frequently reprinted with the Midrash described below. The best editions of it are the one with the twofold commentary Ez Joseph and Anaph Joseph, references to the parallel passages in the Talmud and Midrashim, etc., by Schrentzel, Stettin 1860; and the other published together with the Midrash on Proverbs and the Comment. of Isaac Cohen, Lemberg 1861.

vi. Midrash on the Psalms, called *מדרש תלים* [רבנא] *Midrash Tillim* [Rabbatha], *Hagadath Tillim* (הגדת תלים), or *Shochar Tob* (שחר טוב), after the words with which it commences. With the exceptions of seven psalms—viz., xlii., xcvi., xcvi., xcvi., cxv., cxviii., and cxxxi., this Midrash extends over the whole Psalter. As it contains extracts from the Babylonian Talmud, the Pesikta, Boraitha of R. Eliezer, Tanchuma, and Pesikta Rabbathi, it must have been compiled about the end of the 10th century, most probably in Italy. It was first published in Constantinople 1512. The portion on Ps. cxix., which extends to the first verses of letter פ, is called *Midrash Alpha*

*Betha* (מדרש אלפא ביתא), from the fact that this is an alphabetic psalm, and has been published separately, Salonica 1515. The Midrash on the Psalms has frequently been published together with the Midrash on Samuel, under the title

*Midrash Shochar Tob* (שוחר טוב), which properly belongs only to that on the Psalms.

vii. *Midrash on Proverbs*, called (מדרש משלי) [*Midrash Mishle* [*Rabbatha*], consists of a compilation of those maxims and expositions from former works which are best calculated to illustrate and explain the import of the book of Proverbs. The compiler, who lived about the middle of the 11th century, omits all the references to the original sources, discards the form of lectures, and assumes that of a commentary. The first edition of this *Midrash* appeared in Constantinople 1512-17, with the commentary *Sera Abraham* (זרע אברהם), Vilna 1834, and the commentary of Isaac Cohen, Stettin 1861.

viii. *Midrash Jalkut* (מדרש ילקוט), or *Jalkut Shimoni* (ילקוט שמעוני), i. e., the collection, or compilation of *Simeon*, who flourished in the 11th century. This *Midrash*, which extends over the whole Hebrew Scriptures, is described in the article *CARA* in this *Cyclopædia*.

3. *Method and Plan of the Midrash*.—In discussing its method and plan it must be borne in mind that the *Midrash* first developed itself in public lectures and homilies; that the ancient fragments of these discourses became afterwards literary commodities, serving frequently as the groundwork of literary productions; and that the *Midrashic* writers or compilers mixed up other matters and pieces of their own composition with the remnants of expository lectures. The ancient relics, however, are easily discernible by their dialect, diction, etc., and by the authority to whom they are ascribed. That there was a method in them, has been shown by the erudite and indefatigable Jellinek, than whom there is no greater authority on the subject. He points out the following plan as gathered from the ancient fragments.

i. The lecturer first set forth the theme of his discourse in a passage of Scripture enunciating the particular truth which he wished to unfold, and then illustrated it by a parable, and enforced it by a saying which was popular in the mouth of the people. This rule is given in the *Midrash* itself, comp. וכולהו יס לזון מוקרא, ויש להם מישל, ויש

לזון מליצה, *Midrash on the Song of Solomon*, i a.

ii. The attention of the audience was roused and the discourse was enlivened by the lecturer using a foreign word instead of a well-known expression, or by employing a Greek, Latin, Aramaic, or Persian term in addition to the Hebrew (comp. *Aruch*, s. v. אדודקי). This accounts for the striking fact that so many foreign words occur in the *Midrash* to express things for which the Hebrew has expressions, and that both Hebrew and foreign words, expressing the same idea, stand side

by side (comp. מחדר לחדר ומקטון לקטון, *Midrash Rabba on Genesis*, c. vii.; בנה טובים ובנה, *Midrash on the Song of Solomon*, i a).

iii. The lecturer increased the beauty of his discourse by trying to discover analogies between numbers and persons related to each other—e. g., between David and Solomon. Comp. *Midrash on the Song of Songs*, ibid.

iv. The lecture was also rendered more attractive by being interspersed with plays upon words which were not intended to explain or corroborate a statement, but were simply meant to create a pleasant feeling in the audience. Hence, to judge

of the frequent plays upon words by the rules of hermeneutics, is to misunderstand the aesthetics of the Hagada.

v. It was considered as ornamenting the discourse, and pleasing to the audience, when single words were reduced to their numerical value in order to put a certain point of the lecture into a clearer light. Thus, e. g., the lecturer speaking of Eliezer, Abraham's faithful servant, and being desirous to show that he alone was worth a host of servants, remarked that Eliezer (אליעזר),  $1 + 30 + 10 + 70 + 7 + 200 = 318$  is exactly as much as the three hundred and eighteen young men mentioned in Gen. xiv. 14. Comp. *Midrash Rabboth* on Gen., ch. xlii. When it is remembered that the Hebrew letters were commonly used as numbers, it will be easily understood how the audience would be rejoiced to see a word converted so dexterously into figures.

vi. To relieve the discourse of its monotony, the lecturer resolved a long word into several little words, or formed new words by taking away a letter or two from the preceding and following words in the same sentence.

‘If the *Midrash* is read with the guidance of these æsthetical canons,’ continues Dr. Jellinek, ‘we shall find in it less arbitrariness and more order. We shall, moreover, understand its method and plan, and often be put in a position to distinguish the original discourse from the literary element of a later date, as well as from interpolations. For the confirmation of our æsthetical canons, let the reader compare and analyse chapters ii., iii., and v. of *Midrash Rabboth* on Genesis’ (*Ben Chananja* iv., 383, ff.)

4. *Halachic and Hagadic rules of interpretation*.—The preceding exposition of the method and plan of the *Midrash* has prepared us to enter upon the Halachic and Hagadic rules of interpretation which were collected and systematised by Elieser b. Jose the Galilean (יוסי הגלילי), one of the principal interpreters of the Pentateuch in the 2d century of the Christian era. According to this celebrated Doctor, whose sayings are so frequently recorded in the Talmud and the Siphri, there are thirty-two rules (שלושים ושנים) whereby the Bible is to be interpreted, which are as follows:—

i. *By the superfluous use of the three particles את, גם, and או, the Scriptures indicate in a three-fold manner that something more is included in the text than the apparent declaration would seem to imply.* Thus, e. g., when it is said, Gen. xxi. 1, ‘And the Lord visited (את שרה) Sarah;’ the superfluous את, which sometimes denotes with, is used to indicate that with Sarah the Lord also visited other barren women. The second גם is used superfluously in the passage ‘take also your herds, and also (גם) your flocks’ (Exod. xii. 32), to indicate that Pharaoh also gave the Israelites sheep and oxen, in order to corroborate the declaration made in Exod. x. 25; whilst the superfluous או, 2 Kings ii. 14, ‘he also (אף) had smitten the waters,’ indicates that more wonders were shown to Elisha at the Jordan than to Elijah, as it is declared in 2 Kings ii. 9. This rule is called ריבוי, inclusion, more meant than said.

ii. *By the superfluous use of the three particles אך, רק, and כן, the Scriptures point out something which is to be excluded.* Thus, e. g., או in Gen. vii. 23, ‘And Noah only (אף) remained,’ shows that

even Noah was near death, thus indicating exclusion. The superfluous **רָק** in 'only (**רָק**) the fear of God is not in this place' (Gen. xx. 11), shows that the inhabitants were not altogether godless; whilst **מִן** in Exod. xviii. 13, 'And the people stood by Moses from (**מִן**) the morning unto the evening,' indicates that it did not last all day, but only six hours (*Sabbath*, 10 a). This rule is called **מִיעוּט**, *diminution, exclusion*.

iii. *If words denoting inclusion follow each other, several things are included.* Thus in 1 Sam. xvii. 36, 'Thy servant slew also (**גַּם** אֶת) the lion, also (**גַּם**) the bear,' three superfluous expressions follow each other, to show that he slew three other animals besides the two expressly mentioned in the text. This rule is called **רִבּוּי אַחֵר רִבּוּי**, *inclusion after inclusion*.

iv. *If words denoting exclusion follow each other, several things are excluded.* Thus in Num. xii. 2, 'hath the Lord indeed only spoken to Moses? hath he not also spoken to us?' the superfluous expressions **רָק** and **אֶךְ** which follow each other denote that the Lord spoke to Aaron and Miriam before he spoke to Moses, thus not only without the lawgiver being present to it, but before God spoke to him, and not only did he speak to Aaron, but also to Miriam, so that there is here a twofold exclusion. If two or more inclusive words follow each other, and do not admit of being explained as indicative of inclusion, they denote *exclusion*. Thus, e.g., if the first word includes the whole, whilst the second only includes a part, the first inclusion is modified and diminished by the second. If, on the contrary, two or more exclusive words follow each other, and do not admit of being explained as indicative of exclusion, they denote *inclusion*. Thus, e.g., if the first excludes four, whilst the second only excludes two, two only remain included, so that the second exclusive expression serves to include or increase. This rule is called **מִיעוּט אַחֵר מִיעוּט**, *exclusion after exclusion*, and the two exceptions are respectively denominated **אֵין רִבּוּי אַחֵר**, *inclusion after inclusion effecting diminution*, and **אֵין מִיעוּט אַחֵר מִיעוּט**, *exclusion after exclusion effecting increase* (comp. *Pessachim*, 23 a; *Ḥoma*, 43 a; *Megilla*, 23 b; *Kiddushin*, 21 b; *Baba Kama*, 45 b; *Sanhedrin*, 15 a; with *Menachoth*, 34 a).

v. *Expressed inference from the minor to the major*, called **קַל וְחומר מופרש**. An example of this rule is to be found in Jer. xii. 5, 'If thou hast run with the footmen, and they have wearied thee, [inference] then how canst thou contend with horses?'

vi. *Implied inference from the minor to the major*, called **קַל וְחומר סתום**. This is found in Ps. xv. 4, 'He sweareth to his own hurt, and changeth not,' hence how much less if he swears to his advantage (comp. *Maccoth*, 24 a).

vii. *Inference from analogy or parallels*, called **נזרה שוה**. Thus it is said of Samuel, that 'there shall no razor come upon his head' (1 Sam. i. 11), and the same language is used with respect to Samson, 'no razor shall come on his head' (Judg. xiii. 5); whereupon is based the deduction from analogy, that just as Samson was a Nazarite so also Samuel (*Nasir*, 66 a, and see rule 2 in the articles HILLEL and ISHMAEL B. ELISA of this Cyclopædia).

viii. *Building of the father* (**בִּנְיָן אֵב**) is the property of any subject which is made the starting-point, and to constitute a rule (**אֵב**, *a father*) for all similar subjects. Thus, e.g., in Exod. iii. 4, it is stated, 'God called unto him out of the midst of the bush, and said Moses, Moses;' hence it concludes, that whenever God spoke to Moses, he addressed him in the same manner. For the different modifications of this rule, see 3 and 4 in the article HILLEL, and 3 in the article ISHMAEL B. ELISA of this Cyclopædia.

ix. *Brachylogy* (**קצרה**). The Scriptures sometimes express themselves briefly, and words must be supplied. Thus, e.g., **וּתְכַל דוד**, where it ought to be **וּתְכַל נֶפֶשׁ דוד**, and *David's soul was consumed*, **נֶפֶשׁ** being omitted; again 1 Chron. xvii.

5, where **וּואֵהִיָּה מֵאוֹהֶל אֵל אוֹהֶל וּמוֹשְׁבָן**, ought to be **וּואֵהִיָּה מִתְּהַלֵּךְ מֵאוֹהֶל אֵל אוֹהֶל וּמוֹשְׁבָן לְמוֹשֶׁה**, 'and I went from tent to tent, and from tabernacle to tabernacle,' the words **מִתְּהַלֵּךְ** and **לְמוֹשֶׁה** being omitted.

x. *Repetition* (**שנוי**). The Scriptures repeat a thing in order to indicate thereby something special. Thus, it is said in Jer. vii. 4, 'Trust ye not in lying words, saying, The temple of the Lord, the temple of the Lord, the temple of the Lord;' the last phrase is repeated three times, to indicate that though his people Israel celebrate feasts in the temple three times in the year, the Lord will not regard it because they do not amend their ways.

xi. *The separation and order of the verses* (**סדרו**) are designed to convey some explanation. Thus, verses 18 and 19 of 2 Chron. xxx. ought to be differently placed (comp. *Rashi*, in loco).

xii. *A subject often explains itself whilst it imparts information on other subjects* (**דבר שבא**).

(**ללמד ונמצא למד**). Thus, 'Its cry, it shall arise like that of a serpent' (Jer. xli. 22), indicates that the serpent must have raised a tremendous cry after the curse which the Lord pronounced against it, since we are nowhere else told that there was any occasion on which it cried; and that Egypt raises an equally loud cry—thus serving to give information upon another subject, and at the same time explaining itself (comp. *Sota*, 9 b).

xiii. *A general statement is made first, and is followed by a single remark, which is simply to particularise the general.* This rule is called **כלל**.

**שֶׁאֵהֲרִיִּן מַעֲשֵׂה וְאֵינוֹ אֵלָּא פֶּרֶשׁוֹ שֶׁל רֵאשִׁין**, and is illustrated by Gen. i. 27, where the creation of man is recorded in general terms, 'male and female created he them;' whilst ii. 7, which describes the creation of Adam, and ii. 21, which speaks of the creation of Eve, are simply the particulars of i. 27, and not another record or contradiction.

xiv. *A great and incomprehensible thing is represented by something small to render it intelligible.*

**דבר גדול שנתלה בקטן להשיבע**, and is illustrated by Deut. xxxii. 2, 'My doctrine shall drop as the rain;' where the great doctrines of revelation are compared with the less significant rain, in order to make them comprehensible to man; and by Amos iii. 8, 'When the lion roareth, who doth not fear? the Lord speaketh,' etc., where the lion is com-

pared with the Deity, to give man an intelligible idea of the power of God.

xxv. *When two Scriptures seem to contradict each other, a third Scripture will reconcile them* (שני כתובים המכחישים את זה את זה עד שיבא הכתוב השלישי ויכריע ביניהם). Thus, it is said in 2 Sam. xxiv. 9, 'There were in Israel eight hundred thousand valiant men,' in contradiction to 1 Chron. xxi. 5, where 'a thousand times thousand and a hundred thousand men, that drew the sword'—three hundred thousand more are said to have been among all Israel. The apparent contradiction is reconciled by xxvii. 1, where it is said, 'the children of Israel after their number; to wit, the chief fathers and captains of thousands and hundreds and their officers who served the king in all matters of the courses, who came in and went out, was, month by month, through all the months of the year, twenty-four thousand in each course.' From this it is evident that the number of these servants for twelve months amounted to two hundred and eighty-eight thousand, and as the chief fathers of Israel consisted of twelve thousand, we obtain the three hundred thousand who were noted in the registers of the king, and therefore are not mentioned in 2 Sam. xxiv. 9. Thus, the two apparently contradictory Scriptures are reconciled by a third Scripture. It deserves to be noticed, that this ancient interpretation is now generally followed, and that it is espoused by Dr. Davidson, *Sacred Hermeneutics*, Edinburgh 1843, p. 546, etc.

xxvi. *An expression used for the first time is explained by the passage in which it occurs* (דבר מיוחד במקומו). Thus, e.g., Hannah is the first who in her prayer addresses God as 'Lord of Hosts;' whence it is concluded that the superfluous expression *hosts* indicates that she must have argued to this effect—'Lord of the universe, thou hast erected two worlds (עצמות); if I belong to the nether world I ought to be fruitful, and if to the upper I ought to live for ever.' Hence the expression is designed for this passage (*Berachoth*, 31 b).

xxvii. *A circumstance is not fully described in the passage in which it first occurs, but is explained elsewhere* (דבר שאינו מתפרש במקומו ומתפרש במקום אחר). Thus it is stated in Gen. ii. 8, where the garden of Eden is first mentioned, that there were in it all manner of fruit; but it is not to be gathered from this passage that there was anything else in the garden; whilst from Ezek. xxviii. 13, where this passage is further explained, it is evident that there were also precious stones in Paradise.

xxviii. *A thing is named in part, but comprises the whole* (דבר שנאמר במקצת והוא נוהג בכל). Thus in Exod. xxii. 30, it is forbidden to eat flesh 'torn of beasts in the field;' and in Lev. xxii. 8, it is said, 'That which is torn he shall not eat,' here also forbidding that which is torn in the city. The use of the expression *field* in the first passage is owing to the fact that beasts are far more frequently torn in it than in the city; and the Scriptures mention the common and not the uncommon occurrences. Hence in the expression *field*, everything is comprised—city, country, forest, mountain, valley, etc.

xxix. *The respective predicates of two subjects in the same passages may refer to both alike* (דבר שנאמר בדבר אחד). Thus, 'Light is sown for the righteous, and gladness for the upright in heart'

(Ps. xcvi. 11), does not imply that the former is without gladness and the latter without light, but what is predicated of one also belongs to the other (comp. *Taanith*, 15 a).

xxx. *The predicate of a subject may not refer to it at all, but to the one next to it* (דבר שנאמר בזה ואינו ענין לו). Thus the remark, 'This to Judah' (Deut. xxxiii. 7), does not refer to Judah,

since it is said further on, 'And he said, Hear, Lord, the voice of Judah,' but to Simeon, whom Moses hereby blesses after Reuben.

xxxi. *When a subject is compared with two things, it is to receive the best attributes of both* (דבר שהוקש לשתי מדות ואתה נותן לו כח היפה שבשתיהן). Thus, 'The righteous shall flourish like the palm-tree; he shall grow up like a cedar in Lebanon' (Ps. xcii. 12)—the comparison is with the best qualities of both (comp. *Taanith*, 25 a).

xxxii. *The first clause explains by its parallelism the second, to which it refers* (דבר שהבירר מוכיח). Thus 'A gift in secret pacifieth anger,' in the first hemistich signifying the anger of God, shows that; 'and a reward in the bosom strong wrath' (Prov. xxi. 14), in the second hemistich refers to the strong wrath of God (comp. *Baba Bathra*, 9 b).

xxxiii. *The second clause in parallelism explains the first hemistich, to which it refers* (דבר שהוא מוכיח הבירר). Thus, 'The voice of the Lord shaketh the wilderness; the Lord shaketh the wilderness of Kadesh' (Ps. xxix. 8). Here *Kadesh*, though comprised in the expression wilderness of the first clause, is used in the second clause to heighten the strength of the first hemistich, by showing that the wilderness must have been shaken exceedingly, since Kadesh, the greatest wilderness, was shaken (comp. Deut. i. 16).

xxxiv. *A subject included in a general description is excepted from it to convey a special lesson* (דבר שהיה בכלל ויצא מן הכלל, ללמד על עצמו יצא). Thus, 'Joshua, the son of Nun, sent out of Shittim two men to spy secretly, saying, Go view the land, and Jericho' (Josh. ii. 1). Here Jericho is superfluous, since it is comprised in the general term *land*, but it is especially mentioned to indicate that Jericho by itself was equal in power and strength to the whole country. Hence that which is excepted teaches something special about itself.

xxxv. *A subject included in a general description is excepted from it to teach something special about another subject* (דבר שהיה בכלל ויצא מן הכלל, ללמד על אחר). Thus the command, 'Ye shall take no redemption-price for the life of a murderer who is guilty of death' (Num. xxxv. 31), is entirely superfluous, since it is included in the declaration already made, 'As he hath done, so shall it be done to him' (Lev. xxiv. 19). It is, however, mentioned especially to be a guide for other punishments, since it is concluded from it that it is only for murderers that no redemption-price is to be taken, but that satisfaction may be taken in case of one knocking out his neighbour's tooth or eye (comp. *Kethuboth*, 37 b, 38 a).

xxxvi. *Parable* (משל). Thus, 'The trees went forth on a time to anoint a king over them, and they said unto the olive-tree, Reign thou over us' (Judg. ix. 8), where it is the Israelites and not the trees who said to Othniel, son of Kenaz, Deborah

and Gideon reign over us. So also the remark, 'And they shall spread the cloth before the elders of the city' (Deut. xxii. 17), is parabolic, meaning that they should make their testimony as clear as the cloth (comp. *Kethuboth*, 46 a).

xxvii. *The preceding often explains what follows*

(מנין שדורשין מומעל בהגדה). Thus, 'And the Lord said unto Jehu, Because thou hast done well, executing that which is right in mine eyes . . . thy children of the fourth generation shall sit on the throne of Israel' (2 Kings x. 30), is to be explained by what precedes. Because Jehu destroyed four generations of the house of Ahab—viz., Omri, Ahab, Joram and his sons, as is stated (comp. ver. 13)—therefore shall four generations of his house remain on the throne.

xxviii. *Antithetic sentences often explain each other by their parallelism* (מנין שדורשין מנגד). Thus in Is. xxx. 16, 'But ye said, No; for we will flee upon horses; therefore shall ye flee, and ride upon rapid runners; therefore shall your pursuers run;' the words wherewith they have sinned are put in parallelism with the words of punishment, couched in the same language and in similar expressions.

xxix. *Explanations are obtained by reducing the letters of a word to their numerical value* (מנין שדורשין נמטריא בהגדה) *and substituting for it another word or phrase of the same value, or by*

*transposing the letters* (חלוק אוניות). For an instance of the first we must refer to the reduction

אליעזר to 318, given in the preceding section. The second part of this rule is illustrated by examples, which show that several modes of transposing the letters were resorted to. Thus ששך,

*Sheshach*, is explained by בבל, *Babel* (Jer. xxv. 26;

li. 41), כשדים by לב קמי (ibid. li. 1), by taking the letters of the alphabet in their inverse order; א, the first letter, is expressed by ת, the last letter of the alphabet; ב, the second letter, by ת, the last but one; ג by ד; ד by ה; ה by ו; ו by ז, and so on. This principle of commutation is called *Atbash* (א"ת ב"ש), from the first two specimen pairs of letters which indicate the interchange. Or the commutation is effected by bending the alphabet exactly in the middle and putting one half over the other, and the interchange is א for ל, ב for מ, ג for נ.

This mode is termed *Albam* (א"ל ב"ם), from the first two specimen pairs of letters which indicate the interchange (comp. *Nedarim*, 32 a; *Sanhedrin*, 22 a).

xxx. *An explanation is to be obtained by either dividing a word into several words, or into syllables, and transposing these syllables, or into letters and taking each letter as an initial or abbreviation of a word.* This rule is termed שדורשין נמטריקון אברהם, and is illustrated by the word אב המון גוים, the father of many nations; by כרמל being divided into כר and מל, and the latter transposed into רך, viz., soft and grindable; and by every letter of נמרט (1 Kings ii. 8) being taken as standing for a word, viz., נואף=adulterer, מואבי=Moabite, רוצח=murderer, צור=apostate, and תועבה=abhorred (comp. *Sabbath*, 105 a).

xxxi. *Words and sentences are sometimes transposed* (מוקדם שהוא מאוחר בענין). Thus י Sam.

iii. 3, 'And ere the lamp of God went out, and Samuel was lying in the temple of the Lord,' the

words ברחל יהוה, in the temple of the Lord, which are placed later in the sentence, evidently belong to יכבה, went out, since no one was allowed to sit down in the temple except the kings of the house of David, much less to lie down. So also in Ps. xxxiv., where ver. 18 must be taken up to ver. 16 (comp. *Kiddushin*, 78 b; *Baba Kama*, 106).

xxxii. *Whole sentences are sometimes transposed* (מוקדם מאוחר שהוא בפרשיות). Thus, e.g., the record, 'And he said unto him, Take me a heifer of three years old,' etc. (Gen. xv. 9, etc.), ought properly to precede chap. xiv., inasmuch as it is anterior in point of time. This reversed order is owing to the fact that the Scriptures for some reason put certain events which occurred earlier in time after later occurrences (comp. *Berachoth*, 7 b, with *Pessachim*, 6 b).

Besides these thirty-two rules, the following laws of interpretations must also be mentioned:—

i. *Deduction from juxtaposition.*—When two laws immediately follow each other, it is inferred that they are similar in consequences. Thus it is said in Exod. xxii. 18, 19, 'Thou shalt not suffer a witch to live. Whosoever lieth with a beast shall surely be put to death;' whence it is inferred that these two enactments are placed close to each other to indicate the manner of death a witch is to suffer, which the Scriptures nowhere define. Now, as he who cohabits with an animal is, according to the *Halacha* based upon Lev. xx., to be stoned to death, hence it is concluded that a witch is to die in the same manner.

ii. All repetitions of words as well as the construction of the finite verb with the infinitive, e.g., השב תשיב, העבט תעביטנו, have a peculiar signification, and must be explained. Some, however, maintain that the Bible, being written in human language, employs these repetitions (דיברה תורה כלשון בני אדם) in accordance with the *usus loquendi* (*Mishna Baba Mezia*, ii. 9; xii. 3; *Gemara*, ibid., 31; *Jerusalem Nedarim*, i. 1; *Kethuboth*, 77 b; *Berachoth*, 31 b).

iii. *Letters are to be taken from one word and joined to another or formed into new words.* Thus, ונתתם את נחלתו לשארו, then ye shall give his inheritance unto his kinsman (Num. xxvii. 11), is explained by ונתתם את נחלת שאר לו, and ye shall give the inheritance of his wife to him, i. e., the husband by taking away the ו from נחלתו and the ל from לשארו, thus obtaining the word לו; and it is deduced therefrom that a man inherits the property of his (שארו) wife (comp. *Baba Bathra*, iii. 6; *Menachoth*, 74 a). This rule is called שדורשין נמטריקון.

iv. *A word is to be explained both with the preceding and following words.* Thus ושרי אשת הנר אברהם לא ילדה לו ולה שפחה מצרית ושמה הנר and Sarai, Abraham's wife, bare him no children; and she had an handmaid, an Egyptian, whose name was Hagar (Gen. xvi. 1), is explained, and Sarai, Abraham's wife, bare no children to him and to herself (לו ולה), and then again, to him (i. e., Abraham) and to her (i. e., Sarai) there was an handmaid (לו ולה שפחה). This rule is called מוקרא נדרש לפניו ולאחריו, and is not admitted

by some (comp. *Sabbath*, 32 b; *Menachoth*, 19 a).

v. *The letters of a word are sometimes transposed.*

Thus עֲמֻלָּנוּ, *our labour* (Deut. xxv. 7), is made to mean *our children*, עֲלָמָנוּ, by transposing the מ and the ל.

vi. *Letters resembling each other in sound or appearance, or belonging to the same organ of speech, are interchanged.* Thus תורה לנו משה

עֲקָב, *Moses commanded us the law, an inheritance of the congregation of Jacob* (Deut. xxxiii. 4), is explained, *the law which Moses has given us, is the betrothed or wife* (מְאֻרָּה) of the congregation of Jacob, by changing the י in מורשה for א, and ש for ו.

The alteration produced by rules v. and vi., and which are in the Talmudic and post-Talmudic period generally introduced by the remark אֵל תִּקְרֶי כֵךְ

אֵלָּא כֵךְ, *Read not so and so, but so and so*, must not be taken for emendations of the text or various readings, but are simply another mode of obtaining an additional meaning of the text. It was argued that as the literal and limited sense of the Bible, read in the stereotyped order, could not yield sufficiently of the divine and inexhaustible mind couched in those letters, every transposition, commutation, etc., ought to be resorted to in order to obtain as much as possible of the infinite idea. Especially as every such effort yielded such a sense and a meaning as thoroughly harmonized with what might justly be expected from Holy Scripture. It was therefore regarded as probable that the Bible designed to indicate it in addition to what the regular order and reading of the words conveyed. It must also be remarked that some of these rules, especially those which involved an alteration of the text and a departure from the literal meaning, were not used in *Halachic exegesis*, and that the *Hagadic exegesis* employs many more than those we have specified. In fact, anything and everything is resorted to which can make the text speak comfort and consolation in every time of need, or connect the legends about Scriptural characters with the Biblical record.

5. *Importance of the Halachic and Hagadic exegesis.*—When it is borne in mind that the annotators and punctuators of the Hebrew text, and the translators of the ancient versions, were Jews impregnated with the theological opinions of the nation, and prosecuted their Biblical labours in harmony with these opinions, and the above-named exegetical rules, the importance of the Halachic and Hagadic exegesis to the criticism of the Hebrew text, and to a right understanding of the Greek, Chaldee, Syriac, and other versions, as well as of the quotations of the O. T. in the N. T., can hardly be overrated. If it be true—and few will question the fact—that every successive English version, either preceding or following the Reformation, reflects the peculiar notions about theology, church government, and politics of each period and every dominant party; and that even the most literal translation of modern days is, in a certain sense, a commentary of the translator; we ought to regard it as natural that the Jews, without intending to deceive, or wilfully to alter the text, should by the process of the *Midrash* introduce or indi-

cate, in their Biblical labours, the various opinions to which shifting circumstances gave rise. Let a few specimens from the Hebrew text, and the ancient versions, suffice to illustrate this Midrashic process, and its paramount importance to Biblical criticism.

i. *The Hebrew text and the Massora.*—The influence of the Halachic and Hagadic exegesis on the formation of the Hebrew text and the Massora is far greater than has hitherto been imagined, though the limits of this article only admit of a few examples. Thus, e.g., the question put by Isaiah to Hezekiah, ‘The shadow has gone forward (הִלֵּךְ) ten degrees, shall it go back ten degrees?’ (2 Kings xx. 9) as the Hebrew text has it, is not only grammatically incorrect, inasmuch as the repetition of the *ten degrees* a second time requires the article, but is at variance with the king’s reply given in ver. 10, from which it is evident that the prophet asked him whether the shadow should go forwards or backwards ten degrees, that Hezekiah chose the latter because it was more difficult and wonderful, and that the original reading was

הִלֵּךְ, instead of הָקָה; and, indeed, this reading is still preserved by the Chaldee, the Syriac, the Vulgate, etc.; is followed by Luther and the Zurich version, whence it found its way into Coverdale, the Bishop’s Bible, and has finally got into the A. V. The mystery about the origin of the present textual reading is solved when we bear in mind the Hagadic explanation of the parallel passage in Is. xxxviii. 8. Now, tradition based upon this passage tells us, that the shadow or the sun had gone ten degrees forwards at the death of Ahaz, and the day was thus shortened to two hours אֲחֻזַּת הַיּוֹם שְׁמֹנֶת בֹּרְאָה שְׁנֵי שָׁעוֹת הָיָה, *Sanhedrin*, 96 a), in order that his burial might be hasty and without royal honours, and that now these ten degrees went backward. Hence the present reading, which was effected by the trifling alteration of הִלֵּךְ into

הָקָה, i. e., ‘the shadow,’ the prophet is made to say to the king, ‘has once gone forward ten degrees’ (i. e., at the death of Ahaz); ‘shall it now go backwards ten degrees?’ Thus, the Midrash exposition of Is. xxxviii. 8 gave rise to the textual reading of 2 Kings xx. 9. For the influence of the Halachic and Hagadic exegesis on the Massora and the various readings, we must refer to Krochmal, *More Neboche Ha-Jeman*, Lemberg 1851, p. 169, ff.; and the articles KERI and KETHIV, and NETHINIM, in this Cyclopædia.

ii. *The Greek versions.*—That the Septuagint is pervaded by the Halachic and Hagadic exegesis, may almost be seen on every page of this version. A few examples must suffice. Thus, e.g., the Septuagint rendering of חַיָּה by ζῴον in Lev. xi. 47, is only to be explained when it is borne in mind that, according to the Halacha, the prohibition respecting טְרֵפָה (Exod. xxii. 30, *al.*) does not simply refer to animals torn by wild beasts, but to every animal which is sickly and maimed, though belonging to the clean animals allowed to be eaten in Lev. xi.; and that one of the sure tests whether an animal is healthy, and hence eatable, is when it bears young ones; barrenness is an infallible sign of its sickly condition (comp. *Chulin*, 24, with 58; Salomon b. Adereth, *Respons.*, xcvi.; *Torath Cohanim*, 124)—hence the Septuagint rendering,

'between those which bear young ones and [for this reason] may be eaten, and those which bear young ones and may not be eaten,' because they belong to the animals proscribed. Again, the rendering

of Josh. xiii. 22, בהרב . . . הרגו . . . בלעם, ואת בלעם, by καὶ τὸν Βαλαάμ . . . ἀπέκτειναν . . . ἐν ῥοπή, which has caused such perplexity to commentators and given rise to diverse emendations (e.g., προνομή, Oxf.; ἐν ρουφαίᾳ ἐν τροπῇ, Ald. and Complut.), is at once explicable when reference is made to the Hagada, which is quoted by Jonathan b. Uzziel's Chaldee Paraphrase of Num. xxxi. 6, and is as follows: 'Balaam flew into the air by his magic arts, and Phinehas threw him down,' so that ἐν ῥοπή means in the full (comp. also Rashi on Num. xxxi. 6).

*Symmachus*, too, cannot be understood in many of his translations without reference to the Halachic and Hagadic exegesis. Thus, the apparently

strange rendering of לֹא תֵבֶשֶׁל גִּדֵּי בַחֲלָב אִמּוֹ by οὐ σκευάσεις ξρίφον διὰ γάλακτος μητρός αὐτοῦ (Exod. xxiii. 19), becomes intelligible when it is remembered that the Halacha not only prohibits the cooking but the mixing and eating of animal meat and milk in any form (comp. *Mechilla* in loco, *Cholin*, 115). Hence the rendering of תֵּבֶשֶׁל

by σκευάσεις. The rendering of מִשֶּׁה וְיִוָּאֵל מִשֶּׁה by ὤρκισε δὲ Μωϋσῆν (Exod. i. 21), which has been thought very extraordinary and inexplicable, becomes perfectly plain when the Hagada on this passage is consulted, which tells us, that Jethro demanded of Moses to swear that he would devote to idolatry his first-begotten son by Zipporah, and that Moses consented to it; and remarks farther, לוֹ

השבע וישבע לו שנאמר ויואל משה, אין אלה אלא לשון שבועה שני ויואל שאל את העם לאמר וכתוב ויאמר נעמן הואל וקה בכרים, then said Jethro, swear, and Moses swore to him, as it is written, ויואל משה. Now אלה denotes to swear, as in 1 Sam. xiv. 24, and 2 Kings v. 23 (comp. *Mechilla*, section Jethro, beginning quoted in *Jalkut*, in loco; *Nedarim*, 65 a).

These few specimens must suffice, for, greatly important as the subject is, the limits of this article prevent us from giving illustrations of the influence which the Halachic and Hagadic exegesis exercised upon the other Greek version, as well as upon the Chaldee paraphrases, the Syriac version, the Vulgate, the Arabic, and the expositions of the early fathers.

and Critical Commentary on Ecclesiastes, Longman 1861, pp. 30, ff.; 455, ff.—C. D. G.

MIDWIFE. [BIRTH; ABNAIM.]

MIGDAL-EDAR (מִגְדַּל עֵדָר). In Gen. xxxv.

21, we read that Jacob, after burying Rachel beside Bethlehem, 'journeyed, and spread his tent beyond the tower of Edar,' or Migdal-edar (see EDAR). It was probably a tower built on the borders of the wilderness for the protection of the numerous flocks that were pastured there; and it may perhaps have stood on the site now occupied by the fortified *Khan* at Solomon's pools. Some suppose that the same place is alluded to in Micah iv. 8, 'And thou, O tower of the flock' (in Hebrew Migdal-edar); but the succeeding clause shows that the prophet refers to Mount Zion, which, because of its strength and the watchfulness exercised by its government over Israel, 'the flock of Jehovah' (Jer. xiii. 17), is called Migdal-edar, 'the tower of the flock' (*Onomast.*, s. v. *Bethlehem*; Delitzsch, *on Gen.*, ad loc.).—J. L. P.

MIGDAL-EL (מִגְדַּל אֵל), 'tower of God,' Μεγαλαρμ; Μαγδαλή; *Magdalen*), one of the 'fenced cities' of Naphtali, mentioned only in Josh. xix. 38. No indication of its geographical position is given, and the name Migdal was, and still is, very common in Palestine. The territory of Naphtali unquestionably included a considerable portion of the shore of the Sea of Galilee; and there is on the shore, three miles north of Tiberias, a small village with ancient ruins called *Mejdel*, the Arabic representative of Migdal (مجدل),

and now identified with the MAGDALA of the N. T. Dr. Robinson states that this is probably the same place as the Migdal-el of the O. T. (*B. R.*, ii. 397). It would seem, however, that Joshua groups the cities according to their position; and if so, Migdal-el would have come between Hammath and Chinnereth, whereas it is named after Kedesh and Hazor, and thus appears to have been situated on the north, or probably north-west, part of the tribe (Josh. xix. 35-38). Eusebius and Jerome make a strange mistake regarding it; they say 'it is now a small village nine (Jerome five) miles from Dora on the road to Ptolemais,' which nearly corresponds to the position of Athlit, the *Castellum Peregrinorum* of the Crusaders (*Onomast.*, s. v. *Magdihel*; *Handbook*, p. 369); but this is far beyond the boundaries of Naphtali. In Van de Velde's map a village called *Mejdel Selim* is placed near the northern extremity of the mountains of Naphtali, the position of which would seem to agree with that of Migdal-el. The *Mujeid* mentioned by Mr. Grove, on the bank of Wady Kerakah, appears to be too far west (Smith's *Dict. of the Bible*, s. v.) This point, however, requires fuller investigation on the spot.—J. L. P.

MIGDAL-GAD (מִגְדַּל גָּד), 'tower of Gad,'

Μαγαδαλαγὰδ; Alex. Μαγδαλαγὰδ; *Magdalgad*), a town of Judah, situated in the Shephelah, or plain of Philistia, apparently to the north-west of Lachish (Josh. xv. 37-39). It is only mentioned in the one passage of Scripture, and it appears to have been unknown to Eusebius and Jerome (*Onomast.*, s. v. *Magdala*). In the plain of Philistia, about two miles east of Ascalon, stands the large and pros-

perous village of Mejdol, encircled by luxuriant orchards and olive groves, and fields unsurpassed in fertility. The writer discovered among the houses many traces of antiquity—large hewn stones and broken columns. There can be no doubt that it occupies an ancient site; and Van de Velde's suggestion that here stood the Migdal-gad of Joshua seems highly probable (*Memoir*, p. 334; *Travels*, ii. 177). Some three miles south-east of Mejdol is the village of *Jenin*, which may perhaps be the *Zenan* noted by Joshua in the group with Migdal-gad; and ten miles distant in the same direction are the ruins of Lachish and Eglon (*Handbk.*, pp. 272, 261).—J. L. P.

MIGDOL (מִגְדֹּל; Sept. *Μάγδαλος*, *Μάγδαλον*), a place between which and the Red Sea the Israelites were commanded to encamp on leaving Egypt (Exod. xiv. 2; Num. xxxiii. 7) [EXODUS]. The name, which means a *tower*, appears to indicate a fortified place. In Jer. xlv. 1; xlv. 14, it occurs as a city of Egypt, and it would seem to have been the last town on the Egyptian frontier, in the direction of the Red Sea; hence 'from Migdol to Syene,' in Ezek. xxix. 10; xxx. 6. In the Itinerary of Antoninus there is mention of Magdol as a town in Egypt about twelve Roman miles southward of Pelusium. It is probable that this is the Migdol of the prophets. Whether this is the Migdol of Exodus is doubted by some.

MIGRON (מִגְרֹן; 'a precipice,' *Μαγρόν*; in Is. x. 28, *Μαγρεδών*; Alex. *Μαγεδδών*; *Magron*). In describing the romantic and successful attack of Jonathan upon the Philistine host at Michmash, the sacred historian states that when it was made, 'Saul tarried in the uttermost part of Gibeah (or on the border [בְּקֵצֶה] of Gibeah), under a pomegranate-tree, which is in Migron' (1 Sam. xiv. 2); and Migron is again mentioned by Isaiah when giving the route of the Assyrian army towards Jerusalem—'He is come to Aiath, he is passed to Migron; at Michmash he hath laid up his carriages' (x. 28). These are the only passages in which the name occurs. It is not quite certain whether the writers mean by it a city or a place so called from some noted cliff, as the word might seem to imply. Be this as it may, Migron must have been situated between Michmash and Geba (written *Gibeah*, גִּבְעָה, in 1 Sam. xiv. 2; see GEBÄ), and on the south side of the deep ravine which separates them; because Saul was at Migron and the Philistines at Michmash when Jonathan crossed the ravine and surprised the camp. The words of Isaiah, when rightly understood, are not opposed to this. He represents the invader as having passed from Aiath to Migron. Then he gives an explanatory note, as it were, 'At Michmash he hath laid up his baggage,' and this occurred before he reached Migron. Having done so, he went over the passage or ravine, and encamped at Geba.

Migron, therefore, was in all probability situated on, or close to, the southern brow of the ravine now called Wady Suweinif. It was a commanding position (cf. Joseph. *Antiq.* vi. 6. 2, where it is said to be 'a high hill'), for Saul was able to see from it the commotion which followed the attack of Jonathan on the Philistine camp. The ravine is not quite half a mile in breadth from brow to brow. Migron was unknown to Eusebius and

Jerome (*Onomast.*, s. v. *Magdon*), and it has not yet been identified. The writer on two occasions examined minutely the whole region around Geba and Michmash, and westward to Ai (or *Aiath*) and Bethel, but could hear nothing of Migron (*Handbk.*, p. 214). There are several ruined villages, and many commanding cliffs there; it is impossible, however, now to identify Migron.—J. L. P.

MIKKELSEN, HANS, author of the first Danish version of the N. T., was originally mayor of Malmoe in Scania, and subsequently secretary to Christian II. of Denmark. When the king was, in 1523, obliged to flee from his dominions and take refuge in Holland, Mikkelsen accompanied him, and it was whilst there that, at the suggestion of his sovereign, he set himself to the work of translating the N. T. Driven by the bigoted jealousy of the papal party in the Netherlands from his place beside the king, he retired to Harderwick in Guelderland, where he died about the year 1532. His translation professes to be made from the Latin, but this applies only to the four gospels, in translating which he seems to have followed the version of Erasmus; for the other books he has closely followed the German version of Luther. His translation appeared in sm. 4to in 1524 (Henderson, *Dissertation on Hans Mikkelsen's Translation*, Copenhagen 1813).—W. L. A.

MILCAH (מִלְכָּה; Sept. *Μελχά*). 1. The daughter of Haran, sister of Lot, and wife of her uncle Nahor, Abraham's brother (Gen. xi. 29). Of her eight children the youngest, Bethuel, was the father of Rebekah (Gen. xxii. 22, 23; xxiv. 15). 2. The fourth daughter of Zelophehad (Num. xxvi. 33; xxvii. 1, etc.).—W. L. A.

MILCOM. [MOLOCH.]

MILE (μῖλον). This word is only mentioned in Matt. v. 41, where Christ says, 'And whosoever shall compel thee to go a mile, go with him twain.' The mile was originally (as its derivation from *mille*, 'a thousand,' implies) a Roman measure of 1000 geometrical paces (*passus*) of five feet each, and was therefore equal to 5000 Roman feet. Taking the Roman foot at 11.6496 English inches, the Roman mile would be 1618 English yards, or 142 yards less than the English statute mile. By another calculation, in which the foot is taken at 11.62 inches, the mile would be little more than 1614 yards. The number of Roman miles in a degree of a large circle of the earth is very little more than seventy-five. The most common Latin term for the mile is *mille passuum*, or only the initials M.P.; sometimes the word *passuum* is omitted. The Roman mile contained eight Greek stadia (see Smith's *Dict. of Greek and Rom. Antiq.*, art. *Milliare*). The Greek stade hence bore the same relation to the Roman mile which the English furlong does to the English mile; and it is indeed usual with the earlier writers on Biblical geography to translate the Greek 'stade' into the English 'furlong,' in stating the measurements of Eusebius and Jerome. As the measurements of these writers are often cited in the present work, it is necessary to remember that their mile is always the Roman mile.—J. K.

MILETUS (Μίλητος), a city and seaport of Ionia in Asia Minor, about thirty-six miles south of Ephesus. St. Paul touched at this port on his

voyage from Greece to Syria, and delivered to the elders of Ephesus, who had come to meet him there, a remarkable and affecting address (Acts xx. 15-38). Miletus was a place of considerable note, and the ancient capital of Ionia and Caria. It was the birth-place of several men of renown—Thales, Timotheus, Anaximander, Anaximenes, Democritus (Pomp. Mela, i. 17; Diog. Laert. *Vit. Philosoph.* pp. 15, 88, 89, 650). Ptolemy (*Geog.* v. 2) places Miletus in Caria by the sea, and it is stated to have had four havens, one of which was capable of holding a fleet. It was noted for a famous temple of Apollo, the oracle of which is known to have been consulted so late as the fourth century (Apollodorus, *De Orig. Deor.* iii. 130). There was, however, a Christian church in the place; and in the fifth, seventh, and eighth centuries, we read of bishops of Miletus who were present at several councils (Magdeburg, *Hist. Eccles.* ii. 192; iv. 86; v. 3; vii. 254; viii. 4). The city fell to decay after its conquest by the Saracens, and is now in ruins, not far from the spot where the Meander falls into the sea. The site bears, among the Turks, the name of Melas.

Some take the Miletum where Paul left Trophimus sick (2 Tim. iv. 20) to have been in Crete, and therefore different from the above; but there seems no need for this conclusion. [The inducement to this hypothesis is the desire to escape the difficulty arising from the statement that the apostle left Trophimus at Miletus sick, whereas we find Trophimus with the apostle at the close of that journey at Jerusalem (Acts xxi. 29). But the only valid escape from this difficulty is to be found in the supposition of a journey made by the apostle after his first imprisonment at Rome [TIMOTHY, EPISTLES 10]. Miletum in the A.V. is an incorrect form for Miletus.]—J. K.

**MILK.** The Hebrew word for milk, חֶלֶב, *chalab*, is from the same root as חָלַב, *chaleb*, 'fatness,' and is properly restricted to new milk, there being a distinct term, חֶמְאָה, *chemah*, for milk when curdled. Milk, and the preparations from it, butter and cheese, are often mentioned in Scripture. Milk, in its fresh state, appears to have been used very largely among the Hebrews, as is usual among people who have much cattle, and yet make but sparing use of their flesh for food. The proportion which fresh milk held in the dietary of the Hebrews, must not, however, be measured by the comparative frequency with which the word occurs; because, in the greater number of examples, it is employed figuratively to denote great abundance, and in many instances it is used as a general term for all or any of the preparations from it.

In its figurative use, the word occurs sometimes simply as the sign of abundance (Gen. xlix. 12; Ezek. xxv. 4; Joel iii. 18, etc.); but more frequently in combination with honey—'milk and honey,' being a phrase which occurs about twenty times in Scripture. Thus a rich and fertile soil is described as a 'land flowing with milk and honey,' which, although usually said of Palestine, is also applied to other fruitful countries, as Egypt (Num. xvi. 13). This figure is by no means peculiar to the Hebrews, but is frequently met with in classical writers. A beautiful example occurs in Euripides (*Bacch.* 142). Hence its use to denote the

food of children. Milk is almost constantly employed as a symbol of the elementary parts or rudiments of doctrine (1 Cor. iii. 2; Heb. v. 12, 13); and from its purity and simplicity, it is also made to symbolize the unadulterated word of God (1 Pet. ii. 2; comp. Is. lv. 1).

In reading of milk in Scripture, the milk of cows naturally presents itself to the mind of the European reader; but in Western Asia, and especially among the pastoral and semi-pastoral people, not only cows, but goats, sheep, and camels, are made to give their milk for the sustenance of man. That this was also the case among the Hebrews may be clearly inferred even from the slight intimations which the Scriptures afford. Thus we read of 'butter of kine, and milk of sheep' (Deut. xxxii. 14); and in Prov. xxvii. 27, the emphatic intimation, 'Thou shalt have goats' milk for food,' seems to imply that this was considered the best for use in the simple state. 'Thirty milch camels' were among the cattle which Jacob presented to his brother Esau (Gen. xxxii. 15), implying the use of camels' milk.

The word for curdled milk (חֶמְאָה) is always translated 'butter' in the A. V. It seems to mean both butter and curdled milk, but most generally the latter; and the context will, in most cases, suggest the distinction, which has been neglected by our translators. It was this curdled milk, highly esteemed as a refreshment in the East, that Abraham set before the angels (Gen. xviii. 8), and which Jael gave to Sisera, instead of the water which he asked (Judg. v. 25). In this state milk acquires a slightly inebriating power, if kept long enough. Is. vii. 22, where it is rendered 'butter,' is the only text in which the word is coupled with 'honey,' and there it is a sign of scarcity, not of plenty, as when honey is coupled with fresh milk. It means that there being no fruit or grain, the remnant would have to live on milk and honey; and, perhaps, that milk itself would be so scarce, that it would be needful to use it with economy; and hence to curdle it, as fresh milk cannot be preserved for daily use. Although, however, this word properly denotes curdled milk, it seems also to be sometimes used for milk in general (Deut. xxxii. 14; Job xx. 15; Is. vii. 15).

The most striking Scriptural allusion to milk is that which forbids a kid to be seethed in its mother's milk, and its importance is attested by its being thrice repeated (Exod. xxiii. 19; xxxiv. 26; Deut. xiv. 21). There is, perhaps, no precept of Scripture which has been more variously interpreted than this, and we may state the most remarkable views respecting it:—1. That it prohibits the eating of the fœtus of the goat as a delicacy: but there is not the least evidence that the Jews were ever attached to this disgusting luxury. 2. That it forbids the kid to be killed till it is eight days old, when, it is said, it might subsist without the milk of its mother. 3. This ground is admitted by those who deduce a further reason from the fact, that a kid was not, until the eighth day, fit for sacrifice. But there appears no good reason why a kid should be described as 'in its mother's milk,' in those days, more than in any other days of the period during which it is suckled. 4. Others, therefore, maintain that the eating of a sucking kid is altogether and absolutely prohibited. But a goat suckles its kid for three months, and it is not likely that the Jews were so long forbidden

the use of it for food. No food is forbidden but as unclean, and a kid ceased to be unclean on the eighth day, when it was fit for sacrifice; and what was fit for sacrifice could not be unfit for food. 5. That the prohibition was meant to prevent the dam and kid from being slain at the same time. But this is forbidden with reference to the goat and other animals in express terms, and there seems no reason why it should be repeated in this remarkable form with reference to the goat only. 6. Others understand it literally, as a precept designed to encourage human feelings. But, as Michaelis asks, how came the Israelites to hit upon the strange whim of boiling a kid in milk, and just in the milk of its own mother? 7. Still, understanding the text literally, it is possible that this was not a common act of cookery, but an idolatrous or magical rite. Maimonides, in his *More Nevochim*, urges this opinion. He says, 'Flesh eaten with milk, or in milk, appears to me to have been prohibited, not only because it affords gross nourishment, but because it savoured of idolatry, some of the idolaters probably doing it in their worship, or at their festivals; and I am the more inclined to this opinion from observing that the law, in noticing this practice, does so twice, immediately after having spoken of the three great annual feasts (Exod. xxiii. 17, 19; xxxiv. 23, 26). 'Three times in the year all thy males shall appear before the Lord God. . . . Thou shalt not seethe a kid in its mother's milk.' As if it had been said, 'When ye appear before me in your feasts, ye shall not cook your food after the manner of the idolaters, who are accustomed to this practice.' This reason appears to me of great weight, although I have not yet been able to find it in the Zabian books.' This is confirmed by an extract which Cudworth (*Discourses concerning the True Notion of the Lord's Supper*, p. 30) gives from an ancient Karaite commentary on the Pentateuch. 'It was a custom of the ancient heathen, when they had gathered in all their fruits, to take a kid, and boil it in the dam's milk, and then in a magical way to go about and besprinkle with it all their trees, and fields, and gardens, and orchards, thinking that by this means they should make them fructify, and bring forth more abundantly the following year.' Some such rite as this is supposed to be the one interdicted by the prohibition. This opinion is supported by Spencer (*De Legibus Hebr.* ii. 9, sec. 2), and has been advocated by Le Clerc, Dathe, and other able writers. It is also corroborated by the addition in the Samaritan copy, and in some degree by the Targum. The former has, 'For he who doth this is like a man who sacrificeth an abomination, and it is a trespass against the God of Jacob:.' and the latter, 'O my people, house of Israel, it is not lawful for you to boil or eat flesh and milk mixed together, lest my wrath be enkindled, and I boil your products, corn and straw, together.' 8. Michaelis, however, advances a quite new opinion of his own. He takes it for granted

that בָּשַׁל, rendered 'seethe,' may signify to roast as well as to boil, which is hardly disputable; that the kid's mother is not here limited to the real mother, but applies to any goat that has kidded; that הֵלֵךְ here denotes not *milk* but *butter*; and that the precept is not restricted to kids, but extends not only to lambs (which is generally granted), but to all other not forbidden animals. Having

VOL. III.

erected these props, Michaelis builds upon them the conjecture, that the motive of the precept was to endear to the Israelites the land of Canaan, which abounded in *oil*, and to make them forget their Egyptian *butter*. Moses, therefore, to prevent their having any longing desire to return to that country, enjoins them to use oil in cooking their victuals, as well as in seasoning their sacrifices (*Mosaisches Recht*, pt. iv., p. 210). This is ingenious, but it is open to objection. The postulates cannot readily be granted; and if granted, the conclusion deduced from them is scarcely just, seeing that, as Geddes remarks, 'there was no need nor temptation for the Israelites to return to Egypt on account of its butter, when they possessed a country that flowed with milk and honey' (*Critical Remarks*, p. 257).

BUTTER is not often mentioned in Scripture, and even less frequently than our version would suggest; for, as already intimated, the word חֶמְאָה, *chemah*, must sometimes be understood of curdled milk. Indeed, it may be doubted whether it denotes butter in any place besides Deut. xxxii. 14, 'butter of kine,' and Prov. xxx. 33, 'the churning of milk bringeth forth butter,' as all the other texts will apply better to curdled milk than to butter. Butter was, however, doubtless much in use among the Hebrews, and we may be sure that it was prepared in the same manner as at this day among the Arabs and Syrians. The milk is put into a large copper pan over a slow fire, and a little *leben* or sour milk (the same as the curdled milk mentioned above), or a portion of the dried entrails of a lamb, is thrown into it. The milk then separates, and is put into a goatskin bag, which is tied to one of the tent poles, and constantly moved backwards and forwards for two hours. The buttery substance then coagulates, the water is pressed out, and the butter put into another skin. In two days the butter is again placed over the fire, with the addition of a quantity of *burgoul* (wheat boiled with leaven, and dried in the sun), and allowed to boil for some time, during which it is carefully skimmed. It is then found that the *burgoul* has precipitated all the foreign substances, and that the butter remains quite clear at the top. This is the process used by the Bedouins, and it is also the one employed by the settled people of Syria and Arabia. The chief difference is, that in making butter and cheese the townspeople employ the milk of cows and buffaloes, whereas the Bedouins, who do not keep these animals, use that of sheep and goats. The butter is generally white, of the colour and consistence of lard, and is not much relished by English travellers. It is eaten with bread in large quantities by those who can afford it, not spread out thinly over the surface, as with us, but taken in mass with the separate morsels of bread.

Cheese has been noticed under its proper head.—J. K.

MILL [The Heb. has no word properly for *mill*. The term מִלּוֹחַ, the dual of the not-used מִל, means two mill-stones, and is used of a hand-mill (Is. xlvii. 2)] (Sept. μύλην). The mill for grinding corn had not wholly superseded the mortar for pounding it in the time of Moses. [MORTAR.] The mortar and the mill are named together in Num. xi. 8. But fine meal, that is, meal ground or pounded fine, is mentioned so early as the time

N

of Abraham (Gen. xviii. 6): hence mills and mortars must have been previously known. The mill common among the Hebrews differed little from that which is in use to this day throughout Western Asia and Northern Africa. It consisted of two circular stones two feet in diameter, and half a foot thick. The lower is called the 'nether millstone,' פֶּלֶחַ תַּחְתִּית (Job xli. 16 [24]), and the upper the 'rider,' רֶכֶב (Judg. ix. 53; 2 Sam. xi. 21). The former was usually fixed to the floor, and had a slight elevation in the centre, or in other words, was slightly convex in the upper surface.

354-

The upper stone had a concavity in its under surface fitting to, or receiving, the convexity of the lower stone. There was a hole in the top, through which the corn was introduced by handfuls at a time. The upper stone had an upright stick fixed in it as a handle, by which it was made to turn upon the lower stone, and by this action the corn was ground, and came out at the edges. As there were neither public mills nor bakers, except the king's (Gen. xl. 2; Hos. vii. 4-8), each family possessed a mill; and as it was in daily use, it was made an infringement of the law for a person to take another's mill or mill-stone in pledge (Deut. xxiv. 6). On the second day, in warm climates, bread becomes dry and insipid; hence the necessity of baking every day, and hence also the daily grinding at the mills early in the morning. The operation occasions considerable noise, and its simultaneous performance in a great number of houses or tents forms one of the sounds as indicative of an active population in the East, as the sound of wheel carriages is in the cities of the West. This sound is alluded to in Scripture (Jer. xxv. 10; Rev. xviii. 22, 23). The mill was, as now, commonly turned by two persons, usually women, and these, the work being laborious, the lowest maid-servants in the house [Thomson, *The Land and the Book*, c. 34]. They sat opposite each other. One took hold of the mill-handle, and impelled it half way round; the other then seized it, and com-

pleted the revolution (Exod. xi. 5; Job xxxi. 10, 11; Is. xlvii. 2; Matt. xxiv. 41). As the labour was severe and menial, enemies taken in war were often condemned to perform it (Judg. xvi. 21; Lam. v. 13). (Jahn, *Biblische Archeol.* ix. 139). It will be seen that this mill-stone does not materially differ from the Highland *guern*, and is, indeed, an obvious resource in those remote quarters where a population is too thin or too scattered to afford remunerative employment to a miller by trade. In the East this trade is still unknown, the hand-mill being in general and exclusive use among the corn-consuming, and the mortar among the rice-consuming, nations. [BREAD.]—J. K.

MILL, DAVID, D.D., professor of Oriental languages at Utrecht, was born at Königsburg 13th April 1692, and died at Utrecht 22d May 1755. He was the author of *Dissertationes Selectae Variae S. Litt. et Antiquitatis Orientalis Capita exponentes et illustrantes*, curis secundis, Lugd. Bat. 1743—a work replete with learning, and marked by much sound discrimination.—W. L. A.

MILL, JOHN, D.D., was born at Shap in Westmoreland, about 1645, and died June 23, 1707. He entered as servitor at Queen's College, Oxford, in 1661; took his degree of B.A. in 1666; his Master's degree in 1669; and was soon afterwards chosen fellow and tutor of his college. In 1676 he became chaplain to the Bishop of Oxford (Dr. Lamplugh); and in 1681 obtained the rectory of Blechingdon, in Oxfordshire, and was made chaplain to Charles II. He was appointed principal of St. Edmund's Hall in 1685, and held the appointment till his death. Dr. Mill rendered great service to the cause of Biblical science by his edition of the Greek Testament, undertaken by the advice of Dr. Fell, Bishop of Oxford, and completed only fourteen days before his own death: 'H KAINH ΔΙΑΘΗΚΗ, *Novum Testamentum Græcum, cum lectionibus variantibus MSS. Exemplarium, Versionum, Editionum SS. Patrum et Scriptorum Ecclesiasticorum, et in eadem notis Studio et labore Johannis Millii S. T. P.*, Oxonii 1707, folio. Dr. Mill devoted thirty years of his life to this work, which was greatly in advance of everything of the kind which preceded it. The text is that of R. Stephens of 1550, between which, however, and the Elzevir, Dr. Davidson says it 'fluctuates.' The editor 'recognised the importance of each element of critical evidence' (Tregelles). He inserted in his notes all previously existing collections of various readings, adding to them many others as the result of his own examination of ancient sources. The various readings, said to amount to 30,000, were attacked by Dr. Whitby in his *Examen*—as if attacks could annihilate facts. Collins applied Whitby's reasonings against the Scriptures themselves, but he was triumphantly answered by Bentley in his *Phileleutherus Lipsiensis*. Kuster reprinted Mill's Testament at Rotterdam in 1710, with the readings of twelve additional MSS. [KUSTER.]—I. J.

MILLENNIUM. [ADVENT, SECOND.]

MILLET. [DOCHAN.]

MILLO (מִלּוֹ; Sept. ἀκρα). This word denotes 'fulness,' and is applied to a mound or rampart, probably as being filled up with stones or earth. The def. art. is always prefixed, 'The

Millo.' It is the name given to part of the citadel of Jerusalem, probably the rampart (2 Sam. v. 9; 1 Kings ix. 15, 24; xi. 27; 1 Chron. xi. 8; 2 Chron. xxxii. 5). In the last of these texts the Sept. has τὸ ἀνάστημα τῆς πόλεως, 'the fortification of the city of David.' Sepp places this fort at the extreme north of the city, on the site of the *Mulawieh* mosque, near the Damascus gate (*Jerusalem and the Holy Land*, pt. ii.)

MILLO, HOUSE OF (מִלּוֹ בֵּית). 1. (Sept. ὁ οἶκος Βηθμαάλω; Alex. οἶκος μαάλλων), a family or sept mentioned along with the men or chiefs of Shechem (Judg. ix. 6, 20). 2. (Sept. οἶκος Μαάλω) The place where Joash was slain (2 Kings xii. 20). This is probably the Millo of the preceding article.

#### MINCHA. [OFFERINGS.]

MINES. That the Hebrews were acquainted with methods of extracting ore from the bowels of the earth seems a legitimate inference from the fact that the hills of Palestine contained veins of copper, which might be obtained by digging (Deut. viii. 9); and from the fact that they possessed metals in such abundance as could be supplied only by means of mines. There is, however, no reference in Scripture to mining operations, unless such be found in Job xxviii. 1-11. This is a passage not free from serious difficulties as to its meaning; but it is on the whole most probable that the passage contains an allusion to mining. The taking of iron from the earth, the forming of subterranean passages and galleries, and the diverting of the waters so as to prevent their bursting in and overwhelming the works, all seem to point to operations such as those of the mines. Still the allusion is by no means certain; and even if it be admitted, it still remains doubtful whether what the speaker here describes can be applied to Palestine. [METALS.]—W. L. A.

MINISTER, one who acts as the less (from *minus* or *minor*) or inferior agent, in obedience or subservience to another, or who serves, officiates, etc., as distinguished from the master, *magister* (from *magis*), or superior. The words so translated in the O. T. are מִשְׁתָּר (Chald.), and in the N., διάκονος, λειτουργός, and ὑπηρέτης. 1. מִשְׁתָּר, 'Moses and his minister Joshua' (Exod. xxiv. 13); Sept. παρεστῆκώς αὐτῷ; Aquila and Symm. ὁ λειτουργός αὐτοῦ; comp. Exod. xxxiii. 11 (Sept. θεράπων Ἰησοῦς); Num. xi. 28; Josh. i. 1 (Sept. ὑπουργός Μωυσῆ; Alex. λειτουργός). This Hebrew word is clearly distinguished from עֲבָד, which is the more comprehensive term for servant (1 Kings x. 5), 'Solomon's servants and ministers,' where the Sept. reads παῖδων for the former, and λειτουργῶν for the latter. It is applied to Elisha as minister to Elijah, 2 Kings vi. 15 (Sept. λειτουργός); comp. 2 Kings iii. 11; 1 Kings xix. 21. Persons thus designated sometimes succeeded to the office of their principal, as did Joshua and Elisha. The word is applied to the angels, Ps. ciii. 21 (λειτουργοί); comp. Ps. civ. 4; Heb. i. 7; and see Stuart's *Comment.* in loc. Both the Hebrew and Sept. words are applied to the Jews in their capacity as a sacred nation, 'Men shall call you the ministers of our God' (Is. lxi. 6); to the priests (Jer. xxxiii. 21; Ezek. xlv. 11; xlv. 4; Joel i. 9). The Greek word is continued in the

same sense in Luke i. 23, and applied to Christian teachers, Acts xiii. 2; Rom. xv. 16; and to Christ, Heb. viii. 2; to the collectors of the Roman tribute, in consequence of the divine authority of political government, 'they are God's ministers' (λειτουργοί). It was applied by the Athenians to those who administered the public offices (λειτουργοί) at their own expense (Boeckh, *Staatshaush. der Athener*. i. 480; ii. 62; Potter's *Gr. Ant.* i.

85. 2. פִּלְהִי (Chald.), Ezra vii. 24, 'ministers' of religion, λειτουργοίς (comp. פִּלְהִי, ver. 19), though he uses the word מִשְׁתָּרִים in the same sense, ch. viii. 17. 3. The word διάκονος, 'minister,' is applied to Christian teachers, 1 Cor. iii. 5; 2 Cor. iii. 6; vi. 4; xi. 23; 1 Thess. iii. 2; to false teachers, 2 Cor. xi. 15; to Christ, Rom. xv. 8, 16; Gal. ii. 17; to heathen magistrates, Rom. xiii. 4; in all which passages it has the sense of a minister, assistant, or servant in general, as in Matt. xx. 26; but it means a particular sort of minister, 'a deacon,' in Philip. i. 1; 1 Tim. iii. 8, 12. The term διάκονοι denotes among the Greeks a higher class of servants than the δούλοι (Athen. x. 192; B. comp. Xen. *l. c.* Buttm. *Lexic.* i. 220; comp. Matt. xxii. 13, and Sept. for מִשְׁתָּר, Esth. i. 10; ii. 2; vi. 3). 4. ὑπηρέτης is applied to Christian ministers, Luke i. 2; Acts xxvi. 16; 2 Cor. iv. 1. Josephus calls Moses τὸν ὑπηρέτην Θεοῦ, *Antiq.* iii. 1. 4. Kings are so called in Wisd. vi. 4. The word denotes, in Luke iv. 20, the attendant in a synagogue who handed the volume to the reader, and returned it to its place. In Acts xiii. 5 it is applied to 'John whose surname was Mark,' in his capacity as an attendant or assistant on Barnabas and Saul. It primarily signifies an under-rower on board a galley, of the class who used the longest oars, and consequently performed the severest duty, as distinguished from the θρανίτης, the rower upon the upper bench of the three, and from the οἱ ναῦται, sailors, or the ἐπιβάται, marines (Dem. 1209, 11; 14; comp. also 1208. 20; 1214. 23; 1216. 13; Pol. i. 25. 3): hence in general a hand, agent, minister, attendant, etc.—J. F. D.

#### MINNI. [ARMENIA.]

MINNITH (מִנִּית), a town in the country of the Ammonites (Judg. xi. 33), celebrated for the excellence of its wheat, which was exported to the markets of Tyre (Ezek. xxvii. 17). It still existed in the age of Eusebius, four Roman miles from Heshbon, on the road to Philadelphia (*Onomast.* in *Μενσήθ*). The Sept. seem to have found difficulty in this name. In Judg. xi. 33 they substitute the name of the Arnon, and in Ezek. xxvii. 17 they render it by μύρον, 'myrrh.'—J. K.

MINSTREL. The English word minstrel represents the French word *ménestrel*, which is itself a diminutive of *ministre*, and is applied to the class of persons who *administered* to the amusement of their patrons by their skill in music and poetry. Chaucer uses the word *minister* in the sense of minstrel in his *Dreame* (Richardson, *sub voce*, and Du Cange, *Gloss.*) The class of minstrels had in mediæval times a social position almost akin to the bards and scalds whose *Sagas* they sung and whose inspiration they imitated at humble distance. Musical sound has been an accompaniment of religious worship in all countries. The expert player on the musical instrument has been associated with the possessor of yet higher faculties (see Wilkin-

son's *Ancient Egyptians*, chap. ii., and representations of Harpers in the tomb of Rameses III., Thebes; Müller's *Hist. of Greek Literature*, chap. xii.) The 'pleasant voice and lovely song,' and the art of 'playing well on an instrument,' were associated with the functions of prophecy (Ezek. xxxiii. 31-33). Various passages of Holy Scripture show that the skillful performance of sacred music formed a large portion of the education of the sons of the prophets; 1 Sam. x. 5—'Thou shalt meet a company (*χορος*) of prophets coming down from the high place, with a psaltery, a tabret, a pipe, and a harp *before them* [MUSIC AND MUSICAL INSTRUMENTS; PROPHET], and they shall prophesy.' It is not certain whether the prophets were here distinct from the players on instruments, but most probably they were the same individuals as those of whom we read elsewhere, that they 'should prophesy with harps, with psalteries, and with cymbals' (1 Chron. xxv. 1); that they resembled 'the sons of Asaph, of Heman, and of Jeduthun, who should prophesy with a harp, according to the order of the king, to give thanks and to praise the Lord' (see also ver. 6, 7). In this passage the performance of sacred song and of choral music in the temple received the exalted designation of prophecy. Sacred music, 'a joyful noise unto the Lord,' and 'thanksgiving to the Lord upon an instrument of ten strings, and upon the psaltery' (Ps. lvi. 1; lxxvii. 7; xcii. 1-3; c. 1), were characteristics of close communion with God. The effect produced upon the auditors is described (1 Sam. x. 6) as being in that instance very remarkable—Saul is assured that when he hears the prophetic minstrelsy, 'the Spirit of the Lord will come upon him, he shall prophesy with them and be turned into another man.' See ver. 11, and comp. 1 Sam. xix. 20-24, the account of the prophets being instructed by Samuel, and the effect of the holy song under the influence of the Spirit of God upon Saul's messengers, and afterwards upon Saul himself. Saul is thus seen to be peculiarly accessible to the highest influences of music, and hence the advice tendered to him by his servants (1 Sam. xvi. 16), 'Seek out a man who is a cunning *player* on a harp, and it shall come to pass that when the evil spirit from God is upon thee, that he shall play with his hand and thou shalt be well.' The participial form מְנַחֵם (from נָחַם, a verb in piel, which is used of striking

the strings of a musical instrument) is here translated 'a player,' and in 2 Kings iii. 15, 'minstrel.' The effect produced on Saul will be discussed elsewhere. The custom of applying such remedy to mental disturbance may be traced in other writings. Thus Quintil. (*Instit. Orat.*, lib. ix. chap. 4) says, 'Pythagoreis moris fuit, cum somnum petenter ad lyram prius lenire mentes, ut si quid fuisset turbidiorum cogitationum componerent' (comp. Plutarch, *De Musica*, and Aristotle, *Pol.*, lib. viii. chap. 5; Apollonius Dyscolos, *de Miris*, quoted by Grotius *in loco*, *larys ἡ κατάλυσος τῆς διαβολῆς ἐκτάσεις*. See also *King Lear*, act ii. sc. v., where music is used to bring back the wandering mind of Lear). Josephus (*Antiq.* vi. 8. 2), in his account of the transaction, associates the singing of hymns by David with the harp-playing, and shows that though the tragedy of Saul's life was lightened for a while by the skillful minstrelsy of David, the raving madness soon triumphed over

the tranquillizing influence (comp. 1 Sam. xviii. 10; xix. 10). In many references of Holy Scripture the minstrel and the prophet appear to be identical, and their functions the same; but in 2 Kings iii. 15 their respective functions are clearly distinguished. The prophet Elisha needed the influence of 'the minstrel' to soothe the irritation occasioned by the aggravating alliance of Israel with Judah. Not until this was effected would the prophetic influence guide him to a sound vaticination of the duty and destiny of the allied forces. The minstrelsy was produced, according to *Procopius*, by a Levite, who sung the Psalms of David in the hearing of the prophet; if so, he was thus the means of producing that condition of mind by which the prophet was lifted above the perceptions of his senses, and the circumstances which surrounded him, into a higher region of thought, where he might by divine grace penetrate the secret purposes of God. Josephus (*Antiq.* ix., chap. iii. sec. 1) refers to the circumstance in these words—*πρὸς τὸν ψαλλόντα ἐνθεὸς γερόμενος*. Various interpretations have been offered, and reasons assigned for the demand of Elisha. Rabbi Solomon states that the Spirit of God had receded from Elisha on account of his excessive grief at the departure of Elijah, because the Spirit of God will not dwell in a gloomy soul. Ephraem Syrus suggests that he wished for the music of the minstrel to arrest the attention of the multitude. The references given above to the power and dignity of song may sufficiently explain the occurrence. The spiritual ecstasis was often bestowed without any means, but many instances are given of subordinate physical agencies being instrumental in its production (Ezek. ii. 2; iii. 24; Is. vi. 1; Acts x. 9, 10; Rev. i. 9, 10).

The word minstrel is used of the *αἰλητάς* who in Matt. ix. 23 are represented as mourning and making a noise on the death of Jairus' daughter. The custom of hiring mourners at the death of friends is seen on Etruscan amphore, tombs, and bas-reliefs (see Dennis' *Etruria*, vol. i. p. 295, ii. 344, 354, where music was considered appropriate; and Wilkinson, *Ancient Egyptians*, ii. p. 366-373). Skill in lamentation (Amos v. 16; Jer. ix. 17) was not necessarily skill in playing on the pipe or flute, but probably included that accomplishment. [MOURNING.]—H. R. R.

#### MINT. [HEDUOSMON.]

MINTERT, PETER, a minister of the gospel for many years in Heerle in Holland, but chiefly noteworthy here for his great learning as a Biblical scholar and theologian. He died about the beginning of the 18th century. His principal work was the *Lexicon Græco-Latinum in Novum Testamentum Jesu Christi; cum Præfatione J. G. Prütii*, 4to, Francof. 1728. There was no better lexicon than this of Mintert previous to the publication of Schleusner's *Novum Lexicon*. It is valuable for its numerous references to the Hebrew Scriptures and the Septuagint; and is helpful as a concordance as well as a lexicon to the student of the Greek N. T.—W. J. C.

MIRACLES. Three words are employed in the N. T. to denote, from different points of view, the supernatural works performed by Christ and his apostles—*τέρατα*, properly translated *miracles* or *wonders*; *σημεῖα*, *signs*; and *δυνάμεις*, *powers* or *mighty works*. Sometimes all three are used in

conjunction; as by St. Peter in relation to Christ (Acts ii. 22), by St. Paul in describing the signs of an apostle (2 Cor. xii. 12), and again by St. Paul in speaking of the revelation of the Man of Sin (2 Thes. ii. 9), where, however, the special character of the works is marked by the addition of the epithet 'lying wonders' (τέρας ψεύδους).<sup>\*</sup> It may be observed, however, that none of these words necessarily implies either the supernatural origin or the religious purpose of the phenomena so called: these, when implied at all, are to be gathered from the context, or inferred from the nature of the acts themselves, but are not distinctly or exclusively expressed in the signification of the name. The word *τέρας* is expressive of the astonishment produced by an extraordinary phenomenon in the mind of the spectator, but does not necessarily imply that the phenomenon itself is of a supernatural kind; and it is used in the Septuagint, like the Hebrew מֹפֶת, not only of miracles properly so called, but sometimes also of acts astonishing, but not necessarily supernatural (Deut. xxviii. 46; Is. xx. 3; Ezek. xii. 6). The word σημεῖον, even in its religious application, as denoting a sign of the presence and working of God, does not necessarily imply that the significant fact is itself supernatural, or even extraordinary; on the contrary, many of the Scripture signs, as has been pointed out by Archbishop Trench, are in themselves natural and common events, though employed by God for a special purpose. And finally, the word δύναμις, though applied in an especial sense to those mighty works by which the power of God is manifested in a more striking and remarkable manner than in the ordinary course of nature, yet is in itself applicable to the divine power in its ordinary as well as in its extraordinary exercise, and to the powers of other agents, whether natural or supernatural.

On the other hand, the modern use of the word *miracle* implies, as an essential part of its signification, that the phenomenon so called is, if not contrary to nature, at least beyond and above nature. The whole meaning of the controversy on the possibility of miracles rests on the assumption that a miracle necessarily implies something supernatural. 'A miracle,' says Hume, 'may be accurately defined, a transgression of a law of nature by a particular volition of the Deity, or by the interposition of some invisible agent.' 'A miracle,' says Bishop Butler, 'in its very notion, is relative to a course of nature, and implies somewhat different from it, considered as being so.' 'A miracle,' says Bishop Douglas, 'is an event brought about in a way contrary to the course of nature.' And recently Archbishop Trench, while justly objecting to the language which describes the miracles as *unnatural* or *against nature*, at the same time distinctly admits that they are *beyond* and *above* nature, and that 'ought which is perfectly explicable from the course of nature and history, is assuredly no miracle in the most proper sense of the word.' Citations to the

same effect might be added from many other writers, but the above are sufficient to show that, in the language of modern theology, the word *miracle* has acquired a distinct and precise implication of the supernatural—an implication which was not necessarily involved in the meaning of the names by which the same events are called in Scripture.

This diversity of language may be regarded as indicating, not indeed a different estimate of the miracles themselves, but a different state of the controversy concerning them. To doubt the possibility of supernatural powers in general, is a form of unbelief that did not enter into the minds of the earliest opponents of Christianity. To them it was a more plausible subterfuge to say, 'He casteth out devils through Beelzebub,' than to assert that a natural disease had been healed by natural means. The supernatural character of our Lord's miracles was not called in question; the doubt raised was only as to the interpretation to be put upon them, or the conclusion to be drawn from them. Hence, in the language of Scripture, the stress is laid, not on the *supernatural*, but on the *significant* character of the miracles. They are not merely wonderful or mighty works, but they are works of such a kind as to be signs and tokens of God's power, as distinguished from that of every other being—works such as no man can do except God be with him.

If the controversies of later times have brought the supernatural character of the miracles into greater prominence, it is not because the divine element is comparatively neglected, but because it is more clearly seen to be in this case identified with the supernatural. As the conception of a fixed order of nature, and of the extreme rarity of deviations from that order, became gradually established in men's minds, the exceptional character, in this respect, of the gospel-narrative necessarily acquired greater significance; and when scepticism, adapting its mode of attack to the current ideas of its age, proceeded on this ground to deny the credibility of the narrative itself, it was seen that the whole truth of the Christian revelation was really involved in the issue. To say that the miracles of Christ are credible only if they can be explained as natural events, is in effect to say that they were human acts wrought by human means, and thus to destroy their significant character as tokens of God's presence. And when to this is added the consideration that our Lord himself expressly appeals to his miracles as wrought by the finger of God, and so bearing witness that God had sent him, it becomes clear that the moral, as well as the sensible evidences of Christianity, are concerned in the decision of the question, and that our entire belief in Christ is overthrown if the supernatural character of his miracles is denied. Under these circumstances it was natural that so important a controversy concerning the nature of the thing should have its influence in modifying and fixing the meaning of the word; and that a name, which in its etymology and original use denoted merely a wonderful or astonishing work, should finally be limited to those works which are regarded as exceptions to the established course of nature. Accepting this as the proper signification of the term *miracle* in its present use, let us endeavour to ascertain with somewhat more precision the nature of the events denoted by it.

A very slight observation of the phenomena of

<sup>\*</sup> Archbishop Trench, from whom the substance of this remark is taken, also observes, that the miracles are by St. John frequently called simply *works* (ἔργα). It may be doubted, however, whether in this case the word can be properly said to be synonymous with the others. The peculiar character of the works is in this case rather implied in the context than expressed by the term.

the visible world is sufficient to indicate a division of them into two great classes—those which are produced by the action of mind, and those which are produced by the action of matter; those in which human volition is exercised, and those in which it is not. The fact that such a distinction exists is acknowledged by the universal language of mankind. It is acknowledged even in those ingenious theories which have been framed to deny or to explain it away, and whose very ingenuity testifies to the stubborn vitality of the fact of consciousness against which they are directed. Explain or evade it as we may, the fact is unquestionable, that there are some phenomena of nature which we regard as dependent on the regular action of material causes, which have been in operation from the beginning of the present state of things, and which will continue in operation so long as that state of things is permitted to last; and that there are other phenomena which we regard as dependent upon the free action of man, which may take place or not according as he wills to act or to forbear, and which, having once taken place, may or may not take place again, according to the free choice of man to bring them about or not. No amount of argument will persuade a man who has a stone in his hand, and feels that it is in his power to throw it or not as he pleases, that the throwing of that stone is as much a part of the fixed order of the universe as the alternations of day and night, or of summer and winter. The distinction in no degree depends upon the frequency or rarity of the phenomena. The aloe, which flowers once in a century, or the comet that returns after 600 years, is as much a part of the regular order of nature as the blossoming of the rose or the phases of the moon: the work which a man does every day is as much a part of his voluntary action, as that which he performs only once in his life. The difference is one of kind, not of degree: the phenomena of the one class are regarded as necessary, those of the other as contingent; the one are supposed to take place regularly by virtue of certain established laws of nature, the other are supposed to take place occasionally by the free interposition of a personal agent.

In endeavouring to apply an analogous distinction to the conception of a miracle, as compared with that of a natural phenomenon, we must be careful not to press the analogy beyond the point to which it may be fairly extended. An apparent objection meets us at the outset. It is true, it may be urged, that to have any conception of God at all we must conceive him as a person, and personality necessarily implies will and the power of free action according to that will. But the will of God is manifested in the regular order of the universe no less than in departures from that order. There is a broad and marked contrast between those necessary phenomena of the world which take place independently of man, and those contingent phenomena which are brought about by a direct interposition of human will; but no such contrast can be supposed to exist in relation to the Being on whom the whole world is dependent. If, then, all the sensible phenomena of the universe are alike manifestations of the divine will, what room, it may be asked, is there for any special interposition of that will, such as man exerts in a world which is not dependent on him, and which he can only partially control?

In answer to this objection it may be observed, first, that the distinction between the general and the special action of God's will is a distinction not relative to God, but to man; and, secondly, that it is proposed, not as an explanation of the mode in which miracles *must* or *do* take place, but only as suggesting a mode in which they *may* take place, and thus as answering the objection which denies that they *can* take place at all. For, first, the miracle is not supposed to be anything special or exceptional in the sight of God. It is as much foreseen and fore-ordained by him, is as much a part of his eternal purpose from the beginning, as the most ordinary natural occurrence; but it differs from ordinary occurrences in the manner in which it is manifested to us; and these modes of manifestation are, relatively to us, the ground of a valid distinction in our conceptions of the divine activity.

We do not see the operation of the divine mind upon the material world in itself, but only in its effects; and it is from a difference in the effects that we infer an analogous difference in the mode of causation. And, secondly, this distinction is not proposed as an argument to prove the *necessity* or the *reality* of miracles; but only to obviate a preliminary objection against their *possibility*, and thus to clear the way for an examination of their proper evidence. We may have no right to assume, as is perhaps implied in some definitions, that a miracle *is* the effect of a determination of the divine will immediately preceding; for it may be brought about in many other ways of which we have no conception: we only say that, for aught we know to the contrary, it *may* be brought about in such a way; and if it may be brought about in any way, it is not impossible. Still less have we a right to say that the normal phenomena of the world are the effect, not of the divine will, but of material forces left to their own action; for we do not know that matter ever is left to its own action, nor whether, if so left, it would possess any force at all. But we may have evidence which warrants us in saying that it has pleased God, on certain occasions, to exert his power in a manner different from that in which he exerts it in the ordinary government of the world; the difference being indicated by a diversity in the visible results. In his ordinary government he so acts as to exhibit as the result a fixed and necessary series of material causes and effects: in his extraordinary interpositions he so acts as to bring about at a particular time a particular phenomenon which does not form part of the same necessary series. And as the nearest, indeed the only, parallel to this diversity, within the field of our own experience, is that furnished by the free action of the human will, the language furnished by this analogy is the most appropriate that can be employed by us to express the processes of the infinite mind in a manner intelligible by finite minds.

In our present ignorance of the manner in which the action of the regular forces of nature is carried on, and of the means by which exceptions are brought about, it is perhaps not possible to frame any definition of a miracle which shall not be open to objections. Thætetus, in the dialogue which bears his name, being asked to give a definition of science, replies that geometry and astronomy and music are sciences, and is told by Socrates that he has given many sciences instead of one. Yet there are cases in which the many, however philosophically

defective, furnishes for practical purposes a more satisfactory account than the one. No man doubts that to raise the dead to life, to heal the sick by a word spoken at a distance, to still a tempest by rebuking it, are miracles; though he may not be able to frame a general definition which shall include under it these and all other miracles, conceivable as well as actual. The most that we can hope to do is to explain what a miracle *is not*; and, in order to do this, we must inquire what is meant by that *course of nature* to which miracles are said to be an exception.

Two kinds of natural causes come within the field of our experience; physical or necessary causes—to which class belong all the material conditions requisite to the occurrence of a sensible change; and efficient or free causes—of which the only instance directly perceived is found in the power of voluntary action possessed by ourselves as personal agents. For our present purpose, it is not necessary to enter upon the abstruse metaphysical questions connected with this subject, such as the determination of the difference between physical and mathematical necessity; the inquiries whether *action* can properly be attributed to matter; whether there is anything in the relation of a material cause to its effect analogous to *power* as exerted by conscious agents; whether material causation implies anything more than invariable sequence, etc. We shall merely assume what is implied in the conception of an uniform system of nature; that in material causation every event is determined to take place through some antecedent phenomenon, or group of phenomena, from which it invariably follows; and we shall assume also that by *natural events* are meant such as take place either through this causation or by an exercise of human will. If, therefore, any event takes place in the world which is neither the result of such a series of necessary antecedents, extending back to the beginning of the present state of things, nor produced by the will of a human agent, such an event is supernatural or miraculous.\*

\* Johnson defines a miracle in the theological sense as 'an effect above human or natural power, performed in attestation of some truth.' If we omit the latter clause, which—though it may be true as a fact of the Scripture miracles—does not appear to be essential to the notion of a miracle, this definition is perhaps as satisfactory as any that can be suggested, and might have been adopted in the text, were it not that a cavil might possibly be raised on account of the want of precision in the term *power* as applied to material agents. It might be objected that a miracle may be above the powers of material agents in their normal relations to each other, as determined by the uniform course of nature, but need not be above the powers of the same agents, supposing that by some extraordinary interposition they were placed in abnormal relations. On this account, the series of antecedents and consequents, which constitutes the course of nature, has been expressly mentioned in the text. Bishop Marsh (*Lectures on the Authenticity and Credibility of the N. T.*, lect. viii.) objects to Johnson's definition as not excluding the agency of beings superior to man, though subordinate to God. He prefers to define a miracle as 'something which cannot be performed without the special interference of God himself.' But even if we deny—as,

The want of precision in this statement is partly owing to the fact that we are unable to say at what point in the chain of antecedents the supernatural power will be exerted, nor at what subsequent point the effect will become visible. Before the establishment of a course of nature, nothing is miraculous; for a miracle, as Bishop Butler has observed, is in its very notion relative to a course of nature, and implies somewhat different from it. The introduction of any new power into nature after the settlement and during the continuance of its course, would be a miracle; but it by no means follows that the phenomenon in which the effect of that power first becomes visible may not be directly brought about by the action of material causes. If a man brings certain chemical elements into combination with each other, and thus produces an effect which, without that combination, would not have taken place, the effect itself is the immediate result of the natural action of the elements; but the operation which brought those elements together is a voluntary act, not included in the general course of nature. Now, if a being of power superior to man were to bring about a similar combination of elements beyond the reach of man's control, the result would be miraculous, but the action of the elements themselves would be according to natural law. We do not say that such is the actual manner in which miracles have taken place, but only that such an occurrence is conceivable, and that an event conceived as taking place in this way is conceived as miraculous.

Hence, when we say that a miracle is not the result of a series of necessary antecedents, we do not therefore imply that it has no physical conditions, but only that it would not have taken place without some addition to those conditions beyond what takes place in natural causation. We deny, therefore, that the antecedents are the *sufficient reason* of the miracle, in the same way and to the same extent as they are of natural events. But in saying this we do not imply that the miracle is an event without a cause. It is the effect of a supernatural cause, as ordinary events are the effects of natural causes. There is nothing incredible in the supposition of such a supernatural cause—at least to those who believe in a God who, though working in the world, is yet distinct from the world. The possibility of miracles in general (we are not speaking of the evidence for or against the actual occurrence of a particular miracle) is not more incredible than the possibility of creation at all. Those who believe that the world was created in time, do not therefore believe that God, before the creation, existed in an eternity of idleness. Personal existence is itself an activity; and if there was a personal God before the creation of the world, there was also a divine action before the creation of the world. In creating the world, therefore, God did not begin to act, but entered on a different mode of action. If a new exertion of divine power was possible then, it is equally possible at any subsequent time.

The same imperfection of our knowledge, which is a hindrance to us when we attempt to form an

perhaps, we are justified in doing—that supernatural effects ever have been produced by the agency of created spirits, still there seems no sufficient ground for denying that such effects, if *produced*, would be miracles.

exact definition of a miracle, and to explain the manner in which it may be conceived to take place, becomes rather an auxiliary when we confine ourselves to the humbler task of answering those objectors who dogmatically pronounce that miracles are impossible. To meet such objectors, it is by no means necessary that we shall be able to state the manner in which miracles *are* wrought; it is sufficient if we can point to some manner in which they *may be* wrought, without being liable to, or notwithstanding, the objections alleged against them. Before proceeding to speak of the positive evidences on which the belief in miracles properly rests, it may be well to notice a few of these objections, the purpose of which is to preclude the admission of evidence at all, on the ground of the impossibility, or utter incredibility, of the thing to be proved.

The best known and the most frequently repeated of this class of objections is that of Hume:—‘A miracle,’ he says, ‘is a violation of the laws of nature; and as a firm and unalterable experience has established these laws, the proof against a miracle, from the very nature of the fact, is as entire as any argument from experience can possibly be imagined.’ According to the view that has been taken in the preceding remarks, it cannot with any accuracy be said that a miracle is ‘a violation of the laws of nature.’ It is the effect of a supernatural cause, acting along with and in addition to the natural causes constituting the system of the world. It is produced, therefore, by a different combination of causes from that which is at work in the production of natural phenomena. The laws of nature are only general expressions of that uniform arrangement according to which the same causes invariably produce the same effect. They would be violated by the production, at different times, of different effects from the same cause; but they are not violated when different effects are produced from different causes. The experience which testifies to their uniformity tells us only what effects may be expected to follow from a repetition of the same cause; it cannot tell us what effects will follow from the introduction of a different cause. This, which is in substance the answer given to Hume by Brown, appears the most satisfactory among the various arguments by which the sceptical philosopher’s position has been assailed.

In support of this argument, however, it will be necessary to meet another objection, advanced by a philosopher of a very different spirit from Hume, but which is equally incompatible with any belief in a real miracle. ‘A miracle,’ says Schleiermacher, ‘has a positive relation, by which it extends to all that is future, and a negative relation, which in a certain sense affects all that is past. In so far as that does not follow which would have followed, according to the natural connection of the aggregate of finite causes, in so far as an effect is hindered, not by the influence of other natural counteracting causes belonging to the same series, but notwithstanding the concurrence of all effective causes to the production of the effect. Every thing, therefore, which from all past time contributed to this effect, is in a certain measure annihilated; and instead of the interpolation of a single supernatural agent into the course of nature, the whole conception of nature is destroyed. On the positive side, something takes place which is

conceived as incapable of following from the aggregate of finite causes. But, inasmuch as this event itself now becomes an actual link in the chain of nature, every future event must be other than it would have been had this one miracle not taken place.’ On this and other grounds, Schleiermacher is led to maintain that there is no real distinction between the natural and the supernatural; the miracles being only miraculous relatively to us, through our imperfect knowledge of the hidden causes in nature, by means of which they were wrought.

This objection proceeds on an assumption which is not merely unwarranted, but actually contradicted by experience. It assumes that the system of material nature is a rigid, not an elastic system; that it is one which obstinately resists the introduction of new forces, not one which is capable of adapting itself to them. We know by experience that the voluntary actions of men can be interposed among the phenomena of matter, and exercise an influence over them, so that certain results may be produced or not, according to the will of a man, without affecting the stability of the universe, or the coherence of its parts as a system. What the will of man can effect to a small extent, the will of God can surely effect to a greater extent: and this is a sufficient answer to the objection which declares the miracle to be *impossible*; though we may not be able to say with certainty whether it is actually brought to pass in this or in some other way. There may be many means, unknown to us, by which such an event may be produced; but if it can be produced in any way it is not impossible.

Another objection, urged by Spinoza, and repeated in various forms by subsequent writers, may be stated as follows:—The laws of nature are the decrees of God, and follow necessarily from the perfection of the divine nature; they must, therefore, be eternal and immutable, and must extend to all possible events. Therefore, to admit an exception to these laws, is to suppose that God’s order is broken, and that the divine work is but an imperfect expression of the divine will. This objection is perfectly intelligible in the mouth of a Pantheist, with whom *God and nature* are convertible terms, and a divine supernatural act is a self-contradiction; but it is untenable in any system which admits a personal God distinct from nature, and only partially manifested in it. In such a system, nature is not infinite, as Spinoza makes it, but finite. There is a distinction between the actual and the possible; between the visible world as a limited system, with limited laws, and the whole mind of God, embracing all possible systems as well as the present. From this point of view, nature, as actually existing, *does* express a portion, and a portion only, of the divine purpose; the miracle expresses another portion belonging to a different and more comprehensive system. But in addition to this consideration, even the actual world furnishes us with an answer to the objection. God’s order, we have too much reason to know, actually is broken. His will is not carried out. Unless we make God the author of evil, we must admit that sin is a violation of his will, a breach made in his natural order, however impossible it may be to give an account of its origin. The Pantheist evades the difficulty by denying that evil has any real existence; but to the Theist, who

admits the existence, it is conclusive evidence that, as a fact, however little we may understand how it can be, the world, as it exists, is not a perfect expression of God's law and will. The miracle, as thus viewed, belongs to a spiritual system appointed to remedy the disorders of the natural system; and against the self-complacent theory, which tells us that disorders in the natural system are impossible, we have the witness of a melancholy experience, which tells us that they are actually there. Thus viewed, the miracle is in one sense natural, in another supernatural. It is natural as forming a part of the higher or spiritual system; it is supernatural as not forming a part of the lower or material system.

The same considerations may serve to obviate another form of the same objection—a form in which it is likewise suggested by Spinoza, though developed by other writers in a form more adapted to the language of theism. We are told that it is more worthy of God to arrange a plan which shall provide by its original laws for all possible contingencies, than one which requires a special interposition to meet a special emergency. We know so little about the process of creating and governing a world, that it is difficult for us to judge what method of doing so is most worthy of God; but this whole objection proceeds on the gratuitous assumption that the plan of the world, as it exists in the counsels of God, must be identical with the plan of the world as it is contemplated by man in relation to physical laws. Doubtless the miracle, like any other event, was foreseen by God from the beginning, and formed part of his eternal purpose; but it does not therefore follow that it is included within that very limited portion of his purpose which is apprehended by man as a system of physical laws. To Omnipotence, no one event is more difficult than another; to Omniscience, no one event is more wonderful than another. The distinction between miracles and ordinary events, as has been already observed, is a distinction, not in relation to God, but in relation to man. Moreover, even from the human point of view, the miracle is not wrought for a physical, but for a moral purpose; it is not an interposition to adjust the machinery of the material world, but one to promote the spiritual welfare of mankind. The very conception of a *revealed*, as distinguished from a *natural* religion, implies a manifestation of God different in kind from that which is exhibited by the ordinary course of nature; and the question of the probability of a miraculous interposition is simply that of the probability of a revelation being given at all.

But we are sometimes told that if miracles are not impossible in theory, they are at least incredible in fact: that the antecedent improbability of a miracle taking place must always outweigh that of the testimony in its favour being false; and thus that the occurrence of a miracle, if not impossible, is at least incapable of satisfactory proof. Such is in the main the argument of Hume, which has recently been revived and assumed as an axiomatic principle by M. Renan. The fallacy of this objection consists in the circumstance that it estimates the opposed probabilities solely on empirical grounds; *i. e.*, on the more or less frequent occurrence of miraculous events as compared with false testimony. If it is ever possible that an event of comparatively rare occurrence may, in a given case

and under certain circumstances, be more credible than one of more ordinary occurrence, the entire argument falls to the ground in reference to such cases. And such a case is actually presented by the Christian miracles. The redemption of the world is an event unique in the world's history: it is therefore natural to expect that the circumstances accompanying it should be unique also. The importance of that redemption furnishes a 'distinct particular reason' for miracles, if the divine purpose can be furthered by them. Under these circumstances the antecedent probability is for the miracles, not against them, and cannot be outweighed by empirical inductions drawn from totally different data, relating to the physical, not to the religious condition of the world.

It must, however, be always remembered that abstract and general considerations like the above, though necessary to meet the unbelieving objections which are unhappily rife on this subject, do not constitute the grounds of our belief in the miracles of Scripture, especially those of Christ. The abstract argument is the stronghold of scepticism, and to deal with it at all it is necessary to meet it on its own ground. On the other hand, the strength of the Christian argument rests mainly on the special contents of the gospel-narrative, particularly as regards the character of the Saviour portrayed in it, and the distinctive nature of his miracles as connected with his character, and on the subsequent history of the Christian church. It is far easier to talk in general terms about the laws of nature and the impossibility of their violation, than to go through the actual contents of the gospels in detail, and show how it is possible that such a narrative could have been written, and how the events described in it could have influenced, as they have, the subsequent history of the world, on any other supposition than that of its being a true narrative of real events. And accordingly we find that, while the several attacks on the gospel miracles in particular, with whatever ability they may have been conducted, and whatever temporary popularity they may have obtained, seem universally destined to a speedy extinction beyond the possibility of revival, the general *à priori* objection still retains its hold on men's minds, and is revived from time to time, after repeated refutations, as often as the changing aspects of scientific progress appear to offer the opportunity of a plausible disguise of an old sophism in new drapery. The minute criticisms of Woolston and Paulus, on the details of the gospel history, are utterly dead and buried out of sight; and those of Strauss show plain indications of being doomed to the same fate, though supported for a while by a spurious alliance with a popular philosophy. And the failure which is manifest in such writers, even while they confine themselves to the merely negative task of criticising the gospel narrative, becomes still more conspicuous when they proceed to account for the origin of Christianity by positive theories of their own. The naturalistic theory of Paulus breaks down under the sheer weight of its own accumulation of cumbersome and awkward explanations; while the mythical hypothesis of Strauss is found guilty of the logical absurdity of deducing the premise from the conclusion: it assumes that men invented an imaginary life of Jesus because they believed him to be the Messiah, when the very supposition that the life is imaginary leaves the belief in the Messiah-

ship unexplained and inexplicable. On the other hand, the *à priori* reasonings of Spinoza and Hume exhibit a vitality which is certainly not due to their logical conclusiveness, but which has enabled them in various disguises to perplex the intellects and unsettle the faith of a different generation from that for which they were first written. And hence it is, that a writer who is required, by the exigencies of his own day, to consider the question of miracles from an apologetic point of view, finds himself compelled to dwell mainly on the abstract argument concerning miracles in general, rather than on the distinctive features which characterise the Christian miracles in particular. The latter are the more pleasant and the more useful theme, when the object is the edification of the believer; the former is indispensable when it is requisite to controvert the positions of the unbeliever. There is, however, one phase of the sceptical argument which may be met by considerations of the special rather than of the general kind. It has been objected that no testimony can prove a miracle as such. 'Testimony,' we are told, 'can apply only to apparent sensible facts; testimony can only prove an extraordinary and perhaps inexplicable occurrence or phenomenon; that it is due to supernatural causes is entirely dependent on the previous belief and assumptions of the parties.' Whatever may be the value of this objection as applied to a hypothetical case, in which the objector may select such occurrences and such testimonies as suit his purpose, it is singularly inapplicable to the works actually recorded as having been done by Christ and his apostles. It may, with certain exceptions, be applicable to a case in which the assertion of a supernatural cause rests solely on the testimony of the *spectator* of the fact; but it is not applicable to those in which the cause is declared by the *performer*. Let us accept, if we please, merely as a narrative of 'apparent sensible facts,' the history of the cure of the blind and dumb demoniac, or of the lame man at the Beautiful Gate; but we cannot place the same restriction upon the words of our Lord and of St. Peter, which expressly assign the supernatural cause—'If I cast out devils by the Spirit of God, then the kingdom of God is come unto you.' 'By the name of Jesus Christ of Nazareth doth this man stand here before you whole.' We have here, at least, a testimony reaching to the supernatural; and if that testimony be admitted in these cases, the same cause becomes the most reasonable and probable that can be assigned to the other wonderful works performed by the same persons. For if it be admitted that our Lord exercised a supernatural power at all, there is, to use the words of Bishop Butler, 'no more presumption worth mentioning against his having exerted this miraculous power in a certain degree greater, than in a certain degree less; in one or two more instances, than in one or two fewer.'

And this brings us to the consideration on which the most important part of this controversy must ultimately rest; namely, that the true evidence on behalf of the Christian miracles is to be estimated, not by the force of testimony in general, as compared with antecedent improbability, but by the force of the peculiar testimony by which the Christian miracles are supported, as compared with the antecedent probability or improbability that a religion of such a character should have been first in-

troduced into the world by superhuman agency. The miracles of Christ, and, as the chief of them all, that great crowning miracle of his resurrection, are supported by all the testimony which they derive from his own positive declarations concerning them, taken in conjunction with the record of his life, and the subsequent history of the Christian religion. The alternative lies between accepting that testimony, as it is given, or regarding the gospels as a fiction, and the Christian faith as founded on imposture.

In adopting this argument, we do not, as is sometimes said, reason in a circle, employing the character of Christ as a testimony in favour of the miracles, and the miracles again as a testimony in favour of the character of Christ. For the character of Christ is contemplated in two distinct aspects; first, as regards his human perfectness; and secondly, as regards his superhuman mission and power. The first bears witness to the miracles, the miracles bear witness to the second. When our Lord represents himself as a human example, to be imitated by his human followers, he lays stress on those facts of his life which indicate his human goodness: 'Take my yoke upon you, and learn of me; for I am meek and lowly in heart.' When, on the other hand, he represents himself as divinely commissioned for a special purpose, he appeals to the superhuman evidence of his miracles as authenticating that mission: 'The works which the Father hath given me to finish, the same works that I do, bear witness of me, that the Father hath sent me.'

It is true that the evidence of the miracles, as addressed to us, has a different aspect, and rests on different grounds, from that which belonged to them at the time when they were first performed. But this change has not diminished their force as evidences, though it has somewhat changed its direction. If we have not the advantage of seeing and hearing and questioning those who were eye-witnesses of the miracles, the deficiency is fully supplied by the additional testimony that has accrued to us, in the history of Christianity, from their day to ours. If we have stricter conceptions of physical law, and of the uniformity of nature, we have also higher evidence of the existence of a purpose worthy of the exercise of God's sovereign power over nature. If the progress of science has made many things easy of performance at the present day, which would have seemed miraculous to the men of the first century, it has also shown more clearly how inimitable and unapproachable are the miracles of Christ, in the maturity of science no less than in its infancy. And when it is objected, that 'if miracles were, in the estimation of a former age, among the chief *supports* of Christianity, they are at present among the main *difficulties* and hindrances to its acceptance,' we may fairly ask, 'What is this Christianity which might be more easily believed if it had no miracles? Is it meant that the gospel-narrative, in general, would be more easy to believe were the miracles taken out of it? The miracles are so interwoven with the narrative, that the whole texture would be destroyed by their removal. Or is it meant, that the great central fact in the apostolic preaching—the resurrection of Christ—would be more natural and credible if he who thus marvellously rose from the dead had in his lifetime exhibited no signs of a power superior to that of his fellow-men? Or is it

meant that the great distinctive doctrines of Christianity—such as those of the Trinity and the Incarnation—might be more readily accepted were there no miracles in the Scripture which contains them? We can scarcely imagine it to be seriously maintained, that it would be easier to believe that the Second Person of the Divine Trinity came on earth in the form of man, were it also asserted that, while on earth, he gave no signs of a power beyond that of ordinary men. In short, it is difficult to understand on what ground it can be maintained that the miracles are a hindrance to the belief in Christianity, except on a ground which asserts also that there is no distinctive Christianity in which to believe. It may with more truth be said, that the miraculous element, which forms so large a portion of Christianity, has its peculiar worth and service at the present day, as a protest and safeguard against two forms of unchristian thought to which an intellectual and cultivated age is liable—pantheism, the danger of a deeply speculative philosophy; and materialism, the danger of a too exclusive devotion to physical science. Both these, in different ways, tend to deify nature and the laws of nature, and to obscure the belief in a personal God distinct from and above nature; against both these, so long as the Christian religion lasts, the miracles of Christ are a perpetual witness; and in so witnessing they perform a service to religion different in kind, but not less important than that which they performed at the beginning.

The miracles of the O. T. may be included in the above argument, if we regard, as Scripture requires us to regard, the earlier dispensation as an anticipation of and preparation for the coming of Christ. Many of the events in the history of Israel as a people are typical of corresponding events in the life of the Saviour; and the earlier miraculous history is a supernatural system preparing the way for the later consummation of God's supernatural providence in the redemption of the world by Christ. Not only the occasional miracles of the O. T. history, but, as Bishop Atterbury remarks, some of the established institutions under the law—the gift of prophecy, the Shechinah, the Urim and Thummim, the Sabbatical year—are of a supernatural character, and thus manifest themselves as parts of a supernatural system, ordained for and leading to the completion of the supernatural in Christ.

A question has sometimes been raised, chiefly with a view to disparaging the value of miracles as evidences of a religion, whether it is not possible that miracles may be wrought by evil spirits in support of a false doctrine. The question, so far as it affects us at present, is rather a theme for argumentative ingenuity than an inquiry of practical importance. In relation to the Christian evidences, the only question that can practically be raised is whether the Scripture miracles—supposing them not to be pure fabrications—are real miracles wrought by divine power, or normal events occurring in the course of nature, or produced by human means. The possibility of real miracles other than divine is a question rather of curiosity than of practical value. An able discussion of this subject will be found in Farmer's Dissertation, though the author has weakened his argument by attempting too much. So far as he undertakes to show that there is no sufficient evidence that miracles actually have been wrought by evil spirits in behalf of a

false religion, his reasoning is logical and satisfactory, and his treatment of the supposed miracles of the Egyptian magicians is in this respect highly successful. But when he proceeds from the historical to the theological argument, and maintains that it is inconsistent with God's perfections that such miracles ever should be wrought, he appears to assume more than is warranted either by reason or by Scripture, and to deduce a consequence which is not required by the former, and appears difficult to reconcile with the latter. That there may be such a thing as 'the working of Satan, with all power, and signs, and lying wonders,' and that such working will actually be manifested before the last day in support of Antichrist, is the natural interpretation of the language of Scripture. That such a manifestation has as yet taken place is, to say the least, a conclusion not established by existing evidence. What will be the criterion of such miracles, should they hereafter be exhibited, and what amount of temptation they will be permitted to exercise over men, are questions which, with our present knowledge, it will be the wisest course not to attempt to answer.

A more practical question is that which relates to the means of distinguishing between true and false miracles, meaning by the latter term, phenomena pretended to be miraculous, but in fact either natural events or human impostures or fabrications. Various rules for distinguishing between these have been given by several authors, the best known being the four rules laid down in Leslie's 'Short and Easy Method with the Deists,' and the three given in Bishop Douglas's 'Criterion,' and to some extent the six given by Bishop Stillingfleet in Bk. ii., ch. 10 of *Origines Sacrae*; to which may be added the very acute observations of a similar kind in a work remarkably differing from a later publication by the same author, 'The Life of Apollonius Tyaneus,' by J. H. Newman, published in the 'Encyclopædia Metropolitana.' Yet the practical value of these rules, though considerable as compared with the inquiry previously noticed, is available rather for particular and temporary phases of controversy than for general and perpetual edification. A more permanent principle in relation to this question is suggested by Leslie in his remarks on the pretended miracles of Apollonius, where he shows that the assumed miracles, even if admitted, have no important connection with our belief or practice. 'But now,' he says, 'to sum up all, let us suppose to the utmost that all this said romance were true, what would this amount to? Only that Apollonius did such things. What then? What if he were so virtuous a person as that God should have given him the power to work several miracles? This would noways hurt the argument that is here brought against the Deists, because Apollonius set up no new religion, nor did he pretend that he was sent with any revelation from heaven to introduce any new sort of worship of God; so that it is of no consequence to the world whether these were true or pretended miracles; whether Apollonius was an honest man or a magician; or whether there ever was such a man or not. For he left no law or gospel behind him to be received upon the credit of those miracles which he is said to have wrought.' To this it may be added, that there is an enormous *à priori* improbability against miracles performed without any professed object, as compared with those which

belong to a system which has exercised a good and permanent influence in the world. This improbability can only be overcome by a still more enormous mass of evidence in their favour; and until some actual case can be pointed out, in which such evidence exists, the unimportance of a reported series of miracles is a valid reason for withholding belief in them. The Scripture miracles in this respect stand alone and apart from all others, as regards the evidence of their reality combined with their significance if real.

Among works of importance written specially on the subject of the Scripture miracles, besides those which incidentally notice it in connection with a more general treatment of theology or Christian evidences, may be mentioned the following:—Fleetwood, *Essay upon Miracles*, 1701; Locke, *A Discourse of Miracles*, 1701-2; Pearce, *The Miracles of Jesus Vindicated* (in reply to Woolston), 1729; Smallbrook, *A Vindication of our Saviour's Miracles* (in reply to Woolston), 1729; Lardner, *A Vindication of three of our Blessed Saviour's Miracles* (in reply to Woolston), 1729; Sherlock, *The Trial of the Witnesses*, 1729; Douglas, *The Criterion*, 1754; Campbell, *A Dissertation on Miracles*, 1763; Farmer, *A Dissertation on Miracles*, 1771; Penrose, *A Treatise on the Evidence of the Scripture Miracles*, 1826; Le Bas, *Considerations on Miracles*, 1828; Newman, *Life of Apollonius Tyanaus*, in *Encyclopædia Metropolitana*; J. Müller, *Disputatio de Miraculorum Jesu Christi Natura et Necessitate*, Partic. I., 1839; II. 1841; Nitzsch, in *Studien und Kritiken*, 1843; Rothe, in *Studien und Kritiken*, 1858; Trench, *Notes on the Miracles of our Lord*, 6th ed., 1858; Koestlin, *De Miraculorum, quæ Christus et primi ejus discipuli fecerunt, natura et ratione*, 1860; M'Cosh, *The Supernatural in relation to the Natural*, 1862; Bushnell, *Nature and the Supernatural*, English ed., 1863.—H. L. M.

MIRIAM (מִרְיָם, bitterness; Sept. Μαριάμ; Joseph. Μαριάμ), sister of Moses and Aaron, and supposed to be the same that watched her infant brother when exposed on the Nile; in which case she was probably ten or twelve years old at the time (Exod. ii. 4, *seq.*) When the Israelites left Egypt, Miriam naturally became the leading woman among them. She is called 'a prophetess' (Exod. xv. 20). After the passage of the Red Sea, she led the music, dance, and song, with which the women celebrated their deliverance (Exod. xv. 20-22). The arrival of Moses' wife in the camp seems to have created in her an unseemly dread of losing her influence and position, and led her into complaints of and dangerous reflections upon Moses, in which Aaron joined. For this she was smitten with leprosy, and, although healed at the intercession of Moses, was excluded for seven days from the camp (Num. xii. 1; Deut. xxiv. 9). Josephus says she was the wife of Hur, and mother of Bezaleel (*Antiq.* iii. 2. 4; 6. 1). Her death took place in the first month of the fortieth year after the Exodus, at the encampment of Kadesh-barnea (Num. xx. 1), where her sepulchre was still to be seen in the time of Eusebius (*Onomast.*, s. v. Κάδδης).

MIRROR (מִרְיָה, Exod. xxxviii. 8; רִאִי, Job xxxvii. 18). In the first of these passages the mirrors in the possession of the women of the

Israelites, when they quitted Egypt, are described as being of brass; for 'the laver of brass, and the foot of it,' are made from them. In the second, the firmament is compared to 'a molten mirror.' In fact, all the mirrors used in ancient times were of metal; and as those of the Hebrew women in the wilderness were brought out of Egypt, they

355. Egyptian Metal Mirrors.

were doubtless of the same kind as those which have been found in the tombs of that country, and many of which now exist in the museums and collections of Egyptian antiquities. These are of mixed metals, chiefly copper, most carefully wrought and highly polished; and so admirably did the skill of the Egyptians succeed in the composition of metals, that this substitute for our modern looking-glass was susceptible of a lustre which has even been partially revived at the present day in some of those discovered at Thebes, though buried in the earth for so many centuries. The mirror itself was nearly round, and was inserted in a handle of wood, stone, or metal, the form of which varied according to the taste of the owner (see Wilkinson's *Ancient Egyptians*, iii. 384-386).—J. K.

MISGAB (מִשְׁגַּב, 'the high place'; Ἀμῆ; *fortis*), a name which occurs only in Jer. xlviii. 1. In pronouncing the doom of Moab, the prophet says, 'Kiriathaim is confounded and taken; *Misgab* is confounded and dismayed.' This may be a parallelism in which the word *ham-misgab*, 'the high-place' (for it has the article), is used as equivalent to, and descriptive of, Kiriathaim. So it appears to have been understood by Jerome, who translates it '*fortis*,' and others have followed him (*Critici Sacri*, ad loc.) Or it may be the name of a town so called because of its situation on the top of some hill, but whose site is unknown. Or it may be employed poetically, as it is in other parts of Scripture (Ps. cxliv. 2; Is. xxv. 12; xxxiii. 16), as a collective epithet for the fortresses of Moab.—J. L. P.

MISHAEL (מִישָׁאֵל). 1. (Sept. Μισαήλ, *Misadāh*; Alex. *Misadāh*), one of the sons of Uzziel, the uncle of Moses and Aaron (Exod. vi. 22). He, with his brother Elzaphan, was commanded by

Moses to remove the bodies of Nadab and Aohu from the camp after they had been destroyed for their presumption in offering strange fire (Lev. x. 4). 2. (Sept. *Μισαήλ*; Alex. *Μεσαήλ*), one of those who stood beside Ezra when he read the law to the people (Neh. viii. 4). 3. One of the three companions of Daniel who were cast into the burning furnace by Nebuchadnezzar, and were miraculously delivered from it (Dan. iii. 13-30). His Chaldaean name was Meshach (Dan. i. 7).—W. L. A.

# MISHAL. [MASHAL.]

MISHMA (*מִשְׁמָא*; Sept. *Μασμά*). 1. A son of Ishmael, and brother of Mibsam (Gen. xxv. 14; 1 Chron i. 30). The people called by Ptolemy (vi. 7, 21) *Μασσαιμαβελς*, who were located to the north-east of Medina, were probably descended from him. Arabic writers mention the *Beni Mishmah* (Freytag, *Hamas*, II. 1, p. 220), but nothing is known of them (Knobel, *Genes.* in loc.). 2. A son of Simeon (1 Chron. iv. 25).—W. L. A.

# MISHNAH. [TALMUD.]

MISHOR (*הַמִּישׁוֹר*; *Μισώρ*; Alex. *Μεισώρ*; also *πεδωή*; *planities* and *campestris*; A. V., *the plain*). This word is applied in Scripture to any plain or level tract of land, as in 1 Kings xx. 23, and 2 Chron. xxvi. 10; but in a number of passages it is used with the article as the proper name of the plateau of Moab; and when thus employed it is generally rendered *Μισώρ* in the Septuagint (Deut. iii. 10; Josh. xiii. 9, 16, 17, 21; Jer. xlviii. 8, 21). Dean Stanley, with his usual accurate appreciation of the graphic touches of natural scenery given in Scripture, brings out the meaning of this word: 'The smooth downs (of Moab) received a special name (Mishor), expressive of their contrast with the rough and rocky soil of the west' (*Sin. and Pal.*, p. 317); and probably, it might be added, in contrast with the wooded heights and picturesque vales of Gilead. The word comes from the root *יָשַׁר*, 'to be level or just,' and is sometimes employed in a moral sense (Ps. xlv. 6; cxliii. 10). Stanley supposes that the whole of the upland downs east of the Jordan are called Mishor, and that this fact fixes the true site of the battle of Aphek (1 Kings xx. 23, *seq.*) It seems doubtful, however, whether the word Mishor, in the description of that battle, will bear the meaning thus assigned to it. It appears to be simply put in opposition to *harim*, 'hills.' 'Their gods are gods of the hills, therefore they were stronger than we, but let us fight against them in the plain' (*mishor*). In 2 Chron. xxvi. 10, *mishor* also means 'a plain,' west of the Jordan. As a proper name, or a special appellative, it was given only to the great plateau of Moab, even as distinguished from that of Bashan (Deut. iii. 10). This plateau commences at the summit of that range of hills, or rather lofty banks, which bounds the Jordan valley, and extends in a smooth, gently undulating surface, far out into the desert of Arabia. Medeba was one of its chief cities, and hence it is twice called 'the Mishor of Medeba' (Josh. xiii. 9, 16). It formed the special subject of the awful curse pronounced by Jeremiah—'Judgment is come upon the land of *Mishor*'—*הָאֶרֶץ הַמִּישׁוֹר*; xlviii. 21). It was chiefly celebrated for its pastures; but it also contained a number of large and strong cities, the ruins of

which still dot its surface (Porter's *Damascus*, ii. 183, *seq.*)—J. L. P.

MISHPAT, a fountain in Kadesh [see *KADESH*].

MISHRAITES (*מִשְׁרָאִי*; Sept. *Ἡμασραῖται*; Alex. *Ἡμασραεῖν*), one of the families of Kirjath-jearim, which went forth from it to colonize (1 Chron. ii. 53). From them proceeded the Zareathites and the Eshtaolites; *i. e.*, the inhabitants of Zarah and Eshtaol, so that probably the Mishraites founded these towns.—W. L. A.

MISREPHOTH-MAIM (*מִשְׁרֵפּוֹת מַיִם*; *Μαρερών*; Alex. *Μαρεφώδ Μαρίν*, in Josh. xi. 8; but *Μαρερὲ Μερφωμάλμ*; Alex. *Μαρεφώδ-μαλμ*, in xiii. 6; *aque Maserepoth*), a place mentioned only by Joshua, first, in describing his victory over the Canaanites, who had arrayed themselves against him at the Waters of Merom: 'He chased them unto great Zidon, and unto *Misrephoth-maim*, and unto the valley of Mizpeh eastward' (xi. 8); and second, in defining those parts of the Land of Promise which still remained to be conquered at his death: 'All the inhabitants of the hill country, from Lebanon unto Misrephoth-maim, all the Sidonians' (xiii. 6). Its locality is not specified; but it seems to have been connected with Sidon; if not with the city itself, at least with the district of which it was the capital.

Great difference of opinion exists among critics as to the meaning of the words. The rendering of Aquila is *Μαραιφώδ ὕδατος*, and of Symmachus *Μ. θαλάσσης*. The Targum interprets *fosse aquarum*, which is generally followed by the Jewish Rabbins (Gesenius, *Thes.*, p. 1341; Keil on *Joshua*, ad loc.) Others adopt the view of the Arabic version, and suppose some place is referred to in which there were 'warm springs.' The root *שָׂרַף* signifies 'to burn,' and hence it is supposed *מִשְׁרֵפּוֹת* may mean 'burning or heated.' Others again think that reference is made to some place along the coast where sea-water was put in tanks and evaporated by the heat of the sun, so as to obtain the deposit of salt. There are such salt pans at Sidon to this day. Still another opinion is, that furnaces for the manufacture of glass are referred to (Lengerke).

An attempt has been made by Schultz and Thomson to identify Misrephoth-maim with a ruin called *Musheirefeh*, on the northern border of the plain of Akka, near Ras en-Nakûra (*The Land and the Book*, p. 215; Van de Velde, *Memoir*, 335); but this place appears to be much too far south to agree with the Biblical narrative. The site must be regarded as still unknown; and the signification of the name is mere matter of conjecture.—J. L. P.

MITE (*λεπτόν*), a copper coin current in Palestine in the time of our Lord. It derived its name from a small Greek copper coin, of which at Athens seven went to the *χαλκοῦς* (Suidas, *s. vii. τάλαντον, ὀβολός*). It is mentioned by St. Mark (xii. 42), and St. Luke (xii. 59; xxi. 2). According to St. Mark (*l. c.*) it was the half of the farthing—*λεπτὰ δύο ὃ ἐστὶ κοδράντης*—'two mites which make a farthing.' The explanation *ὃ ἐστὶ κοδράντης* is omitted in the parallel passage in St. Luke (xxi. 2). These words of St. Mark have caused some disagreement as regards their correct meaning. Cave-doni (*Bibl. Num.*, vol. i., p. 76) has supposed

that St. Mark meant to say 'one *lepton* was of the value of one *quadrans*,' for had he intended to express that two of the small pieces of money were equal to a *quadrans*, then he must have written *ὁ ἑστὶ* instead of *ὁ ἑστὶ κοδράντης*; and the Vulg. has also very correctly translated *quod est*, but not *que sunt*. Another argument adduced is that the words of our Lord in the parallel passages of St. Matthew (v. 26) and St. Luke (xii. 59) prove that the *quadrans* is the same as the *lepton*. In the former passage the words are *ἑξαχάτον κοδράντην*, and in the latter *ἑξαχάτον λεπτόν*. A third argument, deemed by Cave-doni to be conclusive, assumes that the *quadrans* only weighed 30 grains, and that if the *quadrans* equalled two *lepta*, there would be coins existing at the time of our Saviour of the weight of 15.44 grains.

It is a question if the first of the arguments here brought forward is of much value, and though by some (Bland, *Annot. to N. T.*, in loc.) it has been stated that the *ὁ ἑστὶ κοδράντης* is a marginal quotation which has crept into text, and by others (Alford, *in loc.*) that it was probably an explanation for the Roman readers, it does not seem that the Greek is sufficiently incorrect to warrant our adopting Cave-doni's suggestion.

His second argument hardly merits an observation, for we might as well assume that because we say such a thing is not worth a *penny*, or not worth a *farthing*, therefore the *penny* and the *farthing* are the same coin.

His final argument is sufficiently answered by the fact that there are coins of the Ethnarch Archelaus and of the Emperor Augustus struck by the procurators weighing so low as 18 to 15 grains,

356. Coin [*λεπτόν*] of Archelaus.

Obv. HP [HPΩΔOT] within beaded circle.

Rev. PCNX [EONAPXOT] above a galley.—Æ iii.

and that by comparing them with others of the same period a result can be obtained proving the existence in Judæa of three denominations of coinage—the *semit*, the *quadrans*, and the *lepton*. There is no doubt that the *lepton* was rarely struck at the time of the evangelists, yet it must have been a common coin from the time of Alexander II. to the accession of Antigonos (B.C. 69–B.C. 40), and its circulation must long have continued in use. The extreme vicissitudes of the period may only have allowed these small copper coins to be struck. They were formerly attributed to Alexander Jannæus, but are now given to Alexander II. [MONEY.] They average in weight from 20 to 15 grains.

It may be as well to notice that Schleusner (*Lex. N. T.*, s. v. *κοδράντης*), after Fischer, considers the *quadrans* of the N. T., of which the *lepton* was the half, not to have equalled the Roman *quadrans*, but to have been the fourth of the Jewish *as*. The Jewish *as* is made to correspond with the half of the half-ounce Roman *as*, and as, according to Jewish writers, the פרוטה or פרוטה was the eighth part of the *assar*, or Jewish *as* (Buxtorf, *Lex. Talm.*, s. v. *אסיר*), and as the evangelists have understood this word פרוטה to be

the *lepton*, it follows that the *quadrans* equalled *δύο λεπτά*. This theory, however, is quite out of the question, and a comparison of the coins of Judæa with those struck at Rome, clearly proves that the *quadrans* in Judæa was the same as the *quadrans* in Rome. Moreover, as the Romans ordered that only Roman coins, weights, and measures should be used in all the provinces of the Roman empire (Dion. Cass. lii. 20), it is certain that there can have been no Jewish *as* or Jewish *quadrans*, and that all the coins issued by the Jewish princes, and under the procurators, were struck upon a Roman standard (cf. F. W. Madden, *Hist. of Jewish Coinage and of Money in O. and N. T.*, pp. 296–302).—F. W. M.

MITHCAH, one of the encampments of the Israelites. [WANDERING.]

MITHREDATH (מִתְרֶדָתְ; Sept. *Μιθραδάτης*). 1. An officer of Cyrus to whom had been entrusted the vessels of the temple, and by whom they were conveyed to Sheshbazzar (Ezra i. 8). He is described as גִּזְבָּר *gizbar*, a word which the LXX. take as a Gentile name, and represent by Γασπαρηβός, while the Vulg. renders it by *filius Gazabar*. In Ezra vii. 21, and Dan. iii. 2, 3, however, the word is used beyond doubt as a designation of office, and there in the A. V. it is rendered by *treasurer*. That this is a just rendering of the word is confirmed by 1 Esdr. ii. 11, where this Mithredath is styled *ὁ γαζοφύλαξ*. The name Mithredath is probably Persian, compounded of Mithra, the name of the sun-god, and *dat*, from *dādan*, to give, appoint, decree. Proper names with Mithra are very numerous (Pott, *Etymol. Forsch.* I. Vorr. p. 52). 2. An officer stationed at Samaria who joined with other enemies of the Jews in endeavouring to hinder the rebuilding of the temple by prejudicing the Persian king Artaxerxes against them (Ezra iv. 7).—W. L. A.

MITYLENE (Μιτυλήνη), the capital of the isle of Lesbos, in the Ægean Sea, about seven miles and a half from the opposite point on the coast of Asia Minor. It was a well-built town, but unwholesomely situated (Vitruv. *De Architect.* i. 6). It was the native place of Pittacus, Theophrastus, Theophrastus, Sappho, Alceus, and Diophanes. St. Paul touched at Mitylene in his voyage from Corinth to Judæa (Acts xx. 14). It does not appear that any Christian church was established at this place in the apostolic age. No mention is made of it in ecclesiastical history until a late period; and in the 2d century heathenism was so rife in Mitylene, that a man was annually sacrificed to Dionysius. In the 5th, 6th, 7th, and 8th centuries, we, however, find bishops of Mitylene present at several councils (Magdeburg, *Hist. Eccles. Cent.* ii. 195; v. 6; vi. 6; vii. 4, 253, 254; viii. 6). Mitylene still exists, and has given its name, in the form of Mytilini, to the whole island; but it is now a place of no importance.—J. K.

MIZAR (מִצְעַר; 'the hill Mizar,' or 'the little hill'; *ἀπὸ ὅρου μικροῦ*; a *monte modico*), the name of a hill mentioned only in Ps. xlii. 6 (7). From the connection in which it occurs, it would seem to have been situated near Mount Hermon. 'O my God, my soul is cast down within me; therefore will I remember thee from the land of Jordan and of the Hermonim, from the hill Mizar.'

The ancient versions translate the word, which signifies 'little.' Nothing more is known of it. Of course it has no connection with the hill in the eastern part of the plain of Esdraelon, to which travellers have given the name of 'Little Hermon.'—J. L. P.

MIZPAH, MIZPEH (מִצְפֶּה, from the root צָפָה, 'to be bright,' and thence 'to look out;') מִצְפֶּה thus signifies 'a place of look-out,' 'a watch-tower.' It has always the article הַמִּצְפֶּה, signifying emphatically 'the watch-tower,' except in Hosea v. 1. מִצְפֶּה, *Mizpeh*, is merely another form of the same word, which is found with the article, הַמִּצְפֶּה, in Josh. xv. 38; xviii. 26; and 2 Chron. xx. 24; and without the article in Josh. xi. 8; Judg. xi. 29; 1 Sam. xxii. 3. The rendering of the word in the Septuagint and Vulgate is not uniform, nor is there uniformity in our A. V.) This name is given by the sacred writers to no less than seven different places. It may be taken for granted that there was something in the position of each of those places which gave it a title to the name; it was on the summit of a hill, or it commanded a wide view over a desert, or over a plain, or along a leading road. Every Mizpah was a station of observation, a watch-tower from which the approach of friend or foe could be seen and signalled. Several of the Mizpahs are distinguished by other names, as 'M. of Gilead;,' 'M. of Moab;,' 'the land of M.;,' 'the valley of M.'

1. MIZPAH, called also GALEED (הַמִּצְפֶּה; ἡ ὄρασις; omitted in Vulgate), one of the names given to the 'cairn' raised by Jacob and Laban as a memorial and testimony of the covenant they entered into at the time of their interview in Gilead (Gen. xxxi. 49). Details of the event have already been given in the article GILEAD. Laban gave the cairn the Chaldee name *Jegar-Sahadutha* (ver. 47), and Jacob gave it the Hebrew name *Gal-ee'd*; both signifying 'The Cairn of Witness.' It is probable that the interview took place on a commanding height, on the top of one of the hills of Gilead; and the name of the hill or peak may have been *Mizpah*, or its conspicuous position may have suggested the name to the patriarchs. Be this as it may, after the completion of the covenant and the erection of the cairn, Laban gave the place another name, and introduced another characteristic play upon that name:—'And *ham-Mizpah* ('the watch-place'), for he said, The Lord *watch* (יָצַפ) between me and thee when we are absent one from another.'

The site of this Mizpah cannot now be determined. Some have thought it identical with Mizpeh of Gilead (see below), but the incidental remarks of the sacred writers show that the places must have been far apart. Jacob was travelling southward. After leaving Mizpah he went to Mahanaim (xxxii. 2), and then crossed the river Jabbok (ver. 22) to meet Esau. Consequently Mizpah must have been some distance north of the Jabbok; whereas there is evidence to show that 'Mizpeh of Gilead' lay some miles south of that river (see below). If Mahanaim be identified with Gerasa, then Mizpah must be looked for on some hill-top north of that city. [MAHANAIM.]

2. THE LAND OF MIZPEH (אֶרֶץ הַמִּצְפֶּה; ἡ γῆ Μασσημα; Alex. εἰς τῆν (al. γῆν) Μασσημάδ (al.

Μασσημά); *terra Maspha*) is mentioned in Josh. xi. 3. Among those nations to which Jabin king of Hazar sent for assistance against the Israelites was 'the Hivite under Hermon, in the land of Mizpeh.' This land must have been close to the base of Hermon, but on what side is not stated. It seems probable that the name Mizpeh was descriptive of the land, and if so, the high *table-land* on the east of the mountain was doubtless the place referred to. Such a name could scarcely have been applied to the deep valley of the Jordan on the west side, except, indeed, some noted *Mizpeh*, or watch-tower, existed there at a remote period, and gave its name to the region round it. Keil supposes that *Jebel-el-Heish*, the southern prolongation of Hermon, is the land of Mizpeh; but this can scarcely be described as 'under Hermon' (הַחֶת (הַרְמוֹן)).

In the same chapter Joshua states that the Israelites pursued the defeated Canaanites 'unto Great Zidon, and unto Misrephoth-maim, and unto the *Valley of Mizpeh* eastward' (וְעַד-בְּקִיעַת מִצְפֶּה; εἰς τὴν πεδίον Μασσημα; *Campumque Masphe*, ver. 8). This appears to be the same place called 'the land of Mizpeh' above. The word 'eastward' has reference not to Misrephoth-maim, but to the battle-field at Merom. The confederates fled in all directions, each nation trying, as was natural, to reach its own country. The Israelites followed them. The word בְּקִיעַת, rendered 'valley,' is often, indeed generally, employed in Scripture to denote 'an extended plain' (in Greek, πεδον; Gen. xi. 2, etc.), and is thus quite applicable to the plateau at the eastern base of Hermon, which also lies eastward from the battle-field of Merom. Its Arabic equivalent, *Bukd'a* (بُقَاع),

is now, however, the proper name of Coelosyria.

3. MIZPEH (הַמִּצְפֶּה; Μασφά; *Maspha*), a town in the Shephelah, allotted to Judah, and grouped with Migdalad and Lachish (Josh. xv. 38). There cannot be a doubt that all these towns are grouped according to their geographical position, and consequently Mizpeh must be looked for in the plain of Philistia, somewhere between Mejdal [MIGDALGAD] and Um Lâkis [LACHISH]. Consequently the site suggested by Van de Velde and others (*Memoir*, p. 335), namely, Tell es-Sâfieh, is much too far north. The southern part of this great plain abounds in little tells, to any one of which the name Mizpeh would be applicable. Eusebius mentions a Mizpeh near Eleutheropolis, towards the north; but his notice is confused, and Jerome gives a somewhat different account (*Onomast.*, s. v. *Maspha*).

4. MIZPEH, also MIZPAH (הַמִּצְפֶּה and הַמִּצְפָּה; Μασσημα; Μασσημά; Μασσημα; Alex. Μασφά, etc.; *Mesphe*, *Maspha*, etc.), a town of Benjamin, grouped between Beeroth and Chephirah (Josh. xviii. 26), and satisfactorily identified by Robinson with *Nebi Samwil*, an old village occupying the most commanding peak around Jerusalem. Robinson's opinion has been opposed by Dean Stanley, Mr. Grove, and others, but the writer believes without sufficient grounds. The proofs of identity will best appear from a review of the notices given of the place.

When the horrid crime committed by the people of Gibeah was reported to the Israelites, 'the

whole congregation was gathered together as one man, from Dan even to Beersheba, with the land of Gilead, unto the Lord in *Mizpeh*' (Judg. xx. 1). The position of Mizpeh is not stated; but from the whole scope of the narrative, and especially from the descriptions of the unsuccessful attacks given in verses 19-26, it is evident Mizpeh must have been very near to Gibeah. It could not possibly have been the Mizpeh of Gilead, as some have supposed (Smith, *Dict. of Bible*, s. v.) It seems almost absurd to imagine, that the whole people of Israel, when about to demand satisfaction from the inhabitants of Gibeah, should assemble on a remote hill on the east of the Jordan. Is it not natural to conclude, in accordance with the general tenor of the story, that they assembled at the great national gathering-place close to the doomed city?

At Mizpeh the Israelites again assembled by command of Samuel. The place was now the national sanctuary (1 Sam. vii. 5); and after a solemn sacrifice the people attacked the Philistines, who had long oppressed them, and gained a signal victory (vers. 9-13). Mizpeh was then made one of Samuel's assize towns (ver. 16). Here the prophet again assembled the tribes of Israel to elect a king, and Saul was chosen (x. 17-21). The ancient and famous city of Gibeon lay in the centre of a little plain scarcely a mile north of Mizpeh; and it may perhaps have been on this very hill of Mizpeh, though called Gibeon, because in its territory, that Solomon offered his great sacrifice, and received the gift of divine wisdom [GIBEON]. Mizpeh was fortified by Asa, king of Judah, to protect his northern frontier, and the stones used were brought from Ramah, which the king of Israel had attempted to build (1 Kings xv. 22; 2 Chron. xvi. 6). Ramah stands on the top of a hill three miles north-east of Mizpeh [RAMAH]. When Jerusalem was taken by Nebuchadnezzar, and the Jews led captive to Babylon, the government of Judah was given to Gedaliah, who took up his residence at the old sanctuary of Mizpeh (2 Kings xxv. 22, 23); and this was the scene of the massacre of the satrap and his court by a band of fanatics under Ishmael (ver. 25; Jer. xl. 6-16; xli. 1-3). Mizpeh was still esteemed by the Jews as a holy place, and appears to have contained a building which was called the 'House of the Lord,' where vows were paid and incense offered, after the destruction of the temple (Jer. xli. 5, 6). Indeed, it appears that Mizpeh continued to be a sanctuary, more or less honoured by the Jews, from the time of their settlement in Palestine down to the captivity. It was one of the cities occupied after the captivity; and Nehemiah states that the men of Gibeon and Mizpah were joined in rebuilding a part of the wall of Jerusalem (Neh. iii. 7; cf. vers. 15, 19).

After the close of the O. T. history, Mizpeh did not lose its sacred character. When, under the rule of the Maccabees, the Jews were oppressed by the Syrians, and Jerusalem in the hands of the enemy, we are told that 'they assembled together and came to *Massepha* (*Μασσηφά*), over against Jerusalem; for in *Massepha* was a place of prayer heretofore in Israel' (1 Maccab. iii. 46). The situation of Mizpeh is here stated to be *κατέναντι Ἱερουσαλὴμ*, 'over against,' so as to be in sight of Jerusalem. This agrees well with Neby Samwîl, which is the most prominent object around

the holy city, though a little over four miles distant.

An attempt has recently been made to identify Mizpeh with the hill *Scopus*, described by Josephus as *seven stadia* north of Jerusalem (*Bell. Jud.* v. 2. 3; Stanley, *S. and P.*, 222; Smith, *Dict. of Bible*, iii. p. 388). The similarity of the names in Greek (the LXX. in 1 Kings xv. 22 having *σκοπία*, and Josephus calling this hill *σκοπός*); the statement of Josephus that the ancient name of Scopus was *Sapha* (*Σαφά*, *Antiq.* xi. 8. 5), which is supposed to be a corruption of Mizpah; and the expression 'over against Jerusalem' used in the book of Maccabees, are the principal grounds on which this theory is made to rest. A careful examination shows that none of them have any weight. Josephus himself carefully distinguishes Mizpeh from Scopus; the former he speaks of as 'a city called *Μασφάτης*, *Masphates*, which signifies in the Hebrew *κατοικηθῆναι*' (*Antiq.* vi. 2. 1); and this is the name which he uniformly gives to it (*Antiq.* vi. 4. 4; x. 9. 1, etc.); whereas he says the ancient name of the latter (Scopus) was *Σαφά*, 'which name in the Greek signifies *σκοπή*, for from thence both Jerusalem and the sanctuary are visible' (*Antiq.* xi. 8. 5). As to the word *κατέναντι*, any scholar who visits Jerusalem and studies the narrative in 1 Maccab. iii., will admit that it is as applicable to Neby Samwîl as to Scopus. Besides, the incidental notices given by the sacred writers, by the author of the book of Maccabees, and by Josephus, show that Mizpeh was some considerable distance from Jerusalem; that it was on the northern frontier of Judah; that it was near Gibeon and not far distant from Kirjath-jearim; and all these notices seem to indicate Neby Samwîl as the most probable site. There is one passage in Jeremiah which may be regarded as decisive. Ishmael, after the massacre of the rulers of Mizpeh, set out for the country of the Ammonites, east of the Jordan. He was pursued by Johanan, and overtaken 'by the great waters that are in Gibeon' (xli. 12; cf. 2 Sam. ii. 13). The leading road from Neby Samwîl to the fords of the Jordan runs past Gibeon. If we place Mizpeh at Scopus, or anywhere east of Gibeon, this passage must be wrong. Eusebius and Jerome locate Mizpeh near Kirjath-jearim (*Onomast.*, s. v. *Massefa*; and *Reland, Pal.*, 502).

Dr. Bonar would identify Mizpeh with the little village of *Shafat*, on the northern slope of Scopus; but this site is liable to the same objections as the former; and besides, Shafat is not visible from Jerusalem (see, however, Bonar, *Land of Promise*, App. viii.) Shafat is doubtless the *Sapha* mentioned by Josephus as the ancient name of Scopus (*Antiq.* xi. 8. 5).

The peak on which the village and mosque of Neby Samwîl stand, rises about 600 feet above the plain of Gibeon, and is the most conspicuous object in the whole region, commanding a wider view than any other point in southern Palestine. The mosque is large but dilapidated, and is said to contain the tomb of the prophet Samuel; it was formerly a church, and appears to have been built by the Crusaders (Robinson, *B. R.*, i. 457-60). The houses are all constructed of old materials; and the writer observed many extensive excavations in the rock; in some places the soft limestone is hewn away, so as to leave a high natural wall; in others, deep pits or tanks have been hewn out.

The walls of many of the modern houses are formed almost entirely of the living rock (*Handbk.*, p. 225, *seq.*)

5. MIZPEH OF GILEAD (מִצְפֶּה and מִצְפָּה; *σκοπία*; *Μασσηφά*; Alex. *Μασσηφά*, etc.; *Maspha*), the great gathering-place and sanctuary of the trans-jordanic tribes. What Mizpeh of Benjamin was west of the Jordan, Mizpeh of Gilead was east. Here the Israelites assembled to oppose the Ammonites (Judg. x. 17); here Jephthah addressed the people 'before the Lord' (xi. 11); and here his daughter came out to meet him after his rash vow and signal victory (ver. 33-35). It is apparently the same place which is called *Ramath-Mizpeh* by Joshua, and which stood on the northern border of Gad (Josh. xiii. 26). Mizpeh was situated close to the frontier of the Ammonites, and apparently near their capital Rabbath (Judg. xi. 29), consequently it must have been on the south side of the Jabbok, and could not have been identical with the Mizpah where Jacob and Laban met (see above). Mizpeh of Gilead, Ramath-Mizpeh, and Ramoth-Gilead, appear to have been closely connected, if they were not different names of the same place. Ramoth-Gilead was unquestionably identical with the modern village of *Es-Salt* [RAMOTH-GILEAD]. About three miles north-west of Es-Salt is the highest peak east of the Jordan, commanding one of the widest and most interesting views in the country. Its top is broad and flat, and would form a fine gathering-place for a nation of warriors. On its northern slope is an ancient ruin called Jil'ad (جِلْعَاد = גִּלְעָד), the Arabic representative of the Hebrew Gilead. The peak is now called *Jebel Osk'a*, 'the hill of Hosea,' because upon its top is a gigantic tomb said to be that of the prophet. It is probable that this is the true site of 'Mizpeh of Gilead,' the gathering-place of the Eastern tribes (*Handbk.*, p. 309; Burckhardt, *Travels in Syria*, p. 348).

6. MIZPEH OF MOAB (מִצְפֶּה מוֹאָב; *Μασσηφάς τῆς Μωάβ*; Alex. *Μασσηφά*; *Maspha*), a place only mentioned in 1 Sam. xxii. 3. When David was persecuted by Saul he placed his parents for safety in Mizpeh of Moab, doubtless among the relatives of Ruth (cf. Ruth iv. 18-22). The site is unknown.

7. MIZPEH OF JUDAH (מִצְפֶּה הַיְּהוּדָה; A. V., 'watch-tower'; *σκοπία*; *specula*), a place mentioned in connection with the miraculous destruction of the Ammonites and Moabites who invaded Judah during the reign of Jehoshaphat (2 Chron. xx. 24). It appears to have been a noted tower or castle in the wilderness of Judah, between Tekoa and Engedi. Its site is not known.

The prophet Hosea mentions a MIZPAH (v. 1). He appears to describe in highly figurative language the way in which the whole nation of Israel had been led into idolatry, as well east of the Jordan as west: 'Judgment is toward you (O priests), because ye have been a snare on *Mizpah*, and a net spread on Tabor,' thus making these two places emblematic of the two divisions of the land. If this interpretation be correct, then Mizpah of Gilead is that referred to. In any case this Mizpah must be either that of Gilead or that of Benjamin. —J. L. P.

MIZRAIM (מִצְרַיִם), the dual of מִצְרַיִם; Sept. *Μεσ-ραϊν*, or LAND OF MIZRAIM, the name by which,

in Scripture, Egypt is generally designated. It is also the name given to one of the sons of Ham (Gen. x.) The dual form of the word has undoubtedly respect to some twofold aspect of the country; either as divided into two parts by the Nile, or as lying between two mountain ranges (Herod. ii. 8; Strabo, xvii. p. 789, 819). It is generally used to designate the whole of Egypt; but in Is. xi. 11 it is used to designate Lower Egypt as distinct from Pathros or Upper Egypt; so that it is not to this duplicity of the country that its dual form refers. The unused noun מִצְרַיִם, to which the word must be referred, means *bound, limit, region, land*; and it may be from the enclosed and bounded appearance of Egypt that the name was given to it. Fürst (*H. W. B.*, s. v.) compares Αἴγυπτος with the Sansc. āguptos *munita* as favouring this explanation. This ancient title is still preserved in Misr, the existing Arabic name of the country. [EGYPT.]—W. L. A.

MNASON (Μνάων), an 'old disciple,' with whom St. Paul lodged when at Jerusalem in A. D. 58 (Acts xxi. 16). He seems to have been a native of Cyprus, but an inhabitant of Jerusalem, like Joses and Barnabas. Some think that he was converted by Paul and Barnabas while at Cyprus (Acts xiii. 9); but the designation 'an old disciple' (ἀρχαῖος μαθητής) has more generally induced the conclusion that he was converted by Jesus himself (comp. ἐν ἀρχῇ, Acts xi. 15), and was perhaps one of the seventy.

MOAB (מוֹאָב; Sept. *Μωάβ*), son of Lot and his eldest daughter (Gen. xix. 30-38). He was born about the same time with Isaac, and became the founder of the Moabites. Of the name, which is used both of the man and the tribe, various derivations have been given—1. It is for מוֹאָב, *from father* (LXX., Targ. Jon., Joseph., Jerome, De Wette); 2. It is מוֹבָא אָב, *ingressus patris* (Hiller, Simonis); 3. מוֹ is for מַיִם, and the word means *aqua patris* (comp. Num. xxiv. 7 for the figure), i.e., *semen patris* (Rosenmüller, Gesen., Fürst); 4. It is derived from מוֹאֵב, *to desire*, the land of Moab being a desirable land (Maurer). The oldest of these is perhaps the best.—W. L. A.

MOABITES, a tribe descended from Moab the son of Lot, and consequently related to the Hebrews (Gen. xix. 37). Previous to the exodus of the latter from Egypt, the former, after expelling the original inhabitants, called אֱמִיטִים, *Emims* (Gen. xiv. 5; Deut. ii. 11), had possessed themselves of the region on the east of the Dead Sea and the Jordan, as far north as the river Jabbok. But the northern, and indeed the finest and best portion of the territory, viz., that extending from the Jabbok to the Arnon, had passed into the hands of the Amorites, who founded there one of their kingdoms, with Heshbon for its capital (Num. xxi. 26). Og had established another at Bashan. Hence at the time of the exodus the valley and river Arnon constituted the northern boundary of Moab (Num. xxi. 13; Judg. xi. 18; Joseph. *Antiq.* iv. 5. 1). As the Hebrews advanced in order to take possession of Canaan, they did not enter the proper territory of the Moabites (Deut. ii. 9; Judg. xi. 18), but conquered the kingdom of the Amorites (a Canaanitish tribe),

which had formerly belonged to Moab, whence the western part, lying along the Jordan, frequently occurs under the name of עֲרֻבוֹת מוֹאָב 'plains of Moab' (Deut. i. 5; xxix. 1). The Moabites, fearing the numbers that were marching around them, showed them at least no kindness (Deut. xxiii. 3); and their king (Balak) hired Balaam to utter prophetic curses, which, however, were converted into blessings in his mouth (Num. xxii., *seq.*) The Gadites now took possession of the northern portion of this territory, which the Amorites had wrested from the Moabites, and established themselves there; while the Reubenites settled in the southern part (Num. xxxii. 34; comp. Josh. xiii., which, however, differs somewhat in the designation of particular towns).

We see the first hostilities breaking out in the beginning of the period of the Judges, when the Hebrews had been for a long time tributary to the Moabites, but threw off their yoke under Ehud (Judg. iii. 12-30). Towards the end of this period, however, peace and friendship were restored, mutual honours were reciprocated (as the history of Ruth shows), and Moab appears often to have afforded a place of refuge to outcasts and emigrant Hebrews (Ruth i. 1; comp. 1 Sam. xxii. 3, 4; Jer. xl. 11; Is. xvi. 2). After Saul had waged successful war against them (1 Sam. xiv. 47), David made them tributary (2 Sam. viii. 2, 12; xxiii. 20). The right to levy this tribute seems to have been transferred to Israel after the division of the kingdom; for, upon the death of Ahab (about B.C. 896), they refused to pay the customary tribute of 100,000 lambs and as many rams (2 Kings i. 1; iii. 4; comp. Is. xvi. 1). Jehoram (B.C. 896), in alliance with Judah and Edom, sought indeed to bring them back to their subjection. The invading army, after having been preserved from perishing by thirst through the intervention of Elisha, defeated the Moabites and ravaged the country; but through the strange conduct of the king, in offering up in sacrifice his son [MESHA], were induced to retire without completing the object of the expedition. The Moabites deeply resented the part which the king of Judah took in this invasion, and formed a powerful confederacy with the Ammonites, Edomites, and others, who marched in great force into Judæa, and formed their camp at Engedi, where they fell out among themselves and destroyed each other, through the special interposition of Providence in favour of Jehoshaphat and his people (2 Kings iii. 4, *seq.*; comp. 2 Chron. xx. 1-30) [ELISHA; JEHOAM; JEHOSEPHAT]. Under Jehoash (B.C. 849) we see them undertake incursions into the kingdom of Israel, and carry on offensive war against it (2 Kings xiii. 20).

Though the subsequent history of Israel often mentions the Moabites, yet it is silent respecting a circumstance which, in relation to one passage, is of the greatest importance, namely, the re-conquest of the territory between the Arnon and the Jabbok, which was wrested from the Moabites by the Amorites, and afterwards of the territory possessed by the tribes of Reuben and Gad. This territory in general we see, according to Is. xvi., in the possession of the Moabites again. Even Selah, the ancient capital of the Edomites, seems likewise, from Is. xvi. 1, to have belonged to them, at least for a time. The most natural supposition is that of Reland (*Palästina*, p. 720), Paulus (*Clavis*, p. 110), and Rosenmüller (*in loc.*), that,

after the carrying away of those tribes into captivity, the Moabites occupied their territory; as it is expressly stated (Jer. xlix. 1-5) that the Amorites intruded themselves into the territory of the captive Gadites, as the Edomites did in respect to the Jews at a later period (Joseph. *De Bell. Jud.* v. 79). The tribes of Reuben and Gad were not, however, as is commonly supposed, first carried away after the destruction of Samaria (B.C. 722) by Shalmaneser (2 Kings xviii. 9, 10), but, according to 1 Chron. v. 26, by Pul and Tiglathpileser certainly, and perhaps (for the account is somewhat indefinite) in the earliest campaign against Menahem, B.C. 774 (2 Kings xv. 19), and Pekah, B.C. 741 (2 Kings xv. 29). Nevertheless the singular fact remains, that here, where we should have expected every wrong done to the Israelites by Moab to be made prominent, this usurpation of their territory is not noticed. Hence we cannot wholly resist the conjecture that it was with that territory as with the territory of the Philistines, Tyrians, and Sidonians; *i. e.*, it was never permanently possessed by the Hebrew tribes, and the division of this region into many parts in the book of Joshua remained ideal (an assignment *in partibus infidelium*), without being generally realised in history. Perhaps also many of these cities were as little inhabited by the Hebrews as Tyre and Sidon, which are likewise assigned them in the book of Joshua. In like manner it may be explained why many cities (Num. xxxii. 34, *seq.*) were apportioned to the tribe of Reuben, which are afterwards ascribed (Josh. xiii.) to Gad, and *vice versa* (Reland, *Palästina*, pp. 582, 720, 735).

Still later, under Nebuchadnezzar, we see the Moabites acting as the auxiliaries of the Chaldeans (2 Kings xxiv. 2), and beholding with malicious satisfaction the destruction of a kindred people (Ezek. xxv. 8-11); yet, according to an account in Josephus (*Antiq.* x. 9. 7), Nebuchadnezzar, when on his way to Egypt, made war upon them, and subdued them, together with the Ammonites, five years after the destruction of Jerusalem. On the other hand, there is no authority in any one ancient account for that which modern historians have repeatedly copied from one another; *viz.*, that Moab was carried into exile by Nebuchadnezzar, and restored with the Hebrews under Cyrus.

That continual wars and contentions must have created a feeling of national hostility between the Hebrews and the Moabites, may be readily conceived. This feeling manifested itself on the part of the Hebrews, sometimes in bitter proverbs, sometimes in the denunciations of the prophets; on the part of the Moabites in proud boastings and expressions of contempt (Is. xvi. 6).

Among the prophecies, however, that of Balaam (Num. xxii.-xxiv.) is above all remarkable, in which this ancient prophet (who withal was not an Israelite), hired by Moab to curse, is impelled by the Divine Spirit to *bless* Israel, and to announce the future destruction of Moab by a mighty hero in Israel (Num. xxiv. 17). It is a genuine epic representation worthy of the greatest poet of any age. Nor should we overlook the song of triumph and scorn respecting Moab, suggested by Heshbon, and obscure only as to its origin (Num. xxi. 17-30). Among the later prophets, Amos (ii. 1-3) predicts their destruction in consequence of their cruelty to the king of Edom; probably with reference to the war recorded in 2 Kings iii., when the Edomites

were confederate with the Hebrews; although the particular instance of cruelty is not there specified. Zephaniah (ii. 8-10) condemns them to punishment for their scorn and contempt of Israel. Jeremiah repeats the denunciation of evil, for the most part in the words of Numbers and Isaiah (Jer. xlviii.; comp. also ix. 26; xxv. 21); and Ezekiel threatens them with punishment for their malicious joy at the overthrow of Judæa (xxv. 8-11). Moreover, the subjection of Moab finds a place in every ideal description of splendid wars and golden ages predicted for Israel (Is. xi. 14; xxv. 10; Ps. lx. 8, 'Moab is my wash-pot'; Ps. lxxxiii. 6).

After the exile, an intimate connection between the two nations had found place by means of intermarriages (Ezra ix. 1, *seq.*; Neh. xiii. 1), which, however, were dissolved by the theocratic zeal of Ezra. The last (chronologically) notice of the Moabites which occurs in Scripture is in Dan. xi. 41, which contains an obscure intimation of the escape of the Moabites from the overthrow with which neighbouring countries would be visited: but Josephus, in the history of Alexander Jannæus, mentions the cities between Arnon and Jabbok under the title of cities of Moab (*Antiq.* xiii. 15). Thenceforth their name is lost under that of the Arabians, as was also the case with Ammon and Edom. At the time of Abulfeda, Moab Proper, south of the Arnon, bore the name of Karak, from the city so called; and the territory north of the Arnon, that of Belka, which includes also the Ammonites. Since that time, the accounts of that region are uncommonly meagre; for through fear of the predatory and mischievous Arabs that people it, few of the numerous travellers in Palestine have ventured to explore it. For scanty accounts, see Büsching's *Asia*, pp. 507, 508. Seetzen, who in February and March 1806, not without danger of losing his life, undertook a tour from Damascus down to the south of the Jordan and the Dead Sea, and thence to Jerusalem, was the first to shed a new, and altogether unexpected, light upon the topography of this region. He found a multitude of places, or at least of ruins of places, still bearing the old names; and thus has set bounds to the perfectly arbitrary designations of them on the old charts. Seetzen's wish, that some other traveller might acquaint the public with the remarkable ruins of this region, especially those of Gerasa and Ammân, and then advance to the splendid ruins of Petra at Wady Mousa, is already partly accomplished, and will soon be completely so. From June to September 1812, Burckhardt made the same tour from Damascus beyond the Jordan down to Karak; whence he advanced over Wady Mousa, or the ancient Petra (which he was the first European traveller to visit), to the bay of Aila, and thence went to Cairo. The accurate details of this tour, which are contained in his *Travels in Syria and the Holy Land*, 1822, threw much light upon the ancient topography and present condition of the lands of Moab and Edom. The accounts of Seetzen and Burckhardt give the substance of all the information which we even yet possess concerning the land of Moab in particular, although of Edom, or rather of Petra, fuller, if not more exact accounts, have been since obtained. Most of the travellers who visited Petra after Burckhardt, passed also through the land of Moab; but it afterwards became usual to pass from Petra direct to Hebron; whence this country has escaped the

researches of many travellers whose observations have of late years enriched the topography of this region. A party of English gentlemen, Captains Irby and Mangles, Mr. Banks and Mr. Legh, passed through the land of Moab in returning from Petra in 1818; and their observations, published in their *Travels* by Irby and Mangles, and by Legh in a Supplement to Dr. Macmichael's *Journey from Moscow to Constantinople*, 1819, furnish the most valuable additions which have as yet been obtained to the information of Seetzen and Burckhardt. The northern parts of the country were visited by Mr. Buckingham, and more lately by Mr. George Robinson and by Lord Lindsay, but very little additions have been made by these travellers to our previous knowledge. The plates to Laborde's new work, *Voyage en Orient*, show that he also visited the land of Moab; but the particulars of his journey have not yet been published.

From these sources we learn that in the land of Moab, which lay to the east and south-east of Judæa, and which bordered on the east, north-east, and partly on the south of the Dead Sea, the soil is rather more diversified than that of Ammon; and, where the desert and plains of salt have not encroached upon its borders, of equal fertility. There are manifest and abundant signs of its ancient importance. 'The whole of the plains are covered with the sites of towns on every eminence or spot convenient for the construction of one; and as the land is capable of rich cultivation, there can be no doubt that the country, now so deserted, once presented a continued picture of plenty and fertility' (Irby and Mangles, p. 378). The form of fields is still visible, and there are remains of Roman highways which are in some places completely paved, 'and on which there are milestones of the times of Trajan, Marcus Aurelius, and Severus, with the numbers of the miles legible upon them. Wherever any spot is cultivated the corn is luxuriant; and the frequency, and almost, in many instances, the close vicinity of the sites of ancient towns, prove that the population of the country was formerly proportioned to its fertility' (Irby and Mangles, pp. 377, 378, 456, 460). It was in its state of highest prosperity that the prophets foretold that the cities of Moab should become desolate, without any to dwell in them; and accordingly we find, that although the sites, ruins, and names of many ancient cities of Moab can be traced, not one of them exists at the present day as tenanted by man. The argument for the inspiration of the sacred records deducible from this, among other facts of the same kind, is produced with considerable force by Dr. Keith in his work on Prophecy. Gesenius, *Comment. on Isa.* xv., xvi., *Introduct.* translated by W. S. Tyler, with *Notes* by Moses Stuart, in *Biblical Repos.* for 1836, vol. vii. pp. 107-124; Keith's *Evidence from Prophecy*, pp. 153-165; and *Land of Israel*, 279-295; *Pictorial Bible*, *Notes* to Deut. ii. 2; Is. xvi., xvii.; Jer. xlviii. See also the travels and other works cited in this article.—J. K.

MOCHA (מֹכָה) of *Palestine* or *Tiberias*, flourished circa A.D. 570. Very little is known about the personal history of this remarkable scholar, who immortalised his name by fixing and amplifying, or, as some will have it, by inventing the interlineary system of vocalization (מֶעֱמָ)

נקודת), called the *Tiberian* or *Palestinian* (נקודת), which has for centuries been commonly adopted both by Jews and Christians in the pointed editions of the Hebrew Scriptures, to the exclusion of the superlineary

system (מנוקד למעלה, טעם העליון), called the *Babylonian* or *Assyrian* (נקודת שער, נקודת אשור), which was invented or extended by Acha of Irak in the first half of the 6th century. Like his predecessor R. Acha, the author of the opposite system, R. Mocha also compiled a large and small *Massora*, in which he discusses the writing of words with or without the vowel letters (מלא, חסר), the affixing of certain accents (גנונות), accented syllables, *Dagesh* and *Raphe*, rare forms, archaic words, homonyms, etc. etc., as is evident from an ancient MS. of the Pentateuch by Firkowitsch, where the following Massoretic gloss frequently occurs, 'Rabbi Mocha writes this with and that without the vowel letters.' These Massoretic glosses he wrote in Aramaic and in the Tiberian dialect, being the language of the Palestinian Jews, in order to make his labours accessible and intelligible to the people at large. Not unfrequently, however, these Massoretic glosses are intermixed with notes written in Hebrew (comp. Pinsker, *Likute Kadmonijot*, Vienna 1860, p. 62, appendix; Graetz, *Geschichte der Juden*, vol. v., Magdeburg 1860, p. 552; Fürst, *Geschichte des Karäerthums*, vol. i., Leipzig 1862, pp. 15, ff.; 134, ff.)—C. D. G.

MODENA, LEON DE. [LEON.]

MODIN (מֹדִינָה; Alex. Μωδεῖν, and Μωδεῖν; *Modin*), the native city of the Maccabees. It is not mentioned in the canonical Scriptures; but it occupied a distinguished place in Jewish history during the rule of the Asmonean family. This family was of the noblest blood of the priests (1 Maccab. ii. 1; cf. 1 Chron. xxiv. 7). When Antiochus Epiphanes was cruelly persecuting the Jewish nation, Mattathias, the head of the Asmonean family, left Jerusalem and took up his residence at *Modin*. The emissaries of the tyrant visited that city and ordered the people to sacrifice to the gods. Mattathias refused, and even went so far as to kill a Jew who attempted to present a sacrifice. This was the commencement of the war against Syria, and of the rule of the Asmoneans (B.C. 167; Joseph. *Antiq.* xii. 6. 1 and 2; see art. MACCABEES). Mattathias died and was buried at Modin, after giving to his sons a solemn charge to uphold the law and faith of their fathers with their lives (1 Maccab. ii. 50, seq.). His warlike son Judas, after a brilliant career, fell in battle and was also buried at Modin (Joseph. *Antiq.* xii. 11. 2; 1 Maccab. ix. 19); and the bones of Jonathan, who fell by treachery, were committed to the family tomb (Joseph. *Antiq.* xiii. 6. 6). Over the graves of his father and brethren, Simon, who succeeded them as ruler of the Jews, erected a splendid mausoleum of white stone, surrounded with cloisters, and surmounted by seven pyramids, corresponding to the number of the departed. It was so high as to be visible from the sea (Joseph. *l. c.*; 1 Maccab. xiii. 25-30), and it remained standing as late as the 4th century (*Onomast.*, s. v. *Modin*). Modin was on more than one occasion the place where the Jewish patriots assembled in the hour of danger around their warlike Asmonean leaders, and, as if inspired with fresh courage by

the proximity of the illustrious dead, they marched thence to victory (1 Maccab. xvi. 1-10; 2 Maccab. xiii. 14, seq.).

The site of Modin has occasioned some controversy. No ancient writer has accurately described it, and the name appears to have perished like the mausoleum that once adorned it. Josephus calls it a village of Judea (*Bell. Jud.* i. 1. 3). An incidental remark of the author of the first book of Maccabees shows that it lay close to the plain of Philistia (xvi. 4. 5). Eusebius and Jerome appear to have known it. They state that it was situated near Diospolis, or *Lydda*, and that the mausoleum of the Maccabees still existed in their time (*Onomast.*, s. v.). We learn farther, that the town stood on a hill (1 Maccab. ii. 1). This is all that is known. A comparatively recent tradition, apparently not older than the 13th century (*Brocardus*, x.; see also Robinson, *B. R.*, ii. 7; and authorities cited there), fixes the site of Modin in the commanding peak of *Soba*, six miles west of Jerusalem, but at least *ten* from the plain, and nearly twenty from *Lydda*. This site has, consequently, no just claim to the honour. Modin appears to have been known to William of Tyre, as he mentions it as one of the ancient towns between Jerusalem and Joppa, but he does not state its position (*Hist.* viii. 1) farther than grouping it with *Noba* and *Nicopolis*, now identified with Nûba and Amwâs, at the foot of the mountains. It seems highly probable that Robinson is correct in fixing the site of Modin at the ruin called *Latron*. In the mouth of Wady 'Aly, where it opens from the mountains of Judæa into the plain, is a high conical tell, crowned with the ruins of a large fortress, and a poor village. This is *Latron*. The foundations of the fortress appear to be of the Roman age, or perhaps earlier, though the upper parts exhibit pointed arches and light architecture of a much later date. The view from the summit is commanding, and embraces the whole plain to Joppa and the Mediterranean beyond. Here may have stood the monument of the Maccabees. The road from Jerusalem to Joppa passes close by the base of the tell, and Amwâs, the ancient Nicopolis, is about a mile to the north. The name *Latron* appears to have arisen in the 16th century, from the legend which made this the birth-place of the penitent thief—'Castrum boni *Latronis*' (Robinson, *B. R.*, iii. 151; Quaresmius, ii. p. 12; *Handbk.*, p. 285; Tobler, *Dritte Wanderung*, 185, seq.; Reland, 901).—J. L. P.

MOLADAH (מֹלָדָה, 'birth'; Μωλαδᾶ, Καλαδάμ; Alex. Μωδαδᾶ; Μωλαδᾶ; *Molada*), a city grouped with Kedesb, Beersheba, and others, which were situated on the extreme south of Judah, near the borders of Edom (Josh. xv. 21-26). It was afterwards assigned with Beersheba to the tribe of Simeon (xix. 2), and was occupied by the family of Shimei (1 Chron. iv. 28). It is not again mentioned until after the captivity, when some of the returned captives of Judah settled in it (Neh. xi. 26). Reland suggests that this city is identical with *Malatha*, one of the places to which Herod Agrippa retired during his disgrace at the Roman court (Reland, *Pal.*, pp. 885, 901; Joseph. *Antiq.* xviii. 6. 2). *Malatha* is said to have been in Idumea, but in the time of Josephus Idumea included a large section of southern Palestine [IDUMEA]. In the 4th century *Malatha* (Μαλάθα) was one of

the most important cities in southern Palestine, and is frequently mentioned by Eusebius and Jerome in describing the situation of other towns (*Onomast.*, s. v. *Arath, Elther, Jether*, etc.; cf. Reland, 885). According to these authors it was situated about twenty miles south of Hebron (*Celarius, Geogr.*, ii. 590). At a still later period Malatha became a Roman military station (Reland, p. 231).

About twenty geographical miles south of Hebron, on the leading road to Aila on the Red Sea, and ten miles east of Beersheba, are the ruins of an ancient fortified town, now called *el-Milh*, which Robinson rightly identifies with the Roman Malatha, and Jewish *Moladah* (*B. R.* ii. 200, *seq.*) The place is now deserted, and the houses and walls are prostrate; but there are two ancient wells which attract the Bedawin, and make el-Milh a favourite watering-place. The name *Milh*, which in Arabic signifies 'salt,' is doubtless a corruption of the Greek *Μάλας* or *Μαλάς* (Robinson, ii. 201, note; Van de Velde, *Memoir*, 335; Ritter, *Pal. und Syr.*, i. 124; *Handbk.* p. 64).—J. L. P.

MOLE. [CHOLED.]

MOLOCH, or rather MOLECH (מֹלֶךְ), always with the article, except in 1 Kings xi. 7). The Septuagint most frequently render it as an appellative, by ὁ ἀρχων or βασιλεὺς; but they also write Μολόχ, as Aquila, Symmachus, and Theodotion, appear to have generally done. Whatever reasons there may be for doubting whether *Malchām* is a name of this god, or is merely 'their king,' in a civil sense, in Amos i. 15; Zeph. i. 5 (on which see the notes of Hitzig, *Die xii. Kleinen Propheten*), yet the context, in Jer. xlix. 1, seems to require that it should there denote this god, as indeed the Septuagint and Syriac versions have expressed it. But *Malchām*—which Movers considers to be an Aramaic pronunciation of *Malcham*, i.e., to be an appellative, 'their king,' in a theocratical sense (*Die Phönizier*, i. 358)—is evidently a name of this god (comp. 1 Kings xi. 5 and 7). [MALCHAM.]

Molech is chiefly found in the O. T. as the national god of the Ammonites, to whom children were sacrificed by fire. There is some difficulty in ascertaining at what period the Israelites became acquainted with this idolatry; yet three reasons render it probable that it was before the time of Solomon, the date usually assigned for its introduction. First, Molech appears—if not under that name, yet under the notion that we attach to it—to have been a principal god of the Phoenicians and Canaanites, whose other idolatries the Israelites confessedly adopted very early. Secondly, There are some arguments which tend to connect Molech with Baal, and, if they be tenable, the worship of Molech might be essentially as old as that of the latter. Thirdly, If we assume, as there is much apparent ground for doing, that wherever human sacrifices are mentioned in the O. T. we are to understand them to be offered to Molech—the apparent exception of the gods of Sepharvaim being only a stronger evidence of their identity with him—then the remarkable passage in Ezek. xx. 26 (cf. ver. 31) clearly shows that the Israelites sacrificed their first-born by fire, when they were *in the wilderness*.\* Moreover, those who ascribe

the Pentateuch to Moses will recognise both the early existence of the worship of this god, and the apprehension of its contagion, in that express prohibition of his bloody rites which is found in Lev. xx. 1-5. Nevertheless, it is for the first time directly stated that Solomon erected a high place for Molech on the Mount of Olives (1 Kings xi. 7); and from that period his worship continued uninterruptedly there, or in Tophet, in the valley of Hinnom, until Josiah defiled both places (2 Kings xxiii. 10, 13). Jehoahaz, however, the son and successor of Josiah, again 'did what was evil in the sight of Jehovah, according to all that his fathers had done' (2 Kings xxiii. 32). The same broad condemnation is made against the succeeding kings, Jehoikim, Jehoiachin, and Zedekiah; and Ezekiel, writing during the captivity, says, 'Do you, by offering your gifts, and by making your sons pass through the fire, pollute yourselves with all your idols *until this day*, and shall I be inquired of by you?' (xx. 31). After the restoration, all traces of this idolatry disappear.

It has been attempted to explain the terms in which the act of sacrificing children is described in the O. T. so as to make them mean a mere passing between two fires, without any risk of life, for the purpose of purification. This theory—which owes its origin to a desire in some Rabbins to lessen the mass of evidence which their own history offers of the perverse idolatries of the Jews—is effectually declared untenable by such passages as Ps. cvi. 38; Jer. vii. 31; Ezek. xvi. 20; xxiii. 37; the last two of which may also be adduced to show that the victims were slaughtered before they were burned.

As the accounts of this idol and his worship found in the O. T. are very scanty, the more detailed notices which Greek and Latin writers give of the bloody rites of the Phœnician colonies acquire peculiar value. Münter has collected these testimonies with great completeness, in his *Religion der Karthager*. Many of these notices, however, only describe late developments of the primitive rites. Thus the description of the image of Molech as a brazen statue, which was heated red hot, and in the outstretched arms of which the child was laid, so that it fell down into the flaming furnace beneath—an account which is first found in Diodorus Siculus, as referring to the Carthaginian *Κρόνος*, but which was subsequently adopted by Jarchi and others—is not admitted by Movers to apply to the Molech of the O. T.

The connection between Molech and Baal—the very names, as meaning 'king' and 'lord,' being almost synonymous—is seen in comparing Jer. xxxii. 35 with xix. 5, in which both names are used as if they were interchangeable, and in which human sacrifices are ascribed to both. Another argument might be drawn from Jer. iii. 24, in which *Habbosheth*, 'shame,' is said to have devoured their flocks and herds, their sons and daughters. Now, as Bosheth is found in the names Ishbosheth and Jerubbesheth, to alternate with Baal, as if it was only a contemptuous perversion of it, it would appear that human sacrifices are here again ascribed to Baal. Further, whereas Baal is

vii. 43, might also be adduced here. But it is not clear that Molech is intended by the 'your king' of the original text; and Jarchi refers the whole verse to the *future*, instead of the past, in which he is followed by Ewald.

\* The words in Amos v. 26, as rendered by the Septuagint, and as cited from that version in Acts

the chief name under which we find the principal god of the Phœnicians in the O. T., and whereas only the two above-cited passages mention the human victims of Baal, it is remarkable that the Greek and Latin authors give abundant testimony to the human sacrifices which the Phœnicians and their colonies offered to their principal god, in whom the classical writers have almost always recognised their own *Kρόνος* and Saturn. Thus we are again brought to the difficulty, alluded to above [BAAL], of reconciling Molech as Saturn with Baal as the sun and Jupiter. In reality, however, this difficulty is in part created by our association of classical with Semitic mythology. When regarded apart from such foreign affinities, Molech and Baal may appear as the personifications of the two powers which give and destroy life, which early religions regarded as not incompatible phases of the same one God of nature.—J. N.

**MONEY.** The present article seems necessarily to fall into three distinct heads—I. *Uncoined Money*; II. *Coined Money*; and, III. *Money in N. T.* The first division treats of uncoined money in general, and of uncoined money in the O. T. In the second, the antiquity of coined money and the principal monetary systems of antiquity are briefly traced; whilst the coined money mentioned in the Bible, and the money of the Jewish high-priests and princes, is fully treated upon. The third division includes the Greek and Roman money mentioned in the N. T.

**I. UNCOINED MONEY.**—1. *Uncoined Money in General.*—In the many excavations which have been made in Egypt, Assyria, and Babylonia, no specimen of coined money has yet been discovered. Egyptian money was composed of rings of gold and silver; and in Assyria and Babylonia only clay tablets commemorating grants of money *specified by weight* have been found in considerable numbers; whilst in Phœnicia no pieces of an antiquity earlier than the Persian rule have yet come to light (Rawlinson, *Herod.*, vol. i. p. 684). Nor, indeed, is coined money found in the time of Homer, but traffic was pursued either by simple barter (*Il.* vii. 472; xxiii. 702; *Odys.* i. 430); or by means of masses of unwrought metal, like lumps of iron (*Il.* xxiii. 826; *Odys.* i. 184); or by quantities of gold and silver, especially of gold (*Il.* ix. 122, 279; xix. 247; xxiii. 269; *Odys.* iv. 129; viii. 393; ix. 202, etc.), which latter metal, called by Homer *τάλαντον χρυσοῦ*, seems to be the only one measured by weight. Before the introduction of coined money into Greece by Pheidon, king of Argos, there was a currency of *ὀβελοῖκοι*, 'spits' or 'skewers,' six of which were considered a handful (*δραχμή*). Colonel Leake thinks that they were small pyramidal pieces of *silver* (*Num. Chron.*, vol. xvii. p. 203; *Num. Hellen.*, p. 1, appendix), but it seems more probable that they were nails of *iron* or *copper*, capable of being used as spits in the Homeric fashion. This is likely, from the fact that six of them made a handful, and that they were therefore of a considerable size (Rawlinson, *Herod.*, App., bk. i. p. 688).

2. *Uncoined Money in the O. T.*—The first notice in the Bible, after the Flood, of uncoined money as a representative of property and medium of exchange, is when Abraham came up out of Egypt 'very rich in cattle, in silver, and in gold'

(Gen. xiii. 2; xxiv. 35). We next find 'money' used in commerce. In the purchase of the cave of Machpelah, it is said, 'And Abraham weighed

(וַיִּשְׁקֶל) to Ephron the silver which he had named

in the audience of the sons of Heth, four hundred shekels of silver current with the merchant' (עֶבֶר לְפָחַר; LXX. *δοκίμου ἐμπόρου*, Gen. xxiii. 16).

When Jericho was taken, Achan embezzled from the spoils 200 shekels of silver, and a wedge (*Heb.* tongue) of gold (γλῶσσαν μίαν χρυσῆν) of 50 shekels weight (Josh. vii. 21). Silver as a medium of commerce may be met with among the nations of the Philistines (Gen. xx. 16; Judg. xvi. 5, 18; xvii. 2, *seq.*), the Midianites (Gen. xxxvii. 28), and the Syrians (2 Kings v. 5, 23). By the laws of Moses, men and cattle (Lev. xxvii. 3, *seq.*; Num. iii. 45, *seq.*), the possessing houses and fields (Lev. xxvii. 14, *seq.*), provisions (Deut. ii. 6, 28; xiv. 26), and all fines for offences (Exod. xxi. xxii.) were determined by the value of money. The contributions to the temple (Exod. xxx. 13; xxxviii. 26), the sacrifice of animals (Lev. v. 15), the redemption of the first-born (Num. iii. 45, *seq.*; xviii. 15, *seq.*), the payment to the seer (1 Sam. ix. 7, *seq.*)—in all these cases the value is always represented as silver. It seems probable from many passages in the Bible that a system of jewel currency or ring-money was also adopted as a medium of exchange. The case of Rebekah, to whom the servant of Abraham gave 'a golden earring of half a shekel weight, and two bracelets for her hands of ten shekels weight of gold' (Gen. xxiv. 22), proves that the ancients made their jewels of a specific weight, so as to know the value of the ornaments in employing them as money. That the Egyptians kept their bullion in jewels seems evident from the plate given by Sir Gardner Wilkinson, copied from the catacombs, where they are represented weighing rings of silver and gold; and is further corroborated by the fact of the Israelites having, at their exodus from Egypt, borrowed 'jewels of silver and jewels of gold,' and 'spoiled the Egyptians' (Exod. xii. 35, 36). According to the ancient drawings, the Egyptian ring-money was composed of perfect rings. So, too, it would appear that the money used by the children of Jacob, when they went to purchase corn in Egypt, was also an annular currency (Gen. xlii. 35). Their money is described as 'bundles of money' (LXX. *δέσμοι*), and when returned to them, was found to be 'of [full] weight' (Gen. xliiii. 21). The account of the sale of Joseph by his brethren affords another instance of the employment of jewel ornaments as a medium of exchange (Gen. xxxvii. 28); and that the Midianites carried the whole of their bullion wealth in the form of rings and jewels seems more than probable from the account in Numbers of the spoiling of the Midianites—'We have therefore brought an oblation for the Lord what every man hath gotten (*Heb.* found), of jewels of gold, chains, and bracelets, rings, earrings, and tablets, to make an atonement for our souls before the Lord. And Moses and Eleazar the priest took the gold of them, even all wrought jewels' (xxxix. 50, 51). The friends of Job, when visiting him at the end of the time of his trial, each gave him a piece of money (קִישִׁיָּה) and an earring of gold (נֶגַם זָהָב; LXX. *τετράδραχμον χρυσοῦ καὶ ἀσκή*

μou), thus suggesting the employment of a ring-currency. (For this question, see W. B. Dickinson in the *Num. Chron.*, vols. vi. to xvi., *passim.*) The *Kesitah*, which has been rendered by the interpreters as 'a lamb,' and supposed to be a coin impressed with the figure of a lamb, is evidently a piece of silver of unknown weight (Hussey, *Weights and Measures*, p. 194). Supposing that the above-quoted passages relative to a gold medium of exchange be not admitted, there is a passage recording a purchase made in gold in the time of David. The threshing-floor of Ornan was bought by David for 600 shekels of gold by weight (1 Chron. xxi. 25). Yet even this is rendered doubtful by the parallel passage mentioning the price paid as 50 shekels of silver (2 Sam. xxiv. 24).

It seems then apparent from the several authorities given above, that from the earliest time silver was used by the Hebrews as a medium of commerce, and that a fixed weight was assigned to single pieces, so as to make them suitable for the various articles presented in trade. Unless we suppose this to be the case, many of the above-quoted passages (especially Gen. xxiii. 16; cf. 2 Kings xii. 4, *seq.*) would be difficult to understand rightly. In this latter passage it is said that the priest Jehoiada 'took a chest and bored a hole in the lid of it, and set it beside the altar,' and 'the priests that kept the door put in all the money that was brought into the house of the Lord.' These passages not only presuppose pieces of metal of a definite weight, but also that they had been recognised as such, either in an unwrought form or from certain characters inscribed upon them. The system of weighing (though the Bible makes mention of a balance and weight of money in many places, Gen. xxiii. 16; Exod. xxii. 17; 2 Sam. xviii. 12; 1 Kings xx. 39; Jer. xxxii. 9, 10) is not likely to have been applied to every individual piece. In the large total of 603,550 half-shekels (Exod. xxxviii. 26), accumulated by the contribution of each Israelite, each individual half-shekel could hardly have been weighed out, nor is it probable that the scales were continually employed for all the small silver pieces which men carried about with them. For instance, that there were divisions of the standard of calculation is evident from the passage in Exod. xxx. 13, where the half-shekel is to be paid as the atonement money, and 'the rich shall not give more, and the poor shall not give less' (ver. 15). The fourth part of the shekel must also have been an actual piece, for it was all the silver that the servant of Saul had at hand to pay the seer (1 Sam. ix. 8, 9). If a quantity of pieces of various weights were carried about by men in a purse or bag, as was the custom (2 Kings v. 23; xii. 10; Gen. xlii. 35), without having their weight marked in some manner upon them, what endless trouble there must have been in buying or selling, in paying or receiving. From these facts we may safely assume that the Israelites had already, before the exile, known silver pieces of a definite weight, and used them in trade. By this is not meant coins, for they are pieces of metal struck under an authority. A curious passage is that in Ezekiel (xvi. 36), which has been supposed to speak of brass money. The Hebrew text has יָעַן תְּשַׁכֵּן, which has been rendered by the

Vulg. 'quia effusum est æs tuum,' and by the

A. V. 'because thy filthiness was poured out.' As brass was the latest metal introduced for money into Greece, it seems very unlikely that we should have brass money current at this period in Palestine. The terms רָצִי כֶסֶף (Ps. lxxviii. 30) and אֲגוֹרֹת כֶּסֶף (1 Sam. ii. 36), are merely expressive of any small denomination of money [PIECE OF SILVER].

II. COINED MONEY.—I. *Coined Money*.—There are two generally received opinions relating to who were the inventors of coining money. One, that Pheidon, king of Argos, coined both gold and silver money at Ægina at the same time when he introduced a system of weights and measures (Ephor. ap. Strab. viii. p. 376; Pollux, ix. 83; Ælian, *Var. Hist.* xii. 10; *Marm. Par.*) The date of Pheidon, according to the Parian marble, is B.C. 895, but Grote places him between 770 and 730, whilst Clinton, Böckh, and Müller, place him between 783 and 744 (Grote, *Hist. of Greece*, vol. iv., p. 419, note). The other, that the Lydians 'were the first nation to introduce the use of gold and silver coin' (Herod. i. 94). This latter assertion was also made, according to Pollux (ix. 6, 83), by Xenophanes of Colophon, and is repeated by Eustathius (ap. Dionys. Perieg. v. 840). The early coins of Ægina and Lydia have a device on one side only, the reverse being an incuse square (*quadratum incusum*). On the obverse of the Æginetan coins is a tortoise, and on those of the Lydian the head of a lion. The reverse, however, of the Æginetan coins soon shows the incuse square divided into four parts by raised lines, the fourth quarter being again divided by a diagonal bar, thus forming four compartments. Apart, however, from the history relative to these respective coinages, which decidedly is in favour of a Lydian origin (Rawlinson, *Herod.*, vol. i., App., p. 683; Grotefend, *Num. Chron.*, vol. i., p. 235) against the opinion of the late Col. Leake (*Num. Hell.*, App.), the Lydian coins seem to be ruder than those of Ægina, and it is probable that whilst the idea of impress may be assigned to Lydia, the perfecting the silver and adding a reverse type, thereby completing the art of coinage, may be given to Ægina (W. B. Dickinson, *Num. Chron.*, N. S., vol. ii., p. 128). It may be remarked that Herodotus does not speak of the coins of Lydia when a kingdom, which coins have for their type the heads of a lion and bull facing, and which in all probability belong to Croesus, but of the electrum staters of Asia Minor. The earliest coined money current in Palestine is supposed to be the Daric (see later).

2. *The Principal Monetary Systems of Antiquity*.—This subject has already been ably treated by Mr. R. S. Poole (art. NUMISMATICS, *Encyclopædia Britannica*), and in the present article it will be sufficient for our purpose to briefly mention the different talents.

i. *The Attic talent* was that employed in most Greek cities before the time of Alexander who adopted it, and from that time it became almost universal in Greek coinage. Its drachm weighed about 67.5 grains Troy, and its tetradrachm 270 grains. In practice it rarely reached this standard in coins after the Punic war; at Alexander's time its tetradrachm weighed about 264 grains.

ii. *The Æginetan talent*, which was used at as early a period as the Attic, was employed in Greece and in the islands. Its drachm has an average

maximum weight of about 96 grains, and its didrachm about 192 grains. When abolished under Alexander, this weight had fallen to about 180 for the didrachm.

iii. *The Alexandrian, or Ptolemaic talent*, which may also be called the *Earlier Phœnician*, and also *Macedonian*, as it was used in the earlier coinage of the cities of Macedon, and by the Macedonian kings before Alexander the Great, was restored during the sway of the Ptolemies into the talent of Egypt. In the former case its drachm weighs about 112 grains, and its so-called tetradrachm about 224, but they fall gradually to much lower weights. In the latter case the drachm weighs about 50 grains, and the tetradrachm about 220.

iv. *The later Phœnician, or Carthaginian talent*, was in use among the Persians and Phœnicians. It was also employed in Africa by the Carthaginians. Its drachm (or hemidrachm) weighs, according to Mr. Burdon (Thomas, *Sale Cat.*, p. 57), about 59 grains, and its tetradrachm (or didrachm) about 236.

v. *The Euboic talent* in Greek money had a didrachm of 129 grains; but its system of division, though coming very near the Attic, is evidently different. The weight of its didrachm is identical with that of the Daric, showing the Persian origin of the system (R. S. Poole, art. WEIGHTS, Smith's *Dict. of the Bible*).

The order of origin may be thus tabulated:—

Macedonian,	224	didrachm.
Æginetan,	196	„
Attic-Solonian,	135	„ Euboic, 129; Later Phœnician, 236.

3. *Coined Money mentioned in the Bible*.—The earliest mention of coined money in the Bible refers to the Persian coinage. In Ezra (ii. 69) and Nehemiah (vii. 70) the word דַּרְכֻּמִּים occurs, and in Ezra (viii. 27) and 1 Chron. (xxix. 7) the word אֲדָרְכֻּמִּים, both rendered in the LXX. by χρυσοὺς, and in the Vulg. by *solidus* and *drachma*. Many opinions have been put forward concerning the derivation of the words *Adarkon* and *Darkemon* [ADARCONIM; Smith's *Dict. of Bible*, s. v. DARIC]; but a new suggestion has, however, recently been made, which, though ingenious, will not, I think, meet with much support. Dr. Levy (*Jüd. Münzen*, p. 19, note) thinks that the root-word is דָּרַךְ, 'to stretch,' 'tread,' 'step forward,' from the forward placing of one foot, which a man does in bending the bow, and that from this word was formed a noun, דָּרַכֵּן, or with the *Aleph* prefixed אֲדָרְכֵּן, 'archer,' which is the type upon these coins, especially as the ancients called the old Persian coins *roßdrai*. That the more extended form דַּרְכֻּמִּים could have been formed from the simple דָּרַכֵּן is very possible, as the *Mem* could have been easily inserted. All however agree that by these terms the Persian coin *Daric* is meant. This coin was a gold piece current in Palestine under Cyrus and Artaxerxes Longimanus. The ordinary Daric is not of uncommon occurrence; but Levy (*l. c.*) has given a representation of a *double piece*, thereby making the ordinarily received Daric a *half-Daric*. Of the *double piece*, he says, three only are known. In this he is mistaken, as Mr. Borrell the coin-dealer has a record of no less than eight specimens

(F. W. Madden, *Hist. of Jewish Coinage*, etc., p. 272, note 4). The whole piece is not allowed by Mr. Poole in his article 'WEIGHTS' (Smith's *Dict. of Bible*), nor is a specimen of it in the British Museum.

Besides these gold pieces, a silver coin also circulated in the Persian kingdom, named the *siglos*. [See the note s. v. DRACHM, vol. i. p. 699.] Mention is probably made of this coin in the Bible in those passages which treat of the Persian times (Neh. v. 15; cf. x. 32). Of these pieces 20 went to one gold Daric (Mommsen, *Geschichte des Röm. Münzwesens*, pp. 13 and 855), which would give a ratio of gold to silver 1 to 13 (*Herod.*, iii. 95). These coins also have an archer on the obverse. As long, then, as the Jews lived under Persian domination, they made use of Persian coins, and had no struck coins of their own. In these coins also were probably paid the tributes (*Herod.*, iii. 89).

On the overthrow of the Persian monarchy in B.C. 333, by Alexander III. the Great, Palestine came under the dominion of the Greeks. During the lifetime of Alexander the country was governed by a vice-regent, and the high-priest was permitted to remain in power. Jaddua was at this time high-priest and in high favour with Alexander (*Joseph. Antiq.* xi. 8. 5). At this period only Greek coins were struck in many cities of Palestine. The coinage consisted of gold, silver, and copper. The usual gold coins were *staters*, called by Pollux Ἀλεξάνδρειοι. The silver coins mostly in circulation were tetradrachms and drachms. There are two specimens of the tetradrachms struck at Scythopolis (the ancient Bethsean), preserved in the Gotha and Paris collections. There are also tetradrachms with the initials IOH struck at Joppa, which, being a town of considerable importance, no doubt supplied Jerusalem with money. Some of his coins bear the monograms of two cities sometimes at a great distance from each other, showing evidently some commercial intercourse between them. For instance, Sycamina (Hepha), and Scythopolis (Bethsean), Ascalon, and Philadelphia (Rabbath-ammon). (Müller, *Numismatique d'Alexandre le Grand*, 1464. Pl. xx.)

Shortly after the death of Alexander the Great in B.C. 324, Palestine fell into the hands of Ptolemy I. Soter, the son of Lagus, from whom Antigonus wrested it for a short time, until, in B.C. 301, after the battle of Ipsus, it came again into his hands, and afterwards was under the government of the Ptolemies for nearly 100 years.

The same system of coinage was continued under the Seleucidæ and Lagidæ, and we find the same and other mints in Palestine. The history, from the present time to B.C. 139, will be found under ANTIOCHUS, MACCABEES, and other names, and would be out of place in an article which more especially treats only of money.

The next distinct allusion to coined money is in the Apocrypha, where permission to strike money is granted to Simon Maccabæus. This passage has raised many opinions concerning the Jewish coinage, and among the most conspicuous is that of M. de Saulcy, whose classification of Jewish coins has been generally received and adopted. It has been fully treated upon by Mr. J. Evans in the *Numismatic Chronicle* (vol. xx. p. 8, *seq.*), and by Mr. Poole in his article MONEY in Dr. Smith's *Dict. of the Bible*. Though the writer of the present

article does not adopt many of De Saulcy's theories, it will be as well to give shortly De Saulcy's classification, and to state the principal objections.

M. de Saulcy has classified Jewish coins into three epochs:—(1.) Autonomous coins struck during the reign of Alexander the Great; (2.) Coins of the Asamonean princes; (3.) Coins struck during the revolt of the Jews, including those of Simon Barcohab. M. de Saulcy classes to the 1st epoch the shekels and half-shekels of silver, and the half-shekel and quarter-shekels of copper; also the copper coins inscribed *לנאולת ציון*, with a vase similar to the shekels, and on the reverse *שבת ארבע*, 'the fourth year,' and the *lulab* between two *ethrogs* (citrons).

These coins De Saulcy has assigned to the pontificate of Jaddua, and it appears that Jaddua lived barely four years after B.C. 332. His reason for assigning them to Jaddua rests only on a doubtful historical passage in Josephus, where Alexander is said to have had an interview with this high-priest at Jerusalem. But it does not appear that Alexander granted the Jews perfect liberty, though he allowed them to live according to their own laws. It is curious, too, that no coins have been found belonging to a later date than 'the fourth year of the deliverance of Zion,' and not easy of comprehension why the liberty granted by Alexander from B.C. 332 should have lasted only *four years*, and not till the time of his death. Moreover, these shekels, had they been struck in the time of Alexander, would have been of the same weight as the tetradrachms of the Macedonian conqueror, for Alexander suppressed all weights excepting the Attic, and was not likely to have allowed Jaddua to issue a coinage different from the Attic. It appears, however, that they contain a sixth of copper mixed with the silver (Bayer, *De Num. Hebr.*, p. 66), and so do the coins of the last Syrian kings and the Parthian kings contemporary with Simon Maccabæus. Thus far we must object to M. de Saulcy's theories.

The coins of the 2d epoch, or those struck by the Asamonean princes, are mostly of copper, and all, save Antigonus, of small module. Coins are ascribed by De Saulcy to the following princes:—

Judas Maccabæus	- - -	B.C. 164-161.
Jonathan	- - -	B.C. 161-143.
John Hyrcanus	- - -	B.C. 135-106.
Judas Aristobulus and Antigonus	B.C.	106-105.
Alexander Jannæus	- - -	B.C. 105-78.
Alexandra	- - -	B.C. 78-69.
Antigonus	- - -	B.C. 40-37.

It will here be seen that to Simon Maccabæus, to whom nearly all the Jewish coins have hitherto been ascribed, no coins are assigned. The coins given by De Saulcy to Judas bear the title of high-priest, and it is not at all certain that Judas ever had this office. It is true that Josephus calls Judas 'high-priest of the nation,' and says that he was elected by the people after the death of Alcimus (*Antiq.* xii. 10. 6.); but, on the other hand, we find in the Maccabees (1 Maccab. x. 20) that Alcimus did not die till after the death of Judas, and that Alexander conferred the priesthood on Jonathan, the brother of Judas. Indeed, Josephus elsewhere states that 'the first of the sons of Asmonæus, who was high-priest, was Jonathan' (*Vit.*, sec. 1). It may be that Judas held an inferior office under Alcimus, or if elected by the people in opposition to Alcimus,

was never confirmed in his post by the Syrian kings. Many other objections can be raised, but an observation made by Mr. Poole (art. MONEY, Smith's *Dict. of Bible*) sets the matter at rest—'These small copper coins have for the main part of their reverse types a Greek symbol, the united cornu-copie, and they therefore distinctly belong to a period of Greek influence. Is it possible that Judas the Maccabee, the restorer of Jewish worship, and the sworn enemy of all heathen customs, would have struck money with a type derived from the heathen, and used by at least one of the hated family that oppressed Israel—a type connected with idolatry, and to a Jew as forbidden as any other of the representations on the coins of the Gentiles? It seems to us that this is an impossibility, and that the use of such a type points to the time when prosperity had corrupted the ruling family, and Greek usages once more were powerful in their influence. This period may be considered to commence in the reign of John Hyrcanus, whose adoption of foreign customs is evident in the naming of his sons far more than in the policy he followed.' The origin of the type of the cornu-copie will be spoken of under the coins of John Hyrcanus. The 3d epoch of De Saulcy consists of the coins of Simon Barcohab. New attributions have, however, been attempted by Dr. Levy of Breslau, in his *Jüdische Münzen*, which will be given in their proper place.

We prefer, then, adopting the theory of Bayer, Eckhel, Cavedoni, and others, that the Jewish coinage commenced under Simon Maccabæus.

In the hundred and seventieth year (B.C. 142) of the Seleucidæan era, Demetrius II., king of Syria, granted freedom to the Jewish people, 'and the yoke of the heathen was taken away from Israel,' and the people wrote in their contracts 'in the first year of Simon the high-priest, the governor and leader of the Jews'—a form which Josephus gives: 'in the first year of Simon the benefactor and ethnarch of the Jews' (*Antiq.* xiii. 6. 7). In B.C. 139 Antiochus VII. Sidetes, granted even more privileges than Demetrius; for, besides confirming all the gifts and decrees of other kings before him, he gave Simon leave 'to coin money for his country with his own stamp' (*καὶ ἐπέτρεψε αὐτῷ ποιεῖσαι νόμισμα ἴδιον νόμισμα τῇ χώρας σου*. xv. 6); and though there may not seem to be sufficient reason for supposing that Simon made use of the privilege of coining before Antiochus actually conferred it upon him, it is more than probable that he did so. It has not been hitherto observed that Antiochus VII. must have granted the privilege of coining to Simon previous to his brother, Demetrius II., being taken prisoner by Mithridates I., king of Parthia (Arsaces VI., 1 Maccab. xiv. 1), in B.C. 138, and himself obtaining the throne in B.C. 137. The grant took place in the fourth year of Simon's pontificate (B.C. 139), and his coins date from the November of that year to his death in February B.C. 135. These dates will give *three* years and a commencement of a *fourth* for the *four* years of Simon of which we possess coins. It is, however, to be remarked, that in the same year that the permission of coinage was granted to Simon, Antiochus 'brake all the covenants which he had made with him afore' (1 Maccab. xv. 27), and this may prove that Simon struck coins previous to the actual permission being conferred, and during the most prosperous period of his reign. [For this question, see F. W. Madden, *History of Jewish Coinage*, p. 40, note.]

We now pass to the description of the coins:—

SILVER.

The character upon these shekels, and all other [Weights.]

These results have been obtained by Mr. Poole and the whole question of the Jewish coin weights is fully gone into in his article 'Weights,' in Dr. Smith's *Dict. of the Bible*. Further investigations must be reserved for another article.

Average Supposed Weight.	Average Supposed Weight.
Half - 23.4 grs.	Half - 22.0 grs.
Quarter 13.0 grs.	Quarter 11.0 grs.
(Sixth) 8.8 grs.	(Sixth) 7.3 grs.
(Third) 83.3 grs.	(Third) 73.3 grs.

Copper Coins.

Silver Coins.

The two heaviest denominations of the copper quarter of a Macabean shekel [DRACHM]. The smaller coin, which has no denomination, gives an average weight of 81.3 grs. This appears to be the third of the half. The following table shows that the copper 'half' and 'quarter' are half and quarter shekels.

The weight of the so-called tetradrachm of the Ptolemaic talent exactly corresponds to the weight of the extant shekel, viz., 220 grains [Weights and Measures]. It has been inferred by Col. Leake that 'as the word *δραχμή* is employed by the LXX. synonymously with *σίκλος* for the Hebrew word shekel, that the shekel and didrachmon were of the same weight,' and 'from the fact of the half-shekel of the Pentateuch being translated by the LXX. *τὸ ἡμισυ τοῦ δραχμῶνος*, therefore the Attic and not the Greco-Egyptian didrachm was intended by them' (*Num. Hist.*, App.; *Num. Chron.*, vol. xvii., p. 206). [For full statement of Col. Leake's theory, see DIDRACHM]. The didrachm was, however, the common term employed by the Jews for the coin which was equal in weight to the shekel—the Ptolemaic didrachm. The stater of silver was a tetradrachm, and the duty to the temple being a didrachm, a *stater* was found to remark of our Lord and Simon [DIDRACHM]. The four Attic drachms (*Minig*, iii. 8. 2) is easily understood, as Josephus is speaking of four Attic drachms of his own time, and the drachm and denarius were identical, the latter being also equal to the quarter of a Macabean shekel [DRACHM].

Hebrew coins, stands quite by itself, yet its great similarity to its parent, the Phœnician, affords convincing proof of its origin. It existed during a period of 300 years, commencing in B.C. 139, and from that date to B.C. 40 being in constant use. It was again adopted during the revolts, and ceases only with the death of Bar-cochab in A.D. 138. Gesenius (*Geschichte der Heb. Sprache und Schrift*, p. 156, *seq.*) accounts for its late use by instancing the case of the Cufic characters on Mohammedan coins met with long after the *Nishki* was employed for writing. It also bears great resemblance to the Samaritan (see Alphabet of the Stones from Nablous, in Levy, *Jüd. Münzen*, p. 137, and F. W. Madden, *Hist. of Jewish Coinage*, plate), and it is not therefore surprising that the coin character has been called *Samaritan*, though it is beyond all doubt that the Samaritans first acquired it from the Jews, but modified it after their separation (Levy, *Jüd. Münzen*, p. 141). The use of this character, as already shown by Mr. Poole (art. MONEY, Smith's *Dict. of the Bible*), does not offer any evidence as to age, and there is no palæographic reason why these shekels and half-shekels should not be as early as the Persian period. By the discovery of De Vogüé of the coins of Eleazar the priest (see below), a new letter, *Zain*—which bears great resemblance to the Samaritan form of the same letter found in MSS.—has been added to the coin-alphabet. There are now only wanting *Teth*, *Phe*, and *Samech*.

The inscriptions upon these coins do not offer any particular peculiarities. The title of 'holy' appears to have been attached to Jerusalem at a very early time (Is. xlviii. 2; lii. 1; Dan. ix. 24; Neh. xi. 1, 18; Joel iii. 17); and the decree of Demetrius expressly states that it should be 'holy and free' (ἱερὰν καὶ ἀσυλὸν καὶ ἐλευθέραν, Joseph. *Antiq.* xiii. 2. 3; cf. 1 Maccab. x. 31; xv. 7). In St. Matt. it is also called the 'holy city' (Matt. iv. 5; xxvii. 53; cf. Rev. xi. 2). It is probable that the inscriptions on the shekels of Simon were employed in the same sense as those we find on the coins of the coast-cities of the Mediterranean, which had been exempted from taxes, and which adopted the titles of holy (ἱερὰ), and inviolable (ἄσυλος). The mode of writing ירושלים, instead of ירושלם on the shekels from the year two, has been supposed by Cavedoni (*Bibl. Num.*, vol. i., p. 23) to allude to the taking of the fortress of Sion from the Syrians, and that this fortress constituted a second town, and therefore necessitated the employment of a *dual* name. This theory has already been rejected by De Saulcy (*Num. Jud.*, p. 18, note).

The types of the silver shekels and half shekels have been supposed to refer to the pot of manna and Aaron's rod that budded (Exod. xvi. 33; Num. xvii. 8), though Cavedoni (*Bibl. Num.*, vol. i., p. 29) prefers considering the former as a cup or chalice belonging to the furniture of the temple, and the latter as a hyacinth or lily, according to the words of Scripture, 'I will be as dew upon Israel, and he shall bloom like a lily' (Hos. xiv. 6; cf. Is. xxvii. 6; xxxv. 1). The cup or chalice also occurs upon the sixth of the copper shekel of the fourth year. The types of the copper coins doubtless indicate the prosperity of the land (cf. 1 Maccab. xiv. 8, *seq.*)

JOHN HYRCANUS, B.C. 135–B.C. 106.—Of the

thirty years' reign of John Hyrcanus there are a considerable number of coins, but all, like those of his successors, are struck in copper. The types are quite different from the silver and copper of his predecessor Simon, and consist of a double cornucopiæ, between which is a poppy-head. The obverse bears within an olive wreath the inscription—

יהוחנן הכהן הגדל וחבר היהודים  
(יהונן יהוכנן or יהונן)

(John the high-priest and the confederation of the Jews).

This legend clearly shows the political relation of the Jews at Rome. John Hyrcanus only calls himself 'high-priest' *not* 'prince of the Jews'; for he did not strike the current money in absolute authority, but in unity with the 'confederation of the Jews.' Mr. Poole, following De Saulcy, has translated the word חבר as 'friend'; and Reichardt (*Num. Chron.*, N.S., vol. ii., p. 269), on the authority of the Rabbi Levita (*Thishbi*, s.v. חבר), has suggested 'doctor'; but Cavedoni (*Bibl. Num.*, vol. ii., p. 14) and Levy (*Jüd. Münzen*, p. 50, note 3), in some lengthy arguments, have clearly established that 'nation' or 'confederation' is the correct term.

Certain specimens of the coins of John Hyrcanus have a Greek A above the old Hebraic inscription. This could only relate, as De Saulcy (*Num. Jud.*, p. 99) thinks, to the alliance between John Hyrcanus and Antiochus VII. Sidetes in B.C. 134, or Alexander Zebina in B.C. 126. The A denotes the name of one of these princes. Cavedoni (*Bibl. Num.*, vol. ii., p. 17), however, connects it with a *corona aurea*, which may have been sent by Antiochus or some other Syrian ruler to John Hyrcanus. This seems very improbable. The A may perhaps denote the 'year 1.'

There is one coin of John Hyrcanus which has upon it, in addition to the usual legend, a word left unexplained by De Saulcy (*Num. Jud.*, pl. iii. 3). Ewald has seen only two letters, and suggests that the word should be רש, 'highest general'; and quotes a corresponding term in the Maccabees (1 Maccab. xiii. 42). There is, however, no doubt that the letters are ראש, 'head or prince,' as Levy

360.

(*Jüd. Münzen*, p. 52, note) has already suggested, a fact further corroborated by a similar coin in the collection of Mr. Reichardt (*Num. Chron.*, N.S., vol. ii., p. 269).

The type of the two cornua-copiæ, which, as we have already said (see above), go far to prove that these small copper coins were not struck previous to the reign of Hyrcanus, first occurs on the Egyptian coins, and was probably adopted on the coins of the Seleucidæ on the occasion of a marriage with an Egyptian princess (R. S. Poole, art. MONEY, Dr. Smith's *Dict. of Bible*). The type on these Jewish coins seems to be an imitation of some of the coins of the kings of Syria. The two cornua-copiæ are first met with on coins of Alexander, which Mionnet (vol. v., p. 83, Nos. 730, 731) ascribes to Alex-

ander II. Zebina (B.C. 128-122), but which Cavedoni (*Bibl. Num.*, vol. ii., p. 16, note 9) thinks should rather belong to Alexander I. Balas; and they occur on a unique tetradrachm of Cleopatra, which Mr. Poole has suggested (*l. c.*) may have been adopted on her marriage with Alexander Balas, B.C. 150. This latter date is *after* the death of Judas, and in the middle of that of Jonathan, whilst Alexander II. Zebina is contemporary with Hyrcanus, who made this type a sign of his alliance with Zebina, and hence the Greek letter A may denote the name of Alexander Zebina (see above). It would indeed be singular to have the type of the two cornua-copiae on coins of the Maccabæan princes before it was adopted on those of the kings of Syria. The type is continued on the coins of the Herods and on the coins of Tiberius, struck by the procurators in A.D. 33. Almost the latest example of the double cornu-copiae on Jewish coins is on a coin of Agrippa II., struck under Domitian in A.D. 87, but Mionnet (vol. v., p. 484) gives it as occurring on a coin of Trajan struck at Tiberias. The single cornu-copiae occurs upon a coin of Agrippa II., under Domitian, with the date A.D. 94 (F. W. Madden, *History of Jewish Coinage*, p. 60, note 8, and p. 132).

We have assigned above a reign of 30 years to John Hyrcanus without a comment. It is, however, advisable to remark, that Josephus gives him respectively 30 (*Antiq.* xx. 10), 31 (*Antiq.* xiii. 10, 7), and 33 years of reign (*Bell. Jud.* i. 2. 8); whilst Eusebius (*Chron.*) only assigns to him a reign of 26 years. From the result of an examination of these conflicting statements we consider that 30 years is the correct time of his reign (*History of Jewish Coinage*, p. 53, note). Cavedoni (*Nuovi Studi sopra le Ant. Mon. Giud.*, p. 13) has already published a coin of John Hyrcanus with a Hebrew inscription within a wreath, and on the reverse two cornua-copiae and poppy-head; over the cornua-copiae the Greek letters L. A. (year 30).

JUDAS ARISTOBULUS, B.C. 106-105.—The coins now attributed by Cavedoni (*Bibl. Num.*, vol. ii., p. 18) and Levy (*Jüd. Münzen*, p. 54) to Judas Aristobulus (both of which names are expressly given to this son of Hyrcanus by Josephus, *Antiq.* xx. 10. 1), were formerly given by De Saulcy

361.

(*Num. Jud.*, p. 84) to Judas Maccabæus. Their inscription is to be read

יהודה כהן גלולא (יהודה) וחבר היהודים

'Judas, high-priest, and the confederation of the Jews.' The few coins of his reign inform us that he did not succeed in adding to himself the 'title of king,' and in governing quite independent, though Josephus (*Antiq.* xiii. 11. 1; xx. 10. 1; *Bell. Jud.* i. 3. 1) and Eusebius (*Chron.*) both state that he assumed the title of king, a title given to John Hyrcanus in the Arabic version of the Maccabees (chap. xxii. ed. Cotton) and to Alexander Jannæus by Strabo (lib. xvi. 2. 40). The types of his coins are the same as those of his predecessor. The word גלולא

on these coins is extremely doubtful, and it is more probable that גרול is the correct form. Out of five coins examined by De Saulcy, one read גלול, three גרול, and one גרל (*Rev. Num.* 1857, p. 290). Mr. Reichardt also states that on two coins of his cabinet the adjective גרול is quite clear (*Num. Chron.*, N. S., vol. ii., p. 270). Coins of Judas, from the shortness of his reign, are very rare.

ALEXANDER JANNÆUS, B.C. 105-B.C. 78.—Of the reign of Alexander Jannæus there are a considerable number of coins. Cavedoni (*Bibl. Num.*, vol. ii., p. 12) and Levy (*Jüd. Münzen*, p. 57) attribute to him all the coins which De Saulcy (*Num. Jud.*, p. 85) has given to Jonathan Maccabæus. This attribution is further strengthened by the discovery of some double-struck coins by Mr. Poole in the British Museum, which show distinctly ANAP.T [AAEΞANAPOT] and EQΣ [BAΣIAEQΣ] under the Hebrew legend, the original type being of the class already assigned to Alexander Jannæus by De Saulcy. His coinage may be divided into two classes—those struck previous to his quarrel\* with the Pharisees, and those struck after his reconciliation. The former are bilingual, having on the obverse יהונתן הכהן

362.

'Jehonathan the king,' and on the reverse AAEE-ANAPOT BAΣIAEQΣ. A coin in the cabinet at Marseilles has *only* the Greek legend. The latter class, which has the same types as the coins of his predecessors, Hyrcanus and Aristobulus, have the legend—

363.

יהונתן הכהן הגרל וחבר היהודים (ינתן),

'Jehonathan (or Jonathan) the high-priest, and the confederation of the Jews.' On one of his coins (De Saulcy, *Num. Jud.*, pl. ii. 10; F. W. Madden, *Hist. of Jewish Coinage*, p. 70) Alexander Jannæus couples his name with the Jews in general, and leaves out the word חבר, 'confederation,' showing that he wished to make the irritated people attached to him. The types of the coins of the first class, which are a half-opened flower,

\* There is a very remarkable coin in the British Museum, with a portrait on the obverse, and on the reverse a star. It perhaps belongs to Alexander Jannæus, and may have been struck during his quarrel, though there is still the possibility that it belongs to Alexander II., and was his first attempt at coinage after his escape from Rome (F. W. Madden, *Hist. of Jewish Coinage*, p. 68, note 5).

a star, anchor, etc., are doubtless copied from some coins of Antiochus VII. Sidetes (De Saulcy, *Num. Jud.*, pl. iii. 13, 14), and Antiochus VIII. Epiphanes (*Trésor de Num.*, pl. lii. 10).

ALEXANDRA, B.C. 78-69.—There is only one coin known of the nine years' reign of Alexandra, which was first published by De Saulcy (*Num. Jud.*, pl. iv. 13).

*Obv.* ΑΛΕΞΑΝΔ. ΒΑΣΙΛΙΑΣ, round an anchor.

*Rev.* A star with eight rays, in the intermediate spaces of which are the traces of a Hebrew legend, of which only a ת (probably belonging to a word, מלכה, *Queen*) is visible. Æ 3.

The correctness of the attribution of the coins described above to Alexander Jannæus, is somewhat supported by the above coin of his widow, Alexandra, bearing as it does an anchor on the obverse and a similar bilingual legend.

HYRCANUS II., B.C. 69-65.—*No coins.*

ARISTOBULUS II., B.C. 65-49.—*No coins.*

ALEXANDER II., B.C. 65-49.—It has been generally supposed that there were no coins of Alexander II., the son of Aristobulus II. The internal struggles of the brothers Hyrcanus and Aristobulus, who, not choosing to abide by the decision of Pompey in favour of Hyrcanus, was sent captive to Rome with his two sons, Alexander and Antigonus, thus causing Judæa, which had risen to power through the unity of the Asmonæans, to become through their dissensions a tributary province of Rome, fully explains the reason why we possess so few coins of this period. Cavedoni (*Bibl. Num.*, vol. ii. p. 22, note) suggests that the small brass coins, published by De Saulcy (pl. iv. 9-12), and ascribed by him to Alexander Jannæus, belong to Alexander II. They may be described as follows:—

*Obv.* ΑΛΕΞΑΝΔ. ΒΑΣΙΛΕΥΣ, round an anchor.

*Rev.* A beaded circle round a star (or an anchor within a wreath). Æ 3.

There are generally traces of letters on the reverse, which have not been deciphered, owing to the bad condition of the coins. There is, however, in the collection of the Rev. H. C. Reichardt, a coin with ΕΑ on the obverse, and on the reverse the Hebrew inscription יונתן כ, 'Jonathan the Priest.' This coin Reichardt thinks may belong to Hyrcanus II., from its style, fabric, and types, which are similar to the coins of Alexander II. But, in all probability, it belongs to Alexander II., whose Jewish name, like that of his grandfather Alexander Jannæus, might also have been 'Jonathan' or 'Jonathan.' There are also, in the collection of the Rev. H. C. Reichardt, two interesting coins with a partially legible Hebrew inscription, written round the circle on the reverse.

The only remaining word is עלזדרעש, *Alexadras*,

or עלכזדרעש, *Alexadras*, proving that Alexander II. deviated from the custom of his predecessors by placing also his Greek name in Hebrew character.

HYRCANUS II., restored B.C. 47-40.—*No coins.*

ANTIGONUS, B.C. 40-37.

*Obv.* ΒΑΣΙΛΕΥΣ ΑΝΤΙΓΟΝΟΥ, round a wreath.

*Rev.* מרתיה הכהן הנל וחבר היהודים, 'Mattathias the high-priest, and the confederation of the Jews.' Two cornucopiae. Æ 5.

This legend is made up from the specimens engraved in De Saulcy (pl. v. 1-8), by M. de Vogüé (*Rev. Num.*, 1860, p. 284, note). Both De Saulcy and Levy are inclined to regard Mattathias as the Hebrew name of Antigonus, rather than as a name of the ancestor of the Asmonæan family; and it seems more probable that the Jews should have known their chiefs by Jewish names. This supports the supposition that Jonathan was the Hebrew name of Alexander. On a coin in the collection of the Rev. H. C. Reichardt, the obverse

legend reads very legibly מרתיה כהן נל חבר יה, whilst between the cornucopiae, instead of the letters הנה, there are ש, i.e., 'year 1.' Another specimen has also very plainly ש, i.e., 'year 2.' The coins of Antigonus, both in size and style, differ from those of his predecessors; and Cavedoni (*Bibl. Num.*, vol. ii. p. 25) sees a resemblance to those of the Parthian and Bactrian kings; which is likely, as Antigonus obtained his throne by the aid of the Parthians (Joseph. *Antiq.* xiv. 13). Some specimens of the coins of Antigonus have only a single cornucopiae, perhaps to denote the half of its value. This seems to be confirmed by the weight. The coins with the double cornucopiae weigh, according to De Saulcy (*Num. Jud.*, p. 111), 14.2 grammes (209 grains) and under; those with the single cornucopiae, 7.7 grammes (118 grains) to 7 grammes (108 grains). Levy (*Jüd. Münzen*, p. 66, note 4) thinks that the coin weighing 10.7 grammes (165 grains) may be a three-quarter piece.

A curious coin in the collection of the Rev. Churchill Babington has a Greek legend on the same side as the cornucopiae. It is the smallest coin of Antigonus yet discovered (*Num. Chron.*, N. S., vol. ii. p. 64).

HEROD I., surnamed the Great.—The large extent of Herod's dominions, and the immense wealth he is said to have left to his relatives and to strangers, would lead us to infer that he must have had a very rich coinage. Josephus distinctly states that he left to his sister Salome five hundred thousand, to Cæsar ten millions, and to others five millions of coined silver (ἀργυριον ἐμισθίου, *Antiq.* xvii. 8. 1); whilst Zonaras (*Annal.* v. 16) says that Herod coined silver and gold from the vessels he took to assist the people who were suffering by famine in Syria and Judæa, a story also related by Josephus, with the exception that the words ἐλ νόμισμα are omitted (*Antiq.* xv. 9. 2). But the

coining of *gold* was interdicted in all countries subject to the Romans, and that of *silver* was only granted to some of the most important cities, as Alexandria, Antioch of Syria, etc. (Eckhel, *Doct. Num. Vet.*, vol. i. p. lxxi.) We thus find in Judæa only a *copper* coinage from the time of the taking of Jerusalem by Pompey, excepting in the time of the revolt under Eleazar, Simon, son of Gioras, etc., and the second revolt under Bar-cochab. It is probable that the sums mentioned by Josephus are much exaggerated, and the silver must have been *denarii*. The coinage of Herod is strictly Greek, and the earlier coinage of his reign seems to have been struck of three denominations, the *Τριχαλκον*, the *Διχαλκον*, and the *Χαλκοὺς*. Of the *Διχαλκον* there are at present no specimens existing in any cabinet. When the large coins ceased, the coins weighing 48 to 43 grains are the *semitis*, and those weighing 27 to 24, the *quadrans*. The specimen we here describe, which bears great resemblance in its types to the coins of Alexander Jannæus, evidently represents the *quadrans*, or *κοδράντης* of the N. T.

*Obv.* ΒΑΣΙΛ. ΗΡΩΔΑ, written round an anchor.

*Rev.* United cornu-copix, between which a caduceus. Æ 3.

None of his coins have the title ΜΕΓΑΣ, as Ewald has supposed [HERODIAN FAMILY].

HEROD ARCHELAUS.—Coins of Archelaus have the title *Ethnarch*.

The specimen here described, weighing 18 grains, doubtless represents the *λεπτόν* of the N. T. [See MITE; where a specimen is engraved.]

*Obv.* ΗΡΩ. Anchor.

*Rev.* ΕΘ (ΕΘΝΑΡΧΟΥ) in an oak wreath adorned with a gem. Æ 3.

HEROD ANTIPAS.—The coins of Herod Antipas bear the title *Tetrarch*; they are also of copper, and many of them are struck at Tiberias, a city built by Antipas in honour of the Roman emperor Tiberius (Joseph. *Antiq.* xviii. 2. 3). There are also coins struck by him under Caius. The following is a description of one of them:—

ΗΡΩΔΗΣ (*sic*) ΤΕΤΡΑΡΧΗΣ (*sic*). Palm-branch. In *field* Λ. ΜΓ (year 43).

*Rev.* ΓΑΙΩ ΚΑΙΣΑΡΙ ΓΕΡΜΑΝ [ικω], written in four lines within a wreath. Æ 5.

The date upon this coin (year 43 of Antipas) corresponds to A.D. 39, the year he was banished by Caius to Lugdunum (F. W. Madden, *Hist. of Jewish Coinage*, p. 99).

HEROD PHILIP I.—Of this prince there are no coins, though those which really belong to Philip II. the Tetrarch have been assigned to him (Akerman, *Num. Ill. of N. T.*, p. 18; *Trésor de Num.*, *Num. des Rois Grecs*, p. 126). It must be remembered that he was omitted in the will of Herod I. in consequence of the discovery that his mother Mariamne was conscious of the plots of Antipater (F. W. Madden, *Hist. of Jewish Coinage*, p. 100). [HERODIAN FAMILY.]

HEROD PHILIP II.—The coins of Herod Philip II., who is only mentioned once in the N. T. (Luke iii. 1), also bear the title *tetrarch*, and have on the obverse the effigy and inscription of a Roman emperor, and on the reverse a temple, between the columns of which are dates. The head upon the obverse of these coins has usually been considered to be that of Augustus; but unfortunately the dates upon the coins preserved to us show that if the head is that of Augustus, the coins must have been

struck after this latter's death. Mionnet, however, has given one coin with the date L. ΙΣ, year 16=A.D. 12, which (if it exists) must of course have the head of Augustus. There is, however, a coin in the collection of Mr. Wigan which proves that all coins of Philip II., with dates below L. ΙΗ (year 18=A.D. 14), bear the head of Tiberius. Its description is as follows:—

*Obv.* ΤΙΒΕΡΙΟΣ ΣΕΒΑΣΤΟΣ ΚΑΙΣΑΡ. Head of Tiberius to right, bare; before it a branch.

*Rev.* ΦΙΛΙΠΠΙΟΥ ΤΕΤ . . . Tetrastyle temple, between the columns L. ΑΖ (year 37=A.D. 33). Æ 4.

The effigy of the Roman emperor on these coins was a grave infraction of the Mosaic law. Perhaps this infraction took place at some distance from the centre of religion in a town chiefly inhabited by Greeks (*Trésor de Num.*, p. 126). The temple on the reverse is that built by Herod I. near Panium, and dedicated to Cæsar (Joseph. *Antiq.* xv. 10. 3; *Bell. Jud.* i. 21. 13).

HEROD AGRIPPA I., A.D. 37-44.—There is only one type of the coins of Agrippa that can be considered strictly Jewish. It is found very frequently at Jerusalem, and was from that circumstance most probably struck there.

*Obv.* ΒΑΣΙΛΕΥΣ ΑΓΡΙΠΠΑ. An umbrella.

*Rev.* Three ears of corn springing from one stalk; in *field* Λ. ς (year 6). Æ 4.

This type exists with dates as low as L. Θ. (year 9) (*Num. Chron.*, N. S., vol. ii. p. 272), which corresponds to A.D. 44, the year of his death. There is a coin of Agrippa I., probably struck at Cæsarea Palestine, and bearing the title ΜΕΓΑΣ. Other coins exist, struck under Caligula and Claudius.

HEROD, KING OF CHALCIS, A.D. 41-48.—The coins now assigned by Cavedoni (*Bibl. Num.*, vol. ii. p. 35) to Herod, king of Chalcis, were attributed by De Saulcy (*Num. Jud.*, p. 131, pl. vi., Nos. 10, 11, 12) to Herod I. From the fact of these coins bearing the image of a living creature—an eagle—which was contrary to the law, there is much in favour of Cavedoni's suggestion. Besides a flying eagle is also the emblem on a coin of Ptolemæus, tetrarch of Chalcidene (Eckhel, *Doct. Num. Vet.*, iii., p. 264).

AGRIPPA II., A.D. 48-100.—There is an interesting coin in the cabinet of Mr. Reichardt (*Num. Chron.*, N. S., vol. ii. p. 274) bearing the head of Agrippa II., an unusual circumstance for Jewish coins (see, however, under Alexander Jannæus). The coins of Agrippa II., struck under Nero, commemorate the name of Cæsarea Philippi, which Agrippa, in A.D. 55, had changed to that of *Neronias*. There are coins of Agrippa II. struck under Vespasian, Titus, and Domitian, and upon three different eras—‘that of the Chalcian era,’ that ‘of the tetrarchy of Philip being given to him,’ and that ‘of Tiberias.’ The last date of which we at present know is ET. EA. (year 35=A.D. 95). Agrippa died in A.D. 100 (see F. W. Madden, *Hist. of Jewish Coinage*, pp. 115-132).

The coins issued by the procurators from the time of Augustus to Nero do not offer sufficient peculiarities to be noticed here. There is, however, one which De Saulcy (*Num. Jud.*, p. 102) has read ΙΟΤΑΔΑ? ΒΑΣΙΛΕΥΣ? and which has been attributed by him to Judas Aristobulus, and which Poole (art. MONEY, Dr. Smith's *Diet. of Bible*) has suggested as a ‘probable attribution,’ should be assigned to

Judas Aristobulus, and the A for Antigonus. Cavedoni (*Bibl. Num.*, vol. ii. pp. 48, 50) has, however, classed this coin to Julia Augusta—1st, because had it belonged to Judas Aristobulus the C would have been of regular shape (Σ); and 2dly, the inscription would have been in Hebrew, or at least bilingual, and not Greek alone. De Saulcy (*Rev. Num.*, 1857, p. 297) has objected to this attribution, but Levy (*Jüd. Münzen*, p. 76, note 2) considers that it rests on good grounds. The coin may be described as follows:—

*Obv.* ΙΟΤΑΙΑ ΣΕΒ. within a wreath.

*Rev.* Two cornua-copize between which a poppy-head. Æ 3.

The types of the wreath and cornua-copize occur upon other coins of Tiberius (F. W. Madden, *Hist. of Jewish Coinage*, p. 142, 143).

The Jewish coinage has hitherto been thought to have closed with the revolt of Bar-cohab under Hadrian, and only two coins have been assigned by De Saulcy (*Num. Jüd.*, pl. x., 1, 2) to the revolt of the Jews, which ended in the capture and destruction of Jerusalem. Dr. Levy of Breslau has, however, carefully studied this latter part of the Jewish coinage, and has certainly arrived at many new and satisfactory results. The principal leaders of the first revolt are of as much importance as Bar-cohab in the second, who, according to Dr. Levy, was only an imitator of his predecessor Simon, son of Gioras.

It will not, however, be surprising if objections are raised to some of Dr. Levy's attributions, and whilst one states that the coinage of the first revolt has been too much enriched, to the loss of that of the second (Cavedoni, *Nuovi Studi*, etc., p. 28), another objects because Eleazar and Simon did not act in concert (Rose, *Smith's Dict. of Bible*, s. v. *Shekel*). The absence, too, of any coins of John of Gischala, who was also a powerful leader, is very curious. The coinage of Eleazar is, however, certain; and therefore there can be no reason why some of the other leaders should not have struck coins, and the attribution to Simon, son of Gioras, with analogous types to those of Eleazar, seems now almost proved. The attribution to Simon, son of Gamaliel, and Ananus, is not, however, so certain. Space will not permit us here to enter into any lengthy account either of the leaders or their coins, but we give as briefly as possible the results of Dr. Levy's researches, with reference for the coins to the woodcuts in our *History of Jewish Coinage*, where the whole question is thoroughly investigated.

**ELEAZAR.**—Eleazar, the son of Simon, was one of the principal leaders in the first revolt. He must be distinguished from Eleazar, the son of Ananias, of whom little or nothing is known (Joseph. *Bell. Jüd.* ii. 17. 2; 20. 4). Coins were first published and attributed to Eleazar by M. de Vogüé (*Rev. Num.* 1860, p. 260). They are of silver and copper.

366.

*Obv.* אֱלֶעָזָר הַכֹּהֵן, 'Eleazar the [high] priest.' Vase, in field to right a palm-branch.

*Rev.* שְׁנַת אֶחָת לְגִאֻלַּת יִשְׂרָאֵל, 'First year of the redemption of Israel.' Cluster of grapes. AR 4.

A silver coin somewhat resembling this one had already been published by De Saulcy (*Num. Jüd.*, pl. xii. 7); but without the specimen of De Vogüé it was impossible to decipher it with accuracy. The obverse has the same legend and type as the one above described, but on the reverse there is the name שִׁמְעוֹן, 'Simon,' within a wreath. It is to be observed that both De Saulcy and De Vogüé consider this coin to be forged, in imitation of a genuine specimen, and De Vogüé considers that the forger has copied the two sides from two different coins, one of Eleazar and one of Simon, but Levy (*Jüd. Münzen*, p. 89, note 2) suggests that a coin may have existed with Eleazar's name on one side and Simon's on the other, and that genuine specimens may have been struck when these two leaders were at peace. There are also copper coins which can be attributed to Eleazar. They had been previously published by Bayer (*De Num. Hebr.*, p. 65, pl. i. 4, 5), and supposed by him to have been stamped with letters composing a secret alphabet. De Saulcy (*Num. Jüd.* pp. 167-168; cf. pl. xiii. 7), who does not read them, does not agree with this suggestion. The discovery of De Vogüé, however, shows that the obverse legend of these coins is

367.

רֹעֵה לֵא  
וְהַ כֹּהֵן

'Eleazar the [high] priest' written retrograde in two lines on either side of a palm-tree. The reverse legend is the same as that on the silver coins. The *Vau* in the word הַכֹּהֵן on the silver coins is remarkable, and does not occur on the copper. The importance of these coins in adding the letter *Zain* to the coin-alphabet has been already alluded to. The statements respecting them by the Rev. H. J. Rose (art. *SHEKEL*, Dr. Smith's *Dict. of Bible*, vol. iii., p. 1247) are altogether incorrect.

Levy (*Jüd. Münzen*, p. 91) also attributes to Eleazar the shekels of the first (and second year?),

368.

which were given by De Saulcy (*Num. Jüd.*, pp. 188-189, pl. xi. 1, 3) to Bar-cohab. He also suggests that they may have been issued by order of the Sanhedrim (cf. Joseph. *Bell. Jüd.* ii. 20. 5) [see below]. They have upon the obverse the word יְרוּשָׁלַם, 'Jerusalem,' and the type a tetrastyle

temple. On the reverse **שנת אחת לנאלת ישראל**, the *ethrog* and *lulab*. The similar coin of the second year is held to be doubtful (De Saulcy, *Num. Jud.*, p. 159). The similarity of the reverse legends of these coins to those of Eleazar is rather in favour of their being of the time of the first revolt, for the word **לנאלת** does not occur upon any coin attributed to Simon, son of Gioras, nor upon any of the re-struck coins, which certainly belong to Bar-cohab. Moreover, the similar shekels, which, instead of **שמועון** on the obverse, have the name **ירושלם** (*Hist. of Jew. Coin.*, p. 170, 171), and a star over the temple, have the word **לחרות**. Many of these latter are certainly re-struck, and we consider them to be of Bar-cohab, especially on account of the star (see below). The word **לנאלת** also occurs on the coins bearing the title **נשיא** (*Nasi*). De Vogüé's suggestion (*Rev. Num.* 1860, p. 289), that the first-named shekels must be restored to Simon Macca-bæus, is altogether untenable.

**SIMON, son of Gioras.**—To Simon, son of Gioras, another powerful leader of the first revolt, coins have been assigned with types similar to those of Eleazar. Space does not permit us to enter fully into their description, and the coins which are assigned to this Simon by Levy are engraved in the *Hist. of Jew. Coin.*, p. 167-173. We select one as a specimen.

Obv. **שמועון**, Simon. Cluster of grapes.

Rev. (sic) **שנת אחת לנאלת ישראל**, 'second year of the deliverance of Israel.' AR 4.

As Simon did not enter Jerusalem until the third year (Joseph. *Bell. Jud.* iv. 9. 2), some objection may be raised to classing coins to him dated 'the second year.' But he may have struck coins in Acrabatine or Hebron, or some part of Idumæa, where he had established a firm footing (Levy, *Jüd. Münzen*, p. 119); moreover, it is curious that no coins of Simon have been discovered with dates higher than 'the year two,' which fully agrees with the time of his government in Jerusalem, which did not extend more than two years, A.D. 69 and 70. The coins, then, which bear the legend

**לחרות ירושלם**, 'the deliverance of Jerusalem,' and are *without a date*, belong to the first year of his entry into Jerusalem, whilst those of his second year have the legend **לחרת ישראל** (Levy, *l.c.*)

The attribution of the shekels with the star over the temple to Simon, son of Gioras, as I have already observed, is not free from objections. (See below, under Bar-cohab).

**SIMON, son of Gamaliel.**—To Simon, son of the famous Gamaliel, the 'Beauty of the Law,' Levy has assigned all the coins with the legend **שמועון** **נשיא ישראל**, 'Simon, prince of Israel.' This Simon was, at this time, the head of the Jewish Sanhedrim, and, conformably with his position, bore the title of 'Nasi.' All the coins which have

this title are only of copper; and if we assume as correct the attribution of the shekels with **ירושלם** on the obverse to Eleazar, then 'the senate of Israel may in this respect have imitated the Roman, who reserved to themselves the copper coinage' (Levy, *Jüd. Münzen*, p. 97). To the same supreme authority are ascribed the small copper coins of the years 2 and 3 of the deliverance of Zion, which

370.

correspond in fabric and weight with those of Nero of the year 5, struck at Jerusalem. The inscription **ציון**, 'Zion,' on these coins is remarkable, as differing from the other coins of Nero's revolt. It occurs on the coins of Simon Macca-bæus, but not in connection with **לחרות**, which is peculiar to the period of the revolts.

**ANANUS, son of Ananus.**—Ananus, son of Ananus, was probably the high-priest who was accused before Agrippa II. of the murder of James the Just (Joseph. *Antiq.* xx. 9. 2). He was considered, together with Jesus, son of Gamala, as the most esteemed of the high-priests (*Bell. Jud.* iv. 3. 9). They were both killed early in the revolt. He must not be confounded with Ananias the high-priest before whom St. Paul was tried (Acts xxiii. 3).

The copper coin assigned to Ananus by Levy has, upon the obverse, quite clearly, **שנת אחת לנאלת**, 'First year of the redemption of Israel,'

and on the reverse only single letters; two *Cheths*, a *Nun*, a *Lamed*, and perhaps a *Jod*. Could this coin belong to **הנחן בן חנן** (Hanan, son of Hanan)? This attribution must be received with great reserve; besides in our opinion the coin appears to be a badly preserved example of one of Eleazar.

The capture of Jerusalem was marked by both Roman and Greek-imperial coins of Vespasian and Titus, the former bearing the legends **IVDAEA CAPTA**, **IVDAEA DEVICTA**, **IVDAEA NAVALIS**, and the latter **ΙΟΥΔΑΙΑΣ ΕΛΛΟΙΚΤΙΑΣ**.

**SIMON BAR-COCHAB.**—The coinage of Simon Bar-cohab consists chiefly of re-struck *denarii*, which, weighing so nearly a quarter of a shekel, could be used without any difficulty in the coinage. The conjecture that this leader bore the name of 'Simon' rests only on the authority of the coins, for all authorities call him Ben-Kosiba, Bar-Kosiba, Bar-Kochiba, or Bar-cochebas. It seems certain that the names of the leaders in the first revolt must have been well known to the Jews in the second, and especially that of Simon, son of Gioras, and it is not surprising to find the words of the first revolt, and the name of one of the principal leaders, 'Simon,' struck by Bar-cohab on *denarii* of the Cæsars. Taking into consideration the very doubtful fact whether Bar-cohab ever held possession of Jerusalem (alluded to by Euseb., *H. E.*, iv. 6; *Chron.* i.; St. Jerome, *Dan.* ix. 27; *Ezech.* xxiv. 14; Appian, *Syr.*, 50; but not mentioned by Dio Cass., lxix. 14), and that the coins bear types evidently derived from the services of the temple (such as the trumpets, lyres, vases, etc.),

which symbols could hardly have been understood in the 2d century after the destruction of the sanctuary, it seems nearly certain that he was an imitator of the coinage of Simon son of Gioras (cf. Levy, *Jüdd. Münzen*, pp. 122, 123).

The specimen here described is a quarter shekel struck over a *denarius* of Trajan.

371.

Obv. שִׁמְעוֹן, 'Simon,' written round a cluster of grapes.

Rev. לְחֻרּוֹת יְרוּשָׁלַם, 'The deliverance of Jerusalem.' Two trumpets. AR 4.

On the obverse of this coin can be seen traces of the end of the laurel wreath which surrounded the head of the emperor, and on the reverse is a hand holding a branch. The actual coin on which this was struck was issued in the 5th consulship of Trajan (A.D. 105), and has on the reverse the figure of Arabia holding a branch over a camel (see Cohen, *Méd. Imp.*, vol. ii., p. 10, No. 47).

Shekels with the type of the porch of the temple and the *lulab*, and above the temple a star, etc., are

372.

said to exist re-struck, on tetradrachms of Antioch, of Titus, Domitian, or Trajan (Cavedoni, *Bibl. Num.*, vol. ii., p. 74). The original shekels are, as above stated, attributed by Levy to Simon, son of Gioras, but this star (cf. Num. xxiv. 17-24; and *ὡς ἐξ οὐρανοῦ φωστήρ αὐτοῖς κατελήλυθὼς*, Euseb. *Hist.* vi. 6) to our mind certainly alludes to Bar-cochab (בַּר כּוֹכָב); and are there any of these shekels existing which are *not restruck*? After the defeat of Bar-cochab, Hadrian established a new kingdom with Jerusalem for a capital, calling it *Ælia Capitolina*. A series of imperial colonial coins were there struck from the time of Hadrian (A.D. 136) to that of Herennius Etruscus and Hostilianus (A.D. 251).

The revolt of the Jews under Bar-cochab has usually been considered to be the last, but mention is made of another during the reign of Severus, after which '*Senatus Judaicum triumphum decreverat* (Spartian, in *Sev.* 16).' St. Jerome also mentions it in his Chronicle (an *V. Sev.*), '*Judaicum et samariticum bellum ortum vel resumptum*.' It cannot have been of any importance, and of it there are *no coins*.

III. MONEY IN N. T.—I. *Greek Money*.—The following Greek coins are mentioned in the N. T., *didrachm* (s. v.), *drachm* (s. v.), *lepton* (s. vv. MITE and FARTHING), and *stater* (s. v.) This last was

VOL. III.

\*

the piece of money found by St. Peter in the fish to pay the tribute-money. It has been proved to have been a tetradrachm [DIDRACHM]. The word *κόλλυβιστής*, in Matt. xxi. 12, Mark xi. 15, and John ii. 15, is derived from *κόλλυβος*, which was a small coin (Cic. *In Verr. Act.* ii., lib. iii. 78; Aristoph. *Pax.* 1199, etc.) The word *κόλλυβος* also signifies 'the changing of money' (Pollux, *Onom.*, lib. iii. 9).

2. *Roman Money*.—The Roman copper money mentioned in the N. T. are the *dupondius* (*Vulg.* Luke xii. 6), the *as* (*Vulg.* Matt. x. 29) employed respectively as the Latin equivalents of *δύο ἀσσάρια* and *ἀσσάριον*, and the *quadrians* (*κοδράντης*, Matt. v. 26; Mark xii. 42) [FARTHING]. In the article FARTHING we stated that it was probably a Greek imperial coin; specimens of it are most likely the coins of Augustus and Tiberius struck at Antioch, in Syria, with S.C. on the reverse in a wreath. One of them has already been published with the countermark ΓΑΔ (Mionnet, *Suppl.*, vol. viii., p. 139), proving that these coins were current in *Gadara* of Decapolis. They weigh from 302 to 242 grains, and equal the Roman *as* of copper (*Hist. of Jew. Coin.*, p. 302).

The only silver coin mentioned in the N. T. is the *denarius* (*δηνάριον*, A. V. *penny*, Matt. xviii. 28, etc.) [DENARIUS].

All three metals are mentioned together by St. Matthew (x. 9), though in the parallel passage in St. Mark (vi. 8) only copper money (*χαλκόν*) is alluded to (see also Mark xii. 41). Copper would be the most prevalent metal current, as we have seen in the coinage of the Herodian family, which was all *copper*. The silver was most likely the tetradrachms of the chief cities of Syria and Phœnicia. The word *ἀργύριον* is also employed for 'money' (Luke ix. 3). [DRACHM; PIECE OF SILVER.] No gold coin is mentioned in the N. T.

The chief works on Jewish coins are:—Perez Bayer, *De Numis Hebræo-Samaritanis*, 1781; *Numorum Hebræo-Samaritanorum Vindicie*, 1790; Celestino Cavedoni, *Numismatica Biblica*, 1850, and Appendix to the same, 1855; both translated into German, with large additions by A. von Werlhof, under the title of *Biblische Numismatik*, vol. i., 1855; vol. ii. 1856; F. de Sauley, *Numismatique Judaique*, 1854; M. A. Levy, *Jüdische Münzen*, 1862; F. W. Madden, *History of Jewish Coinage, and of Money in the O. and N. T.*, 1864.—F. W. M.

MONEY-CHANGERS. It is mentioned by Volney, that in Syria, Egypt, and Turkey, when any considerable payments are to be made, an agent of exchange is sent for, who counts paras by thousands, rejects pieces of false money, and weighs all the sequins, either separately or together. It has hence been suggested that the 'current money with the merchant,' mentioned in Scripture (Gen. xxiii. 16), might have been such as was approved of by competent judges whose business it was to detect fraudulent money if offered in payment. The Hebrew word סוֹחֵר, *socher*, signifies one who goes about from place to place, and is supposed to answer to the native exchange-agent or money-broker of the East, now called *shroff*. It appears that there were bankers or money-changers in Judæa, who made a trade of receiving money in deposit and paying interest for it (Matt. xxv. 27). Some of them had even established

P

themselves within the precincts of the temple at Jerusalem (xxi. 12), where they were in the practice of exchanging one piece of money for another. Persons who came from a distance to worship at Jerusalem would naturally bring with them the money current in their respective districts, and it might therefore be a matter of convenience for them to get this money exchanged at the door of the temple for that which was current in Jerusalem, and upon their departure to receive again that species of money which circulated in the districts to which they were journeying. These money-changers would, of course, charge a commission upon all their transactions; but from the observation of our Saviour, when he overthrew the tables of those in the temple, it may be inferred that they were not distinguished for honesty and fair dealing: 'It is written, my house shall be called the house of prayer, but ye have made it a den of thieves' (ver. 13).

In the *Life of Aratus*, by Plutarch, there is mention of a banker of Sicyon, a city of Peloponnesus, who lived 240 years before Christ, and whose whole business consisted in exchanging one species of money for another.—G. M. B.

MONTE, ANDREAS DE (אֲנֶרְיָאס דִּי מוֹנְטִי), is the Christian name of the distinguished chief rabbi in the synagogue of Rome, who, before his conversion to Christianity, was called *R. Joseph Tzarphathi Ha-Alaphasi* (ר' יוסף צרפתי האלפסי). He was born in the early part of the 16th century at Fez, in Africa (hence his second surname *האלפסי*, of Jewish parents, who were natives of France, which is indicated by his first surname *צרפתי*, *Gallus*). He emigrated to Rome, where, after exercising the office of chief rabbi for many years, and distinguishing himself as an expounder of the Mosaic law, he embraced Christianity about the year 1552, during the pontificate of Julius III. He at once consecrated his vast knowledge of Hebrew and rabbinical literature to the elucidation of the prophecies, with a view of bringing his brethren according to the flesh into the fold of the Romish Church, and wrote—(1.) A voluminous work, entitled *מבוכת היהודים*, *The Perplexity of the Jews*, demonstrating both from the Scriptures and the ancient rabbinical writings all the doctrines of the Christian religion. Bartolucci, who found the MS. in loose sheets in the Neophyte College at Rome, carefully collated it and had it bound. He did not know that it ever was printed, whilst Fürst (*Bibliotheca Judaica*, iii. 544, s. v. *Zarfati*) states that it was published in Rome 16... 4to. However, Fabiano Fiochi, in his work called *Dialogo della Fede*, has almost entirely transcribed it, so that the Biblical student may derive all the advantages from it for christological purposes. (2.) An epistle to the various synagogues, written both in Hebrew and Italian, and entitled *אגרת שלום*, *Lettera di Pace*, dated January 12, 1581. It treats on the coming of the true Messiah, and shows from the prophecies of the O. T., as well as from the works of the ancient Rabbins, that he must have come long ago in the person of Jesus Christ, Rome 16... 4to. This learned work and the former one are very important contributions to the exposition of the Messianic prophecies, and to the understanding of the ancient Jewish views about the Messiah. Gregory XIII. appointed

De Monte in 1576 preacher to the Hebrews of Rome in the oratory of the Holy Trinity; he was afterwards made Oriental interpreter to the pope, in which capacity he translated several ecclesiastical works from the Syriac and Arabic, and died in the beginning of the 17th century (comp. Bartolucci, *Bibliotheca Magna Rabbinica*, iii. 818, ff.; Wolf, *Bibliotheca Hebraea* 1556, ff.)—C. D. G.

MONTHS. It is proposed to comprise, under this head, some observations which may be considered supplementary to the articles on the separate months, and subordinate to that on the year. For this end it is expedient to distinguish three periods in the Jewish mode of denoting dates by months: the first extending until the Babylonian captivity; the second until one or two centuries after the destruction of Jerusalem by the Romans; and the third from the adoption of the calendar of Rabbi Hillel the younger (*i. e.*, from about the middle of the 4th century of our era) until the present time.

In the first period the months are, as a rule, mentioned by their numerical designation only—as 'the first month,' 'the second,' etc.\* We have no explicit indication of the number of days in a month, nor of the number of months in a year: the 27th day and the 11th month being respectively the highest mentioned (Gen. viii. 14; Deut. i. 3); unless 1 Kings iv. 7 be considered to prove that the year had twelve months.† Nevertheless, as the two Hebrew terms for month—*חֹדֶשׁ*, literally *new moon*, thence *month*, from a root signifying *to be new*; and *יָרֵחַ*, *moon*, and thence *month*—afford some proof that the months were measured by the moon (comp. Ps. civ. 19); and, as the festivals of the Mosaic law bore a fixed relation to certain epochs of the agricultural year, which were fixed by nature, there is much reason to conclude that the year had twelve lunar months, and that it must have been kept parallel with the sun by

\* The only exception to this rule in the Pentateuch, occurs in the terms, 'in the month of Abib,' which are found in the A. V. This is, however, only an apparent exception, since *הָאֵבִיב*, *The Abib*, is not the proper name of the month, but means *ears of corn*, and distinguishes that month, which is elsewhere called 'the first,' as the month of ears, in reference to the ripeness of the corn (Sept. *μῆν πῶν νέων*; Vulg. *mensis novarum frugum*). The only remaining exceptions in the other books of this period occur exclusively in 1 Kings vi. and viii., where we find the second, eighth, and seventh months called *Ziv* (זִיב), *Bul* (בּוּל), and *Ethanim* (הָאֶתָנִים). In this case, two circumstances militate against the hypothesis that these names were in the current use of the people: the one being, that this is the only instance of their use; the other, that the writer has, at the same time described the three by the order of their succession (as, 'in the month Ziv, which is the second month,' etc.), just as the writers of the second period do with the confessedly foreign names, *Nisan*, etc.

† Some have attempted to show, from the sum of days assigned to the flood (Gen. vii. 11; viii. 4, 14), that the ancient Hebrew months had 30 days each, and that the antediluvian year was a solar year of 365 days, like that of the Egyptians). (See Von Bohlen, *Die Genesis*, p. 107.)

some mode of intercalation adequate to, if not identical with, the one afterwards employed.

In the second period, we find, in part, a continuation of the previous method, with somewhat more definite statements (for instance, 1 Chron. xxvii. clearly proves that the year had twelve months), and, in part, the adoption of new names for the months: but the co-existence of both these systems is not easily explained. For, whereas Zechariah, Ezra, Nehemiah, and Esther, introduce the seven new names—Shebat, Chislew, Adar, Nisan, Elul, Tebeth, and Sivan—all the other canonical books written after the restoration do nothing more than enumerate the months, without any name, in the order of their succession. There is, moreover, another discrepancy in the usage of the writers of the former class, inasmuch as, while they all generally give the name of the month together with its ordinal adjective, Nehemiah gives the naked names alone. It is on these discrepancies that Benfey and Stern, who also give a minute statement of the particular deviations, rest one external support of their theory, that these names of the months are not Aramaic, as is commonly supposed, but Persian, and adopted during the Captivity—for which it may suffice to refer to their *Monatsnamen einiger aller Völker*, Berlin 1836. Although only the above-mentioned seven names occur in the O. T., yet there is no manner of doubt that the Jews at the same time adopted the entire twelve names, of which the following is a table:—

ניסן, Nisan.	תשרי, Tishri.
אייר, Iyar.	מרחשון, Marcheshvan.
סיון, Sivan.	כסלו, Chislew.
תמוז, Tammuz.	טבת, Tebeth.
אב, Ab.	שבט, Shebat.
אלול, Elul.	אדר, Adar.

In the same manner as the O. T. contains no indication of the mode of intercalation, when yet it is certain that some mode must have been used, so also it does not mention by what method the commencement and conclusion of every month were ascertained in either of these periods. According to the Talmud, however, it is certain that, in the second period, the commencement of the month was dated from the time when the earliest visible appearance of the new moon was announced to the Sanhedrim; that, if this happened on the 30th day of the current month, that month was considered to have ended on the preceding 29th day, and was called *deficient* (חסר) (חסר); but, if no announcement was made on the 30th day, that day was reckoned to the current month, which was in that case called *full* (מלא), and the ensuing day was at once considered to be the first of the next month. Further, as the cloudy state of the weather sometimes hindered the actual sight of the new moon, it was an established rule that no year should contain less than four, and more than eight, full months. It is generally assumed, although without express warrant, that the commencement of the month was determined in the same way in the first period; but it is very probable, and the Mosaic festivals of the new moon seem to be some evidence for it.

This is a fit occasion for discussing a question which equally concerns both periods—With which of *our* months, namely, did the first month, ‘the month of ears,’ or Nisan, most nearly coincide? We are indebted to J. D. Michaelis for discovering

the true state of this case, after the rabbinical writers had so universally established an erroneous opinion that it has not even yet disappeared from our popular books. His dissertation ‘*De Mensibus Hebræorum*’ (in his *Commentationes per annos 1763-1768 oblate*, Bremen 1769, p. 16) proceeds on the following chief arguments:—That, if the first month began with the new moon of *March*, as was commonly asserted, the climate of Palestine would not in that month permit the oblation of the sheaf of barley, which is ordered on the second day of the Paschal Feast; nor could the harvest be finished before the Feast of Weeks, which would then fall in May; nor could the Feast of Tabernacles, which was after the gathering of all fruits, accord with the month of September, because all these feasts depend on certain stages in the agricultural year, which, as he shows from the observations of travellers, solely coincide with the states of vegetation which are found, in that climate, in the months of April, June, and October. Secondly, that the Syrian calendar, which has essentially the same names for the months, makes its Nisan absolutely parallel with our April. And, lastly, that Josephus, in one place, makes Nisan equivalent to the Macedonian month Xanthicus; and, in another, mentions that, on the 14th of Nisan, the sun was in the sign of the Ram—which could not be on that day, except in April (*Antiq.* ii. 14. 6; iii. 10. 5). Michaelis concludes that the later Jews fell into this departure from their ancient order, either through some mistake in the intercalation, or because they wished to imitate the Romans, whose year began in March. Ideler says, ‘So much is certain, that, in the time of Moses, the month of ears cannot have commenced before the first days of our April, which was then the period of the vernal equinox (*Handbuch der Chronologie*, i. 490). As Nisan then began with the new moon of April, we have a scale for fixing the commencement of all the other months with reference to our calendar; and we must accordingly date their commencement one whole month later than is commonly done: allowing, of course, for the circumstance that, as the new moon varies its place in our solar months, the Jewish months will almost invariably consist of portions of two of ours.

With regard to the third period, it is not necessary to say more here than that, as the dispersion of the Jews rendered it impossible to communicate the intelligence of the visible appearance of the new moon, they were obliged to devise a systematic calculation of the duration of their months; but that they retained the above-mentioned names for the months, which are still lunar months, of the mean duration of 29 days, 12 hours, 44 seconds; and that when they were no longer able to regulate the epochs of their festivals by the agricultural year of Palestine, they came, for some such reasons as those assigned by Michaelis, to place every month earlier by one lunation than it had been in the first two periods, so that their Nisan now most nearly coincided with March. The rabbinical writers, therefore, who maintained that the ancient Nisan likewise began with the new moon of March, were mainly led into that opinion by the practice existing in their own time.—J. N.

MOON (חֹדֶשׁ, לְבָנָה, יָרֵחַ). Of these names for the moon, the first two relate to the colour of that

orb as of a pale yellow or whitish hue; and the third—properly the *new moon*—to its periodic renewal (from *חַדָּשׁ*, *to be new*; in Pihel, *to renew*).

Among the Aryan tribes the moon is named either from its function as the measurer of time (Lassen, *Indische Alterthümer*, i. 765; ii. 1118; Pott, *Etymolog. Forschungen*, i. 194), or from its luminous quality (comp. *Σελήνη*, from *σέλας*, *brightness*, and *Luna*=*Lucina*, from *lucere*). The Hebrew names include an allusion to both; the whiteness of the moon being connected with its luminosity, and its periodic renewal with its office as a measurer of time. There is a recognition of both in the account of the creation in Gen. i. 14-16; and special reference is made to the moon as a time-measurer in Ps. civ. 19. The brilliancy of the moon's light in eastern climates, and its utility to the traveller, conspired to make it an object of admiration and interest to the inhabitants of a country like Palestine. Hence the allusions to it in Hebrew poetry are frequent (Ps. viii. 3; lxxii. 5, 7; lxxxix. 37; Song vi. 10; Is. xxx. 26, etc.).

The periodic renewal of the moon naturally determines a period of time; and hence the *month* was by the Hebrews regulated by the new moon, and named *יָרֵחַ*, from *יָרָה*, *the moon*. This caused

their months to be of slightly unequal length, and led also to their adopting a lunar year. As the solar year was the proper natural year, this tended to produce confusion, especially with reference to the fixing of the yearly festivals; and to remedy this an intercalary month was periodically introduced [YEAR]. The persistent following of the moon in their reckoning became distinctive of the Jews:—‘*Gentes in computo solem sequuntur, Israelitæ lunam*’ (Sohar, in *Genes.*, fol. 238; comp. Bähr, *Symbolik des Mos. Cult.*, ii. 526; Wachner, *Antiqq. Ebr.*, ii. 34; Selden, *De Anno civ. vet. Hebr.*, c. 5).

It was a common belief among the ancients, that the moon exercised a potent effect on organic nature, both vegetable and animal. As dew was observed to be most copious in clear moonlight nights, it was natural to regard the moon as the source of dew (comp. Heyne's note on Virg., *Georg.* iii. 337), and, in general, of fertility; and as exposure to the atmosphere, especially sleeping in the open air, on such nights, may lead to serious diseases, an influence of a baneful kind on the animal body was ascribed to that luminary (Macrob., *Saturn.* vii. 16). Such beliefs still prevail in Egypt and the East, especially as to the power of the moon to produce blindness in those exposed to its rays (Carné, *Letters from the East*, i. 88). Whether the ancient Hebrews participated in such notions, does not appear from Scripture. The allusion in Deut. xxxiii. 14, to ‘the precious things put forth by the moon,’ probably refers to the moon merely as regulating the succession of the months, just as the sun regulates the year, and not to any direct influence supposed to be exerted by the moon on vegetation. So in Ps. cxxi. 6, the ‘smiting of the moon by night’ may relate merely to the unwholesome effect of exposure to the night air generally (De Wette and Hengstenberg, *in loc.*) Among the later Hebrews the belief prevailed that epileptic diseases were influenced by the moon [LUNATICS].

The moon was from an early period an object of

idoltrous worship, both immediately, as seen in the sky, and mediately, as represented by a conceived personal deity. Thus, while the Pelasgians, Teutons, Celts, and even the Carthaginians (occasionally; cf. *Polyb.* vii. 9. 2), worshipped the orb itself, nations more advanced in culture had their special moon-gods. Such was the Anaitis or Tanaïs of the Armenian tribes; the Astarte of the Phœnicians; the Ashteroth-Carnaim of the Syrians; the Sin of the Babylonians and Assyrians; the Isis, and perhaps the Neith (comp. Hitzig on *Jer.* vii. 18, in the *Exeget. Hdb. zum A. T.*), of the Egyptians; the Artemis of the Greeks; and the Diana of the Latins. In Chaldea the moon was worshipped as the queen of Heaven, and from thence this form of idolatry was transported into Judæa. The existence of moon-worship, however, must have been known to the Hebrews long before this, for we find it expressly alluded to in the book of Job (xxxi. 26, 27), and specifically denounced in the law of Moses (Deut. iv. 19; xvii. 3); but it was not till the reign of Manasseli, in the 7th century B.C., that this form of idolatry was formally introduced among the chosen people (2 Kings xxiii. 5). From this time to the captivity it probably was never at any time wholly extirpated from the land. The prophet Jeremiah frequently refers to it as a deadly and prevailing evil among the people in his day (vii. 18; vii. 2; xix. 13; xlv. 17-19, 25). From these passages we learn also something as to the rites of this worship. The moon was revered as ‘the Queen of Heaven’ (*מַלְכַּת הַשָּׁמַיִם*), an epithet which Gesenius would understand of the star Venus, but which undoubtedly refers to the moon; comp. the ‘*Siderum regina bicornis*’ of Horace, *Carm. Sac.* 35. Her worship was especially cultivated by women (for which there might be a natural reason in the monthly affection to which they are subject); and the offerings presented by them consisted of incense (2 Kings xxiii. 5), of libations or drink-offerings, and of cakes, into the composition of which oil largely entered, according to some (*Etymol. Mag.*, and Suidas, s.v. *χαύωρας*), and according to others, ingredients of a resinous character (Theodoret, on *Jer.* vii. 18). From the reference to this worship in Job. xxxi. 27, we learn also that the kissing of the hands was one of its modes. There is no evidence that the cruel and impure rites with which the worship of the Phœnician and the Assyrian moon-deities was celebrated were followed by the Hebrews.—W. L. A.

#### MOON, NEW. [NEW MOON.]

MOR (*מֹר*) is the well-known substance *myrrh*, the *μύρρα* and *μύρρα* of the Greeks. The Greek *μύρρα* and the Latin *myrrha* are no doubt derived from the Hebrew *mor*, or Arabic *مُر*, *mūr*, though some of the ancients traced them to the mythological Myrrha, daughter of Cinyras, king of Cyprus, who fled to Arabia, and was changed into this tree (Ov. *Art. Am.* i. 288). Myrrh is the exudation of a little-known tree found in Arabia, but much more extensively in Abyssinia. It formed an article of the earliest commerce, was highly esteemed by the Egyptians and Jews, as well as by the Greeks and Romans, as it still is both in the East and in Europe. The earliest notice of it occurs in Exod. xxx. 23, ‘Take thou also unto thee principal

spices, of *pure myrrh* (*morderor*) 500 shekels.' It is afterwards mentioned in Esther ii. 12, as employed in the purification of women; in Ps. xlv. 8, as a perfume; also in several passages of the Song of Solomon (iv. 6; v. 5, 13), in both which passages Rosenmüller states that in the original it is *stilicidious* or *profluent myrrh*. Under its Greek name, *σμύrna*, we find it mentioned in Matt. ii. 11, among the gifts presented by the wise men of the East to the infant Jesus—'gold, and frankincense, and myrrh.' It may be remarked as worthy of notice, that myrrh and frankincense are frequently mentioned together. In Mark xv. 23, we learn that the Roman soldiers 'gave him (Jesus) to drink wine mingled with *myrrh*; but he received it not.' The Apostle John (xix. 39) says, 'There came also Nicodemus, and brought a mixture of myrrh and aloes [AHALIM], about an hundred pound weight,' for the purpose of embalming the body of our Saviour.

The ancients generally describe myrrh as a product of Arabia; that in this they were correct is proved by Ehrenberg and Hemprich, who found a small tree in Arabia near Gison, on the borders of Arabia Felix, off which they collected pieces of myrrh, which, when brought home and analysed, was acknowledged to be genuine. It is an interesting fact that the specimens of the myrrh-plant brought by Mr. Johnson from the confines of Abyssinia seem to be of the same species. This is the *Balsamodendron Myrrha* of botanists, and

373. Balsamodendron Myrrha.

which we here figure from Nees von Esenbeck's plate of Ehrenberg's plant. By some it is supposed to be produced by another species of *Balsamodendron*, the *Amyris kataf* of Forskal, which differs little from *A. kâfal*. Belon supposed it to be produced in Syria, and says, that near Rama he met with a thorny shrub, with leaves resembling acacia, which he believed to be that producing myrrh (*Mimosa agrestis*, Spr.) Similar to this is the information of the Arabian author Abu'l Fadl, quoted by Celsius, who says, that *mur* is the Arabic name of a thorny tree resembling the

acacia, from which flows a white juice, which thickens and becomes a gum.

Several kinds of myrrh were known to the ancients, and are described by Dioscorides under the name of *Stacte*, *Gabirea*, *Troglodytica*, *Kaukalis*, *Aminasa*, *Ergasima*. So the Arab authors mention several varieties, as 1. *mur saf*, 2. *mur fortarukh*, 3. *mur jushee*; and in modern commerce we have Turkish and East Indian myrrh, and different names used to be, and are still applied to it, as red and fatty myrrh, myrrh in tears, in sorts, and myrrh in grains. In the Bible also several kinds of myrrh are enumerated, respecting which various opinions have been entertained. Thus, in Exod. xxx. 23, the words *mor-doror* have been variously translated *myrrha prima*, *electa*, *ingenue*, *excellens*, etc. *ذهرور* *dheror*,

in Arabic, according to Celsius, means an aromatic powder, and *mur dheroree*, in Arabic, like *mor-doror* in Hebrew, signifies *myrrheus pulvis*. This may be the correct meaning, but it is curious that the Arabians should apply the term *Kusb-al-zurire* to another famed aromatic, the sweet cane of Scripture. Hence there may be a connection between these similarly sounding terms. Rosenmüller says, 'Luther correctly translates the Hebrew expression, which properly denotes *spontaneously profluent myrrh*.' The same kind of myrrh is in the Song of Solomon (chap. v. 13) called *stilicidious* or *profluent myrrh* (*mor obor*), usually translated *myrrham electam et præstantissimam, transeuntem*, etc. (Cels. l. c. p. 528). Another kind of myrrh is said to be indicated by the word *Nataf*, translated *stacte*, which occurs in Exod. xxx. 34; but on this opinions have differed [NATAF].

Myrrh, it is well known, was celebrated in the most ancient times as a perfume, and a fumigator, as well as for its uses in medicine. As several kinds were included under the name of myrrh, it is probable that some may have possessed more aromatic properties than others: but the tastes and the customs of nations vary so much in different ages of the world, that it is impossible for us to estimate correctly what was most agreeable to the nations of antiquity. Myrrh was burned in their temples, and employed in embalming the bodies of the dead. Herodotus, speaking of the practice of embalming among the Egyptians, says, 'They then fill the body with powder of pure myrrh, cassia, and other perfumes, except frankincense' (ii. 86). It was offered in presents, as natural products commonly were in those days, because such as were procured from distant countries were very rare. In the same way we often hear of a rare animal or bird being presented to royalty even in the present day. The ancients prepared a *wine of myrrh*, and also an *oil of myrrh*, and it formed an ingredient in many of the most celebrated compound medicines, as the *Theriaca*, the *Mithridata*, *Manus Dei*, etc. Even in Europe it continued to recent times to enjoy the highest medicinal reputation, as it does in the East in the present day. It is no doubt useful as a moderately stimulant medicine; but Von Helmont was extravagant enough to state that it is calculated to render man immortal, if we had any means of perfectly dissolving it in the juices of the body. From the sensible properties of this drug, and from the virtues which were ascribed to it, we

may satisfactorily account for the mention of it in the several passages of Scripture which have been quoted.—J. F. R.

MORASTHITE. [MICAII.]

MORDECAI (מֹרְדֳּכַי), supposed to come from the Persian مردکی, *little man, mannikin*; or, according to others, from the idol מֹרְדַּךְ, *Mero-dach*, thus signifying a *votary of Mero-dach*. The last supposition is not unlikely, seeing that Daniel had the Chaldean name of Belteshazzar; Sept. Μαρδοχαῖος), son of Jair, of the tribe of Benjamin, descended from one of the captives transported to Babylon with Jehoiachin (Esther ii. 5). He was resident at Susa, then the metropolis of the Persian empire, and had under his care his cousin Hadessa, otherwise Esther, at the time when the fairest damsels of the land were gathered together, that from among them a fitting successor to queen Vashti might be selected for king Ahasuerus. Among them was Esther, and on her the choice fell; while, by what management we know not, her relationship to Mordecai, and her Jewish descent, remained unknown at the palace. Mordecai lost none of his influence over his cousin by her elevation, although the seclusion of the royal harem excluded him from direct intercourse with her. He seems to have held some office about the court; for we find him in daily attendance there, and it appears to have been through this employment that he became privy to a plot of two of the chamberlains against the life of the king, which through Esther he made known to the monarch. This great service was, however, suffered to pass without reward at the time. On the rise of Haman to power at court, Mordecai alone, of all the nobles and officers who crowded the royal gates, refused to manifest the customary signs of homage to the royal favourite. It would be too much to attribute this to an independence of spirit, which, however usual in Europe, is unknown in Eastern courts. Haman was an Amalekite; and Mordecai brooked not to bow himself down before one of a nation which from the earliest times had been the most devoted enemies of the Jewish people. The Orientals are tenacious of the outward marks of respect, which they hold to be due to the position they occupy; and the erect mien of Mordecai among the bending courtiers escaped not the keen eye of Haman. He noticed it, and brooded over it from day to day: he knew well the class of feelings in which it originated, and—remembering the eternal enmity vowed by the Israelites against his people, and how often their conquering sword had all but swept his nation from the face of the earth—he vowed by one great stroke to exterminate the Hebrew nation, the fate of which he believed to be in his hands. The temptation was great, and to his ill-regulated mind irresistible. He therefore procured the well-known and bloody decree from the king for the massacre of all the Israelites in the empire in one day. When this decree became known to Mordecai, he covered himself with sackcloth and ashes, and rent the air with his cries. This being made known to Esther through the servants of the harem, who now knew of their relationship, she sent Hatach, one of the royal eunuchs, to demand the cause of his grief: through

that faithful servant he made the facts known to her, urged upon her the duty of delivering her people, and encouraged her to risk the consequences of the attempt. She was found equal to the occasion. She risked her life by entering the royal presence uncalled, and having by discreet management procured a favourable opportunity, accused Haman to the king of plotting to destroy her and her people. His doom was sealed on this occasion by the means which in his agitation he took to avert it; and when one of the eunuchs present intimated that this man had prepared a gallows fifty cubits high on which to hang Mordecai, the king at once said, 'Hang him thereon.' This was, in fact, a great aggravation of his offence, for the previous night, the king, being unable to sleep, had commanded the records of his reign to be read to him; and the reader had providentially turned to the part recording the conspiracy which had been frustrated through Mordecai. The king asked what had been the reward of this mighty service, and being answered 'nothing,' he commanded that any one who happened to be in attendance without, should be called. Haman was there, having come for the very purpose of asking the king's leave to hang Mordecai upon the gallows he had prepared, and was asked what should be done to the man whom the king delighted to honour? Thinking that the king could delight to honour no one but himself, he named the highest and most public honours he could conceive, and received from the monarch the astounding answer, 'Make haste, and do even so to Mordecai that sitteth in the king's gate!' Then was Haman constrained, without a word, and with seeming cheerfulness, to repair to the man whom he hated beyond all the world, to invest him with the royal robes, and to conduct him in magnificent cavalcade through the city, proclaiming, 'Thus shall it be done to the man whom the king delighteth to honour.' After this we may well believe that the sense of justice decided the perhaps till then doubtful course of the king, when he heard of the gallows which Haman had prepared for the man by whom his own life had been preserved.

Mordecai was invested with power greater than that which Haman had lost, and the first use he made of it was, as far as possible, to neutralize or counteract the decree obtained by Haman. It could not be recalled, as the kings of Persia had no power to rescind a decree once issued; but as the altered wish of the court was known, and as the Jews were permitted to stand on their defence, they were preserved from the intended destruction, although much blood was, on the appointed day, shed even in the royal city. The Feast of Purim was instituted in memory of this deliverance, and is celebrated to this day (Esth. ix. 1-32). [PURIM.]

A Mordecai, who returned from the exile with Zerubbabel, is mentioned in Ezra ii. 2 and Neh. vii. 7; but this cannot well have been the Mordecai of Esther, as some have supposed.—J. K.

MOREH (מֹרֶה, 'a teacher'). 1. The name of an oak or grove of oaks at Shechem, in central Palestine. We read in Gen. xii. 6 that when Abraham first entered Canaan he 'passed through the land unto the place of Sichem, unto the plain of Moreh.' In Hebrew the last clause is עַד מֹרֶה, 'to the oak of Moreh;'; the Septuagint

reads ἐπὶ τῇ δρύν τῇ ὑψηλῇ; and the Vulgate *usque ad convallem illustrem*; the Targum of Onkelos has 'the plain of Moreh'; and the Samaritan 'the valley of vision.' There can be no doubt that Moreh is a proper name, probably, as in the case of another famous grove at Hebron, the name of a Canaanitish chief who originally possessed the ground (Gen. xiv. 13; MAMRE). It would seem that the oak and terebint were in ancient times greatly venerated in Palestine. Many of them were distinguished by proper names (Gen. xxxv. 8; Judg. ix. 37); under their shade altars were erected, councils held, and celebrated persons buried. To this day in various parts of Syria there are single oak trees and oak groves which are held sacred (*Handbook*, pp. 70, 436). The 'oak of Moreh' was doubtless one of these natural sanctuaries which the patriarch at once adopted. Moreh is not again mentioned until the entrance of the Israelites into Palestine. Moses then gave the people a solemn charge regarding the public reading and ratification of the law; and appointed a national assembly for that purpose to be held between Ebal and Gerizim, אֶלֶי אֶלֶי

אֶלֶי מֹרֶה, 'beside the oaks of Moreh.' The LXX. here renders as in Genesis; but the Vulgate reads *juxta vallem tendentem et intrantem procul*.

We may infer that it was at this place, which Abraham consecrated on his entrance into the land of promise, Jacob pitched his tent when he returned from Haran; and that 'the parcel of a field' which he bought from the children of Hamor included this sacred grove. Here too, centuries afterwards, the bones of Jacob's favourite son were consigned to their final resting-place. What an interesting group of sacred associations thus clusters round this spot, beside Jacob's well and Joseph's tomb, at the mouth of the vale of Shechem (Josh. xxiv. 32)!

We have no authority in Scripture for connecting in any way—geographically or historically—Moreh with Moriah (Stanley, *S. and P.*, pp. 141, 232; Robinson, *B. R.*, ii. 287, *seq.*; *Handbk.*, pp. 334, 339).

2. MOREH, *the hill of* (נֶגְעֵת־הַמֹּרֶה; Γαβαα-αμωαλ, uniting the two Hebrew words; Alex. ἀπὸ τοῦ βωμοῦ τοῦ Ἀβὺρ; *Collis excelsus*). The whole details of the victory of Gideon over the Midianites are described with remarkable precision. When upon the battle-field, the writer was able to see at a glance the positions occupied before the conflict by the adverse hosts, the scene of the attack, and the whole course of the rout. Gideon collected his little band by the well of Harod, on the south side of the valley of Jezreel, at the foot of Mount Gilboa. The valley is here about two miles wide, and descends eastward to the Jordan. Along its northern side runs a low, bare, gray ridge, parallel to Gilboa; it is now called by the natives Jebel ed-Duhy, and by travellers Little Hermon; but it is 'the hill of Moreh,' at whose base, in the valley, the camp of the Midianites was pitched (Judg. vii. 1). The camp probably extended from the village of Shunem on the west down to the strong city of Bethshean on the east; for we are told that 'the Midianites, and the Amalekites, and all the children of the east, lay along in the valley like grasshoppers for multitude' (ver. 12).

Moreh is not again mentioned in Scripture, yet upon its site are three places of singular interest to the Bible student. Shunem, the scene of Elisha's great miracle in restoring the dead boy to life (2 Kings iv.), is still seen at the south-western base of the hill. Nain, where Jesus wrought a similar miracle, is only some three miles distant on the north-western declivity; and Endor, where Saul had the wondrous interview with the witch, is two miles east of Nain, directly facing Mount Tabor. The height of the ridge is given by Van de Velde (from Symonds) at 1839 feet (*Memoir*, p. 178). The sides rise with an easy slope from the surrounding plain, and though bare and stony, are capable of cultivation. The top is rounded and regular, and has more verdure than Gilboa, though it is bleak when contrasted with Tabor (*Handbook*, 357, *seq.*; Robinson, *B. R.*, ii. 320, 326; Stanley, *S. and P.*, p. 141, 232, *seq.*)—J. L. P.

MORESHETH-GATH (מֹרֶשֶׁת גַּת; 'the possession of Gath,' or 'of the wine-press;' ἔως κληρονομίας Γᾶς; *ad hereditatem Geth*). The prophet Micah, in pronouncing judgment upon the land of Israel on account of sin, enumerates certain cities on which special punishment should fall; and among these are Lachish, *Moreseth-Gath*, *Mare-shah*, and *Adullam* (i. 13-15). The sites of the other three are known, and as it appears *Moreseth-Gath* lay near them, it must be looked for in the plain of Philistia, near the base of the mountains of Judah. It is probable that it had some connection with the city of Gath, and took its name, perhaps, to distinguish it from some other *Moresah*; and the context in Micah shows that *Moreseth-Gath* had been in some way under the protection of Lachish—'Therefore thou (O inhabitant of Lachish) shalt give a divorce to *Moreseth-Gath*.' The city is not again mentioned in Scripture. It must not be confounded with *Mareshah*, the site of which is known [MARESHAH]; but it probably was identical with *Moreseth*, the native place of the prophet himself. He is called 'Micah the *Morasthite*' (Mic. i. 1; Jer. xxvi. 18); and Eusebius and Jerome state that *Morasthei* (Μωραστει) was a village on the east side of Eleutheropolis (*Onomast.*, s. v.; cf. Jerome, *Proem. in Mich.*); and from the statements of subsequent writers it would appear that *Moreseth-Gath* was not far distant from Eleutheropolis (Reland, p. 902). The site, however, has not been discovered; nor was the writer able to hear any name that would appear to suggest identity with the ancient city. The Septuagint, Vulgate, and most of the ancient interpreters do not consider the word *Moreseth* as a proper name, but as connected with Gath, and signifying 'the inheritance or possession of Gath' (Theodoret, Jerome, etc., *ad loc.*)—J. L. P.

MORIAH. The name occurs twice in O. T. (Gen. xxii. 2; 2 Chron. iii. 1). In the first place it is given to the 'land,' to the 'place' of the sacrifice of Isaac; in the second, to the 'mountain' on which the temple of Solomon was built. Jewish tradition and ordinary Christian interpretation have identified these two sites. The force of the Hebrew tradition is impaired by the mythic addition, that here also Abel offered his first sacrifice, and Noah his thank-offering (see Munsterus, Fagius, and Grotius, *in loco*).

Before considering the geographical and other difficulties in the way of this identification, it is desirable to investigate the derivation of the word מֹרִיָּה. Various etymologies supplied by Jews all proceed on the supposition of the identity of the Moriah of Genesis with that on which the temple was built. The oldest, that of Onkelos and Gerundensis, was that it was derived from מֹרֶר, myrrh, as in Canticles iv. 6, 'I will go to the mountain of myrrh.' Fuller, in *Misc. Sacra*, ii. 15, maintains that the הַמֹּרֶר of Canticles was an abbreviation of הַמֹּרִיָּה, and referred to the holy mount where the great king had just erected his temple. Rabbi Solomon supposes it derived from הוֹרָא, instruction, because thence the word of the Lord went forth into all Israel. Kalisch (*Comment. on Genesis*, xxii. 2) approaches this interpretation by saying that it springs in all probability from מֹרִיָּה, 'Jehovah is my instructor,' from יָרָה, the root of the great derivative תוֹרָה. Jonathan derives it from מוֹרָא, fear or reverence, and imagines that the word was used anticipatory of the worship and fear of God there solemnized (Lightfoot, *Opera, Descriptio Templi*, vol. i. 553). Fuller (*Misc. Sacra*, ii. 15) maintains that the word represents an abbreviation of מוֹרֵאֲהוּ, *conspicietur Jehovah*, because there eventually the Son of God would appear in human flesh. Knobel insists that it is a compound of מוֹרָא, a pual form of רָאָה, to see, and יָה; and Hengstenberg (*Dissertations on Gen. of Pentateuch*, ii. 159-163, Clark's trans.), Kurtz (*Old Covenant*, i. 272), Gesenius (*Thesaurus*, p. 819), Furst (*Lex.*), all agree as to the presence in the word of the elements of the name of Jehovah. Vatke, Vater, Van Bohlen, the early opponents of the genuineness of the Pentateuch, even based a portion of their antagonism on this proof of a later date. Bishop Colenso (*Pentateuch and Joshua*, etc., pt. ii. ch. ix., x.) labours to demolish the etymology, but without much success. The existence of a proper name *Moriah* would be a proof of the existence of the name and worship of Jehovah before some of the modern documentists would find it at all satisfactory. Hengstenberg states that the word הַמֹּרִיָּה is a compound of מוֹרָא, the Hophal participle of רָאָה, to see; and means that *which is shown*, or, *the appearance of Jehovah*. Colenso objects to the sense of the interpretation, and maintains that there is no explanation of the disappearance of the characteristic radical א. Gesenius accounts for the form מֹרִיָּה, by combination of the Hophal participle of רָאָה, and the jod-compaginis common in derivatives from verbs of the form of "לָהּ". Thus מוֹרָאֵה, combined with יָה, would suffer the following change, מֹרִיָּה = מוֹרָאֵה. There is another proper name derivable from the same root, which has lost its characteristic radical א—viz., רוֹת, from רָאָה, beautiful to look upon (Ruth). But whatever may be the precise nature of the contraction, the obvious interpretation of the writer is given in ver.

8—יְהוָה יֵרָאֶה, which is the name given by Abraham to the place where Jehovah saw his agony and provided a victim in place of his son. Here it was that the proverb was originated, 'In the mountain Jehovah shall be seen.' *Moriah* was the name permanently attaching itself to the place, just as אֵן had been the abbreviation of Eve's exclamation קָנִיתִי אִישׁ; and it was used by the narrator 400 years afterwards, to describe a district, a *land*, a mountain which had always gone by that name ever since the proverb had been first uttered, amid the very circumstances he was then proceeding to describe. It would be presumptuous to assert to what extent the knowledge and worship of Jehovah was diffused, on the ground of the mere presence of the name Jehovah in this proper name; still there is nothing to shake the conclusion. It is curious that the LXX. translate the מֹרִיָּה by εἰς τὴν γῆν ὁψλην; and they also render by some similar expression the various references to the *oak or plains of MOREH*, near Sichem (Gen. xii. 6), where Hebrew text has אֵלֶּן מוֹרֶה, the LXX. reads τὴν δρῦν τὴν ὁψλην (see also Deut. xi. 30). The translation of Aquila in Gen. xxii. 2, is εἰς τὴν γῆν τὴν καταφανῆ; and Symmachus has εἰς τὴν γῆν τῆς ὁπρασίας, closely resembling the *in terram visionis* of the Vulgate.

Dr. Davidson, in *Introduction to O. T.*, vol. i., conjectures that *Moreh* was the original reading, but neither Kennicott, De Rossi, nor Dr. Davidson himself in his *Printed Text of O. T.*, give any diplomatic authority for such a reading. The translations of Aquila and Symmachus may have originated with some reading resembling that in the Samaritan text, מוֹרָא, and signifying 'far seen' or 'conspicuous.' But when Josephus wrote (*Antiq.* i. 13. 2), it is quite clear that the reading in Gen. xxii. 2 and 2 Chron. iii. 1 must have been identical, as he speaks of the place of Abraham's sacrifice as τὸ ὄρος ἐφ' ᾧ τὸ ἱερὸν Δαβὶδ ὁ βασιλεὺς ὑστερον ἰδρύεται. In 2 Chron. iii. 1, the LXX. do not attempt to translate the proper name הַמֹּרִיָּה, but write ἐν ὄρει τῷ Ἀμωρία. It is true that there is no reference to the original manifestation of God on this site to the Patriarch, and express mention is made of second and additional reasons for this hill being called Moriah; see 1 Chron. xxi. 16, xxii. 1; 2 Sam. xxiv. 1; 2 Chron. iii. 1. This was in perfect harmony with the law of God, that forbade the offering of burnt sacrifices in any place which the Lord had not consecrated by his visible manifestation (Hengstenberg, *Diss.*, vol. ii., 32, ff.) The geographical conditions supplied by the narrative in Genesis are not inconsistent with the Samaritan tradition (see Robinson, *Biblical Researches*, vol. iii. p. 100) that *Gerizim* was the scene of the sacrifice, and that the mountains of Gerizim and Ebal, from their neighbourhood to *Moreh*, a spot well known to Abraham, were the mountains in the land of Moriah (Colenso, pt. ii. chap. x.) They have led Dean Stanley (*S. and P.*, p. 250, ff.; *Lectures, Jewish Church*, pp. 48, 49) to decide on Gerizim as the scene of the event. His arguments are weighty but not conclusive. (1.) The distance from Beersheba to the plain of Sharon, from which Gerizim might be seen 'afar off,' corresponds with the two days' journey of Abraham; while the third day,

which would be occupied by the great event, would be sufficient for the journey to the summit and the return. The same thing, however, may be said with greater certainty of Jerusalem itself. (2.) Stanley objects that there is no spot from which the 'place' where the sacrifice was to be offered could be seen from 'afar off,' that 'the hill of Moriah is not visible at all until the traveller is *close upon it*, at the southern edge of the valley of Hinnom, from whence he looks down upon it, as on a lower eminence.' Now the narrative informs us that Abraham lifted up his eyes and saw the *place* of which the Lord had spoken to him. That 'place' was the *מִקְדָּשׁ*, or, as Gesenius translates, 'the land about Moriah,' just as *אֶרֶץ הַיְּהוּדָה* is the land about Ai. It was very possible to see from the ridge *Mar Elias* the heights about Jerusalem, if not the hill of Moriah itself; and we are expressly told that Abraham did not see the place until he was fairly within a walk of the spot, and could leave the young men and the ass while he and Isaac proceeded, personally laden with the material for the sacrifice. (3.) A formidable difficulty urged by others is, that the fortress of Zion must at that time have been occupied by the king of the Jebusites, some forerunner of Adonizedeck, or by Melchizedeck himself, and therefore Abraham must have prepared to perform this awful sacrifice under the walls of the city. To obviate the great apparent improbability of this, it may be said that sometimes the outside of fenced cities—where a deep ravine runs between the wall and the suburb—is often one of the loneliest spots in the world. The name *Moriah* is unquestionably given by the chronicler to the Temple Hill, but this passage is a solitary one. The more ordinary name even for the entire city of Jerusalem and for the holy mountain is *Mount Zion*, and various psalms and prophecies speak of the dwelling-place of Jehovah under this old and honoured name. It cannot be true that any writer of the time of Solomon composed the narrative of Abraham's sacrifice to do honour to the Temple Hill, as it was suggested by De Wette. For if that had been his intention, he would have called it *Zion* and not *Moriah*. Great stress has been laid by Bishop Colenso, and by the writer in *Smith's Dictionary*, vol. ii. 423, on the absence of other reference besides that of the *Chronicler*, to the name of Moriah as the site of the Temple Hill, and also on the impropriety of associating the name and career of Abraham so vitally with Jerusalem. In the same article, however, Jerusalem is spoken of as the city of Melchizedeck. For the shape of Moriah, its relations with Bezetha and Acra, the bridge that connected it with Zion across the valley of the Tyropeon, see Art. JERUSALEM. Notwithstanding the various and variously-motived endeavours to disturb the old Hebrew tradition, it has not been proved necessary to deny the identification of the two sites, nor to denounce the old etymology, nor cease to perceive the interesting link of connection supplied by it between the sacrifice of Isaac, the vision of God's judgment and mercy, the erection of the temple, and the offering up of God's only begotten Son.—H. R. R.

MORINUS, JOANNES (MORIN, JEAN), the author of several works of Biblical interest, was born at Blois in 1591. He was educated in the Pro-

testant faith, and studied at Leyden. In 1618 he renounced Protestantism, and entered the Congregation of the Oratory, then recently established. He held for some time the office of superior in the college of Angers; also a chaplaincy to Henrietta of France. The latter appointment was of short continuance. The remaining portion of his life was spent in Paris in the house of St. Honoré. His published works, the fruits of immense learning, were the following—*Exercitationes Ecclesiasticae in utrumque Samaritanorum Pentateuchum*, Paris 1631; *Samaritanum Pentateuchum*, in Samaritan and Hebrew letters; also a Latin version—this edition of the S. P. was included in the Paris Polyglott, 1645. *Exercitationes Biblicae de Hebraici Graecique textus Sinceritate*, Paris 1633, 4to, and greatly enlarged and improved in 1669, fol., prefaced with a life of the author by Father Constantine of the Oratory; *A Samaritan Grammar and Lexicon*; and also, *Opuscula Hebraico-Samaritana*. The main object of these various works of Morinus was the exaltation of the Samaritan and Septuagint texts above the Hebrew. Indeed, their author has been regarded as the restorer of the ancient Samaritan language. His anti-Massoretic zeal, however, was not according to knowledge, as later investigations in the same field have abundantly proved. He was attacked by Simeon de Muis, in his *Assertio Veritatis Hebraicae*, 1634, and in his *Castigatio Animadversionum Morini*, 1639. For a fuller account of the writings of Morinus, see the lectures of Bishop Marsh. He died in 1659.—W. J. C.

MORTAR (מֹרְתָה, from the unused root מָרַח, to boil up, hence a pot), first mentioned as employed by the Israelites in the wilderness (Num. xi. 8), 'the people went about and gathered it (manna), and ground it in mills, and beat it in a mortar, and baked it,' etc. In this way it was that the Jews prepared themselves food of the God-given manna. The process was a very simple one, being nothing more than the pounding of the manna between two stones. The under or lower stone was slightly hollowed for the purpose of holding the food, while the upper stone was shaped to the hand, and used as a pestle. This is believed to have been the most ancient method in preparing food from grain, and is still in use in the East, both in Arabia and in certain districts in Palestine. The Druses pound their coffee in mortars made from the trunks of oak trees (see Burckhardt's *Syria*, p. 88). Kitto's remarks on the mortar as used for pounding wheat, in his note on Prov. xxvii. 22 (Heb. there is מִכְתֵּשׁ, from כָּתַשׁ, to pound or bray), are as follows:—'We do not infer that this (*among wheat with a pestle*) implies that the wheat was pounded to meal instead of being ground, but that it was pounded to be separated from the husk. The Jews probably had no rice, but there are several passages from which we may gather that they used wheat in the same way that rice is now used—that is, boiled up in pillaus, variously prepared. In fact, we have partaken of wheat thus employed in the remote mountains, where rice could not be obtained, or only at a price which the villagers could not afford; and it is also so used among the Arabs, forming a very palatable and nutritious food. For this purpose it is necessary that, as with rice, the husk should be previously disengaged

from the grain; and if we suppose this object was attained with wheat by a similar treatment with that to which rice is now subjected, the present text may be very satisfactorily explained. There are men, and even women, who gain their bread by the labour of husking rice, which they generally perform in pairs. Their implements consist of a rude wooden mortar, formed of a block hollowed out; pestles, about five feet long, with a heavy block at the upper end, and a sieve for sifting the pounded grain. They carry these utensils to the house where their services are required, and, if men, stripped to the skin (except their drawers), and pursue their labour in a shady part of the courtyard. When two work together, they commonly stand opposite each other, and strike their pestles alternately, as blacksmiths strike their iron. Sometimes, however, one pestle alone acts, and the labourers relieve each other, the relieved person taking the easier duty of supplying the mortar, and removing and sifting the cleaned grain. From the weight of the pestle the labour of pounding is very severe, and the results of the process are but slowly produced' (*Pict. Bib.*)

Most writers and travellers concur in thinking that the mortar, as a mode of punishment, was unrecognized among the Hebrews. 'Though thou shouldst bray a fool in a mortar,' therefore, is hyperbolic. At the same time, its use among other nations as a mode of punishment might not be entirely unknown. Among other Eastern nations the mortar was employed 'to pound certain classes of criminals to death.' It has usually been resorted to in inflicting capital punishment upon persons whose sanctity or high rank forbade the *shedding of their blood*, so that the letter of the law has been observed, while its spirit was violated. It used to be considered that braying in a mortar was the only mode in which death could be inflicted upon the Grand Mufti of the Turks, and instances of its being so inflicted are on record. But this is not confined to them. Volney writes, 'the person of a pasha who acquits himself well in his office becomes inviolable, even by the Sultan, and it is no longer permitted to shed his blood. But the divan has invented a method of satisfying its vengeance upon those who are protected by this privilege, without departing from the literal interpretation of the law, by ordering them to be pounded in a mortar, or smothered in sacks, of which there have been various instances.' It is also related by Knolles, in his *History of the Turks*, that the guards of the tower who had let the prisoner Coreskie escape, some of them were impaled, and some were pounded or beaten to pieces in great mortars of iron, in which they usually pound their rice. The practice, and the ideas connected with it, may be traced farther East. In Siam, royal criminals or princes of the blood convicted of capital crimes, are put into a large caldron, and pounded to pieces *with pestles of fragrant sandal wood*, because none of the royal blood must be spilt upon the ground, it being by their religion deemed a great impiety to contaminate the sacred blood, by suffering it to mix with the earth (*Pict. Bib.* Prov. xxvii. 22; also Thomson's *The Land and the Book*, chap. viii.; Roberts' *Orient. Illustr.*, p. 368).—W. J. C.

MORTAR. (מֹרְטָר; πηλός; *cementum*; Gen. xi. 3; Exod. i. 14; Is. xli. 25; Nah. iii. 14).

2. מֹרְטָר; χῶδς; *lutum*; Lev. xiv. 42, 45. 3. מֹרְטָר; *lutum*; Ezek. xiii. 10, 11, 14, 15; xxii. derived from the Arabic, and used in the several verses noted in Ezek. in a contemptuous sense). Each Hebrew term is rendered 'mortar' in the A. V. The first (*Chomer*) is a word from the same root (חָמַר, 'boil'), as חֶמֶר, 'slime' (ἄσφαλτος, *bitumen*), as used in Gen. xi. 3, 'And they said to one another, Go to, let us make brick, and burn them thoroughly, and they had brick for stone, and slime had they for mortar.' [SLIME.] Kitto mentions 'three kinds of calcareous earth, found abundantly in the desert west of the Euphrates. The first, called *noora*, is, in present use, mixed with ashes, and employed as a coating for the lower parts of walls in baths, and other places liable to damp. Another, called by the Turks *karej*, and by the Arabs *jus*, is also found in powder mixed with indurated pieces of the same substance, and round pebbles. This forms even now the common cement of the country, and constitutes the mortar generally found in the burnt brickwork of the most ancient remains. When good, the bricks cemented by it cannot well be detached without being broken, whilst those laid in bitumen can easily be separated. The third sort, called *borak*, is a substance resembling gypsum, and is found in large lumps of an earthy appearance, which, when burned, form an excellent plaster or whitewash. Pure clay or mud is also used as a cement, but this is exclusively with the sun-dried bricks (*Pict. Bib.*, Gen. xi. 3). Besides mortar made from bitumen, from common mud and clay, mixed with straw such as they gave to cattle, chopped and beaten small, and serving the same purpose as the ox-hair which our plasterers mix with their plaster, the Hebrews had a mortar made from sand, ashes, and lime, well pounded and mixed with oil. When used as plaster to resist wet, the greatest pains were taken in tempering it. 'In the way of tempering, nothing affords a stronger manifestation of persevering and patient labour than the long-continued and repeated beatings to which the Orientals subject the plaster (of lime, ashes, and straw), which is more especially intended to resist wet, and which does most effectually answer that purpose' [PLASTER] (*Pict. Bib.*, Ezek. xiii. 10). Mortar was usually trodden with the feet, but wheels were also used. These were wrought with oxen (Volney, *Trav.* ii.; Buckhardt, *Nubia*, p. 82, 89).—W. J. C.

MORUS, SAMUEL FRIEDRICH NATHANAEL, an eminent German professor of the last century, was born Nov. 30, 1736, at Laubau, in Upper Lusatia. He entered the university of Leipzig in his nineteenth year. He became a devoted pupil of Ernesti, and under the guidance of this celebrated master of exegesis laid the foundations of his future usefulness and renown. In 1768 he was appointed professor of philosophy at Leipzig. In 1771 he was chosen to fill the chair of the Greek and Latin languages, and in 1782 he was called to fill the vacancy in the theological faculty occasioned by the death of Ernesti. He died Nov. 11, 1792. It was as a teacher rather than as a writer that the influence of Morus was chiefly felt. His works are mostly posthumous publications, issued under the editorship of men who had been his pupils, one of whom fairly esti-

mates the position of Morus when he says that the science of Hermeneutics 'ab Ernestio reformata,' was 'a Moro exculpta et dilucidius explicata.' His principal Biblical works are—1. *Dissertationes Theologicae et Philologicae*, editio altera, Lips. 1798; 2. *Super Hermeneutica N. T. Acroases Academicæ*. Editioni aptavit, præfatione et additamentis instruxit H. C. A. Eichstadt, Lips. 1797-1802, 8vo. This work may be best described as lectures upon the institutes of Ernesti. 3. *Prælectiones in Luca Evangelium*, ed. C. A. Donat Lips. 1795, 8vo. 4. *Recitationes in Evangelium Joannis*, ed. Th. J. Dindorf, Lips. 1808, 8vo. 5. *Versio et explicatio Actorum Apostolorum*, ed. G. J. Dindorf, Lips. 1794. 6. *Prælectiones in Epistolam Pauli ad Romanos; cum ejusdem versione latina, locorumque quorundam N. T. difficultiorum interpretatione*, edidit I. T. T. Holzapfel, Lips. 1794, 8vo. 7. *Acroases in Epistolas Paulinas ad Galatas et Ephesios*, Lips. 1795. 8. *Prælectiones in Jacobi et Petri epistolas*, ed. C. A. Donat, Lips. 1794. 9. *Prælectiones exegeticae in tres Joannis epistolas cum nova earundem paraphrasi Latina*, cura C. A. Hempel, Lips. 1797, 8vo. 10. *Commentarius exegetico-historicus in suam theologia Christianæ epitomen*, ed. C. A. Hempel, 2 vols., Halæ Sax. 1798, 8vo. —S. N.

#### MOSCHOLATRY, or CALF-WORSHIP.

Prominent among the characteristic sins of the Jewish people stands 'moscholatry;' in spite of the divine prohibition in the moral law, a sensuous representation of deity was constantly resorted to from the very beginning of the nation to the time of the captivity. Various forms of this idolatrous tendency appear in the sacred history. In the ephod of Gideon (Judg. viii. 27), and in the images and teraphim of the Ephraimite Micah (Judg. xvii. 5), we have what may be called the *domestic* instances; while in the golden calf of Aaron and the calves of Jeroboam, the son of Nebat, occur the *public* and *state* form of the image-worship. In this article we have only to do with the latter instances. In the moscholatry both of Aaron and of Jeroboam, a connecting link *with Egypt* is afforded us in the sacred narrative; in the case of Aaron we have not only the general fact of Egypt having been the birthplace of the sinning people, but the clear comment of Ezekiel, in xx. 6-10, on their conduct; while in the case of Jeroboam we have the fact that it was after a long residence in Egypt, in the court of Shishak, that he devised the worship we have here to consider (1 Kings xi. 40; xii. 2). In the Egyptian worship of APIS, therefore, most writers, with a remarkable unanimity, have found the original hint which suggested the Jewish calf-worship; the same unanimity, however, has not attended their speculations on the purport and extent of this *cultus*. Before we notice these speculations, it will be convenient to adduce a few ancient statements relative to the Egyptian 'calf-deity.' Herodotus (iii. 28) says, 'Apis or Epaphus is the calf of a cow which is never afterwards able to bear young. The Egyptians say that fire comes down from heaven upon the cow, which thereupon conceives Apis.' According to Plutarch (*de Is.* xx. 29), this calf Apis was supposed to be the shrine of the soul of the greatest of the Egyptian deities, Osiris, and the symbol of that god (Warburton, iv. 4; Rawlinson's *Herod.*, vol. ii. p. 423); and with this

well agrees the language of Herodotus in ii. 65, who says, 'The inhabitants of the various cities, when they have made a vow to any god, *pay it to his animals*,' etc., εὐχόμενοι τῷ θεῷ τοῦ ἂν ἦ τὸ θῆλον. Two views of opposite character are advanced as to the origin of this *cultus*; according to one, the worship of Apis was at first nothing but the simple worship of the calf, mere fetishism (Smith's *Dict. of Mythology*, art. APIS); but Herodotus (ii. 4) expressly states that 'the Egyptians (from whom the Greeks adopted the names of the twelve great gods) first erected altars, images, and temples to the gods, and also *first engraved upon stone the figures of animals*;' we gather from this, that not the adoration of the living animal, but of its picture or image, was the form of the primitive brute-worship of Egypt. This symbolical character seems to explain the language of the second commandment, 'Thou shalt not make unto thee . . . any likeness of anything in heaven above, etc., nor bow down to it, nor serve it.' And this brings us in contact with Aaron's golden calf at once. The fickle and impatient Israelites requested, in the protracted absence of their law-giver, that his brother would make them 'gods to go before them' (Exod. xxxii. 1), probably 'back again to Egypt' (Acts vii. 39, 40). Aaron gratified their impious desire by an expedient suggested by the superstition of Egypt, which was capable of, and no doubt actually received, a twofold interpretation. In his elaborate treatise (*Aaron purgatus, sive de Vitulo aureo*), Moncæus labours to show that Aaron intended his calf to be a cherubic representation of Jehovah, and not an Egyptian deity. This writer seems to us to have succeeded very well in establishing the probability that *such was Aaron's intention*; after the fabrication of the image he proclaimed a dedication festival for the next day in the remarkable words, 'To-morrow is a feast to the LORD' (Exod. xxxii. 5); but even on this milder view the sin was in direct violation of the moral law, and excited God's anger (Deut. ix. 20). But whatever be the extenuation which this theory may gain *for Aaron*, it does not reach (as it appears to us) *to the people*. The fatal compliance of their leader only encouraged them in the indulgence of their tendency to the grossest idolatry; the dedication festival itself was turned by them into a heathen revel—'The people sat down to eat and drink, and rose up to play,' giving themselves fully up to the most indecent ritual of pagan worship (comp. Exod. xxxii., ver. 6 with ver. 25). In the later allusions to this sad event the sacred writers treat the calf as nothing but an idol—'They made a calf in Horeb, and worshipped the molten image; thus they changed their glory into the similitude of an ox that eateth grass' (Ps. cvi. 19, 20). So the prophet Amos (v. 25, 26) reproves not only this transaction, but the entire conduct of the Israelites during their abode in the wilderness, as an unmitigated apostasy from Jehovah to heathenism—'Did ye offer unto me sacrifices and offerings for forty years, O house of Israel? Ye bare about the tabernacle of your Moloch and Chiun your images, the star of your god which ye made to yourselves;' as if the primeval sin which they had copied from Egypt only led, when time and contact with other nations enabled them, to their similar adoption of the Moabite and Syrian gods also. The Jewish writers exhibit much anxiety to exculpate the brother of Moses; some

(as the Jerusalem Targumist) pretend that Aaron yielded through fear to the frenzied crowd who had slain his colleague Hur for resisting their insane request. But Aben Ezra rejects with disdain a theory which, while rescuing Aaron from one imputation, overwhelms him with a worse. He takes somewhat the view which we have advanced, that the golden calf was not at the first designed to be an idol, but a symbol of Jehovah; that afterwards it was the people who abused it as an object of idolatrous adoration. Aben Ezra (see Cohen, *Pentateuque*, ii. 147, 148) sees in this view a reconciliation of some difficulties, and justly, as it seems to us. Identical in drift and character was the moscholatry of Jeroboam the son of Nebat. The avowed purpose of his calves at Dan and Bethel was to provide his new subjects with a substitute of divine worship which should supersede their attendance at the temple-service at Jerusalem (1 Kings xii. 26-29). Monceus designates these images, no less than Aaron's, as cherubic symbols of Jehovah. Whatever may be thought of some of his arguments,\* we have the patent fact that Holy Scripture recognizes a distinction between this image-worship of Jeroboam and the idolatry of Ahab. The Baal *cultus* of the latter was a rejection of Jehovah, whereas the ritual of Jeroboam expressly, like Aaron's, acknowledged the God 'which had brought Israel out of Egypt' (comp. Exod. xxxii. 4, and 1 Kings xii. 28, with Lev. xxii. 32, 33), and provided a feast 'like unto the feast† that is in Judah,' with other institutions resembling those of the temple (1 Kings xii. 32, 33). By and by, when Jehu had executed the judgment of God upon the family of the apostate Ahab, the divine approbation is expressed in terms which indicate the distinction,‡ which we have stated (see 2 Kings x. 28-31). In the history of Ahab himself, the sacred historian had plainly indicated the distinction in 1 Kings xvi. 31-33; but the most expressive passage is 2 Kings iii. 2, 3, where, concerning Ahab's son Jehoram, it is said, that 'he wrought evil in the sight of the LORD, but not like his father, and like his mother, for he put away the image of Baal . . . Yet he clave unto the sins of Jeroboam the son of Nebat, which made Israel to sin.'

\* His entire treatise is given in *Critici Sacri*, ix. 4403-4530, and an excellent abridgment in *Poli Synopsis* on Exod. xxxii. 4. Monceus' work, however, received great opposition both from his own church, which prohibited it, and from Protestants. Nicolai, in his notes to Cunæus, *de Repub. Hebr.* (2. 16), says of its contents roundly, 'Quot verba tot fragmenta veritati contraria.' See, for the opposite view to that of Monceus, Moebius, *MoscholatRIA*; and G. Michael, ad Jac-Gaffard, *Curiositates*, pp. 76, 77; Bochart, *Hieroz.*, l. 11 par. i. c. xxxiv. fol. 354; Selden, *De Diis Syr.*, et Beyer, *Addimenta*; Spencer, *De Legg. Hebr.*, iii. 4.

† The intentional change of this feast from the prescribed seventh month to the eighth, is of course in keeping with the independence and wilfulness, the ἀελοειρησκέλια, of all Jeroboam's ecclesiastical ordinances.

‡ J. D. Michaelis, in his *Commentaries on the Laws of Moses*, art. 245, defines the distinction between 'the crime of worshipping other gods besides the only true God,' which he calls *Abgotterei* (idolatry) and 'the crime of image-worship' (*Bilderdienst*).

But this theory of palliation effects but little after all. Monceus calls his work *Aaron purgatus*; and he includes the calves of Jeroboam with Aaron's under cover of his extenuation; but would he add, *Jeroboam purgatus*? We suppose not. It is, in fact, a dangerous exegesis which draws distinctions or degrees in a question of sin and moral guilt. It is observable how the least flagrant, no less than the most violent, of these cases of image-worship, led to idolatry and apostasy. Not only did Aaron's calf lead on to Moloch and Chium, and Jeroboam's to Baal and Ashtaroth, but even Gideon's domestic and apparently harmless ephod soon degenerated into the gross formulary of Baal-berith (Judg. viii. 27 comp. with 33). A great deal of discussion has been indulged in as to how Moses destroyed the golden calf; both from the narrative in Exod. xxxii. 20, and his own statement in Deut. ix. 21, it seems that he adopted much ceremony to mark his indignation at the sin of his brother and the people. He took the calf, melted it in the fire to destroy its shape; then ground, or beat, or filed the gold into small pieces or dust, and threw the latter into the water of the stream which flowed from Horeb. 'This,' says Kalisch (on Exod. xxxiv. 15, 24), 'is the only possible explanation which the literal sense of the text admits; יִשְׂרָאֵל is not necessarily to consume by fire, but only to burn, to put into the flames . . . the words טָהַר and קָדַשׁ do not compel us to suppose the pieces to have been exactly so fine as powder; and as the act of drinking the water was a symbolical one, it would be pedantic to urge that the atoms which are thus produced are not small enough to amalgamate with the water. It is therefore neither necessary to recur, with Rosenmüller, to the conjecture, that the calf was by a certain chemical process, known already to the ancient Egyptians, reduced to powder, or calcined; nor to suppose here with Winer, 'the incorrect view, or at least the incorrect expressions of a writer not versed in the matter.' Moses threw the atoms into the water, as an emblem of the perfect annihilation of the calf, and he gave the Israelites that water to drink, not only to impress on them the abomination and despicable character of the image which they had made, but as a symbol of purification, to remove the object of the transgression by those very persons who had committed it (compare Num. xix.)' Not less decisive, though more tardy, was the fate of Jeroboam's moscholatry. However astutely designed by its founder, it carried the seeds of its own dissolution from the very first: In 2 Kings xvii. 22, 23, the fall of the kingdom is expressly attributed to the gods of Jeroboam,\* and the prophet Hosea had denounced ruin on them, and captivity on the nation of their votaries: 'Thy calf, O Samaria, hath cast thee off—the calf of Samaria shall be broken in pieces—it shall be also carried into

\* Multiplied fearfully at last; for 'the children of Israel built them high places in all their cities' (ver. 9); similarly in the neighbouring kingdom, the sin spread so widely, that the prophet more than once upbraided it: 'according to the number of thy cities were thy gods, O Judah' (Jer. ii. 28; xi. 13). This reminds us of Strabo's statement (xvii.) on the idolatry of various Egyptian cities; τρέφεται θήλεια βοῶς ἱερὰ, καθάπερ ἐν Μέμφει ὁ Ἄπης, ἐν ἡλίῳ δὲ πόλει ὁ Μνεῦς, οὗτοι μὲν οὖν θεοὶ νομίζονται.

Assyria for a present to king Jareb (ירב, the strife-ful or hostile king); Ephraim shall receive shame, and Israel shall be ashamed of his own counsel' (viii. 5, 6; x. 6; comp. Selden, *De Dis Syris Syn- tag.* i. 4; *Works*, by Wilkins, ii. 300).<sup>\*</sup> The memory of this sin, especially of Aaron's share in its origin, is retained sadly and bitterly by thought-ful Jews; a proverb of theirs attests somewhat strangely this sentiment, אין לך ישראל פורענות, 'No punish-ment happeneth to thee, O Israel, wherein there is not an ounce of the sin of the calf' (Moses Gerund. cited by Munster on *Exod.* xxxii.) But the Mohammedans, no less than the Jews, labour hard to explain away, or at least extenuate, the odium of this idolatry. In the Koran there are many express references to Aaron's calf; the two chief are—Sura, vii. 146-148; and Sura, xx. 81-96. See Maracci, *Alcoranus*, vol. ii., pp. 281, 445.

The word עֵינַל is the common designation of this image (*Exod.* xxxii.), which in the LXX. is rendered generally by μῶσχος, sometimes by μωσχάριον, βοῖδιον or δαμάλις. In Ps. ciii. 20, the word used is שֹׁר, *bos* vel *vitulus*. Beyer on *Sel-den*.—P. H.

MOSERA (מוֹסֶרָה, or מוֹסֶר, the ה being local; Μωσαδαῖ; Alex. Μωσαδαῖ; Mosera), one of the stations of the Israelites in the wilderness. It appears to have been situated at the base of Mount Hor, or at least not far distant from the mount; for Moses says in Deut. x. 6—the only passage in which the name occurs—that at Mosera 'Aaron died, and there he was buried.' In this passage, where the historian groups together a few facts connected with the giving of the law, and the office of high-priest, there is no contradiction to the statement in Num. xxxiii. 37, 38, where it is said that the Israelites 'pitched in Mount Hor,' and 'Aaron went up into the mount and died there.' The general name of the district in which Mount Hor stands may have been Mosera. [WILDERNESS OF WANDERING.]

A station called Moseroth (מֹסֶרוֹת, pl. of מוֹסֶר; Μαωρουθῶ; Moseroth) is mentioned in Num. xxxiii. 30, which is evidently identical with Mosera, as the same stations are named in the same relative positions with regard to both (cf. Deut. x. 6, 7; Num. xxxiii. 30-33), though the Israelites were journeying in one direction in the one case, and in an opposite in the other. It may be inferred that Mosera or Moseroth was a district adjoining Wady Mûsa, and including Mount Hor, on which the tomb of Aaron still exists.—J. L. P.

MOSES (מֹשֶׁה; Μωϋσῆς; Μωσῆς), the lawgiver of Israel, belonged to the tribe of Levi, and was a son of Amram and Jochebed (*Exod.* vi. 20). His brother Aaron and his sister Miriam, both his seniors, constituted the other members of the family. According to *Exod.* ii. 10, the name מֹשֶׁה means *drawn out of water*. Even ancient writers knew that the correctness of this interpretation could be proved by a reference to the Egyptian language (comp. Joseph. *Antiq.* ii. 9. 6; *contra Apionem*, i.

31; Philo, ii. 83, etc., ed. Mang.) In Coptic *mo* signifies *water* and *ushe*, *saved*; and with this derivation accords also the Greek form of the name, Μωϋσῆς. The name contains also an allusion to the verb מָשָׁה, *extraxit*, *he extracted*, *pulled out*.

Hence it appears that מֹשֶׁה is a significant memorial of the marvellous preservation of Moses when an infant, in spite of those Pharaonic edicts which were promulgated in order to lessen the number of the Israelites. It was the intention of Divine Providence that the great and wonderful destiny of the child should be from the first apparent: and what the Lord had done for Moses he intended also to accomplish for the whole nation of Israel.

It was an important event that the infant Moses, having been exposed near the banks of the Nile, was found there by an Egyptian princess, to whom Jewish tradition gives the name of Thermuthis (Joseph. *Antiq.* ii. 9. 5); and that, having been adopted by her, he thus obtained an education at the royal court (*Exod.* ii. 1-10). Having been taught all the wisdom of the Egyptians (*Acts* vii. 22; comp. Joseph. *Antiq.* ii. 9. 7), the natural gifts of Moses were fully developed, and he thus became in many respects better prepared for his future vocation. Though educated, however, as an Egyptian and the adopted son of the daughter of the Pharaoh, his own mother was his nurse, and to this doubtless his adherence, when he came of age, to the religion and people of his fathers is to be traced.

After Moses had grown up, he returned to his brethren, and, in spite of the degraded state of his people, manifested a sincere attachment to them. He felt deep compassion for their sufferings, and showed his indignation against their oppressors by slaying an Egyptian whom he saw ill-treating an Israelite. This doubtful act became by Divine Providence a means of advancing him farther in his preparation for his future vocation, by inducing him to escape into the Arabian desert, where he abode for a considerable period with the Midian- itish prince-priest Jethro, whose daughter Zipporah he married (*Exod.* ii. 11, *seq.*) Here, in the soli- tude of pastoral life, he was appointed to ripen gradually for his high calling, before he was unex- pectedly and suddenly sent back among his people, in order to achieve their deliverance from Egyptian bondage.

His entry upon this vocation was not in conse- quence of a mere natural resolution of Moses, whose constitutional timidity and want of courage ren- dered him disinclined for such an undertaking. An extraordinary divine operation was required to overcome his disinclination. On Mount Horeb he saw a burning thorn-bush or acacia [SHITTIM], in the flame of which he recognised a sign of the immediate presence of Deity, and a divine admo- nition induced him to resolve upon the deliverance of his people. On this occasion God revealed to Moses the full import of his covenant name [JE- HOVAH]. Thus instructed he returned into Egypt, where neither the dispirited state of the Israelites, nor the obstinate opposition and threatenings of Pharaoh, were now able to shake the man of God.

Supported by his brother Aaron, and commis- sioned by God as his chosen instrument, proving, by a series of marvellous deeds [EGYPT, PLAGUES OF], in the midst of heathenism, the God of Israel

<sup>\*</sup> In Hosea (xiii. 2) reference is made to the cus- tom of *kissing the calves*. Kissing was an act of homage in the East, done upon the hand or foot, the knees or shoulder. [ADORATION; KISS.]

to be the only true God, Moses at last overcame the opposition of the Egyptians. According to a divine decree, the people of the Lord were to quit Egypt, under the command of Moses, in a triumphant manner. The punishments of God were poured down upon the hostile people in an increasing ratio, terminating in the death of the firstborn, as a sign that all had deserved death. The formidable power of paganism, in its conflict with the theocracy, was obliged to bow before the apparently weak people of the Lord. The Egyptians paid tribute to the emigrating Israelites (Exod. xii. 35), who set out laden with the spoils of victory.

The enraged king vainly endeavoured to destroy the emigrants. Moses, firmly relying upon miraculous help from the Lord, led his people through the Red Sea into Arabia, while the host of Pharaoh perished in its waves (Exod. xii.-xv.).

After this began the most important functions of Moses as the lawgiver of the Israelites, who were destined to enter into Canaan as the people of promise, upon whom rested the ancient blessings of the patriarchs. By the instrumentality of Moses they were appointed to enter into intimate communion with God through a sacred covenant, and to be firmly bound to him by a new legislation. Moses, having victoriously repulsed the attack of the Amalekites, marched to Mount Sinai, where he signally punished the defection of his people, and gave them the law as a testimony of divine justice and mercy. From Mount Sinai they proceeded northward to the desert of Paran, and sent spies to explore the land of Canaan (Num. x.-xiii.). On this occasion broke out a violent rebellion against the lawgiver, which he, however, by divine assistance, energetically repressed (Num. xiv.-xvi.).

The Israelites frequently murmured, and were disobedient, during about forty years. In a part of the desert of Kadesh, which was called Zin, near the boundaries of the Edomites, after the sister of Moses had died, and after even the new generation had, like their fathers, proved to be obstinate and desponding, Moses fell into sin, and was on that account deprived of the privilege of introducing the people into Canaan. He was appointed to lead them only to the boundary of their country, to prepare all that was requisite for their entry into the land of promise, to admonish them impressively, and to bless them.

It was according to God's appointment that the new generation also, to whom the occupation of the country had been promised, should arrive at their goal only after having vanquished many obstacles. Even before they had reached the real boundaries of Canaan they were to be subjected to a heavy and purifying trial. It was important that a man like Moses was at the head of Israel during all these providential dispensations. His authority was a powerful preservative against despondency under heavy trials.

Having in vain attempted to pass through the territory of the Edomites, the people marched round its boundaries by a circuitous and tedious route. Two powerful kings of the Amorites, Sihon and Og, were vanquished. Moses led the people into the fields of Moab over against Jericho, to the very threshold of Canaan (Num. xx. xxi.). The oracles of Balaam became, by the instrumentality of Moses, blessings to his people, because by

them they were rendered conscious of the great importance of having the Lord on their side.

Moses happily averted the danger which threatened the Israelites on the part of Midian (Num. xxv.-xxxi.). Hence he was enabled to grant to some of the tribes permanent dwellings in a considerable tract of country situated to the east of the river Jordan (Num. xxxii.), and to give to his people a foretaste of that well-being which was in store for them.

Moses made excellent preparations for the conquest and distribution of the whole country, and took leave of his people with powerful admonitions and impressive benedictions, transferring his government to the hands of Joshua, who was not unworthy to become the successor of so great a man. With a longing but gratified look, he surveyed, from the elevated ground on the border of the Dead Sea, the beautiful country destined for his people.

Moses died in a retired spot at the age of one hundred and twenty years. He remained vigorous in mind and body to the last. His body was not buried in the promised land, and his grave remained unknown, lest it should become an object of superstitious and idolatrous worship. This honour was due, not to him, but to the Lord, who had manifested himself through the whole life of Moses. Not the body, but the word, of Moses was permanently to abide in Israel. The people of God produced no prophet greater than Moses, because by none was the Lord more glorified. Among all the men of God recorded in the O. T., Moses presents the most wonderful and imposing aspect.

The Pentateuch is the greatest monument of Moses as an author. The ninetyeth psalm also seems to be correctly ascribed to him. Of the poetical pieces in the Pentateuch, some are certainly, others probably, of his composition. To the former belong the 'songs' in Exod. xv. 1-19, and Deut. xxxii. 1-43, and the blessing on the tribes in Deut. xxxii. 1-15; to the latter the pieces in Exod. xvii. 16; Num. xxi. 14, 15, 16, 27-30. Some learned men have endeavoured to prove that he was the author of the book of Job, but their arguments are inconclusive [JOB].

Numerous traditions, as might have been expected, have been current respecting so celebrated a personage. Some of these were known to the ancient Jews, but most of them occur in later rabbinical writers (comp. Philo, *De Vita Mosis*, c. iii.; Joseph. *Antiq.* ii. 9, *seq.*; Bartolucci, *Bibliotheca Rabbinica*, iv. 115, *seq.*).

The name of Moses is celebrated among the Arabs also, and is the nucleus of a mass of legends (comp. Hottinger, *Historia Orientalis*, p. 80, *seq.*; D'Herbelot, *Bib. Or.*, art. *Moses*). The Greek and Roman classics repeatedly mention Moses, but their accounts contain the authentic Biblical history in a greatly distorted form (*vide* the collection of Meier, *Judaica, seu veterum Scriptorum profanorum de Rebus Judaicis Fragmenta*, Jenæ 1832).

Concerning the life of Moses, compare also Warburton, *On the Divine Legation of Moses*; Hess, *Geschichte Mosis*, Zurich 1778, 2 vols.; Niemeyer, *Charakteristik der Bibel*, 3d vol.—  
H. A. C. H.

MOSES, LAW OF. (I.) The legislative system of the Hebrew nation is frequently called, both in

O. T. and N. T., after the name of the great HUMAN legislator. In the most ancient book of Scripture, next to the Pentateuch itself, 'the law of Moses' (תּוֹרַת מֹשֶׁה; LXX. *ὁ νόμος Μωϋσῆ*; Vulg. *Lex Moysi*) is repeatedly mentioned; Josh. viii. 31, 32; xxiii. 6. In Josh. viii. 34, LXX. has *νόμος Μωϋσῆ* also, but the Hebrew simply *הַתּוֹרָה*. The

same designation occurs in later books; see 1 Kings ii. 3; 2 Kings xiv. 6; xxiii. 25; 2 Chron. xxiii. 18; xxx. 16 [where LXX. has *ἐντολὴ Μωϋσῆ*]; Ezra iii. 2; vii. 6; Neh. viii. 1; Dan. ix. 11, 13; and (in the very last precept of the O. T.) Malachi iv. 4. In the Christian Scriptures the designation reappears; see Luke ii. 22; xxiv. 44; John vii. 23; Acts xiii. 39; xv. 5; xxviii. 23; 1 Cor. ix. 9; Heb. x. 28; in all which passages, according to the best reading, the phrase is invariably written *ὁ νόμος Μωϋσέως*, which form of the proper name also occurs in four places of the Septuagint. (2.) Another general designation of the Hebrew code, of still more frequent occurrence in O. T., refers to the DIVINE author thereof, *תּוֹרַת יְהוָה*, 'the Law of the Lord' (1 Chron. xvi. 40, and *passim*), and *תּוֹרַת אֱלֹהִים*, 'the Law of God' (Josh. xxiv. 26, and *passim*). This appellation occurs but sparingly in N. T. (see the *νόμος Κυρίου* of Luke ii. 23, 24, 39), where the absolute term *ὁ νόμος* usually designates the law of Moses.

*Introductory.*—The main purport of this article is to give a digest of the Mosaic legislation, by reviewing the *structure* of the code itself; and it will contribute much to the elucidation of our subject if we detail, as briefly as may be, the circumstances under which the law was first promulgated, and ultimately revised and settled. This sketch, however, must itself be preceded by a passing notice of the *place* which is occupied by the Mosaic economy in the order of the Divine dispensations. It is impossible not to assign to it a step in these dispensations. But whether its place be a principal or a supplemental one has been much disputed. Much stress in support of the latter view has been laid on St. Paul's expressions (the *παρορεθῆναι* of Gal. iii. 19, and the *παρεσθῆναι* of Rom. v. 20). 'The Law proper *was superadded and came in by the way*, helping on indeed most powerfully the great consummation, but doing so indirectly, and often by seeming antagonism, working rather on the negative than on the positive side' (Perowne, *Coherence of O. and N. T.*, p. 84; Faber, *On the three Dispensations*, vol. ii. p. 135; Wordsworth, *Gr. Test.* on Rom. v. 20). It seems, however, contrary to the general teaching of the N. T., and of St. Paul in particular, to reduce the law to the secondary rank of a collateral or merely by-dispensation. As a preliminary to the gospel, it is co-ordinate with the other providential stages whereby God prepared for the mission of his Son. In its MORAL enactments it recapitulated and gave precision to natural religion, for *sin*, which had entered at the fall, became *transgression* under the specific dictates of the law. In this respect the law holds a distinct place in advance of any preceding *καρπὸς* or dispensation; and this is further seen if we consider some other results of its operation. It exercises over the sinner in its highest activity a critical power, but not a mediatorial or reconciling one (see Nitzsch, *Chris-*

*tian Doctrine* [Clark], p. 224); for it upholds the inviolability of God's will without emancipating the natural will of man from his sinful bias (Rom. viii. 3); by its inflexible purport it begets the knowledge of sin (Rom. iii. 20; vii. 7, 8), and although it excites an admiration of good (Rom. vii. 22), it forces upon man the conviction of his own impotence to attain it (Rom. vii. 24; viii. 3), and so creates a longing for deliverance, and ultimately leads to him in whom it is provided (Gal. iii. 24). But 'this propædæutic office' (Dean Alford on Gal. iii. 19-24) the Law effects mainly by its RITUAL ordinances. Whatever may be thought of the parenthetic character of the Mosaic legislation in its moral aspect, it will hardly be denied that in its ritualism it is an advance towards the Gospel upon every preceding worship of which we have an account. Holy Scripture gives us scattered hints of patriarchal worship from the earliest times (*e.g.*, that of Cain and Abel, Gen. iv. 3, 4; and Heb. xi. 4; Noah's, Gen. viii. 20, 21; Abraham's, Gen. xiii. 18; xxi. 12, 13; and Heb. xi. 17-19; Isaac's, Gen. xxvi. 25; Jacob's, xxxii. 20), and beyond the limits of the chosen people we have instances of similar worship in the histories of Melchizedek, Job, Laban, Jethro, and Balaam. A great detail of particulars in the sacrificial adoration of the heathen nations is collected in Dollinger's *The Gentile and the Jew*, etc. [by Darnell], vols. i. and ii. *passim*; and in Freeman's *Principles of Divine Service*, vol. ii., part ii., pp. 73-89 (see also Smith's *Dict. of G. and R. Antig.*, s. v. SACRIFICIUM); and that this was a real, though debased, emanation from the primitive purity of patriarchal worship is ably contended for by Mr. Gladstone in the section of his *Studies on Homer*, on 'the traditive element of the Homeric Theo-mythology,' which 'theo-mythology' he had in the preceding section shown to be a true theology corrupted (see vol. ii., pp. 1-171). A careful review of the varied rites of this early worship informs us of the extent to which human invention had gone in perverting the patriarchal simplicity of religion; and illustrates the real value of the Mosaic revelation, which both restored that simplicity and superadded such precision of symbol and type as pointed more plainly than ever to the ultimate provisions of the gospel. Thus the law of Moses was an actual progress in the series of dispensations.

It was by the discipline of a crushing bondage, no less spiritually than physically debasing (Exod. xvi. 3; Num. xi. 4, 5; Josh. xxiv. 19; Ezek. xx. 5-9; xxiii. 3, 19. See Kalisch *On the Feast of the Passover* [Comment. on Exodus, p. 180]), that the chosen people were prepared for political freedom and spiritual emancipation in a theocratic unity and brotherhood. But God had provided, in his gracious providence, especial means of bringing about this result in the institution of circumcision, the passover, and the Sabbath. When they went down to the house of bondage, the land of Egypt (Exod. xx. 2), they bore with them only the *initial* sign of a covenanted people, in that circumcision which bound the *individual* alone to Jehovah (Kalisch on Exod. xx. 8); when they at last quitted it, they celebrated their exodus by the festival of the passover, the sign of a *national* devotion to the God who had delivered them (Exod. xii. 6); and what the right of circumcision did for them *once in a lifetime*, and the passover *once in a year*, the primeval institute of the Sabbath, which had

never been dropped wholly among them, accomplished with even a *weekly frequency*. This probation does not fail of its purpose. Israel gets its adoption and call from its state of slavery to be the Lord's 'first-born' (Exod. iv. 22), chosen before all other nations—to do for them what a first-born son was privileged to do for a family—to exercise priestly functions, to preserve and propagate the doctrine of God, and thus to become the teachers and prophets of the nations. Fresh from the signs and wonders of their exodus, which they had consecrated by the sacramental passover, the youthful nation is brought to the base of Mount Sinai, one of the heights of Horeb, the scene of God's first revelation to Moses, there to be inaugurated in its theocratic polity for its holy functions. It is to be observed, that as usual with God in his dealings with men, the first overtures of a covenant come from the Divine being. After his own precedents of mercy in the cases of Noah\* (Gen. vi. 18; ix. 9-17), and of Abraham (xvii. 2-8), repeated with Isaac (xxvi. 2-5), and with Jacob (xxxv. 9-12), God now expressly invites, through Moses, the liberated nation to enter with him into a gracious covenant (Exod. xix. 3-6). The people promptly accept the offer and its conditions (xix. 8). A solemn preparation during three days is made (xix. 10-15) for the interview, which Jehovah proposed to hold in clouded majesty (xix. 9). Subdued, however, as his glory was, it was too much for the terrestrial objects before which it was displayed. Old Sinai 'quaked greatly' (xix. 18); 'all the people in the camp trembled' (xix. 16); and even Moses, used as he was to the presence of God, partook of the awful feeling (I Heb. xii. 21). Amidst these sublime portents of thunders and lightnings, and trembling hearts, and surrounded with a heavenly retinue (Deut. xxxiii. 2), Jehovah spake in audible words to the 'sanctified' host, which were ranged at a specified distance around the foot of the mountain, and whose attention had been fixed by a loud trumpet sound. 'Ten words,' or utterances, are expressly mentioned as spoken by Jehovah (עֲשֵׂתֵי הַדְּבָרִים, Exod. xxxiv. 28; Deut. iv. 13; x. 4). In these lies the DECALOGUE, the essence of the theocratic legislation, the root of all the other laws. It attested the will of God to the people, and hence is called 'the Testimony' (הָעֵדוּת, see Exod. xxxi. 18; xxxii. 15; xxxiv. 29); and was the earliest document of the Covenant, and, as such, was sometimes emphatically named 'the Covenant' (הַבְּרִית, Exod. xxxiv. 28; Deut. iv. 13; and so, later, 1 Kings viii. 21; 2 Chron. vi. 11). These 'ten words' (the common synonym of *ten commandments* does not occur in the original Scriptures) were the only portion of the law which Jehovah announced himself. More, perhaps, he might have spoken, but the affrighted people entreated that Moses might be their mediator: 'Speak thou with us, and we will hear; but let not God

speak with us, lest we die' (Exod. xx. 19). Enough had been done to reveal the real existence of Jehovah, and to vindicate the greatness of his majesty. So he condescended to the weakness of his people, and ceased from his personal communications to them. But he added a caution against idolatry (xx. 22, 23), the vanity of which he bade them conclude from his own actual voice which they had heard (comp. verse 22 with Ps. cxv. 3-9; Is. xlv. 18-20). Moreover, as the nation in general had renounced its priestly access to Jehovah, an official priesthood became necessary; God accordingly at once indicated to Moses the institution of an altar, and gave to him, who (as mediator) combined in himself at the moment all functions, including the sacerdotal itself (whence it was he who afterwards consecrated Aaron and his sons, see Exod. xl. 12-16), directions respecting it (xx. 24-26). The twentieth chap. of Exodus, which contains the Divine proclamation of the Decalogue as the nucleus of the theocratic law, is followed by legislative prescriptions, throughout chapters xxi.-xxiii. 19, which comprise what is called in chap. xxiv. 7, סֵפֶר הַבְּרִית, 'the book of the covenant' (Hävernick, *Introduction*, gives a much wider sense to this 'Book of the C.:'; but Hengstenberg, *On the Pent.* [Clark], ii. 125; Kurtz, *Old Cov.* [Clark], iii. 141; Bertheau, *Die sieben Gruppen*; Knobel, *on Exodus*; Rosenmüller, *in loc.*, follow the prevalent opinion of the older commentators, which we adopt, influenced by the simple sense of the entire passage; see Corn. a Lapide and Patrick on Exod. xxiv. 7; and, more fully, Dresdius, *De libro qui liber fœderis appellatur*). This 'Book of the Covenant' contained probably the ten commandments, or words of Jehovah, (as the basis) and 'the judgments,' or statutory details of the same, found in chapters xxi.-xxiii., which God gave the people by Moses, as the terms on which they stood in the theocratic covenant with him (see this division of 'the Book,' apparently indicated in Exod. xxiv. 3, where בְּלִדְבָרֵי יְהוָה = the Decalogue, and בְּלִדְמוֹשֶׁבֶטִים = the subsequent statutes, or Decalogue reduced to a practical code).

*The Structural Character of the Law.*—In the 13th section of Dr. Forbes' work, *On the Symmetrical Structure of Scripture*, the Decalogue is submitted to a symmetrical analysis, and the significance of the number ten as the symbol of completeness is illustrated after Bähr, *Symbolik des Mos. Cultus*; and Dr. Fairbairn's *Typology of Scripture*. This, however, we can do no more than thus cursorily refer the reader to (see also Kurtz, *Old Covenant*, iii. 121, and the authorities he quotes). It is more to our purpose to accept the number ten as the basis indicated by the Divine author himself (see the above-mentioned עֲשֵׂתֵי הַדְּבָרִים of Exod. xxxiv. 28) of the structural form of his law. Ernst Bertheau, *Die Sieben Gruppen Mos. Gesetze*, has taken this basis; and, whatever may be thought of his work as a whole (Ewald speaks very favourably of it, *Geschichte des Volkes Israel*, ii. 217, and accepts it as the groundwork of a still more elaborate structural division of some of the laws; Baumgarten, *Comment. zum Pentateuch*, follows it largely in his vol. ii.; while Kurtz, *Old Covenant* [Clark], iii. 138, commends the hypothesis as having

\* The covenant, however, which God made with Noah belonged to the whole human race, and not to God's theocratic kingdom on earth; accordingly it is אֱלֹהִים (*Elohim*), and not יְהוָה (*Jehovah*), who speaks in Gen. vi. and ix. Von Gerlach, *On the Pent.* [Clark], p. 62.

‘much to recommend it,’ and as displaying great acuteness on the author’s part, but relinquishes it, too summarily we think, as untenable), there is no doubt much to interest the reader in it, and especially in this early portion of the Mosaic legislation, ‘the Book of the Covenant.’ This he succeeds in showing to consist of a *group of decalogues*, which we must here be content with simply indicating. The ‘group’ contains *seven* sections, and each of these ten commandments. The first section is *the Decalogue*, κατ’ ἐξοχήν, God’s own spoken ‘words.’ This and the six other sections are contained in the following passages :—

Section I. Exod. xx. 3, 4, 7, 8, 12, 13, 14, 15, 16, 17.\*

Section II. Exod. xxi. 2, 3, 3, 4, 5, 7, 8, 9,  
IO, II.

Section III. Exod. xxi. 12, 13, 14, 15, 16, 17, 18, 20, 22, 26.

Section IV. Exod. xxi. 28, 33, 35; xxii. 1, 5, 6, 7, 10, 14, 16.

Section V. Exod. xxii. 18, 19, 20, 21, 22, 25, 26, 28, 29, 31.

Section VI. Exod. xxiii. 1, 1, 2, 3, 4, 5, 6, 7, 7, 8. [Verses 9-13 contain special and isolated precepts.]†

Section VII. Exod. xxiii. 14, 15, 15, 16, 16, 17, 18, 18, 19, 19.

'The Book of the Covenant,' which is thus distributed, suitably ends with a decade of blessings (Berthearn, pp. 72-76). These blessings our author apportions among the last fourteen verses of chapter xxiii., in the manner following:—20, 23, 25, 25, 26, 26, 27, 28, 29, 31-33. With them the first great division of the laws of Moses is concluded; but before we proceed to the subsequent laws, we have to notice the brief but highly significant history which intervenes in Exod. xxiv. We have seen with what promptitude the nation accepted God's proposal of a covenant, and the great preamble of its conditions and privileges (Exod. xix. 8). With similar alacrity and with a like formula does it now ratify the covenant itself, and receive its sequel of promises. This ratification was confirmed with solemn sacrificial rites

\* The Arabic figures which mark the verses also indicate the *beginning* of the various commandments. When the figure is repeated it must be understood that as many commandments begin in the verse as there are repetitions of the same figure: thus, in section ii. *two* commandments have their beginning in the *twice* repeated verse 3 of Exod. xxi., each indicated by the formula **ד**, 'if,'

† So Berthieu, pp. 42-48. Notwithstanding the force of the remarks by which he justifies this isolation of verses 9-13, it is difficult to agree with him in detaching the precepts they contain from the context, with which they seem naturally to cohere. We venture to substitute the following arrangement of the first 13 verses of chap. xxiii., as forming a decade of precepts in themselves, without any elimination—1, 2, 4, 6, 7, 8, 9, 10, 12, 13. We must not be regarded as pledging ourselves to an absolute reception of Berthieu's hypothesis in all its details. We think his *second* group very arbitrary, and this part of his work has exposed him to most severe criticism; but we cannot but admit that after all drawbacks his general arrangement has much to recommend it.

(vers. 4, 5; comp. Homer, *Il.* iii. 297-301, and the facial rites described by Livy, *Hist.* i. 24; see also similar ceremonies suggested by Plato, *Critias*, and J. D. Michaelis's note thereon in his *Mosaisches Recht* [Smith's trans., i. 364], sec. 70), for the performance of which Moses appoints, for want of the Levitical priesthood not yet consecrated, 'young men of the children of Israel,' who were either the first-born (see Exod. xiii. 2) or select youths of special aptitude for the work with out regard to primogeniture (so, with less reason, Abarbanel, quoted by Rosenmüller; comp. xix. 22). One point of this ceremonial has a profound connection with our Lord's institution of the Eucharist (comp. ver. 8 with Matt. xxvi. 28; Mark xiv. 24; Heb. x. 22; 1 Pet. i. 2). The sacrifice was followed by a festive commemoration, by which God showed his gracious approval of the nation's acceptance of his covenant, in the presence of their future priests and seventy representatives (ver. 11). This impressive and happy ceremony ended, Moses is invited to ascend the mount for a lengthened and solitary interview with God—to receive from him additional laws, now rendered necessary by his new relation to them as their theocratic king. A suitable residence must be provided for their Divine King, who purposed to dwell among them. 'Tent-like must be the palace, as befitted the at present nomadic condition of the people. The king, too, must have his court-officials, through whom access to the royal 'presence must be arranged for his subjects. Hence the next great portion of the Mosaic law pertains to the sanctuary or tabernacle, and to the priests and their sacred garments. With directions about these the book of Exodus is wholly occupied (except in one or two *historical* chapters) from chap. xxv. to the end. God gave his servant these details on the mount, 'patterns themselves of things in the heavens' (Heb. ix. 23; comp. viii. 5), and this their heavenly original, as well as the minute care bestowed on them in the law, impresses on this part of the Mosaic code a profound importance, not only as the vehicle of elevated instruction to the Jews of old, but in its relation to the gospel. 'Christianity in fact is the pattern, of which, as already existing in the mind of God, the Mosaic scheme was a copy, impress (*τύπος*), or imitation' (Freeman, *Principles of Divine Service*, p. 151). Bertheau pursues his theory here, and sees as before decalogues of laws (*Gruppen*, 104-128). His arrangement, which, however, more than anywhere else dislocates the text of Scripture, we here set down, specifying as before the beginning of each commandment by the *verse* figures :—

Section I. Exod. xxvi. 1, 4, 6, 7, 10, 11, 14, 15, 18, 26-29; containing ten laws about the materials of the tabernacle, etc.

Section II. Exod. xxv. 10, 11, 13, 17, 18-22 ; xxx. 1, 3, 5-10 ; xxv. 31, 37-39 ; ten laws about the ark, the golden altar, and the golden candlestick.

Section III. Exod. xxv. 23, 24, 25, 25, 26, 28, 29; xxvi. 31, 36, 37; ten laws about the table of shew-bread, the vail (before the holy of holies), and the hanging (before the holy place).

Section IV. Exod. xxvii. 9-19; xxx. 18-21, 25-33, 34-38; xxvii. 1, 2, 3, 4, 4, 6-8; ten laws about the court, the laver, the anointing oil, the incense, and the brazen altar.

Section V. Exod. xxviii. 6, 13, 15, 22, 23, 26,  
Q

27, 31, 33, 36; ten laws about the priests' garments.

Section VI. Exod. xxix. 1, 4, 5, 7, 8, 10, 12, 13, 15, 16; ten laws about the consecration of the priests (first series).

Section VII. Exod. xxix. 19, 20, 21, 22, 25, 26, 29, 31, 35, 38-42; ten laws about consecration (second series).

The book of *Leviticus* contains further and more copious portions of the laws of Moses.

1st, *Sacrificial Laws*.—The early portion of this book is occupied with the divine directions respecting the various 'offerings.' This is a very prominent part of the Mosaic code. For the history and nature of sacrificial worship, and a description of the different kinds of sacrifice, we must refer the reader to other parts of this work [OFFERING; BURNT-OFFERING, etc.]; our object here is simply to classify these as they occur in the law. Bertheau's third group includes them all, the seven sections of which, with their respective decades of rules, are as follow:—

Section I. Lev. i. 2, 10, 14; ii. 1, 5, 7, 14; iii. 1, 6, 12; ten laws about burnt-offerings, meat-offerings, and peace-offerings.

Section II. Lev. iv. 3, 13, 22, 27; v. 1, 2, 4, 15, 17; vi. 1-7; ten laws about sin-offerings and trespass-offerings.

Section III. Lev. vi. 9, 10, 11, 12, 13, 14, 15, 16, 18, 18; ten laws of detail respecting the burnt-offerings and the meat-offerings.

Section IV. Lev. vi. 20, 21, 21, 22, 22, 25, 26, 27, 29, 30; ten laws about the priests' consecration offerings, and of detail about the sin-offerings.

Section V. Lev. vii. 1, 2, 2, 3, 5, 6, 7, 8, 9, 10; ten laws of detail respecting the trespass-offerings.

Section VI. Lev. vii. 12, 13, 14, 15, 16, 17, 18, 19, 20, 21; ten laws of detail about the peace-offerings.

Section VII. Lev. vii. 23, 24, 25, 26, 27, 29, 30, 31, 32, 33-34; ten laws of general import respecting these offerings.

The next three chapters of *Leviticus* (viii.-x.) are narrative. They describe the consecration of Aaron as high-priest by Moses, God's commissioner, and that of his sons, in which ceremonial the law is carefully carried out for the first time. Aaron's first official act was the blessing of the people, upon which Jehovah attested his pleasure at the proceedings by sending a fire to consume the offerings which had just been presented to him. But the Theocratic King was as swift in avenging the breach of his laws as prompt in blessing their observance. Whether from inexperience in their new office, or a profane presumption, which induced them to slight its prescribed duties, Nadab and Abihu, the two eldest sons of Aaron, 'offered strange fire before Jehovah, which he commanded them not, and they went out a fire from the Lord, and they died before the Lord' (x. 1, 2). This awful event led to the promulgation of one or two special laws, one of which, spoken by the Lord directly to Aaron, is of such a nature as to have suggested the supposition that the offending priests had committed their fatal error under the influence of 'wine or strong drink' (comp. ver. 9). The laws of sacrifice are followed by statutes on a kindred subject.

2d, *Laws of Uncleaness and Rites of Purification*.—There is a certain gradation traceable in the

order in which these are arranged in the book of *Leviticus*. Bertheau's fourth group embraces them all, ending with the grand expiation (the centre point of all the legal atonements) of the day of atonement. The sections run in the manner following:—

Section I. Lev. xi. 2, 9, 13, 20, 24, 27, 29, 39, 41, 43-45; ten laws about animals which are unclean and clean for food.

Section II. Lev. xii. 2; xiii. 2, 9, 18, 24, 29, 38, 40, 42, 47; ten laws about uncleanness from childbearing, and leprosy in person and dress.

Section III. Lev. xiv. 2, 4, 5, 11, 12, 14, 15, 16, 19, 20; ten laws about cleansing the leper [xiv. 21-32 contains ten directions supplementary to the third section].

Section IV. Lev. xiv. 34, 36, 38, 39, 40, 41, 43, 46, 47, 48-53; ten laws about leprosy in houses.

Section V. Lev. xv. 2, 4, 5, 6, 7, 8, 9, 10, 11, 13-15; ten laws about uncleanness by issues (in men).

Section VI. Lev. xv. 16, 17, 18, 19, 20, 21, 22, 23, 24-30; ten more laws on the same subject (in women).

Section VII. Lev. xvi. 2, 3, 6, 8, 9, 11, 20, 23, 26, 27-28; ten laws respecting the great day of atonement.

[The rest of chap. xvi. is taken up with an earnest exhortation on the importance of this the most solemn of all days in the Jewish calendar. The repetition of this exhortation on the occasion of fixing the precise time of the solemnity, in Lev. xxiii. 26, gives still greater prominence to the importance of this unique day.] The fifth group of the Sinaitic legislation comes with much propriety after the laws of ceremonial uncleanness, and the methods authoritatively prescribed for its removal. It wears the appearance of extreme severity. It prominently states the holiness of Jehovah, and calls upon his subjects to copy his holiness (xix. 2). The provisions, therefore, of this group of laws, aim at securing this holy condition of the theocratic society. At first sight the contents of the group may seem heterogeneous. But, keeping in view the general purport which we have indicated, the reader will, on further examination, discover a coherence of moral design underlying the miscellaneous commandments which are contained in the next four chapters (xvii.-xx.) In arranging this group it will be seen that Bertheau postpones the 17th chap. immediately after the 19th. [For his reasons see *Grupp. Mos. Gesetz*, 206-210.]

3d, *Laws of sundry kinds enjoining Holiness*.—The sections which constitute this group, with their decalogues, are these:

Section I. Lev. xviii. 6, 7, 8, 9, 10, 11, 12, 13, 14, 15; ten laws about unlawful marriages.

Section II. Lev. xviii. 16, 17, 17, 18, 19, 20, 21, 22, 23, 23; ten more laws on the same subject. [Verses 1-5 are a preamble, and verses 24-30 are a general sequel to the intermediate laws, in both of which the most earnest statement of moral sanctions is repeated.]

Section III. Lev. xix. 3, 3, 4, 4, 5, 9, 11, 12, 13, 13; ten laws of various import, all enjoining holiness of practice.

Section IV. Lev. xix. 14, 15, 16, 16, 17, 18, 19, 19, 20, 23-25; ten other laws of the same character and purport.

Section V. Lev. xix. 26, 26, 27, 28, 29, 30, 31, 32, 33, 35; ten similar laws.

Section VI. Lev. xvii. 3, 6, 8, 10, 13, 15; xx. 2, 6, 27, 9; ten laws of like purport.

Section VII. Lev. xx. 10, 11, 12, 13, 14, 15, 17, 18, 20, 21; ten laws of like purport in relation to adultery, incest, sodomy, etc. The last five verses (except the 27th, which seems to follow the 6th in sense) of chap. xx., conclude this group, with another solemn injunction, befitting the subject of this part of the law. The last words well express the intention of the Mosaic code, and this portion of it in particular: 'Ye shall be holy unto me, for I the Lord am holy, and have severed you from other people, that ye should be mine.' Then follows the last group of the laws which were given at Mount Sinai.

4th, *Sacerdotal, Festival, and Sundry Civil Laws, conclusion of the Sinaitic Code.*—This portion of the law is arranged by Bertheau after this manner:—

Section I. Lev. xxi. 1, 4, 5, 7, 9, 10, 12, 13, 17, 22; ten laws respecting the character and duties of the priests.

Section II. Lev. xxii. 2, 3, 4, 4, 8, 10, 11, 12, 13, 14; ten laws of the disabilities of the priests for their duty, etc.

Section III. Lev. xxii. 18, 21, 22, 23, 24, 25, 27, 28, 29, 30; ten laws about offerings—their blemishes and perfections.

Section IV. Lev. xxiii. 3, 5, 8, 9, 15, 22, 24, 27, 34, 36; ten laws about the feasts—their appointed times, etc.

Section V. Lev. xxv. 2, 3, 5, 6, 8, 11, 13, 14, 15, 16; ten laws relating to the sabbatical year and the year of jubilee.

Section VI. Lev. xxv. 23, 25, 26, 28, 29, 30, 31, 32, 34, 35-38; ten laws about the redemption of land, and its restitution at the jubilee.

Section VII. Lev. xxv. 39, 40, 43, 44, 45, 47, 50, 51, 53, 54; ten laws about servants and slaves, both foreign and Israelite, and redemption of the latter.

Here ends the legislation of Mount Sinai; the 26th chapter, which records its termination (ver. 46), contains emphatic promises and threatenings of the Theocratic King. The Law of the Covenant, which formed the first of our groups, ended, as we saw, with a decalogue of gracious promises—but *no threatenings were added* to the nation, which had not yet declined from its obedience. Now, on the completion of the ampler laws of Sinai, and after experience of the people's waywardness, menaces of anger follow promises of blessing. The blessings, as before, are enshrined in a decalogue of promises (in verses 4, 5, 5, 6, 6, 7, 9, 10, 11-13). The threatenings, which are meant as a sanction to the five groups which have succeeded 'the Book of the Covenant,' seem to have regard to the *five times seven* sections of the commandments which constitute these groups. They accordingly fall into *five* sections themselves, and *that* in an order of gradation. (1.) Verses 14-17 menace *seven chastisements*—terror; consumption; burning ague; fruitless sowing; slaughter by the enemy; subjugation; panic flight. (2.) Verses 18-20 threaten a *sevenfold* increase of these punishments, if they prove ineffectual. (3.) Verses 21, 22, contain a like threat of '*seven times more* plagues, according to their sins.' (4.) Verses 23-26 prescribe, on the failure of former resources, Jehovah's further chastisements in a *sevenfold number*, with the sword, 'to avenge the quarrel of his covenant.' (5.) Verses 27-33 predict the extreme

'fury' of Jehovah, and its precise infliction on his rebellious subjects. 'I, even I, will chastise you *seven times* for your sins,' and the seven stages are then enumerated:—Direful famine, in which their children should be their food; the destruction of their high places; the burial of their idols beneath their own carcasses; the desolation of their cities; the desecration of their sanctuaries, with the rejection of their religious services; the desolation of their land and its occupation by the enemy; and their dispersion among the heathen, with their rough usage and utter prostration and panic there (ver. 34-39). The whole denunciation ends with a beautiful allusion to Jehovah's remembrance of the nation's primitive fathers, Abraham, Isaac, and Jacob:—'I will remember my covenant with them; I will remember the land; when they be in the land of their enemies (if then their uncircumcised hearts be humbled), I will not cast them away nor will I abhor them to destroy them utterly, and to break my covenant with them, for I am Jehovah their God.'

*Appendix to the Laws of Sinai.*—The last chapter of Leviticus contains supernumerary laws, which do not prescribe duties *obligatory* on the subjects of the Theocratic King, by reason of the covenant between them; but which rather direct such *optional* engagements as devout men might be disposed to make with God, in a higher sense than what was implied in their political relation to him. These engagements took the form of *vows*; and God gives Moses estimates of their value, at which they might be redeemed by such as made them, whether they were offerings of the person, or of cattle, or of houses, or of fields, or even of tithes. On comparing the last verse of chap. xxvi. with the last verse of chap. xxvii., we find that the latter chapter, though not a constituent part of the organic law of the covenant nation, was yet a pendant to that law, containing principles of administration which were only applicable to that nation. The remarkable feature, which we have so often observed, follows us also in the structure of these supernumerary provisions. They are contained in two decalogues. Thus, verses 2, 4, 5, 6, 7, 8, 9, 10 [middle], 11, 13, constitute the first decade; and verses 14, 15, 16, 17, 18, 19, 20, 22, 26, 30-33, form the second.

*Arrangement of the Camp of Israel; Order of March.*—We have elsewhere called attention to the *military* character of the organisation which Moses gave his people, resembling in this respect the Servian constitution of the Romans, as described by Livy, *Hist.* i. 43 [CONGREGATION]. Full particulars of this organisation occur in the first part of the book of Numbers (chaps. i.-iv.), which also describes, in still ampler terms, the relation to the rest of the nation of the priestly tribe of Levi, and its office, wherein it was a substitute for 'all the first-born of the children of Israel' (iii. 41). The census and the marshalling of the host were effected by Moses, according to the express directions of Jehovah. In these directions Bertheau finds a decalogue, which he arranges thus:—Num. i. 1, 48; ii. 1; iii. 5, 11, 14, 44; iv. 1, 17, 21-49.

*Sundry Laws.*—Though the law, as a whole, ends with the book of Leviticus, certain enactments, in larger or smaller groups, occur in the book of Numbers, which seem to have been occasioned by the circumstances through which the nation passed after leaving Sinai. Thus, in chaps.

v. and vi. we meet with three decades of subsidiary laws, concerning—(1.) The removal of all unclean persons out of the camp, which had been just before duly arranged, and trespass-restitution; (2.) The remarkable process called ‘the trial of jealousy;’ and (3.) The law of the Nazarite vow. These are the decades:—v. 2, 2, 2, 7, 7, 8, 9, 10, 10.—v. 15, 15, 16, 17, 19, 21, 22 [end], 23, 25, 26.—vi. 2, 5, 6, 8, 11, 13, 16, 18, 19, 20.

*The Priests' Blessing.*—Aaron is described (Lev. ix. 22) as blessing the people, when the fire first descended from heaven and consumed the sacrifices; but, as it would seem, without an expressly commanded formula. So important a duty, however, was not to be left to the priest's option; so we have, in Num. vi. 22-27, a specific ordinance given, in which, for the first time, the divine idea of *Three* occurs in connection with God's name. Into the profound meaning of this trine benediction, on which the doctrine of the N. T. respecting the Divine Being sheds much light, this is not the place to inquire; on this question, we therefore are content to refer the reader to J. Conrade Hottinger's treatise, *De Benedictione sacerdotali*, ad loc., Num. vi. 24-26, reprinted in *Thes. Novus Theologico-philol.*, i. 393-400, appended to *Critici Sacri*, etc. Chapter vii. is narrative, but out of a circumstance recorded at its conclusion arise the regulations about the golden candlestick, and the consecration of the Levites, with their official duties, which are contained in chap. viii.

*A Second Passover.*—The original rules about keeping the Passover (Exod. xii.) were in many respects purely of a temporary kind, suitable to the moment only: the festival, however, was meant to be perpetual, as an important means of the perpetuity of the covenant; no wonder, then, if on the emergence of circumstances of a nominal kind, fresh regulations should be found necessary; and such, in fact, occur in Num. ix., where a *second* passover is allowed, exactly a month later than the first and great celebration, in the case of disqualified or absent persons. In this supplementary rite the same liberality to the stranger was shown as in the principal ordinance. A long section of history, including that of the unfaithful spies, and the murmurs of the disaffected people, and the fatal anger of the Lord, stretches to the end of Num. xiv., being interrupted (at the beginning of chap. x.) by a decade of regulations respecting the silver trumpets of call and summons. These ten rules occur in verses 2, 3, 4, 5, 6, 7, 8, 8, 9, 10.

*The Decade of Temptations.*—With the assistance of Bertheau's acute and ingenious investigations, we have had abundant application of the decimal number of *perfection* to the structural form of the Law of Moses, and we have found this symmetry pervading even God's denunciations and promises in a surprising manner. It is quite in keeping with this remarkable feature that, on the commission of the crowning sin of the people in accepting the evil report of the spies, God, in the preamble of his stern sentence, adduces *ten* provocations, as constituting the full measure of their sins against him. ‘All those men have tempted me now these ten times’ (Num. xiv. 22). Nor is this simply a number emblematic in this instance of completion, for in fact the ‘temptations’ mentioned in the previous history are, as Rosenmüller (*Scholia*, in loc.) and others have observed, exactly ten: (1) At the Red Sea; (2) at Marah; (3) in

the Desert of Sin; (4) about the manna; (5) about the manna a second time (Exod. xvi. 27, 28); (6) in Rephidim; (7) at Horeb, in the matter of the golden calf—their *seventh* and greatest sin; (8) at Taberah; (9) at Kibroth-Hattaavah; (10) here at Kadesh, their *tenth* and exhaustive sin!

*The ultimate Decalogue of Laws.*—Between chap. xv. and the last chapter of the Book of Numbers lies the seventh and last of Bertheau's groups of Mosaic Laws, embedded in sections of historical narrative. With the history we have here nothing further to do than to suggest its relation to the legislation which grew out of it. The people had fallen from God in their rebellious acceptance of the spies' evil report; but the faithful Moses, firm and undaunted as ever in his mediatorial office, prevailed on the Lord to forgive their sin, and to receive them back into his covenant favour. They, however, had forfeited Canaan; only their children now were to inherit it. This reversionary provision for the next generation occasions some new laws—the command respecting the sanctification of all fruits of the ground by meat and drink-offering (Lev. xxiii. 10) is here renewed with a more precise command about the sin-offering. ‘The law was thus a pledge of the continuance of the covenant. The annexation of a peculiar law about a sin-offering of the congregation (Num. xv. 22-26) may perhaps have had its origin in the many chances of such sinnings in the wilderness, by which it might become doubtful how far the whole congregation was to be regarded as tainted with this guilt’ (Von Gerlach on the *Pentateuch*, p. 477). The sections of the last group of laws are arranged by Bertheau, as follows:—

Section I. Num. xv. 2, 5, 6, 7, 8, 10, 11, 12, 13, 14-16; ten more specific laws about burnt-offerings, meat, and drink-offerings. [The rest of the chapter contains single and incoherent laws about sins of ignorance and their sacrifices, sins of presumption and their punishment, and regulations about fringes for the borders of garments. Bertheau leaves these by themselves as supernumerary.]

Section II. Num. xix. 2, 4, 6, 7, 9, 10, 10, 12, 12, 13; ten laws about the sin-offering of the red heifer, and the purification of the unclean from the touch of a dead body. [The preceding chapter contains *Aaronic* precepts respecting the rights and incomes of the priests and Levites, as if in protest against the rebellion of Korah, who had complained of such special privileges.]

Section III. Num. xix. 14, 15, 16, 17, 18, 19, 20, 21, 22, 22; ten laws about unclean persons and vessels, and the purification of the former.

Section IV. Num. xxviii. 2, 3, 9, 11, 16, 26; xxix. 1, 7, 12, 35-38; ten laws about the great festivals and services of God's worship, suggested apparently by the near approach of the conquest of Canaan, that the successes of the nation might not lead them to the neglect or contempt of these paramount ordinances.

Section V. Num. xxx. 2, 3, 5, 6, 8, 9, 10, 12, 14, 15; ten laws about especial vows; and when married and unmarried women are excused from their fulfilment.

Section VI. Num. xxxv. 2, 3, 4, 6, 8, 10, 13, 13, 14, 15; ten laws respecting Levitical cities, and cities of refuge.

Section VII. Num. xxxv. 16, 17, 20, 22, 26, 29, 31, 32, 33, 34; ten laws respecting murder and

manslaughter. The last of these laws is worthy of special quotation: 'Defile not the land which ye shall inhabit, wherein I dwell; for I, the Lord, dwell among the children of Israel'—**כִּי אֲנִי יְהוָה**. **שֶׁכֶן בְּתוֹךְ בְּנֵי יִשְׂרָאֵל**. Thus all these laws terminate in Jehovah, who still keeps his covenant with his people, notwithstanding the many shocks they had dealt against it. The land, which was now full to overflowing with the sins of a guilty race ripe for judgment, is, in view of that covenant, already holy and sacred for a holy nation and its Theocratic King!

The book of Numbers and the code of Israel alike end with a statute respecting female heiresses, which arose out of a case which came before Moses in the plains of Moab, shortly before his death and the invasion of Canaan.

*Repetition of the Law; Deuteronomy.*—The generation which had been delivered from Egypt had met that doom in the wilderness to which Jehovah had devoted them 'in his wrath' (Ps. xcv. 11), and their children are on the confines of Canaan ready to enter on its conquest. Moses employs the few remaining weeks of his life in the consolidation of his great legislative work. He recounts to the sons God's mercies to their fathers all through the trials of their provocation, and above all he recapitulates the laws wherewith Jehovah had organised them into a theocratic people, and urges them by every constraining motive of love and fear to obey them. This Deuteronomy is not to be regarded of course as, organically, a new code, or even as a material addition to the former legislation, in the same sense as the Sinaitic laws (contained in Bertheau's Groups ii.-vi.), and the laws of Kadesh (Bertheau's Group vii.) were organic additions to 'the Book of the Covenant' (Bertheau's Group i.) *It is rather an authoritative comment of the legislator upon his own laws*; or, to put it more correctly still, the inspired explanation of the laws of the Divine King by the accredited human agent who had been employed in their original promulgation.\* We have thus, in Deuteronomy, the *human* side of the law, as compared with the *Divine* side of the three preceding books—the subjective rather than the objective form. [DEUTERONOMY.] All the commandments, therefore, of this last book of the Pentateuch are given as injunctions of Moses, and not, as before, in the direct name of Jehovah. More of an ethical treatment of the law appears also in Deuteronomy. High moral aims are attributed to its discipline. The stern 'letter which killeth' (2 Cor. iii. 6), so manifest in the previous books, is here clothed with 'the spirit that giveth life.' Moses, the specially honoured servant of Jehovah, and the mediator

with Jehovah's people, had not been favoured with his unique opportunities of knowing God's purposes and will (Deut. xxxiv. 10) without catching an insight into that great future for which his own legal dispensation was meant to pave the way. Nor could he have concluded the labours of his grand life with more effectual advantage to his nation than by adding the book of Deuteronomy to the law, with its treasury of spiritual truth, out of which, in the progressive scheme of God's dispensations, the holy prophets were in course of time to take and expand such doctrines and precepts and promises as should gradually advance to the spirit and perfection of the gospel itself (Davison, *On Prophecy*, pp. 51, 52). This characteristic of Deuteronomy was carefully observed by the ancient fathers of the church, and St. Jerome expounds their profound observation in these words—'Deuteronomium quoque secunda lex et evangelicæ legis præfiguratio. Nonne sic habet ea quæ priora sunt, ut tamen nova sint omnia de veteribus?' as if the *repetition of the law*, signified by the title *Deuteronomy*, after all received its best sense in its prefiguring the law of the gospel, and so imparting a new aspect to the old commandments of which it treated (S. Hieronymi *Opera* [Ed. Ben. i. 276], *Epist. ad Paulin.*)

*Difference of Structure of the Deuter. Law.*—The *paranetic* character of this last book of the Pentateuch prepares us for the absence of that structural regularity which we have seen pervading the legal portions of the former books. Bertheau (*Grupp. Mos. Gesetze*, S. 312) remarks on 'the manifest difference of the method, which has no longer the classification of sections and groups; but instead thereof a long connected discourse, grounded on a more general basis. The oft-recurring *formula*, which were the legal sanction, especially the well-known **וידבר יהוה אל משה** (And the Lord spake unto Moses), have now disappeared; moreover the greatest change of the order, as well as of the form, is apparent.' It must not, however, be forgotten that the great legislator is still an inspired agent of Jehovah, and that his communications to the new race of Israel carry no less real authority than the more formal decrees which he spoke to their fathers in God's direct name. This authority has always been acknowledged by Jews and Christians, and no part of the Mosaic writings is more appealed to throughout the O. T. and in the N. T., than the book of Deuteronomy. This book bears some resemblance, as to its place in the harmony of the law, to St. John's Gospel in the evangelic harmony. It is supplementary, according to circumstances.

*Laws peculiar to Deuteronomy.*—Bearing in mind the general purpose and characteristics of this book, we are not surprised to find the lawgiver often quoting his laws inexactly; sometimes *amplifying* their original form (as in Deut. xxiv. 10-13, comp. with Exod. xxii. 26, 27; and ver. 14, 15, of the same chapter, comp. with Lev. xix. 13), almost *more rhetorically*; and at other times simply referring to the code itself in the most *compressed* manner possible (as in Deut. xxiv. 8 comp. with Lev. xiii., xiv.) But in such cases there is no essential change in the *matter* of the laws; and these cases are largely increased by other quotations in which he does not change even the *form* of the earlier laws; so that the Deuteronomic version of the law of Israel is, in a general sense at

\* St. Athanasius exactly describes the purport of Deuteronomy in the phrase *δευτεροὶ καὶ διεσφῆσσε*, 'repeats and explains'; and the designations of the Rabbinic doctors equally well express the character of the book. Some call it simply **הַתּוֹרָה**, 'iteration of the law,' after Deut. xvii. 18, which A. V. renders 'copy of the law'; others, with a more explicit meaning, in reference to a phrase used of Moses in Deut. i. 5, designate the last book of the Pentateuch **הַתּוֹרָה**, 'exposition of the law' (see more in Carozov, *Introductio in Vet. Test.*, i. 135, 136).

east, an express and authoritative corroboration of the original constitution. Other cases, however, undoubtedly exist in which the earlier legislation is altered by the later. Yet it can hardly be thought that in even these a real change has taken place. The change of circumstances from the nomade state of the wilderness to the fixed abode in Canaan, is generally enough to account for the modification (for instance, the law of Lev. xvii. 3-5, is peremptory, and admits of no exception, for it was practicable in the camp of the wilderness; but, as it would be impracticable in Canaan, it is considerably modified in Deut. xii. 15, 20, 21; although even here the principle of the original statute is completely reaffirmed; comp. Deut. xii. 5, 6, 11, 13, 14, with Lev. xvii. 3, 4, 5). Some twelve or fourteen instances of such modification have been pointed out, but they do not affect the authenticity of the legal documents in anywise. The same authority under which the lawgiver acted in making these changes, enabled him still further to adapt his code to his people's wants as permanent residents in Palestine, by the addition of certain new laws.

*King and Prophet.*—The two most remarkable additions occur in chapters xvii. and xviii. The former passage (ver. 14-20) provides for the appointment in due time of a king; and the latter (ver. 9-22) provides for the institution of the prophetic office. Thus the royal and the prophetic offices were a development of the law of Moses—himself 'king in Jeshurun,' 'the ruler and deliverer' of Israel (Deut. xxiii. 5; Acts vii. 35), and the prince and the type of 'the goodly fellowship of the prophets' (comp. Deut. xxxiv. 10, with xviii. 15). These offices, which were thus cognate in origin, began their formal course together in Samuel and Saul. The holders of them were to be viceregents of the Theocratic King to administer the laws of the Pentateuch; but not to assume legislative powers by increasing or diminishing the original code.

*Miscellaneous Additions.*—Peculiar to Deuteronomy also are the following:—1. The levirate law (xxv. 5-10); 2. The law of divorce, which our Lord expounded and restricted afterwards (xxiv. 1-4; comp. Matt. xix. 3-9); 3. The law about fugitive slaves (xxiii. 15, 16); 4. The association of priests with the supreme Judge, as commissioners for determining certain difficult cases [*'ad causas civiles quod attinet . . . non de rebus ad religionem pertinentibus.'*—*Clericus.*] (xvii. 8-13); 5. The law of the first-born's inheritance (xxi. 15-17); 6. The law which prescribes the number of stripes in flogging culprits (xxv. 2, 3); 7. The prohibition to 'muzzle the ox when he treadeth out the corn' (ver. 4); 8. Severe punishment prescribed against individuals and communities for the practice of idolatry (xiii.; xvii. 2-5); 9. The poor to be kindly treated in the year of release—difference in the treatment of the foreigner as to debt (xv. 1-11); 10. Groves of trees prohibited near the altar of Jehovah (xvi. 21, 22); 11. Retaliation on false witnesses (xix. 16-21); 12. Laws of the usages of war—remarkable for their humane spirit both towards the Israelite soldier and the enemy; fruit-trees to be spared before a besieged place (xx.); 14. Expiation of an uncertain murder prescribed (xxi. 1-9); 15. The privilege of a woman taken captive in war (xxi. 10-14); 16. Punishment of a rebellious son (xxi. 18-21); 17. Speedy burial

of an executed malefactor (xxi. 22, 23); 18. Against the promiscuous use of male and female dress (xxii. 5); 19. The dam not to be taken from a nest with her young (ver. 6, 7); 20. Houses to be furnished with parapets (xxii. 8); 21. Punishment of wife-slander (ver. 13-21); 22. Certain cases of unclean persons excluded from the congregation of the Lord (xxiii. 1-8); 23. The military camp of Israel is to be regarded as holy with the presence of the Lord of Hosts, and to be kept free from unclean acts and things (xxiii. 9-14); 24. The house of the Lord to be unsullied with the fee of whoredom, or the price of an unclean animal (ver. 17, 18); 25. Permitted trespass in the vineyard and the corn-field—the latter being applicable to the act of the disciples of Christ (24, 25; comp. Matt. xii. 1, etc.); 26. Punishment of the immodest woman (xxv. 11, 12); 27. The assertion of the great principle of individual responsibility (Deut. xxiv. 16). This law helps to explain the doubtful meaning of Josh. vii. 24, 25. The law of Moses was not likely to have been so soon disregarded by his successor. So that it may be concluded that Achan alone suffered without his children, under the provisions, as it would seem, of Deut. xiii. 9, 10, and xvii. 5. 28, 29. In carefully preparing this list, by a comparison of Deuteronomy with the three preceding books, we found two other statutes peculiar to Deuteronomy, which we have kept until now—one beginning and the other terminating that portion of the book which is specially legal (chap. xii.—xxvi.) The first of these strictly enjoins a *unity of place in the promised land for common worship*, and the idea runs through the legal part of Deuteronomy (comp. xii. 5, 11, 14, 18, 21, 26; xiv. 23, 24, 25; xv. 20; xvi. 2, 6, 7, 15, 16; xvii. 8-10; xviii. 6; xxvi. 2; xxxi. 11); and the last prescribes the offering of the *basket* of first-fruits at God's altar, and suggests the form of a beautiful prayer to be observed at the ceremony, ending with these words, 'Bless thy people Israel, and the land which thou hast given us, as thou swarest unto our fathers—a land that floweth with milk and honey' (xxvi. 1-15).

*Covenant of Deuteronomy.*—Solemn promises, doubtless through the mediation of Moses, of obedience on the part of the new generation, and of blessing and protection on the part of Jehovah,\* followed the conclusion of the Deuteronomic law (xxvi. 17-19). Moreover, a solemn ceremonial was ordered to be observed after the conquest of Canaan, in which tablets containing the new enactments were to be set up in a most prominent place, and sundry curses and blessings were to be pronounced on Mounts Ebal and Gerizim (chap. xxvii., xxviii.), the counterpart of those which we have seen sanctioning the legislation of Mount Sinai.

*Purport of the Law.*—Such was the law of Moses, and such the protracted history of its promulgation. The purity of the patriarchal religion was gone, and polytheism with its attendant idolatry had overspread the nations, when Jehovah called Israel to be the depositary of truth, and to be 'a holy people and a peculiar treasure to him-

\* A comparison of ver. 18-20 with ver. 10-12 of Ezek. xx., shows us that God's proposals for a covenant with the new generation of Israel were not less gracious than they had been with their fathers.

self' in the earth. The institutions which he gave them were admirably fitted to discourage idolatry, and to secure their allegiance to himself. In book I. of his most learned treatise, *De Legibus Hebr. ritualibus*, Spencer has examined the chief of these Mosaic institutions, and shown how, in pursuance of the direct teaching of the moral law, the rite of circumcision and the Sabbath, by keeping the Israelites separate in the world, were remedies so far against the world's sin of idolatry (chap. vi.); the distinctions of food had a like tendency (chap. vii.); so had the specific ordinances of time, place, and person, in the Mosaic ritual (chap. viii.); while the great festivals, with almost dramatic force, reminded the chosen people of God's historical providence over them, and associated this with the annual stages of his ever-recurring care (chap. ix.) How deeply rooted in the national heart was the impression produced by the *Passover*, to quote one instance, as a protest against the idolatry of Egypt and other Gentiles, appears from David's reflections (2 Sam. vii. 22-24). And this ritualism was supported by the direct instruction of the law, which always provided for the honour and reverence of God, and of the sacred names and services, and ministers, which had reference to him (chap. x.) The God of Israel was a holy and jealous God; his glory he would not give to another; his name must not be vainly used or blasphemed; neither must blemished offering nor unsanctified priest be employed in his service; and, as we have seen, his people must emulate his holiness—'Be ye holy, for I the Lord am holy.' But it was not the sole, if indeed it was the primary, purport of the law to educate the chosen nation. God had not forgotten his Abrahamic covenant and promises. In the patriarch's seed the nations of the earth were still to be blessed. Israel had, therefore, a wider function than to cherish the truth for himself alone; he was a steward of the divine mysteries, or rather a trustee thereof, for the good of mankind. From its revelation of God, as well as from its prescribed rites and sacrifices, it is manifest that the law kept in view a principle wider than the theocratic. At the beginning of this article we dwell on the prominent feature of the Mosaic code as a theocratic constitution. Jehovah's *regal* relation, as the political king of the nation, is everywhere apparent. But besides this, his higher character as God, the heavenly King, may be discovered underlying some of the Mosaic ordinances. The vessels of the tabernacle being of gold were suited to him as the national King; but being moreover designed for the presentation of *sacrificial* gifts, they referred to him as the Divine Being. The twelve loaves of the shewbread seemed to indicate the nation's provision for its King; but then, as they remained intact, and were consumed only by the priests of the tabernacle, they pointed to God as one who needed not human food. The tabernacle, too, as adorned with gold and costly furniture, looked like the residence of a king; but as anointed and covered with cherubim, it was really only consistent with the habitation of the most high God. Again, the priests in their beautiful apparel resembled the ministers of the nation's king; but as they ministered in holy things (*τῶν ἁγίων λειτουργοί*), their services implied no less than the divinity of the God they adored. In like manner a double aspect is

assigned to every part of the tabernacle, furniture, and service (see Spencer, *Dissertatio de Theocrat. Jud.* ad calcem libri I. tractatus *De legibus Hebr.*), a circumstance which accounts for the ascription in many passages both of *regal* and *divine* honours to Jehovah; for both characters would a pious Jew behold in him, as David did, when he said, 'Hearken unto the voice of my cry, *my King* and *my God*' (Ps. v. 2; comp. xx. 9; xlv. 4, 8, 21; lxviii. 24; lxxxix. 18; xcv. 3; xcvi. 6, 9; Is. xliii. 15; Zech. xiv. 16, 17; Mal. i. 14); for the law, which is the basis of the entire O. T., proposes Jehovah as the God of the heavens and the earth, as well as King of Israel; and the tabernacle, which was his dwelling-place, gave signs alike of his creative and of his regal power\* (*ποιητικῆς καὶ βασιλικῆς*, as Philo expresses it). But in no part of the Mosaic system did its ulterior aim appear more prominent than in the sacrificial services. In the significant variety of *these*, Israel was not only himself educated in a pious appreciation of his own relation, fallen and imperfect as he was, to a holy God, but he was the minister and upholder of a religious worship, which led by an inevitable progress to 'the bringing in of a better hope'—the institution of 'a better testament' (Heb. vii. 19, 22).

*The Excellence and the Imperfection of the Law.*—This twofold relation of the law to the present and the future gives it a paradoxical cast; and hence in the N. T.—especially in the more precise statements of St. Paul—it is spoken of in apparently contradictory terms. On the one hand, we have passages which predicate such excellence of it as becomes a revelation and transcript of Jehovah's will; on the other hand, it is charged with weakness and imperfection. 'The law,' says St. Paul [that is, the entire Mosaic system], 'is holy, and the commandment [that is each detail of the law—*ἡ ἐντολή*] holy, just, and good' (Rom. vii. 12); but in the next chapter he speaks of the law's *incapability* (*τὸ ἀδύνατον τοῦ νόμου*), ver. 3; an idea which is enlarged in Heb. vii. 18 into its *weakness* and *inefficacy* (*ἀσθενὲς καὶ ἀνωφελὲς*), and more categorically still in the next verse, into a statement that it failed in the accomplishment of its end (*οὐδὲν γὰρ ἐτέλεσεν ὁ νόμος*); or, as A. V. renders it, 'The law made nothing perfect.' The explanation of this paradox is given by St. Paul himself in a single clause, *ἡσθένει διὰ τῆς σαρκός*, in which he attributes the failure of the law not to itself or its author, but to the sinfulness of human nature (Rom. viii. 3). What the apostle here explains, in the light of the gospel, was less lucidly stated by the ancient prophets, who saw and lamented the law's perversion by their countrymen. One of the latest of them, retracing the history of his nation, says: 'I [the LORD] gave them my statutes, and shewed them my judgments, which if a man do he shall even

\* Spencer notices also a third attribute of Jehovah, much displayed in the O. T., and expressed in the title, 'The Lord of Hosts.' Whatever be the mystic force of this characteristic of Jehovah, we must here be content with remarking that this is not an essentially different relation from the political and regal one (see Spencer, *De Theocrat. Jud.*, sec. iii.); although it probably refers to a higher development of it, and to the ultimate spiritual kingdom, *as intended to emerge out of the earthly*.

live in them; but the house of Israel rebelled against me in the wilderness, they walked not in my statutes, and they despised my judgments, which if a man do, he shall even live in them; and my sabbaths they greatly polluted' (Ezek. xx. 11, 13). The intrinsic excellence, however, of the law is here vindicated in the words of the divine legislator himself, and the failure of it imputed to the wilful nation. We are, therefore, left to an appreciation of the law's intrinsic perfection, undisturbed by an inefficacy which was really not its own. Nor was this inefficacy more *final* than normal. God's work of elaborate beauty and wisdom could not be permitted to succumb in permanent weakness before the very objects it was designed to benefit. It keeps its ground to the last in the ancient dispensation. 'Prophecy,' it has been elegantly said, 'expired with the gospel on its tongue.' But it is equally true that the law—'the law of Moses, with its statutes and judgments'—had an equal share of its last solicitude (Mal. iv. 4); and one of the earliest assurances of the N. T. consistently resumes that solicitude in the words of Christ: 'Think not that I am come to destroy the law or the prophets; I am not come to destroy [or abrogate, *καταλῦσαι*], but to fulfil: for verily I say unto you, till heaven and earth pass, one jot or one tittle shall in no wise pass from the law, till all be fulfilled' (Matt. v. 17, 18). How stands the case then? The answer to this question demands a recapitulation of the subjects we have already adduced in this article. The law, with its great derivative of prophecy, came between the rudimental promise of the prot-evangelium, as expanded in the Abrahamic covenant, and the accomplishment thereof in the gospel. *Its divine author adopted it with admirable wisdom for the dispensational purpose of leading from one to the other.* The patriarchal society having failed to preserve the truths which had been originally communicated to it, it was necessary that these should be recovered, and a means provided for their safe custody and transmission. The family of Abraham, to whom this sacred charge was committed, having grown into a nation, God was pleased to fence it round with a special organisation, that it might be separate among the nations, and so be able to maintain its trust uninjured, and not, as heretofore, reduced to heathen perversions. For this purpose Jehovah became the King of Israel, and he inaugurated his covenant with his 'chosen,' by giving them the theocratic institutions which were to regulate their entire life—social, moral, and religious. In these institutions all intermediate sanctions of conduct and policy disappear; everything is referred at once to the Divine Sovereign—'Ye shall do my judgments and keep my ordinances, to walk therein: I am the Lord your God.' This lofty standard is in every relation of life apparent. In all departments of education the appeal is, 'Ye shall be holy unto me, for I the Lord am holy, and have severed you from other people, that ye should be mine;' and in the tenure of all property this is the underlying principle, 'The land shall not be sold for ever, *for the land is mine*; ye are strangers and sojourners with me.' Thus did the theocracy, with its apparatus of political and religious ordinances, teach the Israelite, not indeed by explicit revelation, but by irresistible inference, to connect the finite present with the infinite future in God.

Such arguments as Warburton's, however ingenious, and in given instances valuable in combating objections, are apt to cramp the subject before us. The conclusion sought to be maintained, that the Mosaic sanctions are only of a *temporal* nature, is undeniable enough to become a truism, when confined within the narrow limits of the specific question; for national legislation, as such, can (obviously) do no more than propose rewards and punishments for the present life. But this is not the entire case. The theocratic laws were designed not only for teaching political duty, but for connecting man with God in a perpetual routine of social, moral, and religious life, of which it would indeed be a violence to reason to suppose they would not infallibly suggest to the devout Israelite the assurance of *an eternal happiness provided by his Divine King*, as the sequel of his temporal obedience. No doubt the law, which so strictly guarded him, would be equally sure to suggest another train of reflections. *His own sinful nature and propensities* would become painfully evident in the light of a revelation, which drew a contrast between Jehovah's holiness and the unholiness of even his highest theocratic servants. The catalogue of disqualifications, through *unclean-ness* of priest and people alike, derived its particulars from all stages and conditions of life; and not so much from wilfulness as from inadvertencies, involuntary acts, and even inevitable blemishes and natural conditions of the person. In harmony with such reflections would be those deductions which the thoughtful Israelite must needs have drawn from the inflexible rigour of *the moral law, contrasted with his own departures from it.* These thoughts would not only create a longing for deliverance, but would impress on the mind a new view of the significance of sacrifice to his Divine King. His *Leviticus*, read in the light of his *Deuteronomy*, and the still clearer comments of the prophets, would be an infallible *gospel* to him. We cannot mistake the influence of the law on personal piety, when we read such earnest eulogies of it as are contained, for instance, in Josh. i. 8 and in Ps. cxix. And how effectually it prepared its loyal adherents for the coming of Messiah, we gather from some glimpses into private life given to us in the gospels. Two instances occur on the very threshold: 'They were both righteous before God, walking in all the commandments and ordinances of the Lord blameless' (Luke i. 6; see other instances mentioned above in JESUS CHRIST [vol. ii. p. 546]).\* Nor on public life was the law without its signal influence. From the nature of the case the O. T. dwells much on the delinquencies and ultimate apostasy of the Jewish nation, even thus illustrating the importance of that law whose breach brought ruin upon the chosen people (see 2 Kings xvii. 15-23). But

\* It is worthy of remark that our Lord repelled the three temptations of Satan by quotations from the book of the law, as contained in Deuteronomy (see viii. 3; vi. 16; and vi. 13; comp. with Matt. iv. 4, 7, 13). We adduce this as an instance of the devout use which was made of the law by persons of spiritual discernment. This great instance is confirmatory of the fact, which the Psalms and the didactic parts of the prophets make so patent, that holy men of old got the tone and cue of their devotion from the law of Moses.

we need not rely on negative illustration. The nation's delinquencies were often followed by repentance, and a restoration of national prosperity; and in every instance the revival of blessing was brought about by reverting to the law of Moses. Moreover, we have some bright periods in the history of Israel, during which the law was honoured, with the happiest results to the people. The most instructive contrasts also occur throughout the history, all enforcing the excellence of the theocratic code as the very means of life and prosperity to its subjects (comp. Josh. i. with Judg. ii. ; also 2 Chron. xxxiii. 7-9). The brevity of the sacred history has left us uninformed as to the regular maintenance of the Mosaic institutions by the Israelites after their occupation of Canaan; and this silence has led to the conjecture that some of them fell into desuetude, or, at best, uncertainty of administration. It seems, however, to us fairer, and more in accordance with the nature of things, to conclude that, except in specified instances of the contrary, these institutions were duly observed, according to the intention of the lawgiver. Indeed the frequent formula which ennobles the piety of the kings of Judah, 'He did that which was right in the sight of Jehovah,' may well be construed in this sense of loyalty in administering God's theocratic laws. One fact we uniformly find, that whenever the circumstances and even the government of the nation underwent any modification, the law was carefully preserved from change and neglect. The two critical epochs which bore most resemblance to revolutionary disruptions, were the secession of the ten tribes and the captivity. But the law not only survived these changes, it even acquired fresh hold on the heart of the loyal part of the nation. The effect was doubly evident. Israel, though the stronger of the two kingdoms in material resources, never recovered from the shock which Jeroboam's rejection of the law gave it; while Judah, which retained the theocratic principle, long survived her rival, and only fell at last from neglect of the very law which had proved to be the defence of her pious kings. (For the salient instances of Jehoshaphat, Joash [Jehoiada's regency], Hezekiah, and Josiah, and the prominence of the law in their administrations, see 2 Chron. xvii. 9; xxiii. 18; xxix. and xxx. ; xxiv. 14-xxv. 19.) The same recurrence to the law is observable on the return of the exiles. Nehemiah and Ezra prefaced their great work of reforming the morals of their countrymen by public reading and exposition of 'the book of the law of Moses which the Lord had commanded to Israel' (Neh. viii.). We have seen how the royal and the prophetic offices were products of the law. Kings and prophets with great propriety, therefore, were in duty bound to devote their authority to the observance of its precepts. But kings and prophets passed away, the first having forfeited their mission, the second having fulfilled it; yet the law survived in unbroken, perhaps increased, strength. The living seer was no longer present with rebuke and exhortation; but his written word was at hand, the last injunction of which would again and again come back upon men's memories—'Remember ye the law of Moses, my servant, which I commanded unto him in Horeb for all Israel, with the statutes and the judgments' (Mal. iv. 4). Post-biblical history tells how this valedictory charge animated the lofty patriotism of

the Maccabees (1 Maccab. chap. ii.), but on this we must not enlarge.

When sacred writ resumes her record, it is to reveal the melancholy fact that the wayward nation has forgotten the prophetic charge. Proud of a divine treasure of which no other race could boast, the Jewish people exulted selfishly over their advantage, which contained within itself, however, the germ of a fatal reaction. 'They were exposed to the subtle temptation of substituting formulas for life; hence arose the necessary reactions of [Pharisaic] dogmatism and [Sadducean] scepticism: hope strengthened into affirmation, doubt descending to denial. Meanwhile the fresh joy of life was sinking under the pressure of superstition; and, as the saddest symbol of the direction in which they were turning, the people of God shrank from naming him [Jehovah] who was their strength,' and (we must add) hastened to reject their Messiah, who was restoring and fulfilling their divine law, and bringing their glorious theocracy to its ultimate exaltation (Westcott, *Introduct. to the Study of the Gospels*, p. 54). We have already noticed our Lord's grand vindication of the law; amidst the universal failure he fulfilled his Messianic mission—'magnified the law, and made it honourable' (Is. xlii. 21). We are thus brought face to face with another paradox in the circumstances of the law. Christ rescued it from the dishonour which the infirmity and the wilfulness of Israel put upon it, by a life which satisfied the demands of its precepts, and a death which exhausted the significance of its types. But this very fulfilment of the law was in truth its supersession. All its purpose was effected; and it survives in the gospel, no longer, indeed, as an obligatory covenant, demanding obedience and revealing the weakness of man, but as a monument of the wisdom and goodness of God, illustrating in its sacrificial details the one efficacious offering made once for all (Heb. ix. 26; 1 Pet. iii. 18), and in its moral precepts furnishing an unchangeable rule of conduct to the Christian, who has here a transcript of that holiness of God which ever has been proposed as the standard of human perfection, equally to the primeval patriarch (Gen. vi. 9, comp. with xvii. 1), the Mosaic Israelite (Lev. xi. 44; xix. 2; xx. 7; Deut. xviii. 13), and the disciple of Christ (Matt. v. 48; Col. i. 28; 1 Pet. i. 15, 16).

*The Law in its Human Aspect; its alleged Egyptian Origin.*—Many writers on jurisprudence have illustrated the code of Moses by comparing its enactments with the laws of other nations; none more fully or ably than Michaelis, in his *Mosaisches Recht* [Smith's translation, *Commentaries on the Laws of Moses*, in 4 vols.] From his work most of the following instances are taken; they go to show that the provisions of the Mosaic law were not only superior to the institutions of the primitive nations among whom civilisation had made but little progress, but bear favourable comparison with those of an advanced state of society, and that on points of the highest juridical importance. Our instances must be few, but they shall be characteristic. a. One of the most widely-spread institutions of the ancient world was that which protected society by the avenging of blood. Not only in Hebrew Scriptures and Arab tales is this usage found, but the most polished Athenian literature is full of allusions to it; the *Eumenides* of Æschylus, notably, is based upon it (Müller's *Dissertations*,

(ii.), pp. 89-97 [edit. 2]). But nowhere can we discover any legislation like that of Moses (Num. xxxv. 31), which, by a just and wise enactment, represses the wild irregularity to which the practice of blood-revenge was naturally exposed (Michaelis, ii. 225; Müller, *Dissertations*, p. 95). [KINSMAN.] *b.* In like manner the Mosaic rules of *warfare* are humane in contrast with the customs of Egypt and Assyria, and even Greece (comp. Deut. xxi. 10-14 with the Homeric treatment of female captives—cruel and heartless as it was; see Michaelis, i. 463, 464). The harshness of war was also softened by other beautiful provisions of the law of Moses; *e.g.*, by the considerate precept of Deut. xx. 19, 20, and by the prohibition of forced service, so common in the East. On this point, how striking the contrast between the law of Deut. xx. 5-9 and the brutal oppression of Xerxes, as narrated by Herodotus ii. 210! *c.* The clemency and kindly character of the Mosaic legislation further appear in its provisions with respect to the *poor* (Deut. xv. 7-11 [ALMS]), and to the *stranger* (Lev. xix. 33, 34; Deut. x. 18, 19); and *d.* where at first sight it seems to be harsh, as in the *power of the Father over the Son* (Exod. xxi. 17; Lev. xx. 9), further inquiry reveals a security against all abuse of this power by careful judicial process (Deut. xxi. 18-21), in which respect the statute of Moses presents, as usual, a happy contrast to the unchecked power of the Roman father (Michaelis, i. 443). *e.* The mildness of the Mosaic laws of *debt* are again in notable opposition to the oppressive enactments of the Roman law (Michaelis, ii. 294). We are not shocked with the barbarity of the torture and imprisonment of the unhappy debtor, such penalties being unknown in the laws of Israel (Michaelis, ii. 311-314). Indeed, the *prison* seems to have been absolutely discountenanced by the Jewish lawgiver, except as a temporary ward (Lev. xxiv. 12), although in later times imprisonment came into use (Jer. xxxviii. 6; Ezra vii. 26), but not from Moses (Michaelis, iii. 444). *f.* Humanity was characteristic of his laws on other objects than man. Prohibition against '*cruelty to animals*' is a happy feature of some modern codes; but we do not yet outstrip Moses, as the following beautiful instances attest—instances meant to civilize man no less than protect brutes, by subduing that coarseness of feeling which is sure to accompany maltreatment of animals:—When a man saw even his enemy's beast lying under the weight of his burden, he must help him up (Exod. xxiii. 5); no ox must be muzzled while treading out the corn (Deut. xxv. 4); nor must any youngling of bullock, sheep, or goat, be parted from its dam for seven days after its birth, even for an offering to the Lord (Lev. xxii. 27); nor must the parent animal be killed with her young both in one day (ver. 28); nor must a kid be dressed in its mother's milk (a thrice-repeated precept, Exod. xxiii. 19; xxiv. 26; Deut. xiv. 21); nor must the dam be taken with her young from their nest (Deut. xxii. 6, 7). Moses further enjoined that cattle should enjoy the rest of the Sabbath-day (Exod. xx. 10; Deut. v. 14), and that even game was to have a jubilee on the Sabbatical year, and be allowed to feed in the fallow-fields unmolested (Lev. xxv. 7). *g.* Nor did this exquisite consideration stop with men and cattle; it was extended to the *trees of the field*! For three years their fruit was not to be eaten, that their strength might be reserved for later growth (Lev. xix. 23);

let the fourth year's fruit be 'holy to praise the Lord withal,' and afterwards let the tree thus strengthened and thus consecrated yield its produce without stint to its owner. But to return to human objects of legislation. The Mosaic code has been censured for its toleration of *slavery* and *polygamy* and its well-known *levirate* statute. These subjects will be found elsewhere treated in full—we mention them here in extenuation of the censure. Moses found all these institutions in full activity amongst his people. Their roots were too deep in the social soil to be extirpated. Like a wise legislator, as he was, Moses had no alternative but to tolerate these customs; but he meant to improve them, and in nothing does his code show greater prudence than in these modifications. *h.* Respecting the last-mentioned statute, we must refer to the article MARRIAGE, and to Michaelis, who traces the custom and its inconveniences, and the important modifications introduced by Moses (vol. ii., pp. 28-33). *i.* In his treatment of *Polygamy* we have a still clearer instance of the lawgiver's wisdom. The evil was too inveterate to be eradicated at once; he therefore would reduce its prevalence by every discouragement. His prohibition of eunuchs was one of these; and the law of Lev. xv. 18, by its inconvenience to the husband of many wives, could not have failed to be another. The domestic troubles arising from parental caprice and injustice incidental to this perversion of connubial life would be, moreover, greatly mitigated by the equitable statute of Deut. xxi. 15-17 (Michaelis, ii. 7-12). *k.* Of *slavery*, an evil which the efforts of Christianity have not yet effaced from society, we shall speak more fully elsewhere [SLAVERY]. We are here only concerned to notice what mitigations Moses provided to soften its rigour. Strictly speaking, Moses allowed no *Hebrew* to be reduced to the servile state: the serfs of the Bible are foreigners (Lev. xxv. 44-46). Those Hebrews whose poverty sometimes reduced them to temporary service, regained their freedom and a handsome reward at the Sabbatical year and the year of jubilee (Exod. xxi. 2; Deut. xv. 12-15; Lev. xxv. 39-43). But, besides these statutes against the perpetuity of servitude, there were others which checked oppression and counselled humanity even during the limited period of service. These merciful enactments are in admirable contrast to the laws of Greece and Rome, and even to the theories of their most high-minded philosophers. In Greece and Rome the slave took no part in the public worship of the state: at some of the holier rites his presence would have been a pollution. But the Hebrew law made its slaves members of the congregation of Jehovah; so that at all the festivals, including the very greatest—the Passover—and the rest of the Sabbath-day and the initiatory rite of Circumcision (that sacrament of man's equality before God) the Hebrew servants, and even the foreign bondmen, mingled with their masters and their masters' families in the great duties and privileges of religion. In all cases of merciful prescription for the slave, the law appeals to the Israelite to *remember his own bondage* in the land of Egypt (Deut. xvi. 10-17)—an affecting sanction, which must have spoken home to men's hearts, and which is one only of a multitude of signs of the law's consideration for its subjects. The superiority of the Mosaic code to all other legislation in ancient and modern times in the treatment of the slave is illustrated in a masterly

sketch by Mr. Goldwin Smith (*Does the Bible sanction American Slavery?* pp. 39-94); also by Michaelis, vol. ii. pp. 155-191. 1. In small points of detail, as well as in large principles, it is interesting to discover the clemency of the law. We will mention two and have done. The small rateable value of *young* slaves of the two sexes would act as a kindly obstacle to their coming into the market at all (Michaelis, ii. 168). *m.* Our last instance must be quoted in the very words of the legislator—they need no comment: ‘If thou at all take thy neighbour’s raiment to pledge, thou shalt deliver it unto him *by that the sun goeth down; for that is his covering only, it is his raiment for his skin; wherein shall he sleep?*’ and it shall come to pass, when he crieth unto me, that I will hear; for I am gracious’ (Exod. xxii. 26, 27; Deut. xxiv. 12, 13).\* We have said enough to illustrate, *in its human aspect*, the beneficent and merciful genius of the Mosaic code. It proves itself worthy of its divine author, whose voice we once more hear in our last quotation, and its spirit cannot be better formulated than in one of its own precepts, upon which the gospel founds a moiety of man’s whole duty: ‘Thou shalt love thy neighbour as thyself’—*אָהַבְתָּ לְרֵעֶךָ כָּמוֹךָ* (Lev.

xix. 18; comp. Matt. xxii. 39, 40. For the *legal bearing* of this beautiful precept and the vindication of its equitable relation to other laws, see Michaelis, *Laws of Moses*, iv. 292, 293. It is to be observed that the *stranger* no less than the Hebrew is included within the operation of this precept; see ver. 34 of this same chap. and Michaelis, i. 373, 374). This incomparable excellence and beauty of the Israelite laws will go far to settle a question which we must now, as briefly as may be, notice.

*How far was Moses indebted to Egypt for his Laws?*—From very early times the occasional similarity between the Mosaic institutions and those of various Gentile nations has been observed and variously accounted for. 1. Josephus (*Contra Apion*, ii. 40), with the natural pride of a Jew, said: ‘Our laws have been such as have always inspired admiration and imitation into all other men; nay, the earliest Grecian philosophers, though in appearance they observed the laws of their own countries, yet did they in their actions and their philosophic doctrines follow our legislator;’ with more to the same effect. A like opinion was held by his countryman and contemporary, Philo, who (*Life of Moses*, ii. 5) asserts that ‘the beauty and dignity of the legislation of Moses is honoured, not among the Jews, but also by all other nations.’ Josephus carries the influence of his nation further back than Moses; according to him (*Antiq. Jud.* i. 8. 2) Abraham was regarded with intense respect even by the Egyptians, who

not only derived their arithmetic and their astronomy from the patriarch, but were convinced by his reasonings to modify their ‘accustomed sacred rites.’ Origen (*Contra Celsum*, i. p. 13) sends Pythagoras for his philosophy to the Jews; Justin Martyr (*Apol.* ii. p. 92) makes Moses the teacher of Plato; while Clement of Alex. combines both statements, ascribing what was good in not only these two philosophers (*Stromat.* i. p. 342), but in Aristotle also (*Stromat.* v. p. 595) to the Hebrew Scriptures, and especially to the Mosaic law, which was the object of much admiration in the East. 2. Other writers, however, without denying the influence of Moses, impeach his originality. They observe what they deem an extreme resemblance to the religious ceremonies of the Egyptians in the Mosaic ritual; and to account for it, they suppose that the Hebrew lawgiver derived much of, at least, his ceremonial law from Egypt, learned as he was in all the wisdom of that country (Acts vii. 22). The children of Israel are thought by the maintainers of this opinion to have imbibed too much of the superstition of their house of bondage, and to have been in too low a state of intelligence to receive the moral precepts and religious doctrines suited to the worship of Jehovah, without the aid of symbolical representations. Hence the entire ritual system which Moses gave the people was nothing more than an accommodation, not indeed to the mere human weakness, but to the perverse tendencies and idolatrous prejudices of those whom he had to instruct. The apostasy of the golden calf gave proof at once of the obstinacy of these perverse habits, and of the necessity of dealing with them in such a spirit of *accommodation* as the law breathes. This low view of the Mosaic ordinances is, according to these writers, warranted by the words of God himself who (Ezek. xx. 25) speaks of ‘statutes that were not good, and judgments whereby the people should not live.’ According to Eusebius (*Præp. Evang.*, vii. 8) this opinion had its supporters in early times also. Even in the great Jewish doctor Maimonides, who is yet full of profound respect for the law of Moses, there are many traces of the hypothesis that its divine author observed the principle of *accommodation* in its structure (*More Nevochim*, iii. 32 [Buxtorf, p. 432]). It was reserved, however, for our own great writers—MARSHAM (*Chronicon Canon*); SPENCER (*De legibus Hebr. ritual.*); and WARBURTON (*Divine Legation*)—to concentrate attention on the subject by their very learned discussions. Spencer’s erudition has probably acquired for the hypothesis a reputation which will always secure to it some followers. Hengstenberg (in his *Egypt and the Books of Moses* [Clark, 1845]) has applied the results of more recent investigations in Egyptian archaeology, and asserts an Egyptian origin [or *reference* as he expresses it] for some of the most conspicuous of the Mosaic institutions, including the sacerdotal vestments, the Urim and Thummim, the Cherubim, the ‘Azazel’ of Lev. xvi., the red heifer of Num. xix., the laws about food, and the Nazarites. In this article we can only indicate, and not discuss, these opinions. They have not escaped severe examination; and there are some learned writers who have stoutly maintained the very opposite hypothesis. Witsius wrote his learned treatise, *Ægyptiaca*, to confute the doctrine of Marsham and Spencer. He is full of Josephus’ idea, that

\* A suitable illustration of the excellence of the Mosaic constitution, *in its human phase*, is adduced by M. Guizot (*Meditations on the Essence of Christianity*, pp. 208, 209), from Mr. J. Stuart Mill, and M. Salvador, to the effect that ‘the prophets,’ whom they rightly regard as an offset from the law, ‘were in church and state the equivalent to the modern liberty of the press . . . accordingly, the Jews, instead of being stationary like other Asiatics, were, next to the Greeks, the most progressive people of antiquity; and, jointly with them, have been the starting-point and main propelling agency of modern cultivation.’

there was a divine originality in the Jewish revelation; and that the heathen nations, and especially Egypt, instead of helping the Hebrew lawgiver with materials for the sacred code, rather borrowed from him. Spencer's ingenious theories and Witsius' learned refutations produced an antagonism out of which arose progress in the elucidation of some obscure points in Biblical literature. The two schools of opinion which have followed them have resorted to extreme conclusions both ways, equally difficult, indeed, for the thoughtful student to accept.\* It is difficult, on the one hand, to believe with Spencer, and still more with Marsham, that heathen superstitions could in any degree have been taken as a substratum whereon to construct a system for the express purpose of checking and destroying heathenism; nor, on the other hand, can it be denied that between the Hebrew religious rites, described in the Pentateuch, and the religious rites of certain heathen nations, a resemblance more or less obvious exists, which it is impossible to prove, or even to imagine, to have been derived from the imitation of a Hebrew ritual. To test the latter difficulty first, Marsham attributes an Egyptian origin to the rite of *circumcision*; Spencer hesitates, but does not reject Marsham's hypothesis. Witsius, to save the Biblical prestige of the institution, accounts for the allowed fact, that it was known to the ancient Egyptians, by the conjecture that Abraham, whom we have seen Josephus representing as a great instructor of the Egyptians, communicated to them this sacred rite, which he had himself received from God. Other learned men had resorted to this explanation before Witsius; Selden (*De Synedr. Vet. Hebr.* [Works, vol. i., col. 1219-1222]) gives this as his own opinion, and mentions a catena of authorities who have thought with him. 'But this explanation looks too much like a specious device for evading a difficulty to command implicit acceptance. Modern research makes it at least doubtful whether circumcision was not known to the Egyptians *'long before the birth of Abraham'* (Rawlinson's *Herodotus* [edit. i.], vol. ii., p. 171, note 5). It is observable that our Saviour himself uses very general language, which throws back the origin of circumcision to *patriarchal times*, it may be to the very primeval period; for his words will suit the Sethite or

Shemite patriarchs equally as well as the Abrahamic (John vii. 22). Now this difficulty we cannot ignore in our estimate of this question. But it is a light difficulty in comparison with the difficulty which oppresses the entire theory of Spencer. The very enunciation of it seems to involve an absurdity. To check Egyptian tendencies in Israel, Moses gives his people an imitation of certain Egyptian rites and ceremonies! It is in vain that Spencer makes the lawgiver strenuously opposed to some portions of the Egyptian ritual; for his tolerance of other portions would nullify the effect of that opposition in a nation which the hypothesis represents as wayward and indiscriminate in its prejudices! Bähr's strong censure of Spencer's theory is not too severe: 'God appears as a Jesuit, who makes use of bad means to accomplish a good end . . . . The relation of Israel to the Egyptians, and that of Moses in particular (as represented in the Pentateuch at the time of the Exodus), would rather lead us to expect an intentional shunning of everything Egyptian, especially in religious matters, instead of an imitation and a borrowing. [We may compare in this sense Lev. xviii. 3: '*After the doings of the land of Egypt, wherein ye dwell, shall ye not do,*' etc.; with Ezek. xx. 7-9]. . . . There was unquestionably the strongest inducement for Moses making the separation of Israel from Egypt as broad as possible. Everything Egyptian must be branded, and the remembrance of it by all means extirpated. But by adopting the ritual of Egypt [as Spencer makes him], Moses would have directly sanctioned what was Egyptian, and would have perpetuated the remembrance of the land of darkness and servitude' (*Symbolik*, i. 41, 42). We think this a fatal objection to the Spencerian theory. Another damaging point in it is the *uncertainty* of its very principle. At one moment we are told that the destruction of idolatry was the primary intention of the Mosaic laws; whence their tone was inflexible; or rather the Israelite mind was to be bent in a direction the very opposite to that idolatrous one which it had acquired in Egypt. But the reader is no sooner landed on this firm and satisfactory hypothesis, than he encounters another principle incompatible with it—the principle of *conciliation*. The inveterate propensities of the Israelites must not be offended; and, accordingly, they are gratified with many Egyptian customs, which they had learnt in their bondage and were unwilling to quit! A careful consideration of both sides of the question induces us to reject the positions maintained both by Spencer and by Witsius. But our rejection of their conclusions is modified by our acceptance of very much of their premises. We think that the learning of Spencer and his associates was well employed in tracing out the features of *resemblance* in the institutions of the Israelites and their neighbours; while his opponents did not lose their labour in illustrating the *originality* of those which Moses and his predecessors gave the Hebrew nation.

There is, in truth, a third theory, which has every appearance of probability according to Biblical data, and which is superseding its more partial predecessors in the acceptance of the learned. God, who sees the end from the beginning, from the very first consistently arranged his dispensations, and gave them development; until, in the fulness of time, the Christian dispensation, which was the model as well as the end of those which

\* On Witsius' side of the controversy the following may here be mentioned:—Solomon Deyling (*Observationes Sacrae*); J. F. Mayer (*De temporibus et festis Hebr.* [Ugolini, *Thes.* i. 378]); Vitrina (*Observationes Sacrae*); Dr. Woodward (*A discourse on the worship of the ancient Egyptians*—recommended as 'an able refutation' of Spencer by Bp. Watson); Shuckford (*Connection*, etc., vol. i.); Dean Graves (*Pentateuch*, pt. ii., lect. 5); Abp. Magee (*Atonement*, note lx.). Many eminent Germans have objected to Spencer's views without committing themselves to the onesided opinions of Witsius. Bähr, in his very able work, *Symbolik des Mosaischen Cultus*, has taken this independent line. See a brief notice of the subject in Dr. Fairburn's *Typology* [3d edition], vol. ii., pp. 196-221; and Macdonald's *Introduction to the Pentateuch*, vol. ii., pp. 366-400. None more eminent than themselves can be named by the side of Marsham, Spencer, and Warburton. Le Clerc (*Comment. on Pentateuch*) warmly adopted Spencer's general theory.

preceded it, explained their characteristic features no less than their typical functions. The light of Christianity, reflected upon the scattered notices of patriarchal rites in the earlier Scriptures, enables us to perceive the close relation between the Mosaic and the pre-Mosaic ordinances of divine worship, and also their typical connection with the gospel. In the Mosaic institutions we find in fact a republication, in probably a fuller and certainly a more explicit form, of the primitive ceremonial which God had given to the patriarchs. Now, we saw at the beginning of this article, where we referred to Mr. Gladstone's work on *Homer*, that in process of time the patriarchal worship was disintegrated and corrupted. Out of this disintegration arose the primeval forms of the heathen *cultus*, which in every country retained a certain likeness to its divine and uncorrupted original. This likeness, it may be presumed, would be kept up only in normal and prominent rites, while diversity would operate mainly in less important points—a presumption which is sufficient to account for all the phenomena contended for in the theories both of Spencer and his opponents. It was not the purpose of the author of the Pentateuch to narrate particulars of God's first gift of religious rites to man. He rather intimates by scattered hints the existence of a sacrificial system with its priesthood (see instances mentioned early in this article), and that by no means confined to Shem's posterity from whom sprang Abraham. A remarkable passage in Ezek. xxviii. 11-19 undoubtedly refers to the Tyrian nation as having at first possessed a holy worship—'sanctuaries,' afterwards 'defiled' (ver. 18), and as having been 'perfect in their ways,' until iniquity corrupted them (ver. 15). In this period of their primeval purity, 'full of wisdom and perfect in beauty' (ver. 12), resembling the excellence of 'Eden, the garden of the Lord' (ver. 13), they seem to have had a sacred ritual, which, in grandeur and apparatus, reminds us of the beauty of some of the Mosaic details. They had 'a minstrelsy of tabrets and pipes,' and ornaments of precious stones, singularly like those of the breastplate of Aaron, which might possibly have adorned a primitive hierarchy (ver. 13; comp. Exod. xxxix. 9, 13). Moreover, with imagery which brings back to our memory the solemnities of Sinai, they are described as having been 'set by God' upon his 'holy mountain,' and, wonderful to add, they had 'their anointed cherub,' 'which covered' perhaps another mercy-seat, and symbolised the divine presence (ver. 14). We must refer the reader for further information on this interesting allusion to a pre-Mosaic *cultus*, to an article in *The Journal of Sacred Literature* of April 1860 (on 'Sinai, Kadesh, and Mount Hor'), and another in *The Christian Remembrancer* of October in the same year (on 'the theory of the Mosaic system'). We will only here add that the Tyrians in the days of their purity, previous to their settlement in Phœnicia, probably dwelt south of Palestine, and possibly were the first to whom the Almighty vouchsafed his glorious presence upon 'the holy mountain of God,' or Horeb, that mountain which was again consecrated by the divine appearance to Moses and Israel, and yet again to Elijah; nor, indeed, would it be far-fetched to conjecture that the earliest of these revelations was not unaccompanied by some such solemnity as we have above seen inaugurating the Mosaic

legislation in after times. What else is the meaning of Ezekiel's statement: 'Thou didst walk up and down in the midst of the stones [rocks] of fire?' as if Horeb and its companions had blazed before the fires of Sinai were kindled. Calling, then, to mind the near relationship of the Tyrians and Egyptians, the former from Cush and the latter from Mizraim, both sons of Ham (Gen. x. 6), we have, in this Scriptural record of a primitive Hamite worship of God, not only a strong confirmation of the general view we have advanced above—that the patriarchal system was substantially the same as the Mosaic—but a highly credible solution of the difficulty over which Spencer and his opponents so earnestly contended. 'We can see at once how the Egyptians became possessed of such cherubic forms, ages and ages (as the monuments testify) before the Mosaic times. . . . Egypt had not invented the cherubic idea or shape. Moses was not indebted to a debasing idolatry for the form in which, under divine guidance, he cast the symbols of the divine presence. God's gracious gift of cherubic presence and forms had been perverted. It was only set in its ancient place again, when it appeared in the Mosaic system. The same may be said of the Urim and Thummim. . . . Here, too, Egypt had no doubt derived the entire idea from the ancient and pure system under which she had grown up [in company with her Tyrian kinsmen]. Moses was only instructed to reinstate the mystic jewels. . . . And this is the key to many other coincidences which have been pointed out between the Mosaic and the Egyptian religious institutions' (*Christ. Remembr.*, as above, p. 448). We are now in a position to sum up our evidence, and conclude our article.

*Conclusion.*—As we began, so we end with the assertion of God's uniformity of plan and aim in the development of his dispensations. All the earlier stages of his divine work on earth led onward to the perfection of the gospel, of which the Mosaic ritual (Heb. viii. 5) and temple-services (1 Chron. xxviii. 12, 19) were no less than *divinely-inspired sketches and patterns* (comp. the *σκά* [or etching] in the *larv*, and the *εἰκὼν* [or full picture] in the gospel of God's heavenly truth; Heb. x. 1, with the ancient dictum—'Umbra in lege; Imago in Evangelio; Veritas in cœlo'). This view gives order and simplicity to the revelations of the O. T. and N. T., and establishes their harmony and coherence against the semi-Manichæanism of the Spencerian doctrine. (For a refutation of Spencer's gloss on the important passage, Ezek. xx. 25, referred to above, it is worth while consulting Deyling's Dissertation, *De statutis non bonis*, in his *Obs. Sacr.* ii. 304-321. Moreover, while this view raises the Hebrew Scriptures to a level with the Christian, it gives us confidence in applying the details of the Mosaic system to explain the great subject of all the inspired record, the sacrificial work of Christ our Saviour. We do not say that the New Testament is defective or incomplete on this subject of paramount interest, but with St. Paul's writings before us, we cannot err in the conviction that the greatness of Christ's work cannot be adequately understood, unless we bring to its elucidation that divinely-provided commentary of the great Mosaic code, which is everywhere presupposed by our blessed Lord and his apostles, as the basis of their own instruction and doctrine.

*Appendix.*—Much has been written on the prin-

ciple of classification which should be observed in arranging a digest of the Mosaic statutes. The ordinary one, which divides them into the three heads of *moral*, *ceremonial*, and *political* laws, has been objected to, as being unsuited to the character of the Mosaic institutions, which are said to 'obliterate any such supposed separation of laws, and refer all to first principles, depending on the will of God and the nature of man' (Smith's *Dict. of the Bible*, ii. 69). It is quite true, as the thoughtful writer of that portion of the dictionary observes, that 'any single ordinance might have at once a moral, a ceremonial, and a political bearing,' and we would endorse his caution here. But we fear that the logical difficulty underlies every arrangement more or less. In his own able analysis into *civil*, *criminal*, *judicial*, and *ecclesiastical* laws, we encounter at starting an instance which repeats itself at the head both of the civil and the criminal categories. Besides this objection, with which, as being inevitable, we find no fault, there is another, which renders his division, in our opinion, less suitable to the Mosaic code than the older one, which it professedly supersedes. *The ten commandments are the basis and substance of all the enactments*, whether of the Book of the Covenant, the legislation of Sinai, and the laws of Kadesh, or of the Deuteronomic edition of the code. Our structural analysis above has proved this to be the case. No digest is, to say the least, *characteristic*, which does not put the great Decalogue at its head. Philo long ago did this (*De Decalogo* [Works, by Turnebus and Hoerschel], p. 746), when he distinguished THE TEN spoken by God himself from those which were promulgated by the agency of his prophet, 'and which are all referred to those others'—τοὺς δὲ διὰ τοῦ προφήτου πάντας ἐπ' ἐκείνους ἀναφέρεισθαι. After a discussion, therefore, of the general character of the Decalogue, Philo proceeds to consider in consecutive treatises the other particular laws, as deductions from the ten successively. The *threefold* division which Moses himself makes of his laws on several prominent occasions (as at the end of the Sinaitic section, Lev. xxvi. 46, and in the recapitulation of Deuteronomy, vi. 1; vii. 11), has been sometimes supposed to justify the usual triple category; as if תורה, the whole code=הפצוה, ἐντολαί, moral

precepts; and הַקִּים, the ceremonial laws; and הַמִּשְׁפָּטִים, the judicial or political ordinances (see Scott on Deut. vi. 1); but this we fear cannot be substantiated. The triads are not expressed always in the same terms, and the interchanges which occur in their use only prove that the legal terms of the Hebrew code are synonymous\*—a result

\* The Hebrew Scriptures are extremely rich in these *legal synonyms*. 'There are in Ps. cxix. no less than eight several names by which (according to the different aspects in which it is regarded) the law of God is designated—תורה, 'law'; ערות, 'testimonies'; מצות, 'commandments'; חקים, 'statutes'; פקודים, 'precepts'; משפטים, 'judgments'; דבר, 'word'; אמרה, 'word' (see Thrupp, *Psalms*, ii. 253). How paramount a place in the teaching of the O. T., and in the thoughts of the devout Hebrews of old, the law of Moses occupied, is evidenced by this interesting fact. Other extra-synonymous terms for the law have been mentioned

which shows that God's laws are of a wide and comprehensive nature, and incapable of those sharp definitions by which men are apt to limit them. The Jewish doctors seem to have observed this, for they simply enumerate, without distinguishing them. They count 613 laws; 248 are positive or imperative in form, and 365 are negative or prohibitory. They are given in consecutive enumeration, but with some arrangement of subject-matter, in Jost's *Geschichte des Judenthums*, i. 451-466. These 613 statutes are arranged by Maimonides, in his *More Nevochim*, into these fourteen classes:

1. Fundamental articles of faith.
2. On idolatry.
3. Reformation of manners.
4. On alms, loans, and debts.
5. On injustice and rapine.
6. On theft, robbery, and false witness [pecuniary mulcts].
7. On lending, hiring, depositing, etc. [pecuniary judgments].
8. On holydays—the Sabbath and festival days.
9. On public prayer, the *Shema*, etc.
10. The sanctuary—its ministers, vessels, etc.
11. On oblations.
12. On pollutions and purifications.
13. On prohibited meats [Nazarite laws].
14. Unlawful concubinage [circumcision, etc.]

Maimonides further generalises these into (1) Precepts relating to *God and man*; (2) Precepts relating to *man and man*; but the difficulty of even this large generalisation did not escape him, for he adds, 'It may be well to remark, that even the precepts of the former class do ultimately, and after many intervening circumstances, lead to the occurrences of the latter class.' See Townley's *Maimonides*, chap. x., pp. 193-197. For a useful analysis of the law of Moses, the reader is referred to Horne's *Introduction*, vol. iv. pp. 27-30 of edit. ix., or vol. ii. pp. 590-593 of edit. x. (by Davidson); or pp. 536-539 of edit. xi. (by Ayre). This analysis, which is arranged on the principle we have recommended above, has been also reprinted in some more elementary works. It is for practical purposes very good.—P. H.

MOSES HA-COHEN. [GIKATILLA.]

MOSES HA-DARSHAN = the *Expositor* (רבינו משה הדרשן), of Narbonne, flourished A. D. 1080, and was the teacher of the celebrated R. Nathan. He is the author of the commentary on the Hebrew Scriptures, which is alternately quoted by the respective names of משה ר' פרושי ר' משה, *Expositions of R. Moses the Expositor*, הראשית רבה, the *Great Bereshith*, *Bereshith Rabba major*, and *Bereshith Rabba R. Mose Ha-Darshan*, and which has not as yet come to light. Copious and numerous fragments of it, however, are given by Rashi in his commentaries on Gen. xxxv. 8; xlvi. 7; Num. vii. 7; vii. 18-23; xi. 20, 21; xv. 14; xix. 22; xxvi. 24, 36; xxviii. 19; xxxii. 24, 42; xxxiii. 1; Deut. xxi. 14; xxvii. 24; Josh. v. 9; Ps. xl. 2; lx. 4; lxii. 12; lxvii. 17; lxxx. 6; Prov. v. 19; xxvi. 10; Job xxxvi. 1; by Raymond Martin in his *Pugio Fidei*, Paris 1651,

besides these eight, as occurring in this Psalm—the grand paraenesis of the law; such as וְרָא אֶת אֱלֹהֶיךָ, both rendered 'was' in A. V.

Leipzig 1687, both in the original Hebrew and in a Latin translation; by Porchert in his *Victoria adversus impios Hebraeos*, Paris 1520; by Joshua Lorki, or Hieronymus de Santa Fide, as he was called after embracing Christianity, in his *Hebræomastix*, Frankfurt-on-the-Maine 1602; and by Galatin in his *De Arcanis Catholica veritatis*, Basel 1550. These fragments, which are exceedingly important contributions to the history of interpretation in the middle ages, show that R. Moses strove to explain the words and the context, and that he interspersed his literal expositions with ancient *Hagadas*, as well as with the interpretations of the sages of olden days. Comp. Zunz, *Die Gottesdienstlichen Vorträge der Juden*, Berlin 1832, p. 286-293.—C. D. G.

MOSES B. JACOB. [ALBELDA, MOSES.]

MOSES B. MOCHA of Palestine or Tiberias, also called R. Moses the Punctuator (ר' משה הנקוד), flourished circa A.D. 590. He developed and amplified the interlinery system of vocalization (טעמהחתחה, מנקוד, called the Tiberian (נקוד טיברני), which has for centuries been adopted both by the synagogue and the church in all the pointed editions of the Hebrew Scriptures. Like his father, R. Moses also wrote Massoretic glosses both in the margin of the Codd. and in separate works, entitled נקוד ספרי. Comp. the articles MOCHA and VOWEL-POINTS and ACCENTS in this Cyclopædia.—C. D. G.

MOSES, THE PUNCTUATOR (ר' משה הנקוד), or the Cantor (חזן). He lived in London about the year 1230, and wrote the well-known *Treatise embodying the rules about the points and accents of the Hebrew Scriptures*, called דרכי הניקוד והגינות, or כלי הניקוד, also in the MSS. הוריית הקורא. Excerpts of this treatise, made by Jacob b. Chajim, were first printed with the Massora in the *Rabbinic Bible*, Venice 1524-25, and since in all the editions of the Rabbinic Bible. The treatise has also been published separately with a short commentary by Zebi b. Menachem, Wilna 1822; and with corrections and German notes by Frensdorff, Hanover 1847. Those who recognise the real importance of the Hebrew vowel-points and accents, will find in this unpretentious treatise a useful guide. R. Moses was thoroughly acquainted with and quotes the grammatical and exegetical writings of his predecessors, as Chajim, Rashi, Ibn Ganach, Ibn Ezra, Parchon, etc. Comp. Steinschneider, *Bibliographisches Handbuch*, Leipzig 1859, p. 95; Zunz, *Zur Geschichte und Literatur*, Berlin 1845, p. 111.—C. D. G.

MOSHEIM, JOHANN LORENZ VON, the famous ecclesiastical historian, was born at Lubeck, 9th October 1694. He began to teach philosophy in the university of Kiel when yet a young man, and with great success. In 1725 he removed to Helmstädt, where he occupied the chair of theology for twenty-two years. In 1747, on the invitation of George II. of England, he became chancellor and professor of divinity in the university of Göttingen, occupying that high position for eight years, or till his death, 9th September 1755. The best known of his very numerous works are his *De rebus Christianorum ante Constantinum Magnum*, translated into English by Vidal; and his more popular *Institutionum Historiæ Ecclesiasticæ antiquioris et re-*

*centioris*, libri iv., translated into German by Von Einem and by Schlegel; and into English, first and very imperfectly by Maclaine, and more recently, and in a far better version, by Murdock of New-haven, U.S. The Institutes are a clear, skilful, impartial, though somewhat mechanical compend, after the centurial style and arrangements of Flacius. Mosheim's interpretations of Scripture are found in his *Observationes Sacre*, Amsterdam 1721; his *Cogitationes in N. T. loc. select.*, Hannov. 1726; his *Erklärung des I. Br. an d. Corinther*, 1741, new ed. by Windheim, 1762; his *Erkl. d. beyden Br. an d. Timoth.*, 1755; and in his volumes of sermons—'Heilige Reden.' His exegesis is usually broad and learned, and betokens good sense and sound erudition. Mosheim was a liberal Lutheran, distant alike from pietism and rationalism. It may be added, in a word, that while in his Institutes his neutrality and apparent coldness have sometimes been construed into indifference, his other writings manifest glowing piety and ardent emotion.—J. E.

MOTH. [ASH.]

MOTHER. The Hebrew word for mother is אִם, *am*, and is regarded by the lexicographers as a primitive, imitating the earliest lisping of an infant: they compare it with the Greek μάμα, μάμη, μάτη; Sanscrit, *mā*, *ambā*; Copt., *mau*; English and French, *mama*; German, *amme*, (nurse), etc.

The ordinary applications of the word require no illustration; but the following points of Hebrew usage may be noticed. When the father had more than one wife, the son seems to have confined the title of 'mother' to his real mother, by which he distinguished her from the other wives of his father. Hence the source of Joseph's peculiar interest in Benjamin is indicated in Gen. xliii. 29, by his being 'his mother's son.' The other brethren were the sons of his father by other wives. Nevertheless, when this precision was not necessary, the step-mother was sometimes styled mother. Thus Jacob (Gen. xxxvii. 10) speaks of Leah as Joseph's mother, for his real mother had long been dead. The step-mother was, however, more properly distinguished from the womb-mother by the name of 'father's wife' (אִשֶּׁת אָב). The word 'mother' was also, like father, brother, sister, employed by the Hebrews in a somewhat wider sense than is usual with us. It is used of a grandmother (1 Kings xv. 10), and even of any female ancestor (Gen. iii. 20); of a benefactress (Judg. v. 7), and as expressing intimate relationship (Job xvii. 14). In Hebrew, as in English, a nation is considered as a mother, and individuals as her children (Is. i. 1; Jer. l. 12; Ezek. xix. 2; Hos. ii. 4; iv. 5); so our 'mother-country,' which is quite as good as 'father-land,' which we seem beginning to copy from the Germans. Large and important cities are also called mothers, *i. e.*, 'mother-cities,' with reference to the dependent towns and villages (2 Sam. xx. 19), or even to the inhabitants, who are called her children (Is. iii. 12; xlix. 23). 'The parting of the way, at the head of two ways' (Ezek. xxi. 21) is in the Hebrew 'the mother of the way,' because out of it the two ways arise as daughters. In Job i. 21, the earth is indicated as the common 'mother to whose bosom all mankind must return.'

The particulars relating to the position which a mother occupied among the Jews, are involved in other relations, which are referred to the general head WOMAN.—J. K.

**MOUNTAINS.** The mountains mentioned in Scripture are noticed under their different names, and a general statement with reference to the mountains of Palestine is given under that head. We have therefore in this place only to notice more fully some remarkable symbolical or figurative uses of the word in the Bible.

In Scripture the governing part of the body politic appears under symbols of different kinds. If the allegory or figurative representation is taken from the heavens, the luminaries denote the governing body; if from an animal, the head or horns; if from the earth, a mountain or fortress; and in this case the capital city or residence of the governor is taken for the supreme power. These mutually illustrate each other. For a capital city is the head of the political body: the head of an ox is the fortress of the animal; mountains are the natural fortresses of the earth; and therefore a fortress or capital city, though seated in a plain, may be called a mountain. Thus the words head, mountain, hill, city, horn, and king, are used in a manner as synonymous terms to signify a kingdom, monarchy, or republic, united under *one* government, only with this difference, that it is to be understood in different respects; for the term head represents it in respect of the capital city; mountain or hill in respect of the strength of the metropolis, which gives law to, or is above, and commands the adjacent territory. When David says, 'Lord, by thy favour thou hast made my mountain to stand strong' (Ps. xxx. 7), he means to express the stability of his kingdom.

It is according to these ideas that the kingdom of the Messiah is described under the figure of a mountain (Is. ii. 2; xi. 9; Dan. ii. 35), and its universality by its being the resort of all nations, and by its filling the whole earth. The mystic mountains in the Apocalypse denote kingdoms and states subverted to make room for the Messiah's kingdom (Rev. vi. 14; xvi. 20).

The Chaldean monarchy is described as a mountain in Jer. li. 25; Zech. iv. 7; and the Targum illustrates the idea by substituting the word 'fortress' in the former text. In this view, then, a mountain is the symbol of a kingdom, or of a capital city with its domains, or of a king, which is the same.

Mountains are frequently used to signify places of strength, of what kind soever, and to whatsoever use applied (Jer. iii. 23).

Eminences were very commonly chosen for the sites of Pagan temples: these became places of asylum, and were looked upon as the fortresses and defenders of the worshippers, by reason of the presence of the false deities in them. On this account mountains were the strongholds of Paganism, and therefore in several parts of Scripture they signify idolatrous temples and places of worship (Jer. iii. 23; Ezek. vi. 2-6; Mic. iv. 1; comp. Deut. xii. 2; Jer. ii. 20; iii. 6; Ezek. vi. 3). See Wemyss's *Clavis Symbolica*, pp. 309-316.—J. K.

**MOURNING.** This head embraces both the outward expressions of sorrow for the dead, referred to in the Scriptures, and those expressions

which were intended to exhibit repentance, etc. These subjects will be pursued according to Townsend's chronological arrangement, and since they nearly approximate, will be pursued together. Assuming the propriety of this arrangement, the earliest reference to any kind of mourning is that of Job (B. C. 2130), who being informed of the destruction of his children as the climax of his calamities, 'arose, rent his mantle, shaved his head, and fell down upon the ground and worshipped' (Job i. 20)—uttered sentiments of submission (ver. 21), and sat down among the ashes (chap. ii. 8). His friends came to him by an appointment among themselves to mourn with him and comfort him (ver. 11); they lift up their voices and wept upon a view of his altered appearance; they rent every man his mantle and sprinkled dust upon their heads towards heaven (ver. 12), and sat down with him on the ground seven days and seven nights, waiting till his grief should subside before they commenced their office as mourners. Job then bewails aloud his unhappy condition (chap. iii.) In chap. xvi. 15, 16, reference is made to the customs of sewing sackcloth upon the skin, defiling the head with dust, and suffering the face to be begrimed with weeping. Clamour in grief is referred to (xix. 7; xxx. 28): it is considered a wicked man's portion that his widows shall not weep at his death (xxvii. 15.) Upon Job's recovery from his afflictions all his relatives and acquaintances bemoan and comfort him concerning his past sufferings; which seems to have been a kind of congratulatory mourning, indulged in order to heighten the pleasures of prosperity by recalling associations of adversity (chap. xlii. 11). Indeed, the expressions of affectionate joy and grief nearly coincide. Joseph fell upon his brother Benjamin's neck and wept (Gen. xlv. 14; comp. Acts xx. 37, 38, and Gen. i. 1). However it is to be accounted for, in the course of the book of Job, nearly all the chief characteristics of eastern mourning are introduced. This will appear as we proceed. The next instance is that of Abraham, who came to mourn and weep for Sarah (B. C. 1871), words which denote a formal mourning (Gen. xxiii. 2). Days of mourning are referred to in regard to the expected death of Isaac (Gen. xxvii. 41). These appear generally to have consisted of seven, as for Saul (1 Sam. xxxi. 13; for Judith, xvi. 24; comp. Eccles. xxii. 12). Weeping appears (B. C. 1729), either as one chief expression of mourning, or as the general name for it. Hence when Deborah, Rebecca's nurse, was buried at Bethel under an oak, at this period, the tree was called Allon-bachuth, the oak of weeping (Gen. xxxv. 8). The children of Israel were heard to weep by Moses throughout their families, every man in the door of his tent (Num. xi. 10; comp. xiv. 1; xxv. 6). So numerous are the references to tears in the Scriptures as to give the impression that the Orientals had them nearly at command (comp. Ps. vi. 6). The woman washed our Lord's feet with tears (Luke vii. 38; comp. Eccles. xxxviii. 17). Weeping, with lifting up of the voice, occurs in Ruth i. 9; 1 Sam. xi. 4; 2 Sam. iii. 32; xiii. 36). Their excitableness appears otherwise; they shout for joy and howl for grief, even the ministers of the altar (Joel i. 13; Micah i. 8, etc.) Reuben rent his clothes upon finding Joseph gone (Gen. xxxvii. 29), and uttered lamentations (ver. 30). Jacob rends his

clothes, and puts sackcloth upon his loins, and mourns for his son many days; his sons and his daughters rise up to comfort him, and he gives utterance to his grief; 'thus his father wept for him' (Gen. xxxvii. 34, 35). Joseph's brothers rend their clothes (Gen. xlv. 13); and this act, as expressive of grief or horror, occurs in multitudes of passages down to the last age of the Jewish empire (Acts xiv. 14). Scarcely less numerous are the references to sackcloth on the loins as an expression of mourning; we have even lying in sackcloth (1 Kings xxi. 27), and sackcloth upon both man and beast at Nineveh (Jonah iii. 8). Joseph's brethren fell to the ground before him in token of grief (Gen. xlv. 14); and this, or lying, or sitting on the ground, was a common token of mourning (comp. Ps. xxxv. 14; 1 Sam. xxv. 24; Is. iii. 26; xlvii. 1; Ezek. xxvi. 16, etc.). The next incident in the history of the subject is the mourning for Jacob by the Egyptians, which was conducted, no doubt by professional mourners, during threescore and ten days (Gen. l. 3), called the days of mourning (ver. 4), though most likely that computation includes the process of embalming (Wilkinson's *Manners and Customs of the Ancient Egyptians*, v. 454, 459). It seems to have amounted to a royal mourning, doubtless out of regard to Joseph. Herodotus states that the Egyptians mourned for a king seventy-two days. The mourning for Joseph's father was renewed by Joseph's command, with a very great and sore lamentation, upon the funeral cavalcade having arrived in Canaan, and continued seven days (ver. 10). The vehemency of that mourning seems to have surprised even the Canaanites, who in consequence named the place where it was held Abel-mizraim, or the mourning of the Egyptians (ver. 11). We learn from Diodorus that at the death of a king the Egyptian people tore their garments, every temple was closed, sacrifices were forbidden, and no festivals celebrated. A procession of two or three hundred persons wandered through the streets, throwing dust and mud upon their heads, and twice every day sung a funeral dirge in honour of the deceased. In the meantime the people abstained from baths, ointments, every luxury, and even wheat bread (i. 72, 91). The Egyptians have ever been renowned for the vociferation of their grief; 'there was a great cry in Egypt at the death of the first-born' (Exod. xii. 30). When the children of Israel (B.C. 1491) mourned under the threat of the divine displeasure, they did not put on their ornaments (Exod. xxxiii. 4; comp. Joel ii. 16; Ezek. xxiv. 17). At the giving of the law the modes of mourning were regulated by several enactments. It was forbidden the Jews to make cuttings in their flesh for the dead (Lev. xix. 28). The ancient Egyptians, according to Herodotus, did not cut themselves (ii. 61); it was a Syrian custom, as appears from the votaries of Baal (1 Kings xviii. 28); nor were the Jews allowed to make any baldness between their eyes for the dead (Deut. xiv. 1). The priests were forbidden to uncover the head in mourning (Lex. x. 6), or to rend their clothes, or to contract the ceremonial defilement involved in mourning except for their nearest kindred (Lev. xxi. 1, 4); but the high-priest was entirely forbidden to do so even for his father or his mother (ver. 11), and so was the Nazirite (Num. vi. 7). These prohibitions respecting the head and the beard (Lev. xix. 27) seem to have been restricted

VOL. III.

to funeral occasions, as the customs referred to were lawfully practised on other sorrowful events (comp. Ezra ix. 3; Job i. 20; Is. xxii. 12; Jer. vii. 29; Micah i. 16). Even the food eaten by mourners was considered unclean (comp. Deut. xxvi. 14, with Hos. ix. 4; Ezek. xxiv. 17). The Jews were commanded to afflict their souls on the day of atonement (Lev. xxiii. 27), and at the feast of trumpets (Num. xxix. 7). All the house of Israel mourned for Aaron thirty days (Num. xx. 29). The beautiful captive, whom the law permitted to marry, was required first to bewail her father and mother a full month, and the requisitions that she should shave her head and pare her nails have been by some considered signs of mourning (Deut. xxi. 11, 13). The Israelites wept for Moses thirty days, called the days of weeping and mourning for Moses (Deut. xxxiv. 8; B.C. 1541). Joshua and the elders of Israel put dust upon their heads at the defeat of Ai, and fasted (Josh. vii. 6), as did the eleven tribes after the defeat at Gibeah, and wept (Judg. xx. 26), as did all the Israelites at the command of Samuel, on which occasion it is said 'they drew water and poured it out before the Lord' (1 Sam. vii. 6; comp. Ps. xxii. 14). The prophet Joel commanded a fast as part of a national mourning. A fast is proclaimed to all the inhabitants or visitors at Jerusalem (Jer. xxxvi. 9; comp. Zech. vii. 5). Fasting is practised at Nineveh as part of a public humiliation (Jonah iii. 5). In our Lord's language, 'to fast' and 'to mourn' are the same thing (Matt. ix. 15). Public humiliations attended with religious assemblies and prayers (Joel ii. 16, 17); with fasts (Is. lviii. 3); see all these united (1 Maccab. iii. 44, 47, 48). The first complete description of mourning for the dead occurs in 2 Sam. iii. 31, 35, where David commands Joab and all the people that were with him to rend their clothes, gird themselves with sackcloth, and mourn for Abner; and David himself followed the bier, and they buried Abner in Hebron; and the king lifted up his voice and wept at the grave of Abner, and all the people wept, and David fasted two days, and wrote a lamentation for the deceased. Elegies were composed by the prophets on several disastrous occasions (Ezek. xxvi. 1-18; xxvii. 1-36; Amos v. 1, etc.). The incident of Jephthah's daughter (B.C. 1187) is too uncertain to afford any index to the modes of mourning at that era. It appears that she was allowed two months to bewail her virginity, with her companions, and that the Jewish women of that country went somewhere yearly to lament or celebrate her (Judg. xi. 37-40) [JEPTHATH]. In Ps. xxxv., which is ascribed to David, there is a description of the humiliations practised by the friends of the sick, in order to procure their recovery: 'When they were sick my clothing was sackcloth; I humbled my soul with fasting; I behaved as if it had been a friend or a brother; I bowed down heavily, as one that mourneth for his mother;' where different modes of mourning seem adverted to for different occasions. Samuel is honoured with a public mourning by the Israelites (1 Sam. xxv. 1), B.C. 1058. Upon the death of Saul, David wrote an elegy (2 Sam. i. 17-27). This, like that upon the death of Abner, seems to be a poetical description of the character of the departed, like the dirge for an Egyptian king. Lifting up the hands seems to have been an expression of grief (Ps. cxli. 2; Lam. i. 17; Ezra ix. 5). Messengers were sent to condole with sur-

R

vivors; thus David sent such to Hanun, king of Ammon, upon the death of his father (2 Sam. x. 1, 2); 'Many of the Jews came to comfort Martha and Mary' (John xi. 19); 'A great company of

When any one died in ancient Egypt the females of his family covered their faces with mud, ran through the streets with their bosoms exposed, striking themselves, and uttering loud lamenta-

374. Mourning at Grave—Lifting up hands, etc.

women attended our Lord to the cross, bewailing and lamenting him' (Luke xxiii. 27); 'Much people' were with the widow of Nain (Luke vii. 12). Indeed, if persons met a funeral procession they were expected to join it—a custom which is thought to illustrate St. Paul's words, 'Weep with them that weep' (Rom. xii. 15). Herodotus relates that when Cambyzes bewailed his calamities, the Persians tore their garments and expressed their grief aloud (iii. 66). The next incident in historical order is the mourning of Bethsheba for Uriah (2 Sam. xi. 26). David, in deprecation of the death of his son by her, prayed to God for the child, fasted, and lay all night upon the earth. Ashes were often laid on the head in token of mourning; thus 'Tamar put ashes on her head, rent her garment, and laid her hand upon her head, and went on crying' (2 Sam. xiii. 19, 20; comp. Is. lxi. 3; 2 Esdras ix. 38). They even wallowed in ashes (Ezek. xxvii. 30). Mourning apparel is first mentioned in 2 Sam. xiv. 2, where it appears that the wearer did not anoint himself with oil (comp. Matt. vi. 17). In Egypt the common people allowed their beards to grow when mourning (Herod. ii. 36; comp. 2 Sam. xix. 24). The first reference to hired mourners occurs in Eccles. xii. 5, 'The mourners הַסוֹפְרִים go about the streets.' (The root of this word, observes Gesenius, signifies 'a mournful noise,' and he adduces Micah i. 8; Jer. xxii. 18; xxxiv. 5). They are certainly alluded to in Jer. ix. 17-20, 'the mourning women' (probably widows, comp. Ps. lxxviii. 64; Acts ix. 39) answering to the *Præfice* of the Romans (comp. Hor. *Ars Poet.* 429). Another reference to them occurs in 2 Chron. xxxv. 25; comp. Joseph. *De Bell. Jud.* iii. 9. 5. The greater number of the mourners in ancient Egypt were women, as in the modern East. In the following cut (No. 375) mourners, all females, are shown casting dust upon their heads before the mummy of a man. Mourning for the dead was conducted in a tumultuous manner; they also wept and wailed greatly (Mark v. 38). Even devout men made great lamentations (Acts viii. 2).

375. Egyptian Mourners—ashes on head.

tions; they were joined as they went by neighbours and friends, and, if the deceased was of consequence, by strangers also. The men, girding their dress below their waist, ran through the town, smiting their breast, and throwing mud upon their heads (Herod. ii. 85; Diod. Sic. i. 91). The modern lamentations in Cairo seem to resemble the ancient. The mourners are said to parade the streets, crying, 'Oh, my misfortune!' 'Oh, my brother!' 'Oh, my master!' 'Oh, lord of the house!' etc. The similarity is striking between such exclamations and the following: Jephthah's, 'Alas, my daughter!' David's, 'O Absalom, my son; my son Absalom!' (2 Sam. xviii. 33). 'Alas, my brother!' (1 Kings xiii. 30). 'Ah, my brother! ah, my sister! ah, Lord, or ah, his glory' (Jer. xxii. 18). See Lane's *Modern Egyptians*, ii. 286.

Among other signs of mourning they shaved the head, and even tore off the hair (Amos viii. 10; Micah i. 16; Is. xv. 2; xxii. 12; Jer. vii. 29). Ezra plucked off the hair of his head and of his beard (Ezra ix. 3; Joseph. *Antiq.* xvi. 7. 5). The Jews went up to the house-tops to mourn (Is. xv. 2, 3; xxii. 1); and so did the Moabites (Jer.

376. Wail with Tabrets, etc.

xlvi. 37, 38; Judith viii. 5). They also made cuttings in their hands (Jer. xlviii. 37, 38); they smote upon the thigh (Jer. xxxi. 19; Ezek. xxi. 12); on the breast (Nahum ii. 7; Luke xviii. 13; xxiii. 48); they smote both hands together (Num. xxiv. 10), stamped with the foot (Ezek. vi. 11), bowed down the head (Lam. ii. 10), covered the lips (Micah iii. 7), the face (2 Sam. xix. 4), and the head (2 Sam. xv. 30), and went barefoot (2 Sam. xv. 30). Neighbours and friends provided food for the mourners (2 Sam. iii. 35; Jer. xvi. 7;

comp. Ezek. xxiv. 17); this was called 'the bread of bitterness,' 'the cup of consolation.' In later times the Jews had a custom of giving bread to the poor at funerals, and leaving it for their use at tombs, graves, etc., which resembles the Roman *visceratio* (Tobit iv. 17; Ecclus. xxx. 8). Women went to tombs to indulge their grief (John xi. 31); anniversary mournings (1 Esdras i. 22). The extravagance of mourning among the Greeks is ridi-

377. Mourning the Dead—Etruscan.

culed by Lucian (*De Luctu*), who describes them as expostulating with the dead for leaving them, etc., and other particulars similar to an Irish wake. It is difficult to ascertain the philosophy of mourning. Potter thinks that it consisted in receding as much as possible from ordinary customs and manners, in token that an extraordinary event had happened, and observes that such is the diversity of human customs that the signs of mourning in some nations coincide with those of joy in others (*Archæologia Græca*, ii. 194, 195, Lond. 1775). Although, no doubt, many modes of mourning are conventional, and originated in caprice, yet there would seem to be physical reasons for certain forms which have so widely and permanently prevailed. Shaving the head may be a dictate of nature to relieve the excited brain. Plucking the hair is well calculated to assuage the action of some particular organs, to which the sensations of the individual may be a sufficient guide. Beating the breast may relieve the heart oppressed with a tumultuous circulation. Cutting may be the effect of nature's indication of bleeding. Crying aloud certainly diverts the attention from anguish of mind or body. Tearing and rending seem to palliate nervous irritation, etc. (Carpzov, *De cinerum ap. Hebr. usu mæroris atque luctus Causa*, Rostock; Kirchmann, *De Funer. Roman.*; J. Q. Hedenus, *De Scissione Vest. Ebræis ac Gentibus usitata*, Jen. 1663; or in Ugolini, *The-saurus*, xxix.; Wichmannshausen, *De Laceratione Vestium ap. Hebr.*, Viteb.; also in Ugolini, *Thes.* xxxiii.; Wichmannshausen, *De Corpore Scissuris figurisque non cruentando*, Viteb.; J. G. Michaelis, *De Incisura super mortuos*, in *Observatt. Sacr.*)—J. F. D.

#### MOUSE. [ACHBAR.]

**MOUTH** (פֶּה). The ordinary applications of this word, common to all languages, require no explanation; but the following somewhat peculiar uses may be noted: 'Heavy-mouthed,' that is, slow of speech, and so translated in Exod. iv. 10; 'smooth mouth' (Prov. xxvi. 28), that is, a flattering mouth; so also 'a mouth of deceit' (Ps. cix. 2). The following are also remarkable phrases: 'To speak with one mouth to mouth,' that is, in person, without the intervention of an

interpreter (Num. xii. 8; comp. 1 Kings viii. 15; Jer. xxxii. 4). 'With one mouth,' that is, with one voice or consent (Josh. ix. 2; 1 Kings xxii. 13; 2 Chron. xviii. 12). 'With the whole mouth,' that is, with the utmost strength of voice (Job xix. 16; Ps. lxvi. 17). 'To put words into one's mouth,' that is, to suggest what one shall say (Exod. iv. 15; Num. xxii. 38; xxiii. 5, 12; 2 Sam. xiv. 19, etc.) 'To be in one's mouth,' is to be often spoken of, as a law, etc. (Exod. xiii. 9; comp. Ps. v. 10; xxxviii. 15). The Hebrew also says, 'upon the mouth,' where we say, and indeed our translation says, *in* or *into* the mouth (e.g., Nah. iii. 12); that which is spoken is also said to be 'upon the mouth,' where we should say 'upon the lips' (as in 2 Sam. xiii. 32). 'To lay the hand upon the mouth' is to be silent (Judg. xviii. 19; Job xxi. 5; xl. 4; comp. Prov. xxx. 32), just as we lay the finger on the mouth to enjoin silence. 'To write from the mouth of any one' is to do so from his dictation (Jer. xxxvi. 4, 27, 32; xlv. 1).

The mouth, as the organ of speech, also signifies the words that proceed out of it, which in the sacred style are the same as commands and actions, because they imply the effects of the thoughts; words and commands being the means used to communicate decrees to those who are to execute them. Instances of this abound in Scripture, in various shades of application, but few of them are preserved in translation. Thus (Gen. xlv. 21), 'according to the commandment of Pharaoh,' is in the original, 'according to the *mouth* of Pharaoh' (comp., among numerous other examples, Num. iii. 16; Job xxxix. 27; Eccles. viii. 2). Hence, for a person or thing to come out of the mouth of another is to be constituted or commanded to become an agent or minister under a superior power: this is frequent in the Revelations (Rev. xvi. 13, 14; i. 16; xl. 4, 5; xii. 15; ix. 19). The term *mouth* is not only applied to a speech or words, but to the speaker (Exod. iv. 16; Jer. xv. 19), in which sense it has a near equivalent in our expression 'mouth-piece.'—J. K.

**MOWER AND MOWINGS.** The former of these words occurs as the rendering in the A. V. of מְקַצֵּר, in Ps. cxxix. 7, which is elsewhere rendered by 'reaper;' and the latter as the rendering of מְקַצֵּר, the plural of קָצַר, a *shearing* or *cutting* (Amos vii. 1). The 'king's cuttings,' in this latter passage, probably refer to some claim of the king to the earliest grass. In Ps. lxxii. 6, however, מְקַצֵּר designates the grass after it has been mown. Hay-making, in the sense of the term with which we are familiar, formed no part of the agriculture of Palestine.—W. L. A.

**MOZAH** (מֹזָה; Sept. Ἀμαζή; Alex. Ἀμωσά; Amosa), a town of Benjamin, mentioned only in Josh. xviii. 26, and grouped with Mizpeh and Chephirah. It probably lay on the western brow of the mountains, as Chephirah has been satisfactorily identified with the ruin of Kefir [CHEPHIRAH]. Schwartz, however, has attempted to show that Mozah stood on the site of the little village of *Kolonieh*, situated about half way between Kirjath-jearim and Jerusalem; relying on a statement of the Mishna (*Succa*, iv. 5) that there was a place called Mozah *below Jerusalem* (למטה ירושלים), whither the people went for willows on the Feast

of Tabernacles. The Rabbins add that the place was also named *Kolonia* (cf. Reland, *Pal.*, p. 903). No dependence can be placed on this theory, and the site of Mozah still remains unknown.—J. L. P.

MÜHLHAUSEN. [LIPMANN.]

MULBERRY-TREE. [BACA.]

MULE. [PERED.]

MÜNSTER (SEBASTIAN), was born in 1489 at Ingelheim, in the Palatinate. At sixteen years of age he went to Tübingen, where Stapfer and Reuchlin became his teachers. He then joined the order of the Franciscans, which, however, he left on embracing Protestantism. He was elected Professor of Hebrew and Theology at the university of Heidelberg, and subsequently at that of Basle, where he died of the plague in 1552. Besides being an eminent Hebraist, he was also an excellent mathematician. Yet his erudition is hardly more praised by his contemporaries than his modesty. His tombstone bore the inscription:—*Germanorum Esdras hic Straboque conditur?* His principal works relating to Biblical literature are:—*Biblia Hebraica, cum Latina translatione, adjectis insuper e Rabbino- rum Commentariis annotationibus; Calendarium bibl. hebr., ex Hebraeorum penetralibus editum; Higgaiion, logica R. Simonis, latine versa; Institutiones Grammaticae in hebr. linguam; Grammatica Ebraea; Institutio elem. Gram. Hebr.; Aruch dictionarium Chaldaicum; Hebraica Institutiones; Grammatica Chaldaica; Lexicon Hebr.-Chald.; Diction. trilingue, lat., graec., et hebr.; una cum append. de hebraicis quibusdam vocabulis . . . qui Rabbini sunt familiares.*—E. D.

MUPPIM (מֻפִּים; Μοφίμ; *Mophim*) is mentioned in Gen. xlv. 21 as the eighth of the ten sons of the patriarch Benjamin. This name does not occur in the other passages where Jacob's family are enumerated (comp. Num. xxvi. 38-41; 1 Chron. vii. 6-12; viii. 1-5). But commentators, not without reason, have held the name to be either a corruption of the SHUPHAM of Num. xxvi. 39, son of Benjamin, and head of a *mishpachah*, or clan, of the tribe of Jacob's youngest son (which name occurs in the reduplicate form of SHEPHUPHAN in 1 Chron. viii. 5), or a second name borne by the same person. We prefer the latter supposition, that Shupham or Shephuphan was also called Muppim; for it was not unusual for the same individual to bear more than one name, to designate some historical or local circumstance in the man's life (thus, in the present instance, the Targum of Jonathan makes the subject of our article bear the name of Muppim because 'he was sold into *Muph*,' whatever that may mean). Besides, there seems no evidence of corruption of text. The Samaritan reading, the Septuagint [Alex. varies but slightly, Μοφελν], the two Targums, the Syriac and the Vulgate, all agree in giving, more or less accurately, the Hebrew name מֻפִּים. This name is not likely to have been mistaken for the *Shuphan* (or, as it ought to have been rendered, *Shephuphan*, for the original is שֶׁפְּהוּפָן) of Num. xxvi. 39, or for the *Shephuphan* (שֶׁפְּהוּפָן) of 1 Chron. viii. 5. The idea of a corrupted form of the name may have arisen from the identification of the *Shuphan* of Numbers with the *Shuphim* (שֻׁפִּים) of 1 Chron. vii. 12. The 'Shuphim and Huphim' of this verse too greatly resemble

in sight and sound the 'Muppim and Huphim' of Gen. xlv. 21, not to tempt commentators to their favourite theory of identification. It is, however, to our mind extremely doubtful whether the *Shuphan* of Numbers be the same person as the *Shuphim* of 1 Chron. vii. The latter passage makes Shuphim a descendant of Benjamin of the fourth generation (Benjamin, Bela, Iri or Ir, Shuphim), whereas from the table in Numbers Shuphan is represented directly as a son of Benjamin, as Muppim is represented in Genesis. We have elsewhere observed [BECHER], on the use of the word 'SON' in these genealogies, how it is not confined to a lineal descendant of the first succession, but includes grandsons and even remoter generations; bearing this in mind we are not perplexed at finding the 'Muppim' of Genesis and the 'Shuphan' [Shephuphan] of Numbers described as, in each case, a son of Benjamin, whereas the 'Shephuphan' of 1 Chron. viii. is given as a grandson of the patriarch. This is after the manner of these tables, and may indicate that Muppim or Shephuphan, becoming the head of a flourishing family, was raised a step in fact in the family-scale, and took the place of a deceased or obscure uncle in the organisation of the Benjamite *Mishpachoth*, or clans. It is, however, worthy of note that the Septuagint, at the very first mention of Muppim (Gen. xlv. 21), expressly makes him, not son, but grandson of Benjamin, and son of Bela; this was probably the true relationship of the man. Assuming this, we are still a generation at fault with respect to the SHUPPIM of 1 Chron. vii. We therefore prefer to conclude that this person is not identical with the subject of our article. Supposing, indeed, that Shuphim (שֻׁפִּים) and Shupham (or rather Shephuphan, שֶׁפְּהוּפָן) be variations of the self-same family-name, there is nothing unreasonable in the belief that it was borne, as the tables in their present shape assert, by members of Benjamin's posterity in two successive generations, by Shuphan the uncle and Shuphim the nephew. [SHUPPIM.] See also Simonis, *Onomasticon*, pp. 219, 361, 362.—P. H.

MURDER. The sacredness of human life, arising out of the fact that man was made in the image and likeness of God, is emphatically proclaimed in Scripture; and the malicious taking away of that life is set forth as a crime deserving the last punishment. So deeply rooted in human nature is this conviction, that from the earliest times it was held as a settled principle, that 'whoso sheddeth man's blood by man shall his blood be shed;' and to this the divine sanction was fully given (Gen. ix. 5, 6). The exacting of life for life came to be regarded as a duty devolving upon the male nearest of kin to the party slain; and with this the Mosaic legislation interfered no further, than to impose upon the exercise of it such restraints as gave opportunity of escape to those who had taken life by accident or without malicious intent. [CITIES OF REFUGE; KINSMAN.] The principle of the Mosaic law was, that human life was to be sacredly protected; its peremptory enactment was, 'Thou shalt not kill,' Exod. xx. 13; Deut. v. 17; and the penalty of death was awarded to the violator of this law (Exod. xxi. 12, 14; Lev. xxiv. 17, 21; Num. xxxv. 16-18). For the man who had committed murder there was no asylum; even the altar of God did not protect him

Arabian women of the present day, 'that when they dance or sing in their harem, they always beat the corresponding time upon this drum' (*Reiseb.* i. 181). To this mode of performance belongs the 24th Psalm, which rests altogether upon the varied representation; in like manner, also, the 20th and 21st Psalms. This was all the change it admitted; and although it is very possible that this monotonous, or rather unisonous music, might not be interesting to ears tuned to musical progressions, modulations, and cadences, there is something in it with which the Orientals are well pleased. They love it for the very reason that it is monotonous or unisonous, and from Morocco to China we meet with no other. Even the cultivated Chinese, whose civilization offers so many points of resemblance to that of the ancient Egyptians, like their own music, which consists wholly of melody, better than ours, although it is not wholly despised by them (Du Halde's *China*, iii. 216).

A music of this description could easily dispense with the compositions which mark the time by notes; and the Hebrews do not appear to have known anything of musical notation; for that the accents served that purpose is a position which yet remains to be proved. At the best the accent must have been a very imperfect instrument for this purpose, however high its antiquity.\* Europeans had not yet attained to musical notes in the 11th century; and the Orientals do not profess to have known them till the 17th. On the other hand, the word סֵלָה, *selah*, which occurs in the Psalms and Habakkuk, may very possibly be a mark for the change of time, or for repeating the melody a few tones higher, or, as some think, for an accompaniment or after-piece of entirely instrumental music.

The Hebrew music is judged to have been of a shrill character; for this would result from the nature of the instruments—harps, flutes, and cymbals—which were employed in the temple-service.

The manner of singing single songs was, it seems, ruled by that of others in the same measure, and it is usually supposed that many of the titles of the Psalms are intended to indicate the names of other songs according to which these were to be sung [PSALMS].

There is a notion somewhat widely diffused, that in their sacred services the Hebrews dispensed with real melody, and contented themselves with such cantillation as they now use in their synagogues. This seems very doubtful. On such a subject it is not safe to argue from the practice of the modern Jews; and as singing is something so exceedingly simple and natural, it is difficult to believe that in

the solemn services of their religion they stopped at the point of cantillation. [It is certain, also, that the secular music of the Hebrews must have been different from mere cantillation. We cannot suppose that the music by which David charmed Saul, by which his court and that of Solomon was regaled, by which Elisha was elevated into the prophetic ecstasy, was of this inartificial and unimpressive kind.]

The allusions to music in the Scriptures are so incidental and concise, that it will never be possible to form out of them a complete or connected view of the state of musical science among the ancient Hebrews. The little knowledge which has been realised on the subject, has been obtained chiefly through the patient labours and minute investigations of the authors named at the end of the next article.—J. K.

MUSICAL INSTRUMENTS (כְּלֵי נָשִׁיר, or simply כְּלִים, κλύα). It is less difficult to deter-

mine the general character of the Hebrew instruments of music, than to identify the particular instruments which are named in the Hebrew Scriptures. We see certain instruments different from our own in use among the modern Orientals, and we infer that the Hebrew instruments were probably not unlike these, because the Orientals change but little, and we recognise in them the peoples, and among them the habits and the manners described in the Bible. We see other instruments represented in great variety in the sculptures and mural tablets of the Egyptians; and we conclude that the Hebrews had something similar, on account of their long sojourn among that people. We find also many instruments presented in the sculptures of Greece and Rome, and we need not refuse to draw inferences from them, for they derived their origin from the East, and the Romans distinctly refer them to Syria (Juv. *Sat.* iii.; Liv. *Hist.* xxxix. 5). When, however, we endeavour to identify with these a particular instrument named by the Hebrews, our difficulty begins; because the Hebrew names are seldom to be recognised in those which they now bear, and because the Scripture affords us little information respecting the form of the instruments which it mentions. There are some clues, however. It is likely that the Greeks and Romans retained the names of the instruments they derived from Syria, and these names have been preserved. The Orientals also have for the most part retained the original names of things really old; and by comparing these names with the Hebrew, and then examining the instruments to which they appear to belong, shall throw some glimmerings of light on the subject.

The matter naturally arranges itself under the following heads:—

#### I. Stringed Instruments.

#### II. Wind Instruments.

#### III. Instruments of Percussion.

I.—I. At the head of the STRINGED INSTRUMENTS, we must place the כִּנּוֹר, *kinnor*, which is rendered 'harp' in the A. V. The invention and first use of this instrument are ascribed to Jubal (Gen. iv. 21); and Laban names it among the instruments which should have celebrated the departure of his son-in-law (Gen. xxxi. 27). In the first ages the *kinnor* was consecrated to joy and

\* [At the same time it is obvious to remark, that if the Hebrews were careful to provide marks to regulate declamation, the probability is that they would be still more careful to provide a notation for the regulation of their music and the preservation of their melodies. Notation, it is true, becomes chiefly necessary where harmony is aimed at; and there can be no doubt that simple melodies can be taught and preserved for an indefinite period by mere practice. Still, it seems probable that some musical notation was in use among the Hebrews; though it cannot be shown that the accents served this purpose.]

exultation; hence the frequency of its use by David and others in praise of the Divine Majesty. It is thought probable that the instrument received some improvements from David (comp. Amos vi. 5). In bringing back the ark of the covenant (1 Chron. xvi. 5), as well as afterwards, at the consecration of the temple, the *kinnor* was assigned to players of known eminence, chiefly of the family of Jeduthun (1 Chron. xxv. 3). Isaiah mentions it as used at festivals along with the *nebel*; he also describes it as carried round by Bayaderes from town to town (xxiii. 16), and as increasing by its presence the joy of vintage (xxiv. 8). When Jehoshaphat obtained his great victory over the Moabites, the triumphal entry into Jerusalem was accompanied by the *nebel* and the *kinnor* (2 Chron. xx. 27, 28). The sorrowing Jews of the captivity, far removed from their own land and the shadow of the sanctuary, hung their *kinnors* upon the willows by the waters of Babylon, and refused to sing the songs of Zion in a strange land (Ps. cxxxvii. 2). Many other passages of similar purport might be adduced in order to fix the uses of an instrument, the name of which occurs so often in the Hebrew Scriptures. They mostly indicate occasions of joy, such as jubilees and festivals. Of the instrument itself, the Scripture affords us little further information than that it was composed of the sounding parts of good wood, and furnished with strings. David made it of the berosh-wood [BEROSI]; Solomon of the more costly algum (2 Sam. vi. 5; 2 Kings x. 12); and Josephus mentions some composed of the mixed metal called electrum. He also asserts that it was furnished with ten strings, and played with a plectrum (*Antiq.* vii. 12. 3); which, however, is not understood to imply that it never had any other number of strings, or was always played with the plectrum. David certainly played it with the hand (1 Sam. xvi. 23; xviii. 10; xix. 9), and it was probably used in both ways, according to its size.

That this instrument was really a harp is now very generally denied; and Pfeiffer, Winer, and other writers on the subject, conclude that it was a kind of guitar. This is entirely grounded on somewhat uncertain etymological derivations. Thus כִּנּוֹר is in the Septuagint translated by *κithára* and *κινύρα*; and by Aquila, Symmachus, and Theodotion always by *κithára*. Now the Greek *cithara*, it is argued, was a kind of guitar, from which the modern instrument so called, and its very name, *gittare*, *guitar*, is derived. The testimony of the Arabic is also adduced; for the name among the Arabians for instruments of the guitar kind is *tambúra*, and it happens that this is the very term by which the word *kinnor* is rendered in the Arabic version. When this kind of argument was used by Pfeiffer and others, it was not well known that the guitar was in fact an ancient Egyptian, as it is also a modern Oriental, instrument. It is frequently figured in the monuments. There is therefore little room to doubt that the guitar was known to the Hebrews, and probably in use among them. Notwithstanding this kind of evidence, the editor of the Pictorial Bible (on Ps. xliii. 4) ventured to suggest the greater probability, that the *lyre*, in some of its various kinds, was denoted by the word *kinnor*; and subsequent inquiry has tended to establish this conclusion as firmly perhaps as the nature of the subject admits. It is shown, first, that the *cithara*, which the Greek translators

appear to have had in view, was in fact originally the same as the lyre; in other words, the name *λύρα*, *lyra*, rarely occurs in the early Greek writers, that of *κithára* being far more common. But, about the time of Pindar, certain innovations were introduced, in consequence of which the lyre and *cithara* came to be used as distinctive words—the *lyre* denoting the instrument which exhibited the strings free on both sides, and the *cithara* that with the strings partly drawn over the sounding body. This latter instrument, preserving the shape of the lyre, and wholly distinct in form and arrangement from the guitar, resembling it only in this one point, should surely not be confounded with it, especially as antiquity had another instrument which more obviously belongs to the guitar species. If those who allege that the *kinnor* was a kind of guitar, mean merely that it was a species of lyre which in one point resembled a guitar, we do not differ from them; but if they allege that it had any general resemblance to the modern instrument, they remove it from the lyre class of instruments, which the authorities on which they rely will not allow. If, therefore, the word *κithára* denoted, when the Greek translators of the Bible lived, a species of lyre, which was the only lyre when the Hebrew Scriptures were written, it follows, that in using this word for the Hebrew *kinnor*, they understood and intended to convey that a lyre was signified. They also could not but know that the distinction between the *lyra* and *cithara* was of recent origin; and as the latter word had originally been a general term for the lyre, they must have felt it to be more strictly equivalent than *lyra* to the Hebrew *kinnor*. It may also be observed that all the uses of the *kinnor*, as described in Scripture, were such as were applicable to the lyre, and to the lyre only, of all the ancient instruments of music; most of them being egregiously inapplicable to the harp, and not very suitable to the guitar. And it must not be overlooked, that it is morally certain the Hebrews had the lyre, seeing that it was common

378. Egyptian figures of lyres. 1, 2, played without, and 3, 4, with the plectrum; 4, is the supposed Hebrew lyre.

among all their neighbours; and yet there is no other of their instruments but the *kinnor* with which

it can possibly be identified. The frequency of its occurrence in Scripture also corresponds with the preference given to it in most ancient writers. We are moreover inclined to place some reliance upon the Egyptian painting supposed to represent the arrival of Joseph's brethren in Egypt (No. 378, fig. 4). Here one of the men is playing on a lyre of somewhat peculiar shape; and if he be a Hebrew the instrument is undoubtedly a *kinnor*, as no other stringed instrument is mentioned till the time of David. This instrument has *seven* strings (the usual number of the lyre), which are partly drawn over the sounding body: this is the characteristic of that more ancient species of lyre called the *cithara*. The engravings 378 and 379 will give some idea of the varieties in form and strings which the lyre assumed among the Egyptians. There were probably similar differences among the Hebrews; for in concluding the *kinnor* to be the lyre, we have no wish to restrict it to any one particular instrument: we rather apprehend that it was a general term for all instruments of the lyre kind. If there was one instrument more than another on which the Hebrews were likely to pride themselves, and which should be regarded as their national instrument, it is the *kinnor*; and if they gave the figure of an instrument on any coin as a type of their nation, as the harp of Ireland, it would be this. Now the instrument which we do find on

379. Egyptian Lyres. 1. In the Leyden collection; 2. In the Berlin collection.

some coins ascribed to Simon Maccabæus is no other than a lyre (No. 383, fig. 3), and there can be little doubt that it was intended to represent the instrument known among the Hebrews by the name of *kinnor*. An instrument resembling the ancient lyre is also in use among the Arabians, bearing the name of *kussir* (derived perhaps from *kithara*). There is a figure of it in Niebuhr, and he saw no other instrument in the East which he felt disposed to identify with 'the harp of David' (*Reisebesch.* i. 179).

2. נָבֶל, *nebel*, is the next instrument which requires attention. The Greek *νάβλον* (*νάβλα*, *νάβλη*, *ναύλα*, or *νάβλας*) and the Latin *nablium*, *nablium* (or *nabla*), are obviously connected with or derived from the same source as the Hebrew word, and may afford some help in our search after the instrument. The word is rendered 'psaltery' in the A. V., in imitation of the Sept. translation of the Psalms and Nehemiah, which renders it by *ψαλτήριον*, with the exception of *ψάλμος* in Ps. lxxi. 22, and *κυθάρα* in Ps. lxxxi. 2. The Septuagint in the other books in which the word occurs,

renders it by *νάβλα*, or with a different ending *νάβλον*. As to when this instrument was invented, and when it came into use among the Hebrews, nothing can be determined with certainty. The first mention of it is in the reign of Saul (1 Sam. x. 5), and from that time forward we continue to meet with it in the O. T. It is, however, not found in the 3d chapter of Daniel, where mention is made of so many instruments: whence we may infer either that it did not exist among the Babylonians, or was known among them by another name. Indeed, among the Greeks and Latins the word *nablium* is not of frequent occurrence, and is only employed by the poets, who are generally fond of borrowing foreign names. The use of the instrument prevailed particularly in the public worship of God. David's own instrument was the *kinnor*; but he neglected not the *nebel*. It was played upon by several persons in the grand procession at the removal of the ark (1 Chron. xv. 16; xvi. 5); and in the final organization of the temple music it was entrusted to the families of Asaph, Heman, and Jeduthun (1 Chron. xxv. 1-7); Asaph, however, was only the overseer of the *nebelists*, as he himself played on the מְצִילַיִם, *metzillaim*. Out of the worship of God, it was employed at festivals and for luxurious purposes (Amos vi. 5). In the manufacture of this instrument a constant increase of splendour was exhibited. The first we meet with were made simply of the wood of the *berosh* (2 Sam. vi. 5; 1 Chron. xiii. 8), others of the rarer *algum* tree (1 Kings x. 12; 2 Chron. ix. 11); and some perhaps of metal (Joseph. *Antiq.* i. 8. 3), unless the last is to be understood of particular parts of the instrument.

Conjectures respecting the probable form of this instrument have been exceedingly various. Passing by the eccentric notion that the *nebel* was a kind of bagpipe, we may assume, from the evident tendency of the Scriptural intimations, and from the general bearing of other authorities, that it was composed of strings stretched over a wooden frame. This being assumed or granted, we must proceed to seek some hint concerning its shape; and we find nothing more tangible than the concurrent testimony of Jerome, Isidorus, and Cassiodorus, that it was like the Greek letter Δ inverted, ∇.

380. Egyptian triangular instruments.

The only instrument of this shape known to the older writers on the subject was the harp; which some of them (as Calmet) on this insufficient ground inferred to be the instrument intended. But since then vast additions to our knowledge of ancient musical instruments have been found in the tombs

of Egypt and the buried cities of Herculaneum and Pompeii. From these we learn two things—that the ancient harp was *not* shaped like the Greek  $\Delta$  inverted; and that there were stringed instruments, something between the harp and the lyre, which in their various forms bore a remarkable resemblance to that letter (No. 380). We feel assured that among these forms may be found the instrument which the fathers had in view, for they lived while they were still in use. They held it to be the same as the Hebrew *nebel*; and as we can, through the Egyptian monuments, trace the instrument up to early Scriptural times, this view certainly deserves considerable attention.

We are, however, far from thinking that the *nebel* was always of this shape. It appears to us to be a general name for various of the larger stringed instruments of the harp kind, and also to denote, in a more special sense, one particular sort: in other words, that the *nebel* was an instrument of a principal species, the name of which was applied to the whole genus. In fact, we have the names of several instruments which are generally conceived to be different varieties of the *nebel*. Before proceeding to these, we must express an opinion that one of these kinds, if not the principal kind, or the one most frequently denoted by the word, was the ancient harp, agreeing more or less with that represented in the Egyptian monuments. Whether the *nebel* or not, there can be little doubt that the Hebrews had such an instrument, although we may be unable to point out the precise word by which they described it. It is morally impossible that an instrument so common in Egypt, and of which the powers must have much exceeded that of any other instrument known to them, could have been neglected by a people whose stringed instruments of music were so various as those of the Hebrews. It may further be observed, that the use of this instrument as shown in the Egyptian paintings, agrees in all respects with that which the Scriptures refer to the *nebel*, so far as we can

381. Grand Egyptian harps.

gather any indications from them; and it is somewhat remarkable that the two great harps, in what is called Bruce's tomb, have respectively eleven and thirteen strings, being only one more and one less than the twelve assigned by Josephus to the *nebel*. These harps are shown in No. 381, and other varieties of the same instrument are figured in No. 382.

One of the classical traditions respecting the origin of the lyre refers it to an observation made upon the resonance of the gut-strings in the shell of a dried-up tortoise; another to a similar observation upon the twanging of a bow-string. These traditions have been deemed contradictory, from

being supposed to refer to one and the same instrument; but they are perfectly reconcilable when referred to two. The lyre, which we have already

382. Other forms of Egyptian harps.

sought to connect with the Hebrew *kinnor*, might have had the tortoise origin, and the instrument we have now in view might as obviously be referred to the bow and its string. That the latter has only lately become known to us through the Egyptian monuments sufficiently accounts for this confusion, and explains why no attempt has hitherto been made (except in the *Pictorial Bible*, note on Ps. cxxxviii. 2) to place the Egyptian harp among the musical instruments of the Hebrews. We have no desire to insist on its identity with the *nebel* in particular: but it is remarkable that whereas the *nebel* is in Scripture mentioned so as to show that it always or generally formed part of a band of instruments, so the Egyptian harp is usually seen to be played in concert with other instruments. Sometimes, however, it was played alone, or as an accompaniment to the voice, and a band of seven or more choristers frequently sang to it a favourite air, beating time with their hands between each stanza (Wilkinson, *Anc. Egypt.*, ii. 239). The principle of the bow was among the Egyptians extended to other instruments, which, from their smaller size and manner of being played, might be classed among lyres (No. 384). It is more than probable that these simple instruments were known to the Hebrews, although we are unable to discover the name by which they were called.

3. עֲסוֹר, *'asor*, occurs as an instrument in only a few places, and never but in connection with the *nebel*. This has given rise to the conjecture that the two instruments may have differed from each other only in the number of their strings, or the openings at the bottom. Hence we meet with the Sept. translation ἐν δεκαχόρδῳ, and in the Chaldee, Syriac, and Arabic, words expressing an instrument of *ten* strings, which is also followed in the A. V. (Ps. xxxiii. 2; cxlv. 9). We see no reason to dissent from this conclusion. Pfeiffer was inclined to think that the *'asor* may have been the quadrangular lyre which is represented in different varieties in ancient monuments, and which has usually ten strings, though sometimes more (No. 383, figs. 1, 2).

4. גִּתִּית, *gittith*, a word which occurs in the titles to Ps. viii., lxxxi., lxxiv., and is generally supposed to denote a musical instrument. From the name it has been supposed to be an instrument which David brought from Gath; and it has been inferred from Is. xvi. 10, that it was in particular

use at the vintage season. If an instrument of music, it is remarkable that it does not occur in the list of the instruments assigned by David to the

383. Miscellaneous stringed instruments.

temple musicians; nor even in that list which appears in verses 2 and 3 of Ps. lxxxi., in the title of which it is found. The supposition of Gesenius, that it is a general name for a *stringed instrument*, obviates this difficulty. The Septuagint renders the title by ὑπὲρ τῶν ληνῶν, 'upon the winepress,' and Carpzov, Pfeiffer, and others, follow this, in taking the word to denote a song composed for the vintage, or for the Feast of Tabernacles (Carpzov, *Observ. Philol. super Psalmos Tres עליהנות*, Helmst. 1758; Pfeiffer, *über die Musik*, p. 32).

5. מִנְיִם, *minnim*, which occurs in Ps. xlv. 8 and cl. 4, is supposed by some to denote a stringed instrument, but it seems merely a poetical allusion to the *strings* of any instrument. Thus in Ps. xlv. 8 we would read 'Out of the ivory palaces the *strings* (i.e., concerts of music) have made thee glad;' and so in Ps. cl. 4, 'Praise him with strings (stringed instruments) and *ugabs*.'

6. שַׁבְּכָה or שַׁבְּכָה, *sabca*, an instrument rendered 'sackbut,' and which occurs only in Dan. iii. 5, 7, 10, 15. It is doubtless the same as the stringed instrument of music denominated by the Greeks σαμβύκη, *sambúkēs*, *σαμβυξ*, *zambúkē*, and by the Latins *sambuca*. It seems to have been a species of harp or lyre, and, as some think, was only a species of the *nebel*, distinguished by the number of its strings. The able writer of the musical articles in Smith's *Classical Dictionary* thinks the sambuca was the same as the Egyptian harp, which we have already conjectured to be the particular instrument designated by the name *nebel*, or one of the instruments of the class so denominated. We should have no objection to regard this harp as being represented by the *sabca* as a species of the *nebel*; but we cannot see that any proof of the conjecture is adduced, and as the word only occurs in a list of Babylonian instruments, and never among those of the Hebrews, the identification would go to show that the latter had not the harp, for which conclusion we are by no means prepared.

As the intimations which can be collected respecting the sambuca amount to this, that it was a

large stringed instrument of a somewhat triangular shape, it may possibly have borne some resemblance to figs. 4 and 5, No. 383, which are copied from old writers on the subject, and which bear much resemblance to instruments such as the *khanoon* and *tchenk*, which continue to be common and popular in Syria, Arabia, Egypt, and Persia, and which correspond to both these conditions.

384. Bow-shaped Egyptian instruments.

7. פְּסַנְתֵּרִין or פְּסַנְתֵּרִין, *pesanterin*, the ψαλτήριον or psaltery of the Greeks. It occurs only in Dan. iii. 7, 10, 15, where it is supposed to represent the Hebrew *nebel*. The word ψαλτήριον is, however, applied by the Greek translators so arbitrarily to instruments which have different names in Hebrew, that nothing can be built upon its use; still less are we disposed to accept the conclusion of Gesenius, that the Chaldee word is in this instance formed from the Greek. The Chaldee name, and perhaps the instrument represented by it, may be recognised in the modern سَنْطِير, *santeer*, which is of the class already referred to as represented by figs. 3, 4, No. 383.

8. מַחְלָת, *machalath*, which occurs in the titles of Ps. liii. and lxxxviii., is supposed by Gesenius and others to denote a kind of lute or guitar, which instrument others find in the *minnim* above noticed. We should not like to affirm that instruments of this kind are represented by either of these words—not that we doubt whether the Hebrews had such instruments, but because we are not satisfied that these are the precise words by which they were denoted. The prevalence in the East of instruments of this sort would alone suggest the probability that the Jews were not without them; and this probability is greatly increased by the evidence which the Egyptian paintings offer, that they were equally prevalent in ancient times in neighbouring nations. Before this evidence

385. 1. A kind of guitar. 2. Ancient lute. 3. Arabian tanbur.

was obtained it was usual to offer figs. 1 and 3 in the preceding cut (No. 385), as affording probable examples of Hebrew instruments of this class; and fig. 3, from Niebuhr's *Travels*, as a modern Arabian

example. Objections were urged to these figures, which it would, until lately, have been difficult to answer. But now we find their prototypes among the ancient Egyptians. This will be seen from the subjoined engravings, a very cursory inspection of which will show the general resemblance of the above to the instruments represented in at least figs. 1, 3 (No. 386), or in other words, to instruments of the lute and guitar class. The Egyptian guitar consisted of two parts, a long flat neck or

386. Egyptian stringed instruments with necks.

handle, and a hollow oval body, composed wholly of wood, or covered with leather, whose upper surface was perforated with several holes to allow the sound to escape; over this body, and the whole length of the handle, extended three strings of catgut secured at the upper extremity. The length of the handle was sometimes twice, sometimes thrice that of the body, and the whole instrument seems to have measured three or four feet. It was struck with a plectrum, and the performers usually stood as they played. Both men and women used the guitar; some danced while they touched its strings (No. 386, fig. 2), supporting it on the right arm;

387. Egyptian stringed instruments with necks.

and in one instance (fig. 3) it is seen slung by a band round the neck, like the modern Spanish guitar. The others (No. 387) are variations of these instruments; in fig. 3 making a near approach to the lute. They are from actual and somewhat decayed specimens, and therefore do not exhibit the wires and other minute parts.

With all this evidence before us, we need not hesitate to conclude that the Hebrews were in possession of instruments of this kind, although

we may not venture to affirm by what name they were called.

II. WIND INSTRUMENTS.—There is, happily, less difficulty with respect to instruments of this class than with respect to stringed instruments. The most ordinary division of these is into trumpets and pipes, of which the Hebrews had both, and of various kinds.

1. קֶרֶן *keren*, 'horn,' sometimes, but not often, occurs as the name of a musical instrument (Josh. vi. 5; 1 Chron. xxv. 5; Dan. iii. 5, 7, 10, 15). Of natural horns, and of instruments in the shape of horns, the antiquity and general use are evinced by every extensive collection of antiquities. It is admitted that natural horns were at first used, and that they at length came to be imitated in metal, but were still called horns. This use and application of the word are illustrated in our 'cornet.' It is generally conceived that rams' horns were the instruments used by the early Hebrews; and these are, indeed, expressly named in our own and many other versions, as the instruments used at the noted siege of Jericho (Josh. vi. 5); and the horns are those of the ram, which Josephus assigns to the soldiers of Gideon (*Antiq.* v. 6. 5; comp. Judg. vii. 16).

The former of these passages requires some remark. The text is קֶרֶן יוֹבֵל *keren jobel* or *jobel*-horn. It is admitted that *jobel* means the *jubilee*, and in that case it would be jubilee-horn; and in the other verses of the chapter where trumpets are mentioned, with the epithet *jobelim* affixed, to denote 'jubilee-trumpets.' But then the translation 'rams' horn,' in verse 5, is sought to be justified on the ground that the jubilee itself took its name from the instruments with which it was proclaimed, and as these instruments are believed to have been rams' horns, the term has so been rendered in this text. In other words, the argument stands thus:—1. The jubilee was named from the instruments by which it was proclaimed. 2. These instruments were rams' horns. 3. Therefore *jobel* means a ram. It is, however, admitted that a ram is never called *jobel* in Hebrew: and an anecdote of R. Akiba implies that it was derived from an Arabian source. 'When I was in Arabia,' he says, 'I heard them call a ram *jobel*; and the trumpet itself is called *jobel*, because made of rams' horn.' It would be better, however, to translate it 'jubilee-horn' (see below, sec. 4). The text is not necessary to show that rams' horns were in use; the general belief of the Jews on the subject, and the existence of sculptured figures of ancient instruments imitated from the horns of rams, if not actually rams' horns, bring good evidence in favour of this opinion. Bochart, and a few others, contest this conclusion, on the ground that rams' horns are not suited to the purpose, and that the Greeks and Romans used the horns of neat cattle. Neither of these positions is tenable or of much weight, and the probability seems to be that *keren* was first, in its widest acceptation, the general name for instruments of the horn kind, and also the particular name for rams' horns, or the more crooked kind of horns, and were thus distinguished from the

2. שׁוֹפָר *shophar*, which is a far more common word than *keren*, and is rendered 'trumpet' in the A. V. This word seems, first, to denote horns of the straighter kind, including, probably, those

of neat cattle, and all the instruments which were eventually made in imitation of and in improvement upon such horns. It is, however, difficult

388. 1, 2, 3, 4. Ancient horns and curved trumpets; 5. Straight trumpet; 6. Pipe.

to draw a distinction between it and the *keren*, seeing that the words are sometimes used synonymously. Thus that which is called 'a jebel-horn' in Josh. vi. 5, is in the same chapter (ver. 4, 6, 8, 13), called a jebel-horn trumpet' (*shophar*). Upon the whole, we may take the *shophar*, however distinguished from the *keren*, to have been that kind of horn or horn-shaped trumpet which was best known to the Hebrews. The name *shophar* means *bright* or *clear*, and the instrument may be conceived to have been so called from its clear and shrill sound, just as we call an instrument a 'clarion,' and speak of a musical tone as 'brilliant' or 'clear.' In the service of God this *shophar* or trumpet was only employed in making announcements, and for calling the people together in the time of the holy solemnities, of war, of rebellion, or of any other great occasion (Exod. xix. 13; Num. x. 10; Judg. iii. 27; 1 Sam. xiii. 3; 2 Chron. xv. 14; Is. xviii. 3). The strong sound of the instrument would have confounded a choir of singers, rather than have elevated their music. At feasts, and exhibitions of joy, horns and trumpets were not forgotten (2 Sam. vi. 15; 1 Chron. xvi. 42). There is no reason to conclude that the trumpet was an instrument peculiar to the Levites, as some have supposed. If that were the case we should be unable to account for the 300 trumpets with which Gideon's men were furnished (Judg. vii. 8), and for the use of trumpets in making signals by watchmen, who were not always Levites. In Matt. vi. 2, we read, 'When thou dost thine alms, do not sound a trumpet before thee, as the hypocrites do in the synagogues, and in the streets, that they may have glory of men.' This verse has excited some speculation, and many have sought to illustrate it by reference to the custom of Eastern beggars of attracting attention by means of a musical instrument—a usage which, indeed, exists in England. But here it is the donor and not the beggar who is enjoined not to sound a trumpet; and Lightfoot, after examining the matter with his usual care, confesses that he can find no trace in the whole range of Hebrew literature, of a trumpet being sounded in connection with public or private almsgiving (*Hor. Hebr.* on Matt. vi. 2). It is therefore safest to suppose the expression derived by an easy meta-

phor from the practice of using the trumpet to proclaim whatever was about to be done, in order to call attention to it and make it extensively known.

3. חֲצֹצֶרֶת, *chatzotzerah*. This was the straight trumpet, different from the *shophar*, which was more or less bent like a horn. There has been various speculation on the name; but we are disposed to assent to the conclusion of Gesenius, that it is an onomatopoetic word, imitating the broken pulse-like sound of the trumpet, like the Latin *taralantara*, which this word would more resemble if pronounced as in Arabic, *haddêderah*. Among the Israelites these trumpets were a divine regulation, Moses having been expressly directed how to make them (Num. x. 2). They were of pure beaten silver, but the particular form does not appear in Scripture. The words בְּחֲצֹצֶרֶת וּקוֹל שׁוֹפָר, 'with *chatzotzereth* and voice of the *shophar*' (Ps. xcvi. 6), brings together names which most translators confound under that of 'trumpet,' and obliges them for once, at least, to draw a distinction between the two. The A. V. here has 'with

389. Ancient Egyptian trumpets.

trumpets and the sound of the cornet,' which clearly intimates that the translator considered the *shophar* a kind of horn, though usually called a trumpet. The Sept. draws the distinction very nicely—ἐν σάλπιγγιν ἐλαταῖς, καὶ φωνῇ σάλπιγγος κερατίνης, 'with ductile trumpets, and the sound of horn-trumpets,' which is closely copied by the Vulgate, 'in tubis ductilibus, et voce tubæ corneæ.' The idea conveyed of the *chatzotzerah* in these translations is, that these trumpets were of wrought or ductile silver, and drawn out in length; with this some combine a reference to the signification of the word מִקְשָׁה, *mikshah*, applied to these trumpets in the original description in Num. x. 2, which they understand to mean 'turned' or 'rounded,' and hence infer that they were not merely drawn out in length but turned back upon themselves like a trombone. Some German writers, indeed, directly call the instrument a trombone, as De Wette, who, in his translation of the Psalms, renders the line under notice 'Mit trompeten, mit posauen-klang,' that is, 'with trumpets, with trombone-sound.' And Pfeiffer, pressing upon this signification, gives the figure of an Oriental instrument of this kind called the *sumara*, as a possible representative of the *chatzotzerah*. We assign little weight to all this. It seems clear that these instruments were

long trumpets of solid wrought silver; and as it appears that these are the only musical instruments undoubted representations of which are preserved, there ought to be no question on the subject. These silver trumpets are figured on the arch of Titus, among the other spoils of the Jewish Temple (Fig. 5, No. 388), and they correspond with the description which Josephus, who, as a priest, could not in this matter be mistaken, has given: 'Moses,' he says, 'invented a kind of trumpet of silver; in length it was little less than a cubit, and it was somewhat thicker than a pipe; its opening was oblong, so as to permit blowing on it with the mouth; at the lower end it had the form of a bell, like the horn,' *σάλπιγξ* (*Antiq.* iii. 12). Moses was commanded to make only two of these trumpets, because there were then but two priests, the two sons of Aaron. Afterwards far more of them were made; and Josephus ventures to say that Solomon made 200,000 of them, according to the command of Moses (*Antiq.* viii. 3). When, however, riches departed from Palestine, trumpets of baser metal were used (2 Kings xii. 13), although probably a certain number of silver were still preserved. They were used in calling the congregation together for sacrifices, and in battle (Hos. v. 8). The tone of this trumpet, or rather the noise made by blowing on it, was very variable, and is distinguished by different terms in Scripture.

4. *יובל*, *jôbél*. There has been much speculation concerning this term, which the reader may find in ample abundance in Bochart (*Hieroz.* i. 436). It seems now to be agreed that the word does not denote a separate instrument, but is an epithet applied to the trumpets with which the jubilees were proclaimed, i. e., the 'jubilee-trumpet;' and as the same trumpets were used for signals and alarms, 'the alarm-trumpet, the alarm-horn.' This name for the sound of music is supposed to be derived from Jubal, the inventor of instruments of music.

Wind instruments of softer sound next require attention. The first and principal of these is the

5. *חליל*, *chalil*, the meaning of which is *bored through*, and denotes a pipe, perforated and furnished with holes. The Sept. always renders it by *αὐλός*, a pipe or flute. There are but five places where it occurs in the O. T. (1 Sam. x. 5; 1 Kings i. 40; Is. v. 12; xxx. 29; Jer. xlviii. 36); but the Greek *αὐλός* occurs in the N. T. (Matt. ix. 23), and in the Apocryphal books (1 Maccab. iv. 54; ix. 39; Judith iii. 7). It would seem to have come rather late into use among the Hebrews, and probably had a foreign origin. The passages to which we have referred will indicate the use of this instrument or class of instruments; but of the form

390. Egyptian reed-pipes.

we can only guess by reference to those of the ancient Egyptians, which are very similar to those still in use in Western Asia. The pipe is, however, rarely introduced in the Egyptian sculptures, and does not seem to have been held in much estimation. The principal are the single and double pipes. The single pipe of the Greeks is allowed

to have been introduced from Egypt (J. Pollux, *Onom.* iv. 10; Athenæus, *Deipnos.* iv.), from which the Jews probably had theirs. It was a straight tube, without any increase at the mouth, and when played was held with both hands. It was usually of moderate length, about eighteen inches, but occasionally less, and sometimes so exceedingly long and the holes so low that the player was obliged to extend his arms to the utmost. Some had three holes, others four, and actual specimens made of common reed have been found (Wilkinson, *Ancient Egyptians*, ii. 309).

391. 1, 2, 3. Single pipes; 4. Double pipe.

The double pipe was formed with two of such tubes, of equal or unequal lengths, having a common mouth-piece, and each played with the corresponding hand. They were distinguished as the right and left pipes, and the latter, having but few holes, and emitting a deep sound, served as a bass; the other had more holes and gave a sharp sound (Plin. *Hist. Nat.* xvi. 36). This pipe is still used in Palestine. The Scottish missionary deputation overtook, among the hills of Judah, 'an Arab playing with all his might upon a shepherd's pipe, made of two reeds. This was the first time we had seen any marks of joy in the land' (*Narrative*, p. 118).

From the references which have been given, it will be seen that the pipe was, among the Jews, chiefly consecrated to joy and pleasure. So much was this the case, that in the time of Judas Maccabæus the Jews complained 'that joy was taken from Jacob, and the pipe with the harp (*κυθάρα*) ceased' (1 Maccab. iii. 45). It was particularly used to enliven the periodical journeys to Jerusalem to attend the great festivals (Is. xxx. 29); and this custom of accompanying travelling in companies with music is common in the East at this day (Harmer, *Observatt.* ii. 197; to which add Tournefort, *Voyage du Levant*, iii. 189). Athenæus (iv. 174) tells us of a plaintive pipe which was in use among the Phœnicians. This serves to illustrate Matt. ix. 23, where our Saviour, finding the flute-players with the dead daughter of the ruler, orders them away, because the damsel was not dead, and in this we also recognise the regulation of the Jews, that every one, however poor he might be, should have at least two pipes (*חלילים*) at the death of his wife (Lightfoot, *Hor. Hebr. ad Matt.* ix. 23). [MOURNING.]

6. *מישרוקיתא*, *mishrokiṭhā*. This word occurs four times in Daniel (chap. iii. 5, 7, 10, 15), but nowhere else, and appears to be the Chaldean name for the flute with two reeds, of which we have already spoken. If that double pipe be not comprehended under the Hebrew *chalil*, then we

may consider that we have it here. The Sept. and Theodotion render it by *σύριγξ*, *syrix*, which is the name of the Pandæan pipe. This would imply that it had at least more than one reed; and if it really denotes the Pandæan pipe itself, the word is to be regarded as the Chaldaean name of the instrument called by the Hebrews *עוגב*, *ugab*, which was undoubtedly the *syrix*. This is the more probable from the fact that the Hebrew translator actually renders *mishrokitha* by *ugab*.

It may, however, have differed from the common *ugab*; and some writers on the subject have been disposed to regard it as similar to the instrument represented in the annexed cut (No. 392, fig. 1). This is constructed somewhat on the principle of an organ, being composed of pipes of various sizes, fitted into a kind of modern chest, open at top, and stopped at the bottom with wood covered by a skin; wind was conveyed to it from the lips by means of a pipe fixed to the chest; the pipes were of lengths musically proportioned to each other, and the melody was varied at pleasure, by stopping or unstopping the apertures at the upper extremity. We are not, however, satisfied with the evidence which makes this instrument, or the modification of it in fig. 2, to have been known to either the ancient Hebrews or the Babylonians.

392.

7. *עוגב*, *'ugab*, is the word rendered 'organ' in our version. This and the *kinnor* are the instruments whose invention is ascribed to Jubal (Gen. iv. 21), and higher antiquity cannot therefore be claimed for any instrument. There are only three other places in which it is mentioned in the O. T.; two in the book of Job (xxi. 12; xxx. 31), and one in the Psalms (cl. 4). The Targum renders the word simply by *אֲבוּבָה*, *a pipe*; the Septuagint varies, it has *κithara* in Genesis, *ψάλμος* in Job, and *ὄργανον* in the Psalms. The last is the sense which the Arabic, Syriac, Latin, English, and most other versions have adopted. The *organon* simply denotes a double or manifold pipe; and hence, in particular, the Pandæan or shepherd's pipe, which is at this day called a 'mouth-organ' among ourselves. Formerly it was called simply 'organ,' and 'mouth' has been added to distinguish it from the comparatively modern instrument which has usurped the more simple designation of 'organ.' Our translators are thus not chargeable

with the obscurity which has since arisen, for they, by the word 'organ,' intended to indicate no other instrument than this. We thus find a tolerably fair concurrence on the subject among the translations which we are accustomed to respect. The grounds of their conclusion are to be sought in the etymology of the Hebrew word; and, so far as these go, which is not very far, they tend to support it. To these probabilities the known antiquity of the Syrian *syrix* (*σύριγξ*) or Pandæan pipe may be added. The instrument is in fact so old that the profane writers do not know to whom to ascribe it. Some refer it to Pan (Virgil, *Ecl.* ii.), others to Mercury (Pind. *Od.* xii. *de Pallade*), others to Marsyas and Silenus (Atheneus, iv. 182). This antiquity corresponds with the Scriptural intimation concerning the *'ugab*, and justifies us in seeking for the *syrix* among the more ancient instruments of the Orientals, especially as it is still common in Western Asia. Niebuhr saw it in the hands of a peasant at Cairo (*Reisebesch.* i. 181); and Russell, in his *Nat. Hist. of Aleppo* (i. 155, 156), says that 'the *syrix* or Pan's pipe is still a festival instrument in Syria; it is known also in the city, but very few performers can sound it tolerably well. The higher notes are clear and pleasing, but the longer reeds are apt, like the dervise flute, to make a hissing sound, though blown by a good player. The number of reeds of which the *syrix* is composed, varies in different instruments from five to twenty-three.' The classical *syrix* is usually said to have had seven reeds (Virg. *Ecl.* ii.); but we find some in the monuments with a greater number, and the shepherd of Theocritus (*Id.* viii.) had one of nine reeds.\*

\* [That the *'ugab* in its earlier forms was as above described is most probable. But it does not follow from this that it never was brought into a more perfect state, so as to approach at least to the organ, the principle of which lies in the Pan-pipe. That the Greeks and Romans had the hydraulic organ is undoubted (Meister, *De Vel. Hydraulico*, in the *Nov. Comm. Soc. Götting.*, ii. 158; and the treatise in Ugolino, *Thes.* xxxii.); and if the Greeks and Romans had organs why not the Hebrews, a much more musical people than either of them? Certain it is that an instrument bearing this name, and described as a bag made of two elephants' skins joined together, and by fifteen smith's bellows, from which the sound escaped through twelve brazen pipes with a noise like thunder, was known to St. Jerome; and he adds concerning it, 'sic apud Hebræos de organis quæ ab Jerusalem usque ad montem Olivati et amplius sonitu audiuntur comprobatur' (*Ep. ad Dardanum*, *Opp.* iv. 99). In the Talmudic writings, mention is made of an instrument called *Magrepha* (מַגְרֵפָה), used in the temple, having ten openings (נִקְבִּים), each of which produced ten kinds of notes (זְמֵר מִיָּנִי), so that in all a hundred tones were produced (Talm. Bab. *Erachin*, fol. 10, c. 2, f. 11, c. 1, cited by Forkel, p. 138). That this was not the hydraulic organ of the Greeks, but a more perfect instrument, appears from the statement that there was

no *hydraulis* (הַדְרוּלִים) in the temple 'because its sound is mixed and confuses the melody,' or, as the words may be and probably ought to be rendered, 'because its sound is sweet and sweetens (*i.e.*, renders too dulcet for the majestic music of the

III. INSTRUMENTS OF PERCUSSION,—or such as give forth their sounds on being struck or shaken.

1. תוף, *toph*, seems to have denoted primarily the tambourine, and generally all instruments of the drum kind which were in use among the Israelites. There is not the slightest doubt about this instrument. All the translations and lexicons agree in this one point; and we have, besides, the actual evidence of existing instruments of this kind among the Arabians, bearing the same name in the forms of *doff* and *adufe*. The *toph* was known to the Jews before they quitted Syria (Gen. xxxi. 27); it is also mentioned by Job (xxi. 12), and it is the first instrument named after the exode, being that with which Miriam led the dances with which the daughters of Israel celebrated the overthrow of Pharaoh (Exod. xv. 20). It was employed by David in all the festivities of religion (2 Sam. vi. 5). Isaiah adduces it as the instrument of voluptuaries, but left in silence amid wars and desolations (Is. xxiv. 8). The occasions on which it was used were mostly joyful, and those who played upon it were generally females (Ps. lxxviii. 25), as was the case among most ancient nations, and is so at the present day in the East. It is nowhere mentioned in connection with battles or warlike transactions. The usages of the modern East might adequately illustrate all the Scriptural allusions to this instrument, but happily we have more ancient and very valuable illustration from the monuments of Egypt. In these we find that the tambourine was a favourite instrument, both on sacred and festive occasions. There were three kinds, differing, no doubt, in sound as well as form; one was circular, another square or oblong, and the third consisted of two squares separated by a bar. They were all beaten by the hand, and often used as an accompaniment to the harp and other instruments. The tambourine was usually

393. Tambourines. 1. Angular; 2. Circular.

played by females, who are represented as dancing to its sound without the accompaniment of any other instrument. The imperfect manner of representation does not allow us to see whether

temple) the melody' (מפני שקולו ערב ומעורב), אהת הנעימה, Talm. Bab. *l.c.*; Talm. Hieros. *Succa*, p. 55; comp. Athen. *Deipnos*, iv. 23). From this it seems not extravagant to conclude that the invention of the organ, as we now have it, is due to the Hebrews, and from them was adopted by the Christians (Saalschütz, *Archæol.* i. 2).]

the Egyptian tambourine had the same movable pieces of metal let into the wooden frame which we find in the tambourines of the present day. Their presence may, however, be inferred from the manner in which the tambourine is held up after being struck; and we know that the Greek instruments were furnished with balls of metal attached by short thongs to the circular rim (Wilkinson, *Ancient Egyptians*, ii. 314).

At mournings for the dead the tambourine was sometimes introduced among the Egyptians, and the 'mournful song' was accompanied by its monotonous sound. This is still a custom of the East, and probably existed among the Jews.

Whether the Israelites had drums or not does not clearly appear, and in the absence of evidence *pro* or *con* it is useless to speculate on the subject. If they had, they must be included under the general name of *toph*. The ancient Egyptians had a long drum, very similar to the tom-toms of India (No. 394, figs. 1, 3). It was about two feet or two feet and a half in length, and was beaten with the hand. The case was of wood or copper, covered at both ends with parchment or leather, and braced with cords extended diagonally over the exterior of the cylinder. It was used chiefly in war. There was another larger drum, less

394. Ancient Egyptian drums.

unlike our own; it was about two feet and a half long by about two feet broad, and was shaped much like a sugar cask (No. 395, fig. 3). It was formed of copper, and covered at the ends with red leather, braced by cat-gut strings passing through small holes in its broad margin. This kind of drum was beaten with sticks (fig. 5). It does not appear on the monuments, but an actual specimen was found in the excavations made by D'Athanas, in 1823, and is now in the museum at Paris.

Another species of drum is represented in the Egyptian paintings, and is of the same kind which is still in use in Egypt and Arabia, under the name of the *darabooka* drum. It is made of parchment stretched over the top of a funnel-shaped case of metal, wood, or pottery (No. 395, figs. 1, 2, 4). It is beaten with the hand, and when relaxed, the parchment is braced by exposing it for a few moments to the sun, or the warmth of a fire. This kind of drum claims particular attention from its being supposed to be represented on one of the coins ascribed to Simon Maccabæus (No. 397, fig. 5). When closely examined, this instrument will appear to be the same in principle with our kettle-drum, which, indeed, has been confessedly derived from the East, where other

instruments on the same principle are not wanting. One of them (No. 397, fig. 4) is just the same as

395. Drums. 1, 2, 4. Modern Oriental; 3. Ancient Egyptian; 5. Sticks to 3.

the instrument we have derived from it: others are smaller in various degrees, are of different forms, and are tapped lightly with the fingers. Such drum-tabrets were not unknown to the ancient Egyptians, as may be perceived by fig. 2, No. 394.

The *Magrapha* of which the Rabbins speak, and which stood, they say, in the temple court, and was used to call the priests to prayer, the Levites to singing, and leprous persons to their purification, and the sound of which, they venture to add, could be heard from Jerusalem to Jericho (Buxtorf, *Lex. Rabbin.*, s. v. *מגריפה*), has by some been supposed to be a species of drum. This, however, is improbable. [See note on p. 255, ante.]

2. *פִּעֲמוֹן*, *phaamon*. This name nowhere occurs but with reference to the small golden appendages to the robe of the high-priest (Exod. xxviii. 33; xxxix. 25), which all versions agree in rendering 'bells,' or 'little bells.' These bells were attached to the hem of the garment, and were separated from each other by golden knobs, shaped like pomegranates. They obviously produced their tinkling sound by striking against the golden knobs which were appended near them. There is no trace of bells among the ancient Egyptians, or in classical antiquity, and we call these such for want of a better term to describe sonorous pieces of metal used in this manner.

3. *מִצְלִיחִים*, *metzillatim*, *מִצְלִיחִים*, *metzillatim*. These words are translated *cymbals* in most versions, except in Zech. xiv. 20, where they are rendered 'bells'—the 'bells of the horses.' If the words, however, denote cymbals in other places, they cannot well denote a different thing here. It is true that camels, and sometimes horses, wear bells in the East at present; and it is probable that the Hebrews had something similar in the shape of small cymbal-shaped pieces of metal, suspended under the necks of the animals, and which struck against each other with the motions of the animal. The Romans attached metallic pendants of this kind, called *phalarea*, to their war-horses, in order to produce a terrific effect when shaken by the rapid motions of the animal. These were certainly not bells, but might without any violent impropriety be called cymbals, from the manner in which they struck against each other. This is the single doubtful text; in all the other texts we may conclude with reasonable certainty that cymbals, and sometimes castagnets (which are small cymbals), are intended. There is an important passage (Ps. cl. 5), 'Praise him with the clear cymbal, praise him with the resounding cymbal,' which clearly points to two

instruments under the same name, and leaves us to conclude that the Hebrews had both hand-cymbals and finger-cymbals (or castagnets), although it may not in all cases be easy to say which of the two is intended in particular texts. Cymbals figure in the grand procession at the removal of the ark (1 Chron. xiii. 8); other instances occur of their being used in the worship of God (Neh. xii. 27; Ps. cl. 5; 1 Chron. xvi. 19); and the illustrious Asaph was himself a player on the cymbal (1 Chron. xvi. 5). The sound of these instruments is very sharp and piercing, but it does not belong to fine, speaking, expressive music. Hence Paul could describe it by the word *ἀλαλᾶζον*, 'clanging' (1 Cor. xiii. 1). The Hebrew instruments were probably similar to those of the Egyptians. These were of mixed metal, apparently brass, or a compound of brass and silver, and of a form exactly resembling those of modern times, though smaller, being only seven inches or five inches and a half in diameter. The handle has disappeared from the existing specimens, but is supposed to have been of the same material, bound with leather or string, and being inserted in a small hole at the summit, to have been secured by bending back the two ends (No. 396, fig. 3). The same kind of instrument is still used by the modern inhabitants of

396. Cymbals—Egyptian.

Egypt, and from them, says Wilkinson, 'have been borrowed the very small cymbals played with the finger and thumb, which supply the place of castagnets in the *almeh* dance' (*Ancient Egypt*, iii. 255). In thus calling instruments used as castagnets 'small cymbals,' this author incidentally supports the view we have taken. The modern castagnet, introduced into Spain by the Moors, is to be referred to the same source.

397. Instruments of Percussion. 1. Mallet used in striking suspended boards; 2. Castagnets; 3. Tabret-drum, struck by attached balls; 4. Oriental kettle-drum; 5. Supposed ancient Jewish coin representing drums.

4. *שְׁלִישִׁים*, *shalishim*. This word occurs but once, viz. in 1 Sam. xviii. 6, and is there uncertain.

tainly rendered, in the A. V., 'instruments of music,' and in the margin 'three-stringed instruments.' The word is plural, and means 'threes.' Most writers, proceeding upon this interpretation, identify it with the triangle, which Athenæus (iv. 23) alleges to have been a Syrian invention. We have no Egyptian representation of it, but that people had instruments which are not figured on the existing monuments. As this was the instrument with which the damsels of Israel came forth to meet the victorious David, the ancient translators have usually rendered the word by cymbals or castagnets, which seemed to them more proper to women. But the triangle may not the less have been suited to a military triumph, and as an accompaniment to the other instruments used on that occasion. Jerome has *sistra*, an idea which has received little attention from commentators; but if we had not preferred to find the *sistrum* under another word, we would not hesitate to accept this conclusion, founded, as it manifestly is, on the *three* transverse movable bars with which the *sistra* are usually furnished. In Barker's Bible (1595), the word is rendered by 'rebecke.'

5. מִנְעָנֵים, *menaaneim*. This is another word which occurs but once in Scripture (2 Sam. vi. 5), where our version translates it by 'cymbals,' although it has appropriated another word to that instrument. It is now more generally thought to denote the *sistrum*, and appears to be derived from נָנַע, *nua*, 'to shake,' or 'to vibrate,' corresponding to the etymology of the *sistrum* (σίστρον), from σείω. An objection has indeed been

made, that the word is mostly furnished with sacred symbols, and were chiefly used by the priests and priestesses in the ceremonies of religion, particu-

399. Sistra—various Egyptian specimens.

larly in those connected with the worship of Isis (Plut. *de Isid.*, c. 63; Juven. xiii. 93; Jablonsky, *Opusc.* i. 306). MUSTARD-TREE. [SINAPIS.]

MUTHLABBEN. [PSALMS.]

MYNDUS (Μύνδος), a town of Caria, between Miletus and Halicarnassus (1 Maccab. xv. 23). It is mentioned by Herodotus (v. 33), Strabo (xiv. p. 658), and Arrian (*Alex.*, i. 21), and seems to have been a place favourable for trade; which may account for the number of Jews who had settled there. Diogenes Laertius (vi. 2. 57) records a *bon mot* of Diogenes, the cynic, of which it is the theme. Seeing its huge gates, while the city itself was but small, he exclaimed, 'Men of Myndus, shut the gates, lest the city walk out of them!'—W. L. A.

MYRA (Μύρα), one of the chief towns of Lycia, in Asia Minor. It lay about a league from the

398. Instruments of Percussion. 1, 3, 6. Triangular and other rods of metal charged with rings; 2. A supposed Hebrew instrument, regarded by some as the *Menaaneim*; 4. A kind of Eastern cymbals; 5. A pan of sounding metal.

urged, that the *sistrum* was not sufficiently ancient; but this has been set at rest by the recent discoveries in Egyptian antiquities, which have revealed *sistra* belonging to the most ancient period. The *sistrum* was generally from eight to sixteen or eighteen inches in length, and entirely of bronze or brass. It was sometimes inlaid with silver, gilt, or otherwise ornamented, and being held upright was shaken, the rings moving to and fro upon the bars. The last were frequently made to imitate snakes, or simply bent at each end to secure them from slipping through the holes. Several actual specimens of these instruments have been found, and are deposited in the British, Berlin, and other

sea (in N. lat. 36° 18': E. long. 30°), upon a rising ground, at the foot of which flowed a navigable river, with an excellent harbour at its mouth (Strabo, xiv. p. 665; Pliny, *Hist. Nat.* xxxii. 8). The town now lies desolate. When Paul was on his voyage from Caesarea to Rome, he and the other prisoners were landed here, and were embarked in a ship of Alexandria bound to Rome (Acts xxvii. 5).—J. K.

MYRRH. [MOR; LOT.]

MYRTLE. [HADAS.]

MYSIA (*Μυσία*), a province occupying the north-west angle of Asia Minor, and separated from Europe only by the Propontis and Hellespont; on the south it joined Æolis, and was separated from the east from Bithynia by the river Æsopus. Latterly Æolis was included in Mysia, which was then separated from Lydia and Ionia by the river Hermus, now Sarabad or Djedis (Strabo, xii. 562; xiii. 628; Pliny, *Hist. Nat.*, v. 32; Ptol. *Geog.* v. 2). In ancient times the province of Mysia was celebrated for its fertility in corn and wine, and although now but poorly tilled, it is still one of the finest tracts in Asia Minor. Paul passed through this province, and embarked at its chief port, Troas, on his first voyage to Europe (Acts xvi. 7, 8; Rosenmüller, *Bibl. Geog.*, iii. 32; Winer, *Bibl. Realwörterb.* s. v. *Mysia*; Richter, *Wallfahrten*, p. 460).—J. K.

MYSTERY (*μυστήριον*). A sense is often put upon this word, as if it meant something absolutely unintelligible and incomprehensible; whereas, in every instance in which it occurs in the Sept. or N. T., it is applied to something which is *revealed*, declared, explained, spoken, or which may be known or understood. This fact will appear from the following elucidation of the passages in which it is found. First, it is sometimes used to denote the meaning of a symbolical representation, whether addressed to the mind by a parable, allegory, etc., or to the eye by a vision, etc. (Matt. xiii. 10, 11, 16; Mark iv. 11, where our Lord applies the term 'mysteries' to the *moral* truths couched under a parable, that is, to its figurative meaning; comp. also Rev. i. 12, 16, 20; xvii. 3-6). When St. Paul, speaking of marriage, says, 'this is a great mystery' (Eph. v. 32), he evidently treats the original institution of marriage as affording a figurative representation of the union betwixt Christ and the church (Campbell, *Dissertation*, p. 10, part iii. sec. 9). 2. The word is also used to denote anything whatever which is hidden or concealed, till it is explained. The Sept. uses it to express *סֵּתֶר* or *סֵּתֶר*, a secret (Dan. ii. 19, 27, 28, 29, 30, 47; iv. 6), in relation to Nebuchadnezzar's dream, which was a secret till Daniel explained it, and even from the king himself, for he had totally forgotten it (ver. 5, 9). Thus the word is used in the N. T. to denote those doctrines of Christianity, general or particular, which the Jews and the world at large did not understand, till they were revealed by Christ and his apostles, 'Great is the mystery of godliness,' *i. e.*, the Christian religion (1 Tim. iii. 16), the chief parts of which the apostle instantly proceeds to adduce—'God was manifest in the flesh, justified by the Spirit, seen of angels,' etc.—facts which had not entered into the heart of man (1 Cor. ii. 9) until God visibly accomplished them,

and revealed them to the apostles by inspiration (ver. 10). Thus, also, the gospel in general is called 'the mystery of the faith' (1 Tim. iii. 9), and 'the mystery which from the beginning of the world had been hid with God, but which was now made known through means of the church' (Eph. iii. 9); the mystery of the gospel which St. Paul desired 'to make known' (Eph. vi. 19); 'the mystery of God, and of the Father, and of Christ,' to the full apprehension or understanding of which (rather than 'the acknowledgment') he prayed that the Colossians might come (Col. ii. 2; comp. the use of the word *ἐπίγνωσις*, 1 Tim. ii. 4; 2 Tim. iii. 7); which he desired the Colossians to pray that God would enable himself and his fellow-apostles 'to speak and to make manifest' (Col. iv. 3, 4); which he calls 'the revelation of the mystery which was kept secret since the world began, but now is made manifest and known to all nations' (Rom. xvi. 25); which, he says, 'we speak' (1 Cor. ii. 7), and of which the apostles were 'stewards' (1 Cor. iv. 1). The same word is used respecting certain particular doctrines of the gospel, as, for instance, 'the partial and temporary blindness of Israel,' of which mystery 'the apostle would not have Christians ignorant' (Rom. xi. 25), and which he explains (ver. 25-32). He styles the calling of the Gentiles 'a mystery which, in other ages, was not made known unto the sons of men, as it is now revealed unto the holy apostles and prophets by the Spirit' (Eph. iii. 4-6; comp. i. 9, 10, etc.) To this class we refer the well-known phrase, 'Behold I show you a mystery' (1 Cor. xv. 51), 'we shall all be changed;' and then follows an explanation of the change (ver. 51-55). Even in the case of a man speaking in an unknown tongue, in the absence of an interpreter, and when, therefore, no man understood him, although 'by the Spirit he was speaking mysteries,' yet the Apostle supposes that the man so doing understood what himself said (1 Cor. xiv. 2-4). And in the prophetic portion of his writings 'concerning the mystery of iniquity' (2 Thess. ii. 7), he speaks of it as being ultimately 'revealed' (ver. 8). Josephus applies nearly the same phrase, *μυστήριον κακίας*, a mystery of wickedness, to Antipater's crafty conduct to ensnare and destroy his brother Alexander (*De Bell. Jud.* i. 24. 1); and to complete the proof that the word 'mystery' is used in the sense of *knowable* secrets, we add the words, 'Though I understand all mysteries' (1 Cor. xiii. 2). The Greeks used the word in the same way. Thus Menander, *μυστήριον σου μὴ κατέλθης τῷ φίλῳ*, 'Tell not your secret to a friend' (p. 274, line 671, ed. Clerici). Even when they apply the term to the greater and lesser Eleusinian mysteries, they are still mysteries into which a person might be initiated, when they would, of course, cease to be mysteries to him. The word is used in the same sense throughout the Apocrypha as in the Sept. and N. T. (Tobit xii. 7; Judith ii. 2; Ecclus. xxii. 22; xxvii. 16, 17, 21; 2 Macab. xiii. 21); it is applied to divine or sacred mysteries (Wisdom ii. 22; vi. 22), and to the ceremonies of false religions (Wisdom xiv. 15, 23).—J. F. D.

MYTH. The philosophical conception of a myth being only possible to an advanced reflective age, we are not surprised to find that no word corresponding to 'myth' occurs in the O. T., and that

*muthos* is therefore not to be found in the LXX. Even in the Apocrypha the word occurs but once (*muthos akarios*, Eccles. xx. 19, 'an unseasonable tale,' A. V.), and that in a general sense; while, in one other passage (Bar. iii. 23), *mutologoi*, 'authors of fables' (A. V.), has a somewhat doubtful meaning. This, however, is not the case in the N. T., where the word occurs five times, and always in a severely disparaging sense, and in every instance is rendered 'fables' in our version. Thus Timothy is warned against 'fables and endless genealogies, which minister questions rather than godly edifying' (1 Tim. i. 4); and against 'profane and old wives' fables' (*βεβήλους καὶ γραυδεῖς μύθους*, Id. iv. 7). These 'fables' are opposed to 'the truth,' and Titus is forbidden to give heed 'Ιουδαϊκοῖς μύθοις'. Lastly, in 2 Pet. i. 16, they are characterised as *σεσοφισμένοι*, 'cunningly devised,' and are contrasted with the sober testimony of eye-witnesses\* (cf. *πεπλασμένοι μύθοι*, Diod. Sic. i. 93). It is obvious, therefore, that in the N. T. a myth is used in its latest sense to express a story invented as the vehicle for some ethical or theological doctrine, which, in fact, has been called in later times an *ethopœia* or *philosopheme*. Yet the condemnation is *special* and not general, and cannot point with dissatisfaction to myths, which, like those of Plato, are the splendidly imaginative embodiment of some subjective truth, and which claim no credence† for themselves, but are only meant to be regarded as the vehicles of spiritual instruction. That there is nothing in *such* 'myths' to deserve reprobation, nay more, that they are a wise form of teaching, is clear from the direct quotation of mythical stories by St. Jude (ver. 9, 14), and from the use of strictly analogous modes of conveying truth (allegory, fable, parable, etc.), in other parts of the Bible, as in the writings of all the wisest of mankind. It must then have been the doctrines involved, and not the 'mythical' delivery of them, which woke the indignation of the apostles; and if, as Tertullian thought (*adv. Valent.*, iii.), and as is now generally believed, the 'myths' alluded to were the gnostic‡ mythology of the 'Æons,' of which the seeds may have been beginning to develop themselves when the pastoral epistles were written, we can easily understand how they would appear to bear the stamp of 'philosophy and vain deceit.'

No satisfactory definition of the word myth has ever been given, partly because of the manifold varieties of myths, and partly because the word has been used in several distinct senses. In Homer it is equivalent to *lógos* (Il. xviii. 253), and Eustathius remarks, that in later times it came to mean *ψευδὴς λόγος* (Il. α. p. 29), to which definition Suidas adds, that it was *λόγος ψευδής, εικονίζων τὴν ἀληθείαν*. Plutarch, less accurately, confuses it with *plausible fiction* (*λόγος ψευδής εὐκῶς ἀληθινῶς*), and in the *Etymologicum Magnum* it is made,

\* Just as in Greek *muthoi* are opposed to *ιστορία*; cf. Auson, *Prof. Carm.*, 21, 26, 'Callentes muthon plasmata et historiam.'

† See Archbishop Trench on the *Parables*, ch. ii., where he distinguishes between 'myth,' 'fable,' 'parable,' 'allegory,' etc.

‡ Theodoret, however, on Tit. i. 14, refers the 'Jewish fables' to the Mishna (*τὴν ὑπ' αὐτῶν καλ-οῦμένην δευτέρωσαν*), Alford, *ad loc.*

in its technical sense, to mean a veiled or enigmatical narration (*muthos σημαίνει δύο . . τὸν τε σκοτεινὸν λόγον . . καὶ τὸν ἀπλῶς λόγον*).

Neither the etymology nor the history of the word help us much. It is derived from *mutéo*, *doceo*, or *mutáo*, *claudio*, and Archbishop Trench thinks that it must therefore have originally meant the word shut up in the mind, or muttered with the lips (*Synon. of the N. T.*, 2d series, p. 174), though he admits that there is no trace of this in actual use; and as, at first, *muthos* merely means 'word,' we should derive it from an onomatopœia of the simplest consonantal utterance (*m*). It is not until Pindar's time (*Ol.* i. 47; *Nem.* vii. 34; vi. 1) that it is used of that which is 'mentally conceived, rather than historically true;' and in Attic prose it assumes its normal later sense of any legend or tradition of the prehistoric times. If, however, we analyze the modern use of the word, we shall find that these historical myths, or amplified legends of the remote past, generally mingled with the marvellous, do not properly represent our notion of myths any more than the well-understood philosophemes to which we previously alluded. We must learn, too, to distinguish between the myths and the rationalistic explanations thrust into them by the critical self-consciousness of a later age. If we would understand the true nature, for instance, of the Greek myths, we must discard from them the timidly rationalistic suggestions of Hekataeus, the severely common-sense views of Palæphatus, and the unsympathisingly sceptical rashness of Euëmerus, no less than the profound moral intentions which have so often been transferred to them by the speculative genius of a Bacon or a Coleridge.

A myth proper, then, is neither a philosopheme nor a legend. It is best described as a spontaneous product of the youthful imagination of mankind,—the natural\* form under which an infant race expresses its conceptions and convictions about supernatural relations and prehistoric events. It is neither fiction,† history, nor philosophy; it is a spoken poetry, an uncritical and childlike history, a sincere and self-believing romance. It does not invent, but simply imagines and repeats; it may err, but it never lies. It is a narration, generally marvellous, which no one consciously or scientifically invents, and which every one unintentionally falsifies. 'It is,' says Mr. Grote, 'the natural effusion of the unlettered, imaginative, and believing man.' It belongs to an age in which the understanding was credulous and confiding, the imagination full of vigour and vivacity, and the passions earnest and intense. Its very essence consists in the projection‡ of thoughts into the sphere of facts. It arises partly from the unconscious and gradual objectising of the subjective, or con-

\* The word *ψευδής* may be *absolutely banished* from the definition. A myth is something far higher than a mere fiction. It is only a foolish prejudice or an unfortunate ignorance which attaches to the word *myth* any notions of immorality or intentional deceit.

† I here borrow some of the excellent views of M. Ampère, *Hist. Littér. de la France*, i. 310, quoted by Mr. Grote, *Hist. of Greece*, i. 610.

‡ 'Der Grund-Trieb des Mythen das Gedachte in ein Geschehenes umzusetzen.' Creuzer, *Symbolik*, p. 99.

fusing mental processes with external realities ; and partly from investing the object with the feelings of the subject, that is, from imaginatively attributing to external nature those feelings and qualities which only exist in the percipient soul.

The myth then belongs to that period of human progress in which the mind regards 'history as all a fairy tale.' Before the increase of knowledge, the dawn of science, and the general dissemination of books, men's fancies respecting the past, and the dim conjectures of nascent philosophy, can only be preserved by these traditional semi-poetic tales ; to borrow the fine expression of Tacitus, 'fingunt simul creduntque.' So far from being startled by the marvellous and the incredible, they expected and looked for it ; while discrepancies and contradictions were accepted side by side, because the critical faculty was wholly undeveloped. 'The real and the ideal,' says Mr. Grote, 'were blended together in the primitive conception . . . the myth passed unquestioned, from the fact of its currency, and from its harmony with existing sentiments and preconceptions.'

To the intensity of a fresh imagination, and the necessary weakness of the youth of language, we can trace the origin of a vast number of myths. In those early days men looked at all things with the large open eyes of childish wonderment. The majority of phenomena which they saw and enjoyed were incapable of other than a metaphorical or poetical description ; and even if language had been more developed it would have responded less accurately to their thoughts, because they seriously transferred their own feelings and emotions to the world around them, and made themselves the measure of all things. Thus the hunter regarded the moon and stars which 'glanced rapidly along the clouded heaven' as a 'beaming goddess with her nymphs ;' and

'Sunbeams upon distant hills  
Gliding apace with shadows in their train  
Might, with small help from fancy, be transferred  
Into fleet Oreads sporting visibly.\*

And thus the manifold aspects of nature, imaginatively conceived and metaphorically described, furnished at once a large mythology ; and when these elements were combined and arranged for the purpose of illustrating early scientific or theological conceptions, and were corrupted by numberless† erroneous etymologies of words, whose true origin was forgotten, we have at once the materials for an extensive and sometimes inscrutable mythology. In the early stage of the myth, confined to the period when everything is personified,‡ it is as difficult to distinguish between what was regarded as fancy and what was believed as fact, as it is to this day in the rude and grotesque legends

\* Wordsworth, *Excursion*, Bk. iv.—a most weighty and profound passage, too long to quote in full.

† This fruitful source of myths may be seen examined in Lersch, *Sprachphilos. d. Alten*; for some modern instances, see Farrar, *Origin of Lang.*, p. 59. Mythology has even been called 'a disease of language.'

‡ The 'Istinto d' animazione,' as Vico calls it, is always found in undeveloped nations, as it is in children and savages.

of Polynesians and N. American Indians. But in a later time, when myths were preserved in writing and systematised into dogmas, the poetical imaginative faculties had often well-nigh evaporated, and that which had originally been meant as half a metaphor was prosaically hardened into a real and marvellous fact. Thus, in many myths, as they were finally preserved, we may see the mere misconceptions of a metaphor, and the guesses of a most imperfect etymology, mingling in two distinct streams with the original simple poetic tale. Any one who considers the evanescent 'tradition' of untutored Polytheism as it is displayed among modern savages, may watch, even at the present day, the *growth* and swift diffusion of myths ; but we must look into various histories of civilised people (and especially into that of Greece) to see such myths first erroneously systematised into definite narratives, to be deliberately believed—then partially and timidly rationalised—next contemptuously rejected—and finally restored to their true rank as the most interesting relics of a primitive society, and the earnest teachings of a yet unsophisticated religious philosophy.

This subject would require a volume to explain adequately, and indeed it has occupied many important volumes. All that we have here attempted, is to remove a groundless and injurious prejudice against the word. Whether or not there be any myths in the Bible, and especially in the earlier books, is a question which must be settled *purely on its own merits*. It is, however, undesirable that the mere word 'myth' should be avoided by those who undoubtedly regard some of the Biblical narratives as containing mythical elements. Even men like Bunsen and Ewald bowed to popular prejudice in shunning the word ; and of the English theologians, who rely so much on their authority, scarcely one (with the exception of Dr. Davidson) has ventured in this particular to desert their guidance. Yet the word 'myth' is far more reverent and far less objectionable than 'fable,' which some would substitute for it ; and it is, as Dr. Davidson has pointed out, far more honest than circumlocutions which mean the same thing (*Introd.* i. 146). It will be observed that we are here giving no opinion whatever as to the *fact* of the existence of Scriptural myths, but merely pleading that those Biblical critics who understand the true nature of myths, and, rightly or wrongly, believe that here and there in the Hebrew records a mythic element may be traced, should not hesitate to express their conviction by the term which is most suitable and most likely to secure for the subject a clear and fair discussion.

The following are a very few of the more important books on the subject of myths :—O. Müller, *Prolegomena zu einer Wissenschaftlichen Mythologie*, Gott. 1825 [translated by J. Leitch, Lond. 1844]. Grimm, *Deutsche Mythologie* ; Buttmann, *Mythologos* ; Hermann, *Ueber das Wesen und die Behandlung d. Mythologie* ; Lobeck, *Aglaophamus* ; Creuzer, *Symbolik und Mythologie der Alten Völker* ; Nitzsch, *Helden-Sage der Griechen* ; Böttiger, *Kunst Mythologie d. Griechen* ; Kavanagh, *Myths traced to their primary Source through Language*, 1856. The subject has of late years received two most important contributions in England.—Mr. Grote's *History of Greece*, vol. i., and Prof. Max Müller's *Essay on Greek Mythology*, Oxford Essays, 1856.—F. W. F.

N.

**NAAMAH** (נַעֲמָה, *pleasant*). 1. (Sept. *Noemá*.) Daughter of Lamech and Zillah, and sister of Tubal-cain (Gen. iv. 22). The family was one of inventors : and as few women are named, the Jewish commentators ascribe suitable inventions to each of them. Naamah is affirmed by them to have invented the spinning of wool and making of cloth. But the book of Genesis does not say this, and they could have no other source of information. 2. (Sept. *Naavón*, *Noomua* ; Alex. *Naaúd*, which is also the Vat. reading in 1 Kings xiv. 31.) An Ammonitess, one of the wives of Solomon, and mother of Rehoboam (1 Kings xiv. 21, 31 ; 2 Chron. xii. 13). According to the LXX. she was daughter of Ana (Hanun), the last Ammonite king (1 Kings xii. 24 answering in the Heb. text to xiv. 31).—J. K.

**NAAMAH** (נַעֲמָה, *pleasant* ; *Noemá* ; Alex. *Noemá* ; *Naama*), a town of Judah, situated in the plain or Shephelah. It appears from the way in which it is grouped by Joshua (xv. 41) that it lay north or north-east of Egion, and consequently close to the foot of the hills. It is mentioned by Eusebius and Jerome, but they do not seem to have known anything of its site (*Onomast.*, s. v. *Naama*). The town is only once mentioned in the Bible, and the site has not been identified.—J. L. P.

**NAAMAN** (נַעֲמָן, *pleasantness*). 1. (Sept. *Noemán*.) One of the descendants of Benjamin who came down with Jacob to Egypt (Gen. xli. 21). In Num. xxvi. 40, and 1 Chron. viii. 3, 4, he is represented as the son of Bela [BECHER]. From the statement in 1 Chron. viii. 6, 7, it would appear that his posterity were removed from Gela to Manahath. 2. (Sept. *Naímán* ; N. T. *Neeuán*, *Naímán* [L. T.], Luke iv. 27.) The commander of the armies of Damascene Syria, in the time of Joram, king of Israel. Through his valour and abilities Naaman held a high place in the esteem of his king Benhadad ; and although he was afflicted with leprosy, it would seem that this did not, as among the Hebrews, operate as a disqualification for public employment. Nevertheless the condition of a leper could not but have been in his high place both afflicting and painful : and when it was heard that a little Hebrew slave-girl, who waited upon Naaman's wife, had spoken of a prophet in Samaria who could cure her master of his leprosy, the faint and uncertain hope thus offered was eagerly seized ; and the general obtained permission to visit the place where this relief was to be sought. Benhadad even furnished him with a letter to his old enemy king Joram ; but as this letter merely stated that Naaman had been sent for him to cure, the king of Israel rent his clothes in astonishment and anger, suspecting that a request so impossible to grant, involved a studied insult or an intention to fix a quarrel upon him with a view to future aggressions. When tidings of this affair reached the prophet Elisha, he desired that the stranger might be sent to him. Naaman accordingly went, and his splendid train of chariots, horses, and laden camels filled the street before

the prophet's house. As a leper, Naaman could not be admitted into the house ; and Elisha did not come out to him as he expected, and as he thought civility required ; but he sent out his servant to tell him to go and dip himself seven times in the Jordan, and that his leprosy would then pass from him. He was, however, by this time so much chafed and disgusted by the apparent neglect and incivility with which he had been treated, that if his attendants had not prevailed upon him to obey the directions of the prophet, he would have returned home still a leper. But he went to the Jordan, and having bent himself seven times beneath its waters, rose from them clear from all leprous stain. His gratitude was now proportioned to his previous wrath, and he drove back to vent the feelings of his full heart to the prophet of Israel. He avowed to him his conviction that the God of Israel, through whom this marvellous deed had been wrought, was great beyond all gods ; and he declared that henceforth he would worship him only, and to that end he proposed to take with him two mules' load of the soil of Israel wherewith to set up in Damascus an altar to Jehovah. This shows he had heard that an altar of earth was necessary (Exod. xx. 24) ; and the imperfect notions which he entertained of the duties which his desire to serve Jehovah involved, were natural in an uninstructed foreigner. He had also heard that Jehovah was a very jealous God, and had forbidden any of his servants to bow themselves down before idols ; and therefore he expressed to Elisha a hope that he should be forgiven if, when his public duty required him to attend his king to the temple of Rimmon, he bowed with his master. The grateful Syrian would gladly have pressed upon Elisha gifts of high value, but the holy man resolutely refused to take anything, lest the glory redounding to God from this great act should in any degree be obscured. His servant, Gehazi, was less scrupulous, and hastened with a lie in his mouth to ask in his master's name for a portion of that which Elisha had refused. The illustrious Syrian no sooner saw the man running after his chariot, than he alighted to meet him, and happy to relieve himself in some degree under the sense of overwhelming obligation, he sent him back with more than he had ventured to ask (2 Kings v.) Nothing more is known of Naaman ; and what befel Gehazi is related under another head [GEHAZI].

The only points of difficulty in this narrative are those connected with the requests made by Naaman to Elisha, and which the prophet seems not to have refused. The request for two mules' load of earth with which to build an altar to Jehovah in Damascus, appears to have arisen from the notion that the soil of the land was proper to the God of the land, whom he proposed henceforth to worship. Jehovah's claim to be the universal God was unknown to, or misunderstood by, the neighbouring nations ; and the only question that ever came before them, was whether Jehovah, the God whom the Hebrews worshipped, was more or less powerful than the gods they worshipped. That he was infinitely more powerful was, as we take it, the point at which this man's faith rested. He was convinced, not that Jehovah was the universal God, but that 'there was no God in all the earth save only in the land of Israel'—and, therefore, he desired to worship at an altar formed of the soil

which was thus eminently honoured. It is not clear whether he intended to say absolutely that there was no God in the world save in the land of Israel, or used the phrase as a strong expression of his belief that the gods of other lands were nought as compared with him. The explanation applies in either sense. Naaman's other request for permission to bow in the house of Rimmon seems to have amounted to this. He had acknowledged indirectly that Rimmon was no god, or else a god too powerless to be henceforth the object of his worship. Yet, as a great officer of state, his duty required him to attend the king to the temple of this idol, and, as the king leaned upon his arm, to bow when the monarch bowed. To refuse this would bring disgrace upon him, and constrain him to relinquish his high place, if not his country; and for this he was not prepared. Of the views under which Elisha consented to this request, we are less able to judge. But indeed it is not clear that he did consent, or expressed any distinct opinion in the matter. His words of dismissal, 'Go in peace,' do not necessarily convey his approval of all that Naaman had asked, although in tenderness to one so well intentioned, and whom there was no opportunity of instructing further, he may have abstained from urging upon the Syrian those obligations which would have been indispensable to a subject of the Mosaic covenant.—J. K.

NAAMATHITE (נַעֲמָתִי; *Muwalos basileus*; ὁ Μωυλος; *Naamathites*). One of Job's three friends is called 'Zophar the Naamathite' (Job ii. 11; xi. 1; xx. 1; xlii. 9), which manifestly signifies that he dwelt in a place called *Naamah*. Whether this be identical with Naamah, a town situated in the plain of Judah, cannot now be determined; but the fact seems very doubtful. Job's country, Uz, was in Arabia; his other two friends, Eliphaz the *Temanite*, and Bildad the *Shuhite*, were Arabians; and hence we may conclude that *Naamah* was likewise in Arabia (Cellarius, *Geogr.* ii. 698). The theory of Bochart, adopted from the Septuagint rendering of Job ii. 11, that Zophar was a prince of the *Minæi*, is without any solid foundation (see, however, Bochart, *Opera* i. 122). We have no data upon which to identify Naamah.—J. L. P.

NAARAN (נַעֲרָן, *puerile*; Νοαράν; Alex. *Naapán*; *Noran*), a town of Ephraim, situated apparently to the east of Bethel, and near the border of the tribe. It is only mentioned in 1 Chron. vii. 28; but in Josh. xvi. 7 the same town is called *Naarath* (נַעֲרָתָה), with ה local, 'to Naarath'; omitted in the Vatican text of the Septuagint; Alex. *Naapáda*; *Naaratha*). The eastern border of Ephraim is there described as follows:—'The border went about eastward unto Taanath-shiloh, and passed by it on the east to Janohah; and it went down from Janohah to Ataroth, and to Naarath, and came to Jericho, and went out at the Jordan.' Naaran, therefore, stood in the Jordan valley north of Jericho. Eusebius describes it as 'a village of Ephraim, now *Oorath* (Ὀόραθ; Jerome *Naorath*), a village of the Jews five miles from Jericho' (*Onomast.*, s. v. *Naaratha*). Reland suggests that this is the place called *Neara* by Josephus, from which Archelaus brought water to irrigate the royal gardens in the plain of Jericho (*Antiq.* xvii. 13. 1). The Jewish rabbins also speak of a *Noaran* (נוֹעָרָן) near Jericho (Reland,

*Pal.*, p. 907). There are several large fountains at the foot of the hills, and in the deep mountain ravines north of Jericho; but no name has hitherto been discovered that would suggest identity with Naaran. The writer noticed a number of ruins in that neighbourhood; but the ancient names have passed away, doubtless because the country has for centuries been without settled inhabitants. About three miles north of Jericho is wady Nawaimeh, which Schwartz supposes to be identical with Naaran; the words, however, are radically different; and about two miles farther is the large fountain called Ras-el-'Ain, with a ruined village near it. The position of this place agrees with the notices of Naaran (Robinson, *B. R.*, i. 571, *seq.*)—J. L. P.

NAARATH. [NAARAN.]

NAAZUZ, or NAATZUTZ (נַעֲזוּץ), occurs only in two passages of Isaiah, in both of which it is translated 'thorn' in the A. V. (chap. vii. 18, 19; lv. 13). Some have translated it generally, as in the English version, by thorn, shrub, thorny shrub, or small tree. Others have attempted to define it specifically, rendering it bramble, white-thorn, etc. (Cels. *Hierobot.* ii. p. 190); but nothing certain has been determined respecting it. Celsius endeavours to trace it to the same origin as the Arabic word نَعِص, *naaz*, which he states to be the name of a plant, of which the bark is employed in tanning leather. The meaning of the term he continues, in Chaldee, is *infigere, defigere*, 'to stick into,' or 'fix,' and it is therefore supposed to refer to a prickly or thorny plant. R. Ben Melech says that commentators explain *naazuz* by the Arabic word *sidr*, which is the name of a well-known thorny bush of Eastern countries, a species of *Zizyphus*. This, Sprengel says, is the *Z. vulgaris*, found in many parts of Palestine, as well as in many of the uncultivated tracts of Eastern countries. Others suppose the species to be the *nabak* of the Arabs, which is the *Zizyphus Lotus*, and considered to be the *Lotus* of the ancients. But from the context it would appear that the plant, if a *zizyphus*, must have been a less highly esteemed variety or species. But in a wild state these are very abundant, bushy, prickly, and of little value. Belon says, 'Les hayes, pour la plus part, sont de tamarisques, œnoplia (*i. e.*, *zizyphi* species) et rhamnes.' In Freytag's Arabic Lexicon the above Arabic word *naaz* is said to be the name of a thorny tree, common in the Hedjaz, the bark of which is used in tanning hides, and from whose wood a dentifrice is prepared. This might be a species of acacia, of which many species are well known to be abundant in the dry and barren parts of Syria, Arabia, and Egypt.—J. F. R.

NABAL (נָבָל, *stupid, foolish*; Sept. Ναβάλ), a descendant of Caleb, dwelling at Maon, and having large possessions near Carmel of Judah, in the same neighbourhood. He had abundant wealth, being the possessor of 3000 sheep and 1000 goats, but his churlish and harsh character had not been softened by the prosperity with which he had been favoured. He was holding a great sheep-shearing of his numerous flocks at Carmel, which was a season of great festivity among the sheep-masters of Israel—when David sent some of his young men to request a small supply of provisions, of which

his troop was in great need. He was warranted in asking this, as, while Nabal's flocks were out in the desert, the presence of David and his men in the neighbourhood had effectually protected them from the depredations of the Arabs. But Nabal refused this application, with harsh words, reflecting coarsely upon David and his troop as a set of worthless runagates. On learning this, David was highly incensed, and set out with his band to avenge the insult. But his intention was anticipated and averted by Nabal's wife Abigail, who met him on the road with a most acceptable supply of provisions, and by her consummate tact and good sense, mollified his anger, and, indeed, caused him in the end to feel thankful that he had been prevented from the bloodshed which would have ensued. When Nabal, after recovering from the drunkenness of the feast, was informed of these circumstances, he was struck with such intense terror at the danger to which he had been exposed, that 'his heart died within him, and he became as a stone;' which seems to have been the exciting cause of a malady that carried him off about ten days after. David, not long after, evinced the favourable impression which the good sense and comeliness of Abigail had made upon him, by making her his wife, B.C. 1061 (1 Sam. xxv.) [ABIGAIL].—J. K.

#### NABATHÆANS. [NEBAIOTH.]

NABOTH (נָבוֹת, *fr'uit, produce*; Sept. Ναβο-  
θαί), an inhabitant of Jezreel, who was the possessor of a patrimonial vineyard adjoining the garden of the palace which the kings of Israel had there. King Ahab had conceived a desire to add this vineyard to his ground, to make of it 'a garden of herbs,' but found that Naboth could not, on any consideration, be induced to alienate a property which he had derived from his fathers. This gave the king so much concern, that he took to his bed and refused his food; but when his wife, the notorious Jezebel, understood the cause of his trouble, she bade him be of good cheer, for *she* would procure him the vineyard. Some time after Naboth was, at a public feast, accused of blasphemy, by an order from her under the royal seal, and, being condemned through the testimony of false witnesses, was stoned to death, according to the law, outside the town (Lev. xxiv. 16; Num. xv. 30). Coquerel (in the *Biographie Sacrée*) thinks that the children of Naboth perished with him, being perhaps put to death by the creatures of Jezebel; and his reason is, that otherwise the crime would have been useless as the children would still have been entitled to the father's heritage. But we know not that Naboth had any sons; and if he had sons, and they had been taken off, the estate might not have wanted an heir. It therefore rather seems that a usage had crept in for the property of persons convicted of treason (and blasphemy was treason in Israel) to be estreated to the crown. There are other indications of this usage. If it did not exist, the estate of Naboth could not have lapsed to the crown, even if his children had shared his fate; and if it did exist, it was not necessary that the children should be slain to secure the estate to the king.

When Ahab heard of the death of Naboth—and he must have known how that death had been accomplished, or he would not have supposed

himself a gainer by the event—he hastened to take possession. But he was speedily taught that this horrid crime had not passed without notice by the all-seeing God, and would not remain unpunished by his justice. The only tribunal to which he remained accountable, pronounced his doom through the prophet Elijah, who met him on the spot, 'In the place where dogs licked the blood of Naboth, shall dogs lick thy blood, even thine' (1 Kings xxi.)—J. K.

NACHASH (נָחָשׁ, *ḥphis*), the generic name of the serpent tribe in the O. T. Serpents may be divided generally into two very distinct sections—the first embracing all those that are provided with movable tubular fangs and poison bags in the upper jaw; all regarded as ovoviparous, and called by contraction *vipers*: they constitute not quite one-fifth of the species hitherto noticed by naturalists. The second section, much more numerous, is the *colubrine*, not so armed, but not therefore always entirely innocuous, since there may be in some cases venomous secretions capable of penetrating into the wounds made by their fixed teeth, which in all serpents are single points, and in some species increase in size as they stand back in the jaws. The greater part, if not all the innocuous species, are ovoviparous, including the largest or giant snakes, and the *pelamis* and *hydrophis*, or water-serpents, among which several are venomous. It is with the section of noxious serpents that Biblical research has most to do. The different species of serpents mentioned in Scripture are, with a few exceptions, not easily identified with existing species. [See ACHSHUB; PETHEN; SARAPH; SHEPHIPHON; TSEPHAH; TSIPH'ONI.]

Scriptural evidence attests the serpent's influence on the early destinies of mankind; and this fact may be traced in the history, the legends, and creeds of most ancient nations. It is far from being obliterated at this day among the pagan, barbarian, and savage tribes of both continents, where the most virulent and dangerous animals of the viviparous class are not uncommonly adored, but more generally respected, from motives originating in fear; and others of the ovoviparous race are suffered to abide in human dwellings, and are often supplied with food, from causes not easily determined, excepting that the serpent is ever considered to be possessed of some mysterious superhuman knowledge or power. Hence, beside real species, ideal forms, taken from the living, but combining other or additional properties, occur, at the most early periods, as metaphorical types, in fable and history, and in the hieroglyphics and religious paintings of many nations.

The asserted longevity of the serpent tribe may have suggested the representation of the harmless house-snake biting its tail as typical of eternity; and this same quality was no doubt the cause why this animal, entwined round a staff, was the symbol of health, and the distinctive attribute of the classical Æsculapius and Hygiea. There are species of this genus common to Palestine and the southern parts of continental Europe; they were domesticated in Druidical and other Pagan sanctuaries, and were employed for omens and other impositions; but the mysterious Ag or Hagstone was asserted to be produced by the venomous viper species. [For the mantic use of serpents see DIVINATION].—C. H. S.

NACHMANIDES, or NACHMANI=BEN NACHMAN, MOSES, also called by the Jews *Ramban*, רמב"ן, from the initial letters בן משה בן נחמן, נחמן, *R. Moses b. Nachman*, and by Christian writers *Moses Gerundensis*, was born at Gerona, in Catalonia, about 1195. So extraordinary was his proficiency in the Biblical and Talmudical writings, that he wrote an elaborate *Treatise on the*

*Rights of Primogeniture and Vows* (הלכות בכורות) (ונדרים) when he was scarcely fifteen years of age (1210), and composed his commentaries (הדרשים) on the greater part of the Talmud (1217-1223) before he was thirty. About the year 1262 he delivered a discourse in Saragossa, before James I., king of Aragon, and the magnates of the church and state, in defence of Judaism. This remarkable address (דרשה), which has for its text Ps. xix. 9, 'The law of the Lord is perfect,' etc., and is an important contribution to Biblical exegesis, the Christology of the O. T., and the understanding of Judaism, was first published in 1582, with the title *תורת הכימה*, 'יהיה חכימה', wherewith it commences, then at Prague 1595, and with corrections and notes by the learned and industrious Adolph Jellinek, Leipzig 1853. This is the best edition, and the references, both in this article and throughout this Cyclopædia, are to it. In 1263 he held a disputation at Barcelona with Pablo Christiani, a converted Jew, which lasted four days (July 20-24, 1263). Nachmanides published and circulated this disputation among his brethren, as Pablo Christiani and his friends gave an incorrect report of it; and the pope, Clement IV., was so incensed at it, that he wrote to James I. of Aragon, urging on his majesty to banish him from his dominions. Whereupon the septuagenarian Nachmanides had to leave (1266) his native place, his two sons, his college with numerous disciples, and his friends, and went to the Holy Land, which he reached Aug. 12, 1267. The disputation referred to was first published, with omissions and interpolations, and an exceedingly bad Latin translation, by Wagenseil, *Tela ignea Satanae*, Altorf 1681. It was then published in the collec-

tion of polemical writings entitled *מלחמת חובה*, where it is the first of the series, and is called *וכוח פולו*, הרמב"ן עם פראי פולו, *The Discussion of Ramban with Fra Paolo*, Constantinople 1710; and recently again by the erudite Steinschneider, *Nachmanidis Disputatio publica pro fide Judaica*, Berlin 1860, to which are added learned notes by the editor, and Nachmanides' exposition of Is. liii. It is to this edition that the references are made.

In Palestine Nachmanides completed and revised his stupendous Commentary on the Pentateuch, which he had begun nearly twenty years before (1249-1268). Physician by profession, thoroughly conversant not only with Hebrew, Chaldee, Syriac and Arabic, but also with Greek, Latin, Spanish, etc., master of the whole cycle of Talmudic, Midrashic, and exegetical literature, and intimately acquainted with the manners, customs, and geography of the East, he frequently quotes medical works (ספרי נסינות, and ספר הרפואות), clears up medical difficulties (comp. comment. on Gen. xxx. 14; xlv. 26; xlv. 15; Lev. iii. 9; xi. 11; xii. 4; xiii. 3, 42; Num. xxi. 9), explains difficult terms by comparing the Hebrew with other languages (comment. on Gen. xlix. 12, 20; Exod. xxx. 23, 34; xxxii. 1; Lev. xi. 11; xiii. 29; xix.

20; Deut. xiii. 2, 4; xxxiii. 36), criticises Christian versions (Gen. xli. 45; Num. xi. 17), explains the customs and geography of the East (Gen. xi. 28; xxxiv. 12; xxxviii. 18, 24), gently and reverentially attacks the rationalistic views of Maimonides about miracles and revelation, and controverts and exposes, in unsparing language, Ibn Ezra's scepticism, concealed in unbelieving mystical doctrines [IBN EZRA]. Being a thorough believer in the Kabbala, Nachmanides, though explaining the obvious sense of the Bible, yet maintains that each separate letter is imbued with a spiritual and recondite potency, and forms a link in the grand chain of revelation, and that those who are initiated in the secrets of the Kabbala can, by the combination of these letters, penetrate, more than ordinary readers, into the mysteries of Holy Writ. When it is remarked, that no less than fifteen Jewish literati, of different periods, have written super-commentaries on this remarkable production, the importance of this commentary, and the influence it exercised on Biblical exegesis and the Jewish literature, will easily be comprehended. This commentary,

which is alternately denominated *באור על התורה*, or *פרש נחמני*, *סתרי תורה*, *הדרשי תורה*, *פרש*, was first published before 1480, then in Lisbon 1480, Naples 1490, Pesaro 1514, Saloniokai 1521, with the comments of Rashi, Ibn Ezra, etc., Constantinople 1522, with the Hebrew text of the Pentateuch, and the Five Megilloth, the Chaldee Paraphrase, the Comment of Rashi, and the Super-commentary of Aboab on Nachmanides, Venice 1548; and, besides many other editions, lately in the excellent Pentateuch and Five Megilloth, containing the Hebrew text, the Chaldee Paraphrases, the Commentaries of Rashi, Ibn Ezra, Rashbam, Seforno, etc., 5 vols., Vienna 1859. The references in this article and Cyclopædia are made to the two last-mentioned editions.

Nachmanides also wrote a commentary on Job (*פרוש על איוב*), which was first published in the Rabbinical Bible, Venice 1517, and is now incorporated in Frankfurter's Great Rabbinical Bible, Amsterdam 1724-27 [FRANKFURTER]. The Kabbalistic commentary on the Song of Songs, which is ascribed to him, belongs to his teacher Asariel [KABBALAH]. He died at Acco (Ptolemais) about 1270. So great was his reputation, that the Jewish nation gave him the honourable appellation of *the Pious Teacher* (הרב המאמין), and *the Great Master* (הרב הגדול). Comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 1947-65; Fürst, *Bibliotheca Judaica*, iii. 2-8; Perles, in Frankel's *Monatschrift für Geschichte und Wissenschaft des Judenthums*, viii. 81, ff.; 113, ff.; Graetz, *Geschichte der Juden*, vii., Leipzig 1863, pp. 48, ff.; 61, ff.; 87, ff.; 143, ff.; 439 ff.—C. D. G.

NACHON (נַחֲוֹן; Sept. Ναχὼρ; Alex. Ναχὼν; Vulg. *Nachon*) occurs in 2 Sam. vi. 6 as the name of the threshing-floor which in the parallel passage, in 1 Chron. xiii. 9, is called by the appellation of Chidon [CHIDON]. The Targum of Jonathan explains the word Nachon by *נַחֲוֹן*, 'a prepared place' (נַחֲוֹן being the passive part. of the Rabbinical verb *נָחַן*, *aptare, ordinare*, see Buxtorf, *Lex. Rabb.* 2627); thus regarding the threshing-floor of Perez-Uzzah as the temporary station ap-

pointed by David for the reception of the ark previous to its ultimate rest in 'the city of David.' This seems to confirm the view we have mentioned in art. CHIDON of the possible identity of the threshing-floor there called *Chidon*, and here *Nachon*, with the well-known one of Araunah the Jebusite, within the precincts of the city of his Canaanite ancestors. Origen has preserved (*Hexapla*, Migne vi. 1. 41) three readings of the LXX., 'Ὡς ἄλω Ναχώρ'—Ἄλλος, ἔως ἄλως Ἀχώρ—'Ἄλλος, ἔως τῆς ἄλως Ἐρνά τοῦ Ἰεβουσαιου. We have also a scrap of Aquila, who treats the name Nachon as an appellative, and gives it the same meaning as the Targumist, *ἔως ἄλως ἐτολμης*, q. d. *When they came to a place prepared for it*. This version is also given in the Peschito Syriac and the Arabic. Gesenius (*Lex.* by Robinson, p. 673) so far takes this view as to derive נָכוֹן from בָּנָן, *to prepare*; but thinks after all, that the words נָכוֹן (*Chidon*) and נָחַן (*Nachon*) have become confused; the first corrupted from the second, or *vice versa* (*Thes.* 683). Fürst (*Lex.* ii. 37) derives our word נָכוֹן from נָכָה, *to strike or smite*, and makes it equivalent with כִּיּוֹן in indicating the calamity which smote Uzza.—P. H.

#### NACHOR. [NAHOR.]

NADAB (נָדָב, *liberal*; Sept. Ναδάβ). 1. Eldest son of Aaron, who, with his brother Abihu, was slain for offering strange fire to the Lord [ABIHU]. 2. Son of Jeroboam, and second king of Israel. He ascended the throne upon the death of his father (B.C. 954), whose deep-laid, but criminal and dangerous policy, he followed. He was engaged in the siege of Gibbethon, a city of the Levites (of which the Philistines had obtained possession), when he was slain in the camp in a conspiracy formed against him by Baasha, one of his officers, who mounted the throne in his stead. He reigned two years (1 Kings xiv. 20; xv. 25-28). Two others of this name are mentioned (1 Chron. ii. 28; and viii. 30; ix. 36).—J. K.

NADABATHA (Ναδαθά, *Madaba*; Joseph. *Antiq.* xiii. 1. 4 has Ναδαθά) occurs 1 Maccab. ix. 37 as the name of the city from which the 'children of Jambī' [see JAMBI] were conducting the bride with music and great pomp when attacked and slaughtered by Jonathan and Simon, to avenge the death of their brother John. *Madaba* of the Vulgate is either a mere conjecture, or a lapse of the pen; for Medaba was the city from which the Jambites came, and to which they were conducting the bride. Nadabatha was evidently a city on the east of the Jordan, as Josephus speaks of the bride as 'the daughter of one of the illustrious men among the Arabians.' That she is called in Maccabees 'a daughter of one of the great princes of Chanaan' is in no contradiction to this, as the title 'sons of Chanaan' is given (Judith v. 3) to the Ammonites and Moabites. Besides, the impression which the entire narrative leaves on the mind is, that both Nadabatha and Medaba were on the same side of the Jordan. That Nadabatha was a city in Phœnicia is utterly impossible. The name has not as yet been identified by Robinson or other travellers with any given locality.—I. J.

NAGGE (Ναγκα, or according to some MSS. Ναγαί), one of the ancestors of our Lord (Luke iii. 25). The name corresponds to the Heb. נֶגֶג, *Nogah*, Sept. Ναγκαί, which was the name of one

of David's sons (1 Chron. iii. 7). The name may have been perpetuated in the Davidic line, not without some allusion to its meaning (*splendour*), and the belief that the promised glory of the seed of Jesse should surely come.—W. L. A.

NAHALAL, and NAHALLAL (נַחֲלָל; Ναβαδλ; Alex. Νααλώλ; *Naalol*), a town of Zebulun (Josh. xix. 15), assigned to the Levites (xxi. 35). It is grouped with Bethlehem and others apparently in the interior of the territory. Bethlehem has been identified with the hamlet of Beit Lahm, about seven miles west of Nazareth; and Nahalal could not have been far distant from it; but the exact site is unknown. In Judg. i. 30 we read, 'Neither did Zebulun drive out the inhabitants of Kitron, nor the inhabitants of *Nahalol*.' This is doubtless the same place. The Hebrew letters are the same (נַחֲלָל), only differently pointed; but the LXX.

reads Δωμανά, and in the Alex. Ἐναμμάν; the Vulgate, following the Hebrew, has *Naalol*. Eusebius, by some unaccountable oversight, states that this town, which he calls *Neila* (Νεῖλα), lies in Batanea; that is, away east of the Jordan (*Onomast.*, s. v. *Neila*). Van de Velde, following Schwartz, would identify Nahalal with the modern village and ruins of *Malâl* (*Memoir*, p. 335; cf. Schwartz, p. 172); but *Malâl* is more probably the site of the ancient *Marala*. It is true that in the *Gemara Hierosolymitana*, the reading *Mahalol* (מַחֲלוֹל) occurs in Josh. xix. 15, which doubtless suggested the theory of Schwartz (Reland, *Pal.*, p. 884). It has nothing else to support it.—J. L. P.

NAHALIEL (נַחֲלִיֵּאל, 'valley of God'; Naaliel; *Nahaliet*), a station of the Israelites mentioned only in Num. xxi. 19. The difficulties connected with the passage in which this word occurs have been already pointed out in the article MATTANEH. It seems probable, as there stated, and as is maintained by Kennicott, that the names *Mattaneh* and *Nahaliet* were intended to express figuratively some signal blessings which occurred to the Israelites at these places. They were not mere geographical names. Perhaps Nahaliet was the name applied by a thankful people to the valley in which God gave them a miraculous supply of water, and at which Israel sang the song of praise, 'Spring up, O well; sing ye to it' (ver. 17). Eusebius mentions Naaniel (Ναανήλ; Jerome, *Naaliet*; *Onomast.* s. v.), but simply as a station of the Israelites near the Arnon. It does not appear that he knew anything more of it than is recorded in Numbers. The name does not occur at all in the general itinerary given in Num. xxxiii., which thus appears to confirm the interpretation given above. Between the streams of Zurka Ma'in and Môjib (Arnon), is a streamlet in a deep wild ravine flowing into the Dead Sea. Its name is Wady Wâleh; but D'Anville, on his map, calls it *Nahaliet*, a name, Burckhardt assures us, unknown to the Arabs (*Travels*, p. 371); and for which there is no authority. One of the upper tributaries to the Môjib is Wady *Enkheilch*; and this word bears some remote resemblance to *Nahaliet*, as is stated by Mr. Grove (*Smith's Dict. of the Bible*, s. v.) We cannot place much dependence upon this suggestion; but it may serve to draw the attention of future travellers to the spot.—J. L. P.

NAHALLAL. [NAHALAL.]

NAHALOL. [NAHALAL.]

NAHASH (נָחָשׁ, *a serpent*; Sept. Νάας). 1. A person named only in 2 Sam. xvii. 25; and as he is there described as the father of Abigail and Zeruiah, who are elsewhere called the sisters of David, this must have been either another name for Jesse, or, as some suppose, of a former husband of David's mother [DAVID]. 2. King of the Ammonites, noted for the barbarous terms of capitulation which he offered to the town of Jabesh-Gilead, and for his subsequent defeat by Saul [JABESH]. It was natural that the enemy of Saul should be friendly to David; and we find that he did render to the latter, during his persecutions, some acts of kindness, which the monarch did not forget when he ascended the throne of Israel (2 Sam. x. 2; 1 Chron. xix. 2). These acts are not specified, but he probably offered the fugitive hero an asylum in his dominions.—J. K.

NAHAVENDI, BENJAMIN B. MOSES (בִּנְיָמִין בֶּן־מֹשֶׁה נְהַוֵּנְדִי), a celebrated Karaite commentator who flourished about A.D. 800, and derived his name from his native place Nahavend, in ancient Media. He not only immortalised his name by effecting a reformation and consolidation in the opinions of the Jewish sect called Karaites, and by being next in importance to Anon, the founder of this sect, but has greatly distinguished himself as an expositor of the Hebrew Scriptures. He wrote, (1.) A Commentary on the Pentateuch, in which he illustrates the Mosaic enactments by copious descriptions of the manners and customs of the East. Comp. Pinsker, *Likute Kadmoniot*, p. 72, Appendix; (2.) A Commentary on Isaiah, in which he explains away all the Messianic prophecies; comp. Jepheth *on Is.* liii.; (3.) A Commentary on Daniel. He explains the 'thousand three hundred and thirty-five days' (xii. 12), as denoting so many years, and as referring to the end of time, which he calculated would begin 1010 A.D.; comp. Pinsker, *ibid.*, p. 32, Appendix; (4.) A Commentary on the Five Megilloth, *i. e.*, Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther. In the comment on Ecclesiastes, besides giving a thoroughly grammatical and literal exposition of its contents, he also applies it, in an allegorical or spiritual sense, to the ever-shifting condition of the Jewish nation. Pinsker (*ibid.*, p. 109-111, Appendix) gives a specimen of this commentary, the MS. of which exists in the Paris library; (5.) A Book of Commandments (סֵפֶר מִצְוֹת), in which he propounds the Karaite explanation of Scripture passages in opposition to the Rabbinic expositions; (6.) סֵפֶר דִּינִים, *משאת בנימין*, *The Tribute of Benjamin*, in which he sets forth the penal and civil laws of the Mosaic code; printed at Eupatoria, 1834. Comp. Pinsker, *Likute Kadmoniot*, Vienna 1860, p. 44, ff.; Graetz, *Geschichte der Juden*, vol. v., Magdeburg 1860, pp. 288, ff.; 506, ff.; 518, ff.; Fürst, *Geschichte des Karäerthums*, vol. i., Leipzig 1862, pp. 71, ff.; 157, ff.; Ginsburg, *The Karaites, their History and Literature*, in the 'Proceedings of the Literary and Philosophical Society of Liverpool,' 1862.—C. D. G.

NAHOR (נָחֹר, *snorting*; Sept. Ναχώρ). 1.

Son of Serug, and father of Terah, the father of

Abraham (Gen. xi. 22-25). In Luke iii. 34 the name is more correctly given as NACHOR. 2. Grandson of the preceding, being one of the sons of Terah, and brother of Abraham. Nahor espoused Milcah his niece, daughter of his eldest brother Haran (Gen. xi. 27-29). Nahor did not quit his native place, 'Ur of the Chaldees,' when the rest of the family removed to Haran (Gen. xi. 30); but it would appear that he went thither afterwards, as we eventually find his son Bethuel, and his grandson Laban, established there (Gen. xxvii. 43; xxix. 5).—J. K.

NAHSHON (נְחֹשְׁתָן, *enchanter*; Sept. Ναασ-σών, from which he is called Naason in the genealogies of Christ in Matt. i. 4; Luke iii. 32), son of Aminadab, and prince or chief of the tribe of Judah, at the time of the exode (Num. i. 7; ii. 3). The chiefs of tribes, of which Nahshon was one, took an important and leading part in the affairs of the Israelites, as described in the article TRIBES.—J. K.

NAHUM (נְחֻם; Sept. Ναούμ), one of the twelve minor prophets, and the seventh in order according to the received text. The name, if Hebrew, is probably derived from נָחַם, which in Niphal signifies *to be moved with pity, to be compassionate*, and in Pihel *to console or comfort*; and, as the latter is the more common usage of this verb, Nahum, an adjective formed from it, would mean the consoler or comforter ('Consolator,' Hieronym.). a name with which the character and tone of the prophet's writing fully harmonize. The name נָחַם occurs in Phœnician inscriptions (Gesen., *Monument. Phœn.*, p. 134 and p. 137); and in the form Νάουμος it is found in a Greek inscription given by Boeckh (*Corp. Inscript.*, lib. iv. c. 3).

Hardly anything is known of the *history* of this prophet. He describes himself as 'The Elkoshite' (הַחֶלְקִישִׁי); *i. e.*, a native of Elkosh. This, according to Jerome, was a small village (*viculus*) in Galilee, in ruins at the time he visited it, but well known to the Jews (*Præm. in Nah.*). Cyrill of Alexandria (*on Nah.* i. 1) says vaguely that it was a village somewhere certainly in Judea (πάρος σου τῆς Ἰουδαίας χώρας); but this testimony so far confirms that of Jerome that it places Elkosh in Palestine. An ancient tradition identifies it with Eltesi or Elkeben, beyond, but near to Bethabara (Dorotheus and Epiphani., *De vitis Proph.*, c. 17); but to this no weight can be attached, for the testimony is vitiated by being accompanied with the assertion, that Nahum was of the tribe of Simeon, which had no possessions on the east of the Jordan. The statement of Jerome was accepted without question until Assemani (*Bibl. Orient.*, i. p. 525; iii. i. p. 352) called attention to Alkush, a village in Assyria, ten miles north of Mosul, on the left bank of the Tigris; and many—among whom are Eichhorn (*Eintl.* iv. 390), Ewald (*Proph. D. Alt. Bund.*, i. 350), Ritter (*Erdrunde*, ix. 742), and Layard (*Nineveh and its Remains*, i. p. 233)—have since regarded this as the birth-place of Nahum. But the grounds on which this is rested are very feeble. It is certainly curious that at Alkush there should be a tomb known as that of Nahum; but this is a mere tradition, supported by no monumental evidence and of uncertain origin (Layard,

*loc. cit.*), and the probability is, that, like the grave of Jonah at Nineveh, that of Nahum at Alkush is a mere popular invention, to which the similarity of the name of the village and that of his birth-place gave rise. Besides, even supposing Alkush were the place of his tomb, it would not follow from this that it was also the place of his birth. Ewald lays stress on the prominence given to Assyria in the prophecy, and the cursory reference to Judah, as a proof that it could not have been uttered by any of the older prophets, but must have proceeded from some seer of the captivity, and as favouring the belief that Nahum was born in Assyria. But if Nahum was commissioned to prophecy concerning Nineveh, he could not avoid dwelling chiefly on Assyrian topics; and as the burden of his predictions is the overthrow which is to come upon the Assyrian power by the judgments of Jehovah, the prophecy is adapted for the comfort and encouragement of the Jews, the downfall of whose oppressors it predicts, and therefore is as much addressed to them as are the predictions of Isaiah concerning Egypt, Persia, and Babylon. What Ewald calls the cursory glance of the prophet at Judah (i. 15), is rather to be regarded as indicating the stand-point of his vision, and as the centre to which all his other utterances converge. It was to bring good tidings to Judah, tidings of peace, that he foretold the destruction of her enemies. It may be farther remarked here, that had Nahum been a prophet of the captivity, he would hardly have uttered a prediction concerning the overthrow of Nineveh without some word of consolation to his afflicted brethren, in the midst of whom he was speaking and writing. Stress is also laid by Ewald on Nahum's knowledge of Assyrian affairs, and on the occurrence in his writings of some Assyrian words. But the prophet evinces no greater acquaintance with Assyrian affairs than any intelligent person living in Palestine might easily possess; and if recent investigations have shown a harmony between the prophet's phraseology and the actual circumstances of Nineveh, this only proves, that to him belongs what is a characteristic of the whole inspired volume, that whilst its writers avoid details that would have been unintelligible to those for whom they in the first instance wrote, they are preserved from all statements which the progress of knowledge would prove to have been mistakes. The Assyrian words said to occur in Nahum's writing are only three—a small number on which to build so much. They are, הַצֶּבֶד (ii. 8); כִּנְזָר (iii. 17). Of

these the last occurs in Jer. li. 27, a sufficient proof that, whatever be its origin, it was in use in Judaea as a designation for a captain or chief [CAPTAIN]. The second may be pure Hebrew, a formative from כָּנַז, *to separate*, and having the same meaning as כִּנְזָר, *a crowned head, a prince* (Kimchi), or it may be a compound of כָּנַז and כֶּנֶן, signifying *troop* (Fürst).

The first is a proper name, perhaps the designation of the queen of Assyria, and therefore probably Assyrian; but if so, why might not it be known by a resident in Judaea, just as Pharaoh and other foreign titles were known there, or as Sultan, Shah, and Rajah are known in this country by myriads who never left its shores? On grounds so feeble as these it is not desirable to adopt an hypothesis which is opposed to one that has no improbability

attaching to it, and has come down to us, with general consent, from antiquity.

Still greater uncertainty attaches to the *time* when Nahum lived and prophesied. There is hardly a reign from that of Jehu to Zedekiah under which he has not been placed by some critics; while Eichhorn pronounces it impossible to arrive at any satisfactory conclusion on the subject. The majority of critics are in favour of making the prophet a contemporary of Hezekiah, and suppose the prophecy to have been delivered soon after the siege of Jerusalem by Sennacherib (Is. xxxvii. 36). That it cannot be placed earlier than this appears, from ii. 2, where there is an evident allusion to the deportation of the ten tribes; and that it cannot be placed much later follows from the allusions to the kingdom of Assyria as then in a prosperous state, and to Nineveh as still existing in strength and majesty—a state of things which could hardly be said to exist after the reign of Esarhaddon, the successor of Sennacherib, and which wholly terminated when Nineveh was taken by Cyaxares and Nabopolassar. Still there is nothing to fix the prophecy to the time of Hezekiah. Appeal has been made to the language of i. 11, 12; ii. 13; in the former of which passages it is supposed that the prophet alludes to the invasion of Judah by the Assyrian host, and in the latter to the mission of Rabshakeh (Is. xxxvi.) All that one can say of this is that it *may* be so; but the allusion is by no means certain, and on so slender a basis no solid conclusion can be built. If the invasion of Judah by Sennacherib be the leading theme of the prophet, it is extremely probable that he prophesied in the reign of Hezekiah; but to assume this is to assume substantially the point to be proved. An attempt has been made to fix the date of Nahum's prophecy by comparing parts of it with similar passages in the writings of Isaiah; viz., Nah. iii. 5 with Is. xlvii. 2, 3; Nah. iii. 7, 10, with Is. li. 19, ff.; Nah. ii. 1 with Is. lii. 1, 7; Nah. ii. 3 with Is. lii. 8. The resemblance between these passages, it is alleged, is so close that the one writer must have had the other before him when composing his own oracles; and as it is assumed that Nahum was the copier, and as Isaiah's writing must be placed in the latter part of the reign of Hezekiah, it is concluded that Nahum must have written towards the close of that reign or early in the following. But allowing the similarity of the passages, everything else in this argument is mere assumption, any part of which may be reversed with equal probability; and accordingly we find that while Keil and Otto Strauss hold Nahum for the borrower, Delitzsch and Nägelsbach attribute this to Isaiah. The supposed allusion to Sennacherib's invasion in i. 14 has been thought to find support from the words אֵשִׁים קִבְרֵךְ, which, joined

as the accents direct with what precedes, may be rendered, 'I will make it [the house of thy gods] thy grave,' and may be viewed as referring to the slaughter of Sennacherib in the temple of his deity (Is. xxxvii. 38). But to this much weight cannot be attached; for, on the one hand, the rendering in the A. V. is quite as likely to be the correct one as that suggested, and, on the other, it by no means follows that when a man's grave is said to be made in any place it means that in that place he is to be murdered. The allusion to No-Ammon in iii. 8 may indicate that the prophecy of Isaiah

against Egypt (xx.) had been fulfilled when Nahum wrote; but it is impossible to elicit any precise chronological datum from this. On the whole, while there is no cogent reason against our regarding the prophet as living in the time of Hezekiah and contemporary with Isaiah and Micah, the evidence for this does not seem strong enough to justify us in asserting it.

The prophecy of Nahum is directed against Nineveh and falls into three parts. The *first* (i.) contains the introduction (1-10) and the theme of the prophet's oracle (11-14). The *second* (ii.) sets forth the calamity which should come upon the Assyrian empire. And the *third* (iii.) recapitulates the reasons for the judgments that should be thus inflicted, and announces the certainty of their coming. The whole forms one continuous composition. There is no ground for the opinion which some (Huet, Kalinsky, Bertholdt) have maintained, that the three parts of the book were produced at different times.

The *genuineness* of this prophecy has never been called in question. The words in the inscription, כִּטְמָה נִינְוָה, have been subjected to suspicion by some on the ground that, as the proper commencement of the writing follows, they are probably a later addition; but, as Hävernick remarks, there is nothing unfit in the arrangement which makes the announcement of the subject precede the announcement of the author, and therefore nothing improbable in the supposition that both parts of the inscription came from the same pen—that of the author.

The style of Nahum has called forth commendations from critics of every school. Lowth says that 'none of the minor prophets seem to equal him in sublimity, ardour, and boldness of spirit,' and pronounces his 'prophecy an entire and just poem' (*Prælect.* xxi.) Eichhorn warms into eloquence as he enlarges on the varied excellences of his language and composition, and De Wette pronounces his writing classic in all respects. The language is that of the best age of Hebrew literature. A few Aramaic forms have been imputed to him—viz., נָהַג, *he sighed* (ii. 8), רוּחַ, *running*

(iii. 2), and פְּלָדוֹת, *torches* A. V., more properly (ii. 3); but the second of these occurs in the song of Deborah (Judg. v. 22), and the others are probably, like it, only archaic or unusual terms. Peculiar to Nahum also is the use of רָעַל (ii. 4), כִּבְיָקָה and בִּקְיָקָה (ii. 11), מְנוּזָר (iii. 17), יָבֵהָה (iii. 19), and the suffix forms גְּבוּרֵיהֶוּ (ii. 4), and מְלָאָה כִּכָּה (ii. 14).

NAIL (נַפֵּר; Chald. נַפֵּר), the horny covering of the extremities of the fingers or toes of certain animals. The former of these names (which occurs Deut. xxi. 12) is derived from the use of the nail in scraping or scratching (from נָפַר = טָפַר); with the same underlying idea the word is used of the stylus

or graver (Jer. xvii. 1). The latter is used not only of the nail of a man (Dan. iv. 33), but also of the claw of an animal (Dan. vii. 19).

Considerable diversity of opinion has arisen as to the meaning of the injunction regarding the captive's nails in Deut. xxi. 12. The verb in the original (עָשָׂה, 'asah'), translated 'pare' in the A. V., means simply, *to work, to make, to prepare*. In 2 Sam. xix. 24, it is used of dressing the feet and trimming the hair; and in general it may be understood, when applied to any part of the person, to indicate the using of means to make that portion such as it ought to be. This seems sufficient to exclude the notion that the captive damsel was simply to let her nails grow; for it is absurd to suppose, that the injunction to do something to her nails means she was to do nothing to them. Further, the *doing* of the nails can only mean the paring and trimming of them; there is nothing else to be done to them. This concludes in favour of the rendering in the A. V. But why, it is asked, was the damsel to trim her nails? Was this any sign of mourning, such as the shaving of the head, which was also enjoined on her? The reply to this is, that whether it was a sign of mourning or not, it was in keeping with that state of seclusion in which she was required to remain for a month; for, as Eastern women nourish the growth of their finger-nails, that greater effect may be given to the staining of them with henna, the injunction to *pare* them was virtually an injunction to abstain from one of the favourite appliances of the female toilette.—W. L. A.

NAIL. There are two Hebrew words thus translated in the A. V. יָתֵר, *yathed*; Sept. πείσsalος, which usually denotes a peg, pin, or nail, as driven into a wall (Ezek. xv. 3; Is. xxii. 25); and more especially a tent-pin driven into the earth to fasten the tent (Exod. xxvii. 19; xxxv. 18; xxxviii. 31; Judg. iv. 21, 22; Is. xxxiii. 20; liv. 2). Hence, to drive a pin, or to fasten a nail, presents among the Hebrews an image of a fixed dwelling, a firm and stable abode (Is. xxii. 23). And this image is still frequent among the Arabs, as shown by several quotations produced by Gesenius, in his *Thesaurus*, under this word. A pin or nail is also, by a further application of the metaphor, applied to a prince, on whom the care and welfare of the state depends (Zech. x. 4), where the term פִּנָּה, *corner stone*, is applied to the same person denoted by the word 'nail.' All these allusions will seem very plain, if we bear in mind the leading sense of the word, as referring to those large nails, or pins, or cramps, used in applications requiring great strength, being driven into walls, or into the ground.

2. מִסְמְרוֹת, *mismeroth*, which, with some variations of form, is applied to ordinary and ornamental nails. It always occurs in the plural, and is the word which we find in 1 Chron. xxii. 3; 2 Chron. iii. 9; Is. xli. 7; Jer. x. 4; Eccles. xii. 11). The last of these texts involves a very significant proverbial application—'The words of the wise are as nails infixed,' etc., that is, 'they sink deep into the heart of man.' The golden nails of the temple are denoted by this word.—J. K.

NAIN (נַאִין; *Naim*), a town (πόλις) mentioned only in Luke vii. 11; and the scene of one of our Lord's greatest miracles—the raising of the widow's

son to life. Nothing is there said of the situation of Nain. It could not have been far distant from Capernaum, for, after spending the day in that place, it is said—'And it came to pass *the day after*, that he went into a city called Nain.' It is somewhat remarkable that this stupendous miracle, which roused the attention of the whole country, is not referred to by any of the other evangelists; nor is Nain mentioned in any other part of Scripture. Josephus speaks of a Nain, but it was different from this, having been situated in Judæa (*Bell. Jud.* iv. 9. 5). The site of Nain is described by Jerome as being two miles south of Tabor, near Endor (*Onomast.*, s. v. *Nain*; Eusebius has twelve miles, but the error is probably that of a copyist writing  $\beta$  instead of  $\beta$ . Neither this number, however, nor that of Jerome is accurate). Phocas places it north of Tabor (see Reland, *Pal.*, p. 904).

Nain still exists, and bears its ancient name. It stands on a bleak, rocky slope, on the northern declivity of Jebel ed-Duhly (the 'hill Moreh' of Scripture, and the 'Little Hermon' of modern travellers), directly facing Tabor, from which it is four miles distant, and two and a half miles south-west of Endor. It is a small, poor hamlet, of some twenty houses, or rather huts. Round the houses, however, are pretty extensive ruins; and the writer found some traces of what appeared to be an ancient wall. The most interesting antiquities are tombs, hewn in the rock, a short distance east of the village. It was in this direction our Lord approached, and probably to one or other of those very tombs they were bearing the corpse, when he met and arrested the mournful procession (see Thomson, *Land and the Book*, p. 445; *Hand-book*, p. 358; Stanley, *S. and P.*, p. 349). The situation of Nain is extremely beautiful. At the foot of the slope on which it stands is the great plain of Esdraelon, bounded on the north by the graceful wooded hills of Galilee, over which the snow-capped summits of Hermon and Lebanon appear. Probably the name (*Nain*, or *Naim*, נעים, 'pleasant') was suggested by the beauty of the situation. The singular stories of the Rabbins regarding this, and the blessing pronounced upon Issachar, may be seen in Lightfoot (*Opera*, ii. 478). That author would identify Nain with Engannim, trusting mainly to some remarks of Josephus; but the two places were far apart (see, however, Lightfoot, *l.c.*)—J. L. P.

NAIOTH (נֵיֹוֹת, pl. of נֵיֹוֹה; Sept. *Navdθ*), a place in or near Ramah, where Samuel abode with his disciples (1 Sam. xix. 18, 19, 22, 23; xx. 1). Naioth does not appear to have been a distinct town or village; and we are willing to accept the explanation of R. Isaiah and other Jewish commentators, who state that Ramah was the name of a hill, and Naioth of the place upon it. In that case Naioth must be fixed on the same grounds which determine the site of Ramah. According to the Targ. Jon. it was the *בית הולפנא*, a *house of instruction*, i. e., the place in which the school of the prophets resided, and received their training.

NAKED. The word עָרֹם, *arom*, rendered 'naked' in our Bibles, does not in many places mean absolute nakedness. It has this meaning in such passages as Job i. 21; Eccles. v. 15; Mic.

i. 8; Amos ii. 16. But in other places it means one who is ragged or poorly clad (John xxi. 7; Is. lviii. 7), in the same sense as γυμνός in James ii. 15; which does not indeed differ from a familiar application of the word 'naked' among ourselves. A more peculiar and Oriental sense of the word is that in which it is applied to one who has laid aside his loose outer garment, and goes about in his tunic. When, therefore, Saul is described as having lain down 'naked' (1 Sam. xix. 24), we are to understand that he had laid aside his flowing outer robe, by which his rank was most indicated, and was therefore a king 'naked' or undressed; and it was thus that Isaiah went 'naked' and barefoot (Is. xx. 2; comp. John xxi. 7). The point of the expression may be the better apprehended when we mention that persons in their own houses freely lay aside their outer garment, and appear in their tunic and girdle; but this is undress, and they would count it improper to appear abroad, or to see company in their own house, without the outer robe. In fact, our use of the word 'undress' to denote not nakedness, as it would literally imply, but a dress less than that which we consider full and complete, corresponds very exactly to this signification of the word.

The metaphorical uses of the word in Scripture are too obvious to require explanation.

NAME (שֵׁם; Sept. and N. T., *ὄνομα*). As the name by which an object is designated becomes that by which it is known,\* and so gradually comes to represent or stand for the object, the word Name in Scripture is often used, where not a mere designation is intended, but the object itself as so designated, and thereby made known to us. It is in this sense that the word is used of God so frequently in the Bible, in such phrases as—the Name of Jehovah, My Name, the Name of the Lord Jesus Christ, etc. By such phrases is to be understood, not any appellation by which the Divine Being, in any of His Manifestations, is designated; nor, as is often said, The Divine Being Himself, as a Personal existence; but properly, The Divine Being as revealed or made known to men. The Name of God is God as revealed. Hence the earnest desire of men to know God's name (Gen. xxxix. 29; Exod. iii. 13). Hence God is said to put his Name in a person or place (Exod. xxiii. 21; comp. xxxiii. 14 and xl. 34; Deut. xii. 5; xiv. 23), by which is meant that God is revealed in that person or place. Men are commanded to put their trust in God's name, *i. e.*, in God Himself, as revealed; the name of God is said to be 'excellent in all the earth' (Ps. viii. 2), *i. e.*, God is revealed to us gloriously in his works; men are said to be called by God's name (Jer. xiv. 9), because Jehovah is revealed to them, is in the midst of them; God saves men by his name (Ps. liv. 1), *i. e.*, by the manifestation of Himself on their behalf; and many other similar usages in the O. T. In the N. T. the phrase, name of Christ, is similarly employed. Men believe on his name (John i. 12; 1 John v. 13), are baptized for his name (Acts xix. 5), have

\* The English word *Name*, and its cognates in the Aryan languages (Sansc. *nāman*, Gr. *ὄνομα*, Lat. *nomen*, Goth. *namā*, etc.), are derived from a root, *gnā*, which signifies to *know* (Max. Müller *On the Science of Language*, sec. ser., p. 406).

life through his name (John xx. 31), are saved by his name (Acts iv. 12), are justified by his name (1 Cor. vi. 11), assemble in his name (Matt. xviii. 20), do miracles by his name (Mark xvi. 17; Acts xvi. 18), etc., where the due meaning of the statement can be obtained only by regarding the phrase as indicating the Saviour as manifested for the help and benefit of men. In the same way are we to understand the baptismal formula; men are baptised for the name of the Father, Son, and Holy Ghost, inasmuch as they are baptised with a view to obtaining the blessings which God, as the revealed Triune God, is ready to bestow [BAPTISM].—W. L. A.

NAMES, PROPER, chiefly of the O. T. It is so interesting, as well as useful, to know the original signification of proper names, that a careful investigation of their nature has many advantages. The chief use, however, which accrues from an accurate knowledge of them is, that we are by their means enabled to attain a more lively apprehension of the truth of ancient history.

Without doubt many parts of this subject are very obscure, as proper names are so often only the scattered and decayed ruins of a distant age. But as soon as we take a more animated view of all the relics that have been preserved to us, and compare them more cautiously with the customs of other nations, we are able to discern their more general and important features, at least, with reasonable certainty.

There are two chief classes of proper names, those of *men*, and those of every thing besides man, as *beasts*, *places*, and *festivals*. Those of the latter class are much more durable in their form, as man alone is always changing; they are also important for history, and it is desirable to ascertain, as far as possible, their original signification. But the proper names of the changeable races of men are in a much higher degree those in which history reflects itself in its vicissitudes; they also constitute the more numerous class. For these reasons, we confine ourselves at present to the proper names of men, as it is beyond our present scope to treat the entire subject.

The first fact that strikes us, on a general view of them all, is, that the ancient Hebrews always retained the greatest simplicity in the use of names. In reality, there is always only one single name which distinguishes a person. Where it is necessary, the name of the father is added; sometimes that of the mother instead, in case she happens to be more celebrated\* or the line of descent is traced farther back, often to the fourth generation, or even farther. Mere epithets, like 'David the king,' 'Isaiah the prophet,' always express the actual and significant dignity of a man. The instances in which a person receives two names alternately, as Jacob-Israel, Gideon-Jerubbaal (Judg. vi. ix.), are casual and rare, and are not to be ascribed to a general custom of the people. On comparing the mode in which the Arabs use proper names, we discover a striking difference. With them, every man of any importance always receives, besides his proper name, and perhaps nickname, a prænomen (*Kunje*), which might be most

fittingly called the name of compliment, or domestic name, as it denotes the man under the special relation of father, as *Abu Zaid*, 'father of Zaid,' and, in addition to these, a name of honour for the world—which, at least, has prevailed generally since the time of the Abbassides, and which usually exalts, in pompous terms, the person in relation to religion (as *Salah-eddin*, 'the welfare of religion'), or to the state (as *Saif-eddaula*, 'the sword of the state'). In this the Arabs are absolutely a modern people, and overvalue externals as much as the Europeans of the present day. How much more simple were the Hebrews during the most flourishing period of their history! For, in this respect also, the usage of names is only an evidence of the predominant customs and views of whole periods.

When we, then, consider proper names with reference to the grand distinction of times, we are able to discover in their varying use nearly the same three periods as those which mark the history of this people in all other respects. These are the three periods which are most simply defined by the three different names of the nation which prevailed in each: the *Hebrews*, as they were called in early times, gradually adopted the name of *Israelites* in the middle period, and exchanged this name, in the third, for that of *Jews*. It is a remarkable, but nevertheless true coincidence, that just as the name of the nation varies in these three periods, the colour of the names of individuals changes in like manner, according to the different tendencies characterising the times.

I. In the first period, which, for reasons adduced below, we here limit by the commencement of the Mosaic religion, we are able to see the whole process according to which names are formed among this people: the distinct character of the formation of names which was established in this primitive time, continues essentially the same in the succeeding period, while the elements of which names are formed undergo a partial change. For this reason, we may explain the laws of this formation in terms of merely general application.—Now, names are either *simple* or *compound* words, or also words which arise from either of these kinds by *derivation*.

1. The *simple* names exist in great abundance; and their signification, as to the mere word itself, is generally evident: as דין, 'judge,' מִיָּן, the Latin *dexter*, an ancient name, according to Gen.

xlvi. 10, 1 Chron. ii. 27; שָׂאֵל, 'desired,' also an ancient name according to Gen. xlv. 10, cf. xxxvi. 37; הִבֵּר, 'hero,' 1 Kings iv. 19. Thus, most of them express an honourable sense; although examples are not wanting of the direct contrary, as עֲקִישׁ, 'crooked,' 2 Sam. xxiii. 26.

With what ease, also, feminine words become names for men, is shown by cases like נָחֵר, 'vulture,' 2 Sam. iii. 7, xxi. 8; cf. Gen. xxxvi. 24; יוֹנָה, 'dove,' which are just as applicable to men as the masculine שָׂעֵל, 'fox,' 1 Chron. vii. 36.

Diminutives, which are so frequently used as proper names by the Arabs, are rare among the Hebrews; but are by no means wanting, as is proved by זִבְגָּלִין or זִבְגָּל, the name of the son of

\* The three heroic brothers, Joab, Abishai, and Asael, are always called after their mother Zeruja (1 Chron. ii. 16).

Jacob, and יִרְתֵּנִי or יִרְתֵּנִי, the name of the singer of David. All those names which are formed with a prefixed *jod* are to be considered as especially ancient, because this nominal formation became entirely obsolete in the language, and recurs almost only in proper names, as is shown not only by the well-known names יְצַחֵק, יוֹסֵף, יְהוֹדָה, יוֹסֵף, but also by a number of less common ones, as יִשְׁזַב, Num. xxvi. 24; יִרְיָב, 1 Chron. iv. 24; יִמְלֵךְ, iv. 34; יִעֲקֹב, v. 13; יִצְחָק, Exod. vi. 18; יִבְרָךְ, 2 Sam. v. 15; יִפְתָּה, Num. xiii. 6, 1 Chron. vii. 38; יִרְחָם, 1 Sam. i. 1, 1 Chron. viii. 27; and others. There is an ancient adjective-ending, that in *ām* or *om*, which has fixed itself most firmly in proper names, as יִחְזָק, 1 Chron. iv. 6; יִנָּם, Ezra ii. 48; מִרְיָם, the sister of Moses, and בְּרִשָׁם, his son; בְּמִיָּהם, 2 Sam. xix. 38, which not only exists also in the form בְּמִהוּם, Jer. xlii. 17, but in בְּמִהוּן, 2 Sam. xix. 41, according to customary changes. We are anxious not to fatigue the reader by such philological observations, but we can assure him that a deeper investigation into these apparently dead subjects will lead to the discovery of much that illustrates the ancient language and customs of the people.

2. The compound names, however, are more important for history, because they express more complete and distinct ideas than the simple names. Some of them are altogether isolated, as פִּינְחָם, properly 'serpent's mouth,' the grandson of Aaron; יִשְׁשַׁכָּר, the son of Jacob; *Oholiab* (Exod. xxxi. 6), 'father's tent,' a name resembling the Greek Patrocles. But most of them bear a general resemblance to each other, and follow in shoals certain dominant opinions and customs; and these last are what we must particularly consider here.

A great number of them owe their origin to the relations of the house, as the sense of the first word of the compound shows. Most of these have the word *abi*, 'father,' for their first member, as *Abiezer*, *Abital*, *Abigail*.<sup>\*</sup> The prevalent opinion among modern scholars<sup>†</sup> respecting this class is that they are really epithets, which have afterwards, as it were casually, become proper names; that *Abigail*, for example, is literally 'father of joy,' or 'whose father is joy,' that this means *cheerful*, and thus became a proper name; and in proof they appeal to the Arabic language, in which such periphrases with *abi* are common. In reality, however, this assumption is extremely uncertain and erroneous. The Arabic undoubtedly possesses a vast number of such names, as *Abul-Ma'ālī*, 'the father of dignities,' *i.e.*, the venerable; *Abul-husni*, 'the father of beauty,' *i.e.*, the peacock; *Abul-hussaini*, 'the father of the little fortress,'

*i.e.*, the fox, who lives in holes; *Abu-Aijūba*, 'the father of Job,' *i.e.*, the camel, because it is as patient as Job. But such names, which may be formed *ad libitum*, by hundreds, belong in Arabic rather to the artificial, often to the sportive, and generally also to the later, language, and were not possible until the Arabs had adopted the custom of always using a prenominal, or domestic name—the above-mentioned *Kunje*—in addition to the chief name. As soon as ever it became customary to give a man a double designation—his real name, and the more familiar, often sportive, domestic name—this custom was gradually transferred to other subjects, and then these in themselves extraordinary circumlocutory names arose.\* But such domestic names were never in use among the Hebrews—nay, more, such periphrastic names with all do not even occur in their poetic diction; as the only passage which could be adduced in favour of it (Job xvii. 14) is not, when taken in its true sense, at all an instance in point. To call the camel 'father of Job' is undeniably a kind of sportive name: and are we to assume that this jesting custom prevailed among the primitive Hebrews? Thus we have here another striking example of the danger attending superficial comparisons of Arabic with Hebrew; for this view never could have been formed by those who were intimately acquainted with the treasures of Arabic literature.† I believe, on the contrary, that the first member of such compounds did indeed, in the early times in which they were first formed, really denote nothing but the father of the son who is named in the second member; but that subsequently, for a particular reason, they were employed only to denote a kind of dignity. If we compare the numerous genealogical registers in the books of Chronicles, which, dry as they are, yet contain much that is instructive, we find that a man is often called the *father*, that is, the *lord*, of a town or village, as 'Ashchur the father of Teqoa,' 1 Chron. ii. 24; 'Mesha, the father of Zif,' ver. 42; 'Meon, the father of Beth-zur,' ver. 45; 'Shobal, the father of Qirjathyearim,' ver. 50, etc. In these cases the meaning cannot be doubtful, as the second member always signifies a place; but this is at the same time a genuine Hebrew custom, which will hardly be found among the other Semitic nations. As soon, then, as it had become customary to use the word 'father' to denote a kind of dignity in the family and in the nation, it was easy to prefix this short word, as a mere term of honour, to any name, by way of distinguishing the eldest or the favourite son. Several cogent arguments favour this view. First, it can almost always be proved, even from our present scanty

\* See a learned article on the *Kunje*, by Koscgarten, in the *Zeitschrift für das Morgenland*, i. 297, seq.; in which he has only neglected to insist sufficiently on the fact, that *abu* originally denoted the actual father of the son mentioned in the second member.

† We could more easily admit such a metaphorical sense in the compounds with *son*, since בֶּן is really often used in a highly metaphorical sense. Bathsheba is certainly not the daughter of a man named Shēba, 2 Sam. xi. 3. Such compound names with *son*, however, are, on the whole, rare, and are only found in some frequency in 1 Kings iv. 7, seq.

\* This *abi* was, without doubt, gradually shortened to *ab*, as is proved by אֲבִינֵר beside אֲבִינֵר, 1 Sam. xiv. 50, 2 Sam. ii. 8, and by many other examples. The further softening of this *ab* to *eb* is only possible when a *j* follows it, as אֲבִיתָר, 1 Sam. xxii. 20; אֲבִישָׁף, 1 Chron. vi. 8, 22, beside the older form אֲבִישָׁף, Exod. vi. 24.

† For instance, Gesenius in his *Thesaurus*.

documents, that the second member of such compound names was also used, by itself, as a proper name, as *Dân* beside *Abidân*, Num. i. 11; *Ezer*, 1 Chron. vii. 21, Neh. iii. 19, beside *Abiezzer*; *Asaph* beside *Abiasaph* or *Ebjasaph*; *Nadab*, Exod. vi. 23, beside *Abinadab*; *Nâam* or *Nôam*, 1 Chron. iv. 15, beside *Abinoam*; *Jathar* or *Jether*, a very common name, beside *Ebjathar*; nay, they are even found in the same family, as *Abiner* or *Abner*, the son of *Ner*, 1 Sam. xiv. 50, 2 Sam. ii. 8. Moreover, this explains how other words of relationship are prefixed in the same way; the latter member is always a word which was originally a proper name, which is only multiplied by means of these little prefixes, and in which we indeed no longer discern why *father* is the word prefixed in one instance, and *brother* that in another. *Achi*, i.e., 'brother,' is often prefixed in this manner; thus, the one was called *Râm*, 1 Chron. ii. 9, 25, 27, Ruth iv. 19; the other *Abirâm*, Num. xvi. 1; and the third *Achirâm*, Num. xxvi. 38. *Achinoam*, *Achiezer*, and others of this sort, are easily accounted for. *Chamu*, i.e., 'brother-in-law,' is rarely so used; as *Chamutal* or *Chamital*, 2 Kings xxiv. 18, Jer. lii. 1; beside *Abital*, 2 Sam. iii. 4. Under this class we may also include *אִישׁ*, 'man,' with which several names are compounded. As the Hebrews had a simple name, *Hûd* or *Hôd*, i.e., 'splendour' (cf. *Jehûdah*), 1 Chron. vii. 37, and an *Abihud*, 1 Chron. viii. 3, and *Achihud*, Num. xxxiv. 27, so also they formed an *Ischûd*, 1 Chron. vii. 18; as they had an *Abitûb* and *Achitob*, so also an *Ishtûb*, 2 Sam. x. 6; and as there was an ancient name *Chûr*, 'free,' who is mentioned in Exod. xvii. 10 as a friend of Moses, so *Ash-chûr*\* appears as a relative of the family of *Chûr*, 1 Chron. iv. 5, comp. ver. 1.

Another, but a smaller, class consists of names compounded with *עַם*, 'people,' resembling the many Greek compositions with *laos* and *ἄσος*; and just as in Greek *δημος* is placed first or last (Demosthenes, Aristodemos), so also *עַם* is at one time found in the first, and at another in the last place; only that, according to the laws of the Semitic language, the sense of one of these positions is exactly the reverse of the other. It is important, however, to remark here that in this, just as in the former class, one member is generally a word which is used by itself as a proper name; that here, therefore, instead of a reference to the

mere family, a wider regard to the whole people prevails, and an individual is considered with relation to his nation. Thus the common name *עַמִּינַדָב*, Exod. vi. 23, the German *Edelvolk*, i.e., one who belongs to the noble people, so that it answers to the Greek Aristodemos; *עַמִּיהוּד*, *Glanzvolk*, also a favourite name, which would be Phaidrodemos in Greek; on the contrary *יְהוֹרֵעַם*, 2 Sam. iii. 5, perhaps the German *Volkhart*, the Greek Demosthenes; *רַחֲבֵעַם*, *Volkbreit*; *יִרְקֵעַם*, *Volkgrün*, which occurs in 1 Chron. ii. 44 as the name of a place, but which must originally have been the name of the founder of that place. As all these compounds must be conceived to be in the state construct, so likewise we are probably to take the names *יִרְבֵּעַם*, properly 'people's increaser,' a suitable name for a prince, and *יִשְׂרָעֵם*, 'people's turner' or 'leader,' for, as was observed above, the simple names are often formed with a prefixed *jod*; and we actually find *יִשָּׁב* as a simple name, in Num. xxvi. 24, 1 Chron. vii. 1.

Most of the compound names, however, rather endeavour to express a religious sense, and therefore often contain the divine name. And here we at the same time find a new law of formation: as these compounds are intended to express a complete thought, such as the religious sentiment requires, a name may consist of an entire proposition with a verb, but of course in as brief a compass as possible; and indeed shorter compounds are made with a verb than with a passive participle, as *נָתַן אֱלֹהִים* (in the N. T. *Nathanaël*, properly 'God-gave,' i.e., whom God gave, given by God, Θεόδοτος or Θεόδωπος) sounds shorter than *נָתַן אֱלֹהִים* with the participle, which would certainly express the same sense. But as the finite verb, as also any other predicate, can just as well precede as follow, accordingly a great freedom in the position of the divine name has prevailed in this class; and this peculiarity is preserved, in the same case, in the following period: but indeed the Greeks use *Δωποθεός* as well as *Θεόδωπος*. Thus, *נָתַן אֱלֹהִים*, 1 Chron.

ii. 14, or *אֱלֹהִים נָתַן*, Jer. xxxvi. 12. The two names are then generally assigned to two different persons; nevertheless, both combinations may form names for the same person, as *עַמִּינַדָב*, 1 Chron. iii. 5, and *אֱלֵיעָם*, 2 Sam. xi. 3, belong to the same individual. Now, as compound names evidently became very general, it is not surprising that, in the infinite multiplication of names to correspond with the infinite multitude of persons, some proper names were at length formed which solely consist of two names of God himself, expressing, as it were, the ineffably holy name to which the person dedicates himself,\* as *Abiel* and *Eliab*, nay even

\* There is no doubt that this *ash*, as also *esh*, in *אֶשְׂבַּעַל*, 1 Chron. viii. 33, is an abbreviation of *esh*. No words are more liable to such gradual shortenings than proper names, especially those of longer compass. Even *Abi*, above explained, has been sometimes shortened to *i*, in consequence of its frequent use, as is shown by comparing *אִיעֹר*, which occurs twice in Num. xxvi. 30, with the *Abiezzer* of Josh. xvii. 2, Judg. vi. 11; and we must explain the few other names of this kind in the same way, such as *אִיתָמָר*, Exod. vi. 22; *אִיזָבָל*, 1 Kings xvi. 31; and *אִיקָבֹד*, 1 Sam. iv. 21. In the last passage there is an allusion to the sense *without*, which *אִי* considered *per se* may express; but the only conclusion from this is, that this sound had already, in some names, suffered that change constantly.

\* Names of this sort are found among all nations. We may briefly mention that there are persons with the Latin name *Salvator*, with the German ones *Heiland*, *Herrgott*, and that a well-known Dutch orientalist was called *Louis de Dieu*. The impious Seleucidæ took the name *Theos* for a different reason.

*Eliel*, 1 Chron. v. 24, viii. 20, 2 Chron. xxxi. 13. A very important question, however, still remains: what divine names were thus used in the earliest times until Moses? We find that *El* was then the commonest, and *Shaddai* less frequent; the latter is only found in *צור־ישׁת*, 'rock of the Almighty,' Num. i. 6, ii. 12,\* and *עמי־שׁת*, 'people of the Almighty,' ver. 12; still more rarely is *צור*, 'rock,' itself used as a divine name, as *פרה־צור*, Num. i. 10, which is almost equivalent to *פרה־אל*, 'God redeems.' If we now consider that, according to the ancient testimony in Exod. vi. 3, the name *Jahve* (*Jehovah*) was not known then, but that the only other name of God which existed, beside the common *El* and *Elohim*, was the rarer and more awful *Shaddai*, these historical traces which are discovered in proper names, accord most perfectly with that statement, and furnish a very welcome confirmation of it.

On reviewing this whole system of forming compound names, it is evident that they at length became very common, as if their sounding pomp was considered more dignified and attractive; nevertheless, their chief tendency was to express the three great and most comprehensive relations in which a man can stand: namely *Home*, *People*, and *God*. The original luxuriance of all language again gathered itself together in names, as in a fruitful soil; and accordingly there were times, even within the historical period, in which the primitive energies of all language were so busily active even in this apparently barren province, that (since all possible combinations were attempted in order to make an infinitude of names for the infinite number of persons) such names also were devised as, at first hearing, were surprising, as *אבי־הוא*, properly 'self-father,' *אלי־הוא*, 'self-god,' *αὐτὸθεός*, a name which may be old, as it is only now found in the book of Job. And if we compare this Hebrew mode of forming compound names with that of the Greeks and Arabs, as the more familiar examples, we find this remarkable result, although it harmonises with many other phenomena; namely, that it is essentially more like the Greek than the Arab mode; only that the Greeks allude more frequently, in their names, to the *people*, which is characteristic of the whole of Greek life; while the Arabs, who always had families only, but never were a nation, never allude to the *people*, and do not, in composition, possess so great freedom in the position and juncture of words.

3. Lastly, many proper names have assumed the derivative syllable *-el*, or *ai* (which appears to be only dialectically different from *-el*, and is chiefly frequent in the later periods); and we must cer-

\* That is, 'who seeks protection in the Almighty,' like *Διοκράτης*. It is desirable to confine the force of the *-el*, as much as possible, to that of a mere vowel of union, because the uniformity of the other structures of names requires it. There is no doubt, however, that in later times, as this union-vowel became lost to the common language, it was taken as the suffix of the first person, as is shown by the newly-coined poetical name, *איתי־אל*, 'With-me-is-God,' Prov. xxx. 1. But this is not the force of it originally.

tainly consider that, in some cases, this syllable may possibly form mere adjectives, and therewith simple names, as *אמת־י*, 'truemans,' from *אמת*, 'truth,' and *Barzillai*, 'Iron,' or 'Ironman,' the name of a celebrated Gileadite family, Ezra ii. 61; 2 Sam. xvii. 27; or that it is derived from a place, as *באר־י*, Hos. i. 1; 1 Chron. vii. 36, 'he of the well,' or, he of a place known as the well. But it undoubtedly very often also expresses a genealogical relation, like the Greek ending *-ides*, and presupposes a previous proper name from which it is derived; thus the name *הנרי־י*, 1 Chron. v. 14, as surely presupposes the above-mentioned *Chûr*, as the Greek Philippiades does Philippos, and as *Ketûbai*, 1 Chron. ii. 9, one of the descendants of Judah, is connected with the *Ketûb* in iv. 11.\*

Among the names of women, the oldest as well as the simplest which are found, are actually only suited for women, as *Rachel*, 'Ewe'; *Deborah*, 'Bee'; *Tamar*, 'Palm-tree'; *Hannah*, 'Favour,' the mother of Samuel. Those which express such a delicate and endearing sense as *Qeren Happak*, 'box of eye-ointment,' Job xlii. 14, and *חפצי־בה*, 'my delight is in her,' 2 Kings xxi. 1, betray that they were formed in much later times; for, although the first occurs in the book of Job, which sedulously retains all archaisms, it nevertheless belongs to the same date as the latter. It appears indeed to have been customary, at an early period, to form names for women from those of men, by means of the feminine termination; as *חנית*, 2 Sam. iii. 4, beside *חני*, Num. xxvi. 15; *מושל־מות*, i. e., *Pia*, 2 Kings xxi. 19, beside *מושלם*, *Pius*, 1 Chron. v. 13, viii. 17, and *שלמי־ת*, *Friederike*, Lev. xxiv. 11, beside *שלמה*, *Friederich*. But we must not overlook the fact that all these are instances of simple names:† no single example occurs from a compound man's name. As the same compound names, however, are sometimes used both for men and women, and as even those very names are applied to women, which could not originally have been applicable to any but men—as *Abigail*, *Achinoam*—accordingly we must assume that the plastic power of the language had already exhausted itself in this remote province, and that, for that reason, the distinction of the feminine was omitted; almost in the same way as Sanscrit and Greek adjectives of the form *εὐδαίμων*, *εὐτυχής*, are not able to distinguish the feminine in form.

II. This is the whole principle which regulates the formation of Hebrew names, both as it manifests itself in the earliest times, and as it extends

\* It is remarkable that the genealogical relation appears to be sometimes expressed by the mere *ה* of motion, as *יעקב־ה*, 1 Chron. iv. 36, which would be equivalently expressed by a German name *Zu-Jacob*; *ישׁת־ה*, *De Israel*, 1 Chron. xxv. 14, cf. ver. 2; and most distinctly in *השׁבד־ה*, 'reckoned to Dan,' Neh. viii. 4; cf. *ישׁת־ה*, in 1 Chron. xxv. 4.

† Or of those also in which the *masculine* has already dropped the second member; for *Chanani* and *Zabdi*, as is shown below, are shortened from *Chananjah*, *Zabdijah*.

into the succeeding periods, in which it receives new impulses, and undergoes modifications of colour but not of substance.

For if we inquire what new element the Mosaic period introduced into names, we find that, on the whole, it is only the influence of the new religion which manifests itself in the strongest characters, and causes extraordinary innovations. It is not in the Psalms only and other books that we discover how deeply this religion affected men; we may also infer it from the names which became current in that period. Nay, it is only these words of common life which render it evident to our senses with what a power this religion penetrated all the depths of the national mind, and how zealously every man in Israel endeavoured 'to glory in the name of Jahve,' according to the words of the prophet: Is. xlv. 5; cf. Ps. cv. 3.

As the whole national life was renovated by so influential a new religion, the mode of giving names returned to its primitive state, since not only were new names created, but entire sentences, of the shortest compass, expressing the mighty thoughts which agitated the times, were also applied as names.\* Thus, especially in the times in which the Mosaic religion exercised a more vivid influence, names were formed of entire sentences, in which some of its most affecting truths are expressed, as **יְהוֹשֻׁב־חַסֵּד**, 'mercy is recompensed,' 1 Chron. iii.

20; **אֵלֵינוּ**, 'to-Jahve-are-mine-eyes' (as if it were derived from hymns like Ps. cxiii.), 1 Chron. iv. 36, vii. 8, viii. 20; † Ezra x. 22, 27; Neh. xii. 41; **הוֹדִיָּה**, 'praise-ye-Jah' (from well-known passages of the Psalms), 1 Chron. iii. 24; Ezra ii. 40; ‡ as a name of a woman, **הַצֶּלֶל־פָּנַי**, 'Give-shadow-thou-that-seest-me' (God), 1 Chron. iv. 3. But we seem to have the words of a great prophet distributed in names of several relations, when we find the words—

**בְּדַלְתֵּי וּרְכֻמּוֹתַי עֶזֶר**

**כְּלוּתֵי הוֹתִיר מַחֲיוֹת**

i. e., 'I have given great and exalted aid,  
Have spoken oracles in abundance'

(which evidently contain a verse such as an ancient prophecy might begin with), applied to the five musical sons of Hēman—*Giddalti* (ezer), *Romamtierzer*, *Mallōti*, *Hothir*, *Machaziot*; 1 Chron. xxv. 4, cf. ver. 26, 28-31. This is really a remarkable example. We also once find, in Is. vii., a particular representation of the mode in which such names as *Shedrajshub* and *Immanuel* arose in real life.

But it was chiefly only the name of God in this religion, Jahve, which was employed in the forma-

tion of names (in the same way as the earlier divine names were); and it is shortened, when it constitutes the last member of the name, to *-jahu*, or, still more, to *-jah*, and, when it is the first member, to *Jehō-*, or *Jo-*. In this usage it occurs with infinite frequency (the older name *Shaddai* becoming obsolete, and *El* alone continuing in use), while the other member of the name often retains the same form as in the primitive times, e. g., **נְרִיָּה**, like **נֵר**, and **אֲבִינֵר**. The mother of Moses, *Jokebed*,

Exod. vi. 20, is, according to all traces, the first whose name bears evidence of the worship of this God (which is an exceedingly important testimony to the truth of the whole history, but we cannot pursue the subject farther here); and it is a beautiful incident that Moses, with his own mouth, changed the name of his most valiant warrior, *Hoshēa*, i. e., 'Help!' into *Jehoshāa*, i. e., 'God-help'; as Mohammed, in like manner, gave some of his followers names conformable to his new religion.\*

The frequency of such compositions with the name of Jahve may be estimated by the abbreviations which sometimes become customary in such names. Thus **מִיכָיְהוּ**, or **מִיכָיָהוּ** (as it is occasionally pointed), is not only shortened to **מִיכָה**, Judg. xvii. 5, 9-13, cf. ver. 1, 4; 2 Chron.

xviii. 14, cf. ver. 7-13; in which manner we are also to explain the name of the well-known minor prophet. Thus also the common name for men and women, *Abijahu* or *Abija*, is once shortened to *Abi*, 2 Kings xviii. 2.† There are, however, two cases which are not to be confounded with these casual and gradual abbreviations. First, namely, we find the rare instance that a name which has been preserved unchanged, is nevertheless occasionally formed by dropping the syllable *Jo-* or *-jah*: as it is evident that **נָתַן** has been shortened from **נַתְנִיָּה** or **יֹנָתָן**; as likewise **מֹתָן**, 2 Kings xi. 18, from **מֹתְנִיָּה**; and **זָכָר**, 1 Chron.

viii. 31, from **זִכְרִיָּה**; because names which mean 'gave,' 'gift,' 'memory,' do not by themselves produce a suitable sense, and because they never are found with *Abi-*, *Achi-*, and such additions, nor can be traced back into the primitive times. We are therefore obliged, in this case, to assume that these names have been designedly shortened, in the effort to make as many different names as possible; and, as it is not uncommon for two brothers to receive similar names, this may be the immediate cause for the formation of a name *Nathan* beside *Nethanjah*.‡ Secondly, whenever a derivative in *-i* is formed, the addition *-jah*, or

\* Similar instances occurred in England in the seventeenth century.

† In this place we find **אֵלֵינוּ**, which the Masoretes point *Elēnai*; but this would not produce any sense, and a *l* has evidently been omitted. The Sept. reads *Ἐλωαλ*, which is right.

‡ The heavier pronunciation *Hodtejah* seems to be designedly preferred to *Hodūjah*, because *Hodūjah* would easily pass over into *Hodijjah*, which would give a different sense. There is only one other similar example, **יִשְׁשִׁיָּה**, 1 Chron. xi. 46, the meaning of which is obscure.

\* Weil, in his *Leben Muhammads* (Stuttgart, 1843, p. 344), treats this subject too briefly. El-navavi discusses it more at length in the preface to his *Tahāsib elasmāi*, ed. Wüstenfeld, p. 15.

† In like manner, **פִּלְטִי**, 1 Sam. xxv. 44, is an abbreviation of **פִּלְטִיָּה**, 2 Sam. iii. 15.

‡ This case occurs in the same way among the Arabs (of which *Hasan* and *Husain*, the sons of Ali, are the readiest example) as among the Hebrews (cf. *Geschichte des Volks Israel*, i. 321). Instances like *Uzziel* and *Uzzi*, 1 Chron. vii. 7,

even *Jo-* at the beginning, disappears; and in this case also we find *חַנְיָה* (although it is equivalent to the patronymic *Chananiades*), beside *חַנְיָה*, as the name of his brother; 1 Chron. xxv. 4, 23, 25.

III. This is the type and fashion of the names as late as the times after the first destruction of Jerusalem. The influence of the dispersion among foreign nations may, indeed, be immediately traced in the new names which allude to the captivity, as the name of *Zerubbabel* himself, which is a contraction of *זְרֻבְבָּל*, means 'scattered to Babylon.'

Yet this foreign influence is but transient; and in the centuries immediately succeeding the Exile, in which the last books of the O. T. were written, we find, on the contrary, that the ancient mode of giving names is preserved almost unchanged.

In this respect, however, there is a total difference in the times between the close of the Old and the beginning of the N. T. For after a purely learned study of the O. T. had sprung up, and the whole nation only continued to exist in its sacred books, they delighted to give their children the ancient Scriptural names; nay, they sought out such names as had only been common in the times before Moses, and had become obsolete in the long interval: names like *Jacob*, *Joseph*, *Maria*. But while these dead names were revived and zealously sought out, the capability for forming new names became gradually weaker. And, as the love of novelty still operated, and as the people lost their independence more and more, many foreign names became favourites, and were used equally with the old Biblical names. In this manner the form of names had, by the time of the N. T., reached a state of development which nearly resembles that prevalent among ourselves.

Lastly, with regard to the Biblical names of individuals belonging to the less eminent nations with which the Israelites were surrounded—such as the Edomites, Phœnicians, Damascenes, etc.—their formation indeed is generally very like that of the Hebrew names, inasmuch as all these nations spoke a Semitic language; but the materials of which they are formed are so different, that one can almost recognise these foreign nations by their mere names. Thus names like *Hadad*, *Ben-hadad*, *Hadad-ezer*, are quite strange to the Israelites, and refer to the tribes to the east of Palestine, where a god named Hadad was worshipped.—H. v. E.

NANEA (*Navala*) occurs 2 Maccab. i. 13 as the name of the goddess to whom the temple in Elymais, which Antiochus Epiphanes attempted to plunder, was dedicated. Antiochus having heard that this temple was greatly enriched with golden shields, and breastplates, and weapons, which 'Alexander, the son of Philip,' had dedicated to the goddess, his cupidity was excited, and he sought to possess himself of all this treasure. He was, however, stoutly resisted and driven off by the priests, who raised the people *en masse* against him, and was thus baulked of his prey (1 Maccab. vi. 1-6; 2 Maccab. i. 13-15). The Persian goddess Nanea, whose name, however, is variously

written as *'Avaitis*, *'Avala*, *'Avaitis*, etc., seems to have been the moon-goddess worshipped by different nations under different names. Josephus, and also Polybius, from whom he quotes, calls her *'Apreus*, or *Diana* (*Antiq.* xii. 9. 1).

Stuart thinks that here the words of Daniel respecting Antiochus are illustrated and fulfilled: 'He will have no respect to the *delight of women*,' *חֲמֹדֵי נָשִׁים*, by which phrase he supposes the goddess of the temple of Elymais to be intended. 'This female deity,' he adds, 'under different names, was worshipped in Africa, Syria, Phœnicia, Cyprus, Greece, Rome, Babylonia, Persia, and other countries. The Mylitta (=Heb. מוֹלֶרֶת, *generatrix*) of the East was the Venus of the West, the Neith of Egypt, the Astarte of the Syrians, the Anais or Anaitis of the Armenians; all uniting in the worship of the power which represented maternal productiveness. . . . Antiochus, it seems, paid little or no regard to this idol.' Stuart then refers to the attempted plunder of the temple of this goddess, and adds that Nanea seems to him an appellation 'formed from Anaitis by vulgar pronunciation,' *Com. on Dan.* ii. 39, pp. 353, 354. Winer identifies Nanea with *Meni*, *Realwörterbuch*, art. *Meni*. The narrative in 2 Maccab. i. 13-15 differs in some particulars from that in 1 Maccab. vi. 1-6; but the sacrilege mentioned in 2 Maccab. ix. 12 must, if historical, relate to a wholly different transaction, as the scene of it is Persepolis, not Elymais.—I. J.

NAOMI (נְעֻמִי, from נָעַם, *to be pleasant*; Sept. Νωεμῖν; Alex. Νοομῆν), wife of Elimelech of Bethlehem, and mother-in-law of Ruth, in whose history hers is involved [RUTH].

NAPHISH\* (נַפִּישׁ, 'refreshment'; *Naphés*; *Ναφισάτοι*; *Naphis*), a son of Ishmael, and the name of the tribe and nation which sprang from him (Gen. xxv. 15). Naphish, in the three passages in which the name occurs, is grouped with Jetur (1 Chron. i. 31; v. 19). Jetur was unquestionably identical with the Greek *Iturea* and modern *Jedür*; a small province situated at the eastern base of Hermon, and bordering on Damascus and Bashan. The story of the conquests of the tribes of Reuben, Gad, and Manasseh, east of the Jordan, given in 1 Chron. v. 18-23, throws some light on the territory then occupied by the tribe of Naphish, and upon their habits. Jetur and Naphish were then allies, and apparently dwelt together. The Israelites conquered them, and took from them 50,000 camels, 250,000 sheep, and 2000 asses. They were manifestly a pastoral people, like the great modern tribes of the Anezeah, some of which have flocks and herds equally numerous. Then, having conquered the people and captured their cattle, we are told that 'the children of the half-tribe of Manasseh dwell in the land: they increased from Bashan unto Baal-Hermon, and Senir, and unto Mount Hermon.' From this it may be concluded that the people of Naphish had a settled home situated between the range of Hermon and Bashan, that is, along the eastern declivities of the mountains. Like all nomads, and semi-nomads, how-

belong altogether to this rule; as also *fishvah* and *fishvi* (with the derivative syllable), Gen. xlv. 17. Father and son also, for the same reason, bear names of similar sound.

\* This name is written *Nephish* in 1 Chron. v. 19, though the Hebrew is the same as in the other two passages in which the word occurs.

ever, they pastured their flocks over a much wider region, running out, doubtless, across Argob and Bashan to the *Midbar*, or 'pasture land' of Arabia. The name Naphish has altogether disappeared. There is no trace of it even in the earliest Arab writers, nor in the Greek and Roman geographers. It is probable that the tribe was amalgamated with others, and thus embraced under a common name, just as subdivisions of the Anezeh are now. Ptolemy mentions an Arab tribe called *Agræi*, as inhabiting northern Arabia (*Geogr.* vi. 19). This word is doubtless a Greek corruption of *Hagar*, the name generally given by Arab writers to the descendants of Ishmael. Ptolemy places the *Agræi* between Bashan and Mesopotamia (Forster, *Geogr. of Arabia*, i. 312). After the defeat of the Naphishites by the Israelites, the former probably retired to the fastnesses of the desert, as is common at the present day with border tribes; and there they became mixed up with their more powerful brethren, and thus lost their historical individuality.—J. L. P.

NAPHTALI (נַפְתָּלִי; Νεφθαλει; Νεφθαλι; and Νεφθαλεμ; *Nephthali*), a son of Jacob by Bilhah, Rachel's maid. The origin of the name is thus explained, 'And Rachel said, With wrestlings of God have I wrestled (נִפְתַּלְתִּי אֱלֹהִים נַפְתָּלִי) with my sister; and I have prevailed; and she called his name *Naphthali*' ('my wrestling'). Both the Septuagint and Latin versions mistake the meaning, and spoil the force of this passage (Gen. xxx. 8). Onkelos and the Syriac version represent Rachel as having entreated God by prayer, and this seems to be the correct idea (see Kalisch, *ad loc.*) Naphthali was Jacob's sixth son, and Bilhah's second. We know nothing of his character or personal history, as up till the time of Jacob's blessing the twelve patriarchs his name is only mentioned in two public lists (Gen. xxxv. 25; xlv. 24). When Israel went down to Egypt Naphthali had four sons (Gen. xlv. 24; 1 Chron. vii. 13).

The blessing pronounced by Jacob upon Naphthali was very short; but the language is obscure, and its interpretation has occasioned considerable controversy. In the English version it reads thus, 'Naphthali is a hind let loose; he giveth goodly words' (Gen. xlix. 21). This is not very intelligible; but is the literal rendering of the Masoretic text. The Septuagint translates the first clause Νεφθαλει στελεχος ανεμεινον, 'Naphthali is a wide-spread tree.' The translators must either have had before them, or they must have invented, a different pointing of the Hebrew text (נִפְתָּלִי instead of נִפְתָּלִי). The former equivalent to אֵיל or אֶלֶן, signifies 'a strong tree,' *arbor robusta*; but especially an 'oak' or 'terebinth.' Gesenius, *Thesaurus*, p. 47). The second clause is made to correspond, ἐπιδοῦν ἐν τῷ γεννήματι κάλλος, 'putting forth in its fruit beauty,' or 'giving forth goodly boughs.' Here the pointing must have been different from the Masoretic. Instead of אִמְרֵי, 'words,' they read אִמְרֵי, 'shoots' or 'leaves.' This view has been substantially adopted by Bochart and many modern commentators. Bochart examines the text minutely, and translates, '*Nephthali est ut arbor succulosa, edens ramos pulchritudinis*,' id est, 'egregius et speciosus'; 'Naphthali is a spreading tree, pro-

ducing beautiful branches' (Bochart, *Opera*, ii. 895, seq.; cf. Ewald, *Geschichte*, ii. 380; Stanley, *S. and P.*, p. 355; Clarke, *ad loc.*) Doubtless this would be a literal translation if the text were pointed as shown above; but the Masoretic text will not bear it. The only reasons for the change are, that it gives a better sense, and it seems to accord more with Moses' blessing in Deut. xxxiii. 23. The great fruitfulness of the tribe would thus be indicated, and the nature of the country they were to occupy. This translation, however, is opposed to the Masoretic text, and to the interpretations of the best Jewish writers (Bochart, *l. c.*) The present reading, too, when thoughtfully considered, is as appropriate as the other. This, like the other blessings of the patriarch, was intended to shadow forth under poetic imagery the future character and history of the tribe. 'Naphthali is a hind let loose,' or 'a graceful hind'—timid and distrustful of its own powers, swift of foot to elude its enemies; but when brought to bay, fierce and strong to defend its life. These were the qualities shown by Naphthali. They left several of their cities in the hands of the Canaanites (Judg. i. 33); they had not confidence to fight alone, but when assailed they made a noble defence (Judg. v. 18), and united with others in pursuit of a flying foe (vi. 35). Their want of self-confidence was chiefly shown in the case of Barak; and then, too, they displayed in the end heroic devotion and unwearied alacrity. 'He (that is, Naphthali, the mas. הַנִּפְתָּלִי proves this)

giveth goodly words.' The tribe was to be famous for the beauty of its language. It probably possessed poets and writers whose names have not come down to us. We have one noble ode ascribed in part at least to a Naphthalite (Judg. v. 1. See Kalisch *On Gen.* xlix. 21).

During the sojourn in Egypt Naphthali increased with wonderful rapidity. Four sons went down with their father and Jacob; and at the Exodus the adult males numbered 53,400 (Num. i. 43). That number decreased considerably during the wilderness journey; for, when the census was taken at the arrival of the Israelites on the plains of Moab, the adult males of Naphthali only amounted to 45,400 (Num. xxvi. 50).

Jacob's blessing had special reference to the character and achievements of the tribe; that of Moses to the nature of their territory—'*O Naphthali, satisfied with favour, and full with the blessing of the Lord: possess thou the west and the south*' (Deut. xxx. 23). A more literal and more accurate rendering of the Hebrew would be, 'Naphthali, replete with favours, and full of the blessings of Jehovah; possess thou the sea and Darom.' The word יָם, *Yam*, which in the A. V. is translated 'west,' evidently means 'the sea;' that is, the Sea of Galilee, which lay in part within the territory of Naphthali. And the Hebrew term דָּרוֹם,

*Darom* ('a circuit,' from the root דָּוָר=Arab. دَوَّر, 'to go round;' see Gesenius, *Thesaurus*, s.v.), is most probably a proper name equivalent to *Galil* ('a circuit'), or Galilee, the name given in Josh. xx. 7, xxi. 32, and elsewhere, to a district amid the mountains of Naphthali [GALILEE], and of which Darom may have been the older appellation. 'The sea and Darom' would thus signify the region by the Lake of Galilee, and the mountains to the north of it. The rendering in the A. V.

is unintelligible. Both the LXX. and Vulgate render נַי 'the sea' (see also the Chaldee, Rabbi Salomon, Bochart, Ainsworth, Montanus, and others).

The possessions allotted to Naphtali are described in Josh. xix. 32-39. They lay at the north-eastern angle of Palestine. On the east they were bounded by the Jordan and the lakes of Merom and Galilee; on the south by Zebulun; on the west by Asher; and on the north apparently by the river Leontes. Hammath was one of its cities, and it has been satisfactorily identified with the ruins around the warm springs a mile south of Tiberias. Consequently, to Naphtali belonged nearly the whole western shore of the Sea of Galilee [HAMMATH]. Naphtali possessed a greater variety of soil, scenery, and climate, than any of the other tribes. Its northern portions are the highlands of Palestine. The sublime ravine of the Leontes separates its mountains from the chain of Lebanon, of which, however, they may be regarded as a prolongation. The scenery is here rich and beautiful. The summit of the range is broad, presenting an expanse of undulating table-land, ornamented with broad belts and irregular clumps of evergreen oak, and having here and there little upland plains, covered with verdure, and bordered with thickets of arbutus and hawthorn. In the centre of this park-like region lie the ruins of the sanctuary of the tribe, the northern city of refuge, Kedesh-Naphtali. The ridge rises gradually towards the south, and culminates at Safed, which has an elevation of nearly 3000 feet. Two other peaks, a few miles westward, are 1000 feet higher, and are the loftiest points in Western Palestine (see Van de Velde, *Memoir*, p. 177). On the western brow of the ridge the tribes of Asher and Naphtali joined, the former having allotted to it the western slopes and narrow plain of Phœnicia (Josh. xix. 24-30). On the east, the mountains of Naphtali break abruptly down in grey cliffs and wooded slopes into the rich valley of the Jordan. On the north brow of these slopes stands the massive castle of Hunin, probably the ancient Beth-Rehob; and twelve miles south of it, commanding the waters of Merom, are the ruins of Kasyûn, which may perhaps mark the site of the capital of the northern Canaanites—Hazor. The Jordan valley, though soft, and in places marshy, is extremely fertile. Here the people of Sidon established at an early period an agricultural colony to supply their city with grain and fruits. The region, or 'circuit,' around Kedesh was anciently called *Galil*, a name subsequently extended to the whole of Northern Palestine; and as a large number of foreigners settled among the mountains—descendants of the Canaanites, and others from Phœnicia and Syria—it was called 'Galilee of the Gentiles' [GALILEE].

The southern section of Naphtali was the garden of Palestine. The little plains along the shore of the Sea of Galilee, and the vales that run up into the mountains, are of unrivalled fertility. Josephus described the plain on the shore of the lake, then called Gennesaret, as an earthly paradise, where the choicest fruits grew luxuriantly, and where eternal spring reigned. His words were not much exaggerated; for now, though more a wilderness than a paradise, its surpassing richness is apparent. The shore is lined with a wide border of oleander; behind this is a tangled thicket of the lote tree;

and here and there are clumps of dwarf palms. The plain beyond, except the few spots cultivated, is covered with gigantic thistles (Joseph. *Bell. Jud.* iii. 3. 2; and 10. 8; Robinson, *B. R.*, ii. 402).

In this description of the territory of Naphtali the reader will see the best commentary on the words of Moses, 'O Naphtali, satisfied with favour, and full with the blessings of the Lord; possess thou the sea and Darom.'

Naphtali on account of its position was in a great measure isolated from the Israelitish kingdoms. Nominally subject to Samaria, it was separated from it by the plain of Esdraelon, over which so often swept the devastating hordes of the 'Children of the East,' and the powerful armies of Syria. The usual route of the Syrian expeditions was along the east base of Hermon, and across the Jordan at Jacob's bridge. The Naphtalites in their mountain fastnesses thus escaped their devastations. But whenever the enemy marched through the valley of Coele Syria, then Naphtali bore the first brunt of the onset; and its chief cities, Ijon, Abel, Kadesb, and Hazor, were the first that fell (1 Kings xv. 20; 2 Chron. xvi. 4). Naphtali also was the first tribe captured by the Assyrians under Tiglath-pileser (2 Kings xv. 29). After the captivity the Israelites again settled largely in Naphtali, and its southern section became the most densely populated district in Palestine. It became the principal scene also of our Lord's public labours. After his brethren at Nazareth rejected and sought to kill him, he 'came down' (Luke iv. 31) from the uplands and dwelt in 'Capernaum, which is upon the sea-coast, in the borders of Zabulon and Nephthalim' (Matt. iv. 13). The new capital of Galilee had recently been built by Antipas, and called after the emperor, *Tiberias*. Other towns—Magdala, Capernaum, Chorazin, the two Bethsaidas—dotted the shore, which teemed with life and industry. Vast multitudes followed Jesus wherever he went (Mark ii. 1-12; Matt. xiii. 1-23, etc.) The greater number of his beautiful parables were spoken here; and it was the scene of most of his miracles (*Handbook*, pp. 430, 431). Then the words of Isaiah were fulfilled as they are quoted and applied by Matthew (iv. 15, 16):—'The land of Zabulon, and the land of Nephthalim, the region of the sea' (that is, 'of the Sea of Galilee; the same district called 'the sea' in Deut. xxxiii. 23), Peræa (the proper name of the country beyond Jordan), *Galilee of the Gentiles* (called 'Darom' in Deut. xxxiii. 23):—the people which sat in darkness saw great light; and to them which sat in the region and shadow of death light is sprung up.'

Naphtali is now almost a desert. A mournful silence reigns along the shores of the Sea of Galilee. There are still a few populous villages among the mountains; but Safet and Tiberias are the only places of any importance within the boundaries of the tribe, and they are fast falling to ruin.

Descriptions of this region may be found in the following works:—*Handbook*, pp. 424-445; Robinson, *B. R.*, ii. 396-442; iii. 360-373; Van de Velde, i. 168-183; Stanley, 369-383.—J. L. P.

#### NAPHTALIM. [NAPHTALI.]

NAPHTHAR (נַפְתָּר). According to a legend preserved in 2 Maccab. i., the Jews on the return from Babylon found in the pit in which the sacred fire had been hidden when the temple was de-

stroyed, a viscous liquid which, when poured over the sacrifice and the wood, was kindled by the sun's rays and burnt with a strong and bright flame. To this 'thick water' Nehemiah gave the name of *Naphthar* or *Nephthar* (ver. 32-36). The similarity of the name and the quality of the substance, lead naturally to the conclusion that it was akin to, if not identical with, the naphtha of modern commerce. A difficulty arises from the statement by the writer that 'naphthar' means *purification* (καθαρισμός); but probably this arose from his connecting the name with פֶּטֶר, to let go free, or the Aram. פֶּטֶר, unleavened (see Grim, *Exeget. Hdb. z. Apocr.*, in loc.)—W. L. A.

**NAPHTUHIM** (נַפְתֻּחִים; Νεφθαίμ; *Neph-tuim*), one of the sons of Mizraim, the second son of Ham (Gen. x. 13; 1 Chron. i. 11). The name is only mentioned in the two great genealogical tables of ancient nations given in the Bible. Mizraim was unquestionably the founder of the Egyptian nation, and consequently we must look for the Naphtuhim in that country. The word *Naphtuhim* is a plural form; and we may therefore infer that the sacred writer in using it had special reference to the nation or tribe which sprung from *Naphtuh*. According to Plutarch, the Egyptians gave the name *Nephthus* (Νέφθους) to the extremities or boundaries of the country along the rocky seaboard, supposed to be under the protection of the goddess *Nephthys*, wife of Typhon. And Bochart says this name was given to one of two places.—1. To the coast of the Red Sea; or, 2. To the coast of the Mediterranean, near the western side of the Delta (Bochart, *Opera*, i. 279, seq.) He argues that the latter is the true site, and that Naphtuhim may be identified with the 'shrine of Aptuchus' (Ἀπτούχου ἱερὸν) mentioned by Ptolemy (*Id.* 283). It appears more probable, however, to identify the Naphtuhim with the city of *Naphata* or *Napata*, the capital of an ancient Ethiopian kingdom, and one of the most splendid cities in Africa (Strabo, xvii., p. 820; Pliny, *H. N.* vi. 35; Ptolemy, iv. 7). Strabo states that Napata was the royal seat of Queen Candace, a fact which may connect one of the most ancient tribes of the Old Testament with an incident in apostolic history (Acts viii. 27). The city and its territory lay upon the southern frontier of Mizraim, at the great bend of the Nile in Soudan, and having the desert of Bahiuda on the south. The ruins of the city on the banks of the river are extensive and splendid, consisting of pyramids, temples, sphinxes, and sculptures. The modern name is *Meroe* or *Merrawe*; though some geographers do not adopt this view (Ritter, *Erdkunde*, i. 591). The connection of this city with Egypt is shown by the character of its ruins. There is a temple of Osiris and another of Ammon; and there is a necropolis on whose gateway Osiris is figured receiving gifts as the god of the lower world. Two lions of red granite of beautiful workmanship were found here, and brought to England by Lord Prudhoe, now Duke of Northumberland. They are at present in the British Museum (Hoskins, *Travels*, pp. 161, 288; Layard, *Nin. and Babylon*, p. 157; Kalisch *On Genesis*, p. 265; Smith's *Dict. of G. and R. Geography*, ii. 396).—J. L. P.

**NARCISSUS** (Νάρκισσος), a person of Rome, apparently of some consequence, to the believers of

whose household St. Paul sent his greetings (Rom. xvi. 11). Some have supposed this person the same Narcissus who was the freedman and favourite of the Emperor Claudius (Suet. *Claud.* 28; Tacit. *Annal.* xii. 17); but the date of this person's death (A.D. 54-55) excludes this supposition.

**NASOR**, THE PLAIN OF (τὸ πεδῖον Νασώρ), the scene of an engagement between Jonathan Maccabæus and Demetrius (1 Maccab. xi. 67). Josephus gives the name as Ἀσώρ, and this is the reading of the Syr., Vulg., and several codices. In all probability this is the correct reading, *Νασώρ* being a mistake caused by repeating the final ν of the word preceding Ἀσώρ. As the plain was between Kadesh Naphthali and the lake of Gennesareth, there can be little doubt that it is identical with the Hazor of the canonical books.—W. L. A.

**NATAF** (נַטַף) occurs only once in Scripture, and is translated 'stacte' in the A. V. (Exod. xxx. 34, 35). *Nataf* has been variously translated—*balsam*, *liquid styrax*, *benzoin*, *costus*, *mastic*, *bdellium*. Celsius is of opinion that it means the purest kind of myrrh, called *stacte* by the Greeks [MOR]. He adduces Pliny as saying of the myrrh-trees, 'Sudant sponte stacten dictam,' and remarks, 'Ebræis נַטַף *Nathaf* est stillare'—adding, as an argument, that if you do not translate it myrrh in this place, you will exclude myrrh altogether from the sacred perfume. But Rosenmüller says, 'This, however, would not be suited for the preparation of the perfume, and it also has another Hebrew name, for it is called *mor deror*. But the Greeks also called *stakte* a species of Storax gum, which Dioscorides describes as transparent like a tear and resembling myrrh. This agrees well with the Hebrew name.' But Storax does not appear to us to be more satisfactorily proved to be *nataf* than the former. The

Arabs apply the term نَاتِف to a sweetmeat composed of sugar, flour, and butter, in equal parts, with the addition of aromatics. We have no means of determining the question more accurately.—J. F. R.

**NATHAN** (נָתַן, *given*; Sept. Ναθαν). 1. A prophet of the time of David. When that monarch conceived the idea of building a temple to Jehovah, the design and motives seemed to Nathan so good that he ventured to approve of it without the Divine authority; but the night following he received the Divine command, which prevented the king from executing this great work (2 Sam. vii. 2, seq.; 1 Chron. xvii.). Nathan does not again appear in the sacred history, till he comes forward in the name of the Lord to reprove David, and to denounce dire punishment for his frightful crime in the matter of Uriah and Bathsheba. This he does by exciting the king's indignation, and leading him to condemn himself, by reciting to him the very striking parable of the traveller and the lamb. Then, changing the voice of a suppliant for that of a judge and a commissioned prophet, he exclaims, 'Thou art the man!' and proceeds to announce the evils which were to embitter the remainder of his reign (2 Sa m. xii. 1, seq.; comp. Ps. li.) The lamentations of the repentant king drew forth some mitigation of punishment; but the troubled history of the remainder of his reign shows how completely

God's righteous doom was fulfilled. The child conceived in adultery died; but when Bathsheba's second son was born, the prophet gave him the name of Jedidiah (*beloved of Jehovah*), although he is better known by that of Solomon (2 Sam. xii. 24, 25). He recognised in this young prince the successor of David; and it was in a great measure through his interposition that the design of Adonijah to seize the crown was unsuccessful (1 Kings i. 8, *seq.*) Nathan probably died soon after the accession of Solomon, for his name does not again historically occur. It is generally supposed that Solomon was brought up under his care. His sons occupied high places in this king's court (1 Kings iv. 5). He assisted David by his counsels when he re-organised the public worship (2 Chron. xxix. 25); and he composed annals of the times in which he lived (1 Chron. xxix. 29, 2 Chron. ix. 29); but these have not been preserved to us.

2. Son of David and Bathsheba (2 Sam. v. 14; 1 Chron. iii. 5, xiv. 4). His name appears in the genealogy of our Lord given by Luke (iii. 31). Through him the mother of Jesus derived her descent from David [GENEALOGY OF J. C.] It is not certain whether the Nathan referred to in Zech. xii. 12 be this Nathan or the preceding; but he is probably this one.

3. The father or brother of one of David's mighty men (2 Sam. xxiii. 36; 1 Chron. xi. 38). In the former passage he is said to be of Zobah, in Syria, from which place David had many of his warriors. This shows that it is not Nathan the prophet who is here referred to, for he was an Israelite.

4. One of the chief men who accompanied Ezra from Babylon, on his second ascent to Jerusalem; he was sent by Ezra as one of a deputation to the Jews at Casiphia to bring up ministers for the house of the Lord (Ezra viii. 15, ff.)

#### NATHAN B. JECHIEL B. ABRAHAM,

also called *Aruch* (ערך) or *Baal Ha-Aruch* (בעל הערוך), from the fact that he is the author of the celebrated lexicon denominated *Aruch*. This distinguished lexicographer was born in Rome about 1030, where, like his ancestors before him and his descendants after him, he was held in the highest veneration for his extraordinary learning, and where he died *circa* 1106. Though busily engaged in faithfully discharging the responsible duties devolving upon him as rabbi of the Jewish community in the eternal city, and in attending to the Hebrew academy of which he was the president, R. Nathan devoted all his spare time for the greater part of his life to the writing of that important lexicon which has obtained such a world-wide celebrity. From the words in the epilogue which R. Nathan himself appended to it רינום הושלם בשלישי בתשעה עשר) לירח נווה מנבוה דרוך, בשנת דתתקמ"א ליצירה לג ואלי לחברן בית קדש תהרוו, יח"ג ואלי למניין שטרות, *this lexicon was completed on Tuesday, the nineteenth day of the month on which the temple was destroyed by the despised one* (i. e., Ab = end of July), 4861 after the creation (= A.D. 1101), 1033 after the destruction of the burnt temple, 1413 of the Seleucian era), it will be seen that he finished this lexicon A.D. 1101. The lexicon is denominated *Aruch* (ערך) from ערך, *to arrange, to set in order*) i. e., *arrangement* of the words in alphabetical order, and ex-

tends over the Mishna, both the Gemaras, the Midrashim, and all the Chaldee paraphrases of the O. T. The importance of this work both to the understanding of the ancient expositions of the Bible and to the criticism of the text of the Chaldee paraphrases can hardly be overrated, inasmuch as R. Nathan, in explaining the words, embodied the interpretations of the ancient sages guaranteed by tradition, and adopted the ancient and correct readings. So comprehensive is this lexicon, and so highly was it appreciated, that it not only superseded and buried in oblivion a lexicon also called *Aruch*, compiled by Zemach b. Paltoi, who was gaon in Pumbedita A.D. 871-890, but simply left for his future supplementors to compile and rearrange the rich materials which R. Nathan amassed. In this, however, they did not always succeed.

Our space does not admit of our tracing the *Aruch* through the various additions and modifications to which it has been subjected, both whilst in MS. and since it was first printed in the end of the 15th century. After Samuel b. Jacob Gama (flor. 1160), Abraham Saccuto, Elias Levita, Menahem de Lonsano, Buxtorf, Mussafia, David Cohen di Lara, and others, it has of late years engaged the care of several learned scholars.

M. J. Landau, wishing to avail himself of all the labours of his predecessors, published an edition of R. Nathan's *Aruch* with Mussafia's supplement, with his own notes, in five volumes, entitled מערכ' לשון, or *Rabbinisch-aramäisch-deutsches Wörterbuch zur Kenntniss des Talmuds, der Targumim und Midraschim; mit Anmerkungen für Philologie, Geschichte, Archäologie, Geographie, Natur und Kunst*, Prague 1819-24, *ibid.* 1834-35, mixing up the subsequent labours with the text of the original work, for which he has justly been censured by the recondite Rapaport. At no time, however, have all the separate departments of the *Aruch* been so learnedly and efficiently handled as in modern days by Geiger, who, in his *Lehr- und Lesebuch zur Sprache der Mishna*, Breslau 1845, and Leopold Dukes, in his *Die Sprache der Mishna, lexicographisch und grammatisch betrachtet*, Esslingen 1846, confine themselves to the language of the Mishna; by David Loewy, who takes up the Hebrew

element of the post-biblical literature in his לשון חכמים, *Wörterbuch, enthaltend hebr. Wörter und Redensarten die sich im Talmud befinden*, two parts, Prague 1845-47; by Rapaport, who treats on the history, geography, archæology, etc., in his ספר ערך

מלון, Prague 1852; and by Sachs, who devotes himself to the foreign words and the antiquities, in his *Beiträge zur Sprach- und Alterthumsforschung*, two parts, Berlin 1852-54. It only remains to be added, that a convenient edition of the *Aruch*, with the supplement of Mussafia, De Lonsano, and Berlin (only first part of his), has been published by H. Sperling, under the title *Rabbinisch-aramäisch-deutsches Wörterbuch*, etc., Lemberg 1857; where, however, with the exception of the title-page, not a single word of German occurs in the whole work, though it is denominated *German* as well; that annotations to the *Aruch*, with emendations and critical notes by Reinon Lindermann, rabbi at Berlin, have just appeared, entitled *שירי בערכין*, Berlin 1864; and that it is absolutely necessary to attend to the various changes which the *Aruch* suffered in the process of time, as well as to possess

to find and easily the passages of the O. T. quoted in support of the Messiahship of Jesus of Nazareth, and by adding them to see what legitimate construction can be put on these passages in accordance with the context in which they occur. This concordance, to which R. Nathan devoted eight years of his life (1437-1445), and in which he adopted the plan of the Latin Concordance of Aitoff, general of the order of Miniores (*circa* 1290), first appeared with an elaborate introduction (פירוש ופתיחה) in Venice 1523, then again, with the introduction <sup>181</sup> \* It was translated into Latin by Renclimm, Basel 1556, and was inserted by the Miniores, Maria de Calasio, in his four-volume concordance, Rome 1602. R. Nathan's concordance is the basis both of Buxtorff's and First's concordances. Comp. Steinschneider, *Catalogus Libr. Heb. in Bibliotheca Bodliana*, col. 1141-1143; First, *Bibliotheca Judaica*, iii. 22; Graetz, *Geschichte der Juden*, vol. viii., p. 160-163, Leipzig 1864.—C. D. G.

*Nabawiyah*), a person of Cana in Galilee, who when informed by Philip that the Messiah had appeared in the person of Jesus of Nazareth, asked

'Can any good thing come out of Nazareth?' But he nevertheless accepted Philip's laconic invitation, 'Come and see!' When Jesus saw him

coming, he said, 'Behold an Israelite indeed, in whom is no guile.' Astonished to hear this from a man to whom he supposed himself altogether

unknown, he asked, 'Whence knowest thou me?' And the answer, 'Before that Philip called thee, when thou wast under the fig-tree. I saw thee,

wrought such conviction on his mind that he at once exclaimed, 'Rabbi, thou art the Son of God; thou art the King of Israel!' (John 45-51).

is clear, from the effect, that Nathanael knew by this that Jesus was supernaturally acquainted with the disposition and character of the answer he

reference to the private acts of devotion, or to the  
his disposition and character, as the answer had  
meditations which filled his mind, when under the

ing-tree in his garden. It is questioned whether Jesus had actually seen Nathanael or not with his bodily eyes. It matters not to the result; but this

form of the words employed seems to suggest that he had actually noticed him when under the fig-tree, and had then cast a look through his inward

being. Passages from the Rabbinical books might be multiplied to show that the Jews were in the habit of studying the law and meditating on re-

ligious subjects under shady trees (comp. Tholuck, *Commentar zum Johan.* i. 49). It is believed that Nathanael is the same as the apostle Bar-

tholomew. All the disciples of John the Baptist named in the first chapter of St. John became apostles; and St. John does not name Bartho-

\* How the name! נָתַן, *Natthan*, Mordecai's name came to be on the title-page is a mystery which

has not as yet been solved. That the author's name was *Isaac* Nathan is beyond the shadow of a doubt. Jacob b. Chaitim, who carried through

who call the author *Mordcau*.

lomew, nor the other evangelists Nathanael, in the lists of the apostles (Matt. x. 3; Mark iii. 18; Luke vi. 14); besides, the name of Bartholomew always follows that of Philip; and it would appear that Bartholomew (son of Tholmai) is no more than a surname [BARTHOLOMEW].—J. K.

**NATIONS, DISPERSION OF.** The list of the descendants of Noah (Gen. x.) is the most important document extant of primitive geography and ethnology. The list itself indicates the geographical distribution of the Noachians, and enables us to trace the origin of most of the nations of the primæval civilised world. The narrative that follows the list relates the circumstances which led to the dispersion of the Noachians, and the genealogy of the line of Shem gives chronological data for fixing the time of this event (Gen. xi.) These subjects may be noticed in an inverted order, and the Confusion of Tongues with the philological aspect of the Dispersion will be only touched upon, its full discussion being reserved for a later article [TONGUES, CONFUSION OF].

1. *Date.*—It is not stated at what time after the Flood the Dispersion occurred. In the list of Noah's descendants, it is said of one of Eber's two sons, 'the name of one [was] Peleg (פֶּלֶג, 'division'); for in his days was the earth (or 'land')

divided' (נִפְלְגָה, Gen. x. 25). It has been generally supposed that Peleg was named from the division of the primæval world among the dispersed children of Noah. In favour of this view it may be urged—1. That this is the most natural explanation of the passage; 2. That in the list Peleg is in the lowest generation but one, and the lower generation is only noticed in the case of the children or descendants of one head, Peleg's brother Joktan; and 3. That mention is made in the Song of Moses of a division of the Gentiles, and a separation of the children of Adam, 'according to the number of the children of Israel' (Deut. xxxii. 8); where, though the root of Peleg is not used, there is notice of a division, and in addition the relation to the number of the children of Israel may point to the seventy-two (12 × 6) names that occur in the list, if we exclude Noah and his three sons. On the other hand, it has been observed that Peleg might have been named from the opening of a chasm in the earth. We think, however, the usual opinion the more probable.

Before inquiring when Peleg was named, it must be observed that there is good reason for holding the name to represent a person, not as many other names in the list may, a tribe or perhaps country. In the whole list of Shem's descendants, and especially in the line of Peleg, there is no positive reason for supposing other than persons to be intended. The name Peleg is suitable to a man. Joktan is mentioned after him as if a younger brother, and his name means 'little,' or 'younger' (comp. יָקָן).

Names have always been given very early in life; but among some nations they have been often supplanted by others given at a later age. With the Hebrews and Arabs, however, the usual custom seems to have been to maintain the birth-name. That name, though often implying a pious feeling of the parents, or descriptive of some quality, was

sometimes, and especially among the Arabs of the desert, suggested by some event occurring at the time of birth. Thus a child was called Kelb, 'Dog,' because a dog barked when he was born. The Bible shows us instances of the same principle in such names as Ichabod and Benoni. It is therefore very probable that the name Peleg would have been given to a child born when the division of the earth took place.

Supposing, therefore, that Peleg was named from a division connected with the Dispersion, it is necessary to state the data for computing two intervals. It cannot of course be decided whether the division was prior or subsequent to the Dispersion. The building of the Tower may have been in rebellion against the separation necessary before the appropriation of territories. The first interval, extending from the Flood to the birth of Peleg, would give about the period during which the descendants of Noah increased; the second, from the latter event to the departure of Abraham from Haran, would enable us to compute about the time of the Dispersion before the Christian era.

The interval from the Flood to the birth of Peleg is as follows, according to the various sources:—

Sept. with second Cainan . . .	531 years.
Id. without, and Sam. . . . .	401 „
Heb. . . . .	101 „

The interval from the birth of Peleg to the departure of Abraham from Haran is as follows:—

Sept. and Sam. . . . .	616 years.
Heb. . . . .	266 „

If, however, Ussher's supposition that Terah was 130 years old at the birth of Abraham be accepted, we must raise these numbers respectively to 676 and 326.

Let us now examine the data for the two intervals. If, with the majority of critics, we omit the second Cainan, we have to decide between the intervals 401 and 101, from the Flood to the birth of Peleg. Taking the shortest possible generations, and the largest possible increase of population, the latter interval is far too short. Even if we admit the possibility of a distinct non-Adamite population, we cannot suppose that the offspring of three pairs could in a century have formed the nuclei of nations or even tribes. But here a reasonable objection may be made, that the Septuagint (Cainan being rejected) gives no more generations than the Hebrew, so that in taking its longer interval, there is little or no gain, as we could not suppose that in the general population there were more than two generations in addition, while according to the Hebrew there could have been one. The reply to this is that we derive our only measure for the early patriarchal period from the stated lengths of generations, and that it is not unreasonable to suppose that the genealogy is broken, though a succession, and that a known period of years is divided between the remaining links. We prefer the Septuagint numbers on various grounds, and here, as elsewhere, we find them to agree with the seeming requirements of history.

With reference to the second interval, it must be remarked, that when Abraham entered Palestine and visited Egypt, we read of a settled population governed by kings, and subject to the attacks of distant enemies, the same condition as

that of later centuries. There were already in Palestine dwellers in cities and nomads, and the cities appear to have been abundant. Here again we prefer the longer interval, which, indeed, being accepted in one case must also be accepted in the other, although an independent reason is satisfactory as a confirmation.

The date of Abraham's departure from Haran is thus variously fixed by different chronologers:—

Hales . . . . .	2078
Jackson . . . . .	2023
Ussher . . . . .	1921
Petavius . . . . .	1961

The difference between the two extreme dates is therefore far less considerable than the difference between the lengths assigned to the two intervals preceding Abraham's departure from Haran. The theory which places the Exodus about B.C. 1320 would necessitate a lowering of these dates by 330 years or less, but some, if not most, of those who hold this theory suppose the sojourn of the Israelites in Egypt to have lasted 430 years instead of 215, though they shorten the interval before the sojourn, and therefore there is a general agreement that Abraham left Haran between 2100 and 1900. It would occupy too much space were we here to state our reasons for preferring Hales's date, which we should correct by four years, to B.C. 2082. From this we should reckon the birth of Peleg B.C. 2698, or, accepting Ussher's supposition in the case of Terah's age at the birth of Abraham, B.C. 2758.

This result is in harmony with the evidence of the chronology of heathen nations. That of the Egyptians has been supposed by some to reach to a far higher date, but a study of the monuments in the country has convinced us, that the theories which place the beginning of the Egyptian monarchy at a date a thousand years before that we have supposed to be the most probable for the Dispersion, are not tenable. The evidence of the monuments does not allow the lapse of vast chasms of time between the great flourishing dynasties, those of the early Memphite monuments, the 12th, and the 18th. The most probable date of the accession of Menes, the first king, is in the 28th century B.C. The monuments of Babylonia and Assyria have not afforded any date anterior to the 23d century B.C. The monuments of no other nations give evidence of an antiquity approaching to this.

2. *Circumstances of the Dispersion.*—The narrative of the Dispersion begins with the remarkable statement:—'Now the whole earth was of one language, and of one speech. And it came to pass, as they journeyed from [or 'in'] the east, that they found a plain in the land of Shinar; and they dwelt there' (Gen. xi. 1, 2). The expressions 'language' (lip) and 'speech' (words) are too precise to be understood as indicating an agreement in purpose. The journeying together shows that the time spoken of was before the Noachians had ceased to be a single nation, and perhaps when they formed but a great tribe, and were journeying after the manner of the Arabs across the plains watered by the Tigris and Euphrates. Shinar cannot be doubted to be Babylonia. The name is indeed, perhaps, traceable in Mesopotamia in the modern Sinjâr, and it is noticeable that the ancient Egyptian transcription of Shinar is SANKAR.T, this k correspond-

ing to the Hebrew ש, as though the y had been pronounced like the Arabic ع. But there is no

evidence that the Hebrews called any country except Babylonia 'the land of Shinar.' The direction of the journey, if it be indicated as 'from the east,' probably would only mark the previous halting-place of the Noachians, not the place at which they first began to repeople the earth. The narrative then relates the attempt to build a city and a tower in order to prevent the scattering of mankind, and the punishment of the builders by the confusion of their language and their being scattered abroad from the unfinished city Babel, or Confusion. Leaving the subject of the Confusion of Tongues for later discussion [TONGUES, CONFUSION OF], we must observe the general agreement of profane historians as to the antiquity of Babylon, and the reminiscence of the Tower in the towers of the Babylonian temples. The Pyramids of Egypt and those of Mexico should be compared to these towers; and, in the case of the former, on account of their extreme antiquity, the comparison is very important.

The exact character of the scattering is difficult to infer. The cause, according to the ordinary explanation of the narrative, was the Confusion of Tongues, but some have supposed the latter to have been the consequence of the Dispersion. It is remarkable that, in the tenth chapter of Genesis, a division of the Gentiles is spoken of, as though the territories of existing nations of another stock had been portioned out among the children of Noah. It is said, after the enumeration of the sons of Japheth:—'By these the isles of the nations were divided in their lands; [every] man according to his tongue, according to their families, in their nations' (ver. 5); and at the close of the whole enumeration: 'These are the families of the sons of Noah, according to their generations, in their nations, and by these were the nations divided in the earth after the flood' (ver. 32). With these passages must be compared that in the Song of Moses, already noticed: 'When the Most High gave nations for a possession, when he separated the sons of Adam, he set the bounds of peoples according to [or perhaps, prospectively, 'even to'] the number of the children of Israel' (Deut. xxxii. 8).

There is perhaps no distinct reference to the building of the Tower, and the Dispersion, in the traditions of any heathen nation. The Greek story of the giants who piled mountains one upon another to reach Olympus, is perhaps the most probable trace. Unlike the case of the Flood, there is no clear evidence that the Dispersion made a strong impression upon the minds of those who witnessed and shared in it. This would indicate that it was unaccompanied by any great outward manifestation of God's anger, and was the immediate consequence of such difficulties as would arise from the sudden division of mankind into tribes speaking different languages or dialects.

3. *The List of the Descendants of Noah.*—The subject we have now reached—the examination of the list of Genesis x., with the view of fixing the geographical places and ethnological characteristics of the Noachians—forms the most important section of this article. It will be necessary to lay down some principles for comparing the list with foreign evidence, which may prevent our hazarding any of those arbitrary conjectures which have need-

lessly and most inconveniently increased the literature of the subject.

A. Mere similarity, or even identity of name, is not a sure guide. So remarkable a name as Hazarmaveth can scarcely be mistaken when we find it in Hadramäwt. Such a name would not be repeated, and the Hadramäwt we discover in Arabia cannot be doubted to indicate the settlement of Joktan's son Hazarmaveth; but this is an exceptional case. When the similarity of Dodanim to Dodona, or its various reading, Rodanim to Rhodes, is considered to be a sufficient proof of identity, all criticism is set at defiance. Let us look, therefore, for some sound method of identification.

B. The list is, in one aspect, a kind of geographical table: many names in its descents are found in later places of Scripture as geographical terms designating nations, or at least important tribes. Therefore—

a. We must not look for a name in that of a town. There is an exception, probably not the only one, in the case of Sidon, the city of the Sidonians, who were doubtless a Canaanite tribe, but to trace names in general in those of towns is very hazardous.

b. The tracing of a nation or tribe to a name in the list is of little value, unless neighbouring or kindred nations, or nations otherwise markedly connected with it, can also be traced to the same part of the list.

C. Preference must always be given to the oldest documents in seeking for identifications. Next to the O. T., the Egyptian, Assyrian, and Babylonian monuments must be cited. In each set of documents, the notices nearest in point of time are always likely to be the best commentators; for it must be remembered that migrations and deportations are less likely to affect evidence the earlier it is.

D. Although the list is geographical, its form is genealogical; and it does sometimes, and may frequently, state or convey the name of the founder of a nation or tribe.

a. We must not attempt to identify a founder's name in the traditions of nations, except where it is distinctly there mentioned as such.

b. As before, we must not be satisfied unless the identification is supported by the geographical position of the founder's nation, or its ethnological character, or else by some marked characteristics, connecting it with other names identified in the same part of the list.

E. In citing non-Semitic names, we must be careful to determine the principles upon which they could be compared with Semitic names.

We may first take the names of Noah's sons, which would probably be traceable as those of founders.

Shem is always mentioned first of the three sons of Noah when their names occur together, the order being Shem, Ham, and Japheth. In Gen. x. 21 he is called 'the elder brother of Japheth,' which the A. V. incorrectly translates 'the brother of Japheth the elder,' where a comma after 'Japheth' gives the correct sense. In the list of that chapter, notwithstanding the occurrence of the usual order in ver. 1, the sons of Japheth are first mentioned, then those of Ham, and lastly those of Shem, the order being inverted. It has been supposed that Shem was put at the close of the list that the comparatively foreign subject of the other descendants of Noah might not form a digression in the history

of the Shemites and their Hebrew branch. The Japhethites may have been put at the head of the list as the most widely spread, and so the most distant; and for a like reason the Hamites may have preceded the Shemites, the order being that of the extent of colonization. Or, again, the order may be geographical, from west to east, in accordance with the western, central, and eastern positions of the three great stocks. We shall see that the details favour the last view.

Shem (שֵׁם) signifies 'name, good name, fame;'; Ham (חָם), 'hot, warm;'; Japheth (יָפֶֿתֿ), 'spread,' from פָּתַח. The names are probably prophetic of the future renown of the Shemites, of the hot land of the Hamites, and the great spread of the Japhethites. The prophecy of Noah (Gen. ix. 25, 26, 27) indicates the appropriateness of Japheth's name to his future; and a prophetic sense of the names of his brethren may therefore be conjectured. But there is no distinct allusion to any such sense in their cases. It might be thought that the appropriateness of Shem's name as illustrious, could be traced in the prediction that his should be the believing stock, but there is no indication whatever of any moral significance in the name of Ham. We can now examine the names individually.

1. *Shem*.—There is no trace of any single nation or country named after Shem, probably because the Shemites, by an instinct afterwards remarkable in their descendants, early separated into distinct tribes, though not migrating very far. This was the case with the Israelites; and with the Arabs the same process is still in constant operation.

2. *Ham*.—The name of Ham has been connected with an appellation of Egypt in Hebrew, only occurring in three passages in the poetical books—'the land of Ham' (Ps. lxxviii. 51; cv. 23; cvi. 22), and with the most usual ancient Egyptian name of the country, KEM, 'the black (land).' The former term we cannot doubt to contain the patriarch's name. Is the latter identical with it? The significations of Ham and KEM are sufficiently near. Ham may be reasonably derived from חָם, 'he or it was warm,' and compared with חָם, 'he or it was black,' and the

Arabic حَم, of the same signification as the last,

and حَمَا, 'black fetid mud' (*Kámoos*), or 'black mud' (*Sihdk*) MS.) KEM cannot be taken for an Egyptian transcription of Ham, but it could be a word of cognate origin (cf. KAR, 'a circle,' חוּל, 'he or it turned, turned round;'; KARR, 'a furnace,' חָרָה, 'it burned;'; KNA, 'to bend,' הִנָּה, 'he or it bowed down, inclined'). There can therefore be no reasonable doubt that the Egyptian name of the country is identical with the Hebrew name of the patriarch. Are they of separate origin? We must either suppose this, or that 'the land of Ham' became changed to 'Ham-land,' or 'black land.' The genius of the Egyptian language would account for such a change, which seems not improbable. That Ham should have given his name to a country might be accounted for by the supposition that, except the Canaanites, the Hamites penetrated into Africa, and at first established themselves in Egypt.

3. *Japheth*.—It is impossible not to see the name of Japheth in the Greek Iapetus the Titan, son of Uranus and Ge, and the supposed ancestor of the human race; for, as we shall see, the Greeks, or at least those of the Hellenic stock, are classed among the Japhethites in the list of Genesis. We can now examine the names of the descendants of Noah's sons.

## THE JAPHETHITES.

- |             |             |              |
|-------------|-------------|--------------|
| i. Japheth. | 1. Gomer.   | a. Ashkenaz. |
|             |             | b. Riphath.  |
|             |             | c. Togarmah. |
|             | 2. Magog.   |              |
|             | 3. Madai.   |              |
|             | 4. Javan.   | a. Elishah.  |
|             |             | b. Tarshish. |
|             |             | c. Kittim.   |
|             |             | d. Dodanim.  |
|             | 5. Tubal.   |              |
|             | 6. Meshech. |              |
|             | 7. Tiras.   |              |

1. Gomer.—This name occurs in but one later place in connection with geography, as that of a nation or tribe allied with Magog, and is there mentioned immediately before Togarmah, distinguished as northern (Ezek. xxxviii. 6). It has been therefore supposed to point to a remote northern nation, Scythic, or perhaps European. Two great Gentile names have been compared, the Cimmerians of the Tauric Chersonese, who invaded the west of Asia Minor early in the 7th century B.C., and the Cimbri and Cymry, whose ethnic and nominal identity cannot be doubted. Considering the migratory character of the Cimmerians and Cimbri, it is reasonable to suppose that they had the same origin. In the cuneiform inscriptions of Darius Hystaspis, Gimiri occurs as the Semitic equivalent of the Arian name *Saka* (Σάκαι). (Sir H. Rawlinson in Rawlinson's *Hdt.*, vol. iii. p. 183, note 1.)

a. Ashkenaz.—In a single later mention Ashkenaz occurs, in a confederacy against Babylon, with Ararat, Minni, and Madai (Jer. li. 27, 28). It was therefore a nation in the direction of Armenia.

b. Riphath, written in 1 Chron. i. 6. Diphath, does not occur elsewhere in Scripture. It has been compared with the Rhipæan Mountains of Greek geography; but the statement of Josephus, commenting on this list, that the Paphlagonians were anciently called Rhiphatheans, is more worthy of notice (*Antiq.* i. 6. 1).

c. Togarmah is mentioned in Ezekiel among the traders with Tyre, after Tarshish, Javan, Tubal, and Meshech, all Japhethites, and before Dedan, here probably the country of which the inhabitants, called Dodanim, are classed among the sons of the Japhethite Javan (Ezek. xxvii. 12-15); and, in a later place, 'the house of Togarmah, of the north quarters,' follows Gomer in the list of the army of Gog, prince of Magog (xxxviii. 6). These particulars point to a northern people not remote from Greece. Togarmah traded with Tyre 'with horses and horsemen, and mules' (xxvii. 14), whence we may suppose these traffickers came by land. All the indications agree very well with the opinion that Togarmah may be connected with the Armenians.

2. Magog is elsewhere mentioned by Ezekiel only, first among the countries ruled by Gog, and especially associated with Rosh, Meshech, and Tubal

(Ezek. xxxviii. 2, 3), and apparently spoken of as dwelling 'in the isles' (xxxix. 6). The term 'isles' certainly must not be taken necessarily to indicate islands, but it is apparently limited to maritime, transmarine, and very remote regions (Ges., *Lex.*, s. v. 'N'). It has been generally held that Magog, used for a nation, is applied to the Scythians of the Greeks, though perhaps in a restricted sense. Certainly, in the time of Ezekiel, the Scythians who invaded western Asia were the most powerful nation of the country to which the confederacy mentioned by the prophet may reasonably be assigned; and the agreement of Josephus (*Antiq.* i. 6. 1) and Jerome (*Quest. in Gen.* x. 2) in the identification is not to be overlooked.

3. Madai, always later applied to the country Media, very appropriately follows Magog, if the latter, when used geographically, indicates the Scythian neighbours of the Medes. Madai, like other names afterwards employed for a country rather than a people, may originally have been a man's name (cf. *Mizraim*, infra).

4. Javan.—Except where applied to an Arabian place or tribe (Ezek. xxvii. 19; and perhaps Joel iii. 6), this is, in all later places, the name of the Greeks, or at least the Hellenic Greeks. The Persians, like the Hebrews, called all the Greeks Ionians.

a. Elishah, at the head of the descendants of Javan, is to be looked for in Hellenic geography. It is mentioned in Ezekiel as trading with Tyre, 'Blue and purple, from the isles of Elishah, was that which covered thee' (xxvii. 7). The name has been compared with Elis, Hellas, and the Æolians. Etymologically the first and third are equally probable, but other circumstances seem almost decisive in favour of the latter. The coast of the Æolian settlements in Asia Minor produced purple, and the name of so important a division of the Hellenic nation would suit better than that of a city which never was rich and powerful enough to be classed with Sidon, Tyre, or Carthage.

b. Tarshish is in later Biblical history the name of a great mart, or, as some hold, of two. The famous Tarshish, supposing there were two, was one of the most important commercial cities of the period of the kings, second only, if second, to Tyre. It was accessible from the coast of Palestine, but its trade was carried on in large ships, 'ships of Tarshish,' which implies a distant voyage from Palestine. It brought to Tyre 'silver, iron, tin, and lead' (Ezek. xxvii. 12). These products seem to point incontestibly to a Spanish emporium, and the majority of modern commentators agree in fixing on the celebrated Tartessus, said to have been founded by the Phœnicians, and with which the Phœnicians traded. In some places Tarshish seems to be evidently a country.

c. Kittim.—This gentile noun, usually written Chittim in the A. V., is generally connected with Citium of Cyprus. Other indications of Scripture seem not unfavourable to this identification, which would make the Kittim or Chittim a sea-faring population of Cyprus.

d. Dodanim, closely connected in the table by construction as well as in form, with Kittim—'Elishah and Tarshish, Kittim and Dodanim' (Gen. x. 4)—was a maritime or insular people. Ezekiel says of Tyre, 'The men of Dedan [were] thy merchants; many isles [were] the merchandise of thine hand: they brought thee [for] a present

horns of ivory and ebony' (xxvii. 15). The reading in the list as given in 1 Chron. (i. 7), is Rodanim, a form which is probably the true one, as supported by the LXX. and Samaritan versions. The LXX. identifies this people with the Rhodians in all instances, including that in Ezekiel. In the prophet's time Rhodes was a great seat of Phœnician commerce, and at the site of Camirus, one of its three important cities before Rhodes the city was founded, many objects of Phœnician style have been discovered. It may be added that ivory is one of the materials of its antiquities. The identification, considering the probable place of the Kittim, is very likely.

5. Tubal, and 6. Meshech, are in later places mentioned together (Ezek. xxvii. 13; xxxviii. 2, 3; xxxix. 1), and were evidently northern nations (xxxix. 2). They have been traced in the Moschi and Tibareni mentioned together by Herodotus (iii. 94; vii. 78), and as Muskai and Tuplai, in the Assyrian inscriptions (Rawlinson's *Herodotus*, i., p. 535), which inhabited the northern coast of Asia Minor towards the Caucasus.

6. Tiras, last in the list of the sons of Japheth, has not been satisfactorily identified. The best comparison is perhaps with the Tyrrhenians or Tyrsenians, as then all the chief territories of Japhethite civilization would seem to have been indicated—Armenia, Asia Minor, Thrace, the Asiatic Islands, European Greece, Italy, and Spain.

#### THE HAMITES.

|         |             | k. Hamathite. |               |

1. Cush is immediately recognised in KEESH, the ancient Egyptian name of Ethiopia above Egypt. With this identification all geographical mentions in Scripture, except that in the account of Paradise (Gen. ii. 13), agree. The latter may refer to a primeval Cush, but an Asiatic settlement is positively indicated in the history of Nimrod, and we shall see that the settlements of the Cushites extended from African Ethiopia to Babylon, through Arabia.

a. Seba is connected by Isaiah with Egypt and Cush (xliii. 3; xlv. 14), and the statement of Jo-

sephus that the island and city of Meroë bore this name is therefore to be noticed. In the ancient Egyptian geographical lists, SAHABA and SABARA occur among names of tribes or places belonging to Ethiopia (Brugsch, *Geogr. Inschr.* ii., p. 9, tav. xii., k. l.).

b. Havilah.—The identification of Havilah is difficult, as the name recurs in the list of the sons of Joktan; and in Biblical geography, except only in the description of Eden, it is found in Arabia alone. If the two stocks intermixed, and thus bore a common name, a single localization would be sufficient.

c. Sabtah can only be doubtfully traced in Arabian geography.

d. Raamah, in the LXX., 'Ρεγμᾶ, is well traced in the Πέγμα of Ptol. (vi. 7), and Πῆγμα of Steph. Byz. (s.v.), a city of Arabia on the Persian Gulf.

a. Sheba, and b. Dedan, bear the same names as two descendants of Keturah (Gen. xxv. 3), from which it has been reasonably supposed that we have here an indication of a mixture of Cushite and Abrahamite Arabs, like that of Cushite and Joktanite Arabs inferred in the case of the two Havilahs. It is to be remarked that the name of Dedan has been conjecturally traced in the modern name of the island of Dádan, on the east coast of Arabia, and that of Sheba in the ruins of an ancient city called Sebà, in the neighbouring island of Awál (E. S. Poole in Smith's *Dict. of the Bible*, s.vv. *Dedan*, *Sheba*).

e. Sabtechah is not identified.

f. Nimrod is generally thought to have been a remoter descendant of Cush than son, and this the usage of Hebrew genealogies may be held to sanction. He is the first and only known instance in the list of the leader of a dynasty rather than the parent of a nation or tribe. His name is followed by a parenthetical passage relating to his power and the establishment and extension of his kingdom. It is probable that this narrative is introduced to mark the commencement of the first Noachian monarchy. It may be compared to the notices of inventions in the account of Cain's descendants (Gen. iv. 20-22). The name of Nimrod is probably Semitic, from נִמְרֹד, 'he was rebellious.'

It occurs in ancient Egyptian, in the form NAMURET, in the family of the 22d dynasty, which was certainly, at least in part, of foreign origin. The like names SHESHENK, USARKEN, TEKERUT, appear to be Semitic.

2. Mizraim, literally 'the two Mazors,' is the common name of Egypt in the Bible; the singular, Mazor, being rarely used. It has been thought to be a purely geographical name, from its having a dual form, but it has been discovered in ancient Egyptian as the name of a Hittite or kindred chief, B. C. cir. 1300, contemporary with Rameses II., written in hieroglyphics MATREEMA, where the MA is known to express the Hebrew dual, as in MAHANMA for Mahanaim. That it should be used at so early a time as a proper name of a man, suggests that the fact that Egypt was so called may be due to a Noachian's name having had a dual form, not to the division of the country into two regions. If, however, we suppose that in Gen. x. Mizraim indicates the country, then we might infer that Ham's son was probably called Mazor. It is remarkable that Mazor appears to be equivalent to Ham: as we have seen, the meaning of the latter is evidently 'hot' or 'black,' perhaps both, and a

cognate word is used in Arabic for 'black mud'; among the meanings of **مصر**, the Arabic equivalent

of Mazar, the Kámoos gives 'red earth or mud.' Thus Ham and Mazar or Mizraim would especially apply to darkness of skin or earth; and, since both were used geographically to designate the 'black land,' as cultivated Egypt always was from the blackness of its alluvial soil, it is not surprising that the idea of earth came to be included in one of the significations of each. If Mizraim be purely geographical in the list, then we might perhaps suppose that it was derived from Mazar as a Semitic equivalent of Ham. It is certainly remarkable that all the descendants of Mizraim are mentioned as tribes in the plurals of gentile nouns.

a. Ludim, perhaps mentioned in passages of the prophets as Lud or Ludim (Is. lxvi. 19; Jer. xlv. 9; Ezek. xxvii. 10; xxxviii. 5; xxx. 4, 5), where, however, the Shemite Lud may be intended. There would be no doubt that in at least one of these passages (Ezek. xxx. 4, 5), where Egypt and, as far as they are identified, African nations or countries are spoken of, the Ludim are those of the Mizraite stock, were it not possible that under the term Ludim, or Lydian, the Ionian and Carian mercenaries of the Pharaohs may be indicated.

b. Anamim, a nation as yet not identified.

c. Lehabim, no doubt the same as the Lubim or Libyans mentioned in later places of Scripture as allies or mercenaries contributing to the armies of the Pharaohs, and supporting or dependent on Egypt as a race in very close relations. They correspond to the REBU or LEBU of the Egyptian inscriptions, western neighbours of Egypt, conquered by the kings of the 19th and 20th dynasties.

d. Naphtuhim strikingly resembles the Coptic name of the westernmost part of Lower Egypt, the territory of the city Mareia, probably the older Mareotic Nome, **Ⲣⲓⲕⲁⲓⲁⲩ** or **Ⲣⲓⲕⲁⲓⲁⲩⲁ**, a plural form commencing with the definite article **Ⲣⲓ**.

e. Pathrusim, a tribe of which the territory, 'the country of Pathros,' is mentioned in later places. The latter has been compared to the Egyptian Pathyrite or Phaturite Nome; in Coptic **ⲡⲁⲩⲩⲧⲟⲩⲣⲏⲥ**, **ⲡⲁⲩⲡⲏⲩⲟⲩⲣⲏⲥ**, in ancient Egyptian PA-HAT-HER, the chief objection to which identification is, that the geographical importance of the name seems scarcely sufficient.

f. Casluhim, not as yet identified.

g. Caphtorim, and the land of Caphtor, have given rise to much discussion. We have proposed as the equivalent of Caphtor, the ancient Egyptian name of Coptos, **KEBTU**, **KEBTA**, **KEB-HER**, probably pronounced Kubit, Kabt, Kebt-hor, the Coptic **ⲕⲉⲓⲩⲧⲁ**, **ⲕⲉⲓⲩⲧⲟ**, **ⲕⲉⲓⲩⲧⲱ**,

**ⲕⲉⲓⲩⲧⲱ**, Gr. **Κόπτος**, Arab. **كُفْت** Kuft, and ventured to compare **ⲁⲓⲩⲩⲡⲧⲟⲩⲥ** with **ⲕⲉⲓⲩⲧⲱ** (Smith's *Dict. of the Bible*, art. *Caphtor*). It must be remembered that the city Coptos, or its nome, has given its name to the whole nation of Egyptians, who were known as Copts by the Arabs at the time of the conquest. But good reasons have been urged in favour of Cyprus, especially the circumstance of the Philistine migration.

a. Philistim.—The Philistines are here said to have come forth from the Casluhim; elsewhere they are called Caphtorim, and said to have come out of Caphtor. It is not allowable to read that the Philistim and Caphtorim came from the Casluhim. Perhaps there is a transposition in the text. The origin of the Philistines from a Mizraite stock is a very important fact for the explanation of the list.

3. Phut.—In later places, Put or Phut occurs as the name of an African country or nation, closely connected with Egypt, like the Lubim. It may be compared to those geographical names in the ancient Egyptian inscriptions, in which the element **PET**, 'the bow,' occurs. Nubia was called 'the bow-land' **TU-PET**, where is usual to read **TU-KENS**, but the bow has not the sound **KENS** elsewhere; and it is probable that a part of Nubia was called KENS, and that the bow was written as a determinative symbol to show that KENS was included in 'the bow-land;' but the question is full of difficulties.

4. Canaan in Gen. ix. (18, 22, 25, 26, 27) is distinctly mentioned as the son of Ham. It is more likely that his name means the 'degraded,' 'the subdued' man, than 'the lowlander,' though both senses are possible.

a. Sidon, 'the first-born' of Canaan, like Heth, immediately following, is a proper name, whereas all the remaining names are gentile nouns in the singular. Sidon is thought to signify 'the fishing-place,' so that the name of the place would seem here to be put for that of the founder, 'the fisherman,' **ⲁⲓⲓⲁⲟⲩ** of Sanchoniathon or Philo of Byblus. But it must be noticed that the next name Heth is treated in later places as that of a man. The position of the Sidonians, like that of most of the Canaanite tribes, needs not to be described.

b. Heth, ancestor of the 'Children of Heth,' or Hittites, a very important nation of Palestine and Syria. There are indications in Scripture of Hittites out of Palestine, and the ancient Egyptians warred with the **KHETA** in the valley of the Orontes, whose names show that they spoke a Semitic language. The Egyptian monumental representations show their armies to have been composed of men apparently of two races, the one Shemite in type, the other beardless, and resembling the Tatar type [**HITTITES**].

c. The Jebusite, d. Amorite, e. Girgasite (properly Girgashite), f. Hivite, all inhabitants of Palestine, but the Amorite, like the Hittite nation, seems to have had a wider extension, for the territory in which stood **KETESH**, the great stronghold of the **KHETA** on the Orontes, is called in Egyptian 'the land of **AMAR**' (Brugsch, *Geogr. Inschr.*, ii. pp. 21, 22, tav. xviii. 44, 47).

g. The Arkite, compared with the Phœnician town of Arca.

h. The Sinite, not satisfactorily identified. Perhaps one of their settlements may be traced in Sin or Pelusium.

i. The Arvadite, no doubt the people of Aradus. The derivation from **ⲓⲁⲩⲱ**, with the sense 'wandering,' 'place of fugitives,' is in accordance with the tradition referred to by Strabo, who says that Aradus was built by Sidonian fugitives (xvi. 2, 13, 14). Aradus was a Phœnician city.

j. The Zemarite, conjecturally traced in the town Simyra, which has nothing to recommend it but its neighbourhood to Arca and Aradus.

h. The Hamathite, well known to have been seated in Upper Syria, where Hamath, on the Orontes, was long a capital of an important kingdom.

## THE SHEMITES.

## i. Shem.

1. Elam.

2. Asshur.

3. Arphaxad.

a. Salah. a. Eber. a. Peleg.

b. Joktan.

a. Almodad.

b. Sheleph.

c. Hazarmaveth.

d. Jerah.

e. Hadoram.

f. Uzal.

g. Diklah.

h. Obal.

i. Abimael.

j. Sheba.

k. Ophir.

l. Havilah.

m. Jobab.

4. Lud.

5. Aram.

a. Uz.

b. Hul.

c. Gether.

d. Mash.

1. Elam, when used geographically, held to correspond to Susiana, not to Persia Proper.

2. Asshur, afterwards the Assyrian nation. In the cuneiform inscriptions Asshur is the chief object of worship of the kings.

3. Arphaxad, probably well traced in the province Arrapachitis.

a. Salah seems to be only a genealogical link. In the Shemite family the list is clearly something more than ethnological and geographical; it is of the nature of a pedigree, at least so far as it deals with the ancestry of Abraham.

a. Eber.—It is impossible here to discuss the difficult question whether to this patriarch the name of the Hebrews owed its origin. The argument based on the mention in this list that Shem was 'the father of all the children of Eber' (x. 21), seems to us almost unanswerable on the affirmative side.

a. Peleg seems, like Salah, to be but a genealogical link.

b. Joktan is perhaps only a similar link: his descendants form an important series.

a. Almodad, supposed to be traceable in Arabian names.

b. Sheleph, traced in El-Yemen.

c. Hazarmaveth, identical in name with the great region of Hadramäwt in southern Arabia.

d. Jerah, not certainly identified, and e. Hadoram, not traced.

f. Uzal, the same name as Awzál, the ancient name of San'á, capital of El-Yemen.

g. Diklah, h. Obal, i. Abimael, not traced.

j. Sheba is the same name as the Arabic Sebà, the old kingdom of El-Yemen. The mentions in the Bible of the kingdom of Sheba point towards Arabia, and the Arab indication thus fixes the position of Joktanite Sheba in the south.

k. Ophir, perhaps traced in southern Arabia.

l. Havilah, as already remarked under the head

of the Cushite Havilah, may indicate a mixture of Cushite and Joktanite settlers in Arabia.

m. Jobab, not certainly identified.

4. Lud has been compared to Lydus, the traditional ancestor of the Lydians. The Shemite character of the Lydian civilization is confirmatory of this view. The Egyptian monuments of the empire mention a powerful Asiatic people of Shemite type, apparently living not far from Mesopotamia, called RUTEN or LUDEN. It is possible that the Lydians may have migrated into Asia Minor after the time of the Egyptian empire, or that there may have been two Lydian settlements. It is not clear whether the Lud or Ludim of later places of Scripture were of this stock, or the same as the Mizraite Ludim, as already remarked.

5. Aram is, in later places, the geographical designation of Syria, though the term is not of the same extent as our Syria. We read of Aram-naharaim, 'Aram of the two rivers,' either Mesopotamia, according to the general opinion, or the country of the Orontes and Leontes, of Padan-Aram, perhaps a part of the same tract, or another name for it, and also of Aram-Zobah, Aram-Beth-rehob, Aram-Maachah, and Aram-Dammeseck, or Syria of Damascus, all kingdoms in the country Aram.

a. Uz. Mention is made of 'the land of Uz' in the Book of Job, where other indications seem to point to the north of Arabia.

b. Hul and c. Gether are not identified; d. Mash is but conjecturally traced in Mesene, in Lower Babylonia, or Mons Masius, at the north of Mesopotamia.

We may now tabulate our results, adding certain other information to aid us in drawing general inferences. The classification of races and languages, so far as it concerns the identifications, must be first stated.

## RACES.

## I. Caucasian Race.

## Varieties.

1. White (as Greek).

2. Tawny (Arab).

3. Brown (Abyssinian).

II. Lower Nilotic Race.  
(Egyptian).III. Nigritian Race.  
(Negro).IV. Tatar Race.  
(Chinese).

## LANGUAGES.

I. Semitic Family.  
(as Hebrew.)II. Iranian Family.  
(Greek.)

## III. Barbaric Class.

## Families.

1. Egyptian.

2. Nigritian.

3. Tatar.

In the table which follows, the first column gives those names from Gen. x. for which there are highly-probable geographical identifications; the second column states these identifications; the third contains ethnological evidence from Egyptian (Eg.), Assyrian (As.), or other sources; the fourth exhibits the like philological evidence.

Name.	Identification.	Race.	Language.
Ham	Egypt ?	Lower Nilotic	Barbaric, Egyptian
Gomer	Cimbri	Caucasian	Iranian
Madai	Media	Caucasian	Iranian
Javan	Greeks	Caucasian, white	Iranian
Tubal	Tibareni		
Meshech	Moschi		
Cush	Ethiopia	Nigritian ?	Barbaric, Nigritian ?
Seba	Meroë		
Raamah	Regma (E. Arabia)		
Nimrod	King of Babylonia and Assyria		
Mizraim	Egypt	Lower Nilotic	Barbaric, Egyptian
Lehabim	Libyans	Caucasian, white (Eg.)	
Naphtuhim	Egypt ?		
Philistim	Philistines	Lower Nilotic ? (Eg.)	
Canaan	Palestine and Syria	Caucasian (Eg.)	Semitic
Sidon	Sidon		Semitic
Heth	Hittites	Caucasian and Tatar ? (Eg.)	Semitic
Jebusite	Palestine and Syria		
Amorite			
Girgasite			
Hivite			Semitic
Arkite			
Arvadite			
Hamathite			
Elam	Susiana	Caucasian (As.)	
Asshur	Assyria	Caucasian (As.)	Semitic
Arphaxad	Arrapachitis		
Eber	Hebrews ?	Caucasian, tawny	Semitic
Sheleph	Southern Arabia		
Hazarmaveth		Caucasian, tawny and brown	Semitic
Uzal			
Sheba			
Lud	Lydia ?	Caucasian	
Aram	Syria	Caucasian	Semitic

From this evidence we may draw the following inferences on several important points :—

*Order of Names.*—The Japhethites seem to be placed first, as the most distant nations. In the list of the Hamites, the southern and therefore most distant Cushites are arranged from west to east, Seba (Meroë) being followed by Raamah (in Arabia), and the series closing with Nimrod, who ruled in Babylonia and Assyria. North of Cush is Mizraim, in the enumeration of whose tribes the western Lehabim (Libyans) are followed after an interval by the easternmost Philistim, apparently the only Mizraites of Palestine. The list of the Canaanites begins with Sidon, the Phœnicians of the sea-coast north of the Philistines; then mentions under Heth the Hittites, perhaps on account of their southern settlement, and going northwards enumerates tribes near Lebanon, closing with the Syrian Hamathites. The Shemite tribes begin in the east, extending regularly from Susiana to Arabia, and then ascending to Syria. Lud may be an exception, but as we have seen the Lydians may primevally have been settled near Syria; otherwise Lud may be mentioned between the Arabs and Aram as an outlying Shemite tribe, to be spoken of before the enumeration of those nearest Palestine.

*Race.*—All the names identified with a high degree of probability are, with six exceptions, of Caucasian nations. The exceptions are : three cer-

tainly of the Lower Nilotic race, which is intermediate between the Caucasian and Nigritian races, showing strong traits of both, a fourth probably of the same race, and two others which require more particular investigation. Cush, in ancient Egyptian, applies to Nigritians; for the race of KESH is represented on the Egyptian monuments as of the most marked Nigritian type : the kings and other royal personages of Meroë, and the Ethiopians of rank under them, are, however, represented on their monuments as similar to the Lower Nilotic race. This suggests that Cush may indicate a country mainly peopled by Nigritians, yet with a governing mixed race. The remaining exception is the case of the Hittites, who are represented on the Egyptian monuments as of two types—the one Caucasian, the other apparently Tatar. This may show that two different races were ruled by those Hittite kings with whom the Pharaohs warred, as Og the king of Bashan was a Rephaite, not an Amorite.

*Language.*—The languages are all Iranian or Semitic, with three exceptions. Egyptian, occurring twice in our table, has a monosyllabic barbaric vocabulary, with an amalgamate Semitic grammar. Here, therefore, as in race, there is a departure from the unmixed type. To Cush we have conjecturally assigned a barbaric Nigritian language, because the names of Ethiopian tribes conquered by the Egyptians, and of Ethiopian sovereigns of later times, are not readily traceable to either an Egypt-

ian or a Semitic source; but we cannot say certainly that a Semitic element is wholly wanting in the languages to which these words belong.

The order indicates that the intention of the list is partly geographical. In the detail of each division the settlements of races are probably indicated rather in the order of position than of ancestral relationship, though the principle of relationship is never departed from as far as we can see.

The list of Gen. x. contains certain statements which may now be examined, in order to infer the date to which the document refers. It is said, 'Afterward were the families of the Canaanites spread abroad' (x. 18); which may indicate the formation of the great Hittite settlement in the valley of the Orontes, or other like extensions. In any case, it points to an event, or series of events, almost certainly prior to the establishment of the Israelites in Palestine. So, too, the definition of the otherwise unknown Resen, as 'the great city' (Gen. x. 12), indicates a period anterior to that of the kings who ruled at Asshur (Kal'ah Sherghât) and Calah (Nemrood), the earliest of whom is placed about B.C. 1270. At the time of the Egyptian empire the capital appears to have been Nineveh, and the date of the list would therefore be anterior to that time, or, at least, to the reign of Thothmes III., to whom it was tributary about 1450 B.C. It would appear, therefore, that the list was either written or put into its present form not long after, or at the time of Moses, if not earlier; and that it refers to a yet earlier period—that of the first spread of the Noachians.

The nations omitted in the list must now be noticed, so far as they seem to be of a like high antiquity. In Deut. ii. there is mention of several tribes or nations which had been destroyed by other tribes or nations which reached Palestine or its neighbourhood before the Israelite occupation. Certain of these are called Rephaim; others not. The particulars are as follows, as far as they relate to our present subject:—

1. Emim, Rephaim, succeeded by Moabites (Deut. ii. 9-11).
2. Horim, succeeded by Edomites (ver. 12, 22).
3. Zamzumim, elsewhere called Zuzim (Gen. xiv. 5), Rephaim, succeeded by Ammonites (Deut. ii. 19-21).
4. Avim, succeeded by Caphtorim, that is, Philistines (ver. 23).
5. Anakim, here mentioned as Rephaim (ver. 10, 21), still occupying the south of Palestine at the time when the Israelites entered it.

The Avim were probably also a Rephaite nation, for as late as David's time giants were found among the Philistines. Elsewhere in Palestine the Israelites seem to have found, besides 'the three sons of Anak,' or the Anakim of Hebron, Og, the king of Bashan, who 'remained of the remnant of Rephaim' (ii. 11), a man of gigantic stature. The position of these Rephaim is that of a few powerful chiefs among the Canaanites and Philistines, representing tribes destroyed by Hebrews, the only exceptional case being that of the Philistines, if, as we suppose, the Avim were Rephaim, for in that case the former must have first attacked, but ultimately changed their policy, and abstained from annihilating the older population.

At an earlier time we find a very different condition of the country. The powerful confederacy of which Chedorlaomer was chief, attacked and con-

quered, besides the kings of the cities of the plain, the Rephaim, Zuzim, Emim, Horim, Amalekites, and Amorites. Here the Canaanites occupy a very inferior position in the south and east of Palestine, but one Canaanite nation being mentioned, and besides undoubted Rephaites, the Horim probably of the same stock, and the ancient and pedigreeless nation of Amalek.

We thus find an indication of an old population of Palestine distinct from both Canaanites and Hebrews, and especially remarkable for their great height. That they were in race still more remote from their successors than has usually been held, has been argued from the Anakim's being spoken of as 'of the Nephilim' (Num. xiv. 33), the term applied to the giants before the Flood, where it is said, 'The Nephilim were in the earth in those days' (Gen. vi. 4). On this subject, compare *The Genesis of the Earth and of Man*, 2d ed., pp. 80-82, and 284, 285, where it is maintained that the Nephilim were a pre-Adamite race.

In conclusion, the list of Noah's descendants in Gen. x. gives the most valuable information as to the primeval civilized world; this information being fullest in reference to the countries of which Palestine or Syria was the centre. It satisfactorily accounts for the common characteristics of the Caucasian race, but apparently does not treat of the other great stocks, and, so far as its evidence goes, we have no certainty that they were descended from Noah.—R. S. P.

#### NAVIGATION. [SHIP.]

NAZARENE (Ναζαρηνός, Ναζωραῖος), an epithet frequently applied to Jesus Christ to indicate his connection with Nazareth. To this place his parents took him on their return from Egypt (Matt. ii. 23), in which St. Matthew finds the fulfilment of an ancient oracle, 'that he should be called a Nazarene.' [NAZARETH; QUOTATIONS.] At Nazareth 'he was brought up' (Luke iv. 16; comp. ii. 51); and his connection with this place was so well known that he came to be commonly designated Jesus the Nazarene, or, as the A. V. gives it, Jesus of Nazareth. This appellation is given to him by his own disciples and followers (Luke xxiv. 19; John i. 45; Acts ii. 22; iii. 6; iv. 10; vi. 14; xxvi. 9); by the people of the Jews (Mark x. 47; Luke xviii. 37); by the servants of the high-priest (Matt. xxvi. 71; Mark xiv. 67); by the soldiers who arrested him (John xviii. 5, 7); and by Pilate in the inscription on the cross (John xix. 19). It is also given to him by the unclean spirit whom he cast out in the synagogue at Capernaum (Mark i. 24; Luke iv. 34); and it is used by our Lord himself after his ascension (Acts xxii. 8). From the first the term carried in it a latent reproach according to Jewish prejudices (John i. 46; comp. vii. 41, ff.); and afterwards it was applied to the followers of Jesus Christ by the Jews as a designation of contumely and scorn (Hieronym. *De locc. Hebb.*, Opp. iii. 183; *Comm. in Esai.* xlix.; Epiphani. *Haer.* xxix. 9). This began in the first age of the church, as we learn from Acts xxiv. 5, where the Christians are stigmatised by the Jews as 'the heresy of the Nazarenes.'—W. L. A.

NAZARETH (in the *T. R.* Ναζαρέτ, and *Naẓarēt*; in MSS. sometimes Ναζαράδ, Ναζαρά, and Ναζαράτ; *Nazareth*), a town of Galilee (πόλις τῆς Γαλιλαίας) chiefly celebrated as the residence

W. A. G. 1840

As the sun sets

of our Lord's parents, and the home of his youth (Matt. ii. 23; Luke i. 26; ii. 39, 51). It is a singular fact that the first mention of this town is in connection with the advent of the Messiah, as related by Luke the evangelist (i. 26). The name occurs nowhere in the O. T., nor in any writer before the birth of Christ, nor is it found in any classic author.

The name Nazareth demands the attention of the Biblical scholar on account of the statement of the evangelist, 'And he came and dwelt in a city called Nazareth (Ναζαρέτ); that it might be fulfilled which was spoken by the prophets, He shall be called a Nazarene' (Ναζωραῖος; Matt. ii. 23). This passage is confessedly difficult, and has formed the basis of determined attacks upon the

inspiration of Scripture from the earliest ages. Various interpretations have been given. The words here cited are not found in any part of the sacred Scriptures. Some say that by 'the prophets' are meant, not the authors of the O. T., but a lower grade of prophetic interpreters, who deduced this meaning from their words. Others affirm that Matthew refers to some traditional saying (τὸ ρηθὲν), and not to any written text. Others, again, state that some portions of the canonical Scriptures have perished, and this passage among them (see Jerome, Chrysostom, and Theophylact, *in loc.*; *Critici Sacri*). These explanations will not satisfy the critical scholar. The phrase οἱ προφῆται is used here and elsewhere in the gospels, as a proper name, to denote

400. Nazareth.

one of the three great sections into which the Jews divided the O. T. (Matt. v. 17, 18; Luke xvi. 29; xxiv. 44); but the very generality of the reference is enough to show that this is no citation from any one of the sacred writers, but a summary of the symbolic or spiritual meaning of several. It ought to be remembered that the allusions to the Messiah in the O. T. are of three kinds, directly prophetic, typical, and symbolical. We are justified, therefore, as Bishop Ellicott says, 'in assigning to the word Ναζωραῖος all the meanings legitimately belonging to it, by derivation or otherwise, which are concurrent with the declarations of the prophets in reference to our Lord. We may therefore trace this prophetic declaration, (a) principally and primarily, in all the passages which refer to the Messiah under the title of the *Branch* (נֶצֶחַ) of the root of Jesse (Is. xi. 1; Jer. xxiii. 5; xxxiii. 15; Zech. vi. 12); (b) in the references to the circumstances of lowliness and obscurity under which that growth was to take place (cf. Is. liii.

2); and perhaps further (c) in the prophetic notices of a contempt and rejection such as seems to have been the common and, as it would seem in many respects, deserved portion of the inhabitant of rude and ill-reputed Nazareth' (*Lectures on the Life of our Lord*, p. 81, note. See also the subject fully discussed in Mill, *On the Mythical Int. of the Gospels*, pp. 334, seq.)

The whole history of Nazareth clusters round one event, known throughout the Christian world as the ANNUNCIATION. Before that event its name was unknown; but since, it has become a household word throughout Christendom, linked in holy alliance with Bethlehem and Jerusalem. From this event comes all its traditional glory. Splendid structures have been built to commemorate it. Thousands of pilgrimages have been made in honour of it. But to the thoughtful Christian, Nazareth—the home of Christ's boyhood, the scene of his domestic relations, his private life, his mental development, his prayers and communion with the Father, his early labours—possesses a far

greater charm, a far more intense interest, than the miraculous event of the Annunciation could ever of itself have conferred. Yet there is little said about Nazareth in the gospels; and the references to its site and features are only incidental. They are worthy of note, however. 'The angel Gabriel was sent from God unto a city of Galilee, named Nazareth, to a virgin . . . and the virgin's name was Mary' (Luke i. 26, 27). 'From Galilee, out of Nazareth,' Joseph and Mary went to Bethlehem to be taxed (Luke ii. 4). After the return of the holy family from Egypt, 'they returned into Galilee, to their own city, Nazareth' (Luke ii. 39; Matt. ii. 23). After the visit to the temple at the age of twelve, Jesus went down with his parents to Nazareth, 'and was subject unto them' (Luke ii. 51). When entering on his public life, 'Jesus came from Nazareth of Galilee, and was baptized of John in Jordan' (Mark i. 9; Matt. iii. 13). Nazareth was now no longer his home. Yet he returned to it. 'He came to Nazareth, where he had been brought up' (Luke iv. 16). The reception he met with shows only too plainly the general character of the Nazarenes, and that there was some foundation for Nathanael's question, 'Can any good thing come out of Nazareth?' (John i. 46). His fellow-townsmen not only rejected him, they sought to murder him; then he left Nazareth, and took up his residence in Capernaum, which was henceforth called 'his own city' (Luke iv. 16-31; Matt. iv. 13-16; ix. 1). Again he visited his native town, and taught in the synagogue with such clearness and power that all were astonished. Still they said in derision, 'Is not this the carpenter's son? . . . whence, then, hath this man all these things? And they were offended at him' (Matt. xiii. 54-58; Mark vi. 1-6). We hear no more of Nazareth in sacred history, and its traditional history is not worth recording. It attracted no notice till the establishment of Christianity in the time of Constantine; nor does it seem to have been visited by a single pilgrim till about the 6th century (Epiphanius, *adv. Hæres.*, i., pp. 128, 136; Reland, *Pal.*, p. 905). In the 7th century it contained two churches—one built over the fountain; the other over the house of Mary, now occupied by the Latin convent (Arculf, in *Early Travels in Pal.*, Wright, p. 9; Reland, *l.c.*) During the Crusades, its great church was rebuilt and richly endowed, and the town was made the seat of a bishop (*Will. Tyr.*, ix. 13; xxii. 16; *Jac. de Vitriac.*, 56; see Reland, p. 906; Robinson, *B. R.*, ii. 341, *seq.*; *Handbook*, pp. 360-362).

Nazareth has never been lost sight of since the days of our Lord, and its name remains unchanged to the present day. There can be no question, therefore, as to its site. Eusebius and Jerome describe it as fifteen miles eastward from Legio (now Lejjûn), and near Mount Tabor. Jerome calls it 'a little village' (*viculus*; *Onomast.* s. v.) It stands in an upland vale amid the hills of Galilee, two miles from the plain of Esdraelon, and six west of Tabor. The vale, or basin, is a mile long by about a quarter broad. On one side there are a few gardens enclosed with hedges of cactus; here and there are clumps of olives scattered over it; all the rest is covered with corn-fields and luxuriant pastures. A girdle of rounded hills encircles it, shutting out all view of the world beyond, and giving that air of quiet, peaceful seclusion, which constitutes its chief charm, and its peculiar

adaptation to the early history of our Lord. The hills have a rugged aspect, the white limestone cropping up everywhere in jagged points, and bold bluffs, and bare crowns; but the bushes and aromatic shrubs, and especially the brilliant wild flowers that spring up from the scanty soil, and from the clefts and crannies of the rocks, take away from the bleakness of the landscape, and give it, in early spring, a pleasing and picturesque appearance. The narrow rugged glens that branch off in all directions among the hills, seem as if made for meditation. The hill on the north-west of the vale overtops all the others, rising to a height of some 400 feet above the village; and is crowned by a white-domed tomb. Its side is steep, furrowed by ravines, and broken by ledges of bare rock. On its lower declivities, partly in the ravines, partly on the shelving base, and partly on the sides and tops of the rugged ledges, stand the houses of Nazareth—plain, neat, substantial stone buildings. This is the hill on which the evangelist tells us 'the city was built' (Luke iv. 29); and there is more than one cliff along its side that might have served the purposes of the fanatical populace when they led him unto a brow of the hill (*ἔως ὀφίους τοῦ ὄρους*), that they might cast him down headlong. The town was built on 'the hill,' not 'on the brow;' and the cliff from which they attempted to cast Jesus (*ὥστε κατακρημνίσαι αὐτόν*) was above, not below the town (*Handbook*, p. 359; Stanley, *S. and P.*, p. 359; Robinson, *B. R.*, ii. 335). Monkish traditions have assigned another locality, two miles distant, to this incident; but tradition does not agree with the gospel narrative.

One of the most interesting spots about Nazareth is the fountain—there is but one—a short distance east of the village. Over the trough that receives the water is an arched recess, and around it are some venerable olives. A few yards above it is the Greek church of the Annunciation, within whose walls is the source or spring at which, according to the *Protevangelion* (ix. 7), the angel Gabriel appeared to Mary. Independent of the tradition, the fountain may justly claim the title of 'Holy Place.' It is now, and must have been in all ages, a favourite resort of the youth of Nazareth.

Nazareth has a population of about 4000 souls, the vast majority being Christians. The men have a look of sturdy independence. They are better dressed and better mannered than the peasants of Palestine usually are; and the females are justly celebrated for their grace and beauty. The houses are all of stone, and look clean and comfortable; but the streets are narrow and filthy. The principal building is the Latin convent, containing the church, built, says tradition, over the spot from whence the *Santa Casa* of Loretto took flight 600 years ago for the more peaceful soil of Italy (Stanley, *S. and P.*, p. 439). The scene of the *Annunciation* is pointed out in a grotto beneath the altar. Several other traditional 'holy places' are shown in and around Nazareth, including the alleged Mount of Precipitation, two miles distant, and overhanging the plain of Esdraelon. These have no historic basis, and a description of them would therefore be out of place in this article (see *Handbook*, *l.c.*; Stanley, pp. 357, 437-444; Bonar, *Land of Promise*, pp. 397-403; *Quaresmius* ii., p. 834; Robinson, *B. R.*, ii. 333-343).—J. L. P.

NAZARITE, more properly NAZIRITE (נִזִּיר)

נִזִּיר, fem. נִזִּירָה, Sept. *ναῖρατος, εὐδόμενος*, *ἀνέμνος*, Vulg. *Nazaræus*), one, not of the order, who bound himself or herself by a vow of abstinence and purity, either temporarily or for the whole life.

1. *Name and its signification.*—The etymology and signification of נִזִּיר are matter of dispute. The more general opinion is that נִזִּיר is from נָזַר, *to be separated*, Niph. *to separate oneself, to abstain*, and denotes *one separated*, i.e., for the service of God. But against this derivation it is urged that (1.) It is impossible to explain in a natural manner many passages in which the word נִזִּיר is used on the theory that its primary meaning is *separation, abstinence, consecration*. Thus, e.g., the vine is called נִזִּיר (Lev. xxv. 5, 11), the very word which denotes *Nazarite*; and, on the supposition that it denotes *to be separated*, it is very difficult to say why this term is applied to vines alone, and why it is not also used of the produce of trees or the field; and (2.) The word נִזִּיר unquestionably denotes *diadem, crown* (Gen. xlix. 26; Exod. xxix. 6; xxxix. 30; Lev. viii. 9; xxi. 12; 2 Sam. i. 10; 2 Kings xi. 12; 2 Chron. xxiii. 11; Zech. ix. 16, *al.*) Now, if we admit that the idea of *crown* is the primary and not the secondary one, and accordingly take נִזִּיר (passive participle) to denote *the crowned one*, the meaning which it is admitted to have in the very first passage in which it is employed (Gen. xlix. 26, with Deut. xxxiii. 16; Lam. iv. 7, 8), all the difficulties vanish. The Nazarite is *the crowned one*, because, as we are told in Num. vi. 7, he has 'the crown of God upon his head'

(נִזִּיר אֱלֹהֵיוּ עַל רֹאשׁוֹ), evidently referring to his distinguishing badge of the freely growing and profuse mass of hair, which was considered an ornament (2 Sam. xiv. 25, 26), and which he was not allowed to cut off (Num. vi. 5), because therein his vow chiefly consisted (Judg. xii. 5); and this is confirmed by Num. vi. 9, where it said, 'if he defiled (נִזִּיר רֹאשׁוֹ) his head diadem he is to shave his head.' Hence also the signification of נִזִּיר, *ornamental hair, long hair* (Jer. vii. 29 with Num. vi. 19). Whilst the vine again, laden with fruit, is called *Nazarite*, or more probably *Nazir* נִזִּיר, i.e., *the crowned* (Lev. xxv. 5, 11); because in its uncult state, when its head is covered with grapes and foliage, it is as much adorned with a diadem as the head of the Nazarite with the abundant hair, just as we call the foliage of a tree its crown. Besides the vine hills rising in the different parts of Palestine, and resembling heads covered with hair, may have suggested this figure to the Oriental mind, since the summits of mountains are called their *heads* (רֹאשׁ) in Hebrew (Gen. viii. 5; Exod. xvii. 9, 10; xix. 20; Amos i. 2), and the foliage is not unfrequently compared to the hair or wool (צֹמֶת) of animals (Ezek. xvii. 3, 22; xxxi. 3, 10, 14; Saalschütz, *Das Mosaische Recht.*, 158).

2. *What constituted a Nazarite.*—The special vow whereby one bound himself to be a *Nazarite* (נִזִּיר) involved the following three things:—He is to—*i.* Abstain from wine and strong drink—or as Onkelos, who renders *בין ויין ושכר*—and the ancient Jewish canons will have it, from old and new wine—vinegar made of wine or strong drink; liquor of grapes; grapes either moist or dried; and, in fact, from every production of

the vine—even from the very stones and skin of the vine. According to the Jewish canons, however, 'strong drink made of dates, or such like, is lawful for the Nazarite' (Maimonides, *Hilchoth Neziruth*, v. 1). *ii.* Refrain from cutting the hair off his head during the whole period of his Nazariteship. And, *iii.* Avoid every contact with the dead, even if his parents, or brothers, or sisters were to die during his Nazariteship. If he was accidentally defiled by death suddenly occurring on his premises, he was obliged to observe the legal purification of seven days (comp. Num. xix. 14); cut off his hair on the seventh day—which in this case was not burnt but buried (*Mishna Temura*, vi. 4; and Maimonides, *in loco*); bring on the eighth day two turtle-doves or two young pigeons to the priest—one for a sin-offering and the other for a burnt-offering; hallow his head, offer a lamb of the first year as a trespass-offering, renew his vow, and begin again his Nazariteship, as the days which had passed since the commencement of his vow were lost through this interruption (Num. vi. 1-12). As the Mosaic law says nothing about the formality of the Nazarite vow, and as all other declarations were binding wherever and whenever made (Deut. xxiii. 24), we must accept the ancient Jewish canons that the vow was made in private, and that it was binding even if a man or woman simply said, 'Behold, I am a Nazarite!' (הִרִינִי נִזִּיר), or repeated, 'I also become one,' when hearing any one else make this declaration (*Mishna, Nazir*, i. 3; iii. 1; iv. 1). A father could make a vow for his son before he was thirteen years of age, but not a mother for hers (Num. xxx. 8; *Sota*, iii. 8; *Nazir*, iii. 6). A man had the power to disannul his wife's vow (*Nazir*, iv. 1; Maimonides, *Hilchoth Neziruth*, ii. 17), but not his slave's, and in case he did prohibit him to perform it, he was bound to fulfil it as soon as he was set at liberty (*Nazir*, ix. 1). Men and women who, after taking the Nazarite vow, cut their hair or plucked it off with their hands, or defiled themselves by wilfully coming in contact with dead bodies, or partook of wine, received forty stripes (*Nazir*, iv. 3; Maimonides, *Hilchoth Nazir*, v. 2, 6, 8, 11). So rigid were the regulations, that the Nazarite was not allowed to comb his hair lest some of it might be torn out, but he was permitted to smooth it with his hands (*Nazir*, vi. 3).

3. *Accomplishment of the Nazarite vow, and the offerings connected therewith.*—When the time of his Nazariteship was accomplished, the Nazarite had to present himself before the door of the sanctuary with three sacrifices, corresponding to the three prohibitions of Nazaritism—*i.* A he-lamb of the first year for a burnt-offering; *ii.* a ewe-lamb also of the first year for a sin-offering; and *iii.* a ram for a peace-offering. With the latter 'he had to bring six tenth-deals and two-thirds of a tenth-deal of flour, from which were baked twenty cakes, viz., ten unleavened cakes and ten unleavened wafers. These twenty cakes were anointed with a fourth part of a log of oil, as fixed by a law of Moses from Sinai, and were all brought in one vessel' (Maimonides, *Hilchoth Neziruth*, viii. 1). Besides these extraordinary cakes and wafers, he had to bring the ordinary meat-offering and drink-offering appointed for all sacrifices (comp. Num. xxviii.). These three sacrifices were designed both as an atonement for the sins which the Nazarite unconsciously committed during his Nazariteship and as an expression of thanksgiving to him by

whose grace he had happily fulfilled the time of his vow. After the priest had offered these sacrifices—sin-offering first, burnt-offering second, and peace-offering third (Maimonides, *Hilchoth Nezirut*, viii. 2)—the Nazarite cut off his head-crown (כֹּרֶת נֶזִיר) —i.e., the hair which was his Nazarite pledge—at the door, threw it into the fire under the peace-offering, or, as the ancient Jewish canons have it, under the caldron in which the peace-offering was being boiled (*Mishna, Nazir*, vi. 8). Whereupon 'the priest took the boiled shoulder of the ram, one of the ten unleavened cakes from the basket, and one of the unleavened wafers, laid them on the Nazarite's hand, put his hands under those of the owner, and waved it all before the Lord' (*Mishna, Nazir*, vi. 9). The fat was then salted and burned upon the altar, whilst the breast and the fore-leg were eaten by the priests after the fat was burned; the cake, too, which was waved, and the boiled shoulder, were eaten by the priests, but the remaining bread and the meat were eaten by the owners' (Maimonides, *Hilchoth Maase Ha-Corbanoth*, ix. 9-11). Besides these sacrifices which were ordained, the Nazarite also brought a free-will offering proportioned to his circumstances (Num. vi. 13-21). In the time of the temple there was a Nazarite chamber in the woman's court in the south-east corner, where the Nazarites boiled their peace-offerings, cut off the hair of their heads, and cast it into the fire under the caldron. They were, however, also allowed to cut off their hair in the country. 'But whether the Nazarite cut it in the country or in the sanctuary, he was obliged to have the hair cast under the caldron, and was not allowed to do it before the appointed time for opening the door of the court, as it is written, 'the door of the tent' (Num. vi. 8); which does not mean that he is to cut off his hair *before* or *at* the door, for that would be treating the sanctuary with contempt' (*Mishna, Middoth*, ii. 5; *Nazir*, vi. 8; Maimonides, *Hilchoth Nezirut*, viii. 3). The assertion, therefore, of Dr. Howson (*Life and Epistles of St. Paul*, i. 499), Mr. S. Clark (*Smith's Dictionary of the Bible*, s. v. *Nazarite*), and others, that the vow recorded in Acts xviii. 18 cannot be regarded as a regular Nazarite vow, because it is said that Paul 'shaved his head in Cenchrea,' and because it 'was not cut off at the door of the temple where the sacrifices were offered, as was required by the law of the Nazarite,' is at variance with the practice of the Jews in the days of our Saviour. One could also take upon himself one of the obligations of a Nazarite, and then send his sacrifices through a Nazarite, as may be seen from the following remark: 'He who said, 'Lo, I take upon myself the shaving of a Nazarite,' is bound to bring the offerings of shavings for cleanliness, and may offer them through any Nazarite he pleases. Or if he says, 'I take upon myself half the offerings of a Nazarite,' or 'I take upon myself half the shaving of a Nazarite,' he has only to bring half the sacrifices, and can send them through any Nazarite he likes, and that Nazarite pays those offerings from his own' (Maimonides, *Hilchoth Nezirut*, viii. 18). This circumstance, which evidently arose from the fact that the offerings required from a full Nazarite were beyond the means of the pious poor, and which made it also an act of piety for a rich man to pay the necessary expenses, and thus enable his poorer brethren to complete their vow (Joseph. *Antiq.* xix. 6. 1), explains Acts

xxi. 23, 24, 26, where we find that St. Paul could only take upon himself a part of the vow, then proceed with the poor Nazarites to the temple to offer through them, and thus make them discharge his charges about the sacrifices.

4. *Duration of the Nazarite vow.*—The Mishna says nothing about the duration of the vow, but leaves every one who takes it to fix his own. The administrators of the Mosaic law were obliged to specify a certain number of days as the lowest for Naziriteship, since it not unfrequently happened that some took the vow without mentioning any definite time whatever, whilst others, if they could take it for a few days, would vow too often, and thereby diminish its solemn character. Hence the Jewish canons determined that 'if any one says, I will be a Nazarite, without mentioning expressly how long, he cannot be a Nazarite less than thirty days; and even if he says, I take upon myself to be a Nazarite with an exceedingly great Naziriteship, it is not to be more than thirty days, because he expressed no time. If he mentions less than thirty days, e.g., if he says I am a Nazarite for one day, or ten days, or twenty days, he is nevertheless a Nazarite for thirty days, for there is no Naziriteship for less than thirty days. This is a law transmitted by tradition. But if he mentions a time more than thirty days, e.g., if he says thirty-one days, or forty, or a hundred days, or a hundred years, he must be a Nazarite during the said period, neither less nor more' (Maimonides, *Hilchoth Nezirut*, iii. 1-3; *Mishna, Nazir*, i. 3, iii. 1, vi. 3; Joseph. *Wars*, ii. 15. 1). The ancient expositors connect the fixing of the indefinite vow at thirty days, with the words, 'he shall be holy' (קֹדֶשׁ יִהְיֶה) (Num. vi. 5), by the exegetical rule called *Gematria* (סְתֵם נִזְרוֹת שְׁלֹשִׁים יוֹם שְׁנֵאִמֵּר קֹדֶשׁ יִהְיֶה, יהיה בנזמטריא שלשים) where יהיה (10 + 5 + 10 + 5 = 30) amounts to thirty (comp. *Siphri*, in loco). It will be seen from this that there were some who took the Nazarite vow for life. These are called נִזְרֵי עוֹלָם, *perpetual Nazarites*, in contradistinction to those who took the vow for a limited period, and are therefore called נִזְרֵי יָמִים, *Nazarites for a certain number of days*, or נִזְרֵי זְמַן קָצוֹב, *Nazarites for a short time*. The Bible mentions three *Nazarites for life*—Samson, Samuel, and John the Baptist. Fathers, and mothers with the consent of their husbands, could devote their prospective children to perpetual Naziritism (1 Sam. i. 11, with *Mishna, Nazir*, ix. 5), in which case the mother abstained during her pregnancy from wine and strong drink, and unclean things (Judg. xiii. 4; Luke i. 15). These life-long Nazarites were afterwards divided into two classes, viz., נִזְרֵי עוֹלָם, *ordinary perpetual Nazarites*, and נִזְרֵי שְׂמֹשֶׁן, *Samson-Nazarites*, and the distinction between the two was that the former were allowed to diminish their hair when it became too heavy, if they were willing to bring the three appointed sacrifices, and were obliged to bring a sacrifice in case they became defiled; whilst the latter were not allowed to diminish their hair, however heavy, but were not required to bring a sacrifice in case they became defiled (*Mishna, Nazir*, i. 2), because Samson brought no sacrifice after he was defiled by contact with the jaw-bone of a dead ass (Judg. xv. 16). Of course, any one who wished to become a *Samson-Nazarite* had distinctly to say so (הֲרִינִי כְּשֹׂמֶשֶׁן) when he took the vow.

5. *Origin and import of Nazaritism.*—That Nazaritism existed in the patriarchal age, and that the Mosaic law simply regulated it, and brought it into harmony with the other divine institutions, is evident from the wording of the enactment in Num. vi. 1, etc., and is now generally admitted. Since it was resorted to like prayers by pious people in cases of sickness (Joseph. *Wars*, ii. 15), or when starting on a long journey (*Mishna*, *Nazir*, i. 6), or when wishing for children (*ibid.* ii. 7, ix. 10), as a mode of approaching God, and of conciliating the divine favour, the Mosaic law has made Nazaritism a consecration to the Lord (קִרְשׁ יְהוָה) in the highest sense, and after the loftiest model of priestly piety, as may be seen from the following striking parallels:—*i.* Like the priest, the Nazarite was prohibited taking wine and strong drink, and with this difference, that whilst the former had only to abstain from intoxicating liquors when ministering in the sanctuary, the latter had to abstain during the whole of his Nazariteship from every production of the vine (Lev. x. 8, 9, with Num. vi. 3, 4); *ii.* like the priest, the Nazarite had to avoid defilement from the dead, only with this difference, that whilst an exception was made for the former, in case of his nearest and dearest relations, no exception whatever was tolerated for the latter (Lev. xxi. 1-3, with Num. vi. 6, 12), so that in this respect the Nazarite was even put on an equality with the high-priest himself (Lev. xxi. 11, with Num. vi. 7); and, *iii.*, like the high-priest, who was distinguished by (נֹר הַקִּרְשִׁי) a *holy diadem* (Exod. xxix. 6, xxxix.

30; Lev. viii. 9), the Nazarite had (נֹר אֱלֹהֵי עַל הָרֹאשׁ) the crown of God upon his head (Num. vi. 7), the very term employed for the sacerdotal crown (comp. *Mishna*, *Nazir*, vii. 1; Maimonides, *More Nebuchim*, iii. 48; and especially Abravanel, *Comment. on Num.* vi.)

6. *Literature.*—The most ancient notices of Nazaritism are given in the *Mishna Tract Nazir*; in the important commentary on Numbers and Deuteronomy, called *Siphri*, on Num. vi.—a description of this ancient work is given in the article MIDRASH of this Cyclopædia; by Maimonides, *Iad Ha-Chesaka*, *Hilchoth Nezirut*, vol. iii. p. 34, ff.; Rashi, Rashbam, Ibn Ezra, and Abravanel on Num. vi.; Spencer, *De Legibus Hebræorum*, lib. iii., cap. vi., sec. 1; Michaelis, *Commentaries on the Laws of Moses*, Book iii. sec. 145, vol. ii. p. 284, etc., English translation; Bähr, *Symbolik des Mosaischen Cultus*, vol. i. p. 364, vol. ii. p. 416, ff., 430, ff.; Ewald, *Geschichte des Volkes Israel*, ii. p. 516, ff.; by the same author, *Die Alterthümer des Volkes Israel*, p. 96, ff.; Keil, *Handbuch der biblischen Archæologie*, vol. i. p. 322, 2d ed.; and for the connection of Nazaritism with Essenism, see Graetz, *Geschichte der Juden*, vol. iii., 2d ed., Leipzig 1863, p. 80, ff.—C. D. G.

NEAH (נֶעָה; 'the shaking'; Alex. 'Ἀνωά; omitted in the Vat. Cod.; *Noa*), a town on the eastern border of Zebulun, mentioned only in Josh. xix. 13. It was situated between the valley of Jiphthah-el and Japhia. Japhia has been identified with the modern Yafa, two miles south-west of Nazareth, and Jiphthah-el is Wady Abilfn, ten miles north-west; consequently Neah must be looked for in that district. Its site has not been discovered, and it appears to have been unknown

to Eusebius and Jerome (*Onomast.*, s. v. *Anua*). Three miles north-west of Nazareth is a little village, manifestly an ancient site, called 'Ain. Its position would answer well to Neah, and the names have some radical affinity (נֶעָה; عَيْن).

It is probable that the Arabic 'Ain is just a corruption of the Hebrew Neah, occasioned by the familiarity of the people with the former word.—J. L. P.

NEAPOLIS (Νεάπολις, 'new city'; *Neapolis*), a city of Greece, celebrated as the first place in Europe visited by the Apostle Paul. After traversing Asia Minor in his missionary tour, 'he came down to Troas; and thence, in obedience to a heavenly injunction, he sailed for Macedonia, and Luke thus describes the voyage:—'Loosing from Troas, we came with a straight course to Samothracia, and the next day to Neapolis' (Acts xvi. 11). Samothracia is an island in the northern part of the Archipelago, opposite the coast of Troas. Forty miles west of it is another island called Thasos; and on the north-west of the latter the coast of the mainland recedes, forming a wide and beautiful bay, in the centre of which is a small rocky promontory having a harbour on each side (Purdy, *Sailing Directory*, p. 152); this is the site of *Neapolis*. It is now occupied by a Turkish village called *Kavala*, which gives its name to the bay (Leake, *Travels*, iii. 180). Paul did not remain here, but proceeded at once to Philippi. Along the shore behind Neapolis is a steep ridge, a branch of the Pangæus range. Across this runs an ancient paved road, commencing at the town, and ascending through a defile formed by cliffs close to the beach. After gaining the summit, it descends into a wide and rich plain, in which lie the ruins of Philippi, ten miles from Neapolis. This was the road taken by Paul. From the top of the pass the view is magnificent. Below lie the ruins of the town with its double harbour, and the whole bay is spread out beyond. In front of it is the island of Thasos, with the high top of Samothrace appearing on the horizon on the left; while away in the distance on the south is seen the lofty summit of Mount Athos (Clarke's *Travels*, ch. xiii.) At a later period Paul again visited Neapolis, though the name is not mentioned. After a three months' residence in Greece, Luke informs us, 'We sailed away from Philippi after the days of unleavened bread, and came unto them to Troas in five days' (Acts xx. 6). Philippi was an inland town, but Neapolis was its port, and when Paul sailed from it he was said to have sailed from Philippi; just as one sailing from the Pyæus is said to sail from Athens. His second voyage was a long one, for it took five days to do what had been previously done in two.

The town of Neapolis was within the bounds of the province of Thrace (Pliny, *H. N.*, iv. 18); but the emperor Vespasian attached it to Macedonia (Suetonius, *Vesp.* 8); and hence, while Pliny locates it in Thrace, Ptolemy (iii. 13) and Strabo (vii. 330) assign it to Macedonia. During the great battle of Philippi, the fleet of Brutus and Cassius lay in the bay of Neapolis (Appian, *De Bel. Civil.* iv. 106), which Appian states was nine miles distant from their camp at Philippi; and this statement, taken in conjunction with the indications of the ancient Itineraries (see *Itineraria*, ed. Wessel,

pp. 603, 640, 321), is sufficient to prove the identity of Neapolis and Kavala, notwithstanding the arguments of Cousinéry (*Voyage dans la Macédoine*).

The remains of Neapolis are extensive; the most important being an aqueduct nearly ten miles in length, constructed to bring water from the distant hills. There are also numbers of columns and hewn stones, partly lying among rubbish in the suburbs, and partly built up in the modern houses. Several inscriptions have also been found, and sculptured stones and marble sarcophagi (Clarke's *Travels*, ch. xii.; *Bibliotheca Sacra*, October 1860; Conybeare and Howson, *Life of St. Paul*, i. 309, seq.) The modern town or village is said to contain about 5000 inhabitants.

2. *Neapolis* was the name given during the Roman age to the ancient city of Shechem. The change appears to have taken place during the reign of Vespasian, as upon the coins of that reign we first find the inscription, '*Flavia Neapolis*,' the former title taken from Flavius Vespasian (Eckhel, *Doctr. Numm.*, iii. 433). Josephus generally calls the city Sichem; but he has Neapolis in *Bell. Jud.* iv. 8. 1; and the words of Epiphanius afford sufficient proof of the identity of Sichem and Neapolis—'Ἐν Σικίμοις, τοῦτ' ἔστιν, ἐν τῇ νυνὶ Νεαπόλει (*Adv. Hær.* iii., p. 1055; see Reland, *Pal.*, p. 1004). For a description and history of this city, see SHECHEM.

3. An ancient episcopal city of Arabia, whose bishops were present at the councils of Chalcedon and Constantinople. The writer discovered an inscription at the ruined town of *Suleim*, at the western base of Jebel Hauran, near the ancient Kenath, which shows that Suleim is the episcopal *Neapolis* (Porter's *Damascus*, ii. 85; Reland, *Pal.*, p. 217; S. Paulo, *Geogr. Sac.*, p. 296).—J. L. P.

NEBAIOTH (נְבִיאוֹת; Nabaiōth; *Nabajoth*), the eldest son of Ishmael (Gen. xxv. 13), and the founder of the first of the twelve Ishmaelitic tribes (ver. 16). We are told that the Ishmaelites inhabited the country 'from Havilah to Shur,' which includes the whole peninsula of Arabia lying between the Euphrates and the Persian Gulf on the one side, and the Red Sea on the other (ver. 18; see Kalisch on *Gen.*, pp. 379, 484). In this region, therefore, the descendants of Nebaioth dwelt. They occupied the most distinguished place among their brethren, for when Esau married Mahalath, the daughter of Ishmael, the sacred historian distinguishes her as the sister of Nebaioth (xxviii. 9; xxxvi. 3). At that remote age most of the tribes inhabiting Syria and Arabia were nomad or semi-nomad. Both the climate and soil of Arabia, in which Ishmael and his sons settled, rendered this mode of life necessary. Their chief wealth consisted in flocks and herds. Owing to the total want of rain during the long summer, and the extreme scarcity of water, the herbage dries up, and shepherds must move their flocks to other regions. But while all the great tribes were thus compelled to migrate, it would seem that they possessed strongholds and fortified enclosures in certain favoured spots, where some members of each tribe always remained, and where, probably, they deposited their heavy stores and valuables. This is the case with some of the great Arab tribes at the present day. After enumerating the sons of Ishmael, Moses says, 'These are the sons of

Ishmael, and these their names, *by their towns and by their castles*' (xxv. 16). The word rendered 'towns' (חֲצֵרֵיהֶם) is derived from a root (חָצַר) which signifies 'to enclose,' and is applied usually in the Bible to the towns of a pastoral people, as contradistinguished from those (עִיר, pl. עָרִים) of an agricultural or commercial people. And the 'castles' (טִירוֹת) were 'circular enclosures,' formed by a strong though rude fence, within which tents might be pitched, and flocks kept, in times of danger. It would appear, therefore, that all the Ishmaelite tribes adapted themselves in habits and occupation to the nature of the country in which they settled;—roaming with their flocks and herds over the great pasture-lands of Arabia, and establishing permanent stations wherever practicable (see 1 Chron. v. 10, 19-21). The territory at first occupied by Nebaioth appears to have been on the south-east of Palestine, in and around the mountains of Edom. There Esau met and became allied with them. As their numbers and their flocks increased, they were forced to wander more into the south and east so as to secure pasture; and they were brought into connection with their brethren the children of Kedar, with whom Isaiah associates them (lx. 7). It is somewhat remarkable that this celebrated Arab tribe is so seldom mentioned in the Bible. Three times the name occurs in Genesis, once in the genealogies of Chronicles (i. 29), and once in Isaiah; after his age we hear no more of them in Scripture.

After the close of the O. T. canon, both Jewish and heathen writers frequently mention an Arabian tribe called *Nabatei*, or *Nabatheans* (Ναβαταῖοι), as the most influential and numerous of all the tribes of that country. Josephus says regarding the descendants of Ishmael, 'These inhabited all the country from the Euphrates to the Red Sea, and called it *Nabatenē*' (Ναβατηνή; *Antiq.* i. 13. 4). He regards the Nabatei as descendants of Nebaioth. And Jerome affirms that Nebaioth gave his name to all the region from the Euphrates to the Red Sea (*Comm. in Gen.* xxv. 13). But the identity of the *Nabatheans* or *Nabatei*, and the descendants of Nebaioth, has recently been called in question chiefly by Quatremère (*Mémoire sur les Nabatéens*), and Professor Chwolson of St. Petersburg (*Die Ssabier*). These celebrated Oriental scholars have prosecuted their researches among the remains of very early Arabian and Babylonian literature. They have proved the existence of a tribe called *Nabat* (نَبَط), inhabiting in ancient times the country between the Tigris and Euphrates, and afterwards scattered through the Arabian peninsula; they infer, from fragments of their literature and statements of Arab authors, that they were Arameans, and not Ishmaelites. To some of their treatises Professor Chwolson assigns a very high antiquity, dating them as far back as 2400 B.C.; but other eminent scholars consider them to be not earlier than the first century of our era. In fact, little importance can be attached to Chwolson's dates and theories (see, however, *Ueber die Ueberreste der Alt-Babylonischen Literatur*, 1859). It is doubtless true that a tribe called Nabat existed at a comparatively early period in Mesopotamia; but may they not have been a branch of the family of Nebaioth? May they not have migrated thither, as sections of the great tribes of Arabia are wont to do now—for

instance, the *Shummar*, whose home is Jebel Shummar, in Central Arabia, where they have villages and settlements; but large sections of the tribe have long been naturalised among the rich pastures of Mesopotamia. In fact, there are few of the great Arabian tribes which do not pay periodical visits to the banks of the Euphrates and Tigris, and which have not branches established there. So it probably was with the tribe of Nebaioth. They visited Mesopotamia, attracted by the water and pasture; then some of them settled there; then from close intercourse with the learned Chaldeans, they may have acquired a taste for their literature, and may have in part adopted their language and their habits of life; and at length when driven out of Central Asia by the rising power of the Assyrians, Medes, and Persians, they carried these back among their brethren in Arabia. Such, at least, is a probable solution of a difficult question. There can be no doubt that the descendants of Nebaioth settled originally in and around Edom; that in the time of Isaiah they were an influential tribe living in Western Arabia beside the children of Kedar; that the *Nabatheans* occupied the same region in the time of the Maccabees (1 Maccab. v. 24, *seq.*, *cir.* B.C. 161; cf. 1 Maccab. ix. 33-37; Joseph. *Antiq.* xii. 8. 3); and that Josephus considered these Nabatheans to be the descendants of Ishmael. From these facts it may be fairly inferred that the *Nabatheans* of the classic authors, the tribe *Nebaioth* of the sacred authors, and the *Beni Nabat* of the Arabs, were identical (Forster, *Geogr. of Arabia*, i. 209, *seq.*; Kalisch *on Gen.*, p. 481; Jerome, *Comment. en Isaiam*, cap. lx. 7).

It would appear that the descendants of Esau, having at first sought an alliance with the Ishmaelites among the mountains of Edom, afterwards succeeded in forcing them to leave their strongholds and migrate to the deserts of Arabia. After a long interval the Ishmaelites returned, and, having expelled the Edomites (or *Idumeans*), took possession of their ancient country. The date of this conquest is unknown; but it was probably about the time of the second captivity; for then the Persians were all-powerful in Central Asia, and would naturally drive back the Arab tribes that had settled there (cf. Diodor. Sic., ii. 48); and then also we know that the Idumeans, as if driven from their own mountains, settled in Southern Palestine. But be this as it may, we learn that, about B.C. 312, Antigonos, one of the successors of Alexander the Great, sent an army against the Nabatheans of Petra; the city was taken and plundered, in the absence of the men, who were at the time attending a great fair in another locality; on the retreat of the army, however, with their booty, they were attacked and cut to pieces by the Nabatheans. Another expedition was sent, but was unsuccessful (Diod. Sic., xix. 104-110). At this period the Nabatheans, like their forefathers, were rich in flocks and herds; they were also, like the Ishmaelites in the time of Jacob, the carriers of spices and merchandise between Arabia and Egypt; and for the protection of their wealth and the furtherance of their commerce, they had erected strong cities in the interior of their country Edom, and on the shores of the *Ælanitic Gulf*. Idumea Proper, or Edom, now became the centre of their influence and power. They gradually advanced in civilisation

and commercial enterprise until nearly the whole traffic of Western Asia was in their hands (Diod. ii. 48-50; iii. 42, 43). From their capital, Petra, caravan roads radiated in all directions—eastward to the Persian Gulf and Mesopotamia; northward to Perœa, Damascus, and Palmyra; westward to Palestine and Phœnicia; and southward to the seaports on the *Ælanitic Gulf* and Red Sea, and to Egypt (see *Tabula Peutingeriana*; *Tab. Theodosiana*; Strabo, xvi., pp. 778-780; Forster, *Geogr. of Arabia*, i. 222). When a new route for commerce between the East and the West was opened through Egypt, the Nabatheans became its determined opponents. They built war galleys and plundered the merchant fleets in the Red Sea; and they also attacked and pillaged such caravans as ventured to convey the spices of Arabia, and the merchandise of Persia and Syria, by any other way than their own (Diod. Sic., iii. 43; Strabo, xvi., p. 777; Arrian, *Periplus*).

During the height of their power the country of the Nabatheans embraced the whole of Edom, the eastern shore of the *Ælanitic Gulf* and the Red Sea to the parallel of the city of Medineh, the desert plain of Arabia to the mountains of Nejd; while on the north-west and north it was bounded by Palestine and Bashan (Strabo, xvi. 767, 777, 779; 1 Maccab. v. 25-28; ix. 35; Diod. Sic., ii. 48; Epiphan., *adv. Hæres.*, p. 142). It is true Josephus and Jerome state that the Nabatheans occupied the whole country between Egypt and the Euphrates; but by Nabatheans they seem to have meant all the descendants of Ishmael (cf. Reland, *Pal.*, p. 90; Kalisch *on Gen.*, p. 482). It is not known at what time the Nabatheans gave up the patriarchal form of government and elected a king. The first mention of a king is about B.C. 166, in the reign of Antiochus Epiphanes (2 Maccab. v. 8). All their kings appear to have been called either *Aretas* or *Obodas*, and the kingdom was known among classic writers as the 'Kingdom of Arabia,' sometimes taking the addition *Petræa*, apparently from the capital city Petra. Alexander Jannæus was defeated by Obodas, king of Arabia (Joseph. *Antiq.* xiii. 13. 5); and a few years later Antiochus Dionysius of Syria was killed in battle against the Arabians, and *Aretas* their king seized Damascus (xiii. 15. 1, 2; *Bell. Jud.* iv. 7, 8). The kings of Arabia are often mentioned in connection with the conquest and occupation of the province of Syria by the Romans (Joseph. *Antiq.* xiv. 5. 1; xv. 6. 2; xvi. 7. 8). A few years before the Christian era a Roman expedition under the command of *Ælius Gallus*, was sent into Arabia. The Nabathean king, Obodas, received him with professions of friendship, and appointed his minister *Syllæus* to guide the army. By his treachery it was conducted through arid deserts until it was almost destroyed by thirst and disease (Strabo, xvi., p. 780). Herod Antipas married a daughter of Aretas king of the Nabatheans (Matt. xiv. 3, 4); and it appears to have been the same Aretas who captured Damascus, and governed it by an ethnarch at the time of Paul's conversion (Acts ix. 25; 2 Cor. xi. 32). The kingdom of the Nabatheans was overthrown in A.D. 105 by Cornelius Palma, governor of Syria, and was annexed to the Roman empire (Dio. Cass., 68. 14; Eutrop. viii. 2. 9). Their commercial enterprise and wealth soon afterwards began to decline; and when the fierce followers of

Mohammed overran Western Asia, the cities of the Nabatheans were ruined, their country laid waste, and the remnant of the people in all probability resumed the nomad life of their ancestors, and were mixed up with the tribes of the desert (IDUMEA; PETRA; ARETAS; see Vincent's *Commerce and Navigation of the Ancients*, ii. 272, seq.; Ritter, *Pal. und Syr.*, i. 68-82; Robinson, *B. R.*, ii. 158-166; Ritter, *Gesch. des Petr. Arab.*; Quatremère, *Memoire sur les Nabat.*)

The splendid rock temples and tombs of Petra, which have now for half a century attracted the attention and called forth the admiration of Eastern travellers, were the works of the Nabatheans; and show that they surpassed all other Arab tribes in refinement as much as they did in commercial enterprise (Burckhardt's *Travels in Syria*, pref. vii., seq., pp. 421-434; Laborde, *Mt. Sinai and Petra*, pp. 150-217; Bartlett, *Forty Days in the Desert*, pp. 107-145; *Handbook for Syria and Palestine*, pp. 43-58).

For the later history and physical geography of the region once occupied by the Nabatheans, see the article IDUMEA; and for fuller details, the authorities mentioned above.—J. L. P.

NEBALLAT (נְבָלָט, perhaps=נְבֹלָט, 'folly in secret'; omitted in LXX.; *Neballat*), a town occupied by the Benjamites after the captivity, mentioned only in Neh. xi. 34. It is grouped with Lod, the Lydda of the N. T., and was consequently situated in the plain of Sharon. No subsequent writer, sacred or classical, refers to the place; but about four miles north-east of Lydda is a village with some few traces of antiquity in and around it, called *Beit Nebâla* (بيت نبالا, 'the house of Nebâla'), which, as Dr. Robinson has suggested, may be identified with the ancient Neballat (*B. R.*, ii. 232; Van de Velde, *Memoir*, p. 336).—J. L. P.

NEBO (נְבוֹ; Sept. Ναβῶ), a Chaldean and Assyrian idol mentioned in Is. xlvi. 1, and Jer. xlviii. 1, and supposed to preside over learning and eloquence; hence described as the 'far-hearing,' and 'he who instructs.' He corresponds with the Latin Mercury, the Greek Hermes, and the Thoth of the Egyptians. He was likewise worshipped by the Sabians in Arabia (Norberg, *Onomast.* p. 95). Gesenius traces the name in נְבִיא, *prophet*, an interpreter of the divine will. The divine worship paid to this idol by the Chaldeans and Assyrians is attested by many compound proper names of which it forms part, as *Nebuchadnezzar*, *Nebuzardan*, *Nebuhashban*; besides others mentioned in classical writers,—*Nabonedus*, *Nabonassar*, *Naburianus*, *Nabonabus*, *Nabopolassar*. (See Gesenius and Henderson on Is. xlvi. 1, and Sir H. Rawlinson in Rawlinson's *Herodotus*, i. 637-640.)—J. K.

NEBO, MOUNT (הַר־נְבוֹ; ὄρος Ναβῶ; *Mons Nebo*). This celebrated mountain is mentioned only three times in Scripture, and as each is topographically important it may be well to cite the passages. In the general itinerary given in Num. xxxiii. 47, it is said, 'They removed from Almondibalthaim, and pitched in the mountains of Abarim, before Nebo' (לְפָנֵי נְבוֹ, 'in the face of Nebo'). It is not quite clear from this passage whether the writer means the mountain or the town of Nebo;

but a comparison with Deut. xxxii. 49 shows that it is most probably the former. In this passage is recorded the divine command to Moses, 'Get thee

up into this mountain Abarim, Mount Nebo (הַר־נְבוֹ, (הַעֲבְרִים הַזֶּה הַר־נְבוֹ), which is in the land of

Moab, which is over against Jericho' (עַל־פְּנֵי יִרְחֹ). Three points are here established—1. Abarim was the name of a range or group of hills, of which Nebo was a peak; 2. Nebo was in the land of Moab, and consequently east of the Jordan; 3. The peak was opposite to and in view of (such is the obvious meaning of the Hebrew

עַל־פְּנֵי as here used) Jericho. The next passage is Deut. xxxiv. 1, 'And Moses went up from the plains of Moab unto the mountain of Nebo, to the top of Pisgah, that is over against Jericho.' It is not quite certain whether *Pisgah* is here a proper name, or, as rendered in the margin and in some of the later Targums, 'hill' or 'peak'—'Moses went up to the mountain of Nebo, the top of the hill' (רֹאשׁ הַהַר הַזֶּה). If it be a proper name, then it seems to have been equivalent to Abarim, and to have denoted a range or group, of which Nebo was one summit (PISGAH).

It is evident from these notices that Mount Nebo commanded a wide view over Palestine, both east and west of the Jordan. Josephus, speaking of the death of Moses, says of Abarim, 'It is a very high mountain, situated over against Jericho (ἵερὸς ὄρος ἀντικρὺς), and one that affords to such as are upon it a prospect of the greatest part of the excellent land of Canaan' (*Antiq.* iv. 8. 48). Eusebius says that Nebo is a mountain 'over the Jordan opposite (ἀπέναντι) Jericho in Moab . . . and until this day it is shown in the sixth mile west of Heshbon' (*Onomast.*, s. v. *Naban*). In another place he locates it between Heshbon and Livias (s. v. *Abarim*), and states that the mountains are still called Abarim, and are near Mount Phogor. Livias lay in the plain on the east bank of the Jordan, and the site of Heshbon is well known. According to Eusebius and Jerome, therefore, Mount Nebo must be some peak on the brow of the mountain range, near the place where Wady Heshbon breaks down from the lofty plateau of Moab; and this agrees with the statements of the sacred writer. There is not in that region any very prominent peak which the eye of an observer could identify as Nebo. On the south bank of Wady Heshbân, and about seven miles west of the ruins of the town, the writer noticed some projecting points of the range—not perhaps higher than others near them, but shooting out further westward so as to command the Jordan valley and western Palestine more than the others. Some one of these may have been the Nebo on which the lawgiver died, though it is now impossible to identify the exact spot. There is no evidence that Nebo was the highest peak of the range; and travellers and geographers searching for such a peak have been misled as to the true locality. Thus Burckhardt, when on his way from Heshbon to Kerak, in passing Jebel Attarus says, 'this is the highest point in the neighbourhood and seems to be the mount Nebo of Scripture' (*Travels in Syria*, p. 370; cf. Seetzen, *Reise*, i. 408; Irby and Mangles, p. 464). But Attarus is not opposite Jericho, nor is it visible from it. It lies much too far south to be identified with Nebo. Even Robinson was not

altogether free from this wrong impression of the altitude and isolation of Nebo, for he remarks, 'During the whole time we were on the coast of the Dead Sea, on the Jordan, and in or near the plains of Jericho, we were much interested in looking out among the eastern mountains for Mount Nebo. . . But our search was in vain; for although we passed in such a direction as to see the mountains over against Jericho from every quarter, yet there seems to be none standing so out from the rest, or so marked, as to be recognised as the Nebo of Scriptures' (*B. R.*, i. 569; so also Stanley, *S. and P.*, p. 294). In fact there are only two conspicuous peaks in the mountain range east of the Jordan—*Attarus*, and *Jildad* near es-Salt—and neither of these can be Nebo; the former is too far south, the latter too far north.

The name Nebo Gesenius derives from the root נבא, 'to project'; and hence נבו would signify 'a projection.' This would seem to favour the identity of one of these projecting bluffs south of Wady Heshbân (*Thesaurus*, p. 841). Others trace the name to the heathen deity *Nebo*, and suppose that there was an ancient high place on the peak where that deity was worshipped (Stanley, p. 294). Of this there is no proof. (For fuller information, see Ritter, *Pal. und Syr.*, ii. 1176, *seq.*, 1186, *seq.*; *Handbook*, 299; Drew, *Scripture Lands*, p. 96; Reland, *Pal.*, pp. 342, 496).—J. L. P.

NEBO (נבו; Naḅaû, *Nabo*), a city of the Gadites east of the Jordan, grouped with Heshbon, Elealah, and Baal-meon (Num. xxxii. 3, 38), and therefore situated on the Mishor, or plateau of Moab. The other three towns have been identified; they lie within a few miles of each other at the head of Wady Heshbân; and it may be inferred that Nebo was not far distant. Some three or four miles west of Heshbon, on the southern brow of the wady, are traces of ancient ruins, which may perhaps mark the site of this old city, though the name appears to be lost. Nebo was rebuilt by the Gadites; but it would seem from 1 Chron. v. 8 that both it and Baal-meon were inhabited by a Reubenite family; or perhaps that family held the country up to the borders of Nebo and Baal-meon. At a later period it was captured by the Moabites, and the prophet Isaiah joins it with Dibon and Medeba, in the curse pronounced upon that land (xv. 2). Jeremiah likewise predicts its destruction as one of the cities of Moab (xlviii. 1, 22). Eusebius and Jerome mention this city, and locate it eight miles south of Heshbon; stating that in their day it was deserted though still retaining its old name (*Onomast.*, s. v. *Nabo*). They confound it, however, with Kenath, a city of Argob in Bashan, which was captured by Nobah the Manassite, and called *Nobah*. That city, as has been shown (KENATH), was situated in the mountains near the eastern boundary of Bashan. There was no connection whatever between Nobah the Manassite, and Nebo a city of Moab. It does not appear from the sacred writers whether the mountain and city of Nebo were near each other; according to Eusebius they must have been some ten miles apart, for he places the former six miles *west*, and the latter eight miles *south* of Heshbon. Moses joins Nebo and Baal-meon, and Isaiah joins Nebo and Medeba (Deut. xxxii. 38; Is. xv. 2). Now Baal-meon is two miles south, and Medeba four miles south-east of Heshbon; it may therefore be

concluded that Nebo was in the same locality, and thus not far distant from the mountain of the same name.

2. In Ezra ii. 29, in the list of those who returned from the captivity in Babylon, we read, '*The children of Nebo*, fifty and two.' That Nebo was a town and not a man, is evident from the context; and it would seem that the town was situated in the tribe of Benjamin; as before it are Ramah, Gaba, Michmas, Bethel, and Ai, and after it Lod and Ono—all of which were towns of Benjamin. With the exception of the similar lists in chap. x. 43, and Neh. vii. 33, the name does not occur elsewhere. Nebo may have been an obscure village of Benjamin; or it may have risen to importance before the captivity; or some colony of Benjamites may have crossed the Jordan at an early period and settled in Nebo of Moab, and on their return from Babylon may have called their new residence by the name of the town they had occupied. Be this as it may, there is now a small village called *Beit Nâbah* in the plain of Sharon, at the foot of the hills of Benjamin, a few miles west of Beth-horon, which is doubtless identical with the Nebo of Ezra. This appears to be the place referred to by Jerome as *Nobe* or *Anob* (*Epist. ad Eustoch.*, *Opera*, i. 690, ed. Migne; *Onomast.*, s. v. *Anob*). But it became celebrated in the time of the Crusades as the site of *Castellum Arnaldi*, built by the Patriarch of Jerusalem to defend the road to the holy city (Will. Tyr. xiv. 8). It was afterwards visited by Richard of England in A. D. 1192 (Robinson, *B. R.*, ii. 254; *Handbook*, p. 286). Though this village was twice seen by Dr. Robinson, and recognised as the *Nobe* of Jerome and the crusades, yet he does not appear to have identified it with the Nebo of Benjamin.—J. L. P.

NEBUCHADNEZZAR (נְבוֹכַדְנֶצַּר), Kings, Chronicles, and Daniel; Jer. xxvii.; xxviii.; xxxiv. 1; xxxix. 1; Ezek. xxvi. 7; and Ezra v. 12; written also נְבוֹכַדְנֶצַּר, NEBUCHADREZZAR, generally in Jeremiah, and in Ezek. xxx. 18) was the name of the Chaldean monarch of Babylon by whom Judah was conquered, and the Jews led into their seventy years' captivity. In the Septuagint version he is called Ναβουχοδονόσορ; by Berosus (ap. Josephum), Ναβουχοδονόσορος; by Abydenus (ap. Eusebium, *Præp. Evang.*), Ναβο-δρόσορος; and by Strabo, the only writer among the Greeks by whom he is named (xv. 687), Ναβο-κοδρόσορος. This name, Nabuchodonosor, has passed from the Septuagint into the Latin Vulgate, and into the authorised English version of the books of Judith and Tobit. The name Nebuchadnezzar has been commonly explained to signify the *treasure of Nebo*, but according to Lorschbach (*Archiv. f. Morgenl. Literatur*), it signifies *Nebo, the prince of gods*; Pers. نبوخذ نصر; see also Norberg's *Onomasticon Cod. Nasar.*, p. 95, *seq.*, and Gesenius in *Isai.* iv. 344, 366. [According to the native orthography, the name is *Nabukd-ariutzur*, and is said to mean *Nebo is the protector against misfortune*. In the *Behistun Inscr.*, it appears in Pers. as *Nabukudrachara*, which is nearer the original than any of the Greek forms.]

The only notices which we have of this monarch in the canonical writings are found in the books of

Kings, Chronicles, Daniel, and Ezra, and in the allusions of the prophets Jeremiah and Ezekiel.

From 2 Kings xxiii. 29, and 2 Chron. xxxv. 20, we gather that in the reign of Josiah (B.C. 610), Pharaoh-Necho, king of Egypt, having approached by sea the coast of Syria, made a friendly application to King Josiah to be allowed a passage through his territories to the dominions of the Assyrian monarch, with whom he was then at war. 'I come not against thee this day, but against the house wherewith I have war; for God (Elohim) commanded me to make haste,' etc. (2 Chron. xxxv. 20, 21). The design of Pharaoh-Necho was to seize upon Carchemish (Circesium or Cercusium), a strong post on the Euphrates; but Josiah, who was tributary to the Babylonian monarch, opposed his progress at Megiddo, where he was defeated and mortally wounded [JOSIAH]. Necho marched upon Jerusalem, when the Jews became tributary to the king of Egypt. Upon this, Nebuchadnezzar, king of Babylon (2 Kings xxiv. 1; 2 Chron. xxxvi. 6, where this monarch's name is for the first time introduced), invaded Judah, retook Carchemish, with the territory which had been wrested from him by Necho, seized upon Jehoiakim, the vassal of Pharaoh-Necho, and reduced him to submission (B.C. 607). This invasion took place, according to Jer. xxvi. 1, xlv. 1, in the fourth year of Jehoiachin, but according to Daniel i. 12, in the third. In order to reconcile this apparent contradiction, it has been generally maintained that the first year of Nebuchadnezzar fell partly in the third and partly in the fourth year of Jehoiakim [CAPTIVITIES; DANIEL]. Jehoiachin was at first loaded with chains, in order to be led captive to Babylon, but was eventually restored by Nebuchadnezzar to his throne, on condition of paying an annual tribute. Nebuchadnezzar carried off part of the ornaments of the Temple, together with several hostages of distinguished rank, among whom were the youths Daniel and his three friends Hananiah, Azariah, and Mishael (Dan. i.). These were educated at court in the language and sciences of the Chaldeans, where they subsequently filled offices of distinction. The sacred vessels were transferred by Nebuchadnezzar to his temple at Babylon (Is. xxxix.; 2 Chron. xxxvi. 6, 7); [BABYLON].

After the conquest of Judea, Nebuchadnezzar turned his attention towards the Egyptians, whom he drove out of Syria, taking possession of all the land between the Euphrates and the *river* (2 Kings xxiv. 7); which some suppose to mean the Nile, but others a small river in the desert, which was reckoned the boundary between Palestine and Egypt (Prideaux's *Connection*).

The fate of Jerusalem was now rapidly approaching its consummation. After three years of fidelity, Jehoiachin renounced his allegiance to Babylon, and renewed his alliance with Necho, when Nebuchadnezzar sent incursions of Ammonites, Moabites and Syrians, together with Chaldeans, to harass him. At length, in the eleventh year of his reign, he was made prisoner, and slain (Jer. xxii.) [JEHOIAKIM]. He was succeeded by his son Jehoiachin, who, after three months' reign, surrendered himself with his family to Nebuchadnezzar, who had come in person to besiege Jerusalem, in the eighth year of his reign (2 Kings xxiv. 10-12) [JEHOIACHIN]. Upon this occasion all the most distinguished inhabitants, including the artificers, were led captive [CAPTIVITIES].

Among the captives, who amounted to no less than 50,000, were Ezekiel (Ezek. i. 1) and Mordecai [ESTHER]. The golden vessels of Solomon were now removed, with the royal treasures, and Mattaniah, the brother of Jehoiachin, placed on the throne by Nebuchadnezzar, who gave him the name of Zedekiah, and bound him by an oath not to enter into an alliance with Egypt. Zedekiah, however, in the ninth year of his reign, formed an alliance with Pharaoh-Hophra, the successor of Necho. Hophra, coming to the assistance of Zedekiah, was driven back into Egypt by Nebuchadnezzar, who finally captured Jerusalem in the eleventh year of Zedekiah's reign (B.C. 588) [ZEDEKIAH]. The Temple, and the whole city, with its towers and walls, were all razed to the ground by Nebuzaradan, Nebuchadnezzar's lieutenant, and the principal remaining inhabitants put to death by Nebuchadnezzar at Riblah. Jeremiah was, however, spared, and Gedaliah appointed governor. He was shortly after murdered by Ishmael, a member of the royal family, who was himself soon obliged to take refuge among the Ammonites. Many of the remaining Jews fled into Egypt, accompanied by Jeremiah; those who remained were soon after expatriated by Nebuchadnezzar, who depopulated the whole country.

He next undertook the siege of Tyre [TYRE], and after its destruction proceeded to Egypt, now distracted by internal commotions, and devastated or made himself master of the whole country from Migdol to Syene (according to the reading of the LXX., Ezek. xxix. 10; xxx. 6), transferring many of the inhabitants to the territory beyond the Euphrates.

We have referred to the captivity of the prophet Daniel, and have to turn to the book which bears his name for the history of this prophet, who, from an exile, was destined to become the great protector of his nation. In the second year of the reign of Nebuchadnezzar, Daniel, who was found superior in wisdom to the Chaldean magi, was enabled not only to interpret, but to reveal a dream of Nebuchadnezzar's, the very subject of which that monarch had forgotten [DREAMS]. This was the dream of the statue consisting of four different metals, which Daniel interpreted of four successive monarchies, the last of which was to be the reign of the Messiah. Daniel was elevated to be first minister of state, and his three friends were made governors of provinces. The history of these events (Dan. ii. 4, 8, 9) is written in the Chaldee language, together with the narrative which immediately follows (ch. iii.), of the golden statue erected by Nebuchadnezzar in the plain of Dura, for refusing to worship which, Daniel's three friends were thrown into a furnace, but miraculously preserved. The fourth chapter, also written in Chaldee, contains the singular history of the judgment inflicted on Nebuchadnezzar as a punishment for his pride, and which is narrated in the form of a royal proclamation from the monarch himself, giving an account to his people of his affliction and recovery. This affliction had been, by the monarch's account, predicted by Daniel a year before, in the interpretation of his fearful dream of the tree in the midst of the earth. While walking in his palace, and admiring his magnificent works, he uttered, in the plenitude of his pride, the remarkable words recorded in ver. 30, 'Is not this great Babylon that I have built for the house of the kingdom, by the

might of my power, and for the honour of my majesty?' He had scarce uttered the words, when a voice from heaven proclaimed to him that his kingdom was departed from him; that he should be for seven *times* (generally supposed to mean years, although some reduce the period to fourteen months; Jahn, *Introd.*) driven from the habitations of men to dwell among the beasts of the field, and made to eat grass as an ox, until he learned 'that the Most High ruleth in the kingdom of men, and giveth it to whomsoever he will.' The sentence was immediately fulfilled, and Nebuchadnezzar continued in this melancholy state during the predicted period, at the end of which he was restored to the use of his understanding (ver. 36). We have no account in Scripture of any of the actions of this monarch's life after the period of his recovery, but the first year of the reign of his successor Evil-merodach is represented as having taken place in the thirty-seventh year of Jehoiachin, answering to B.C. 562 (2 Kings xxv. 27).

We have now to consider the light which profane history has thrown on the events of these times.

The canon of Ptolemy the mathematician, who flourished about the commencement of the Christian era, consists of a catalogue, arranged in chronological order, of the kings of Babylon, commencing with Nabonassar, who reigned B.C. 747, and ending with Nabonned, B.C. 556. According to this catalogue, Nabopolassar (*Ναβονπολσάρης*), who died B.C. 625, was succeeded by Nabocolassar (*Ναβocolσάρης*), B.C. 605. This Nabocolassar is therefore presumed to be the Nebuchadnezzar of Scripture (for the canon of Ptolemy, see *Table Chronologique des Règnes*, etc., par l'Abbé Halmy, Paris 1819). Nabopolassar, the father of Nabocolassar, is supposed to have been the first Chaldean monarch of Babylon, and to have disunited it from the Assyrian empire, of which it had hitherto formed a part (Jahn's *Hebrew Commonwealth*). According to a fragment of Alexander Polyhistor, reported by Syncellus in his *Chronographia*, it was this sovereign who destroyed the city of Nineveh, B.C. 612, which, according to Eusebius (*Chron.*, p. 46), he effected in conjunction with Astyages, the eldest son of Cyaxares, king of the Medes (see also Tobit xiv. 15, where the latter is named Assuerus). The following extract, preserved by Josephus, from the lost Chaldean history of Berosus, priest of the temple of Bel (B.C. 268), will be found to throw considerable light on the Scripture narrative: 'When his father Nabuchodonosor heard that the governor whom he had set over Egypt and the places about Coele-Syria and Phœnicia, had revolted from him, while he was not himself able any longer to undergo hardships, he committed to his son Nabuchodonosor, who was still but a youth, some parts of his army, and sent them against them. So when Nabuchodonosor had given him battle, and fought with the rebel, he overcame him, and reduced the country from under his subjection and made it a branch of his own kingdom. But about that time it happened that his father Nabuchodonosor fell ill, and ended his life in the city of Babylon, when he had reigned twenty-one years; and when he was made sensible that his father Nabuchodonosor was dead—having settled the affairs of Egypt and the other countries, and also those that concerned the captive Jews, and the Phœnicians, Syrians, and

Egyptians, and having committed the conveyance of them to Babylon to certain of his friends—he hastily crossed the desert, with a few companions, into Babylon. So he took upon him the management of public affairs, and of the kingdom which had been kept for him by one of the chief Chaldeans, and he received the entire dominions of his father, and appointed, that when the captives came, they should be placed in colonies in the most proper places of Babylonia' (*Antiq. x. 11. 1*).

It will be observed that both Nebuchadnezzar (styled by some *the Great*) and his father are here equally named Nabuchodonosor, but, in the citation of the same narrative from Berosus by Josephus (*Cont. Apion.*, i. 19), the father of Nebuchadnezzar is called Nabolassar (*Ναβολσάρης*), corresponding nearly with the Nabopolassar of Ptolemy: which has induced some to suppose the name Nabuchodonosor in the former citation to be an error of transcription. Some foundation has thus been afforded for considering Nebuchadnezzar as a general name for Babylonian sovereigns (Prideaux, *Connect.*); this, however, is considered by Whiston as a groundless mistake (Whiston's *Josephus*, note on chap. xi.) It is by no means improbable that the similarity of the two names may have led to their being sometimes confounded. The conqueror of Nineveh is also called by the name of Nabuchodonosor in Tobit xiv. 15 (in the Greek, for the Latin ends with ver. 14), and is on this account styled by some, *Nebuchadnezzar the First*, a designation first applied to him by Rabbi David Gans, under the age of the world, 3285. Alber considers (*Inst. Herm. V. T.*, vol. ii. chap. xv.) that the Nabuchodonosor of Judith was not one of the legitimate sovereigns who flourished before the Persian domination, but that both he and Arphaxad were governors of provinces, who had rebelled against the Persians, and assumed those names, and that the pretended Nebuchadnezzar, or *Nebuchadnezzar the Third*, was reduced to order upon the failure of his expedition under Holofernes. By this rather hazardous conjecture, whereby he further maintains, in contradiction to Bellarmine (*De Verb. Dei*), that the book of Judith refers to a period posterior to the exile, he endeavours to prove that the history of Judith is historically true, in opposition to Jahn, who regards it as a fiction [JUDITH].

According to Ptolemy's canon, the reign of Nabocolassar is made to commence two years later than that of the Nebuchadnezzar of Scripture. Many attempts have been made to reconcile this discrepancy, but the solution generally received assumes that the first capture of Jerusalem (Dan. i. 1) took place during the last years of the reign of Nabopolassar, in the expedition mentioned by Berosus (*ut supra*), and that the canon of Ptolemy dates the commencement of his reign from the death of his father, when he became sole king of Babylon (De Wette's *Introd.*, sec. 253, note).

Although Herodotus does not name Nebuchadnezzar, he is supposed by some to allude to the expedition of Pharaoh-Necho against Babylon, when he observes that 'Necho, after an engagement at Magdolos in Egypt, took Kadytis, a great city of Syria.' It is conjectured that he may have confounded Migdol, in Egypt, with Megiddo, and that Kadytis was the same with Jerusalem (El Kaddosh, 'the holy city'). (Jahn's *Hebrew Commonwealth*.) [All authorities, however, agree with

the Bible in making Nebuchadnezzar's reign extend to forty-three years; comp. Berosus ap. Joseph. *cont. Ap.* i. 20; Polyhistor ap. Euseb. *Chron.* i. 53; Ptol. *Mag. Syntax.*, v. 14; 2 Kings xxiv. 12; xxv. 7; Jer. lii. 31). The latest date found on any of the clay tablets belonging to the reign of Nebuchadnezzar is the forty-second year of his reign, which falls in with the supposition that his reign terminated soon after (Rawlinson, *Bampton Lecture*, p. 161).]

We learn from a continuation of the extract from Berosus already cited, that Nebuchadnezzar almost rebuilt the city of Babylon with the spoils of his expedition, and magnificently adorned the temple of Bel, together with other temples, and built a splendid palace, which he beautified with wooded terraces, and those hanging gardens which were considered one of the wonders of the world [BABYLON]. To him are also attributed those stupendous canals described by Herodotus, who himself visited Babylon about B.C. 430, and whose descriptions are fully corroborated by the statements of Philostratus, Quintus Curtius, Arrian, and Didorus Siculus, by none of whom, however, is this monarch mentioned. Josephus adds, that Magasthenes, in his fourth book, refers to the same subject, and thereby endeavours to show that he exceeded Hercules, and conquered a great part of Africa and Spain. Strabo adds, that 'Sesostris, king of Egypt, and Tearcon, king of Ethiopia, extended their expedition as far as Europe, but that Navokodrosor, who is venerated by the Chaldeans more than Hercules by the Greeks . . . . marched through Spain to Greece and Pontus.' According to the canon of Ptolemy (with which Josephus agrees, *c. Apion.* i. 20), Nebuchadnezzar reigned forty-three years, when he was succeeded by Ilouaroudamos, the Evil-Merodach of Scripture.

The difficulties attending the nature of the disease and recovery of Nebuchadnezzar have not escaped the notice of commentators in ancient as well as modern times. The impression made by them on the acute mind of Origen, led him to conclude that the account of Nebuchadnezzar's metamorphosis was merely a representation of the fall of Lucifer. Besides this, which is not likely to meet with many supporters, there have been no less than five different opinions in reference to this subject. Bodin (in *Demonol.*) maintains that Nebuchadnezzar underwent an actual metamorphosis of soul and body, a similar instance of which is given by Cluvier (*Append. ad Epitom. Hist.*) on the testimony of an eye-witness. Tertullian (*De Penit.*) confines the transformation to the body only, but without loss of reason, of which kind of metamorphosis St. Augustine (*De Civ. Dei*, xviii. 18) reports some instances said to have taken place in Italy, to which he himself attaches little credit; but Gaspard Peucer asserts that the transformation of men into wolves was very common in Livonia. Some Jewish Rabbins have asserted that the soul of Nebuchadnezzar, by a real transmigration, changed places with that of an ox (Medina, *De rectâ in Deum fid.*); while others have supposed not a real, but an apparent or docetic change, of which there is a case recorded in the life of St. Macarius, the parents of a young woman having been persuaded that their daughter had been transformed into a mare. The most generally received opinion, however, is, that Nebuchadnezzar laboured under that species of hypochondriacal monomania

which leads the patient to fancy himself changed into an animal or other substance, the habits of which he adopts. Jerome probably leaned to this opinion (in *Dan.* iv. 4). To this disease of the imagination physicians have given the name of Lycanthropy, Zoanthropy, or Insania Canina [DISEASES OF THE JEWS]. In *Dan.* iv. 15 (iv. 12, according to the Latin) there seems an allusion to some species of insanity in the expression, 'even with a band of iron and brass' (*alligetur vinculo ferreo et aëro*, Vulg.); and the loss and return of reason is very clearly intimated in ver. 34, 'mine understanding returned to me, and I blessed the Most High.' Virgil (*Æclog.* 6) refers to this kind of madness in the case of the daughters of Proetus, who fancied themselves oxen, and made the plains resound with their bellowings:

Implerunt falsis mugitibus agros.

And a somewhat similar kind of insanity is described by Mr. Drummond Hay (*Western Barbary*, 1844, p. 65) as produced by the use of an intoxicating herb among the Gisorows, or Moorish fanatics. (See Heinroth, *Seelenst.* i. 65; Ader, *De ægrotis in Evang.*, p. 31, etc.; Meade, *Med. Sac.*; Muller, *De Nebuchadnezz. μεταμορφώσει*; Pusey, *Daniel the Prophet*, p. 425, ff., etc.)

The idea of an allegory has been revived in modern times, especially by De Wette (*Einleitung*, p. 257), who considers the accounts in Daniel too improbable, if literally understood, although he admits that they may have been founded on historical traditions. He considers the whole of the narrative in Daniel as referring to Antiochus Epiphanes, who he asserts is also signified by Belshazzar. In reference to the subject before us his translator adds, that 'Antiochus Epiphanes was called with perfect propriety *Epimanes*, or, the mad, which may have given the author a hint to represent the old and idealized monarch of his nation as bereft of reason, and reduced to the form and character of a beast. Here the historical fact is idealized, and an exquisite piece of sarcasm on the folly and brutality of Antiochus is produced' (*Dan.* iv. 14, 22-24, 29, 31, 32, 34). But the truth of this inference, however ingenious the arguments in its favour, depends altogether on the alleged spuriousness of the book of Daniel, whose genuineness is attested by the citations of the N. T. writers, and by the author of the 1st book of Maccabees, who was acquainted with the book of Daniel, even in the version of the Sept. (*Macc.* i. 54, comp. with *Dan.* ii. 27; and ii. 59 with *Dan.* iii. and vi.) [DANIEL.] De Wette can only avoid the force of this evidence by denying the authority of the N. T. writers in a case of the kind. He adds that it is a biased assumption of Hengstenberg to maintain that 1 Maccab. was originally written in Greek (*allein dass es ursprünglich griechisch . . . sei, ist eine partielle Annahme*) not Hebrew, as De Wette's English translator has it, and in the time of John Hyrcanus (B. C. 134-105), as according to him (De Wette) it appears from 1 Maccab. xvi. 23, 24, to have been written much latter [MACCABEES].

Some have fancied that there was an allusion to the disease of Nebuchadnezzar in the passage of Berosus quoted by Josephus (*Cont. Apion.*, i. 20). Ναβουχοδονόσορος μὲν οὖν μετὰ τὸ ἄρξασθαι τοῦ προειρημένου τέλους, ἐμπέσων εἰς ἄρρωστίαν, μετῃλλάξατο τὸν βίον. [See Hengstenberg, *Beitr.*

i. 105, ff.] There is another remarkable passage respecting him in Abydenus (ap. Eusebium, *Præpar. Evang.* ix. 41), where, having cited the passage from Megasthenes already referred to, he adds, upon the authority of the same writer, a speech of Nabuchodonosor, wherein, having been struck by some god, he foretold the destruction of Babylon by a 'Persian mule,' assisted by a Mede, the former boast of Assyria, after which he suddenly vanished. A reference has been supposed to exist in these words to Nebuchadnezzar's madness and consequent disappearance, but there is at most, as De Wette observes, only a traditional connection between them. Jahn (*Hebrew Commonwealth*) conceives the whole to be a tradition made up from his prophetic dreams, his insanity . . . and from Daniel's explanation of the well-known handwriting in the banqueting-hall of Belshazzar.

Objections have been made by Sir Thomas Browne and others to the proportions of Nebuchadnezzar's golden statue (Dan. iii.), said to have been 60 cubits, or 90 feet high, and only 6 cubits in breadth; for it is evident that the statue of a man ten times higher than its breadth exceeds all natural symmetry. Jahn (*Introd.*) supposes that this form might have a more august appearance, or have been retained from a rude antiquity. Some consider that the height of 90 feet included the

pedestal. Hengstenberg supposes that **נְבֻכַדְנֶצַּר** may mean an *obelisk*, as well as a statue, in which case the proportions would be symmetrical. Diodorus Siculus (lib. ii.) informs us that one of the images of massy gold found by Xerxes in the Temple of Bel, measured 40 feet in height, which would have been fairly proportioned to a breadth of 6 feet, measured at the shoulders. Prideaux supposes that this may have been the identical statue erected by Nebuchadnezzar, which, however, Jahn conceives was more probably only gilt, as a statue of gold could scarcely have been safe from robbers in the plain of Dura; but this conjecture of Jahn's seems by no means necessary (Pusey, *L. C.*, p. 441).—W. W.

NEBUSHASBAN (נְבוּשַׁשְׁבַן; Jer. xxxix. 13),

a follower of Nebu. Pers. **نیوششان**, the name of one of the Babylonian officers sent by Nebuzar-adan to take Jeremiah out of prison. He held the office of Rabsaris, or chief of the eunuchs.—W. W.

NEBUZAR-ADAN (נְבוּזַרְאֲדָן; Sept. *Nabou-ḡarôdân*, 1 Kings xxv. 8; Jer. xxxix. 9; xl. 1; lii. 12, etc.) The name of the captain of Nebuchadnezzar's guard, by whom the ruin of Jerusalem was completed. Gesenius translates this *Mercurii Dux Dominus*, deriving it from **נְבוּ**, **זַר** = **זַר**; but Fürst thinks a non-Semitic etymology must be sought for it, and suggests that it may be a compound of **זַר** = Skr. *gira*, *chief*, *captain*, Pers. *sar*, and **אֲדָן**, Skr. *dāna*, *cutter off*; so that Zar-Adan would have the same meaning as **רַב טַבַּחִים**, *chief of the executioners*, the title which this person bore, and which appears sometimes as his only designation (comp. 2 Kings xxv. 10, 12, 15); with Nebu prefixed for the consecration of the name. [CAPTAIN].—W. L. A.

NECHO (נֶכְחוֹ; Sept. *Nεχαώ*; Herodotus, *Nekós*), an Egyptian king, son and successor (according to Herodotus, ii. 158) of Psammetichus, and contemporary of the Jewish king Josias (B.C. 610). The wars and success of Necho, in Syria, are recorded by sacred as well as profane writers, affording an instance of agreement between them which the historical, and especially the Biblical student, would be glad to find of more frequent occurrence. Studious of military renown, and the furtherance of commerce, Necho, on ascending the throne of Egypt, applied himself to re-organize the army, and to equip a powerful fleet. In order to promote his purposes, he courted the Greeks, to whose troops he gave a post next to his Egyptians. He fitted out a fleet in the Mediterranean, and another in the Red Sea. Having engaged some expert Phœnician sailors, he sent them on a voyage of discovery along the coast of Africa. 'They were ordered (says Herod., iv. 42. 3) to start from the Arabian Gulf, and come round through the pillars of Hercules (the straits of Gibraltar) into the North Sea, and so return to Egypt. Sailing, therefore, down the gulf, they passed into the Southern Ocean, and when autumn arrived, they laid up their ships, and sowed the land. Here they remained till harvest time, when, having reaped the corn, they continued their voyage. In this manner they occupied two years, and the third having brought them by the pillars of Hercules to Egypt, they related what to me appears incredible, that they had the sun on their right hand; and by this means was the form of Africa first known.' Similar expeditions round Africa were performed by other people (Herod., *ut supra*; Plin. *Hist. Nat.* ii. 67; Arrian, *Rer. Ind.* ad fin.) The honour, however, of being the first to equip an expedition for the purpose of circumnavigating Africa belongs to Pharaoh-Necho, who thereby ascertained the peninsular form of that continent, twenty-one centuries before the Cape of Good Hope was seen by Diaz, or doubled by Vasco de Gama. The assertion by Herodotus, that the sun (when rising) was on the right hand of these Egyptian navigators, though incredible to him, is satisfactory to his modern readers, who are indebted to his doubts for proof of a fact which might otherwise have been called in question.

Before entering on this voyage of discovery, Necho had commenced re-opening the canal from the Nile to the Red Sea, which had been cut many years before by Sesostris or Rameses the Great. The work, however, if we may believe Herodotus, was abandoned, an oracle warning the Egyptian monarch that he was labouring for the barbarian (Herod. ii. 158).

Necho also turned his attention to the Egyptian conquests already made in Asia; and, fearing lest the growing power of the Babylonians should endanger the territories acquired by the arms of his victorious predecessors, he determined to check their progress, and to attack the enemy on his own frontier. With this view he collected a powerful army, and entering Palestine, followed the route along the sea-coast of Judæa, intending to besiege the town of Carchemish on the Euphrates. But Josiah, king of Judah, offended at the passage of the Egyptian army through his territories, resolved to impede, if unable to prevent, their march, Necho sent messengers to induce him to desist.

assuring him that he had no hostile intentions against Judæa, 'but against the house wherewith I have war; for God commanded me to make haste.' This conciliatory message was of no avail. Josiah posted himself in the valley of Megiddo, and prepared to oppose the Egyptians. Megiddo was a city in the tribe of Manasseh, between forty and fifty miles to the north of Jerusalem, and within three hours of the coast. It is called by Herodotus Magdolos. In this valley the feeble forces of the Jewish king, having attacked Necho, were routed with great slaughter. Josiah being wounded in the neck with an arrow, ordered his attendants to take him from the field. Escaping from the heavy shower of arrows with which their broken ranks were overwhelmed, they removed him from the chariot in which he had been wounded, and placing him in a 'second one that he had,' they conveyed him to Jerusalem, where he died (2 Kings xxiii. 29, *seq.*; 2 Chron. xxxv. 20, *seq.*)

Intent upon his original project, Necho did not stop to revenge himself upon the Jews, but continued his march to the Euphrates. Three months had scarcely elapsed, when, returning from the capture of Carchemish and the defeat of the Chaldeans, he learned that, though Josiah had left an elder son, Jehoahaz had caused himself to be proclaimed king on the death of his father, without soliciting Necho to sanction his taking the crown. Incensed at this, he ordered Jehoahaz to meet him 'at Riblah, in the land of Hamath;' and having deposed him, and condemned the land to pay a heavy tribute, he carried him a prisoner to Jerusalem. On arriving there, Necho made Eliakim, the eldest son, king, changing his name to Jehoiakim; and taking the silver and gold which had been levied upon the Jewish nation, he returned to Egypt with the captive Jehoahaz, who there terminated his short and unfortunate career. Herodotus says that Necho, after having routed the Syrians (the Jews) at Magdolos, took Cadytis, a large city of Syria, in Palestine, which, he adds, is very little less than Sardis (ii. 159, iii. 5). By Cadytis there is scarcely a doubt he meant Jerusalem; the word is only a Greek form of the ancient, as well as the modern, name of that city. It is, however, to be regretted that the mural sculptures of Egypt present no commemoration of these triumphs on the part of Necho; the sole record of him which they give being the name of Necho, found among the hieroglyphics in the great hall of Karnak. His oval also occurs on vases, and some small objects of Egyptian art.

Pleased with his success, the Egyptian monarch dedicated the dress he wore to the Deity who was supposed to have given him the victory. He did not long enjoy the advantages he had obtained. In the fourth year after his expedition, being alarmed at the increasing power of the Babylonians, he again marched into Syria, and advanced to the Euphrates. The Babylonians were prepared for his approach. Nebuchadnezzar completely routed his army, recovered the town of Carchemish, and, pushing his conquests through Palestine, took from Necho all the territory belonging to the Pharaohs, from the Euphrates to the southern extremity of Syria (2 Kings xxiv. 7; Jer. xli. 2; 2 Chron. xxxvi. 9; 2 Kings xxiv. 8). Nebuchadnezzar deposed Jehoachin, who had succeeded his father, and carried the warriors and treasures away to

Babylon; a short time previous to which Necho died, and was succeeded by Psammetichus II. (Wilkinson's *Anc. Egyptians*, vol. i. 157, *seq.*)

According to Manetho (Euseb. *Chron. Armen.*, i. 219), Necho was the sixth king in the twenty-sixth dynasty, successor of Psammetichus, and as there had been another of the same name, he was properly Necho the Second. The period of his reign was, according to Manetho, six, according to Herodotus sixteen, years (consult Gesenius, *Isaiah*, i. 596)—J. R. B.

NECHOSHETH (נְחֹשֶׁת; Χαλκός), frequently translated in the A. V. *brass*, more properly means *copper*, usually in a wrought state, and sometimes also in the state of bronze. Copper is commonly found in pyrites, quartz, or spar, in veins; hence Job says 'Nechosheth is molten [or fused] out of the stone' (xxviii. 2). It is very hard, elastic, and durable; and on this account in early times it was used for most purposes for which iron came afterwards to be used (Hesiod, *Op. et Dies*, 150; Lucret. *De Rer. Nat.* v. 1287). In Scripture it is mentioned as employed for armour and weapons (1 Sam. xvii. 5, 6, 38; 2 Sam. xxii. 35; Ps. xviii. 35 [where the A. V. gives incorrectly *steel*; as also Job xx. 24]; 1 Kings xiv. 27; for taches or hooks (Exod. xxvi. 11; xxxvi. 18); for covering the altar (Exod. xxvii. 2); for pillars and their ornaments (1 Kings vii. 13-21); for vessels, both large and small (2 Kings xxv. 13; 1 Chron. xviii. 8); for mirrors (Exod. xxxviii. 8; comp. Job xxxvii. 18); and for various utensils (2 Chron. iv. 16). It is also used for articles made of copper or bronze; as chains or fetters (Judg. xvi. 21; 2 Sam. iii. 34; 2 Kings xxv. 7; Jer. xxxix. 7; Lam. iii. 7). As compared with gold and silver it was esteemed vile, and so became metaphorically the designation of a vile person (Jer. vi. 28). It is also metaphorically used to designate that which is strong (Ps. cvii. 16; Jer. i. 18; xv. 20). A peculiar usage of the word occurs Ezek. xvi. 36, of which different interpretations have been given. Gesenius understands by it *money*, like the Latin *aes*; but there is no evidence that the Hebrews used copper money, and besides it seems to give a feeble turn to the passage to understand the word so here. Hävernick thinks the allusion is to the gifts which the harlot had bestowed (ver. 33), having become worthless; they were of silver or gold, but they should be poured out as base copper; an interpretation which seems somewhat fanciful and far fetched. Fürst understands by it the *puerilia muliebria*, and supposes the meaning of 'Thy shame shall be poured forth' to be the same as that of תְּנוּנֹת נִשְׁפָּךְ in ver. 15, viz., thy whoredoms shall be profuse, and without restraint. He arrives at this, however, by making נְחֹשֶׁת mean bottom or lower part (for which Ezek. xxiv. 11, to which he refers, gives no authority), and so the lower part of the trunk, the pudenda. This is quite gratuitous, and not less so is it to make the words 'Thy shame was poured forth,' mean, 'Thy whoredom was carried on.' May not *Nechosheth* be used here simply as a designation of what is worthless, and the meaning be that her worthless favours were profusely bestowed?—W. L. A.

NECHOTH (נְכֹוֹת). This word occurs twice in the book of Genesis, and no doubt indicates a product of Syria, for in one case we find it carried

into Egypt as an article of commerce, and in another sent as a present into the same country. It occurs in the same passages as *ladanum*, which is translated *myrrh* in the A. V. Many of the same general observations will therefore apply to both [LOTH]. Nechoth has unfortunately been rendered *spicery*. This it is not likely to have meant, at least in the present sense of the term, for such commodities were not likely to be transported into Egypt from Gilead, though many eastern products were, no doubt, carried north by caravans into Asia Minor, up the Euphrates, and by Palmyra into Syria. In the present case, however, all the articles mentioned seem to be products indigenous in Syria. But it is necessary to attend strictly to the original names, for we are apt to be misled by the English translation. Thus, in Gen. xxxvii. 25, we read, 'Behold, a company of Ishmaelites came from Gilead with their camels, bearing *spicery* (*nechoth*), and balm (*tzeri*), and myrrh (*loth*), going to carry it down to Egypt.' To these men Joseph was sold by his brethren, when they were feeding their flocks at Dothan, supposed to be a few miles to the north of Sebaste, or Samaria. It is curious that Jacob, when desiring a present to be taken to the ruler of Egypt, enumerates nearly the same articles (Gen. xliii. 11), 'Carry down the man a present, a little balm (*tzeri*), and a little honey (*debash*), *spices* (*nechoth*) and myrrh (*loth*);' 'Sumite de laudatissimis hujus terræ fructibus in vasis vestris,' as Bochart explains it. (See the several words.)

Bochart (*Hieroicozon*, ii. lib. iv. c. 12) enters into a learned exposition of the meaning of *necoth*, of which Dr. Harris has given an abridged view in his article on spices. Bochart shows that the true import of *necoth* has always been considered uncertain, for it is rendered *wax* by the paraphrast Jonathan, in the Arabic version of Erpenius, and in Beresith Rabba (sec. 91, near the end). Others interpret it very differently. The Septuagint renders it *θυμιαμα*, *perfume*, Aquila *storax*, the Syrian version *resin*, the Samaritan *balsam*, one Arabic version *khurnoob* or *carob*, another *sumugha* (or gum), Kimchi *a desirable thing*, Rabbi Selomo *a collection of several aromatics*. Bochart himself considers it to mean *storax*, and gives six reasons in support of his opinion, but none of them appears of much weight. *Storax*, no doubt, was a natural product of Syria, and an indigenous product seems to be implied; and Jerome (Gen. xliii. 11) follows Aquila in rendering it *styrax*. Rosenmüller, in his *Bibl. Bot.*, p. 165, Eng. transl., adopts *tragacanth* as the meaning of *necoth*, without expressing any doubt on the subject; stating that 'The Arabic word (نكة or نكة *neka* or *nek'at*), which is

analogous to the Hebrew, denotes that gum which is obtained from the tragacanth, or, as it is commonly called, by way of contraction, *traganth* shrub, and which grows on Mount Lebanon, in the Isle of Candia, and also in Southern Europe.' We have not been able to find any word similar to *necoth*, indicating the tragacanth, which, in our own MS. *Materia Medica*, is given under the Arabic name of *kilad*, sometimes pronounced *kithad*; and, indeed, it may be found under the same name in Avicenna and other Arabic authors. Tragacanth is an exudation from several species of the genus *Astragalus*, and subdivision *tragacantha*, which is produced in Crete, but chiefly in Northern

Persia and in Koordistan. In the latter province, Dr. Dickson of Tripoli saw large quantities of it collected from plants, of which he preserved specimens, and gave them to Mr. Brant, British consul at Erzeroum, by whom they were sent to Dr. Lindley. One of these, yielding the best tragacanth, proved to be *A. gummifer* of Labillardière. It was found by him on Mount Lebanon, where he ascertained that tragacanth was collected by the shepherds. It might therefore have been conveyed by Ishmaelites from Gilead to Egypt. It has in its favour, that it is a produce of the remote parts of Syria, is described by ancient authors, as Theophrastus, Dioscorides, etc., and has always been highly esteemed as a gum in Eastern countries: it was, therefore, very likely to be an article of commerce to Egypt in ancient times. In Richardson's

*Arabic Dictionary* we find نكدة *nakdt*, translated as meaning the best part of corn (or dates) when sifted or cleaned; also *nukayet*, the choicest part of anything cleaned, but sometimes also the refuse. —J. F. R.

NEEDLEWORK. This is the rendering given in the A. V. to the Heb. רִקְמָה (Judg. v. 30; Ps. xlv. 15), and also to רִקְם (Exod. xxvi. 36; xxvii. 16; xxviii. 39; xxxvi. 37; xxxviii. 18), though this latter, being the participle of the verb רִקַּם, ought rather to have been translated *needleworker*. Elsewhere the noun is translated 'broidered work' (Ezek. xvi. 10, 13, 18, etc.). Derived from רִקַּם, which signifies to variegate, deck with colours, adorn with versicoloured figures, there can be no doubt that the word designates an article decorated with variety of colours; but whether this was done with the needle or in the loom remains somewhat uncertain. The LXX. give their verdict for the former (ῥή ποικίλα τοῦ βαφιδευτοῦ, Exod. xxvii. 16; xxxviii. 23); and so do the Talmudists and the Rabbins. Josephus, on the other hand, asserts that the variety of colours in the curtain of the tabernacle was produced in the loom (φολυκος βαφαῖς συγκεκραμένοις, *Antiq.* iii. 6. 4). This is favoured also by the use of the verb in Ps. cxxxix. 15, where the reference is to the structure of a fabric, not to the adorning of it after it is formed. Gesenius takes the other view, and contends that רִשָּׁב denotes the act of the *plumarius*, or weaver of divers colours, while רִקַּם is properly that of the worker with the needle. In support of this is urged the affinity of רִקַּם to the Arab. رِقْم, a word which

appears in the Span. *recamar*, and the Ital. *ricamar*, to embroider with the needle. But the Arab. word simply means, to produce a fabric with stripes, whether that be done by the needle or in the loom ('striis signavit, seu strias intexit panno,' Freytag, *Lex.* s. v.); so that nothing decisive can be inferred from it; and the use of רִקַּם and רִשָּׁב in Scripture by no means authorises the distinction which Gesenius makes. Thus, *ex. gr.*, רִקְמָה is used in the dual of a fabric variegated on both sides (Judg. v. 30), which cannot refer to colours added by stitching on pieces of cloth, and is more likely to refer to colours woven in than to embroidery done by the needle; it is also used of the varicoloured sails of the Egyptians (Ezek. xxvii. 16), which were 'covered with fanciful figures, flowers, and other devices, with squares in cheques,

and rich borders worked in various colours' (Wilkinson, *Egyptians in the time of the Pharaohs*, p. 113). The Hebrews learned the art of weaving from the Egyptians (Joseph. *Antiq.*, bk. iii. 7. 2), and as the art of embroidering with the needle was also common in Egypt, there is every probability that they acquired that also. Without, therefore, insisting upon a precision and a certainty for which we do not possess materials, we may admit *needlework* as ranking among the arts practised by the Hebrews.—W. L. A.

NEGEB (נֶגֶב; A. V., 'the south,' 'the south country'; ἡ ἐρημος; γῆ πρὸς λίβα, etc.; *Meradies*). There are in the Bible several words which are usually translated in our A. V. as appellatives, but which the sacred writers appear to have employed, at least in many cases, as geographical proper names;—such as ARABAH, usually rendered 'plain,' but in most cases the name of the Jordan valley; MISHOR, 'the plain,' the proper name of the table-land of Moab; SHEPHELAH, 'the vale' or 'valley,' the geographical name of the plain of Philistia. To these may be added the name NEGEB, which is often employed by the sacred writers in a topographical sense, indicating not 'the south' abstractly, but, like Shephelah and Arabah, a specific region or province. Thus in Gen. xii. 9, 'And Abram journeyed (from Bethel), going on still *toward the south*' (הַנֶּגֶב), 'to the Negeb'; and afterwards we read, 'And Abram went up out of Egypt . . . *into the south*' (הַנֶּגֶב), 'to the Negeb'; chap. xiii. 1. And of Isaac it is said, 'He dwelt *in the south country*' (בְּאֶרֶץ הַנֶּגֶב), 'in the country of Negeb,' xxiv. 62). Still more plainly does the word appear as a proper name in Deut. i. 7, where four topographical names are used together, 'Take your journey, and go to the mount of the Amorites, and unto all nigh thereunto, *in the plain, in the hills, and in the vale, and in the south*,' which ought to be rendered 'in Arabah, and in the mountain (that is, of Judah, 'the hill country' of the N. T.), and in Shephelah, and in Negeb.' (See also Num. xiii. 17, 29; xxi. 1; Deut. xxiv. 3; Josh. x. 40, xii. 8, xv. 21; Judg. i. 9; 1 Sam. xxx. 1; Jer. xvii. 26, etc.)

The Negeb is distinguished by several names taken from the tribes that inhabited it, or the country to which it was attached. Thus there is the *Negeb of the Cherethites* or Philistines (1 Sam. xxx. 14); *Negeb of the Kenites*, *Negeb of the Jerahmeelites*, and *Negeb of Judah* (1 Sam. xxvii. 10); the *Negeb of Caleb* (xxx. 14). At the time of the Exodus it was chiefly inhabited by the Amalekites (Num. xiii. 29). These statements, with various other incidental notices, while they do not mark the precise boundaries of the territory, yet clearly point out its position and extent. On the north it was bounded by the Shephelah and the mountains of Judah. A line drawn from Wady Sheriah eastward to Khuweilifeh, and then to Maon, and from thence south-east to the extremity of the Dead Sea, would pretty accurately mark its northern border. On the east it bordered on the Arabah as far south as the parallel of Kadesh. Its southern border cannot now be defined; but it did not reach either to the peninsula of Sinai or to Egypt. (See an interesting little work by the Rev. E. Wilton, entitled, *The Negeb, or South Country of Scripture*, pp. 1-22.)

The physical geography of the Negeb is different

from that of any part of Palestine. It consists of wide rolling downs, mostly bare and desolate, burned up in summer by the unclouded sun, but covered in winter and spring with grass and green herbs, affording excellent pasturage for sheep, goats, and camels. In some places along the foot of the mountains, and in the beds of broad valleys, the soil is capable of cultivation. The whole region is arid. Springs and wells are few and far between; perennial streams are unknown; but the country is intersected by deep and rocky wadys (Heb. אַפְסִיקִים), down whose beds torrents flow after heavy rain; hence the allusion of the Psalmist, 'Turn again our captivity, O Lord, as the streams in the *Negeb*' (cxvi. 4).

It is hoped that this explanation of an important geographical term will serve to throw light on many passages of Scripture, such as Jer. xxxii. 44; xxxiii. 13; Zech. vii. 7; Gen. xiii. 1, etc. For fuller information, see the work already mentioned, which, though inaccurate on many points of detail, yet contains a large mass of useful matter.—J. L. P.

NEGINAH, NEGINOTH. [PSALMS.]

NEGROPONTI. [IKRITI.]

NEHELOMITE (נְחֻלְמִי, Sept. Αἰλαμῖτης), a patronymic of Shemaiah the false prophet (Jer. xxix. 24, 31, 32); whence derived is uncertain, but probably a family name. Some suppose an allusion under it to Deut. xiii. 2 [1], 4, where the false prophet is called 'a dreamer of dreams' חֹלֶם חֲלוֹם, *cholem chalom*); but this is very improbable.—†.

NEHEMIAH (נְחֵמְיָה, *comforted of Jehovah*; Sept. Νεεμίας). Three persons of this name occur in Scripture; one, the son of Azbuk (Neh. iii. 16), respecting whom no more is known than that he was ruler in Beth-zur, and took a prominent part in repairing the wall of Jerusalem [BETH-ZUR]. Another is mentioned (Ezra ii. 2; Neh. vii. 7) among those who accompanied Zerubbabel on the first return from captivity. Nothing further is known of this man, though some writers (see Carpzov, *Introd. ad Lib. Bib. Vtd. Testamenti*, Pt. i. 340, *seq.*) hold him, without valid reasons, to be the same with the well-known Jewish patriot

NEHEMIAH, whose genealogy is unknown, except that he was the son of Hachaliah (Neh. i. 1), and brother of Hanani (Neh. vii. 2; comp. Neh. i. 2). Some think he was of priestly descent, because his name appears at the head of a list of priests in Neh. x. 1-8; but it is obvious, from Neh. ix. 38, that he stands there as a prince, and not as a priest—that he heads the list because he was head of the nation. The Vulgate, in 2 Maccab. i. 21, calls him 'sacerdos Nehemias'; but this is a false version of the Greek, which has ἐκέλευσε τοὺς ἱερεῖς Νεεμίας, and not ὁ ἱερεὺς, which the Latin would require. The Syriac agrees with the Greek. Others with much probability infer, from his station at the Persian court and the high commission he received, that he was, like Zerubbabel, of the tribe of Judah and of the house of David (Carpzov, *Introductio*, etc., Pt. i. 339).

While Nehemiah was cupbearer in the royal palace at Shushan, in the twentieth year of Artaxerxes Longimanus, or 444 years B.C. [ARTAXERXES], he learned the mournful and desolate

condition of the returned colony in Judæa. This filled him with such deep and prayerful concern for his country, that his sad countenance revealed to the king his 'sorrow of heart'; which induced the monarch to ascertain the cause, and also to vouchsafe the remedy, by sending him, with full powers, to rebuild the wall of Jerusalem, and 'to seek the welfare of the children of Israel.' Being furnished with this high commission, and enjoying the protection of a military escort (ch. ii. 9), Nehemiah reached Jerusalem in the year B.C. 444, and remained there till B.C. 432, being actively engaged for twelve years in promoting the public good (ch. v. 14). The principal work which he then accomplished was the rebuilding, or rather the repairing, of the city wall, which was done 'in fifty and two days' (ch. vi. 15), notwithstanding many discouragements and difficulties, caused chiefly by Sanballat, a Moabite of Horonaim, and Tobiah, an Ammonite, who seem to have been leading men in the rival and unfriendly colony of Samaria (ch. iv. 1-3; ch. iii. 33-35 in *Heb.* text). These men, with their allies among the Arabians, Ammonites, and Ashdodites (ch. iv. 7; ch. iv. 1 in *Heb.*), sought to hinder the re-fortifying of Jerusalem, first by scoffing at the attempt; then by threatening to attack the workmen—which Nehemiah averted by 'setting a watch against them day and night,' and arming the whole people, so that 'every one with one of his hands wrought in the work, and with the other hand held a weapon' (ch. iv. 7-18; ch. iv. 1-13 in *Heb.*); and finally, when scoffs and threats had failed, by using various stratagems to weaken Nehemiah's authority, and even to take his life (ch. vi. 1-14). But in the midst of these dangers from without, our patriot encountered troubles and hindrances from his own people, arising out of the general distress, which was aggravated by the cruel exactions and oppression of their nobles and rulers (ch. v. 1-5). These popular grievances were promptly redressed on the earnest and solemn remonstrance of Nehemiah, who had himself set a striking example of retrenchment and generosity in his high office (ch. v. 6-19). It appears also (ch. vi. 17-19) that some of the chief men in Jerusalem were at that time in conspiracy with Tobiah against Nehemiah. The wall was thus built in 'troublous times' (Dan. ix. 25); and its completion was most joyously celebrated by a solemn dedication under Nehemiah's direction (ch. xii. 27-43).

Having succeeded in fortifying the city, our reformer turned his attention to other measures in order to secure its good government and prosperity. He appointed some necessary officers (ch. vii. 1-3; also ch. xii. 44-47), and excited among the people more interest and zeal in religion by the public reading and exposition of the law (ch. viii. 1-12), by the unequalled celebration of the Feast of Tabernacles (ch. viii. 13-18), and by the observance of a national fast, when the sins of the people and the iniquities of their fathers were publicly and most strikingly confessed (ch. ix.), and when also a solemn covenant was made by all ranks and classes 'to walk in God's law,' by avoiding intermarriages with the heathen, by strictly observing the Sabbath, and by contributing to the support of the temple-service (ch. x.) But the inhabitants of the city were as yet too few to defend it and to ensure its prosperity; and hence Nehemiah brought one out of every ten in the country to take up his abode in

the ancient capital, which then presented so few inducements to the settler, that 'the people blessed all the men that willingly offered themselves to dwell at Jerusalem' (ch. vii. 4; also ch. xi. 1-19).

In these important public proceedings, which appear all to have happened in the first year of his government, Nehemiah enjoyed the assistance of Ezra, who is named on several occasions as taking a prominent part in conducting affairs (ch. viii. 1, 9, 13; xii. 36). Ezra had gone up to Jerusalem thirteen years before according to some, or thirty-three years according to others; but on either reckoning, without supposing unusual longevity, he might well have lived to be Nehemiah's fellow-labourer [EZRA]. These contemporaries are alike eminent among the benefactors of the Jewish people—alike patriotic and zealous, though not uniform in character, or the same in operation. In the character of Ezra we find no indication of the self-complacency which forms a marked feature in that of Nehemiah. The former, in accordance with his priestly calling, laboured chiefly in promoting the interests of religion, but the latter had most to do with the general affairs of government; the one was in charge of the temple, the other of the state.

Nehemiah, at the close of his successful administration, 'from the twentieth year even to the thirty-second year of Artaxerxes the king' (ch. v. 14), returned to Babylon in the year B.C. 432, and resumed, as some think, his duties as royal cup-bearer.

He returned, however, after a while, to Jerusalem, where his services became again requisite, in consequence of abuses that had crept in during his absence. His stay at the court of Artaxerxes was not very long (certainly not above nine years); 'for after certain days he obtained leave of the king and came to Jerusalem' (ch. xiii. 6, 7). The

phrase 'after certain days' (לְקֵץ יָמִים, *at the end of days*) is indeed quite vague, and hence many take it, as in our common biblical chronology, for the space of one year, while others, on the contrary, reckon it a period of about twenty years, and so consider the return to have happened about B.C. 410 (Prideaux, i. 520; Jahn, *Einleitung ins A. Test.*, ii. 288; Winer, *Real-wörterbuch*). But the former reckoning appears too short, for it is exceedingly improbable that affairs could fall into such confusion had Nehemiah been absent only one year; and the latter, though it has much in its favour, is too long, for it makes Nehemiah return *after* the death of the very king from whom he obtained leave to go back. Artaxerxes Longimanus died in B.C. 423, having reigned forty-one years; and hence Nehemiah's return to Jerusalem cannot be dated *later* than B.C. 423, which allows only nine years for his stay at Babylon. If, then, we date his return about B.C. 424, we at once bring it within the reign of Artaxerxes, and allow time enough for abuses to creep in during his absence, or at least for the particular abuse which is expressly named (ch. xiii. 4-9) as having actually arisen (Hävernick, *Einleitung ins A. Test.*, ii. 324).

After his return to the government of Judæa, Nehemiah enforced the separation of all the mixed multitude from Israel (ch. xiii. 1-3); and accordingly expelled Tobiah the Ammonite from the chamber which the high-priest, Eliashib, had prepared for him in the temple (ch. xiii. 4-9).

Better arrangements were also made for the support of the temple-service (ch. xiii. 10-14), and for the rigid observance of the Sabbath (ch. xiii. 15-22). One of the last acts of his government was an effort to put an end to mixed marriages, which led him to 'chase' away a son of Joiada the high-priest, because he was son-in-law to Sanballat the Heronite (ch. xiii. 23-29). The duration of this second administration cannot be determined: only it is evident that Joiada was high-priest during that period. Now Joiada, according to some chronologists, succeeded his father Eliashib in the year B.C. 413; and hence we may gather that Nehemiah's second rule lasted at least ten years, namely, from B.C. 424 to 413. It is not unlikely that he remained at his post till about the year B.C. 405, towards the close of the reign of Darius Nothus, who is generally supposed to be 'Darius the Persian,' mentioned in ch. xii. 22 [DARIUS]. At this time Nehemiah would be between sixty and seventy years old, if we suppose him (as most do) to have been only between twenty and thirty when he first went to Jerusalem. That he lived to be an old man is thus quite probable from the sacred history; and this is expressly declared by Josephus, who (*Antiq.* xi. 5. 6) states that he died at an advanced age (*ἐἰς γῆρας ἀφικόμενος*). Of the place and year of his death nothing is known.

Besides the account in Josephus, there are some notices of Nehemiah in the Apocrypha. The Son of Sirach (ch. xlix. 13) mentions him with great honour as the rebuilder of the city walls; and in 2 Maccab. i. 19-36, he is said to have discovered the holy fire that had been concealed by Jeremiah the prophet, at the destruction of the temple, which is clearly a mere legend. In 2 Maccab. ii. 13, he is said to have formed a library, and collected the books of the kings and prophets, and of David; and hence some think it probable that he was concerned in forming the canon of Hebrew Scriptures—which is quite credible [CANON].

Two titles are given to Nehemiah, expressive of his office. One is *נְהִימְיָהּ*, *pechah* (ch. xii. 26), which is translated 'governor.' It is considered a Persian word, meaning *friend* or *assistant* of a king, and of the same origin as *pasha*, still used for the governor of a Turkish province. The other is *תִּרְשָׁתָא*, *tirshatha*, in ch. viii. 9, which might also be translated 'governor,' as it comes probably from a Persian word, meaning *severe* or *stern*, and hence applicable to a ruler; or perhaps from a Zend root meaning to *command*. But in Neh. vii. 65, 70, this title denotes not Nehemiah, but Zerubbabel, as is evident from Ezra ii. 63-70.—B. D.

NEHEMIAH, BOOK OF. This, which bears the title *נְהִימְיָהּ*, *Nehemiah's Words*, was anciently connected with Ezra, as if it formed part of the same work (Eichhorn, *Einleitung*, ii. 627). This connection is still indicated by its first word, *וַיְהִי*, 'And it came to pass.' It arose, doubtless, from the fact that Nehemiah is a sort of continuation of Ezra [EZRA]. From this circumstance some ancient writers were led to call this book the 2d book of Ezra, and even to regard that learned scribe as the author of it (Carpzov, *Introductio*, etc., p. 336). There can, however, be no reasonable doubt that it proceeded from Nehemiah, for its style and spirit, except in one portion, are wholly unlike Ezra's. Here we find no Chaldee documents, as in Ezra, though we might expect

some from ch. ii. 7, 8, 9, and ch. vi. 5; and here also the writer discovers a species of egotism never manifested by Ezra (Neh. v. 14-19; Eichhorn, *Einleitung ins A. Test.*, ii. 619).

The canonical character of Nehemiah's work is established by very ancient testimony. It should be noticed, however, that this book is not expressly named by Melito of Sardis (A.D. 170) in his account of the sacred writings; but this creates no difficulty, since he does mention Ezra, of which Nehemiah was then considered but a part (Eichhorn, *Einleitung*, ii. 627).

The contents of the book have been specified above in the biography of the author. The work can scarcely be called a history of Nehemiah and his times. It is rather a collection of notices of some important transactions that happened during the first year of his government, with a few scraps from his later history. The contents appear to be arranged in chronological order, with the exception perhaps of ch. xii. 27-43, where the account of the dedication of the wall seems out of its proper place: we might expect it rather after ch. vii. 1-4, where the completion of the wall is mentioned.

As to the date of the book, it is not likely that it came from Nehemiah's hand till near the close of his life. Certainly it could not have been all written before the expulsion of the priest, recorded in ch. xiii. 23-29, which took place about the year B.C. 413.

While the book as a whole may be considered to have come from Nehemiah, it consists in part of compilation. He doubtless wrote the greater part himself, but some portions were evidently taken from other works, and some indicate a date later than his day. It is allowed by all that he is, in the strictest sense, the author of the narrative from ch. i. to ch. vii. 5 (Hävernick, *Einleitung*, ii. 304). The account in ch. vii. 6-73 is avowedly compiled, for he says in ver. 5, 'I found a register,' etc. This register we actually find also in Ezra ii. 1-70: hence it might be thought that our author borrowed this part from Ezra; but it is more likely that they both copied from public documents, such as 'the book of the chronicles' (*דְּבָרֵי הַיָּמִים*), mentioned in Neh. xii. 23. Had Nehemiah taken his list from Ezra, we might expect agreement, if not identity, in the contents; whereas the two registers present an amazing number of discrepancies, which cannot now be reconciled, though some try to account for them by supposing that they were taken from public records that were discordant. Others, however, think it possible that these discrepancies arose from the errors of transcribers.

Chapters viii.-x. were probably not written by Nehemiah, since the narrative respecting him is in the third person (ch. viii. 9; x. 1), and not in the first, as usual (ch. ii. 9-20). Hävernick, indeed (*Einleitung*, ii. 305-308), makes it appear, from the contents and style, that Ezra was the writer of this portion. The remaining chapters (xi.-xiii.) also exhibit some marks of compilation (ch. xii. 26, 47); but there are, on the contrary, clear proofs of Nehemiah's own authorship in ch. xii. 27-43, and in ch. xiii. 6-31; and hence Hävernick thinks (*Einleitung*, ii. 315-319) he wrote the whole except ch. xii. 1-26, which was probably added by a later writer, who took it from 'the book of the chronicles,' mentioned in ver. 23.

The mention of Jaddua as a high-priest, in ch. xii. 11, 22, has occasioned much perplexity. This
